86. Well. For the purposes of these rules, “well” means “injection well.” ()

011. -- 014. (RESERVED)

015. VIOLATIONS, FORMAL NOTIFICATION AND ENFORCEMENT.

- 01. Violations.** It shall be a violation of these rules for any owner or operator to: ()
 - a. Fail to comply with a permit or authorization, or terms or conditions thereof; ()
 - b. Fail to comply with applicable standards for water quality; ()
 - c. Fail to comply with any permit application notification or filing requirement; ()
 - d. Knowingly make any false statement, representation or certification in any application, report, document or record filed pursuant to these rules, or terms and conditions of an issued permit; ()
 - e. Falsify, tamper with or knowingly render inaccurate any monitoring device or method required to be maintained or utilized by the terms and conditions of an issued permit; ()
 - f. Fail to respond to any formal notification of a violation when a response is required; or ()
 - g. Decommission a well in an unauthorized manner. ()

02. Additional. It shall be a violation of these rules for any person to construct, operate, maintain, convert, plug, decommission or conduct any other activity in a manner which results or may result in the unauthorized injection of a hazardous waste or of a radioactive waste by an injection well. ()

03. Formal Notification. Formal notification of violations may be communicated to the owner or operator with a letter, a notice of violation, a compliance or enforcement order or other appropriate means. ()

04. Enforcement. Violation of any of the provisions of the Injection Well Act (Chapter 39, Title 42, Idaho Code) or of any rule, regulation, standard or criteria pertaining to the Injection Well Act may result in the Director initiating an enforcement action as provided under Chapters 17 and 39, Title 42, Idaho Code. ()

016. -- 019. (RESERVED)

020. HEARING BEFORE THE WATER RESOURCE BOARD.

- 01. General.** All hearings before the IWRB will be conducted in accordance with Chapter 52, Title 67,

Idaho Code, at a place convenient to the owner and/or operator. For purposes of such hearings, the IWRB or its designated hearing officer shall have power to administer oaths, examine witnesses, and issue in the name of the said Board subpoenas requiring testimony of witnesses and the production of evidence relevant to any matter in the hearing. Judicial review of the final determination by the IWRB may be secured by the owner by filing a petition for review as prescribed by Chapter 52, Title 67, Idaho Code, in the District Court of the county where the injection well is situated or proposed to be located. The petition for review shall be served upon the Chairman of the IWRB and upon the Attorney General. ()

02. Hearings on Conditional Permits, Disapproved Applications, or Petitions for Exemption. Any owner or operator aggrieved by the approval or disapproval of an application, or by conditions imposed upon a permit, or any person aggrieved by the Director's decision on a petition for exemption under Section 025 of these rules, shall be afforded an opportunity for a hearing before the IWRB or its designated hearing officer. Written notice of such grievance shall be transmitted to the Director within thirty (30) days after receipt of notice of such approval, disapproval or conditional approval. Such hearing shall be held for the purpose of determining whether the permit shall be issued, whether the conditions imposed in a permit are reasonable, whether a change in circumstances warrants a change in conditions imposed in a valid permit, or whether the Director's decision on a petition for exemption should not be changed. ()

03. Hearings on Permit Cancellations. When the Director has reason to believe the operation of an injection well for which a permit has been issued is interfering with the right of the public to withdraw water for beneficial uses, or is causing unreasonable contamination of a drinking or other ground water source as provided for in Title 42, Chapter 39, Idaho Code, the permit may be canceled by the Director. Prior to the cancellation of such permit there shall be a hearing before the IWRB for the purpose of determining whether or not the permit should be canceled. At such hearing, the Director shall be the complaining party. At least thirty (30) days prior to the hearing, a notice, which shall be in accordance with Chapter 52, Title 67, Idaho Code, shall be sent by certified mail to the owner or operator whose permit is proposed to be canceled. The Board shall affirm, modify, or reject the Director's decision and make its decision in the form of an order to the Director. ()

021. -- 034. (RESERVED)

035. CLASSIFICATION OF INJECTION WELLS.

01. Classification of Injection Wells. For the purposes of these rules, injection wells are classified as follows: ()

a. Class I: ()

i. Wells used by generators of hazardous waste or owners or operators of hazardous waste management facilities to inject hazardous waste beneath the lowermost formation containing, within one-quarter (1/4) mile of the well bore, an underground source of drinking water. ()

ii. Other industrial and municipal disposal wells which inject fluids beneath the lowermost formation containing, within one-quarter (1/4) mile of the well bore, an underground source of drinking water. ()

iii. Radioactive waste disposal wells which inject fluids below the lowermost formation containing an underground source of drinking water within one-quarter (1/4) mile of the well bore. ()

b. Class II. Wells used to inject fluids: ()

i. Which are brought to the surface in connection with natural gas storage operations, or conventional oil or natural gas production and may be commingled with waste waters from gas plants, dehydration stations, or compressor stations which are an integral part of production operations, unless those waters are classified as a hazardous waste at the time of injection. ()

ii. For enhanced recovery of oil or natural gas; and ()

iii. For storage of hydrocarbons which are liquid at standard temperature and pressure. ()

- c. Class III. Wells used to inject fluids for extraction of minerals including: ()
 - i. Mining of sulfur by the Frasch process; ()
 - ii. In situ production of uranium or other metals; this category includes only in-situ production from ore bodies which have not been conventionally mined. Solution mining of conventional mines such as stopes leaching is included in Class V. ()
 - iii. Solution mining of salts or potash. ()
- d. Class IV: ()
 - i. Wells used by generators of hazardous waste or of radioactive waste, by owners or operators of hazardous waste management facilities, or by owners or operators of radioactive waste disposal sites to dispose of hazardous waste or radioactive waste into a formation which within one-quarter (1/4) mile of the well contains an underground source of drinking water. ()
 - ii. Wells used by generators of hazardous waste or of radioactive waste, by owners or operators of hazardous waste management facilities, or by owners or operators of radioactive waste disposal sites to dispose of hazardous waste or radioactive waste above a formation which within one-quarter (1/4) mile of the well contains an underground source of drinking water. ()
 - iii. Wells used by generators of hazardous waste or owners or operators of hazardous waste management facilities to dispose of hazardous waste, which cannot be classified under Subparagraphs 035.01.a.i. or 035.01.d.i. or 035.01.d.ii. of this rule (e.g., wells used to dispose of hazardous waste into or above a formation which contains an aquifer which has been exempted pursuant to Section 025 of these rules). ()
- e. Class V -- All injection wells not included in Classes I, II, III, IV, or VI. ()
- f. Class VI. ()
 - i. Wells that are not experimental in nature that are used for geologic sequestration of carbon dioxide beneath the lowermost formation containing a USDW; or ()
 - ii. Wells used for geologic sequestration of carbon dioxide that have been granted a waiver of the injection depth requirements pursuant to requirements at 40 CFR Section 146.95; or ()
 - iii. Wells used for geologic sequestration of carbon dioxide that have received an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption pursuant to Section 025 of these rules. ()
- 02. Subclassification.** Class V wells are subclassified as follows: ()
 - a. 5A5-Electric Power Generation. ()
 - b. 5A6-Geothermal Heat. ()
 - c. 5A7-Heat Pump Return. ()
 - d. 5A8-Aquaculture Return Flow. ()
 - e. 5A19-Cooling Water Return. ()
 - f. 5B22-Saline Water Intrusion Barrier. ()
 - g. 5D2-Storm Runoff. ()

- h. 5D3-Improved Sinkholes. ()
- i. 5D4-Industrial Storm Runoff. ()
- j. 5F1-Agricultural Runoff Waste. ()
- k. 5G30-Special Drainage Water. ()
- l. 5N24¹-Radioactive Waste Disposal. ()
- m. 5R21-Aquifer Recharge. ()
- n. 5S23-Subsidence Control. ()
- o. 5W9-Untreated Sewage. ()
- p. 5W10-Cesspools. ()
- q. 5W11-Septic Systems (General). ()
- r. 5W12-Waste Water Treatment Plant Effluent. ()
- s. 5W20-Industrial Process Water. ()
- t. 5W31-Septic Systems (Well Disposal). ()
- u. 5W32-Septic System (Drainfield). ()
- v. 5X13-Mine Tailings Backfill. ()
- w. 5X14-Solution Mining. ()
- x. 5X15-In-Situ Fossil Fuel Recovery. ()
- y. 5X16-Spent Brine Return Flow. ()
- z. 5X25-Experimental Technology. ()
- aa. 5X26-Aquifer Remediation. ()
- bb. 5X27-Other Wells. ()
- cc. 5X28¹-Motor Vehicle Waste Disposal Wells. ()
- dd. 5X29-Abandoned Water Wells. ()

¹ The construction and operation of wells in these subclasses is currently illegal in Idaho.

036. -- 039. (RESERVED)

040. AUTHORIZATIONS, PROHIBITIONS AND EXEMPTIONS.

01. Authorizations. Construction and use of Class V deep injection wells may be authorized by permit as approved by the Director in accordance with these rules. ()

02. Prohibitions. ()

- a. These rules prohibit the permitting, construction, or use of any Class I, III IV, or VI injection well. ()
- b. No owner or operator shall construct, operate, maintain, convert, plug, abandon, or conduct any other injection activity in a manner that allows or causes the movement of fluid containing any contaminant into underground sources of drinking water, if the presence of that contaminant may cause a violation of any primary or secondary drinking water regulation, under IDAPA 58.01.11, “Ground Water Quality Rule,” Section 200 or may otherwise adversely affect the health of persons. The applicant for a permit shall have the burden of showing that the requirements of Paragraph 040.02.c. are met. ()
- c. Notwithstanding any other provision of this section, the Director may take emergency action upon receipt of information that a contaminant which is present in or likely to enter a public water system or underground source of drinking water may present an imminent and substantial endangerment to the health of persons. ()
- d. Construction of large capacity cesspools, motor vehicle waste disposal wells, radioactive waste disposal wells, and untreated sewage disposal wells is prohibited. Construction and use of other Class V shallow injection wells are authorized by these rules without permit provided that: ()
- i. Required inventory information is submitted to the Director pursuant to Subsection 070.01 of this rule. ()
- ii. Use of the shallow injection well shall not result in unreasonable contamination of a USDW or cause a violation of surface or ground water quality standards that would affect a beneficial use. ()
- e. Class IV injection wells used to inject contaminated ground water that has been treated and is being reinjected into the same formation from which it was drawn are not prohibited by these rules if such injection is approved by EPA, or Idaho, pursuant to provisions for cleanup of releases under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), 42 U.S.C. 9601–9657, or pursuant to requirements and provisions under the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. 6901 through 6987. ()
- f. All large capacity cesspools must be properly decommissioned by January 1, 2005. A cease and desist order may be issued to the owner or the operator when a large capacity cesspool is found to be a threat to the ground water resources as described in Paragraph 070.01.c. ()
- g. All motor vehicle waste disposal wells must be properly decommissioned by January 1, 2005. A cease and desist order may be issued to the owner or the operator when a motor vehicle waste disposal well is found to be a threat to the ground water resources as described in Paragraph 070.01.c. ()
- h. The Construction, operation or maintenance of any non-experimental Class V geologic sequestration well is prohibited. ()
- i. Owners or operators of shallow injection wells are prohibited from injecting into the well upon failure to submit inventory information in a timely manner pursuant to Paragraph 070.01.a. of these rules. ()
- 03. Exemptions.** ()
- a. The UIC inventory and fee requirements of these rules do not apply to individual subsurface sewage disposal system wells. These systems are, however, subject to the permitting and fee requirements of IDAPA 58.01.03 “Individual/Subsurface Sewage Disposal Rules,” Title 39, Chapter 1 and Title 39, Chapter 36, Idaho Code. ()
- b. State or local government entities are exempt from the permit requirements of these rules for wells associated with highway and street construction and maintenance projects, but shall submit shallow injection well inventory information for said wells and shall comply with all other requirements of these rules. ()
- c. Mine tailings backfill (5X13) wells are authorized by rule as part of mining operations. They are

therefore exempt from the ground water quality standards and permitting requirements of these rules provided that their use is limited to the injection of mine tailings only. The use of any 5X13 well(s) shall not result in water quality standards at points of diversion for beneficial use being exceeded or otherwise affect a beneficial use. Should water quality standards be exceeded or beneficial uses be affected, the Director may order the wells to be put under the permit requirements of these rules, or the wells may be required to be remediated or closed. As a condition of their use, the Director may require the construction and sampling of monitoring wells by the owner/operator. 5X13 wells are subject to the inventory requirements of Subsection 070.01. ()

041. -- 069. (RESERVED)

070. CLASS V: CRITERIA AND STANDARDS.

01. Class V Shallow Injection Well Requirements. ()

a. Authorization. As a condition of authorization, all owners or operators of shallow Class V injection wells, including improved sinkholes used for aquifer recharge, that dispose of nonhazardous and nonradioactive wastes are required to submit a Shallow Injection Well Inventory Form to the Department no later than thirty (30) days prior to commencement of construction for each new well or no later than thirty (30) days after the discovery of an existing injection well that has not previously been inventoried with the Department. Forms are available from any Department office or at the Department website at <http://www.idwr.idaho.gov>. State or local government entities shall submit the following inventory information for wells associated with highway and street construction and maintenance projects. ()

- i. Facility name and location; and ()
- ii. County in which the injection well(s) is (are) located; and ()
- iii. Ownership of the well(s); and ()
- iv. Name, address and phone number of legal contact; and ()
- v. Type or function of the well(s); and ()
- vi. Number of wells of each type; and ()
- vii. Operational status of the well(s). ()

b. Inventory Fees. For shallow injection wells constructed after July 1, 1997, the Shallow Injection Well Inventory Form shall be accompanied by a fee as specified in Section 42-3905, Idaho Code, payable to the Department of Water Resources. State or local government entities are exempt from Shallow Injection Well Inventory Form filing fees for wells associated with highway and street construction and maintenance, but shall comply with all other requirements of these rules. ()

c. Permit Requirements. If operation of a shallow Class V injection well is causing or may cause unreasonable contamination of a USDW, or cause a violation of the ground water quality standards at a place of beneficial use, the Director shall require immediate cessation of the injection activity. Where a Class V injection well is owned or operated by an entity other than a state or local entity involved in highway and street construction and maintenance, the Director may authorize continued operation of the well through a permit that specifies the terms and conditions of acceptable operation. ()

d. Permanent Decommission. Owners or operators of shallow injection wells shall notify the Director not less than thirty (30) days prior to permanent decommissioning of any shallow injection well. Permanent decommissioning shall be accomplished in accordance with procedures approved by the Director. ()

e. Inter-Agency Cooperation. The Department may seek the assistance of other government agencies, including cities and counties, health districts, highway districts, and other departments of state government to inventory, monitor and inspect shallow injection wells, where local assistance is needed to prevent deterioration of

ground water quality, and where injection well operation overlaps with water quality concerns of other agencies or local governing entities. Assistance is to be negotiated through a memorandum of understanding between the Department and the local entity, agency, or department, and is subject to the approval of the Director. ()

02. Class V Deep Injection Well Requirements. ()

a. Application Requirements. ()

i. No person shall continue to maintain or use an unauthorized injection well after the effective date given in Section 42-3903, Idaho Code, unless a permit therefor has been issued by the Director. No injection well requiring a permit under Subsection 070.02 shall be constructed, modified or maintained after the effective date given in Section 42-3903, Idaho Code, unless a permit therefor has been issued by the Director. No injection well requiring a permit shall continue to be used after the expiration of the permit issued for such well unless another application for permit shall continue to be used after the expiration of the permit issued for such well unless another application for permit therefor has been received by the Director. All applications for permit shall be on forms furnished by the Director. ()

ii. Each application for permit to construct, modify or maintain an injection well, as required by these rules, shall be accompanied by a filing fee as specified in Section 42-3905, Idaho Code, payable to the Department of Water Resources. For the purposes of these rules, all wells or groups of wells associated with a “Remediation Project” may be administered as one (1) “well” at the discretion of the Director. ()

b. Application Information Required. An applicant shall submit the following information to the Director for all injection wells to be authorized by permit, unless the Director determines that it is not needed in whole or in part, and issues a written waiver to the applicant: ()

- i. Facility name and location; ()
- ii. Name, address and phone number of the well operator; ()
- iii. Class, subclass and function of the injection well (see Section 035); ()
- iv. Latitude/longitude or legal description of the well location to the nearest ten (10) acre tract; ()
- v. Ownership of the well; ()
- vi. County in which the injection well is located; ()
- vii. Construction information for the well; ()
- viii. Quantity and general character of the injected fluids; ()
- ix. Status of the well; ()
- x. A topographic map or aerial photograph extending one (1) mile beyond property boundaries, depicting:
 - (1) Location of the injection well and associated facilities described in the application; ()
 - (2) Locations of other injection wells; ()
 - (3) Approximate drainage area, if applicable; ()
 - (4) Hazardous waste facilities, if applicable; ()
 - (5) All wells used to withdraw drinking water; ()

- (6) All other wells, springs and surface waters. ()
- xi. Distance and direction to nearest domestic well; ()
- xii. Depth to ground water; and ()
- xiii. Alternative methods of waste disposal. ()
- c. Additional Information. The Director may require the following additional information for Class V injection wells to assess potential effects of injection: ()
 - i. A topographic map showing locations of the following within a two (2) mile radius of the injection well: ()
 - (1) All wells producing water; ()
 - (2) All exploratory and test wells; ()
 - (3) All other injection wells; ()
 - (4) Surface waters (including man-made impoundments, canals and ditches); ()
 - (5) Mines and quarries; ()
 - (6) Residences; ()
 - (7) Roads; ()
 - (8) Bedrock outcrops; and ()
 - (9) Faults and fractures. ()
 - ii. Additional maps or aerial photographs of suitable scale to accurately depict the following: ()
 - (1) Location and surface elevation of the injection well described in this permit; ()
 - (2) Location and identification of all facilities within the property boundaries; ()
 - (3) Locations of all wells penetrating the proposed injection zone or within a one-quarter (1/4) mile radius of the injection well; ()
 - (4) Maps and cross sections depicting all underground sources of drinking water to include vertical and lateral limits within a one-quarter (1/4) mile radius of the injection well, their position relative to the injection zone and the direction of water movement: local geologic structures; regional geologic setting. ()
 - iii. A comprehensive report of the following information: ()
 - (1) A tabulation of all wells penetrating the proposed injection zone, listing owner, lease holder and operator; well identification (permit) number; size, weight, depth and cementing data for all strings of casing; ()
 - (2) Description of the quality and quantity of fluids to be injected; ()
 - (3) Geologic, hydrogeologic, and physical characteristics of the injection zone and confining beds; ()
 - (4) Engineering data for the proposed injection well; ()

- (5) Proposed operating pressure; ()
 - (6) A detailed evaluation of alternative disposal practices; ()
 - (7) A plan of corrective action for wells penetrating the zone of injection, but not properly sealed or decommissioned; and ()
 - (8) Contingency plans to cope with all shut-ins or well failures to prevent the migration of unacceptable fluids into underground sources of drinking waters. ()
- iv. Name, address and phone number of person(s) or firm(s) supplying the technical information and/or designing the injection well; ()
 - v. Proof that the applicant is financially responsible, through a performance bond or other appropriate means, to decommission the injection well in a manner approved by the Director. ()
- d.** Other Information. The Director may require of any applicant such additional information as may be necessary to demonstrate that the proposed or existing injection well will not endanger a USDW. The Director will not complete the processing of an application for which additional information has been requested until such time as the additional information is supplied. The Director may return any incomplete application and will not process such application until such time as the application is received in complete form. ()

03. Application Processing. ()

- a.** Draft Permit. After all application information is received and evaluated, the Director will prepare a draft permit or denial, which will include the application for permit, permit conditions or reasons for denial, and any compliance schedules or monitoring requirements. In preparing the draft permit or denial, the Director shall consider the following factors: ()
- i. The availability of economic and practical alternative means of disposal; ()
 - ii. The application of best management practices to the facilities and/or area draining into the well; ()
 - iii. The availability of economical, practical means of treating or otherwise reducing the amount of contaminants in the injected fluids; ()
 - iv. The quality of the receiving ground water, its category, its present and future beneficial uses or interconnected surface water; ()
 - v. The location of the injection well with respect to drinking water supply wells; and ()
 - vi. Compliance with the IDAPA 58.01.11, “Ground Water Quality Rule.” ()
- b.** Public Notice. The Director will provide public notice of any draft permit to construct, maintain or modify a Class V injection well by means of a legal notice in a newspaper of general circulation in the county in which the well is located. The Director may give additional notice as necessary to adequately inform the interested public and governmental agencies. There shall be a period of at least thirty (30) days following publication for any interested person to submit written comments and to request a fact-finding hearing. The hearing will be held by the Director if deemed necessary. ()
- c.** Review by the Directors of Other State Agencies. The Directors of other state agencies, as determined by the Director, shall be provided the opportunity to review and comment on draft permits. Comments shall be submitted to the Director within thirty (30) days of the public or legal notice. ()
- d.** Open-Loop Heat Pump Return Wells (Subclass 5A7). ()

i. An open-loop heat pump return well greater than eighteen (18) feet in depth to be used solely for disposal of heat pump water at a rate not exceeding fifty (50) gpm does not require a draft permit and is not subject to a recurring permit cycle, however, registration of the well with the Department and submittal of a filing fee as specified in Section 42-3905, Idaho Code is required. The Director reserves the right to override the exemptions from the draft permit and permit cycle requirements. ()

ii. An open-loop heat pump return well greater than eighteen (18) feet in depth to be used solely for disposal of heat pump return water at a rate exceeding fifty (50) gpm is subject to the requirements of Subsections 070.02 and 070.03 of these rules. ()

e. Fact-Finding Hearings. At the Director's discretion, or upon motion of any interested individual, the Director may elect to hold a fact-finding hearing. Said hearing will be held at a location in the geographical area of the injection well. Notice of said hearing will be provided at least thirty (30) days in advance of the hearing by regular mail to the applicant and to the person or persons requesting the hearing. Public notice of the fact-finding hearing will be made by means of press release to a newspaper of general circulation in the county of the application. ()

04. The Director's Action On Draft Permits and Duration Of Approved Permits. The role of the Director is to determine whether or not the injection wells and their respective owners or operators are in compliance with the intent of these rules, thus protecting the ground waters of the state against unreasonable contamination or deterioration of quality and preserving them for diversion to beneficial uses. ()

a. Consideration. The Director will consider the following factors in taking final action on draft permits: ()

i. The likelihood and consequences of the injection well system failing; ()

ii. The long term effects of such disposal or storage; ()

iii. The recommendations and related justifications of the Directors of other state agencies and the public; ()

iv. The potential for violation of ground water quality standards at the point of injection or the point of beneficial use; and ()

v. Compliance with the Idaho Ground Water Quality Plan. ()

b. Issuance of Permit. After considering the draft permit for construction, modification, or maintenance, and all matters relating thereto, the Director shall issue a permit if the standards and criteria of Subsection 070.05 will be met and USDW's will not otherwise be unreasonably affected. If the Director finds that the standards and criteria cannot be met or that ground water sources cannot otherwise be protected from unreasonable contamination at all times, the draft permit may be denied or a permit may be issued with conditions designed to protect ground water sources. The Director's decision shall be in writing and a copy shall be mailed by regular mail to the applicant and to all persons who commented in writing on the draft permit or appeared at a hearing held to consider the draft permit. ()

c. Permit Conditions and Requirements. Any permit issued by the Director shall contain conditions to insure that ground water sources will be protected from waste, unreasonable contamination, or deterioration of ground water quality that could result in violations of the ground water quality standards. In addition to specific construction, operation, maintenance and monitoring requirements that the Director finds necessary, each permit shall be subject to the standard conditions and requirements of this rule. ()

d. Construction Requirements. ()

i. Well drillers or other persons involved with the construction of any injection well requiring a permit shall not commence construction on the facility until a certified copy of the approved permit is obtained from

- the Director. ()
- ii. Deep injection wells shall be constructed by a licensed water well driller to conform with the current Minimum Well Construction Standards and the conditions of the permit, except that a driller’s license is not required for the construction of a driven mine shaft or a dug hole. ()
 - iii. Shallow injection wells authorized by permit shall be constructed in accordance with the conditions of the permit. Rule-authorized shallow injection wells shall be constructed as shown or described in the inventory submittal. ()
 - iv. Injection wells shall be constructed to prevent the entrance of any fluids other than specified in the permit. ()
 - v. Injection wells shall be constructed to prevent waste of artesian fluids or movement of fluids from one aquifer into another. ()
 - vi. When construction or modification of an injection well has been completed, the owner or operator shall inform the Director of completion on a form provided by the Department. ()
 - vii. A sampling port shall be provided if the injection well system is enclosed. ()
 - viii. All new injection wells constructed into alluvial formations shall have a minimum ten (10) foot separation from the bottom of the well and seasonal high ground water. ()
 - (1) Injection wells installed into fractured basalt are exempt from separation distances. ()
 - (2) The Director may reduce separation distance requirements if the quality of injected fluids are improved through additional treatment or BMPs. ()
 - (3) Heat pump return wells (sub-class 5A7) are exempt from the separation distance requirement of this section. ()
 - e. Operational Conditions. ()
 - i. The injection well shall not be used until the construction, operation and maintenance requirements of the permit are met and provisions are made for any required inspection, monitoring and record keeping. ()
 - ii. Injection of any contaminant at concentrations exceeding the standards set in Paragraph 070.05.c. into a present or future drinking or other ground water source that may cause a health hazard or adversely affect a designated and protected use is prohibited. ()
 - iii. The injection well owner or operator shall develop approved procedures to detect constructional or operational failure in a timely fashion, and shall have contingency plans to cope with the well failure. ()
 - iv. Authorized representatives of the Department shall be allowed to enter, inspect and/or sample: ()
 - (1) The injection well and related facilities; ()
 - (2) The owner or operator’s records of the injection operation; ()
 - (3) Monitoring instrumentation associated with the injection operation; and ()
 - (4) The injected fluids. ()
 - v. The injection facilities shall be operated and maintained to achieve compliance with all terms and conditions of this permit. ()

(1) Proper operation and maintenance includes effective performance, adequate funding, operator staffing and training, and adequate laboratory and process controls, including appropriate quality assurance procedures; ()

(2) If compliance cannot be met, the owner shall take corrective action as determined by the Director or terminate injection. ()

vi. The owner shall mitigate any adverse effects resulting from non-compliance with the terms and conditions of the permit. ()

vii. If the injection well was constructed prior to issuance of the permit, the well shall be brought into compliance with the terms and conditions of the permit in accordance with the schedule of compliance issued by the Director. ()

viii. The permit shall not convey any property rights. ()

f. Conditions of Permanent Decommissioning. ()

i. Notice of intent to permanently decommission a well shall be submitted to the Director not less than thirty (30) days prior to commencement of the decommissioning activity. ()

ii. The method of permanent decommissioning for all injection wells shall be approved by the Director prior to commencement of the decommissioning activity. ()

iii. Notice of completion of permanent decommission shall be submitted to the Director within thirty (30) days of completion. ()

iv. All deep injection wells that are to be permanently decommissioned shall be plugged in accordance with current Well Construction Standards. ()

v. Following permanent cessation of use, or where an injection well is not completed, the Director shall be notified. Decommissioning procedures or other action, as prescribed by the Director, shall be conducted. ()

vi. The injection well owner or operator has the responsibility to insure that the injection operation is decommissioned as prescribed. ()

g. Duration of Approved Permits. The length of time that a permit may be in effect for Class V wells requiring permits shall not exceed ten (10) years. ()

05. Standards For The Quality of Injected Fluids and Criteria For Location and Use. ()

a. General. These standards, which are minimum standards that are to be adhered to for all deep injection wells and shallow injection wells requiring permits and rule-authorized wells not requiring permits, are based on the premise that if the injected fluids meet ground water quality standards for physical, chemical and radiological contaminants, and if ground water produced from adjacent points of diversion for beneficial use meets the water quality standards as defined in Section 010 of these rules, then that aquifer will be protected from unreasonable contamination and will be preserved for diversion to beneficial uses. The Director may, however, when it is deemed necessary, require specific injection wells to be constructed and operated in compliance with additional requirements, such as best management practices (BMPs), so as to protect the ground water resource from deterioration and preserve it for diversion to beneficial use. ()

b. Waivers. A waiver of one (1) or more standards may be granted by the Director if it can be demonstrated by the applicant that the contaminants in injected fluid will not endanger a ground water source for any present or future beneficial use. ()

- c. Standards for Quality of Fluids Injected into Class V Wells. ()
- i. Ground water quality standards for chemical and radiological contaminants in injected fluids. After the effective date of these standards, the following limits shall not be exceeded in injected fluids from a well when such fluids will or are likely to reach a USDW: ()
- (1) Chemical contaminants. The concentration of each chemical contaminant in the injected fluids shall not exceed the ground water quality standard for that chemical contaminant, or the concentration of each contaminant in the receiving water, whichever requirement is less stringent; and ()
- (2) Radiological contaminants. Radiological levels of the injected fluids shall not exceed those levels specified by the ground water quality standards. ()
- ii. Restrictions on injection of fluids containing biological contaminants. The following restrictions apply to biological contaminants included in the ground water quality standard in injected fluids. Coliform bacteria: injected fluids containing coliform bacteria are subject to the following restrictions: ()
- (1) Contamination of ground water produced at any existing point of diversion for beneficial use, or any point of diversion for beneficial use developed in the future, by injected fluids is prohibited; ()
- (2) The Director may require the use of best management practices (BMPs) to reduce the concentration of coliform bacteria in the injected fluids; ()
- (3) The Director may require the use of water treatment technology, including ozonation and chlorination devices, sand filters, and settling pond specifications to reduce the concentration of coliform bacteria in injected fluids; ()
- (4) Ground water produced from points of diversion for beneficial use adjacent to injection wells that dispose of fluids containing coliform bacteria in concentrations greater than the current ground water quality standard shall be subject to monitoring for bacteria by the owner/operator of the injection well. A waiver of the monitoring requirement may be granted by the Director when it can be demonstrated that injection will not result in unreasonable contamination of ground water produced from these adjacent points; ()
- (5) Construction of new Subclass 5F1 injection wells, and other shallow and deep injection wells, as specified by the Director, that are likely to exceed the current ground water quality standard for coliform bacteria at the point of beneficial use is prohibited; and ()
- (6) At no time shall any fluid containing or suspected of containing fecal contaminants of human origin be injected into any Class V injection well authorized under these rules. ()
- iii. Physical, visual and olfactory characteristics. The following restrictions apply to physical, visual and olfactory characteristics of injected fluids. Temperature, color, odor, turbidity, conductivity and pH: the temperature, color, odor, conductivity, turbidity, pH or other characteristics of the injected fluid may not result in the receiving ground water becoming less suitable for diversion to beneficial uses, as determined by the Director. ()
- iv. Contamination by an injection well of ground water produced at an existing point of diversion for beneficial use, or a point of diversion for beneficial use developed in the future, shall not exceed water quality standards defined in Section 010 of these rules. ()
- d. Criteria for Location and Use of Class V Wells Requiring Permits. ()
- i. A Class V well requiring a permit may be required to be located a minimum distance, as determined from Table 1, from any point of diversion for beneficial use that could be harmed by bacterial contaminants. This requirement is not applicable to injection wells injecting wastes of quality equal to or better than adopted ground water quality standards in all respects. In addition, Class V wells may be required to be located at such a distance from a point of diversion for beneficial use as to minimize or prevent ground water contamination

resulting from unauthorized or accidental injection, as determined by the Director. ()

ii. These location requirements in Table 1 may be waived, as per Paragraph 070.05.b., when the applicant can demonstrate that any springs or wells within the calculated perimeter of the generated perched water zone will not be contaminated by the applicant’s waste disposal or injection well. Monitoring by the applicant of the production wells or springs in question may be required to demonstrate that they are not being contaminated.

Determined Radii of Perched Water Zones Based on Maximum Average Weekly Injection Rates (cfs) of Class V Injection Wells *	
Injection (cfs)	Radius of Generated Perched Water Zone (ft)
0 - 0.20	800
0.20 - 0.60	1,400
0.61 - 1.00	1,800
1.01 - 2.00	2,500
2.01 - 3.00	3,000
3.01 - 4.00	3,500
4.01 - 5.00	4,000
Greater than 5.00	As determined by the Director

* Injection rates shall be based on the average volume of wastes injected by the well during the week of greatest injection in an average water year. ()

e. Standards for the Quality of Fluids Injected by Subclass 5A7 Wells (Open-Loop Heat Pump Return). ()

i. The quality of fluids injected by a Subclass 5A7 injection well shall comply with ground water quality standards or shall be equal to the quality of the ground water source to the heat pump, whichever is less stringent. ()

ii. If the quality of the ground water source does not meet ground water quality standards, the injected fluids must be returned to the formation containing the ground water source. ()

iii. The temperature of the injected fluids shall not impair the designated beneficial uses of the receiving ground water. ()

iv. All Rule-authorized Injection Wells shall conform to the ground water quality standards at the point of injection and not cause any water quality standards to be violated at any point of beneficial use. ()

06. Monitoring, Record Keeping and Reporting Requirements. The Director may require monitoring, record keeping and reporting by any owner or operator if the Director finds that the well may adversely affect a ground water source or is injecting a contaminant that could have an unacceptable effect upon the quality of the ground waters of the state. ()

a. Monitoring. ()

i. Any injection authorized by the Director shall be subject to monitoring and record keeping requirements as conditions of the permit. Such conditions may require the installation, use and maintenance of monitoring equipment or methods. The Director may require where appropriate, but is not limited to, the following: ()

- (1) Monitoring of injection pressures and pressures in the annular space between casings; ()
- (2) Flow rate and volumes; ()
- (3) Analysis of quality of the injected fluids for contaminants that are subject to limitation or reduction under the conditions of the permit; or contaminants which the Director determines could have an unacceptable effect on the quality of the ground waters of the state, and which the Director has reason to believe are in the injected fluids; ()
- (4) Monitoring of ground water through special monitoring wells or existing points of diversion for beneficial use in the zone of influence as determined by the Director; ()
- (5) A demonstration of the integrity of the casing, tubing or seal of the injection well. ()
 - ii. The frequency of required monitoring shall be specified in the permit when issued, except that the Director at any time may, in writing, require additional monitoring and reporting. ()
 - iii. All monitoring tests and analysis required by permit conditions shall be performed in a state certified laboratory or other laboratory approved by the Director. ()
 - iv. Any field instrumentation used to gather data, when specified as a condition of the permit, shall be required by the Director to be tested and maintained in such a manner as to ensure the accuracy of the data. ()
 - v. All samples and measurements taken for the purpose of monitoring shall be representative of the monitoring activity and fluids injected. ()
- b. Record Keeping.** The permittee shall maintain records of all monitoring activities to include: ()
 - i. Date, time and exact place of sampling; ()
 - ii. Person or firm performing analysis; ()
 - iii. Date of analysis, analytical methods used and results of analysis; ()
 - iv. Calibration and maintenance of all monitoring instruments; and ()
 - v. All original tapes, strip charts or other data from continuous or automated monitoring instruments. ()
- c. Reporting.** ()
 - i. Monitoring results obtained by the permittee pursuant to the monitoring requirements prescribed by the Director shall be reported to the Director as required by permit conditions. ()
 - ii. The Director shall be notified in writing by the permittee within five (5) days after the discovery of violation of the terms and conditions of the permit. If the injection activity endangers human health or a public or domestic water supply, use of the injection well shall be immediately discontinued and the owner or operator shall immediately notify the Director. Notification shall contain the following information: ()
 - (1) A description of the violation and its cause; ()
 - (2) The duration of the violation, including dates and times; if not corrected or use of the well discontinued, the anticipated time of correction; and ()
 - (3) Steps being taken to reduce, eliminate and prevent recurrence of the injection. ()

iii. Where the owner or operator becomes aware of failure to submit any relevant facts in any permit application or report to the Director, that person shall promptly submit such facts or information. ()

iv. The permittee shall furnish the Director, within a time specified by the Director, any information which the Director may request to determine compliance with the permit. ()

v. All applications for permits, notices and reports submitted to the Director shall be signed and certified. ()

vi. The Director shall be notified in writing of planned physical alterations or additions to any facility related to the permitted injection well operation. ()

vii. Additional information to be reported to the Director in writing: ()

(1) Transfer of ownership; ()

(2) Any change in operational status not previously reported; ()

(3) Any anticipated noncompliance; and ()

(4) Reports of progress toward meeting the requirements of any compliance schedule attached or assigned to this permit. ()

07. Permit Assignable. Permits may be assignable to a new owner or operator of an injection well if the new owner or operator, within thirty (30) days of the change, notifies the Director of such change. The new owner or operator shall be responsible for complying with the terms and conditions of the permit from the time that such change takes place. ()

071. -- 999. (RESERVED)

37.03.04 – DRILLING FOR GEOTHERMAL RESOURCES RULES

000. LEGAL AUTHORITY (RULE 0).

The Idaho Department of Water Resources, through authority granted by Section 42-4001 through Section 42-4015, Idaho Code, is the regulatory agency for the drilling, operation, maintenance, and abandonment of all geothermal wells in the state. The Department's authority also includes regulatory jurisdiction over other related operations and environmental hazards pertaining to the exploration and development of geothermal resources. ()

001. TITLE AND SCOPE (RULE 1).

The geothermal policy of the state of Idaho as stated in Section 42-4001, Idaho Code, is as follows: "It is the policy and purpose of this state to maximize the benefits to the entire state which may be derived from the utilization of our geothermal resources, while minimizing the detriments and costs of all kinds which could result from their utilization. This policy and purpose is embodied in this act which provides for the immediate regulation of geothermal resource exploration and development in the public interest." ()

002. -- 009. (RESERVED)

010. DEFINITIONS (RULE 10).

For the purpose of these rules, the following definitions apply. ()

01. Applicant. Any person submitting an application to the Department of Water Resources for a permit for the construction and operation of any well or injection well. ()

02. Board. The Idaho Water Resource Board. ()

03. BOPE. An abbreviation for Blow Out Prevention Equipment which is designed to be attached to the casing in a geothermal well in order to prevent a blow out of the drilling mud. ()

04. Completion. A well is considered to be completed thirty (30) days after drilling operations have ceased unless a suspension of operation is approved by the Director, or thirty (30) days after it has commenced producing a geothermal resource, whichever occurs first, unless drilling operations are resumed before the end of the thirty (30) day period or at the end of the suspension. ()

05. Conductor Pipe. The first and largest diameter string of casing to be installed in the well. This casing extends from land surface to a depth great enough to keep surface waters from entering and loose earth from falling in the hole and to provide anchorage for blow out prevention equipment prior to setting surface casing. ()

06. Department. The Idaho Department of Water Resources. ()

07. Director. The Director of the Idaho Department of Water Resources. ()

08. Drilling Logs. The recorded description of the lithologic sequence encountered in drilling a well. ()

09. Drilling Operations. The actual drilling, re-drilling, or recompletion of the well for production or injection including the running and cementing of casing and the installation of well head equipment. Drilling operations do not include perforating, logging, and related operations after the casing has been cemented. ()

10. Exploratory Well. A well drilled for the discovery and/or evaluation of geothermal resources either in an established geothermal field or in unexplored areas. Exploratory well does not include holes six (6) inches in diameter or less if they are used for gathering geotechnical data such as, but not limited to, heat flow, earth temperature, temperature gradient and/or seismic measurements, provided said holes are not greater than one thousand (1000) feet in depth below land surface and provided the material medium is not intended to be encountered. ()

11. Geothermal Area. The same general land area which in its subsurface is underlain or reasonably appears to be underlain by geothermal resources from or in a single reservoir, pool, or other source or interrelated sources, as such area or areas may be designated from time to time by the Director. ()

12. Geothermal Field. An area designated by the Director which contains a well or wells capable of commercial production of geothermal resources. ()

13. Geothermal Resource. The natural heat energy of the earth, the energy in whatever form which may be found in any position and at any depth below the surface of the earth, present in, resulting from, or created by, or which may be extracted from such natural heat and all minerals in solution or other products obtained from the material medium of any geothermal resource. Geothermal resources are found and hereby declared to be sui generis, being neither a mineral resource nor a water resource but they are also found and hereby declared closely related to and possibly affecting and affected by water and mineral resources in many instances. ()

14. Injection Well. Any special well, converted producing well, or reactivated or converted abandoned well employed for injecting material into a geothermal area or adjacent area to maintain pressures in a geothermal reservoir, pool, or other source, or to provide new material or to serve as a material medium therein, or for reinjecting any material medium or the residue thereof, or any by-product of geothermal resource exploration or development into the earth. ()

15. Intermediate String or Casing. The casing installed within the well to seal out brackish water, caving zones, etc., below the bottom of the surface casing. Such strings may either be lapped into the surface casing or extend to land surface. ()

16. Material Medium. Any substance including, but not limited to, naturally heated fluids, brines, associated gasses and steam in whatever form, found at any depth and in any position below the surface of the earth, which contains or transmits the natural heat energy of the earth, but excluding petroleum, oil, hydrocarbon gas, or other hydrocarbon substances. ()

17. Notice of Intent or Notice. A written statement to the Director that the applicant intends to do work. ()

18. Observation Well. A small diameter well drilled strictly for monitoring purposes. In no case shall an observation well be completed for production of geothermal resources or for use as an injection well. ()

19. Operator. Any person drilling, maintaining, operating, pumping, or in control of any well. The term operator also includes owner when any well is or has been or is about to be operated by or under the direction of the owner. ()

20. Owner. The owner of the geothermal lease or well and includes operator when any well is operated or has been operated or is about to be operated by any person other than the owner. ()

21. Permit. A permit issued pursuant to these rules for the construction and operation of any well or injection well. ()

22. Person. Any individual natural person, general or limited partnership, joint venture, association, cooperative organization, corporation, whether domestic or foreign, agency or subdivision of this or any other state or municipal or quasi-municipal entity whether or not it is incorporated. ()

23. Production String. The casing or tubing through which a geothermal resource is produced. This string extends from the producing zone to land surface. ()

24. Production Well. Any well which is commercially producing or is intended for commercial production of a geothermal resource. ()

25. Surface Casing. The first string of casing which is run after the conductor pipe to anchor blow out prevention equipment and to seal out all existing groundwater zones. ()

26. Suspension of Operations. The cessation of drilling, redrilling, or alteration of casing before the well is officially abandoned or completed. All suspensions must be authorized by the Director. ()

27. Waste. Any physical waste including, but not limited to: ()

a. Underground waste resulting from inefficient, excessive, or improper use, or dissipation of

geothermal energy, or of any geothermal resource pool, reservoir, or other source; or the locating, spacing, constructing, equipping, operating, or producing of any well in a manner which results, or tends to result in reducing the quantity of geothermal energy to be recovered from any geothermal area in the state; ()

b. The inefficient above-ground transporting and storage of geothermal energy; and the locating, spacing, equipping, operating, or producing of any well or injection well in a manner causing or tending to cause unnecessary or excessive surface loss or destruction of geothermal energy; the escape into the open air from a well of steam or hot water in excess of what is reasonably necessary in the efficient development or production of a well. ()

28. Well. Any excavation or other alteration in the earth's surface or crust by means of which the energy of any geothermal resource and/or its material medium is sought or obtained. ()

011. -- 024. (RESERVED)

025. DRILLING (RULE 25).

01. General. All wells shall be drilled in such a manner as to protect or minimize damage to the environment, waters usable for all beneficial purposes, geothermal resources, life, health, or property. ()

02. Permits and Notices. ()

a. Permit to Drill for Geothermal Resources. Any person, owner, or operator who proposes to construct a well for the production of or exploration for geothermal resources or to construct an injection well shall first apply to the Director for permit. Application for permit shall be on department form 4003-1. Any person, owner, or operator who proposes to construct a hole for the gathering of geotechnical data shall file a notice of intent with the Director twenty (20) days prior to construction. Written approval of the Director is required before construction may begin. The notice of intent shall show the hole location, proposed depth, hole size, construction methods, intended use and abandonment plan together with other information as required by the Director. ()

b. Permit to Deepen or Modify an Existing Well. If the owner or operator plans to deepen, redrill, plug, or perform any operation that will in any manner modify the well, an application shall be filed with the Director and written approval must be received prior to beginning work. Application for permit to alter a geothermal well shall be on department form 4003-2. ()

c. Application for Permit to Convert to Injection. If the owner or operator plans to convert an existing geothermal well into an injection well with no change of mechanical condition, an application for permit shall be filed with the Director and written approval must be received prior to beginning injection. Application for permit shall be made on department form 4003-3. ()

d. Amendment of Permit. No well may be owned or operated by any person whose name does not appear on the permit or permit application and no changes in departure from the procedures, location, data, or persons specified on the face of a permit shall be allowed until an amendment to such permit is approved by the Director. Application for amendment shall be made on department form 4003-1. ()

e. Notice to Other Agencies. Notice of applications, permits, orders, or other actions received or issued by the Director may be given to any other agency or entity which may have information, comments, or jurisdiction over the activity involved. The Director may enter into a memorandum of understanding with other agencies to eliminate duplication of applications or other efforts. ()

f. No filing fee shall be charged for filing a notice of intent to construct a hole for gathering geotechnical data, for abandonment, or for the drilling of an observation well. ()

g. No application shall be accepted and filed by the Director until such filing fee has been deposited with the Director. ()

03. Bonds. ()

a. The Director shall require as a condition of every permit every operator or owner who engages in the construction, alteration, testing, or operation of the well to file with the Director on a form prescribed by the Director a bond indemnifying the state of Idaho providing good and sufficient security conditioned upon the performance of the duties required by these regulations and the Geothermal Resource Act and the proper abandonment of any well covered by such permit. Such bond shall be in an amount which is not less than ten thousand dollars (\$10,000) for each individual well. ()

b. Bonds remain in force for the life of the well or wells and may not be released until the well or wells are properly abandoned or another valid bond is substituted therefor. Any person who acquires the ownership or operation of any well or wells shall within five (5) days after acquisition file with the Director an indemnity bond in the sum of ten thousand dollars (\$10,000) for each well acquired. The Director reserves the right to request additional bonding prior to abandonment if deemed necessary. ()

04. Well Spacing. ()

a. Any well drilled for the discovery and production of geothermal resources or as an injection well shall be located more than one hundred (100) feet from and within the outer boundary of the parcel of land on which the well is situated, or more than one hundred (100) feet from a public road, street, or highway dedicated prior to the commencement of drilling. This requirement may be modified or waived by the Director upon written request. ()

b. For several contiguous parcels of land in one or different ownerships that are operated as a single geothermal field, the term outer boundary line means the outer boundary line of the land included in the field. In determining the contiguity of any such parcels of land, no street, road, or alley lying within the lease or field shall be determined to interrupt such contiguity. ()

c. The Director shall approve the proposed well spacing programs or prescribe such modifications to the programs as he deems necessary for proper development giving consideration to such factors as, but not limited to, topographic characteristics of the area, hydrologic, geologic, and reservoir characteristics of the area, the number of wells that can be economically drilled to provide the necessary volume of geothermal resources for the intended use, minimizing well interference, unreasonable interference with multiple use of lands, and protection of the environment. ()

d. Directional Drilling. Where the surface of the parcel of land containing one acre or more is unavailable for drilling, the surface well location may be located upon property which may or may not be contiguous. Such surface well locations shall not be less than twenty five (25) feet from the outer boundary of the parcel on which it is located, nor less than twenty-five (25) feet from an existing street or road. The production or injection interval of the well shall not be less than one hundred (100) feet from the outer boundary of the parcel into which it is drilled. Directional surveys must be filed with the Director for all wells directionally drilled. ()

05. Casing. ()

a. General. All wells shall be cased in such a manner as to protect or minimize damage to the environment, usable ground waters, geothermal resources, life, health, and property. The permanent well head completion equipment shall be attached to the production casing or to the intermediate casing if production casing does not reach the surface. No permanent well head equipment may be attached to any conductor or surface casing alone. The specification for casing strength shall be determined by the Director on a well-to-well basis. All casing reaching the surface shall provide adequate anchorage for blow out prevention equipment, hole pressure control, and protection for natural resources. Sufficient casing shall be run to reach a depth below all known or reasonably estimated groundwater levels to prevent blow outs or uncontrolled flows. The following casing requirements are general but should be used as guidelines in submitting applications for permit to drill. ()

b. Conductor Pipe. A minimum of forty (40) feet of conductor pipe shall be installed. The annular space is to be cemented solid to the surface. A twenty-four (24) hour cure period for the grout must be allowed prior to drilling out the shoe unless additives sufficient, as determined by the Director, are used to obtain early strength. An annular blow out preventer shall be installed on all exploratory wells and on development wells when deemed

necessary by the Department. ()

c. **Surface Casing.** The surface casing hole shall be logged with an induction electrical log or equivalent or gamma-neutron log before running casing. This requirement may be waived by the Director. Permission to waive this requirement must be granted by the Director in writing prior to running surface casing. This casing shall provide for control of formation fluids, protection of shallow usable groundwater, and for adequate anchorage for blow out prevention equipment. All surface casing shall be cemented solid to the surface. A twenty-four (24) hour cure period shall be allowed prior to drilling out the shoe of the surface casing unless additives sufficient, as determined by the Director, are used to obtain early strength. ()

i. A minimum of two hundred (200) feet of surface casing shall be set in areas where pressures and formations are unknown. In no case may surface casing be set at a depth less than ten percent (10%) of the proposed total depth of the well. ()

ii. In areas of known high formation pressure, surface casing shall be set at the depth determined by the Director after a study of geologic conditions in the area. ()

iii. In areas where subsurface geological conditions are variable or unknown, surface casing shall be in accordance with specifications as outlined in a. above. The casing must be seated through a sufficient series of low permeability, competent lithologic units such as claystone, siltstone, basalt, etc., to insure a solid anchor for blow out prevention equipment and to protect usable groundwater from contamination. Additional casing may be required if the first string has not been cemented through a sufficient series of such beds, or a rapidly increasing thermal gradient or formation pressures are encountered. ()

iv. The temperature of the return drilling mud shall be monitored continuously during the drilling of the surface casing hole. Either a continuous temperature-monitoring device shall be installed and maintained in a working condition or the temperature shall be read manually. In either case, the return temperature shall be entered into the log book for each thirty (30) feet of depth drilled. ()

v. Blow out prevention equipment capable of shutting in the well during any operation shall be installed on the surface casing and maintained ready for use at all times. BOPE pressure tests shall be performed by the operator for department personnel on all exploratory wells prior to drilling out the shoe of the surface casing. The decision to perform BOPE pressure tests on other types of wells shall be made on a well-to-well basis by the Director. The Director must be notified five (5) days in advance of a scheduled pressure test. Permission to proceed with the test sooner may be given orally by the Director upon request by the operator. ()

d. **Intermediate Casing.** Intermediate casing shall be required for protection against anomalous pressure zones, cave-ins, washouts, abnormal temperature zones, uncontrollable lost circulation zones or other drilling hazards. Intermediate casing strings when installed shall be cemented solidly to the surface or to the top of the casing. ()

e. **Production Casing.** Production casing may be set above or through the producing or injection zone and cemented either below or just above the objective zones. Sufficient cement shall be used to exclude overlying formation fluids from the geothermal zone, to segregate zones, and to prevent movement of fluids behind the casing into possible fresh groundwater zones. Production casing shall either be cemented solid to the surface or lapped into the intermediate casing if run. If the production casing is lapped into an intermediate string, the casing overlap shall be at least fifty (50) feet, the lap shall be cemented solid, and the lap shall be pressure tested to insure its integrity. ()

06. Electric Logging. All wells except observation wells shall be logged with an induction electrical log or equivalent or gamma-neutron log from the bottom of the hole to the bottom of the conductor pipe. This requirement may be modified or waived by the Director upon written request. ()

026. -- 029. (RESERVED)

030. RECORDS (RULE 30).

01. General. The owner or operator of any well shall keep or cause to be kept a careful and accurate log, core record, temperature logs, and history of the drilling of the well. These records shall be kept in the nearest office of the owner or operator or at the well site and together with all other reports of the owner and operator regarding the well shall be subject to inspection by the Director during business hours. All records unless otherwise specified must be filed with the Director within thirty (30) days of completion of the well. ()

02. Records to Be Filed with the Director. ()

a. Drilling Logs and Core Record. The drilling log shall include the lithologic characteristics and depths of formations encountered, the depth and temperatures of water-bearing and steam-bearing strata, the temperatures, chemical compositions and other chemical and physical characteristics of fluids encountered from time to time so far as ascertained. The core record shall show the depth, lithologic character, and fluid content of cores obtained so far as determined. ()

b. Well History. The history shall describe in detail in chronological order on a daily basis all significant operations carried out and equipment used during all phases of drilling, testing, completion, and abandonment of any well. ()

c. Well Summary Report. The well summary report shall accompany the core record and well history reports. It is designed to show data pertinent to the condition of a well at the time of completion of work done. ()

d. Production Records. The owner or operator of any well producing geothermal resources shall file with the Director on or before the 20th day of each month for the preceding month a statement of production utilized in such a form as the Director may designate. Copies of monthly geothermal energy report forms are available from the Director; however, production data can be submitted on non-department forms such as computer print-outs if they have been approved by the Director. ()

e. Injection Records. The owner or operator of any well injecting geothermal fluids or waste water for any purpose shall file with the Director on or before the twentieth day of each month for the preceding month a report of the injection in such form as the Director may designate. Copies of monthly injection report forms are available from the Director. Injection data may be submitted on non-department forms if they have been approved by the Director. ()

f. Electric Logs and Directional Surveys, If Conducted. Electric logs and directional surveys shall be filed with the Director within sixty (60) days of completion, cessation of drilling operations, excluding any approved suspension of operations, or abandonment of any well. Like copies shall be filed upon recompletion of any well. Upon a showing of hardship, the Director may extend the time within which to comply for a period not to exceed six (6) additional months. ()

03. Confidential Status. Information on file with the Director is open to public inspection except any reports, logs, records, or histories derived from the drilling of a well and filed with the Director shall not be available for public inspection and shall be kept confidential by the Director for a period of one year from receipt provided, however, that the Director may use any such reports, logs, records, or histories in any action in any court to enforce the provisions of the Geothermal Act or any order or regulation adopted hereunder. ()

04. Inspection of Records. The records filed by an operator with the Director which relates to the data gathered from the drilling operation shall be open to inspection only to those authorized in writing by the operator and designated personnel. The records of any operator filed for a completed or producing well that has been transferred by sale, lease, or otherwise shall be available to the new owner or lessee for his inspection or copying and shall be available for inspection or copying by others upon written authorization of such new owner or lessee. ()

031. -- 034. (RESERVED)

035. BLOW OUT PREVENTION (RULE 35).

01. Unexplored Areas. ()

a. A department employee may be present at the well at any time during the initial phases of drilling until the surface casing has been cemented and the BOPE has been satisfactorily pressure tested. The Department employee may be present during any drilling operations at the well and if in his opinion conditions warrant he may order additional casing to be run. ()

b. A logging unit equipped to continuously record the following data shall be installed and operated continuously by a technician approved by the Director after drilling out the shoe of the conductor pipe until the well has been drilled to the total depth. ()

i. Drilling mud temperature (in and out). ()

ii. Drilling mud pit level. ()

iii. Drilling mud pump volume. ()

iv. Drilling mud weight. ()

v. Drilling rate. ()

vi. Hydrocarbon and hydrogen sulfide gas volume (with alarm). ()

c. An annular BOPE with a minimum working pressure of one thousand (1,000) PSI shall be installed on the surface casing. If unusual conditions are anticipated, a BOPE may be required on the conductor pipe. ()

d. If drilling mud temperature out, reaches one hundred twenty-five (125) Degrees C (Celsius), drilling operations shall cease, drilling mud circulation will continue and the Director must be notified immediately. The operator must obtain the Director's approval of his proposed course of action prior to resuming drilling operations. ()

e. The above requirements for BOPE may be modified by the Director and any proposed modification by the applicant must be approved by the Director in writing. ()

02. Explored Areas. ()

a. A gate valve with a minimum working pressure rating of three hundred (300) PSI must be installed on the well head. ()

b. The temperature of the return mud shall be monitored continuously. Either a continuous temperature monitoring device shall be installed and maintained in working condition or the temperature shall be read manually. In either case, return mud temperatures shall be entered into the log book for each thirty (30) feet of depth drilled. ()

c. An annular BOPE with a minimum working pressure of one thousand (1,000) PSI shall be installed on the surface casing. ()

d. Additional requirements may be set forth by the Director depending upon the knowledge of the area. Such requirements will be set forth on the approved application for permit to drill a geothermal well. Modification of said requirements may be made in the field by Department personnel monitoring construction of the well. ()

036. -- 039. (RESERVED)

040. INJECTION WELLS (RULE 40).

01. Construction. The owner or operator of a proposed injection well or series of injection wells shall provide the Director with such information he deems necessary for evaluation of the impact of such injection on the

geothermal reservoir and other natural resources. Such information shall include existing reservoir conditions, method of injection, source of injection fluid, estimates of daily amount of material medium to be injected, zones or formations affected, and analysis of fluid to be injected and of the fluid from the intended zone of the injection. Such information shall be on department form 4003-3. ()

02. Surveillance. ()

a. When an operator or owner proposes to drill or modify an injection well or convert a producing or idle well to an injection well, he shall be required to demonstrate to the Director by means of a test that the casing has complete integrity. This test shall be conducted in a method approved by the Director. ()

b. To establish the integrity of the annular cement above the shoe of the casing, the owner or operator shall make sufficient surveys within thirty (30) days after injection is started into a well to prove that all the injected fluid is confined to the intended zone of injection. Thereafter, such surveys shall be made at least every two (2) years or more often if necessary. The Director shall be notified forty-eight (48) hours in advance of such surveys in order that a representative may be present if deemed necessary. If in the Director's opinion such tests are not necessary, he may grant a waiver excepting the operator from such tests. ()

c. After the well has been placed on injection, the injection well site will be visited periodically by Department personnel. The operator or owner will be notified of any necessary remedial work. Unless modified by the Director, this work must be performed within ninety (90) days or approval for the injection well issued by the Director will be rescinded. ()

041. -- 044. (RESERVED)

045. ABANDONMENT (RULE 45).

01. Objectives. The objectives of abandonment are to block interzonal migration of fluids so as to: ()

a. Prevent contamination of fresh water or other natural resources; ()

b. Prevent damage to geothermal reservoirs; ()

c. Prevent loss of reservoir energy; ()

d. Protect life, health, environment and property. ()

02. General Requirements. The following are general requirements which are subject to review and modification for individual wells or field conditions. ()

a. A notice of intent to abandon geothermal resource wells is required to be filed with the Director five (5) days prior to beginning abandonment procedures. A permit to abandon may be given orally by the Director provided the operator submits a written request for said abandonment on a form approved by the Director within twenty-four (24) hours of the oral request. ()

b. A history of geothermal resource wells shall be filed within sixty (60) days after completion of abandonment procedures. ()

c. All wells abandoned shall be monumented and the description of the monument shall be included in the history of well report. Such monument shall consist of a four (4) inch diameter pipe ten (10) feet in length of which four (4) feet shall be above ground. The remainder shall be embedded in concrete. The name, number, and location of the well shall be shown on the monument. Alternate methods of monumentation may be approved by the Director where land surface use indicates the above described method is not satisfactory. ()

d. Good quality heavy drilling fluid shall be used to replace any water in the hole and to fill all portions of the hole not plugged with cement. ()

- e. All cement plugs with a possible exception of the surface plug shall be pumped into the hole through drill pipe or tubing. ()
- f. All open annuli shall be filled solid with cement to the surface. ()
- g. A minimum of one hundred (100) feet of cement shall be emplaced straddling the interface or transition zone at the base of groundwater aquifers. ()
- h. One hundred (100) feet of cement shall straddle the placement of the shoe plug on all casings including conductor pipe. ()
- i. A surface plug of either neat cement or concrete mix shall be in place from the top of the casing to at least fifty (50) feet below the top of the casing. ()
- j. All casing shall be cut off at least five (5) feet below land surface. ()
- k. Cement plugs shall extend at least fifty (50) feet over the top of any liner installed in the well. ()
- l. Abandonment. Injection wells are required to be abandoned in the same manner as other wells. ()
- m. Other abandonment procedures may be approved by the Director if the owner or operator can demonstrate that the geothermal resource, groundwaters, and other natural resources will be protected. Such approval must be given in writing by the Director prior to the beginning of any abandonment procedures. ()
- n. Within five (5) days after the completion of the abandonment of any well or injection well, the owner or operator of the abandoned well or injection well shall report in writing to the Director on such form as may be prescribed by the Director on all work done with respect to the abandonment. ()

046. -- 049. (RESERVED)

050. MAINTENANCE (RULE 50).

01. General. All well heads, separators, pumps, mufflers, manifolds, valves, pipelines, and other equipment used for the production of geothermal resources shall be maintained in good condition in order to prevent loss of or damage to life, health, property, and natural resources. ()

02. Corrosion. All surface well head equipment and pipelines and subsurface casing and tubing will be subject to periodic corrosion surveillance in order to safeguard health, life, property, and natural resources. ()

03. Tests. The Director may require such tests or remedial work as in his judgment are necessary to prevent damage to life, health, property, and natural resources, to protect geothermal reservoirs from damage or to prevent the infiltration of detrimental substances into underground or surface water suitable for irrigation or other beneficial uses to the best interest of the neighboring property owners and the public. Such tests may include, but are not limited to, casing tests, cementing tests, and equipment tests. ()

051. -- 054. (RESERVED)

055. HEARINGS, NOTICE, PROCEDURE (RULE 55).

Any applicant or the Director shall have the right to a hearing concerning the propriety of issuing a permit for which an application has been filed. Any applicant who desires a hearing pursuant to Section 42-4004, Idaho Code, must file a written request therefor with the Director of the Department of Water Resources. Any person may file a petition with the Director requesting that the Director hold a hearing concerning the propriety of issuing a permit for which an application has been filed. The petitioner must serve a copy of the petition upon the applicant and set forth in the petition all reasons for requesting the hearing. The applicant may respond to the petition within ten (10) days of its

service. However, failure of the applicant to respond shall not be prejudicial to his right to appear at the hearing and present such evidence as he deems proper, if the Director grants the petition for such hearing. The hearing shall be set by the Director at any location deemed appropriate. Notice of the time and location shall be served on the applicant and/or the petitioner by the Director at least twenty (20) days before said date by certified mail addressed to applicant's address as stated in the application and to the petitioner at the address given in the petition. The hearing shall be conducted in the manner prescribed in the general rules and procedures of the Department. ()

056. -- 059. (RESERVED)

060. HEARINGS ON REFUSED, LIMITED, OR CONDITIONED PERMIT (RULE 60).

Any applicant who is granted a limited or conditioned permit, or who is denied a permit or any person aggrieved by a decision of the Director may seek a hearing on said action of the Director by serving on the Director written notice and request for a hearing before the Board within thirty (30) days of service of the Director's decision. Said hearing will be set, conducted, and notice given as set forth in Rule 055 above. Any applicant may appeal the decision of the Board to the District Court within thirty (30) days of service of the decision. All hearings under this rule shall be conducted in the manner prescribed in the general rules and procedures of the Department. ()

061. -- 064. (RESERVED)

065. PENALTIES (RULE 65).

01. Order by Director. If the Director finds that any person is constructing, operating, or maintaining any hole, well or injection well not in accordance with any applicable permit or in a fashion so as to involve an unreasonable risk of, or so as to cause, damage to life or property or subsurface, surface, or atmospheric resources, the Director may issue an order to such person to correct or to stop such practices as are found to be improper and to mitigate any injury of any sort caused by such practices. ()

02. Enforcement by Director. The Director may enforce any provision of this act or any order or regulation issued or adopted pursuant thereto by an appropriate action in the District Court. The Director may bring action in the District Court to have enjoined any threatened noncompliance with any provision of this act or any order or regulation adopted pursuant hereto or any threatened harm to life, property, or surface, subsurface or atmospheric resources which would be caused by such noncompliance. ()

03. Willful Violations or Failure to Comply. Any willful violations of or failure to comply with any provision of these rules, or if such order or regulation has been served on such person or is otherwise known to him, any valid order or regulation issued or adopted hereto shall be a misdemeanor punishable by fine of up to five thousand dollars (\$5,000) for each offense or a sentence of up to six (6) months in a county jail or both; each day of a continuing violation shall be a separate offense under this subdivision. A responsible or principal executive officer or any corporate person may be liable under this subdivision if such corporate person is not in compliance with any provision of this act or with any valid order or regulation adopted pursuant hereto. ()

066. -- 069. (RESERVED)

070. FORMS (RULE 70).

Forms required by these rules. ()

01. Samples of Forms. Samples of all forms required by these rules are available from the Department to interested parties upon request. ()

02. Forms. The forms include the following: ()

a. Form 4003-1, Application for Permit to Drill for Geothermal Resources; ()

b. Form 4003-2, Application for Permit to Alter a Geothermal Well; ()

c. Form 4003-3, Application for Permit to Convert a Well to a Geothermal Injection Well; ()

- d.** Form 4005, Geothermal Resources Surety Bond; ()
 - e.** Form 4007, Notice of Intent to Abandon a Well; ()
 - f.** Form 4009, Report of Abandonment of a Well; ()
 - g.** Form 4010-1, Monthly Injection Report for Geothermal Wells; and ()
 - h.** Form 4010-2, Monthly Energy Report for Geothermal Wells. ()
- 071. -- 999. (RESERVED)**

37.03.05 – MINE TAILINGS IMPOUNDMENT STRUCTURES RULES

000. LEGAL AUTHORITY (RULE 0).

These rules are adopted pursuant to Section 42-1714, Idaho Code. ()

001. TITLE AND SCOPE (RULE 1).

01. **Title.** These rules are titled IDAPA 37.03.05, "Mine Tailings Impoundment Structures Rules." ()

02. **Scope.** ()

a. These rules and standards will only apply to structures upon which construction, lift construction, enlargement, or alteration is underway on or after July 1, 1978. Under no circumstances shall these rules be construed to deprive or limit the Director of the Department of Water Resources of any exercise of powers, duties and jurisdiction conferred by law, nor to limit or restrict the amount or character of data, or information which may be required by the Director from any owner of a mine tailings impoundment structure for the proper administration of the law. ()

b. The design requirements listed are intended as a guide to establish acceptable standards of construction. They are not intended to restrict the application of other sound design principles by engineers. The Director will evaluate any deviation from the standards hereinafter stated as they pertain to the safety of any given mine tailings impoundment structure. Engineers are encouraged to submit new ideas which will advance the art and provide for the public safety. ()

002. -- 009. (RESERVED)

010. DEFINITIONS (RULE 10).

Unless the context otherwise requires, the following definitions govern these rules. ()

01. **Board.** The Idaho Water Resource Board. ()

02. **Director.** The Director of the Idaho Department of Water Resources. ()

03. **Department.** The Idaho Department of Water Resources. ()

04. **Mine Tailings Impoundment Structure.** Any artificial embankment which is or will be more than thirty (30) feet in height measured from the lowest elevation of the toe to the maximum crest elevation constructed for the purpose of storing mine tailings slurry. ()

05. **Mine Tailings Slurry.** All slurry wastes from a mineral processing or mining operation. ()

06. **Mine Tailings Storage Capacity.** The total storage volume of the impoundment when filled with tailings to the maximum approved design storage elevation. ()

07. **Borrowed Fill Embankment.** Any embankment constructed of borrowed earth materials and which is designed for construction by conventional earth moving equipment. ()

08. **Reservoir.** Any basin which contains or will contain the material impounded by the mine tailings impoundment structure. ()

09. **Owner.** Includes any of the following who own, control, operate, maintain, manage, or propose to construct a mine tailings impoundment structure or reservoir. ()

a. The state of Idaho and any of its departments, agencies, institutions and political subdivisions; ()

b. The United States of America and any of its departments, bureaus, agencies and institutions; provided that the United States of America are not required to pay any of the fees required by Section 42-1713, Idaho Code, and shall submit plans, drawings and specifications as required by Section 42-1721, Idaho Code, for information purposes only; ()

c. Every municipal or quasi-municipal corporation; ()

- d. Every public utility; ()
- e. Every person, firm, association, organization, partnership, business, trust, corporation or company; ()
- f. The duly authorized agents, lessees, or trustees of any of the foregoing; ()
- g. Receivers or trustees appointed by any court for any of the foregoing. ()
- 10. Alterations, Repairs or Either of Them.** Only such alterations or repairs as may directly affect the safety of the mine tailings impoundment structure or reservoir, as determined by the Director. ()
- 11. Enlargement.** Any change in or addition to an existing mine tailings impoundment structure or reservoir, which raises or may raise the storage capacity of the structure, as defined in Rule Subsection 010.06. ()
- 12. Days Used in Establishing Deadlines.** Calendar days including Sundays and holidays. ()
- 13. Certificate of Approval.** A certificate issued by the Director for the mine tailings impoundment structure listing restrictions imposed by the Director, and without which no new mine tailings impoundment structures shall be allowed to impound mine tailings slurry or water and no existing impoundment shall be allowed to impound water or continue deposition of mine tailings slurry. The structure will be recertified every two (2) years, unless the Director determines that the structure is unsafe. ()
- 14. Engineer.** A registered professional engineer, licensed as such by the state of Idaho. ()
- 011. -- 024. (RESERVED)**
- 025. AUTHORITY OF REPRESENTATIVE (RULE 25).**
When plans, drawings and specifications are filed by another person in behalf of an owner, written evidence of authority to represent the owners shall be filed with the plans, drawings and specifications. ()
- 026. -- 029. (RESERVED)**
- 030. FORMS (RULE 30).**
Forms required by these rules. ()
- 01. Samples of Forms.** Samples of all forms required by these rules are available from the Department to interested parties upon request. ()
- 02. Form 1721.** Construction of a mine tailings impoundment structure requires the filing of Form 1721. ()
- 031. -- 034. (RESERVED)**
- 035. PLANS, DRAWINGS, AND SPECIFICATIONS (RULE 35).**
The following provisions apply in submitting plans, drawings, and specifications. ()
- 01. Submission of Plans, Drawings, and Specification.** Any owner who shall desire to construct, or enlarge, or alter or repair any mine tailings impoundment structure shall submit duplicate copies of plans, drawings, and specifications prepared by an engineer for the proposed work to the Director with required fees. An owner who desires to construct a continuously raised tailings impoundment structure shall submit duplicate copies of plans, drawings, and specifications prepared by an engineer, showing the stages of lift height, by periods of time, and ultimate design height. ()
- 02. Application for and Receipt of Written Approval.** Construction of a new mine tailings

impoundment structure or enlargement, or non-emergency alteration or repairs on existing mine tailings impoundment structures shall not be commenced until the owner has applied and obtained written approval of the plans, drawings, and specifications covering the work. In emergency situations, the owner shall make the required alterations or repairs necessary to relieve the emergency, and notify the Director. ()

03. Preparation and Submission of Plans. Plans must be prepared on a good grade of tracing linen or a good quality vellum or mylar. Transparent copies reproducible by standard duplicating processes, if accurate, legible and permanent, will be accepted. Plans may initially be submitted in the form of nonreproducible paper prints. After reviewing the plans, the Director will notify the owner of any required changes. ()

04. Scale of Plans and Drawings. Plans and drawings shall be of sufficiently large scale with an adequate number of views and proper dimensions, so that drawings may be readily interpreted and studied. ()

05. Dimensions of Plans. All sheets for a set of plans shall have an outside dimension of twenty-four by thirty-six (24 x 36) inches. A margin of two (2) inches on the left-hand end and a margin of one-half (1/2) inch on the other three sides must be provided, making the available work space twenty-three (23) x thirty-three and one-half (33 1/2) inches. ()

06. Plans. The plans shall include the following: ()

a. A topographic map of the mine tailings impoundment structure site showing the location of the proposed mine tailings impoundment structure by section, township and range, and location of spillway or diversion structures, outlet works, and all borings, test pits, borrow pits; ()

b. A profile along the mine tailings impoundment structure axis showing the locations, elevations, and depths of borings or test pits, including logs of bore hole and/or test pits; ()

c. A maximum cross-section of the mine tailings impoundment structure showing elevation and width of crest, slopes of upstream and downstream faces, thickness of any proposed riprap, zoning of the earth embankment (if any), location of cutoff and bonding trenches, elevations, size and type of decant systems, valves, operating mechanism, and dimensions of all other essential structural elements such as cutoff walls, filters, embankment zones, etc.; ()

d. Detailed drawings describing the outlet system, i.e., decant line, barge pump system, siphon system; ()

e. If a spillway is used, a curve showing the discharge capacity in cubic feet per second of the spillway vs. gage height of the storage pool level above the spillway crest up to the maximum high water level, and the formula used in making such determinations; ()

f. If a stream diversion is created, a tabulation of the discharge capacity in cubic feet per second of any diversion works and of the diversion channel vs. flow depth through the diversion works or channel up to maximum capacity of the system, and the formulas used in making such determinations; ()

g. Where staged construction will take place and no spillway exists, a curve showing maximum safe operating level for the tailings as a function of embankment height and the design criteria used to arrive at this; ()

h. Detailed plans, including cross-sections and profile, of the spillway or diversion works and any associated channels; ()

i. Plans for monitoring and/or recovering seepage from the reservoir in those instances where safety of the impoundment may be affected; ()

j. An operation plan; ()

k. An emergency procedure plan for protection of life and property; ()

l. An abandonment plan that assures the Director to his satisfaction that, upon completion of the mining operation, the site will be in a safe maintenance-free condition. ()

07. Specifications. Specifications shall include provisions acceptable to the Director for adequate observation, inspection and control of the work by a registered professional engineer during the period of construction. ()

08. Provision Included with Plans. The specifications shall provide that the plans and specifications may not be materially changed without prior written consent of the Director. ()

09. Provisions Included with Specifications. The specifications shall provide that certain stages of construction shall not proceed without the approval of the Director. Those stages requiring approval are as follows: ()

a. After clearing and excavation of foundation and prior to placing any fill material; ()

b. After installation of the decant conduit and any proposed collars and before placing any backfill material around conduit; ()

c. After construction is completed (first stage starter dike if staged construction) and before any water or mine tailings slurry is stored in the reservoir; ()

d. Before each successive enlargement of the impoundment structure; ()

e. After each stage of enlargement of the impoundment structure is completed and before storage is allowed to exceed the level approved for the previous approved stage; ()

f. At such other times as determined necessary by the Director. The Director will, within seven (7) days after notification by the engineer, inspect and if satisfactory, approve the completed stage of construction. Owners are encouraged to give prior notice to the Department, so that the inspection can be scheduled to prevent delays. ()

10. Inspections, Examinations, and Tests. All materials and workmanship may be subject to inspection, examination and test by the Director at any and all reasonable times during manufacture and/or construction and at any and all places where such manufacture and/or construction are carried on. ()

11. Rejection of Defective Material. The Director shall have the right to require the owner or engineer to reject defective material and workmanship or require its correction. Rejected workmanship shall be corrected and rejected material shall be replaced with proper material. ()

12. Suspension of Work. The Director may order the engineer to suspend any work that may be subject to damage by climatic conditions. ()

13. Responsibility of Engineer. These provisions shall not relieve the engineer of his responsibility to assure that construction is accomplished in accordance to approved plans and specifications or to suspend work on his own motion. ()

14. Detailing Provisions of Specifications. The specifications shall state in sufficient detail, all provisions necessary to ensure that construction is accomplished in an acceptable manner and provide needed control for construction to ensure that a safe structure is constructed. ()

15. Required Information. The following information shall be submitted with the plans and specifications. ()

16. Engineer's Report. An engineer's report giving details necessary for analysis of the structure and appurtenances. Included as a part of the report where applicable shall be the following: ()

- a. Formulas and assumptions used in designs; ()
- b. Hydrologic data used in determining runoff from the drainage areas; ()
- c. Engineering properties of each type of material to be used in the embankment and of the foundation areas; ()
- d. Stability analysis, including an evaluation of overturning, sliding, upstream and downstream slopes and foundation stability; ()
- e. Geologic description of reservoir area, including evaluation of landslide potential; ()
- f. Chemical analysis of all materials composing the slurry; ()
- g. Earthquake design loads must be evaluated at all sites located east of Range 22 E., Boise Meridian. This area corresponds to Seismic Zone 3 as designated by the Recommended Guidelines of the National Dam Safety Program. Earthquake analysis may be required at other impoundment structure sites if deemed necessary by the Director; ()
- h. A seepage analysis of the embankment and reservoir bottom; ()
- i. A hydraulic analysis of the outlet system and spillway, diversion work or diversion channel; ()
- j. Engineering properties and the weathering characteristics of the proposed tailings to be stored in the impoundment; ()
- k. Other information which would aid in evaluating the safety of the design. ()

17. Filing of Additional Information. The Director may require the filing of such additional information which in his opinion is necessary to assess safety or waive any requirement herein cited if in his opinion it is unnecessary. ()

036. -- 039. (RESERVED)

040. BONDING (RULE 40).

An active surety bond or other means of acceptable surety payable to the Director of the Department of Water Resources shall be on file with the Director throughout the active life of the tailings disposal site. The purpose of this bond is to provide a means by which the tailings impoundment can be placed in a safe maintenance-free condition if abandoned by the owner without conforming to an abandonment plan approved by the Director. ()

01. Filing of Bond. The bond shall be filed prior to any issuance by the Director of a certificate of approval for use of the mine tailings impoundment structure to impound mine tailings slurry and shall run for the two (2) year approval period covered on the certificate of approval. ()

02. Provisions of Bond. Bond provisions shall provide that the surety may be held liable for a period of up to five (5) years following notice of default on the bond. ()

03. Amount of Bond. The bond amount will be set by the Director and is subject to revision each time it is renewed. The owner must obtain approval for the amount of his surety bond prior to each renewal. ()

04. Cost Estimate Submitted by Engineer. In order to provide a basis for setting the bond amount, the engineer shall submit a cost estimate acceptable to the Director, together with conceptual details needed to arrive at the estimate, for abandonment of the facility at each proposed stage of its construction. ()

05. Current Costs for Abandonment. Bond amount will be based on current costs for abandonment

of the facility based on the approved cost estimate for abandonment at the present construction condition or the next approved proposed stage, whichever represents the larger bond amount. ()

06. Determination of Bond Amount. If the final abandonment is determined to be the most costly condition, the owner may elect to use this as a basis for bonding throughout the life of the project. The Director may, however, revise the bonding amount to reflect updated costs when he feels it is necessary in order to maintain a realistic bond. ()

07. Filing Initial Bond. The initial bond shall be filed upon completion of the first stage of construction and before the required certificate of approval is issued to allow storage of mine tailings slurry in the impoundment. No certificate of approval shall be renewed prior to filing by the owner of a bond renewal in an amount approved by the Director. ()

08. Filing Copy of Performance Bond. Upon the filing of a copy of a performance bond with the Director, covering the terms and conditions of a state of Idaho mineral lease or an approved reclamation plan, in which these documents specify compliance with a plan of restoration of all mining operations, including the tailings impounding structure, the Director may determine the bond required of this section has been met, if the amount of the bond accurately reflects the cost associated with the abandonment plan provided by the owner. ()

041. -- 044. (RESERVED)

045. MINE TAILINGS IMPOUNDMENT STRUCTURES DESIGN CRITERIA (RULE 45).

The following minimum design criteria shall be used for all mine tailings impoundment structures designed for installation in Idaho. These limitations are intended to serve as guidelines for a broad range of circumstances, and engineers should not consider them as a restriction to the use of other sound design criteria. Deviation from this established criteria will be considered by the Director in approving plans and specifications. ()

01. Embankment Slopes. ()

a. For construction of borrowed fill embankments, in the absence of a stability analysis, the slopes shall be:

Upstream slope	2:1 or flatter
Downstream slope	2:1 or flatter

()

b. Construction by the upstream method shall not be used in the area of the state east of Range 22 E., Boise Meridian, unless the engineer can provide evidence that the construction and operation of the tailings impoundment will achieve a relative density of sixty percent (60%) or greater in the embankment and tailings to prevent liquefaction during earthquake loading. ()

c. Safety factors for the embankment shall be at least one and five-tenths (1.5) for static loads and a minimum of one (1) for the static plus the appropriate earthquake load. ()

d. To insure sufficient permeability and stability of the embankment, designs will require utilizing materials other than the tailings, when the tailings materials: ()

i. Contain greater than seventy-five percent (75) passing the #200 standard U.S. sieve, or fifty percent (50%) passing the #325 standard U.S. sieve; ()

ii. Contain phosphate clays; ()

iii. The design calls for the water to be impounded against the embankment; ()

iv. Have other properties which makes them unsuitable for use as construction materials. ()

e. Embankments designed for the storage of hazardous levels of radioactive materials shall, in addition to any requirements of these regulations, meet the criteria outlined in the Nuclear Regulatory Commission Regulatory Guide 3.11 and the Idaho Radiation Control Regulations administered by the Idaho Department of Environmental Quality. ()

f. The design shall consider the need for drains and/or operational procedures to promote consolidation and insure that a low phreatic surface is maintained within the embankment. Drainage pipe shall not be used beneath embankments where excessive or differential settlement may cause failure of the pipes and subsequent piping of the tailings or embankment. When the quality of the mine tailings slurry is such that it will adversely affect the quality of the existing groundwater, the design should be coordinated with the Department and the Department of Environmental Quality to insure that all applicable permits are obtained. ()

g. Instrumentation of the embankment and/or foundation will be required to insure that the structure is functioning satisfactorily. Standpipe piezometers with an inside diameter greater than one-half (1/2) inch will not be acceptable for use in fine-grained or cohesive soils in order to minimize response time. ()

h. Tailings impoundment structures which are constructed using the tailings shall not be constructed or raised during freezing weather to prevent frost lenses in the embankment. Sufficient freeboard must be provided during the summer construction season if the disposal operation is to continue during the winter. ()

i. If tailings are to be discharged during times of freezing weather and the embankment is to be constructed using either the upstream or centerline method, the pond shall be of sufficient size to insure that any ice formed in the tailings pond area melts during the next warm season. ()

02. Top Width Embankment. ()

a. In the absence of a stability analysis, the minimum top width for mine tailings impoundment structures shall be:

$$W = 2 (H \text{ to } 1/2 \text{ power}) + 4, \text{ minimum}$$

W = Top width
H = Embankment height ()

b. The minimum top width for any tailings embankment is ten (10) feet. ()

03. Cutoff Trenches or Walls. ()

a. Cutoff trenches, if needed, shall be used to bond the fill through relatively pervious material to an impervious stratum or zone. The bond area shall extend up the abutments to the maximum high water or tailings impoundment elevation. Cutoff (keylock) trenches which are to be backfilled with compacted fill shall be wide enough to allow the free movement of excavation and compaction equipment. Side slopes shall be no steeper than 1:1 for depths up to twelve (12) feet, and no steeper than one and one-half (1 1/2) to one (1) for greater depths to provide for proper compaction. Flatter slopes may be required for safety and stability. ()

b. Concrete cutoff walls may be used to bond fills to smooth rock surfaces in a similar manner as cutoff trenches and they shall be entrenched in the rock to a depth approximately one-half (1/2) the thickness of the cutoff wall. Concrete cutoff walls shall be doweled into the rock a minimum of twelve (12) inches with a maximum spacing of eighteen (18) inches for three-quarter (3/4) inch steel dowels. Concrete walls shall have a minimum projection of three (3) feet perpendicular to the rock surface and shall have a minimum thickness of twelve (12) inches. ()

04. Borrowed Fill Embankment. ()

a. The approved earth materials (silt soils are seldom acceptable) shall be zoned as shown in the plans and placed in the embankment in continuous, approximately level layers. Compaction shall be based on ASTM D-698 for cohesive soils and a minimum compaction of ninety-five percent (95%) of the laboratory Standard Proctor dry density is required. Compaction of cohesionless soils shall insure a relative density of sixty percent (60%) or

greater. ()

b. An acceptable working range of moisture content for the fill material shall be established and maintained. ()

c. The material shall be compacted by means of a loaded sheepsfoot roller, vibratory roller, or other acceptable means, to the required density. ()

d. No rock shall be left in the fill material which has a maximum dimension exceeding the lift thickness. The fill material shall be free of brush and organic materials. ()

e. The fill shall be carried up simultaneously the full design width of the structure, and the top of the fill shall be kept substantially level at all times or slope slightly toward the reservoir. ()

f. No frozen or cloddy fill material shall be used, and no material shall be placed upon frozen, muddy or unscarified surfaces. ()

g. All materials used in the embankment shall meet all the stability and seepage requirements as shown by a design analysis of the structure and shall be properly installed to meet these requirements. ()

05. Riprap. ()

a. All dams shall be protected from wave action. In cases where water is stored directly against the mine tailings impoundment structure or where wave action at maximum pool level during design inflow events would affect the integrity of the embankment, the Director may require use of riprap or other protective measures. ()

b. If riprap is used the design shall specify the rock size and extent of blanket required to prevent erosion. ()

06. Outlet Systems. ()

a. Reservoirs must safely handle the design inflow for all areas draining into the reservoir. This may be done either by storing the entire design inflow or by having an outlet system or combination of systems adequate to safely pass the design inflow. If the tailings reservoir is situated on a stream channel, an outlet system or an approved alternative system capable of meeting downstream flow requirements must be provided. ()

b. The minimum design inflow for all reservoirs shall be the flood with one percent (1%) probability of occurrence. The Director may require a greater design inflow be used in instances of high hazard, for larger mine tailings impoundment structures, or when the inflow is to be entirely stored in the reservoir during the flood period. ()

c. The outlet system may be composed of one (1) or a combination of the following: decant line, spillway, stream channel diversion to bypass the reservoir. The system will be determined by individual reservoir conditions. Unless removal of the mine tailings impoundment structure and reservoir is part of the abandonment plan, the outlet system shall be maintained in perpetuity, unless it is demonstrated that an outlet system is not needed. ()

d. Outlet systems will not be allowed if their use would release toxic, highly turbid, radioactive or otherwise hazardous flows from the reservoir. In these cases the design inflow must either be entirely stored or diverted around the reservoir. ()

e. All spillways shall be stabilized to discharge flow through the use of concrete, masonry, riprap or sod, if not constructed in resistant rock. ()

f. Wherever possible, the spillway shall be constructed independent of the impoundment structure. It shall lead the water far enough away from the mine tailings impoundment structure so as not to endanger the structure. ()

g. A diversion system must not subject the mine tailings impoundment structure to erosion during the design inflow event. All stream diversions shall conform to the minimum standards for stream channel alterations as written by this Department. ()

h. Decant conduits, if under the embankment, shall be laid on a firm, stable foundation and normally must not be placed on fill. They shall have a minimum inside diameter of twelve (12) inches and one (1) of the following provisions included in the design: ()

i. The owner shall have the conduit inspected by photographic or video tape equipment and a copy of the inspection provided to the Department, if a problem is suspected; or ()

ii. The conduit shall be completely plugged with concrete and/or suitable material, for that portion which extends through the embankment, if a nonrepairable problem occurs within the conduit. The conduit shall consist of material which has been shown to possess the qualities necessary to perform in the environment of the specific tailings impoundment. The design life of the conduit shall be greater than the life of the mine tailings impoundment structure. The portion of the conduit through the embankment shall be completely filled with concrete, or other suitable material, and the riser portion of the conduit capped, upon abandonment of the mine tailings impoundment structure. ()

i. All decant conduits, if under the embankment, shall have a seepage path through the impervious zone at least equivalent in length to the maximum head above the downstream end of the system. Only one third (1/3) the horizontal distance through the impervious zone will be utilized when calculating the length of the seepage path. Collars may be used to satisfy this requirement, but all collars shall extend a minimum of three (3) feet outside the conduit. Collars shall be spaced at intervals of at least seven (7) times their height and no collar may be closer to the outer surface of the impervious zone than the distance it extends out from the conduit. ()

j. More than two (2) decant conduits are not to be used, unless special conditions warrant. ()

07. Freeboard. A minimum freeboard of two (2) feet plus wave height (H) shall be provided on the crest of the mine tailings impoundment structure during passage of the design inflow.

$$H = 1.95 (F \text{ to } 1/2 \text{ power})$$

F = Fetch in miles across water surface at a design maximum level. ()

08. Records. All instrumentation shall be read and recorded on a regular basis, and all records must be available for inspection by Department personnel on request. ()

09. Inspection and Completion Reports. ()

a. It is the responsibility of the engineer to submit test reports along with periodic inspection and progress reports to the Director. ()

b. Upon completion of each approved stage of construction, a letter shall be sent to the Director, giving a short, narrative account covering all items of work. As-built plans shall be submitted to the Director if the completed project was substantially changed from the plans originally approved. ()

10. Abandonment. An abandonment plan which provides a stable, maintenance-free condition when the mine tailings impoundment is no longer being regularly maintained by the owner or the owner has ceased to use the site for disposal of mine tailings slurry, shall be submitted to the Director by the owner. The plan shall provide a safe condition by providing for removal of the tailings, or construction of a maintenance-free spillway or diversion works where needed to accommodate runoff. The plan shall include provisions to prevent water storage behind, and erosion of, the mine tailings impoundment structure and the impounded tailing. A conceptual plan which includes an engineering design report, detailed enough to provide the required cost estimate for bonding purposes, will be required prior to the approval of the proposed project. Detailed construction plans must be approved by the Director prior to implementation of any abandonment work. The Director shall notify the owner upon acceptance of completion of abandonment in accordance with the approved plan. ()

046. -- 049. (RESERVED)

050. DAMS STORING TAILING AND WATER (RULE 50).

Construction of dams intended to store water in excess of the water being decanted in the tailing placement operation shall also meet the requirements for water storage reservoirs specified in the Department's Rules for the Safety of Dams. The Director may waive any or all of these requirements if, in the opinion of the Director, sound engineering design supplied by the owner indicates such requirements are not applicable. ()

051. -- 054. (RESERVED)

055. PROVISIONS OF CHAPTER 17, TITLE 42, IDAHO CODE (RULE 55).

The provisions of Sections 42-1709 through 42-1721, Idaho Code, are a part of these rules. ()

056. -- 999. (RESERVED)

37.03.06 – SAFETY OF DAMS RULES

000. LEGAL AUTHORITY (RULE 0).

These rules are adopted pursuant to Chapter 17, Section 42-1714, Idaho Code, and implement the provisions of Sections 42-1709 through 42-1721, Idaho Code. ()

001. TITLE AND SCOPE (RULE 1).

01. **Title.** These rules are titled IDAPA 37.03.06, “Safety of Dams Rules.” ()

02. **Scope.** ()

a. The requirements that follow are intended as a guide to establish acceptable standards for construction and to provide guidelines for safety evaluation of new or existing dams. The rules apply to all new dams, to existing dams to be enlarged, altered or repaired, and maintenance of certain existing dams, as specifically provided in the rules. The Director will evaluate any deviation from the standards hereinafter stated as they pertain to the safety of any given dam. The standards are not intended to restrict the application of other sound engineering design principles. Engineers are encouraged to submit new ideas which will advance the state of the art and provide for the public safety. ()

b. Under no circumstances shall these rules be construed to deprive or limit the Director of the Department of Water Resources of any exercise of powers, duties and jurisdiction conferred by law, nor to limit or restrict the amount or character of data, or information which may be required by the Director from any owner of a dam for the proper administration of the law. State sovereignty as expressed in Policy 1A of the adopted State Water Plan for independent review and approval of dam construction, operation and maintenance will not be waived due to any overlapping jurisdiction from federal agencies. ()

002. -- 009. (RESERVED)

010. DEFINITIONS (RULE 10).

Unless the context otherwise requires, the following definitions govern these rules. ()

01. **Active Storage.** The water volume in the reservoir stored for irrigation, water supply, power generation, flood control, or other purposes but does not include flood surcharge. Active storage is the total reservoir capacity in acre-feet, less the inactive and dead storage. ()

02. **Alterations, Repairs or Either of Them.** Only such alterations or repairs as may directly affect the safety of the dam or reservoir, as determined by the Director. Alterations, repairs does not include routine maintenance items. (See Rule Subsections 055.02.a. and 055.02.b.) ()

03. **Appurtenant Structures.** Ancillary features (e.g. outlets, tunnels, gates, valves, spillways, auxiliary barriers) used for operation of a dam, which are owned by the dam owner or the owner has responsible control. ()

04. **Board.** The Idaho Water Resource Board. ()

05. **Certificate of Approval.** A certificate issued by the Director for all dams listing restrictions imposed by the Director, and without which no new dams shall be allowed by the owner to impound water. A certificate of approval is also required for existing dams before impoundment of water is authorized. ()

06. **Dam.** Any artificial barrier together with appurtenant works, which is or will be ten (10) feet or more in height or has or will have an impounding capacity at maximum storage elevation of fifty (50) acre-feet or more. Height of a dam is defined as the vertical distance from the natural bed of the stream or watercourse at the downstream toe of the barrier, as determined by the Director, or from the lowest elevation of the outside limit of the barrier, if it is not across a stream channel or watercourse, to the maximum water storage elevation. ()

07. **Small Dams.** Artificial barriers twenty (20) feet or less in height that are capable of storing less than one hundred (100) acre-feet of water. ()

08. **Intermediate Dams.** Artificial barriers more than twenty (20) feet, but less than forty (40) feet in height, or are capable of storing one hundred (100) acre-feet or more, but less than four thousand (4,000) acre-feet of water. ()

- 09. Large Dams.** Artificial barriers forty (40) feet or more in height or are capable of storing four thousand (4,000) acre-feet or more of water. ()
- 10. Department Jurisdiction.** The following are not subject to department jurisdiction: ()
- a.** Artificial barriers constructed in low risk areas as determined by the Director, which are six (6) feet or less in height, regardless of storage capacity. ()
- b.** Artificial barriers constructed in low risk areas as determined by the Director, which impound ten (10) acre-feet or less at maximum water storage elevation, regardless of height. ()
- c.** Artificial barriers in a canal used to raise or lower water therein or divert water therefrom. ()
- d.** Fills or structures determined by the Director to be designed primarily for highway or railroad traffic. ()
- e.** Fills, retaining dikes or structures, which are under jurisdiction of the Department of Environmental Quality, designed primarily for retention and treatment of municipal, livestock, or domestic wastes, or sediment and wastes from produce washing or food processing plants. ()
- f.** Levees, that store water regardless of storage capacity. Levee means a retaining structure alongside a natural lake which has a length that is two hundred (200) times or more greater than its greatest height measured from the lowest elevation of the toe to the maximum crest elevation of the retaining structure. ()
- 11. Days Used in Establishing Deadlines.** Calendar days including Sundays and holidays. ()
- 12. Dead Storage.** The water volume in the bottom of the reservoir stored below the lowest outlet and generally is not withdrawn from storage. ()
- 13. Department.** The Idaho Department of Water Resources. ()
- 14. Design Evaluation.** The engineering analysis required to evaluate the performance of a dam relative to earthquakes, floods or other site specific conditions that are anticipated to affect the safety of a dam or operation of appurtenant facilities. ()
- 15. Director.** The Director of the Idaho Department of Water Resources. ()
- 16. Engineer.** A registered professional engineer, licensed as such by the state of Idaho. ()
- 17. Enlargement.** Any change in or addition to an existing dam or reservoir, which raises or may raise the water storage elevation of the water impounded by the dam. ()
- 18. Factor of Safety.** A ratio of available shear strength to shear stress, required for stability. ()
- 19. Flood Surge.** A variable volume of water temporarily detained in the upper part of a reservoir, in the space (or part thereof) that is filled by excess runoff or flood water, above the maximum storage elevation. Flood surge cannot be retained either because of physical or administrative factors but is passed through the reservoir and discharged by the spillway(s) until the reservoir level has been drawn down to the maximum storage elevation. ()
- 20. Inflow Design Flood (IDF).** The flood specified for designing the dam and appurtenant facilities. ()
- 21. Maximum Credible Earthquake.** The largest earthquake that reasonably appears capable of occurring under the conditions of the presently known geological environment. ()
- 22. Operation Plan.** A specific plan that will assure the project is safely managed for its intended

purpose and which provides reservoir operating rule curves or specific limits and procedures for controlling inflow, storage, and/or release of water, diverted into, passed through or impounded by a dam. ()

23. Owner. Includes any of the following who own, control, operate, maintain, manage, hold the right to store and use water from the reservoir or propose to construct a dam or reservoir. ()

a. The state of Idaho and any of its departments, agencies, institutions and political subdivisions; ()

b. The United States of America and any of its departments, bureaus, agencies and institutions; provided that the United States of America are not required to pay any of the fees required by Section 42-1713, Idaho Code, and shall submit plans, drawings and specifications as required by Section 42-1712, Idaho Code, for information purposes only; ()

c. Every municipal or quasi-municipal corporation. ()

d. Every public utility; ()

e. Every person, firm, association, organization, partnership, business trust, corporation or company; ()

f. The duly authorized agents, lessees, or trustees of any of the foregoing; ()

g. Receivers or trustees appointed by any court for any of the foregoing. ()

24. Reservoir. Any basin which contains or will contain the water impounded by a dam. ()

25. Storage Capacity. The total storage in acre-feet at the maximum storage elevation. ()

26. Water Storage Elevation. The maximum elevation of the water surface which can be obtained by the dam or reservoir. It is further defined as the storage level attained when the reservoir is filled to capacity (i.e. to the spillway crest) or an authorized storage level attained by installing flashboards to increase the reservoir capacity, or a specified upper storage limit, which is attained by operation of movable gates that raises the reservoir to a controlled operating level. The maximum storage elevation is an equivalent term of water storage elevation. ()

27. Release Capability. The ability of a dam to pass excess water through the spillway(s) and outlet works and otherwise discharge. ()

011. -- 024. (RESERVED)

025. DAM SIZE CLASSIFICATION AND RISK CATEGORY (RULE 25).

01. Size Classification. The following table defines the height and storage capacity limits used by the Department to classify dams:

Size Classification	Height (ft)		Storage Capacity
Small	20 ft. or less	and	Less than 100 acre-ft.
Intermediate	More than 20 ft. but less than 40 ft.	or	100 Acre-ft or more, but less than 4000 acre ft
Large	40 ft. or more	or	4000 acre-ft., or more

()

02. Risk Category. The following table describes categories of risk used by the Department to classify losses and damages anticipated in down-stream areas, that could be attributable to failure of a dam during typical

flow conditions.

Risk Category	Dwellings	Economic Losses
Low	No permanent structures for human habitation.	Minor damage to land, crops, agricultural, commercial or industrial facilities, transportation, utilities or other public facilities or values.
Significant	No concentrated urban development, 1 or more permanent structures for human habitation which are potentially inundated with flood water at a depth of 2 ft. or less or at a velocity of 2 ft. per second or less.	Significant damage to land, crops, agricultural, commercial or industrial facilities, loss of use and/or damage to transportation, utilities or other public facilities or values.
High	Urban development, or any permanent structure for human habitation which are potentially inundated with flood water at a depth of more than 2 ft. or at a velocity of more than 2 ft. per second.	Major damage to land, crops, agricultural, commercial or industrial facilities, loss of use and/or damage to transportation, utilities or other public facilities or values.

()

03. Determination of Size and Risk Category. The Director shall determine the size and risk category of a new or existing dam. ()

026. -- 029. (RESERVED)

030. AUTHORITY OF REPRESENTATIVE (RULE 30).

When plans, drawings and specifications are filed by another person on behalf of an owner, written evidence of authority to represent the owner shall be filed with the plans, drawings and specifications. ()

031. -- 034. (RESERVED)

035. FORMS (RULE 35).

Forms required by these rules are available from the Department to interested parties upon request. Construction of a small dam requires the filing of Form 1710 and construction of an intermediate or large dam requires the filing of Form 1712. ()

036. -- 039. (RESERVED)

040. CONSTRUCTION PLANS, DRAWINGS AND SPECIFICATIONS (RULE 40).

The following provisions shall apply in submitting plans, drawings and specifications. ()

01. Submission of Duplicate Plans, Drawings and Specifications. Any owner who shall desire to construct, enlarge, alter or repair any intermediate or large dam, shall submit duplicate plans, drawings and specifications prepared by an engineer for the proposed work to the Director with required fees. The Director may, however, require the submittal of plans, drawings and specifications prior to the construction of any dam. ()

02. Applying for and Obtaining Written Approval. Construction of a new dam or enlargement, alteration or repairs on existing dams shall not be commenced until the owner has applied for and obtained written approval of the plans, drawings and specifications. Alteration or repairs do not include routine maintenance for which prior approval is not required. (See Rule Subsections 055.02.a and 055.02.b) ()

03. Plans Shall Be Prepared on a Good Quality Vellum or Mylar. Transparent copies reproducible by standard duplicating processes, if accurate, legible and permanent, will be accepted. Plans may initially be submitted in the form of nonreproducible paper prints. After reviewing the plans, the Director will notify the owner of

any required changes. ()

04. Preparation and Submission of Plans. Plans and drawings shall be of a sufficient scale with an adequate number of views showing proper dimensions, so that the plans and drawings may be readily interpreted and so that the structure and appurtenances can be built in conformance with the plans and drawings. ()

05. Information Included with Plans. Plans for new dams shall include the following information and plans for enlargement, alteration or repair of an existing dam shall include as much of the following information as required by the Director to adequately describe the enlargement, alteration or repair and the affect on the existing dam or its appurtenant facilities: ()

a. A topographic map of the dam site showing the location of the proposed dam by section, township and range, and location of spillway, outlet works, and all borings, test pits, borrow pits; ()

b. A profile along the dam axis showing the locations, elevations, and depths of borings or test pits, including logs of bore holes and/or test pits; ()

c. A maximum cross-section of the dam showing elevation and width of crest, slopes of upstream and downstream faces, thickness of riprap, zoning of earth embankment, location of cutoff and bonding trenches, elevations, size and type of outlet conduit, valves, operating mechanism and dimensions of all other essential structural elements such as cutoff walls, filters, embankment zones, etc.; ()

d. Detailed drawings showing plans, cross and longitudinal sections of the outlet conduits, valves and controls for operating the same, and trash racks; ()

e. A curve or table showing the capacity of the reservoir in acre-feet vs gauge height (referenced to a common project datum) of the reservoir storage level, and the computations used in making such determinations. ()

f. A curve or table showing the outlet discharge capacity in cubic feet per second vs gauge height of reservoir storage level, and the equation used in making such determination; ()

g. A curve showing the spillway discharge capacity in cubic feet per second vs gauge height of the reservoir or flood surcharge level above the spillway crest and the equation used in making such determinations; ()

h. Detailed drawings of spillway structure(s), cross-sections of the channel heading to and from the spillway and a spillway profile; ()

i. Plans for flow measuring devices capable of providing an accurate determination of the flow of the stream above and below the reservoir, and a permanent reservoir or staff gauge near the outlet of the reservoir plainly marked in feet and tenths of a foot referenced to a common project datum; ()

j. Plans or drawings of instruments, recommended by the owner's engineer to monitor performance of intermediate or large dams to assure safe operation, or as may be required by the Director to monitor any dam regardless of size, that is situated upstream of a high risk area. ()

06. Specifications. Specifications shall include provisions acceptable to the Director for adequate observation, inspection and control of the work by a registered professional engineer, during the period of construction. ()

07. Changes to Specifications. The specifications shall not be materially changed without prior written consent of the Director. Significant design changes, while construction is underway, shall be submitted for the Director's review and approval. ()

08. Inspections. The owner shall provide for and allow inspections by the Department to assure the dam and appurtenant structures are constructed in conformance with the approved plans and specifications, or as may

be revised by the engineer and approved by the Director if there are unforeseen conditions discovered during site excavation or construction of the dam which potentially jeopardize the future integrity and safety of the dam. Certain stages of construction shall not proceed without inspection and approval by the Director, including the following:

()

a. After clearing and excavation of the foundation area and cutoff trench and prior to placing any fill material. ()

b. After installation of the outlet conduit and collars and before placing any backfill material around the conduit; ()

c. After construction is completed and before any water is stored in the reservoir. ()

d. At such other times as determined necessary by the Director. The Director will, upon seven (7) days notice, inspect and if satisfactory, approve the completed stage of construction. The Director may conduct inspections upon shorter notice upon good reason being shown or upon a schedule jointly agreed upon by the Director and the owner. ()

09. Inspection, Examination and Testing of Materials. All materials and workmanship shall be subject to inspection, examination and testing by the Director at any and all times. ()

10. Rejection of Defective Material. The Director shall have the right to require the owner or engineer to reject defective material and workmanship or require its removal or correction respectively. Rejected workmanship shall be corrected and rejected material shall be replaced with proper material. ()

11. Suspension of Work. The Director may order the engineer to suspend any work that may be subject to damage by inclement weather conditions. ()

12. Responsibility of Engineer. These provisions shall not relieve the engineer of his responsibility to assure that construction is accomplished in accordance with the approved plans and specifications or to suspend work on his own motion. ()

13. Detailing Provisions of Specifications. The specifications shall state in sufficient detail, all provisions necessary to insure that construction is accomplished in an acceptable manner and provide needed control of construction to insure that a safe structure is constructed. ()

14. Design Report. Owners proposing to construct, enlarge, alter or repair an intermediate or large dam shall submit an engineering or design evaluation report with the plans and specifications. The engineering report shall include as much of the following information as necessary to present the technical basis for the design and to describe the analyses used to evaluate performance of the structure and appurtenances. ()

a. All technical reference(s); equations and assumptions used in the design; ()

b. Hydrologic data used in determining runoff from the drainage areas; reservoir flood routing(s); and hydraulic evaluations of the outlet(s) and the spillway(s). ()

c. Engineering properties of the foundation area and of each type of material to be used in the embankment. ()

d. A stability analysis, including an evaluation of overturning, sliding, slope and foundation stability and a seepage analysis; ()

i. Seismic design loads shall be evaluated and applied at all large dams to be located in significant or high risk areas, in Seismic Zone 3, which for purposes of these rules is the area in Idaho east of Range 22 East, Boise Meridian. The evaluation required of large dams, that are classified significant or high risk, shall use the maximum ground motion/ acceleration generated by the maximum credible earthquake, which could affect the dam site. ()

ii. Seismic analysis may be required as determined by the Director for large dams located above high risk areas in Seismic Zone 2, which for purposes of these rules is the area in Idaho west of Range 22 East, Boise Meridian. ()

15. Additional Information/Waiver. The Director may require the filing of such additional information which in his opinion is necessary or waive any requirement herein cited if in his opinion it is unnecessary. ()

16. Alternate Plans. The Director may accept plans and specifications or portions thereof prepared for other agencies which are determined to meet the requirements of Rule 40. ()

041. -- 044. (RESERVED)

045. OPERATION PLAN (RULE 45).

An operation plan is required as described in the following rules and shall provide procedures for emergency operations and include guidelines and procedures for inspection, operation and maintenance of the dam and appurtenances, including any instruments required to monitor performance of the dam during normal operating cycles, critical filling or flood periods, or as may be required to monitor new or existing dams subject to earthquake effects. ()

01. New, Reconstructed or Enlarged Dams. Prior to the initial filling of the reservoir or refilling the reservoir for a reconstructed or enlarged dam in the following categories, the owner shall file with the Director an operation plan for review and approval: ()

- a. Small, high risk. ()
- b. Intermediate, significant risk. ()
- c. Intermediate, high risk. ()
- d. Large, any risk category. ()

02. Existing Dams. Unless exempted by the Director, owners of the following categories of dams shall file an operation plan with the Director on or before July 1, 1992 for review and approval: ()

- a. Intermediate, high risk. ()
- b. Large, significant risk. ()
- c. Large, high risk. ()

03. Alternate Plans. The Director may accept existing studies or plans in lieu of an operation plan if the Director determines the information provided fulfills the requirements of Rule 45. ()

046. -- 049. (RESERVED)

050. NEW INTERMEDIATE OR LARGE DAMS (RULE 50).

The following minimum criteria shall be used to evaluate the design of intermediate or large earthfill dams in Idaho. These standards are intended to serve as guidelines for a broad range of circumstances, and engineers should not consider them as a restriction to the use of other sound engineering design principles. Exclusion from this established criteria will be considered by the Director on a case-by-case basis in approving plans and specifications and evaluating dams. Dams constructed of other materials shall comply with these criteria as found appropriate by the Director and with other engineering criteria approved by the Director. ()

01. Embankment Stability. Slope stability analyses shall determine the appropriate upstream and downstream slopes. Unless slope stability analysis determines otherwise, the embankment slopes shall be:

Upstream slope	3:1 or flatter
Downstream slope	2:1 or flatter

()

a. For large high and significant hazard dams and intermediate high hazard dams the embankment shall be designed, constructed and maintained to assure stability under static loads and prevent instability due to seepage or uplift forces, or drawdown conditions. Transmission of seepage through the embankment, abutments and foundation shall be controlled to prevent internal removal of material and instability where seepage erodes or emerges. ()

b. The design analysis shall consider the need for installing filters, filter fabric and/or toe drains to stabilize the fill and protect against piping of the embankment fill material. ()

c. The minimum factor of safety for a dam under steady state condition shall be 1.5. During rapid drawdown of the reservoir, the minimum factor of safety for the embankment shall be 1.2. For dams constructed in Seismic Zone 3, the minimum factor of safety under seismic load shall be 1.0. ()

d. The stability of an embankment subjected to earthquake ground motions can be analyzed by dynamic response or pseudo-static analyses. Pseudo-static analyses are acceptable for embankment dams constructed of soils that will not build-up excess pore pressures due to shaking, nor sustain more than fifteen percent (15%) strength loss during earthquake events, otherwise the stability of an embankment dam shall be analyzed by a dynamic response method. A pseudo-static analysis simplifies the structural analysis (i.e. the resultant force of the seismic occurrence is represented by a static horizontal force applied to the critical section to derive the factor of safety against sliding along an assumed shear surface). The value of the horizontal force used in the pseudo-static analysis, is the product of the seismic coefficient and the weight of the assumed sliding mass. ()

e. Slope deformation analyses are required for dams located in Seismic Zone 3, that are constructed of cohesionless soils and/or on foundations which are subject to liquefaction, when the peak acceleration at the site is anticipated to exceed 0.15g. ()

f. The design analyses for new dams located in high risk areas (in Seismic Zone 2 or 3) shall include geologic and seismic reports, location of faults and history of seismicity. ()

g. Where in the opinion of the Director, embankment design or conditions warrant, instrumentation of the embankment and/or foundation will be required. ()

h. The design analyses for new large dams located in high risk areas (in Seismic Zone 3) shall include an evaluation of potential landslides in the vicinity of the dam or immediate area of the reservoir, which could cause damage to the dam or appurtenant structures, obstruct the spillway or suddenly displace water in the reservoir causing the dam to overtop. If potential landslides pose such a threat, they shall be stabilized against sliding, with a minimum factor of safety of 1.5. ()

02. Top Width. The crest width shall be sufficient to provide a safe percolation gradient through the embankment at the level of the maximum storage elevation. The minimum crest width (top of embankment) shall be determined by:

$$W = H / 5 + 10$$

W = Width, in feet
H = Structural Height, in feet

The minimum top width for any dam is twelve (12) feet. ()

03. Cutoff Trenches or Walls. Cutoff trenches shall be excavated through relatively pervious foundation material to an impervious stratum or zone. The trench shall be backfilled with suitable material, compacted to the specified density. The cutoff trench shall extend up the abutments to the maximum storage elevation. ()

a. Cutoff trenches shall be wide enough to allow the free movement of excavation and compaction equipment. Side slopes shall be no steeper than one to one (1:1) for depths up to twelve (12) feet, and no steeper than one and one half to one (1 1/2:1) for greater depths to provide for proper compaction. Flatter slopes may be required for safety and stability. ()

b. Concrete cutoff walls may be used to bond fills to smooth rock surfaces in a similar manner as cutoff trenches and shall be entrenched in the rock to a depth approximately one-half the thickness of the cutoff wall. Concrete cutoff walls shall be doweled into the rock a minimum of eight (8) inches with a maximum spacing of eighteen (18) inches for three-fourths (3/4) inch steel dowels. Concrete walls shall have a minimum projection of three (3) feet perpendicular to the rock surface and shall have a minimum thickness of twelve (12) inches. ()

04. Impervious Core Material. The approved earth materials (silt soils are seldom acceptable) shall be zoned as shown in the plans and placed in the embankment in continuous, approximately level layers, having a thickness of not more than six (6) inches before compaction. Compaction shall be based on ASTM D-698. A minimum compaction of ninety-five percent (95%) is required. ()

a. An acceptable working range of moisture content for the core material shall be established and maintained. ()

b. The material shall be compacted by means of a loaded sheepsfoot or pneumatic roller to the required density. ()

c. No rock shall be left in the core material which has a maximum dimension of more than four (4) inches. The core material shall be free of organic and extraneous material. ()

d. The core material shall be carried up simultaneously the full width and length of the dam, and the top of the core material shall be kept substantially level at all times, or slope slightly toward the reservoir. ()

e. No frozen or cloddy material shall be used, and no material shall be placed upon frozen, muddy or unscarified surfaces. ()

f. All materials used in the dam shall meet the stability and seepage requirements as shown by a design analysis of the structure and shall be properly installed to meet these requirements. ()

05. Drains. Toe or chimney drains or free draining downstream material shall be installed where necessary to maintain the phreatic line within the downstream toe. ()

a. Filter design for chimney drains, filter blankets and toe drains in clay and silt soils shall be selected using the following design criteria, unless deviations are substantiated by laboratory tests. All tests are subject to review and approval by the Director.

D15 filter/D15 base > 5 but < 20

D15 filter/D85 base < 5

D50 filter/D50 base < 25

D85 filter > 2 times diameter of pipe perforations, or 1.2 times width of pipe slots. ()

b. Filter material requirements are determined by comparing the particle size distribution of the filter to the particle size distribution of the materials to be protected;

e.g. D50 filter
D50 material to be protected

Where D is the particle size passing a mechanical (sieve) analysis expressed as a percentage by weight. ()

c. The base material should be analyzed considering the portion of the material passing the No. 4 sieve, for designing filters for base materials that contain gravel size particles. To assure internal stability and prevent segregation of the filter material, the coefficient of uniformity (D60/D10) shall not be greater than 20. ()

d. The minimum thickness of filter blankets and chimney drains shall be twelve (12) inches, with the maximum size particle passing the one (1) inch sieve. The maximum particle size may be increased with increasing thickness of the filter, by the rate of one (1) inch per foot of filter. However, the maximum particle shall not exceed three (3) inches. Zoned filters and chimney drains must not be less than twelve (12) inches thick per each zone. The width of granular filters shall not be less than the width of the installation equipment unless the plans and specifications include construction procedures adequate to insure the integrity of a narrower width. ()

e. Perforated drain pipes must have a minimum of six (6) inches of drain material around the pipe. The maximum particle size shall not exceed one-half (1/2) inch unless the layer thickness is increased at the rate of one (1) inch per foot of filter. Underdrains and collection pipes must be constructed of noncorrosive material. ()

06. Freeboard. The elevation of the top of the embankment shall be constructed and maintained above the flood surcharge level to prevent the dam from overtopping during passage of the inflow design flood and to provide freeboard for wind generated waves. Camber shall be included in the design and incorporated in the construction of the top of the embankment, unless waived by the Director. Camber may be estimated by multiplying the structural height of the dam by five percent (5%). ()

a. The height of wind generated waves (H) moving across a surcharged reservoir can be estimated by the following equation:

$H = 1.95 (F/2)$ where F = fetch, the distance in miles across the reservoir, measured perpendicular to the major axis of the dam. ()

b. For large, high risk dams the minimum freeboard shall be two (2) feet plus wave height during passage of the one percent (1%) flood or equal to the surcharge elevation of the reservoir during passage of the inflow design flood whichever is greater. ()

c. Estimation of the height of the wind generated wave using the empirical equation in Rule 050.06.a. shall not preclude a more conservative design including consideration of fill materials, embankment zoning, slope surface protection, drainage or other safety factors. ()

07. Riprap. All dams which are subject to erosion shall be protected from wave action. The design engineer, with approval of the Director, shall determine whether or not rock riprap or other protection is necessary. ()

a. Where rock riprap is used, it shall be placed on a granular bedding material, and extend up the slope, from three (3) feet below the normal minimum operating level to the top of the dam. ()

b. Where riprap is required by Rule Subsection 055.07, pipes, cables, brush, tree growth, dead growth, logs, or floating debris are not acceptable substitutes for rock riprap and granular bedding material. ()

08. Outlet Conduits. All reservoirs shall be provided with an outlet conduit of sufficient capacity to prevent interference with natural streamflow through the reservoir to the injury of downstream appropriators unless waived by the Director. In addition to any natural flow releases, the outlet conduit should be of sufficient capacity to pass at the same time, the maximum water requirement of the owner. A larger outlet conduit may be required to provide adequate release capability as determined by the Director. ()

a. Outlet conduits shall be laid on a firm, stable foundation and normally not be placed on fills which can consolidate, allow differential settlement, and cause separation or misalignment of the pipe. Unless otherwise required, the outlet shall have a minimum inside diameter of twelve (12) inches. The conduits shall be of reinforced concrete or of metal pipe encased in concrete, poured with a continuous seal between the concrete and the trench

except as otherwise approved by the Director. Void spaces and uncompacted areas shall not be covered over when the outlet trench is backfilled. Outlets shall be properly aligned on an established grade and may be supported on a concrete cradle, or otherwise supported and kept aligned when the outlet is covered. ()

b. Asphalt dipped or other metal pipe is not acceptable unless it is encased in concrete. Exceptions may be made only where conditions warrant, but in no case shall the reasonable life expectancy of the pipe be less than the design life of the dam. ()

c. All outlet conduits shall have a seepage path through the impervious zone at least equivalent in length to the maximum head above the downstream end of the system. Only one-third (1/3) the horizontal distance through the impervious zone will be utilized when calculating the length of the seepage path. Collars may be used to satisfy this requirement but all collars shall extend a minimum of two (2) feet outside the conduit for dams up to thirty (30) feet in height and a minimum of three (3) feet for dams above that height. Collars shall be spaced at intervals of at least seven (7) times their height and no collar may be closer to the outer surface of the impervious zone than the distance it extends out from the conduit. ()

d. The use of multiple conduits is allowed only upon the written approval of the Director. ()

09. Gates. All conduits shall be gated on the upstream end, unless otherwise approved by the Director, with either a vertical or an inclined gate. All conduits shall be vented directly behind the gate unless otherwise determined by the Director. Reservoirs storing water during the winter and subject to severe ice conditions shall have inclined gate controls enclosed in a protective sleeve which is buried. All gate stem pedestals shall be made of concrete. All trash racks shall slope toward the reservoir. At least one (1) of the sides of the inlet structure shall be open to allow water to flow into the outlet conduit and shall be covered with a trash rack. Trash racks should be designed with bars primarily in one (1) direction so they can be cleaned. If fish screens are used, they shall be placed over the trash rack and shall be removable for cleaning, or of the self-cleaning type. ()

10. Outlet Controls. Outlet controls shall be installed at a stable location, on the crest or on an elevated platform, or within an enclosure when required, which is readily accessible, but secured to prevent unauthorized operation. ()

11. Release Capability. Based on the size of the dam and on the risk category assigned by the Director, the release capability of a dam shall equal or exceed the inflow design flood in the following table:

Downstream Risk Category	Size Classification	Inflow Design Flood
Low	Small	Q50
	Intermediate	Q100
	Large	Q500
Significant	Small	Q100
	Intermediate	Q500
	Large	0.5 PMF
High	Small	Q100
	Intermediate	0.5 PMF
	Large	PMF

NOTE: The inflow design flood(s) indicated in the table include specific frequency floods (2%/50yr, 1%/100 yr.) expressed in terms of exceedance with a probability the flood will be equaled or exceeded in any given year (a fifty (50) year flood has a two percent (2%) chance of occurring in any given year and a one hundred (100) year flood has a one percent (1%) chance of occurring in any given year); or PMF - probable maximum flood, which may be

expected from the most severe combination of meteorologic and hydrologic conditions that are reasonably possible in the region. The PMF is derived from the probable maximum precipitation (PMP) which is the greatest theoretical depth of precipitation for a given duration that is physically possible over a particular drainage area at a certain time of year. ()

a. All spillways shall be stabilized for the discharge of flow by the use of concrete, masonry, riprap or sod, if not constructed in resistant rock. ()

b. Where site conditions allow, the spillway shall be constructed independent of embankment dams. The spillway(s) shall guide the discharge of water away from the dam embankment so as not to erode or endanger the structure. ()

c. The minimum base width of an open-channel spillway shall be ten (10) feet. Conduits or siphon pipes other than glory hole spillways are not acceptable substitutes for an open-channel spillway. ()

d. The effectiveness of spillways shall be undiminished by bridges, fences, pipelines or other structures. ()

e. Unless expressly authorized in writing by the Director, or approved as an integral part of an operation plan, stop logs or flashboards shall not be installed in spillways. ()

12. Reservoir Site. The dam site shall be cleared of all trees, brush, large rocks, and debris unless otherwise waived by the Director. The reservoir site shall be cleared of all woody material, growth or debris that is large enough to lodge in the spillway, or outlet works, except as otherwise approved by the Director. ()

13. Inspection and Completion Reports. As construction proceeds, it is the responsibility of the engineer to submit test reports (e.g. soil material analyses, density tests, concrete strength tests) along with periodic inspection and progress reports to the Director. ()

a. Upon completion of construction the owner or his engineer shall provide the Director a short, written narrative account of all items of work. Record drawings and revised specifications shall be submitted to the Director if the completed project has been substantially changed from the plans and construction specifications originally approved. ()

b. The engineer representing the owner shall certify that construction, reconstruction, enlargement, replacement or repair of the dam and appurtenances was completed in accordance with the record drawings and specifications, or as revised. ()

051. -- 054. (RESERVED)

055. EXISTING INTERMEDIATE OR LARGE DAMS (RULE 55).

All dams regulated by the department shall be operated and maintained to retain the embankment dimensions and the hydraulic capacity of the outlet works and spillway(s) as designed and constructed, or as otherwise required by these rules. ()

01. Analyses Required. The analyses required by Rule 40 are not applicable to existing dams except as required in Rule Subsections 055.01.a. and 055.01.e. unless for good cause, the Director specifically requires the analyses. Dams constructed of other than earth material shall comply with these criteria, as determined by the Director, or with other engineering criteria approved by the Director. ()

a. For large, significant or high risk dams, the release capability required by Rule Subsection 050.11 shall be evaluated and applied to the structure. Dams of other size and risk are required to provide the release capability of Rule Subsection 050.11 but are not required to conduct the analyses. ()

b. Every dam, unless exempted by the Director shall have a spillway with a capacity to pass a flood of one percent (1%) (two percent (2%) for small low hazard dams) occurring with the reservoir full to the spillway crest at the beginning of the flood while maintaining the freeboard required by Rule Subsection 050.06. ()

c. The Director may waive the spillway requirement for dams proposing off stream storage or upon a showing acceptable to the Director. ()

d. The release capability can include the capacity of spillway(s) and outlet(s), diversion facilities, or other appurtenant structures, and any approved operating procedures which utilize upstream storage, diversion and flood routing storage to pass flood events. The remainder of the required release capacity, if any, may be met by the following: ()

i. Reconstruction, enlargement or addition of spillway(s), outlet(s), diversion facilities or other appurtenant structures. ()

ii. A showing acceptable to the Director that failure of the dam during a flood of the specified magnitude described in Rule Subsection 050.11 would not substantially increase downstream damages over and above the losses and damages that would result from any natural flood up to that magnitude. ()

iii. A showing acceptable to the Director that the release capability of the dam together with other emergency release modes such as a controlled failure or overtopping of the dam would not result in a larger rate of discharge than the rate of inflow to the reservoir. ()

iv. A showing acceptable to the Director that limiting physical factors unique to the dam site exist that prevent construction of a spillway or other release capability mechanisms during a flood of the specified magnitude described in Rule Subsection 050.11 provided the owner implements storage operational procedures and/or provides for emergency warning to protect life and property. ()

e. For large, high risk dams, the seismic design loads shall be evaluated and applied to dams located east of Range 22E, B.M. The evaluation shall use the maximum ground motion/acceleration generated by the maximum credible earthquake. ()

f. The Director may accept existing studies relative to requirements of Rule Subsections 055.01.a. and 055.01.e., if the Director determines the information provided fulfills the requirements of Rule Subsections 055.01.a. and 055.01.e. ()

g. The Director may allow until July 1, 1992 for completion of the analyses required in Rule Subsections 055.01.a. and 055.01.g. and may allow the owner of an existing dam a compliance period of up to ten years for completing the studies, to complete structural modifications or implement other improvements necessary to provide the release capability determined to be required (Rule Subsection 055.01.a.) or complete structural modifications necessary to assure the dam and appurtenant facilities will safely function under earthquake loads (Rule Subsection 055.01.g.). ()

h. Within thirty (30) days after completing the analyses required in Rule Subsection 055.01.a. or 055.01.g., the owner of an existing dam that is deficient in either case (Rule Subsection 055.01.a. or 055.01.g.) shall file with the Director a schedule outlining the dates work or construction items will be completed. ()

02. Other Requirements. ()

a. Routine maintenance items include the following: ()

i. Eradication of rodents and filling animal burrows. ()

ii. Removal of vegetation and debris from the dam. ()

iii. Restoring original dimensions of the dam by the addition of fill material. ()

iv. Addition of bedding or riprap material which will not increase the height or storage capacity. ()

- v. Repair or replacement of gates, gate stems, seals, valves, lift mechanisms or vent pipes with similar equipment. ()
- vi. Repair or replacement of wingwalls, headwalls or aprons including spalling concrete. ()
- b. The following are not routine maintenance items: ()
 - i. Reconstruction of embankment slopes. ()
 - ii. Replacement, reconstruction or extension of outlets. ()
 - iii. Foundation stabilization. ()
 - iv. Filter or drain construction or replacement. ()
 - v. Spillway size alteration or modification. ()
 - vi. Installation of instrumentation or piezometers. ()
 - vii. Release capability modification. ()
- c. Items not specifically described in Rule Subsections 055.02.a. and 055.02.b. will be determined by the Director to be included in one rule or the other upon receipt of a written request from the owner or his representative seeking such a determination. ()
- d. Where riprap is required to prevent erosion and to maintain a stable embankment, pipes, cables, brush, tree growth, logs, or floating debris are not acceptable substitutes for rock riprap and granular bedding material. Dams or portions thereof which are stable without riprap, are not required to have riprap. ()
- e. Upon completion of reconstruction of a dam or feature of a dam included in Rule Subsection 055.02.b., the owner or his engineer shall provide the Director a short written narrative account of all items of work. Record drawings and revised specifications shall be submitted to the Director if the completed project has been substantially changed from the plans and construction specifications originally approved. ()
- f. Upon request, the owner of every dam shall provide his name and address to the Director and shall advise the Director of future changes in ownership. If the owner does not reside in Idaho, the owner shall provide the name and address of the person residing in Idaho who is responsible for the operation, maintenance and repair of the dam. ()

056. -- 061. (RESERVED)

060. SMALL DAM DESIGN CRITERIA (RULE 60).

The following provisions apply to small dams. ()

01. Design and Construction of Small Dams. Design and construction of small dams located in high risk areas as determined by the Director require submittal of fees, plans and specifications prepared by an engineer and shall follow the same general criteria established under Rules 40, 45, 50, and 55. Other small dams not determined to be in a high risk area shall follow the same general criteria established under Rules 50 and 55 or larger dams, except that submittal of plans, specifications and test results is not required. ()

02. Notification Prior to Construction. The owner shall notify the Director in writing ten (10) calendar days prior to commencing construction. ()

03. Approval Required. The owner shall not proceed with the following stages of construction without approval from the Director. ()

- a. After clearing and excavation of the foundation area and cutoff trench, and prior to placing any fill

material; ()

b. After installation of the outlet conduit, and before placing any backfill material around the conduit; ()

c. After construction is completed, and before any water is stored in the reservoir; ()

d. At such other times as determined necessary by the Director. The Director, will, upon seven (7) day notice, inspect and, if satisfactory, approve the completed stage of construction. ()

04. Notification upon Completion of Construction. The owner shall in writing notify the Director upon completion of construction. ()

061. -- 064. (RESERVED)

065. DAMS STORING TAILINGS AND WATER (RULE 65).

01. Construction of Dams Storing Fifty Acre-Feet or More. Construction of dams intended to store or likely to store fifty (50) acre-feet or more of water in excess of the water contained in the tailings material shall meet the requirements specified in Rules 40, 45, 50 and 55 of these rules. The Director may waive any or all of these requirements if, in the opinion of the Director, sound engineering design provided by the owner indicates such requirements are not applicable. ()

02. Abandonment Plan. An abandonment plan which provides a stable, maintenance-free condition at any time tailings are not being actively placed for an extended period of time, as determined by the Director, shall be submitted to the Director by the owner of a dam storing tailings and water. This rule may be waived by the Director if determined not to be applicable. ()

066. -- 999. (RESERVED)

37.03.07 – STREAM CHANNEL ALTERATION RULES

000. LEGAL AUTHORITY (RULE 0).

The purpose of these rules and minimum standards is to specify procedures for processing and considering applications for stream channel alterations under the provisions of Title 42, Chapter 38, Idaho Code. ()

001. TITLE AND SCOPE (RULE 1).

01. **Title.** These rules are titled IDAPA 37.03.07, “Stream Channel Alteration Rules.” ()

02. **Scope.** The minimum standards are intended to enable the Director to process, in a short period of time, those applications which are of a common type and which do not propose alterations which will be a hazard to the stream channel and its environment. It is intended that these rules and minimum standards be administered in a reasonable manner, giving due consideration, to all factors affecting the stream and adjacent property. ()

002. -- 009. (RESERVED)

010. DEFINITIONS (RULE 10).

01. **Alteration.** To obstruct, diminish, destroy, alter, modify, relocate or change the natural existing shape of the channel or to change the direction of flow of water of any stream channel within or below the mean high water mark. It includes removal of material from the stream channel and emplacement of material or structures in or across the stream channel where the material or structure has the potential to affect flow in the channel as determined by the director. ()

02. **Applicant.** Any individual, partnership, company, corporation, municipality, county, state or federal agency, their agent, or other entity proposing to alter a stream channel or actually engaged in constructing a channel alteration, whether authorized or not. ()

03. **Board.** The Idaho Water Resource Board. ()

04. **Continuously Flowing Water.** A sufficient flow of water that could provide for migration and movement of fish, and excludes those reaches of streams which, in their natural state, normally go dry at the location of the proposed alteration. IDWR will assume, subject to information to the contrary, that the USGS quadrangle maps accurately depict whether a stream reach is continuously flowing, at the location of the proposed alteration. Such exclusion does not apply to minor flood channels that are a part of a stream which is continuously flowing in the reach where the alteration is located. Also, such exclusion does not apply to streams which may be dry as a result of upstream diversion or storage of water. ()

05. **Department.** The Idaho Department of Water Resources. ()

06. **Drop Structures, Sills and Barbs.** Physical obstructions placed within a stream channel for the purpose of stabilizing the channel by decreasing stream gradient and velocity and by dissipating stream energy. ()

07. **Director.** The Director of the Idaho Department of Water Resources. ()

08. **Mean High Water Mark.** A water level corresponding to the “natural or ordinary high water mark” as defined in Section 58-104(9), Idaho Code, and is the line which the water impresses on the soil by covering it for sufficient periods of time to deprive the soil of its terrestrial vegetation and destroy its value for commonly accepted agricultural purposes. ()

09. **Non-Powered Sluice Equipment.** Equipment which is powered only by human strength. ()

10. **Plans.** Maps, sketches, engineering drawings, photos, work descriptions and specifications sufficient to describe the extent, nature, and location of the proposed stream channel alteration and the proposed method of accomplishing the alteration. ()

11. **Repair.** Any work needed or accomplished, to protect, maintain, or restore any water diversion structure and the associated stream channel upstream and downstream as necessary for the efficient operation of the water diversion structure. ()

12. **Stream Channel.** A natural water course of perceptible extent with definite beds and banks which

confines and conducts continuously flowing water. The channel referred to is that which exists at the present time, regardless of where the channel may have been located at any time in the past. For the purposes of these rules only, the beds of lakes and reservoir pool areas are not considered to be stream channels. ()

13. Base Flood Elevation. The Base Flood (BF) is referred to as the one hundred (100) year flood and is a measure of flood magnitude based on probability. The base flood has a one percent chance of occurring or being exceeded in any given year, with the Base Flood Elevation (BFE) being the level of flooding reached during the BF or the one hundred (100) year flood event. ()

011. -- 024. (RESERVED)

025. EXEMPTIONS (RULE 25).

01. Work on Existing or Proposed Reservoir Projects. Permits are not required under the provisions of Title 42, Chapter 38 for construction work on any existing or proposed reservoir project, including the dam, and such areas downstream as the Director may determine is reasonably necessary for construction and maintenance of the dam. ()

02. Snake and Clearwater Rivers. Permits are not required for work within that portion of the Snake and Clearwater rivers from the state boundary upstream to the upper boundary of the Port of Lewiston Port District as it now exists or may exist in the future. ()

03. Cleaning, Maintenance, Construction or Repair Work. No permit is required of a water user or his agent to clean, maintain, construct, or repair any diversion structure, canal, ditch, or lateral or to remove any obstruction from a stream channel which is interfering with the delivery of any water under a valid existing water right or water right permit. ()

04. Removal of Debris. No permit is required for removal of debris from a stream channel provided that no equipment will be working in the channel and all material removed will be disposed of at some point outside the channel where it cannot again reenter the channel. ()

026. -- 029. (RESERVED)

030. APPLICATIONS (RULE 30).

01. Joint Application Permit Form. The Department of Water Resources, Department of Lands, and the U.S. Army Corps of Engineers have developed a joint application for permit form which will suffice for the required application under the Stream Protection Act. An application should be filed at least sixty (60) days before the applicant proposes to start the construction and shall be upon the joint application form furnished by the Department. The application shall be accompanied by plans which clearly describe the nature and purpose of the proposed work. ()

02. Applicant Following Minimum Standards. In those cases where the applicant intends to follow the minimum standards (Rule 055), detailed plans may be eliminated by referring to the specific minimum standard; however, drawings necessary to adequately define the extent, purpose, and location of the work will still be required. Plans shall include some reference to water surface elevations and stream boundaries to facilitate review. The application should show the mean high water mark on the plans; however, any water surface or water line reference available will be helpful as long as this reference is described. (Examples: present water surface, low water, high water.) ()

03. Submission of Copies. The applicant shall submit one (1) copy of all necessary plans along with the application form. When drawings submitted are larger than eight and one half by eleven (8 1/2 x 11), the applicant shall provide the number of copies specified by the department. ()

04. Stream Channel Alteration Permit. Any applicant proposing to operate a vacuum or suction dredge within or below the mean high water mark of a stream channel shall apply for and obtain a stream channel alteration permit. The vacuum or suction dredge shall only be operated in accordance with the conditions of the

permit and with the applicable rules. ()

031. -- 034. (RESERVED)

035. APPLICATION REVIEW (RULE 35).

01. Prior to Issuance of Permit. The following items shall be among those considered by the Director prior to issuing a permit: ()

- a. What is the purpose of doing the work? ()
- b. What is the necessity and justification for the proposed alteration? ()
- c. Is the proposal a reasonable means of accomplishing the purpose? ()
- d. Will the alteration be a permanent solution? ()
- e. Will the alteration pass anticipated water flows without creating harmful flooding or erosion problems upstream or downstream? ()
- f. What effect will the alteration have on fish habitat? ()
- g. Will the materials used or the removal of ground cover create turbidity or other water quality problems? ()
- h. Will the alteration interfere with recreational use of the stream? ()
- i. Will the alteration detract from the aesthetic beauty of the area? ()
- j. What modification or alternative solutions are reasonably possible which would reduce the disturbance to the stream channel and its environment and/or better accomplish the desired goal of the proposed alteration? ()
- k. Is the alteration to be accomplished in accordance with the adopted minimum standards? ()
- l. Are there public safety factors to consider? ()

02. Proposed Alteration Which Does Not Follow Minimum Standards. In those cases where a proposed alteration does not follow the minimum standards, a copy of the application will be sent for review to those state agencies requesting notification. The Director shall provide for review by the Department of Lands, copies of applications on navigable rivers. The Director will provide a copy of any other application requested by the Department of Lands and may request review by other state agencies regardless of whether or not the proposed alteration will comply with the minimum standards. ()

036. -- 039. (RESERVED)

040. APPROVAL (RULE 40).

01. Conformance to Application. All work shall be done in accordance with the approved application, subject to any conditions specified by the department. ()

02. Permits Allowed Without Review. A permit may be approved by the Director of the Department of Water Resources without review by other agencies in situations where the work is of a nature not uncommon to the particular area and where it is clear that the work will not seriously degrade the stream values except on navigable rivers which require review by the Department of Lands. All work approved in this manner shall be accomplished in accordance with the minimum standards. ()

03. Reinstatement of Expired Permit. A permit which has expired may be reinstated by the Director after review by other agencies as determined by the Director. ()

041. -- 044. (RESERVED)

045. ENFORCEMENT OF ACT (RULE 45).

01. Written Orders Issued by Designated Employees of Department. Employees of the Department designated by the Director may issue written orders directing an applicant to cease and desist, to ensure proper notice to applicants who are found to be altering a stream without a permit or not in compliance with the conditions of a permit. Such orders shall be in effect immediately upon issuance and will continue in force until a permit is issued or until the order is rescinded by the Director. ()

02. Failure to Comply with Stream Protection Act. Failure to comply with any of the provisions of the Stream Protection Act (Chapter 38, Title 42, Idaho Code), may result in issuance of an Idaho uniform citation and/or the cancellation of any permit by the Director without further notice and the pursuit in a court of competent jurisdiction, such civil or criminal remedies as may be appropriate and provided by law. The Director may allow reasonable time for an applicant to complete stabilization and restoration work. ()

046. -- 049. (RESERVED)

050. EMERGENCY WAIVER (RULE 50).

01. Waiver of Provisions of Stream Protection Act. Section 42-3808, Idaho Code, provides for waiver of the provisions of the Stream Protection Act in emergency situations where immediate action must be taken to protect life or property including growing crops. The Director will not consider failure to submit an application for a stream channel alteration far enough ahead of the desired starting time of the construction work as an emergency situation. ()

02. Verbal Waivers. A verbal waiver may be granted initially; however, all verbal requests for waivers shall be followed up by the applicant in writing within fifteen (15) days of any initial authorization to do work. If the applicant is unable to contact the Director to obtain an emergency waiver, he may proceed with emergency work; however, he must contact the Director as soon as possible thereafter. Proving that a bonafide emergency did actually exist will be the responsibility of the applicant. ()

03. Emergency Waiver. Work authorized by an emergency waiver shall be limited to only that which is necessary to safeguard life or property, including growing crops, during the period of emergency. ()

04. Conformance to Conditions of Waiver. The applicant shall adhere to all conditions set by the Director as part of a waiver. ()

05. Waivers Granted by Designated Employees. The Director may delegate the authority to grant waivers to designated employees of the Department. Names and telephone numbers of such employees will be made available to any interested applicant upon request. ()

051. -- 054. (RESERVED)

055. MINIMUM STANDARDS (RULE 55).

These standards are intended to cover the ordinary type of stream channel alteration and to prescribe minimum conditions for approval of such construction. Unless otherwise provided in a permit, these standards shall govern all stream channel alterations in this state. An applicant should not assume that because an application utilizes methods set forth in these standards it will automatically be approved. These minimum standards include the following items: ()

01. Construction Procedures. ()

02. Dumped Rock Riprap. ()

- 03. Drop Structures, Sills and Barbs. ()
- 04. Culverts and Bridges. ()
- 05. Removal of Sand and Gravel Deposits. ()
- 06. Suction Dredges and Non-Powered Sluice Equipment. ()
- 07. Piling. ()
- 08. Pipe Crossings. ()
- 09. Concrete Plank Boat Launch Ramps. ()

056. CONSTRUCTION PROCEDURES (RULE 56).

01. Conformance to Procedures. Construction shall be done in accordance with the following procedures unless specific approval of other procedures has been given by the Director. When an applicant desires to proceed in a manner different from the following, such procedures should be described on the application. ()

02. Operation of Construction Equipment. No construction equipment shall be operated below the existing water surface without specific approval from the Director except as follows: Forging the stream at one (1) location only will be permitted unless otherwise specified; however, vehicles and equipment will not be permitted to push or pull material along the streambed below the existing water level. Work below the water which is essential for preparation of culvert bedding or approved footing installations shall be permitted to the extent that it does not create unnecessary turbidity or stream channel disturbance. Frequent forging will not be permitted in areas where extensive turbidity will be created. ()

03. Temporary Structures. Any temporary crossings, bridge supports, cofferdams, or other structures that will be needed during the period of construction shall be designed to handle high flows that could be anticipated during the construction period. All structures shall be completely removed from the stream channel at the conclusion of construction and the area shall be restored to a natural appearance. ()

04. Minimizing Disturbance of Area. Care shall be taken to cause only the minimum necessary disturbance to the natural appearance of the area. Streambank vegetation shall be protected except where its removal is absolutely necessary for completion of the work adjacent to the stream channel. ()

05. Disposal of Removed Materials. Any vegetation, debris, or other material removed during construction shall be disposed of at some location out of the stream channel where it cannot reenter the channel during high stream flows. ()

06. New Cut of Fill Slopes. All new cut or fill slopes that will not be protected with some form of riprap shall be seeded with grass and planted with native vegetation to prevent erosion. ()

07. Fill Material. All fill material shall be placed and compacted in horizontal lifts. Areas to be filled shall be cleared of all vegetation, debris and other materials that would be objectionable in the fill. ()

08. Limitations on Construction Period. The Director may limit the period of construction as needed to minimize conflicts with fish migration and spawning, recreation use, and other uses. ()

057. DUMPED ROCK RIPRAP (RULE 57).

01. Placement of Riprap. Riprap shall be placed on a granular bedding material or a compact and stable embankment. ()

02. Sideslopes of Riprap. Sideslopes of riprap shall not be steeper than 2:1 (2' horizontal to 1' vertical) except at ends of culverts and at bridge approaches where a 1 1/2:1 sideslope is standard. ()

03. Minimum Thickness of Riprap. The minimum thickness of the riprap layer shall equal the dimension of the largest size riprap rock used or be eighteen (18) inches, whichever is greater. When riprap will be placed below high water level, the thickness of the layer shall be fifty percent (50%) greater than specified below. ()

04. Riprap Protection. Riprap protection must extend at least one (1) foot above the anticipated high water surface elevation in the stream. ()

05. Rock Used for Riprap. Rock for riprap shall consist of sound, dense, durable, angular rock fragments, resistant to weathering and free from large quantities of soil, shale, and organic matter. The length of a rock shall not be more than three (3) times its width or thickness. Rounded cobbles, boulders, and streambed gravels are not acceptable as dumped riprap. ()

06. Size and Gradation of Riprap. Riprap size and gradation are commonly determined in terms of the weight of riprap rock. The average size of riprap rock shall be at least as large as the maximum size rock that the stream is capable of moving. The maximum size of riprap rock used shall be two (2) to five (5) times larger than the average size. ()

07. Methods Used for Determining Gradation of Riprap. There are many methods used for determining the gradation of riprap rock. One of these many acceptable methods is shown in Table 1 below the Far West States (FWS) method shown in APPENDIX A - Table 1A at the end of this chapter.

GRADATION OF RIPRAP IN POUNDS		
Max. Weight of Stone required (lbs)	Min. and Max. Range in weight of Stones (lbs)	Weight Range 75 percent of Stones (lbs)
150	25 - 150	50 - 150
200	25 - 200	50 - 200
250	25 - 250	50 - 250
400	25 - 400	100 - 400
600	25 - 600	150 - 600
800	25 - 800	200 - 800
1000	50 - 1000	250 - 1000
1300	50 - 1300	325 - 1300
1600	50 - 1600	400 - 1600
2000	75 - 2000	600 - 2000
2700	100 - 2700	800 - 2700

()

08. Use of Filter Material. A blanket of granular filter material or filter fabric shall be placed between the riprap layer and the bank in all cases where the bank is composed of erodible material that may be washed out from between the riprap rock. Filter material shall consist of a layer of well-graded gravel and coarse sand at least six (6) inches thick. ()

09. Toe Protection. Some suitable form of toe protection shall be provided for riprap located on erodible streambed material. ()

a. Various acceptable methods of providing toe protection are shown in APPENDIX B at the end of this chapter. ()

b. In addition to the approved methods of providing toe protection as shown in APPENDIX B at the end of this chapter, any other reasonable method will be considered by the Director during review of a proposed project. ()

10. Extension of Riprap Area. Riprap shall extend far enough upstream and downstream to reach stable areas, unless protected against undermining at ends by the method shown in APPENDIX C, Figure 3 at the end of this chapter. On extremely long riprap sections, it is recommended that similar cutoff sections be used at several intermediate points to reduce the hazard that would be created if failure of the riprap occurred at any one (1) location. ()

11. Finished Surface. Placement shall result in a smooth, even finished surface. Compaction is not necessary. ()

12. Placement of Riprap. The full course thickness of the riprap shall be placed in one (1) operation. Dumping riprap long distances down the bank or pushing it over the top of the bank with a dozer shall be avoided if possible. Material should be placed with a backhoe, loader, or dragline. Dumping material near its final position on the slope or dumping rock at the toe and bulldozing it up the slope is a very satisfactory method of placement, if approval is obtained for the use of equipment in the channel. ()

13. Design Procedure. Design procedure using the Far West States (FWS) method. ()

a. The FWS method uses a single equation to deal with variables for riprap. ()

$$D75 = 3.5/CK \text{ WDS for Channel Banks}$$

where: D75 = Size of the rock at seventy five percent (75%) is finer in gradation, in inches.

W	=	Specific weight of water, usually 62.4 lbs./cu.ft.
D	=	Depth of flow in stream, in feet in flood stage
S	=	Channel slope or gradient, in ft/ft.
C	=	A coefficient relating to curvature in the stream
K	=	A coefficient relating to steepness of bank slopes

()

b. The coefficient, C, is based on the ratio of the radius of curvature of the stream, (CR), to the water surface width, (WSW), so it is necessary for the user to make field determination of these values. The coefficient varies from 0.6 for a curve ratio of 4 to 6, up to 1.0 for a straight channel. If the computed ratio for a particular project is less than 4, the designer should consider some modification less than 4.

CR/WSW	C
4 - 6	0.60
6 - 9	0.75
9 - 12	0.90
Straight Channel	1.00

()

c. The coefficient, K, ranges from 0.5 for a 1.5:1 sideslope to 0.87 for 3:1 sideslope. No values are given for steeper or flatter slopes. Slopes steeper than 1.5:1 are not recommended. If slopes flatter than 3:1 are

desired, it would be conservative to use the K-value for 3:1 slopes.

Bankslope	K
1.5:1	0.50
1.75:1	0.63
2.0:1	0.72
2.5:1	0.80
3.0:1	0.87

()

Table 1A in APPENDIX A, located at the end of this chapter.

058. DROP STRUCTURES, SILLS AND BARBS (RULE 58).

01. Drop Structures. A drop structure shall be constructed of rocks, boulders and/or logs placed within a stream channel to act as a low level dam. Placement of a drop structure perpendicular to stream flow will decrease the stream gradient, dissipate stream energy and decrease stream velocity through an increase in water surface elevation immediately above the structure. Drop structures shall comply with the following criteria: ()

a. Maximum water surface differential across (upstream water surface elevation minus downstream water surface elevation) a drop structure shall not exceed two (2) feet. The department shall approve the final elevation of any structure. ()

b. Rock drop structures shall be constructed of clean, sound, dense, durable, angular rock fragments, and/or boulders of size and gradation, such that the stream is incapable of moving the material during peak flows. Rocks shall be keyed into the stream banks to minimize the likelihood of bank erosion, (See Figure 8 in APPENDIX H located at the end of this chapter). ()

c. Log drop structures are acceptable in four (4) designs including the single log dam, the stacked log dam, the three (3) log dam, and the pyramid log dam. Log ends shall be keyed into both banks at least one-third (1/3) of the channel width or a distance sufficient to prevent end erosion. To prevent undercutting, the bottom log shall be imbedded in the stream bed or hardware cloth, cobbles or boulders shall be placed along the upper edge. Minimum log size for a single log structure shall be determined by on-site conditions and shall be placed to maintain flow over the entire log to prevent decay. Each log drop structure must be accompanied by downstream scour protection, such as a rock apron (See Figure 9 in APPENDIX I located at the end of this chapter). ()

d. All drop structures shall be constructed to facilitate fish passage and centralized scour pool development. ()

02. Sills. A sill shall be constructed of the same material and in the same manner as a drop structure. The top of the sill may not exceed the elevation of the bottom of the channel. The purpose of a sill is to halt the upstream movement of a headcut, thus precluding the widening or deepening of the existing channel. (See Figure 10 in APPENDIX J located at the end of this chapter). ()

03. Barb or Partial Drop Structure. A barb or partial drop structure shall be constructed in the same manner and of the same material as a drop structure and placed into the stream channel to act as a low level dam and grade control structure. The barb will decrease stream gradient, dissipate stream energy and redirect stream flow. ()

a. Barbs shall be constructed of clean, sound, dense, angular rock fragments, of size and gradation such that the stream is incapable of moving the material during peak flows. ()

b. Barbs shall be constructed with a downstream angle of no less than one hundred (100) degrees and no greater than one hundred thirty-five (135) degrees unless otherwise specified. ()

c. Barbs shall “extend” into the channel a distance of not more than twenty percent (20%) of the width of the channel unless otherwise specified by the Director. ()

d. Barbs shall be keyed into the bank a distance equal to or greater than the width of the structure and down to bed level. Whenever moisture is encountered in the construction of the keyways, willow cuttings or clumps shall be placed before and during rock placement in such a manner that the base of the cutting is in permanent moisture and the top extends a minimum of six (6) inches above grade (see Figure 11 in APPENDIX K located at the end of this chapter). ()

059. CULVERTS AND BRIDGES (RULE 59).

01. Culverts and Bridges. Culverts and bridges shall be capable of carrying streamflows and shall not significantly alter conditions upstream or downstream by causing flooding, turbidity, or other problems. The appearance of such installations shall not detract from the natural surroundings of the area. ()

02. Location of Culverts and Bridges. Culverts and bridges should be located so that a direct line of approach exists at both the entrance and exit. Abrupt bends at the entrance or exit shall not exist unless suitable erosion protection is provided. ()

03. Ideal Gradient. The ideal gradient (bottom slope) is one which is steep enough to prevent silting but flat enough to prevent scouring due to high velocity flows. It is often advisable to make the gradient of a culvert coincide with the average streambed gradient. ()

a. Where a culvert is installed on a slope steeper than twenty percent (20%), provisions to anchor the culvert in position will be required. Such provisions shall be included in the application and may involve the use of collars, headwall structures, etc. Smooth concrete pipe having no protruding bell joints or other irregularities shall have such anchoring provisions if the gradient exceeds ten percent (10%). ()

04. Size of Culvert or Bridge Opening. The size of the culvert or bridge opening shall be such that it is capable of passing design flows without overtopping the streambank or causing flooding or other damage. ()

a. Design flows shall be based upon the following minimum criteria:

Drainage Area	Design Flow Frequency
Less than 50 sq. mi.	25 Years
Over 50 sq. mi. or more	50 years or greatest flow of record, whichever is more

()

b. For culverts and bridges located on U.S. Forest Service or other federal lands, the sizing should comply with the Forest Practices Act as adopted by the federal agencies or the Department of Lands. ()

c. For culverts or bridges located in a community qualifying for the national flood issuance program, the minimum size culvert shall accommodate the one hundred (100) year design flow frequency. ()

d. If the culvert or bridge design is impractical for the site, the crossing may be designed with additional flow capacity outside the actual crossing structure, provided there is no increase in the Base Flood Elevation.

(NOTE: When flow data on a particular stream is unavailable, it is almost always safe to maintain the existing gradient and cross-section area present in the existing stream channel. Comparing the proposed crossing size with others upstream or downstream is also a valuable means of obtaining information regarding the size needed for a

proposed crossing.) ()

e. Minimum clearance shall be at least one (1) foot at all bridges. This may need to be increased substantially in the areas where ice passage or debris may be a problem. Minimum culvert sizes required for stream crossings: ()

i. Eighteen (18) inch diameter for culverts up to seventy (70) feet long; ()

ii. Twenty-four (24) inch diameter for all culverts over seventy (70) feet long. ()

f. In streams where fish passage is of concern as determined by the director, an applicant shall comply with the following provisions and/or other approved criteria to ensure that passage will not be prevented by a proposed crossing. ()

g. Minimum water depth shall be approximately eight (8) inches for salmon and steelhead and at least three (3) inches in all other cases. ()

h. Maximum flow velocities for streams shall not exceed those shown in Figure 17 in APPENDIX N, located at the end of this chapter, for more than a forty-eight (48) hour period. The curve used will depend on the type of fish to be passed. ()

i. Where it is not feasible to adjust the size or slope to obtain permissible velocities, the following precautions may be utilized to achieve the desired situation. ()

j. Baffles downstream or inside the culvert may be utilized to increase depth and reduce velocity. Design criteria may be obtained from the Idaho Fish and Game Department. ()

k. Where multiple openings for flow are provided, baffles or other measures used in one (1) opening only shall be adequate provided that the opening is designed to carry the main flow during low-flow periods. ()

05. Construction of Crossings. When crossings are constructed in erodible material, upstream and downstream ends shall be protected from erosive damage through the use of such methods as dumped rock riprap, headwall structures, etc., and such protection shall extend below the erodible streambed and into the banks at least two (2) feet unless some other provisions are made to prevent undermining. ()

a. Where fish passage must be provided, upstream drops at the entrance to a culvert will not be permitted and a maximum drop of one (1) foot will be permitted at the downstream end if an adequate jumping pool is maintained below the drop. ()

b. Downstream control structures such as are shown in Figure 18 in APPENDIX O, located at the end of this chapter, can be used to reduce downstream erosion and improve fish passage. They may be constructed with gabions, pilings and rock drop structures. ()

06. Multiple Openings. Where a multiple opening will consist of two (2) or more separate culvert structures, they shall be spaced far enough apart to allow proper compaction of the fill between the individual structures. The minimum spacing in all situations shall be one (1) foot. In areas where fish passage must be provided, only one (1) opening shall be constructed to carry all low flows. Low flow baffles may be required to facilitate fish passage. ()

07. Areas to be Filled. All areas to be filled shall be cleared of vegetation, topsoil, and other unsuitable material prior to placing fill. Material cleared from the site shall be disposed of above the high water line of the stream. Fill material shall be reasonably well-graded and compacted and shall not contain large quantities of silt, sand, organic matter, or debris. In locations where silty or sandy material must be utilized for fill material, it will be necessary to construct impervious sections both upstream and downstream to prevent the erodible sand or silt from being carried away (see Figure 19, APPENDIX P, located at the end of this chapter), Sideslopes for fills shall not exceed one and one half to one (1.5:1). Minimum cover over all culvert pipes and arches shall be one (1) foot. ()

08. Installation of Pipe and Arch Culvert. All pipe and arch culverts shall be installed in accordance with manufacturer's recommendations. ()

a. The culvert shall be designed so that headwaters will not rise above the top of the culvert entrance unless a headworks is provided. ()

060. REMOVAL OF SAND AND GRAVEL DEPOSITS (RULE 60).

01. Removal of Sand and Gravel. This work consists of removal of sand and gravel deposits from within a stream channel. The following conditions shall be adhered to unless other methods have been specified in detail on the application and approved by the Director. ()

02. Removal Below Water Surface. Sand and gravel must not be removed below the water surface existing at the time of the work. Where work involves clearing a new channel for flow, removal of material below water level will be permitted to allow this flow to occur; however, this must not be done until all other work in the new channel has been completed. ()

03. Buffer Zone. A buffer zone of undisturbed streambed material at least five (5) feet in width or as otherwise specified by the Director shall be maintained between the work area and the existing stream. The applicant shall exercise reasonable precautions to ensure that turbidity is kept to a minimum and does not exceed state water quality standards. ()

04. Movement of Equipment. Equipment may cross the existing stream in one (1) location only, but shall not push or pull material along the streambed while crossing the existing stream. ()

05. Disturbing Natural Appearance of Area. Work must be done in a manner that will least disturb the natural appearance of the area. Sand and gravel shall be removed in a manner that will not leave unsightly pits or other completely unnatural features at the conclusion of the project. ()

061. SUCTION DREDGES AND NON-POWERED SLUICE EQUIPMENT (RULE 61).

01. Standards for Suction Dredges. The following standards shall apply only to uses of suction dredges with nozzle diameter of five (5) inches or less and rated at fifteen (15) HP or less and non-powered sluice equipment moving more than one-quarter (1/4) cubic yard per hour. ()

02. Operating Permit. A permit for the operation of a suction dredge may authorize the use of the dredge within a drainage basin or a large portion of a drainage basin except as otherwise determined by the Director. ()

03. Mechanized Equipment Prohibited Below High Water Mark. There shall be no use of mechanized equipment below the mean high water mark except for the dredge itself, and any life support system necessary to operate the dredge. ()

04. Operation of Dredge. The operation of the dredge shall be done in a manner so as to prevent the undercutting of streambanks. ()

05. Permit Required for Non-Powered Operation -- More Than Five People. A permit shall be required for any non-powered operation in which more than five (5) people are working the same area. ()

06. Permit Required for Non-Powered Operation -- More Than Thirty-Three Percent of Stream Width. A permit shall be required for any non-powered operation if the disturbed area exceeds thirty-three percent (33%) of the stream width at the mining location. ()

07. Limitation of Mining Sites. Only one (1) mining site per one hundred (100) linear feet of stream channel shall be worked at one (1) time unless waived by the Director. ()

062. PILING (RULE 62).

01. Standards for Pilings. The following standards apply to a piling associated with a boat or swimming dock, a log boom, a breakwater, or bridge construction. ()

02. Replacement of Pilings. In replacing a piling the old piling shall be completely removed from the channel, secured to the new piling or cut at stream bed level. ()

03. Condition of Pilings. Chemicals or compounds used for protection of piles and lumber shall be thoroughly dried to prevent bleeding, weeping or dissolution before placing such piles and lumber over, in or near water. ()

04. Prohibited Materials. The application of creosote, arsenicals or phentachlorophenol (Penta) to timber shall not occur in, or over water. ()

063. PIPE CROSSINGS (RULE 63).

01. Standards for Pipe Crossings. The following standards apply to pipe crossings to be installed below the bed of a stream or river such as utility crossings of a gas line, sewer line, electrical line, communication line, water line or similar line. ()

02. Depth of Line. The line shall be installed below the streambed to a depth which will prevent erosion and exposure of the line to free flowing water. In areas of high stream velocity where scouring may occur, the pipe shall be encased in concrete or covered with rock riprap to prevent the pipeline from becoming exposed. ()

03. Pipe Joints. The joints shall be welded, glued, cemented or fastened together in a manner to provide a water tight connection. ()

04. Construction Methods. Construction methods shall provide for eliminating or minimizing discharges of turbidity, sediment, organic matter or toxic chemicals. A settling basin or cofferdam may be required for this purpose. ()

05. Cofferdam. If a cofferdam is used, it shall be completely removed from the stream channel upon completion of the project. ()

06. Revegetation of Disturbed Areas. Areas disturbed as a result of the alteration shall be revegetated with plants and grasses native to these areas. ()

064. CONCRETE PLANK BOAT LAUNCH RAMPS (RULE 64).

01. Construction of Concrete Plank Boat Launch Ramps. Concrete plank boat launch ramps, shall be constructed with individual sections of precast, reinforced concrete planks linked together to provide a stable non-erosive water access. Typical plank size is twelve feet by fourteen inches by four inches (12' x 14" x 4"). (See Figure 20, APPENDIX Q, located at the end of this chapter). ()

02. Construction of Planks. All planks shall be constructed with Type II low alkali cement. ()

03. Concrete Planks. All concrete planks shall have a smooth form finish, free of rock pockets and loose materials. Figure 22 shows a typical launch plank detail. (See Figures 21 and 22 in APPENDIXES R and S). ()

04. Assembly of Planks. The planks shall be assembled out of the water and slid into place on a constructed launch ramp where water velocities do not exceed two (2) feet per second. In waters exceeding (2) feet per second the ramp sections shall be linked together and fastened to pre-positioned stringers anchored into the launch ramp. (See Figure 23, APPENDIX T, located at the end of this chapter). ()

05. Water Depth. The water depth above the lower end of the ramp section shall not be less than three (3) feet during low level or low flow periods. (See Figure 20, APPENDIX Q, located at the end of this chapter). ()

06. Construction of Boat Ramp. The boat launch ramp shall have a base constructed of sound, dense, durable, angular rock resistant to weathering and free from soil, shale and organic materials. Rounded cobbles, boulders and streambed material are not acceptable as base material in areas with stream flow velocities greater than two (2) fps. Base materials shall be covered with a layer of (three-fourths inches (3/4") min.) crushed rock with a minimum depth of two inches (2"). The ramp shall have a minimum and maximum slope of ten percent (10%) and fifteen percent (15%) respectively, and shall be constructed in a manner to avoid long incursions into the stream channel. All ramps and fill material shall be protected with rock riprap in accordance with Rule 057 when stream flow velocities exceed two (2) fps. (See Figure 24, APPENDIX U, located at the end of this chapter). ()

065. -- 069. (RESERVED)

070. HEARINGS ON DENIED, LIMITED, OR CONDITIONED PERMIT OR OTHER DECISIONS OF THE DIRECTOR (RULE 70).

Any applicant who is granted a limited or conditioned permit, or who is denied a permit, may seek a hearing on said action of the Director by serving on the Director written notice and request for a hearing before the Board within fifteen (15) days of receipt of the Director's decision. Said hearing will be set, conducted, and notice given as set forth in the Rules promulgated by the Board under the provisions of Title 67, Chapter 52, Idaho Code. ()

D ₅₀	0.67 X D ₇₅	1.17 X D ₇₅
D ₂₅	0.33 X D ₇₅	0.77 X D ₇₅
D ₀	None	0.33 X D ₇₅

APPENDIX B

METHOD 1: This is most suited to areas where the toe is dry during construction.

METHOD 2: Used when streambed is very wet or groundwater present makes using Method 1 impractical.

METHOD 3: Often used when toe is underwater during construction. Both Methods 2 and 3 utilize the idea that undermining will cause rock at toe blanket to settle into eroded area providing protection during scouring.

FIGURE 2. Acceptable toe protection

APPENDIX B (CONTINUED)

METHOD 4: Used underwater in areas with extremely bad streambed erosion conditions which make Method 3 unfeasible. This method may also be preferred where Method 3 would destroy fish spawning beds.

METHOD 5: When the streambed is non-erodible, no special provisions for toe protection are needed other than insuring that the riprap is well keyed to the rock.

APPENDIX P

37.03.08 – WATER APPROPRIATION RULES

000. LEGAL AUTHORITY (RULE 0).

The Director of the Department of Water Resources adopts these rules under the authority provided by Section 42-1805(8), Idaho Code. ()

001. TITLE AND SCOPE (RULE 1).

01. Title. These rules are titled IDAPA 37.03.08, “Water Appropriation Rules.” ()

02. Scope. ()

a. Background and Purpose. The 1985 Idaho Legislature authorized reallocation of certain hydropower water rights to new upstream beneficial uses. The reallocation is to be accomplished using statutes designed to provide for the appropriation of unappropriated public water supplemented by a public interest review of those reallocations which significantly reduce existing hydropower generation. These rules provide the procedures for obtaining the right to divert and use unappropriated public water as well as water previously appropriated for hydropower use which has been placed in trust with the State of Idaho and is subject to reallocation. Guidelines are provided for the filing and processing of applications, and criteria are established for determining the actions to be taken by the Director. ()

b. Scope and Applicability. These rules are applicable to appropriations from all sources of unappropriated public water in the state of Idaho under the authority of Chapter 2, Title 42, Idaho Code. Sources of public water include rivers, streams, springs, lakes and groundwater. The rules are also applicable to the reallocation of hydropower water rights held in trust by the state of Idaho. The rules are applicable to all applications to appropriate water filed with the Department of Water Resources prior to the effective date of these rules upon which an action to approve or deny the application is pending and to all applications filed subsequent to adoption of the rules and regulations. In addition, the rules are applicable to existing permits to appropriate water required to be reviewed under the provisions of Section 42-203D, Idaho Code. ()

002. -- 009. (RESERVED)

010. DEFINITIONS (RULE 10).

Unless the context otherwise requires, the following definitions govern these rules: ()

01. Acre-Foot (AF). A volume of water sufficient to cover one (1) acre of land one (1) foot deep and is equal to forty-three thousand five hundred sixty (43,560) cubic feet. ()

02. Advertisement. The action taken by the Director to provide notice, usually by publication of a legal notice in one (1) or more newspapers, of a proposed appropriation or other notice required in administration of his duties and responsibilities. ()

03. Applicant. The person, corporation, association, firm, governmental agency or other entity, or the holder of a permit being reprocessed pursuant to Section 42-203D, Idaho Code, who initiates an appropriation of water or related water matter for the Director’s consideration. ()

04. Application for Permit. The written request to the department on forms furnished by the department proposing to appropriate the public waters or trust waters of the state. ()

05. Board. The Idaho Water Resource Board. ()

06. Beneficial Use. One (1) or more of the recognized beneficial uses of water including but not limited to, domestic, municipal, irrigation, hydropower generation, industrial, commercial, recreation, stockwatering and fish propagation uses for which permits to appropriate water can be issued as well as other uses which provide a benefit to the user of the water as determined by the Director. Industrial use as used for purposes of these rules includes, but is not limited to, manufacturing, mining and processing uses of water. ()

07. Cubic Foot Per Second (CFS). A rate of flow approximately equal to four hundred forty-eight and eight-tenths (448.8) gallons per minute and also equals fifty (50) Idaho miner’s inches. ()

08. DCMI. An acronym for domestic, commercial, municipal and industrial. In these rules it designates certain classes of these uses presumed to satisfy public interest requirements. Domestic use, for purposes of this definition, is water for one or more households and water used for all other purposes including irrigation of a

residential lot in connection with each of the households where the diversion to each household does not exceed thirteen thousand (13,000) gallons per day. Also for purposes of this definition, commercial, municipal and industrial uses are any such uses which do not deplete the system containing the trust water more than two (2) acre feet per day. ()

09. Department. The Idaho Department of Water Resources. ()

10. Director. The Director of the Idaho Department of Water Resources. ()

11. Legal Subdivision. A tract of land described by the government land survey and usually is described by government lot or quarter-quarter, section, township and range. A lot and block of a subdivision plat recorded with the county recorder may be used in addition to the quarter-quarter, section, township and range description. ()

12. Permit or Water Right Permit. The water right document issued by the Director authorizing the diversion and use of unappropriated public water of the state or water held in trust by the state. ()

13. Priority, or Priority of Appropriation, or Priority Date. The date of appropriation established in the development of a water right. The priority of a water right for public water or trust water is used to determine the order of water delivery from a source during times of shortage. The earlier or prior date being the better right. ()

14. Project Works. A general term which includes diversion works, conveyance works, and any devices which may be used to apply the water to the intended use. Improvements which have been made as a result of application of water, such as land preparation for cultivation, are not a part of the project works. ()

15. Single Family Domestic Purposes. Water for household use or livestock and water used for all other purposes including irrigation of up to one half (1/2) acre of land in connection with said household where total use is not in excess of thirteen thousand (13,000) gallons per day. ()

16. Subordinated Water Right. A water right used for hydropower generation purposes that is subject to depletion without compensation by upstream water rights which are initiated later in time and which are for a purpose other than hydropower generation purposes. ()

17. Trust Water. That portion of an unsubordinated water right used for hydropower generation purposes which is in excess of a minimum stream flow established by state action either with agreement of the holder of the hydropower right as provided by Section 42-203B(5), Idaho Code or without an agreement as provided by Section 42-203B(3), Idaho Code. ()

18. Unappropriated Water. The public water of the state of Idaho in streams, rivers, lakes, springs or groundwater in excess of that necessary to satisfy prior rights including prior rights reserved by federal law. ()

011. -- 024. (RESERVED)

025. GENERAL DESCRIPTION OF THE PROCEDURE TO BE USED FOR ALLOCATION (RULE 25).

01. Applications to Appropriate Unappropriated Water and Water Held in Trust. Applications to appropriate unappropriated water and water held in trust as provided by Section 42-203B(3), Idaho Code, will be evaluated using the criteria of Section 42-203A, Idaho Code, which requires an assessment to be made of the impact of the proposed use on water availability for existing water rights, the adequacy of the water supply for the proposed use, whether the application is filed for speculative purposes, the financial ability of the applicant to complete the project, and the effect of the proposed use on the local public interest. ()

02. Applications to Appropriate Water from Sources Held by State in Trust. Applications to appropriate water from sources on which the state holds water in trust, pursuant to Section 203B(5), Idaho Code, will be processed in a three-step analysis. Evaluation will consider the purposes of "trust water" established in Section 42-203B, Idaho Code. ()

a. First, the proposed use must be evaluated using the procedures and criteria of Section 42-203A, Idaho Code. If all criteria of Section 42-203A(5), Idaho Code, are satisfied, the application may be approved for unappropriated water. If the application does not satisfy the criteria of Section 42-203A(5) b, c, d, and e, Idaho Code, or is found to reduce the water to existing water rights other than those held in trust by the state, the application will be denied. If the application satisfies all criteria of Section 42-203A(5), Idaho Code, except Section 42-203A(5)a, Idaho Code, but is found to reduce water held in trust by the state, the application will be reviewed under criteria of Section 42-203C, Idaho Code. ()

b. Second, Section 42-203C, Idaho Code, requires a determination of whether the proposed use will significantly reduce, individually or cumulatively with existing uses and other uses reasonably likely to exist within twelve months of the proposed use, the amount of trust water available to the holder of the water right used for power production that is defined by agreement pursuant to subsection (5) of Section 42-203B, Idaho Code (hereinafter termed "significant reduction"). If a significant reduction will not occur, the application may be approved without an evaluation of the public interest criteria of Section 42-203C(2), Idaho Code. ()

c. Third, based upon a finding of significant reduction, the proposed use will be evaluated in terms of the public interest criteria of Section 42-203C(2), Idaho Code. ()

026. -- 029. (RESERVED)

030. LOCATION AND NATURE OF TRUST WATER (RULE 30).

01. Snake River Water Rights Agreement. The legislation ratifying the Snake River water rights agreement between the state of Idaho and Idaho Power Company places in trust a part of the flows available to Idaho Power Company under its hydropower water rights in the Snake River Basin between Swan Falls Dam and Milner Dam. The flows subject to the trust water provisions and reallocation under Section 42-203C(2), Idaho Code, are as follows: ()

a. Trust water flows under the Snake River water rights agreement are located in the Snake River between Swan Falls Dam located in Section 18, Township 2 South, Range 1 East, Boise Meridian (B.M.) and Milner Dam located in Sections 28 and 29, Township 10 South, Range 21 East, Boise Meridian (B.M.) and all surface and groundwater sources tributary to the Snake River in that reach. ()

b. Surface water and groundwater tributary to the Snake River upstream from Milner Dam is not trust water. After giving notice and considering public comment, the Director will designate the area in which groundwater is presumed to be tributary to the Snake River upstream from Milner Dam. Modification or changes in the designated boundary may be made only after providing notice and considering public comment. The area presently designated as tributary to the Snake River in the Milner Dam to Swan Falls Dam reach is appended to these rules (See Attachment A in APPENDIX A located at the end of this chapter), for information purposes only. ()

c. Trust water flows under the Snake River water rights agreement are those occurring in the Snake River and tributaries in the geographic area designated in Subsection 030.01.a. that exceed the established minimum stream flows but are less than the water rights for hydropower generating facilities in the Swan Falls Dam to Milner Dam reach of Snake River, to the extent such rights were unsubordinated prior to the Snake River water rights agreement. Minimum average daily flows have been established by action of the Board and legislature at the U.S. Geological Survey gauging station located near Murphy (Section 35, Township 1 South, Range 1 West B.M.) in the amount of three thousand nine hundred (3900) cfs from April 1 to October 31 and five thousand six hundred (5600) cfs from November 1 to March 31, and at Milner gauging station located in Section 29, Township 10 South, Range 21 East, B.M. in the amount of zero (0) cfs from January 1 to December 31. ()

02. Trust Water Created by State Action. Section 42-203B(3), Idaho Code, provides that trust water can be created by state action establishing a minimum flow without an agreement with the holder of the hydropower water right. Allocation of trust water so established will be pursuant to state law except the criteria of Section 42-203C, Idaho Code, will not be considered. ()

03. Sources of Public Water Not Trust Water. The following sources of public water are not trust water and are not subject to the public interest provisions of Section 42-203C, Idaho Code: ()

a. Sources or tributaries to sources upon which no hydropower generating facilities are located downstream within the state of Idaho. ()

b. Sources or tributaries to sources which have a state hydropower water right permit or license or Federal Energy Regulatory Commission license which have not been subordinated, and the state of Idaho has not entered into an agreement with the holder of the hydropower water right pursuant to Section 42-203B(2), Idaho Code, and the State of Idaho has not established a minimum stream flow for purposes of protecting hydropower generation. ()

c. Sources or tributaries to sources for which a state hydropower water right permit or license, or the Federal Energy Regulatory Commission license included a subordination condition. Such flows are considered to be public waters subject to appropriation under the provisions of Section 42-203A, Idaho Code. ()

d. Flows in excess of established rights including rights used for hydropower purposes. Such flows are unappropriated waters subject to allocation under Section 42-203A, Idaho Code. ()

e. Flows in the Snake River upstream from Milner Dam and all surface and groundwater tributaries to that reach. Such flows are subject to allocation under Section 42-203A, Idaho Code, without consideration of water rights existing downstream from Milner Dam (Reference: 42-203B(2), Idaho Code). ()

031. -- 034. (RESERVED)

035. APPLICATION REQUIREMENTS (RULE 35).

01. General Provisions. ()

a. No person shall commence the construction of any project works or commence the diversion of the public water or trust water of the state of Idaho from any source without first having filed an application for permit to appropriate the water or other appropriate form with the department and received approval from the Director, unless exempted by these rules or by statute. ()

b. Any person proposing to commence a diversion of the public water or the trust water of the state of Idaho from a groundwater source for single family domestic purposes is exempt from the application and permit requirements of Subsection 035.01.a. ()

c. Any person watering livestock directly from a natural stream or natural lake without the use of a constructed diversion works is exempt from Subsection 035.01.a. ()

d. All applications for permit to appropriate public water or trust water of the state of Idaho shall be on the form provided by the department entitled "Application for Permit to Appropriate the Public Waters of the State of Idaho" and include all necessary information as described in Subsection 035.03. An application for permit that is not complete as described in Subsection 035.03 will not be accepted for filing and will be returned along with any fees submitted to the person submitting the application. No priority will be established by an incomplete application. Applications meeting the requirements of Subsection 035.03. will be accepted for filing and will be endorsed by the department as to the time and date received. The acceptability of applications requiring clarification or corrections shall be determined by the Director. ()

e. The department will correspond with the applicant concerning applications which have been accepted for filing by the department which require clarification or correction of the information required by Subsection 035.03. If the additional or corrected information is supplied after thirty (30) days, the priority date of the application will be determined by the date the additional or corrected information is received by the department unless the applicant has requested within the thirty (30) day period additional time to provide the information, has shown good reasons for needing additional time, and the Director has granted additional time. ()

f. Failure to submit the additional or corrected information is cause for the Director to void the department's records of the application. ()

02. Effect of an Application. ()

a. Any application that seeks to appropriate water from a source upon which the state holds trust water shall be considered an application for appropriation of unappropriated water. If the Director determines unappropriated water is not available, the application, if otherwise approvable, will be reviewed for compliance with provisions of Section 42-203C, Idaho Code. ()

b. The priority of an application for unappropriated or trust water is established as of the time and date the application is received in complete form along with the statutory fee in any official office of the department. The priority of the application remains fixed unless changed by action of the Director in accordance with applicable law. ()

c. An application for permit to appropriate water is not a water right and does not authorize diversion or use of water until approved by the Director in accordance with statutes in effect at the time the application is approved. ()

d. An applicant's interest in an application for permit to appropriate water is personal property. An assignment of interest in an application must include evidence satisfactory to the Director that the application was not filed for speculative purposes. ()

03. Requirements for Applications to Be Acceptable for Filing. ()

a. The following information shall be shown on an application for permit form and submitted together with the statutory fee to an office of the department before the application for permit may be accepted for filing by the department. ()

i. The name and post office address of the applicant shall be listed. If the application is in the name of a corporation, the names and addresses of its directors and officers shall be provided. If the application is filed by or on behalf of a partnership or joint venture, the application shall provide the names and addresses of all partners and designate the managing partner, if any. ()

ii. The name of the water source sought to be appropriated shall be listed. For surface water sources, the source of water shall be identified by the official geographic name listed on the U.S. Geological Survey Quadrangle map. If the source has not been named, it can be described as "unnamed," but the system or river to which it is tributary shall be identified. For groundwater sources, the source shall be listed as "groundwater." Only one source shall be listed on an application unless the application is for a single system which will have more than one source. ()

iii. The legal description of the point of diversion and place of use shall be listed. The location of the point(s) of diversion and the place of use shall be described to the nearest forty (40) acre subdivision or U.S. Government Lot of the Public Land Survey System. The location of springs shall be described to the nearest ten (10) acre tract. Subdivision names, lot and block numbers and any name in local common usage for the point of diversion, or place of use shall be included in the comments section of the application form. If irrigation is listed as a purpose of use, the number of acres in each forty (40) acre subdivision of the place of use shall be listed. ()

iv. The quantity of water to be diverted shall be listed as a rate of flow in cubic feet per second and/or as a volume to be stored in acre-feet per year for each purpose of use requested. ()

v. Impoundment (storage) applications shall show the maximum acre-feet requirement per year which shall not exceed the storage capacity of the impoundment structure unless the application describes a plan of operation for filling the reservoir more than once per year. ()

vi. Every offstream storage impoundment application shall show a maximum rate of diversion to storage as well as the total storage volume. ()

vii. The nature of the proposed beneficial use or uses of the water shall be listed. While the purpose

may be described in general terms such as irrigation, industrial or municipal, a description sufficient to identify the proposed use or uses of the water shall also be included. ()

viii. The period of each year during which water will be diverted, stored and beneficially used shall be listed. The period of use for irrigation purposes shall coincide with the annual periods of use shown in Figure 1 in APPENDIX B (located at the end of this chapter), unless it can be shown to the satisfaction of the Director that a different period of use is necessary. ()

ix. The proposed method of diversion, conveyance system and system for distributing and using the water shall be described. ()

x. The period of time required for completion of the project works and application of water to the proposed use shall be listed. This period of time shall not exceed the time required to diligently and uninterruptedly apply the water to beneficial use and shall not exceed five (5) years. ()

xi. A map or plat of sufficient scale (not less than two (2) inches equal to one (1) mile) to show the project proposed shall be included. The map or plat shall agree with the legal descriptions and other information shown on the application. ()

xii. The application form shall be signed by the applicant listed on the application or evidence must be submitted to show that the signator has authority to sign the application. An application in more than one (1) name shall be signed by each applicant unless the names are joined by “or” or “and/or.” ()

xiii. Applications by corporations, companies or municipalities or other organizations shall be signed by an officer of the corporation or company or an elected official of the municipality or an individual authorized by the organization to sign the application. The signator’s title shall be shown with the signature. ()

xiv. Applications may be signed by a person having a current “power of attorney” authorized by the applicant. A copy of the “power of attorney” shall be included with the application. ()

xv. Applications to appropriate water in connection with Carey Act or Desert Land Entry proposals shall include evidence that appropriate applications have been filed for the lands involved in the proposed project. ()

xvi. The application form shall be accompanied with a fee in the amount required by Section 42-221A, Idaho Code. ()

04. Amended Applications. ()

a. Applications for permit shall be amended whenever significant changes to the place, period or nature of the intended use, method or location of diversion or proposed use of the water or other substantial changes from that shown on the pending application are intended. An application shall be amended if the proposed change will result in a greater rate of diversion or depletion (see Subsection 035.04.c.), if the point of diversion, place of use, or point of discharge of the return flow are to be altered, if the period of the year that water will be used is to be changed, or if the nature of the use is to be changed. ()

b. An application can be amended to clarify the name of the source of water but may not be amended to change the source of water. ()

c. An amendment which increases the rate of diversion, increases the volume of water diverted per year or the volume of water depleted, lengthens the period of use, or adds an additional purpose of use shall result in the priority of the application for permit being changed to the date the amended application is received by the department. ()

d. An application for permit may be amended by endorsement by the applicant or his agent on the original application for permit form which endorsement shall be initialed and dated. If the changes required to the information on the application are, in the judgment of the Director, substantial enough to cause confusion in

interpreting the application form, the amended application shall be submitted on a new application for permit form to be designated as an amended application. ()

e. An amended application shall be accompanied by the additional fee required by Section 42-221A, Idaho Code, if the total rate of diversion or total volume of storage requested is increased and by the fee required by Section 42-221F, Idaho Code, for readvertising if notice of the original application has been published. ()

f. If the applicant's name or mailing address changes, the applicant shall in writing notify the department of the change. ()

036. -- 039. (RESERVED)

040. PROCESSING APPLICATIONS FOR PERMIT AND REPROCESSING PERMITS (RULE 40).

01. General. ()

a. Unprotected applications, whether for unappropriated water or trust water, will be processed using the following general steps: ()

i. Advertisement and protest period; ()

ii. Department review of applications and additional information, including department field review if determined to be necessary by the Director; ()

iii. Fact finding hearing if determined to be necessary by the Director; ()

iv. Director's decision; ()

v. Section 42-1701A, Idaho Code, hearing, if requested; and ()

vi. Director's decision affirmed or modified. ()

b. Protested applications, whether for unappropriated water or trust water, will be processed using the following general steps: ()

i. Advertisement and protest period; ()

ii. Hearing and/or conference; ()

iii. Department review of applications, hearing record and additional information including department field review if determined to be necessary by the Director. ()

iv. Proposed decision (unless waived by parties); ()

v. Briefing or oral argument in accordance with the department's adopted Rules of Procedure. ()

vi. Director's decision accepting or modifying the proposed decision. ()

c. The Director's decision rejecting and denying approval of an application for permit filed for diversion from a source previously designated as a critical groundwater area or upon which a moratorium has previously been entered may be issued without advertisement of the application. ()

d. An applicant may request in writing that commencement of processing of his or her application be delayed for a period not to exceed one (1) year or that processing be interrupted for a period not to exceed six (6) months. The Director at his discretion may approve the request unless he determines that others will be injured by the delay or that the applicant seeks the delay for the purpose of speculation, or that the public interest of the people of Idaho will not be served by the delay. The Director may approve a request for delay for a shorter period of time or

upon conditions, and may renew the approval upon written request. ()

02. Public Notice Requirement. ()

a. Applications for permit which have not been advertised. ()

i. Advertisement of applications for permit proposing a rate of diversion of ten (10) cfs or less or storage of one thousand (1000) AF or less shall comply with Section 42-203A, Idaho Code. The first required advertisement will be published on the first or third Thursday of a month when published in daily newspapers and on the first or third publishing day of the month for weekly newspapers. ()

ii. Advertisement of applications for permit in excess of the amounts in Subsection 040.02.a.i. shall comply with Subsection 040.02.a.i. and shall also be published in a newspaper or newspapers to achieve statewide circulation. ()

iii. Statewide circulation with respect to Section 42-203A(2), Idaho Code, shall be obtained by publication of a legal notice at least once each week for two (2) successive weeks in a newspaper, as defined in Section 60-106, Idaho Code, of general circulation in the county in which the point of diversion is located and by publication of a legal notice at least once each week for two (2) successive weeks in at least one (1) daily newspaper, as defined in Section 60-107, Idaho Code, published in each of the department's four (4) administrative regions and determined by the Director to be of general circulation within the department's region within which it is published. The administrative regions of the department are identified on Figure 2 in APPENDIX C (located at the end of this chapter). The names of newspapers used for statewide publication are available from any department office. ()

b. Applications for permit which have been advertised. ()

i. Notice of applications for permit for water from the Snake River between Swan Falls Dam and Milner Dam or surface and groundwater tributaries to that reach of Snake River which were advertised prior to July 1, 1985 and have been held without final action by the department due to the Swan Falls controversy shall be readvertised by the Director in accordance with Subsection 040.02.a. as appropriate to allow opportunity for protests to be entered with respect to the public interest criteria of Section 42-203C(2), Idaho Code. ()

ii. Applications for permit from the Snake River or surface and groundwater sources upstream from Milner Dam which have been held without action due to the Swan Falls controversy may be processed without readvertisement. ()

iii. The applicant shall pay the readvertisement fee provided in Section 42-221F, Idaho Code, prior to the readvertisement. ()

iv. Failure to pay the readvertising fee within thirty (30) days after the applicant is notified to do so is cause for the Director to void the application. ()

c. Notice of existing permits. ()

i. Existing permits appropriating water held in trust by the state of Idaho issued prior to July 1, 1985, unless exempted by Subsection 040.02.c.ii. shall be subject to the review requirements of Section 42-203D, Idaho Code, and shall be readvertised in accordance with Subsection 040.02.a. as appropriate. The review is limited to the criteria described in Section 42-203C(2), Idaho Code. ()

ii. Permits exempt from the provisions of Section 42-203D, Idaho Code, include: ()

(1) Permits appropriating water not held in trust by the state of Idaho; ()

(2) Permits for DCMI uses, stockwater uses and other essentially non-consumptive uses as determined by the Director; and ()

(3) Permits for which an acceptable proof of beneficial use submittal was received by the department

prior to July 1, 1985, or permits for which an acceptable proof of beneficial use was submitted after July 1, 1985, if evidence satisfactory to the Director has been received to show that the permit was fully developed prior to July 1, 1985 to the extent claimed on the proof of beneficial use. ()

iii. Holders of permits subject to the review requirement of Section 42-203D, Idaho Code, shall pay in advance, upon the request of the Director, the readvertising fee required by Section 42-221F, Idaho Code. ()

iv. Failure to pay the readvertising fee within thirty (30) days after the applicant is notified to do so is cause for the Director to cancel the permit. ()

03. Protests, Intervention, Hearings, and Appeals. ()

a. Protests. ()

i. Protests against the approval of an application for permit or against a permit being reprocessed shall comply with the requirements for pleadings as described in the department's adopted Rules of Procedure. ()

ii. Protests against the approval of an application for permit or against a permit being reprocessed will only be considered if received by the department after receipt of the application by the department and prior to the expiration of the protest period announced in the advertisement unless the protestant successfully intervenes in the proceeding. ()

iii. General statements of protest (blanket protests) against appropriations for a particular class of use or from a particular source of water will not be considered as valid protests by the Director. ()

b. Intervention. Requests to intervene in a proceeding pending before the department shall comply with the Department's adopted Rules of Procedure. ()

c. Hearings. Hearings will be scheduled and held in accordance with the department's adopted Rules of Procedure. ()

d. Appeals. Any final decision of the Director may be appealed in accordance with Section 42-1701A, Idaho Code. ()

04. Burden of Proof. ()

a. Burden of proof is divided into two (2) parts: first, the burden of coming forward with evidence to present a prima facie case, and second, the ultimate burden of persuasion. ()

b. The burden of coming forward with evidence is divided between the applicant and the protestant as follows: ()

i. The applicant shall bear the initial burden of coming forward with evidence for the evaluation of criteria (a) through (d) of Section 42-203A(5), Idaho Code; ()

ii. The applicant shall bear the initial burden of coming forward with evidence for the evaluation of criterion (e) of Section 42-203A(5), Idaho Code, as to any factor affecting local public interest of which he is knowledgeable or reasonably can be expected to be knowledgeable. The protestant shall bear the initial burden of coming forward with evidence for those factors relevant to criterion (e) of Section 42-203A(5), Idaho Code, of which the protestant can reasonably be expected to be more cognizant than the applicant. ()

iii. The protestant shall bear the initial burden of coming forward with evidence for the evaluation of the public interest criteria of Section 42-203C(2), Idaho Code, and of demonstrating a significant reduction, except that the applicant shall provide details of the proposed design, construction, and operation of the project and directly associated operations to allow the impact of the project to be evaluated. ()

c. The applicant has the ultimate burden of persuasion for the criteria of Section 42-203A, Idaho Code, and the protestant has the ultimate burden of persuasion for the criteria of Section 42-203C, Idaho Code. ()

d. For unprotested applications or permits to be reprocessed, the Director will evaluate the application, information submitted pursuant to Subsection 040.05.c. and information in the files and records of the department, and the results of any studies the department may conduct to determine compliance with the appropriate criteria. ()

e. In protested matters the Director will take official notice of information as described in the department's adopted Rules of Procedure, and will, prior to considering, circulate to the parties information from department studies and field examinations concerning the protested application or permit being reprocessed, if such information has not otherwise been made a part of the hearing record. ()

05. Additional Information Requirements. ()

a. For unprotested applications and permits being reprocessed, the additional information required by Subsection 040.05.c. shall be submitted within thirty (30) days after the Director notifies the applicant that the application or permit is being reviewed for decision. The Director may extend the time within which to submit the information upon request by the applicant and upon a showing of good cause. Failure to submit the required information within the time period allowed will be cause for the Director to void an application or to advance the priority of a permit being reprocessed by the number of days that the information submittal is late. The Director will provide opportunity for hearing as provided in Section 42-1701A, Idaho Code. ()

b. For protested applications or protested permits being reprocessed, the information required by Subsection 040.05.c. may be requested by the Director to be submitted within thirty (30) days after notification by the Director, may be made a part of the record of the hearing held to consider the protest, or may be made available in accordance with any pre-hearing discovery procedures. Failure to submit the required information within the time period allowed will be cause for the Director to void an application or to advance the priority of a permit being reprocessed by the number of days that the information submittal is late. ()

c. The following information shall be submitted for applications to appropriate unappropriated water or trust water and for permits being reprocessed for trust water. The additional information submittal requirements of this rule are waived for filings which seek to appropriate five (5) cfs or less or storage of five hundred acre-feet (500 AF) or less and for filings seeking reallocation of trust water which the Director determines will reduce the flow of the Snake River measured at Murphy Gauge by not more than two (2) acre-feet per day. For filings proposing irrigation as a purpose of use, the additional information is required if more than two hundred (200) acres will be irrigated. However, the Director may specifically request submittal of any of the following information for any filing, as he determines necessary. Information relative to the effect on existing water rights, Section 42-203A(5)(a), Idaho Code, shall be submitted as follows: ()

i. For applications appropriating springs or surface streams with five (5) or fewer existing users, either the identification number, or the name and address of the user, and the location of the point of diversion and nature of use for each existing water right shall be submitted. ()

ii. For applications appropriating groundwater, a plat shall be submitted locating the proposed well relative to all existing wells and springs and permitted wells within a one-half mile radius of the proposed well. ()

iii. Information shall be submitted concerning any design, construction, or operation techniques which will be employed to eliminate or reduce the impact on other water rights. ()

d. Information relative to sufficiency of water supply, Section 42-203A(5)(b), Idaho Code, shall be submitted as follows: ()

i. Information shall be submitted on the water requirements of the proposed project, including, but not limited to, the required diversion rate during the peak use period and the average use period, the volume to be

diverted per year, the period of year that water is required, and the volume of water that will be consumptively used per year. ()

ii. Information shall be submitted on the quantity of water available from the source applied for, including, but not limited to, information concerning flow rates for surface water sources available during periods of peak and average project water demand, information concerning the properties of the aquifers that water is to be taken from for groundwater sources, and information on other sources of supply that may be used to supplement the applied for water source. ()

e. Information relative to good faith, delay, or speculative purposes of the applicant, Section 42-203A(5)(c), Idaho Code, shall be submitted as follows: ()

i. The applicant shall submit copies of deeds, leases, easements or applications for rights-of-way from federal or state agencies documenting a possessory interest in the lands necessary for all project facilities and the place of use or if such interest can be obtained by eminent domain proceedings the applicant must show that appropriate actions are being taken to obtain the interest. Applicants for hydropower uses shall also submit information required to demonstrate compliance with Sections 42-205 and 42-206, Idaho Code. ()

ii. The applicant shall submit copies of applications for other needed permits, licenses and approvals, and must keep the department apprised of the status of the applications and any subsequent approvals or denials. ()

f. Information Relative to Financial Resources, Section 42-203A(5)(d), Idaho Code, shall be submitted as follows: ()

i. The applicant shall submit a current financial statement certified to show the accuracy of the information contained therein, or a financial commitment letter along with the financial statement of the lender or other evidence to show that it is reasonably probable that financing will be available to appropriate the water and apply it to the beneficial use proposed. ()

ii. The applicant shall submit plans and specifications along with estimated construction costs for the project works. The plans shall be definite enough to allow for determination of project impacts and implications. ()

g. Information Relative to Conflict with the Local Public Interest, Section 42-203A(5)(e), Idaho Code, shall be submitted as follows: The applicant shall seek comment and shall submit all letters of comment on the effects of the construction and operation of the proposed project from the governing body of the city and/or county and tribal reservation within which the point of diversion and place of use are located, the Idaho Department of Fish and Game, the Idaho Department of Environmental Quality, and any irrigation district or canal company within which the proposed project is located and from other entities as determined by the Director. ()

h. The following information Relative to the Public Interest Criteria of Section 42-203C(2), Idaho Code, shall be submitted by an applicant seeking reallocation of trust water for a project which the Director determines will reduce the flow of the Snake River by more than two (2) acre-feet per day. For filings proposing irrigation as a purpose of use, the additional information is required if more than two hundred (200) acres will be irrigated. The Director may request any or all of the following information for any filing seeking the reallocation of trust water. ()

i. A project design and estimate of cost of development shall be submitted. For applications appropriating more than twenty-five (25) cfs, or ten thousand (10,000) AF of storage, or generating more than five (5) megawatts, the information shall be prepared and submitted by a qualified engineer licensed under the provisions of Chapter 12, Title 54, Idaho Code, unless waived by the Director. The design shall be definite enough to reflect the project's impacts and implications as required in subsequent rules. ()

ii. If the project proposes development for irrigation purposes, information shall be submitted on crop rotation, including acreages, for lands when newly developed. ()

iii. Information shall be submitted concerning the number and kinds of jobs that will be created or eliminated as a direct result of project development including both the construction and operating phases of the project. If jobs are seasonal, the estimated number of months per year of employment shall be submitted. ()

iv. For applications or permits being reprocessed for more than twenty-five (25) cfs, or more than ten thousand (10,000) AF of storage, or more than five (5) megawatts, information shall be submitted concerning the changes to community services that will be required during the construction and operation phases of the project including, but not limited to, changes to schools, roads, housing, public utilities and public health and safety facilities, if any. ()

v. Information shall be submitted concerning the source of energy for diverting and using water for the project, the estimated instantaneous demand and total amount of energy that will be used, the efficiency of use, and energy conservation methods. ()

vi. Information shall be submitted concerning the location, amount, and quality of return flow water, and any water conservation features of the proposed project. ()

vii. If the project proposes irrigation as a use, information shall be submitted concerning the kinship, if any, of the operator of the land to be irrigated by the project to the applicant, the location and acreage of other irrigated lands owned, leased, or rented by the applicant, the names, addresses and number of shares held by each shareholder if the applicant is a corporation, evidence of tax-exempt status if a corporation is so claiming, a soil survey prepared in accordance with the U.S. Soil Conservation Service irrigatable land classification system, and a schedule for bringing into production the project lands. ()

041. -- 044. (RESERVED)

045. EVALUATION CRITERIA (RULE 45).

01. Criteria for Evaluating All Applications to Appropriate Water. The Director will use the following criteria in evaluating whether an application to appropriate unappropriated water or trust water should be approved, denied, approved for a smaller amount of water or approved with conditions. ()

a. Criteria for determining whether the proposed use will reduce the quantity of water under existing water rights. A proposed use will be determined to reduce the quantity of water under an existing water right (i.e., injure another water right) if: ()

i. The amount of water available under an existing water right will be reduced below the amount recorded by permit, license, decree or valid claim or the historical amount beneficially used by the water right holder under such recorded rights, whichever is less. ()

ii. The holder of an existing water right will be forced to an unreasonable effort or expense to divert his existing water right. Protection of existing groundwater rights are subject to reasonable pumping level provisions of Section 42-226, Idaho Code; or ()

iii. The quality of the water available to the holder of an existing water right is made unusable for the purposes of the existing user's right, and the water cannot be restored to usable quality without unreasonable effort or expense. ()

iv. An application that would otherwise be denied because of injury to another water right may be approved upon conditions which will mitigate losses of water to the holder of an existing water right, as determined by the Director. ()

v. The provisions of Subsection 045.01.a.v. are not intended to require compensation or mitigation for loss of flow to holders of subordinated hydropower rights or those from which trust water is reallocated. ()

b. Criteria for determining whether the water supply is insufficient for the proposed use. The water supply will be determined to be insufficient for the proposed use if water is not available for an adequate time interval

in quantities sufficient to make the project economically feasible (direct benefits to applicant must exceed direct costs to applicant), unless there are noneconomic factors that justify application approval. In assessing such noneconomic factors, the Director will also consider the impact on other water rights if the project is abandoned during construction or after completion, the impact on public resource values, and the cost to local, state and federal governments of such an abandonment. ()

c. Criteria for determining whether the application is made in good faith. The criteria requiring that the Director evaluate whether an application is made in good faith or whether it is made for delay or speculative purposes requires an analysis of the intentions of the applicant with respect to the filing and diligent pursuit of application requirements. The judgment of another person's intent can only be based upon the substantive actions that encompass the proposed project. Speculation for the purpose of this rule is an intention to obtain a permit to appropriate water without the intention of applying the water to beneficial use with reasonable diligence. Speculation does not prevent an applicant from subsequently selling the developed project for a profit or from making a profit from the use of the water. An application will be found to have been made in good faith if: ()

i. The applicant shall have legal access to the property necessary to construct and operate the proposed project, has the authority to exercise eminent domain authority to obtain such access, or in the instance of a project diverting water from or conveying water across land in state or federal ownership, has filed all applications for a right-of-way. Approval of applications involving Desert Land Entry or Carey Act filings will not be issued until the United States Department of Interior, Bureau of Land Management has issued a notice classifying the lands suitable for entry; and ()

ii. The applicant is in the process of obtaining other permits needed to construct and operate the project; and ()

iii. There are no obvious impediments that prevent the successful completion of the project. ()

d. Criteria for determining whether the applicant has sufficient financial resources to complete the project. ()

i. An applicant will be found to have sufficient financial resources upon a showing that it is reasonably probable that funding is or will be available for project construction or upon a financial commitment letter acceptable to the Director. This showing is required as described in Subsection 040.05.c. or at the time the hearing provided by Subsection 040.05.c. is conducted. ()

ii. A governmental entity will be determined to have satisfied this requirement if it has the taxing, bonding or contracting authority necessary to raise the funds needed to commence and pursue project construction in accordance with the construction schedule. ()

e. Criteria for determining whether the project conflicts with the local public interest. The Director will consider the following, along with any other factors he finds to be appropriate, in determining whether the project will conflict with the local public interest: ()

i. The effect the project will have on the economy of the local area affected by the proposed use as determined by the employment opportunities, both short and long term, revenue changes to various sectors of the economy, short and long term, and the stability of revenue and employment gains; ()

ii. The effect the project will have on recreation, fish and wildlife resources in the local area affected by the proposed use; and ()

iii. An application which the Director determines will conflict with the local public interest will be denied unless the Director determines that an over-riding state or national need exists for the project or that the project can be approved with conditions to resolve the conflict with the local public interest. ()

02. Criteria for Evaluating Whether a Proposed Use of Trust Water Will Cause a Significant Reduction. Reference: Section 42-203C(1), Idaho Code and Subsection 025.02.b. For purposes of reallocating trust water made available by the Snake River water rights agreement, an application for permit or a permit being

reprocessed, will be presumed to not cause a significant reduction if the Director determines that it complies with both the individual and cumulative tests for evaluating significant reduction as provided in Subsections 045.02.a. and 045.02.b. ()

a. Individual test for evaluating significant reduction. A proposed use will be presumed to not cause a significant reduction if when fully developed and its impact is fully felt, the use will individually reduce the flow of the Snake River measured at Murphy Gauge by not more than two (2) acre-feet per day. An irrigation project of two hundred (200) acres or less located anywhere in the Snake River Basin above Murphy Gauge proposing to use trust water is presumed to not reduce the flow at Murphy Gauge by more than two (2) acre-feet per day. The presumption of this section is not applicable to applications or permits to be reprocessed which the Director determines to be part of a larger development. ()

b. Cumulative test for evaluating significant reduction. A proposed use will be presumed to not cause a significant reduction, if the use, when fully developed and its impact is fully felt and when considered cumulatively with other existing uses and other uses reasonably likely to exist within twelve (12) months of the proposed use, will not deplete the flow of Snake River measured at Murphy Gauge by more than: ()

i. Forty thousand (40,000) acre-feet per calendar year when considered with all other uses approved for development of trust water during that calendar year; ()

ii. Forty thousand (40,000) acre-feet per calendar year using a four (4) year moving average when considered with all other uses approved for development of trust water during that four (4) year period; and ()

iii. Twenty thousand (20,000) acre-feet per calendar year from filings approved for reallocation of trust water which meet the criteria of Subsection 045.02.a. ()

c. The Director will determine on a case-by-case basis from available information whether a permit to be reprocessed or an application for trust water which exceeds the flow depletion limits of Subsection 045.02, or one which meets the flow depletion limits but has been protested, will cause a significant reduction. In making this determination, the Director will consider: ()

i. The amount of the reduction in hydropower generation that the proposed use will cause individually and cumulatively with other uses expected to be developed within twelve (12) months of the proposed use as compared to the existing hydropower generation output of the affected facility or facilities. ()

ii. The relative importance of the affected hydropower facility or facilities to other sources of electrical power generation available to the holder of the facility or facilities. ()

iii. The timing of the reduction in hydropower generation both on an annual basis and on a long-term basis considering the lag time between the beginning of diversion by the proposed use and the resulting reduction in hydropower generation. ()

iv. The effect of the reduction in hydropower generation on the unit cost of hydropower from the facility or facilities and the average cost of electrical power offered by the holder of the facility. ()

v. The terms of contracts, mortgages, or regulatory permits and licenses which require the holder of the hydropower generation facility to retain the capability to produce hydroelectric power at a specific level. ()

d. Other provisions of these rules notwithstanding, applications or permits to be reprocessed proposing a direct diversion of water for irrigation purposes from the Snake River between Milner Dam and Swan Falls Dam or from tributary springs in this reach are presumed to cause a significant reduction. ()

e. Other provisions of these rules notwithstanding, applications or permits to be reprocessed for DCMCI purposes are presumed to not cause a significant reduction. ()

03. Criteria for Evaluating Public Interest. If the Director determines that a proposed use of trust water held by the state pursuant to Section 42-203B(5), Idaho Code, will cause a significant reduction, the Director

will consider the criteria of Section 42-203C(2), Idaho Code, before acting on the application or permit being reprocessed. The Director shall consider and balance the relative benefits and detriments for each factor required to be weighed under Section 42-203C(2), Idaho Code, to determine whether a proposed reduction of the amount of water available for power production serves the greater public interest. The Director shall evaluate whether the proposed use sought in the permit being reprocessed or the application will provide the greater benefit to the people of the state of Idaho when balanced against other uses for the same water resource. In evaluating the public interest criteria, the Director will use the following guidelines: ()

a. The Director will consider the potential benefits both direct and indirect, and that the proposed use would provide to the state and local economy. The economic appraisal shall be based upon generally accepted economic analysis procedures which uniformly evaluate the following factors within the state of Idaho and the county or counties directly affected by the project: ()

- i. Direct project benefits. ()
- ii. Indirect benefits including net revenues to the processing, transportation, supply, service and government sectors of the economy. ()
- iii. Direct project costs, to include the opportunity cost of previous land use. ()
- iv. Indirect project costs, including verifiable costs to government in net lost revenue and increased regulation costs, verifiable reductions in net revenue resulting from losses to other existing instream uses, and the increased cost of replacing reduced hydropower generation from unsubordinated hydropower generating facilities. ()

b. The Director will consider the impact the proposed use would have upon the electric utility rates in the state of Idaho, and the availability, foreseeability and cost of alternative energy sources to ameliorate such impact. These evaluations will include the following considerations: ()

- i. Projections of electrical supply and demand for Idaho and the Pacific Northwest made by the Bonneville Power Administration and the Northwest Power Planning Council and information available from the Idaho Public Utilities Commission or from the electric utility from whose water right trust water is being reallocated. ()
- ii. The long term reliability of the substitute source and the cost of alternatives including the resulting impact on electrical rates. ()

c. The Director will consider whether the proposed use will promote the family farming tradition in the state of Idaho. For purposes of this evaluation, the Director will use the following factors. ()

d. If the total land to be irrigated by the applicant, including currently owned and leased irrigated land and land proposed to be irrigated in the application and other applications and permits of the applicant, do not exceed nine hundred sixty (960) acres, the application will be presumed to promote the family farming tradition. ()

e. If the requirement of Subsection 045.03.c.i. is not met, the Director will consider the extent the applicant conforms to the following characteristics: ()

- i. The farming operation developed or expanded as a result of the application is operated by the applicant or a member of his family (spouse, parents or grandparents, lineal descendants, including those that are adopted, lineal descendants of parents; and spouse of lineal descendants); ()
- ii. In the event the application is filed in the name of a partnership, one or more of the partners shall operate the farming operation; and ()
- iii. If the application is in the name of a corporation, the number of stockholders does not exceed fifteen (15) persons, and one or more of the stockholders operates the farming operation unless the application is submitted by an irrigation district, drainage district, canal company or other water entity authorized to appropriate

water for landowners within the district or for stockholders of the company all of whom shall meet the family farming criteria. ()

f. The Director will consider the promotion of full economic and multiple use development of the water resources of the state of Idaho. In this regard, the extent to which the project proposed complies with the following factors will be considered: ()

- i. Promotes and conforms with the adopted State Water Plan; ()
- ii. Provides for coordination of proposed and existing uses of water to maximize the beneficial use of available water supplies; ()
- iii. Utilizes technology economically available to enhance water and energy use efficiency; ()
- iv. Provides multiple use of the water, including multipurpose storage; ()
- v. Allows opportunity for reuse of return flows; ()
- vi. Preserves or enhances water quality, fish, wildlife, recreation and aesthetic values; ()
- vii. Provides supplemental water supplies for existing uses with inadequate supplies. ()

g. The Director will consider whether a proposed use, which includes irrigation, will conform to a staged development policy of up to twenty thousand (20,000) acres per year or eighty thousand (80,000) acres in any four (4) year period in the Snake River drainage above Murphy Gauge. In applying this criteria, the Director will consider the following: ()

i. “Above Murphy gauge” means the Snake River and any of its surface or groundwater tributaries upstream from Murphy gauge which gauge is located on the Snake River approximately four (4) miles downstream from Swan Falls Dam from which trust water is to be reallocated; ()

ii. Twenty thousand (20,000) acres per year or eighty thousand (80,000) acres per four (4) year period is a four (4) year moving average of Twenty thousand (20,000) acres/year of permits issued during a calendar year for irrigation development. If permits for development of less than twenty-thousand (20,000) acres are issued in a year, additional development in excess of twenty-thousand (20,000) acres can be permitted in succeeding years. Likewise, if more than twenty thousand (20,000) acres is permitted in one year (recognizing that a single large project could exceed twenty thousand (20,000) acres) the permitted development in succeeding years must be correspondingly less to maintain no greater than a twenty thousand (20,000) acres/year average for any four (4) year period; ()

iii. The criteria of Subsection 045.03.g. applies to multiple-use projects with irrigation as a principal purpose. Projects which use irrigation as only an incidental purpose, such as the land treatment of waste, shall not be included within this policy; and ()

iv. An application determined by the Director to be otherwise approvable but found to exceed the acreage limitations, when considered with other applications approved for development, may be approved with conditions providing for the construction of project works and beneficial use of water to be commenced in a future year. ()

h. No single public interest criterion will be entitled to greater weight than any other public interest criterion. ()

i. Until such time as the studies prescribed in Policy 32 I of the State Water Plan are completed and accepted by the Idaho Water Resource Board, applications and permits reprocessed which propose to divert water to surface storage from the Snake River and surface tributaries upstream from Murphy Gauging Station shall be presumed to satisfy the public interest criteria of Section 42-203C(2), Idaho Code. Applications or reprocessed permits which are approved prior to completion of the studies, will not be subject to additional reprocessing. ()

j. Applications for permit for trust water sources filed prior to July 1, 1985, for projects for which diversion and beneficial use was complete prior to October 1, 1984, are presumed to satisfy the public interest criteria of Section 42-203C(2), Idaho Code. ()

k. Applications or permits to be reprocessed proposing a direct diversion of water for irrigation purposes from the Snake River between Milner Dam and Swan Falls Dam or from tributary springs in this reach are presumed not to be in the public interest as defined by Section 42-203C, Idaho Code. Such proposals, are presumed to prevent the full economic and multiple use of water in the Snake River Basin and to adversely affect hydropower availability and electrical energy rates in the state of Idaho. ()

l. Proposed DCMI uses which individually do not have a maximum consumptive use of more than two acre-feet/day are presumed to meet the public interest criteria of Section 42-203C(2), Idaho Code, unless protested. ()

046. -- 049. (RESERVED)

050. CONDITIONS OF APPROVAL (RULE 50).

01. Issuance of Permits with Conditions. The Director may issue permits with conditions to insure compliance with the provisions of Title 42, Chapter 2, Idaho Code, other statutory duties, the public interest, and specifically to meet the criteria of Section 42-203A, Idaho Code, and to meet the requirements of Section 42-203C, Idaho Code, to the fullest extent possible including conditions to promote efficient use and conservation of energy and water. ()

02. Requirements to Mitigate Impact of Flow Depletion. Permits to be reprocessed or applications approved to appropriate water from the main stem of the Snake River between Milner and Murphy gauging station for diversion to off-stream storage during the period November 1 to March 31 shall include requirements to mitigate, in accordance with the State Water Plan, the impact of flow depletions on downstream generation of hydropower. ()

03. Applications and Existing Permits That Are Junior and Subordinate. Applications and existing permits approved for hydropower generation shall be junior and subordinate to all rights to the use of water, other than hydropower, within the state of Idaho that are initiated later in time than the priority of the application or existing hydropower permit. A subordinated permit shall not give rise to any right or claim against future rights to the use of water, other than hydropower, within the state of Idaho initiated later in time than the priority of the application or existing hydropower permit. A permit issued for hydropower purposes shall contain a term condition on the hydropower use in accordance with Section 42-203B(6), Idaho Code. ()

04. Permanent Flow Measuring Device Requirement. Applications approved for on-stream storage reservoirs will, unless specifically waived by the Director, require permanent flow measuring devices both upstream and downstream from the reservoir. ()

05. Well Spacing and Well Construction Requirements. Applications approved for diversion of groundwater may include conditions requiring well spacing and well construction requirements. ()

06. Reprocessed Permits. Permits reprocessed pursuant to Section 42-203D, Idaho Code, may be cancelled, modified or conditioned by the Director to make the permit comply in every way with any permit that would be issued for the same purpose based upon a new application processed under these rules. ()

07. Voiding Approval of Permit. Permits may be conditioned to authorize the Director to void the approval of the permit if he determines that the applicant submitted false or misleading information on the application or supporting documents. ()

08. Retention of Jurisdiction. The Director may condition permits to retain jurisdiction to insure compliance with the design, construction and operation provisions of the permit. ()

09. Insuring Minimum Stream Flows and Prior Rights. The Director may condition permits to

insure that established minimum stream flows and prior rights including prior rights reserved by federal law are not injured. ()

10. Insuring Compliance with Water Quality Standards. The Director may condition permits to insure compliance with Idaho's water quality standards. ()

11. Insuring Assignment of Interest. The Director may condition a permit issued for trust water to require that any amendment (Section 42-211, Idaho Code), transfer (Section 42-222, Idaho Code), or assignment of interest in the permit by any method whatsoever shall not result in the project failing to meet the public interest criteria of Section 42-203C, Idaho Code except, however, lenders obtaining title to the project through default will have a reasonable period of time, as determined by the Director, to meet such criteria or to convey the project to a person or entity that does meet the criteria. ()

051. -- 054. (RESERVED)

055. MORATORIUM (RULE 55).

01. Applications for Permit. ()

a. The Director may cease to approve applications for permit in a designated geographical area upon finding a need to: ()

i. Protect existing water rights; ()

ii. Insure compliance with the provisions of Chapter 2, Title 42, Idaho Code; and ()

iii. Prevent reduction of flows below a minimum stream flow which has been established by the Director or the board pursuant to applicable law. ()

b. Notice of the Director's action to cease application approval will be by: ()

i. Summary Order served by certified mail upon the then existing affected applicants; and ()

ii. Publication of the order for three (3) consecutive weeks in a newspaper or newspapers of general circulation in the area affected. ()

c. Objections to the Director's action shall be considered under the department's adopted Rules of Procedure and applicable law. ()

02. Permits. ()

a. To the extent a permit has not been developed, the Director may cancel, or modify permits for which proof of beneficial use has not been submitted in a designated geographical area as an extension of Subsection 055.01. ()

b. Notice of the Director's action to cancel or modify permits shall be by: ()

i. Summary Order served by certified mail upon the affected permit holders in the designated area. ()

ii. Publication of the order for three (3) consecutive weeks in a newspaper or newspapers of general circulation in the area. ()

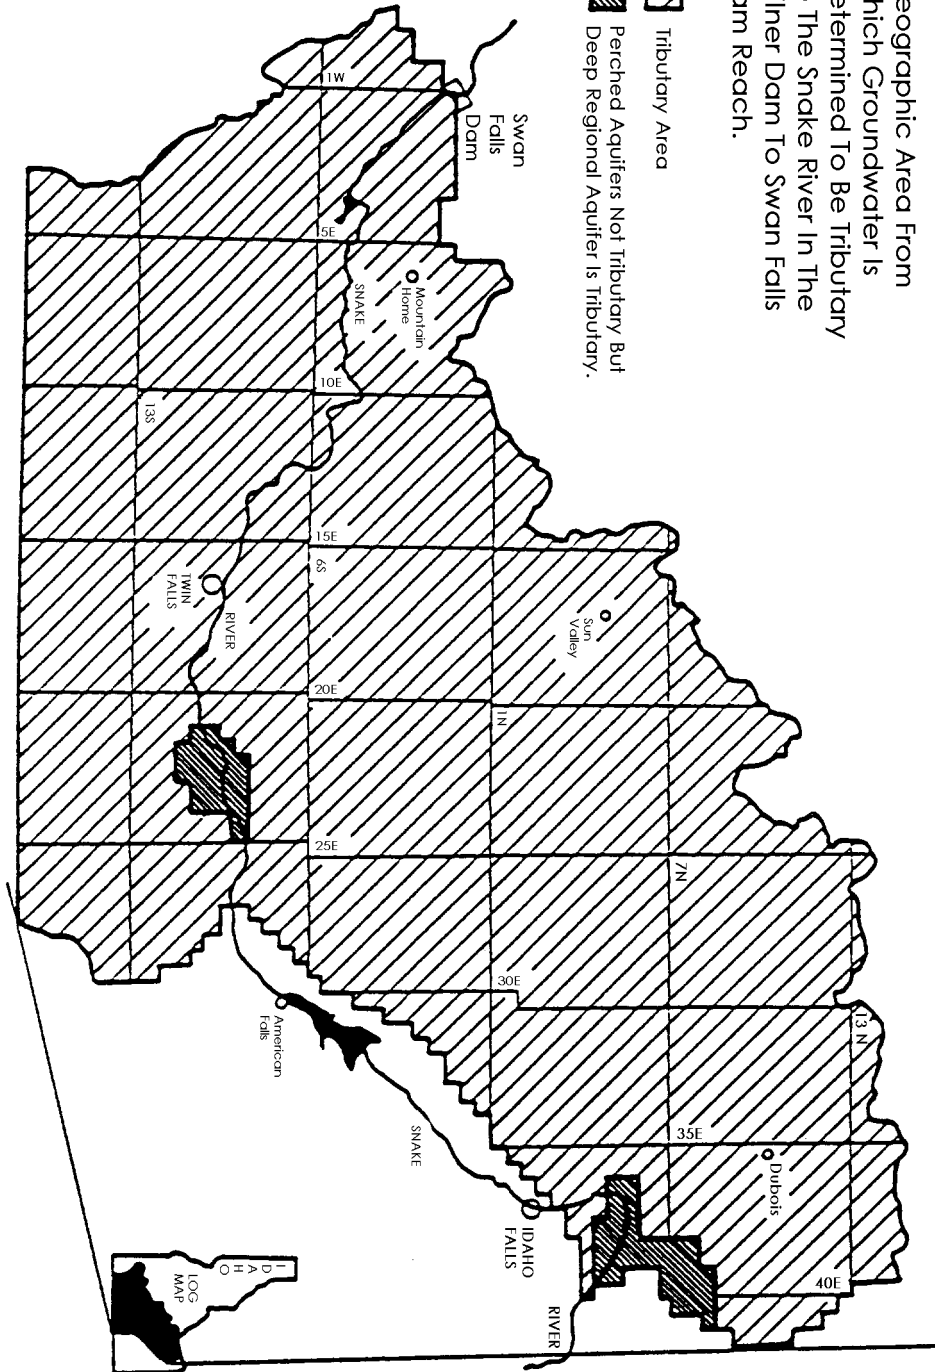

c. Objections to the Director's action shall be considered under the department's adopted Rules of Procedure and applicable law. ()

056. -- 999. (RESERVED)

APPENDIX A

Geographic Area From Which Groundwater Is Determined To Be Tributary To The Snake River In The Milner Dam To Swan Falls Dam Reach.

-  Tributary Area
-  Perched Aquifers Not Tributary But Deep Regional Aquifer Is Tributary.

APPENDIX B

SUGGESTED IRRIGATION SEASONS
IN IDAHO

50% chance of a 28⁰ frost occurring
before or after the dates given.

-  March 1 - December 1
-  March 15 - November 15
-  April 1 - November 1
-  April 15 - October 15

APPENDIX C

37.03.09 – WELL CONSTRUCTION STANDARDS RULES

000. LEGAL AUTHORITY (RULE 0).

The Idaho Water Resource Board adopts these administrative rules with the authority provided by Section 42-238(12), Idaho Code. ()

001. TITLE AND SCOPE (RULE 1).

01. Title. These rules are cited as IDAPA 37.03.09, “Well Construction Standards Rules.” ()

02. Scope. The Department of Water Resources has statutory responsibility for the statewide administration of the rules governing well construction. These rules establish minimum standards for the construction of all new wells and the modification and decommissioning (abandonment) of existing wells. The intent of the rules is to protect the ground water resources of the state against waste and contamination. These rules are applicable to all water wells, monitoring wells, low temperature geothermal wells, injection wells, cathodic protection wells, closed loop heat exchange wells, and other artificial openings and excavations in the ground that are more than eighteen (18) feet in vertical depth below land surface as described in these rules pursuant to Section 42-230 Idaho Code. Some artificial openings and excavations do not constitute a well. For the purposes of these rules, artificial openings and excavations not defined as wells are described in Subsection 045.03 of these rules. Any time that such an artificial opening or excavation is constructed, modified, or decommissioned (abandoned) the intent of these rules must be observed. If waste or contamination is attributable to this type of artificial opening or excavation, the artificial opening or excavation must be modified, or decommissioned (abandoned) as determined by the Director. ()

002. -- 009. (RESERVED)

010. DEFINITIONS (RULE 10).

Unless the context otherwise requires, the following definitions apply to these rules. ()

01. Approved Seal or Seal Material. Seal material must consist of bentonite chips, pellets, or granules, bentonite grout, neat cement, or neat cement grout as defined by these rules. No other materials may be used unless specifically authorized by the Director ()

02. Annular Space. The space, measured as one-half (1/2) the difference in diameter between two (2) concentric cylindrical objects, one of which surrounds the other, such as the space between the walls of a drilled hole (borehole) and a casing or the space between two (2) strings of casing. ()

03. Aquifer. Any geologic formation(s) that will yield water to a well in sufficient quantities to make the production of water from the formation feasible for beneficial use. ()

04. Area of Drilling Concern. An area designated by the Director in which drillers must comply with additional standards to prevent waste or contamination of ground or surface water due to such factors as aquifer pressure, vertical depth of the aquifer, warm or hot ground water, or contaminated ground or surface waters, in accordance with Section 42-238(7), Idaho Code. ()

05. Artesian Water. Any water that is confined in an aquifer under pressure so that the water will rise in the well casing or drilled hole above the elevation where it was first encountered. This term includes water of flowing and non-flowing wells. ()

06. Artificial Filter Pack. Clean, rounded, smooth, uniform, sand or gravel placed in the annular space around a perforated well casing or well screen. A filter pack is frequently used to prevent the movement of finer material into the well casing and to increase well efficiency. ()

07. Bentonite. A commercially processed and packaged, low permeability, sodium montmorillonite clay certified by the NSF International for use in well construction, sealing, plugging, and decommissioning (abandonment). All bentonite products used in the construction or decommissioning (abandoning) of wells must have a permeability rating not greater than 10^{-7} (ten to the minus seven) cm/sec. ()

a. Chips. Bentonite composed of pieces ranging in size from one-quarter (1/4)-inch to one (1) inch on their greatest dimension. ()

b. Granules (also Granular). Bentonite composed of pieces ranging in size from one thirty-seconds (1/32) inch (#20 standard mesh) to seven thirty-seconds (7/32) inch (#3 standard mesh) on their greatest dimension. ()

- c.** Bentonite Grout. A mixture of bentonite specifically manufactured for use as a well sealing or plugging material and potable water to produce a grout with an active solids content not less than twenty-five percent (25%) by weight e.g., (twenty-five percent (25%) solids content by weight = fifty (50) pounds bentonite per eighteen (18) gallons of water). ()
- d.** Pellets. Bentonite manufactured for a specific purpose and composed of uniform sized, one-quarter (1/4) inch, three-eighths (3/8) inch, or one-half (1/2) inch pieces on their greatest dimension. ()
- 08. Board.** The Idaho Water Resource Board. ()
- 09. Bore Diameter.** The diameter of the hole in the formation made by the drill bit or reamer. ()
- 10. Borehole (also Well Bore).** The subsurface hole created during the drilling process. ()
- 11. Bottom Hole Temperature of an Existing or Proposed Well.** The temperature of the ground water encountered in the bottom of a well or borehole. ()
- 12. Casing.** The permanent conduit installed in a well to provide physical stabilization, prevent caving or collapse of the borehole, maintain the well opening and serve as a solid inner barrier to allow for the installation of an annular seal. Casing does not include temporary surface casing, well screens, liners, or perforated casing as otherwise defined by these rules. ()
- 13. Cathodic Protection Well.** Any artificial excavation in excess of eighteen (18) feet in vertical depth constructed for the purpose of protecting certain metallic equipment in contact with the ground. Commonly referred to as cathodic protection. ()
- 14. Closed Loop Heat Exchange Well.** A ground source thermal exchange well constructed for the purpose of installing any underground system through which fluids are circulated but remain isolated from direct contact with the subsurface or ground water. ()
- 15. Conductor Pipe.** The first and largest diameter string of permanent casing to be installed in a low temperature geothermal resource well. ()
- 16. Confining Layer.** A subsurface zone of low-permeability earth material that naturally acts to restrict or retard the movement of water or contaminants from one zone to another. The term does not include topsoil. ()
- 17. Consolidated Formations.** Naturally-occurring geologic formations that have been lithified (turned to stone) such as sandstone and limestone, or igneous rocks such as basalt and rhyolite, and metamorphic rocks such as gneiss and slate. ()
- 18. Contaminant.** Any physical, chemical, ion, radionuclide, synthetic organic compound, microorganism, waste, or other substance that does not occur naturally in ground water or that naturally occurs at a lower concentration. ()
- 19. Contamination.** The introduction into the natural ground water of any physical, chemical, biological or radioactive material that may: ()
- a.** Cause a violation of Idaho Ground Water Quality Standards; or ()
- b.** Adversely affect the health of the public; or ()
- c.** Adversely affect a designated or beneficial use of the State's ground water. Contamination includes the introduction of heated or cooled water into the subsurface that will alter the ground water temperature and render the local ground water less suitable for beneficial use, or the introduction of any contaminant that may cause a violation of IDAPA 58.01.11, "Ground Water Quality Rule." ()

- 20. Decommissioned (Abandoned) Well.** Any well that has been permanently removed from service and filled or plugged in accordance with these rules so as to meet the intent of these rules. A properly decommissioned well will not: ()
- a. Produce or accept fluids; ()
 - b. Serve as a conduit for the movement of contaminants inside or outside the well casing; or ()
 - c. Allow the movement of surface or ground water into unsaturated zones, into another aquifer, or between aquifers. ()
- 21. Decontamination.** The process of cleaning equipment intended for use in a well in order to prevent the introduction of contaminants into the subsurface and contamination of natural ground water. ()
- 22. Department.** The Idaho Department of Water Resources. ()
- 23. Dewatering Well.** A well constructed for the purpose of improving slope stability, drying up borrow pits, or intercepting seepage that would otherwise enter an excavation. ()
- 24. Director.** The Director of the Idaho Department of Water Resources or his duly authorized representatives. ()
- 25. Disinfection.** The introduction of chlorine or other agent or process approved by the Director in sufficient concentration and for the time required to inactivate or kill fecal and Coliform bacteria, indicator organisms, and other potentially harmful pathogens. ()
- 26. Draw Down.** The difference in vertical distance between the static water level and the pumping water level. ()
- 27. Drive Point (also known as a Sand Point).** A conduit pipe or casing through which ground water of any temperature is sought or encountered created by joining a “drive point unit” to a length of pipe and driving the assembly into the ground. ()
- 28. Exploratory Well.** A well drilled for the purpose of discovering or locating new resources in unproven areas. They are used to extract geological, hydrological, or geophysical information about an area. ()
- 29. Global Positioning System (GPS).** A global navigational receiver unit and satellite system used to triangulate a geographic position. ()
- 30. Hydraulic Conductivity.** A measurement of permeability. ()
- 31. Hydraulic Fracturing.** A process whereby water or other fluid is pumped under high pressure into a well to further fracture the reservoir rock or aquifer surrounding the production zone of a well to increase well yield. ()
- 32. Injection Well.** Any excavation or artificial opening into the ground which meets the following three (3) criteria: ()
- a. It is a bored, drilled or dug hole, or is a driven mine shaft or driven well point; and ()
 - b. It is deeper than its largest straight-line surface dimension; and ()
 - c. It is used for or intended to be used for subsurface placement of fluids. ()
- 33. Intermediate String or Casing.** The casing installed and sealed below the surface casing within a low temperature geothermal resource well to isolate undesirable water or zones below the bottom of the surface

- casing. Such strings may either be lapped into the surface casing or extend to land surface. ()
- 34. Liner.** ()
- a.** A conduit pipe that can be removed from the borehole or well that is used to serve as access and protective housing for pumping equipment and provide a pathway for the upward flow of water within the well. ()
- b.** Liner does not include casing required to prevent caving or collapse, or both, of the borehole or serve as a solid inner barrier to allow for the installation of an annular seal. ()
- 35. Mineralized Water.** Any naturally-occurring ground water that has an unusually high amount of chemical constituents dissolved within the water. Water with five thousand (5000) mg/L or greater total dissolved solids is considered mineralized. ()
- 36. Modify.** To deepen a well, increase or decrease the diameter of the casing or the well bore, install a liner, place a screen, perforate existing casing or liner, alter the seal between the casing and well bore, or alter the well to not meet well construction standards. ()
- 37. Monitoring Well.** Any well more than eighteen (18) feet in vertical depth constructed to evaluate, observe or determine the quality, quantity, temperature, pressure or other characteristics of the ground water or aquifer. ()
- 38. Neat Cement.** A mixture of water and cement in the ratio of not more than six (6) gallons of water to ninety-four (94) pounds of Portland cement (neat cement). Other cement grout mixes may be used if specifically approved by the Director. ()
- 39. Neat Cement Grout.** Up to five percent (5%) bentonite by dry weight may be added per sack of cement (neat cement grout) and the water increased to not more than six and one-half (6.5) gallons per sack of cement. Other neat cement mixes may be used if specifically approved by the Director. These grouts must be mixed and installed in accordance with the American Petroleum Institute Standards - API Class A through H. As found in API RP10B, "Recommended Practice for Testing Oil Well Cements and Cement Additives," current edition or other approved standards. ()
- 40. Oxidized Sediments.** Sediments, characterized by distinct coloration, typically shades of brown, red, or tan, caused by the alteration of certain minerals in an environment with a relative abundance of oxygen. ()
- 41. Perforated Well Casing.** Well casing that has been modified by the addition of openings created by drilling, torch cutting, saw cutting, mechanical down-hole perforator, or other method. ()
- 42. Pitless Adaptor or Pitless Unit.** An assembly of parts designed for attachment to a well casing which allows buried pipe to convey water from the well or pump and allows access to the interior of the well casing for installation or removal of the pump or pump appurtenances, while maintaining a water tight connection through the well casing and preventing contaminants from entering the well. ()
- 43. Potable Water.** Water of adequate quality for human consumption. ()
- 44. Pressure Grouting (Grouting).** The process of pumping and placing an approved grout mixture into the required annular space, by positive displacement from bottom to top using a tremie pipe, Halliburton method, float shoe, or other method approved by the Director. ()
- 45. Production Casing.** The casing or tubing through which a low temperature geothermal resource is produced. This string extends from the producing zone to land surface. ()
- 46. Public Water System.** A system for the provision to the public of water for human consumption through pipes or, after August 5, 1998, other constructed conveyances, if such system has at least fifteen (15) service

connections, regardless of the number of water sources or configuration of the distribution system, or regularly serves an average of at least twenty-five (25) individuals daily at least sixty (60) days out of the year. Such term includes: ()

a. Any collection, treatment, storage, and distribution facilities under the control of the operator of such system and used primarily in connection with such system; and ()

b. Any collection or pretreatment storage facilities not under such control that are used primarily in connection with such system. ()

c. Such term does not include any “special irrigation district.” ()

d. A public water system is either a “community water system” or a “non-community water system.” ()

47. Reduced Sediments. Sediments, characterized by distinct coloration, typically shades of blue, black, gray, or green, caused by the alteration of certain minerals in an oxygen poor environment. ()

48. Remediation Well. A well used to inject or withdraw fluids, vapor, or other solutions approved by the Director for the purposes of remediating, enhancing quality, or controlling potential or known contamination. Remediation wells include those used for air sparging, vapor extraction, or injection of chemicals for remediation or in-situ treatment of contaminated sites. ()

49. Sand. Any sediment particle retained on a U.S. standard sieve #200 (Seventy-five hundredths (0.075) mm to two (2) mm). ()

50. Screen (Well Screen). A commercially produced structural tubular retainer with standard sized openings to facilitate production of sand free water. ()

51 Seal or Sealing. The placement of approved seal material in the required annular space between a borehole and casing, between casing strings, or as otherwise required to create a low permeability barrier and prevent movement or exchange of fluids. Seals are required in the construction of new wells, repair of existing wells, and in the decommissioning (abandonment) of wells. Seals are essential to the prevention of waste and contamination of ground water. ()

52. Start Card. An expedited drilling permit process for the construction of cold water, single-family residential wells. ()

53. Static Water Level. The height at which water will rise in a well under non-pumping conditions. ()

54. Surface Casing. The first string of casing in a low temperature geothermal resource well which is set and sealed after the conductor pipe to anchor blow out prevention equipment and to case and seal out all existing cold ground water zones. ()

55. Temporary Surface Casing. Steel pipe used to support the borehole within unstable or unconsolidated formations during construction of a well that will be removed following the installation of the permanent well casing and prior to or during placement of an annular seal. ()

56. Thermoplastic/PVC Casing. Plastic piping material meeting the requirements of ASTM F 480 and specifically designed for use as well casing. ()

57. Transmissivity. The capacity of an aquifer to transmit water through its entire saturated thickness. ()

58. Tremie Pipe. A small-diameter pipe used to convey grout, dry bentonite products, or filter pack materials into the annular space, borehole, or well from the bottom to the top of a borehole or well. ()

59. Unconfined Aquifer. An aquifer in which the water table is in contact with and influenced by atmospheric pressure through pore spaces in the overlying formation(s). ()

60. Unconsolidated Formation. A naturally-occurring earth formation that has not been lithified. Alluvium, soil, sand, gravel, clay, and overburden are some of the terms used to describe this type of formation. ()

61. Unstable Unit. Unconsolidated formations, and those portions of consolidated formations, that are not sufficiently hard or durable enough to sustain an open borehole without caving or producing obstructions without the aid of fluid hydraulics or other means of chemical or physical stabilization. ()

62. Unusable Well. Any well that can not be used for its intended purpose or other beneficial use authorized by law. ()

63. Waiver. Approval in writing by the Director of a written request from the well driller and the well owner proposing specific variance from the minimum well construction standards. ()

64. Waste. The loss, transfer, or subsurface exchange of a ground water resource, thermal characteristic, or natural artesian pressure from any aquifer caused by improper construction, misuse, or failure to properly maintain a well. Waste includes: ()

a. The flow of water from an aquifer into an unsaturated subsurface zone; ()

b. The transfer or mixing, or both, of waters from one aquifer to another (aquifer commingling); or ()

c. The release of ground water to the land surface whenever such release does not comply with an authorized beneficial use. ()

65. Water Table. The height at which water will rise in a well; also the upper surface of the zone of saturation in an unconfined aquifer. This level will change over time due to changes in water supply and aquifer impacts. ()

66. Well. ()

a. An artificial excavation or opening in the ground more than eighteen (18) feet in vertical depth below land surface by which ground water of any temperature is sought or obtained. The depth of a well is determined by measuring the maximum vertical distance between the land surface and the deepest portion of the well. Any water encountered in the well is considered to be obtained for the purpose of these rules; or ()

b. Any waste disposal and injection well, as defined in Section 42-3902, Idaho Code. ()

c. Well does not mean: ()

i. A hole drilled for mineral exploration; or ()

ii. Holes drilled for oil and gas exploration which are subject to the requirements of Section 47-320, Idaho Code; or ()

iii. Holes drilled for the purpose of collecting soil samples above the water table. ()

67. Well Development. The act of bailing, jetting, pumping, or surging water in a well to remove drilling fluids, fines, and suspended materials from within a completed well and production zone in order to establish the optimal hydraulic connection between the well and the aquifer. ()

68. Well Driller or Driller. Any person who operates drilling equipment, or who controls or

supervises the construction of a well, and is licensed under Section 42-238, Idaho Code ()

69. Well Drilling or Drilling. The act of constructing a new well or modifying or changing the construction of an existing well. ()

70. Well Owner. Any person, firm, partnership, co-partnership, corporation, association, or other entity, or any combination of these, who owns the property on which the well is or will be located or has secured ownership of the well by means of a deed, covenant, contract, easement, or other enforceable legal instrument for the purpose of benefiting from the well. ()

71. Well Rig (Drill Rig). Any power driven percussion, rotary, boring, digging, jetting or auguring machine used in the construction of a well. ()

011. -- 024. (RESERVED)

025. CONSTRUCTION OF COLD WATER WELLS (RULE 25).

All persons constructing wells must comply with the requirements of Section 42-238, Idaho Code, and IDAPA 37.03.10, "Well Driller Licensing Rules." The standards specified in Rule 25 apply to all wells with a bottom hole temperature of eighty-five (85) degrees Fahrenheit or less. Wells with a bottom hole temperature greater than eighty-five (85) degrees Fahrenheit, but less than two hundred twelve (212) degrees Fahrenheit, must meet the requirements of Rule 30 in addition to meeting the requirements of Rule 25. These standards also apply to any waste disposal and injection well as defined in Section 42-3902, Idaho Code. ()

01. General. The well driller must construct each well as follows: ()

a. In accordance with these rules and with the conditions of approval of any drilling permit issued pursuant Section 42-235, Idaho Code, and in a manner that will prevent waste and contamination of the ground water resources of the state of Idaho. The adopted standards are minimum standards which must be adhered to in the construction of all new wells, and in the modification or decommissioning (abandonment) of existing wells. The well driller is charged with the responsibility of preventing waste or contamination of the ground water resources during the construction, modification or abandonment of a well. The Director may add conditions of approval to a drilling permit issued pursuant to Rule 45 of these rules to require that a well be constructed, modified, or decommissioned (abandoned) in accordance with additional standards when necessary to protect ground water resources and the public health and safety from existing contamination and waste or contamination during the construction, modification or decommissioning (abandonment) of a well. ()

b. In consideration of the geologic and ground water conditions known to exist or anticipated at the well site. ()

c. Such that it is capable of producing, where obtainable, the quantity of water to support the allowed or approved beneficial use of the well, subject to law; ()

d. Meet the siting and separation distance requirements in the table in this Subsection (025.01.d.). Additional siting and separation distance requirements are set forth by the governing district health department and the Idaho Department of Environmental Quality rules at IDAPA 58.01.03, "Individual/Subsurface Sewage Disposal Rules," and IDAPA 58.01.08, "Idaho Rules for Public Drinking Water Systems".

Separation of Well from:	Minimum Separation Distance (feet)
Existing Public Water Supply well, separate ownership	- 50
Other existing well, separate ownership	- 25
Septic drain field	- 100

Separation of Well from:	Minimum Separation Distance (feet)
Septic tank	- 50
Drainfield of system with more than 2,500 GPD of sewage inflow	- 300*
Sewer line - main line or sub-main, pressurized, from multiple sources	- 100
Sewer line - main line or sub-main, gravity, from multiple sources	- 50
Sewer line - secondary, pressure tested, from a single residence or building	- 25
Effluent pipe	- 50
Property line	- 5
Permanent buildings, other than those to house the well or plumbing apparatus, or both	- 10
Above ground chemical storage tanks	- 20
Permanent (more than six months) or intermittent (more than two months) surface water	- 50
Canals, irrigation ditches or laterals, & other temporary (less than two months) surface water	- 25
*This distance may be less if data from a site investigation demonstrates compliance with IDAPA 58.01.03, "Individual/Subsurface Sewage Disposal Rules," separation distances.	

()

02. Waivers. In unique cases where the Director concludes that the ground water resources will be protected against waste and contamination and the public health and safety are not compromised, a waiver of specific standards required by these rules may be approved prior to constructing, decommissioning, or modifying a well.

()

a. To request a waiver the well driller and well owner must:

()

i. Jointly submit a detailed plan and written request identifying a specific Rule or Rules proposed to be waived. Additionally, the plan must detail the well construction process that will be employed in lieu of complete Rule compliance:

()

ii. Prior to submittal, the well driller and the well owner must sign the plan and written request acknowledging concurrence with the request; and

()

iii. Submit the plan and request by facsimile, e-mail, or letter.

()

b. The Director will evaluate and respond to the request within ten (10) business days of receiving the request.

()

i. If the request for waiver is approved, the intent of the rules will be served and all standards not waived will apply. Waivers approved by the Director will not supersede requirements of other regulatory agencies without specific concurrence from that agency. Work activity related to a waiver request will not proceed until a written or verbal approval is granted by the Director.

()

ii. Any verbal approval will be followed by a written approval.

()

03. Records. In order to enable a comprehensive survey of the extent and occurrence of the state's ground water resource, the coordinates of every newly constructed, modified or decommissioned (abandoned) well location must be identified by latitude and longitude with a global positioning system (GPS) and recorded on the

driller’s report in degrees and decimal minutes and within the nearest 40 acre parcel using the Public Land Survey System. Every well driller must maintain records as described in IDAPA 37.03.10 “Well Driller Licensing Rules,” pursuant to Section 42-238(11), Idaho Code, and provide the well owner with a copy of the approved well drilling permit and a copy of the well driller’s report when submitted to the Director. ()

04. Casing. The well driller must install casing in every well. Steel or thermoplastic casing may be installed in any well with a bottom hole temperature of eighty-five (85) degrees Fahrenheit or less. Thermoplastic pipe must not be installed in a well with a bottom hole temperature greater than eighty-five (85) degrees Fahrenheit. All casing to be installed must be new or in like-new condition, free of defects, and clearly marked by the manufacturer with all specifications required by these rules. For all wells the casing must extend at least twelve (12) inches above land surface and finished grade and to a minimum depth below land surface as required by these rules. Concrete slabs around a well casing will be considered finished grade (Figure 01, Appendix A). The well driller must install casing of sufficient strength to withstand calculated and anticipated subsurface forces and corrosive effects. The well driller must install casings sufficiently plumb and straight to allow the installation or removal of screens, liners, pumps and pump columns without causing adverse effects on the operation of the installed pumping equipment. ()

a. Steel Casing. When steel casing lengths are joined together, they must be joined by welded joints or screw-couple joints. All connection must be water tight. If steel casing joints are welded, the weld must be at least as thick as the well casing and fully penetrating. Welding rods or flux core wire of at least equal quality to the casing metal must be used. Casing ends to be joined by welding must be properly prepared, beveled and gapped to allow full penetration of the weld. All stick welded joints must have a minimum of two (2) passes including a “root” pass and have minimal undercut when complete. ()

i. In addition to meeting these standards, all wells that are constructed for public water systems must meet all of the casing wall thickness requirements set forth by the Idaho Department of Environmental Quality Rules, IDAPA 58.01.08, “Idaho Rules for Public Drinking Water Systems.” ()

ii. The well driller must install steel casing that meets or exceeds the American Society of Testing and Materials (ASTM) standard A53, Grade B or American Petroleum Institute (API) 5L Grade B, and that meets the following specifications for wall thickness:

Minimum Single-Wall Steel Well Casing Thickness ¹ for Selected Diameters (inches)													
Nominal Diameter (in.) ³	6 ²	8	10	12	14	16	18	20	22	24	26	28	30
Depth (ft.)	Nominal Wall Thickness (in.) ¹												
<100	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250
100-200	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250
200-300	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250
300-400	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.250	0.375	0.375	0.375	0.375

600-800	0.250	0.250	0.250	0.250	0.250	0.250	0.375	0.375	0.375	0.375	0.375	0.375	0.375
800-1000	0.250	0.250	0.250	0.250	0.375	0.375	0.375	0.375	0.375	0.375	0.375	0.375	0.375
1000-1500	0.280	0.322	0.365	0.375	0.375	0.375	0.375	0.375	0.375	0.375	0.375	0.375	0.375
1500-2000	0.280	0.322	0.365	0.375	0.375	0.375	0.375	0.375	0.375	0.375	0.375	0.375	0.375

Minimum Single-Wall Steel Well Casing Thickness ¹ for Selected Diameters (inches)													
Nominal Diameter (in.) ³	6 ²	8	10	12	14	16	18	20	22	24	26	28	30
<p>1 Compliance with the minimum nominal wall thicknesses listed is required for any depth or location where casing is used to prevent caving or collapse, or both, of the borehole or serves as a solid inner barrier to allow for the installation of an annular seal.</p> <p>2 For nominal casing diameters less than six (6) inches, the minimum nominal wall thickness must be equivalent to ASTM Schedule 40.</p> <p>3 For any other casing diameter not addressed herein, prior approval by the Director is required.</p>													

()

b. Thermoplastic Casing. Thermoplastic casing may be used in monitoring wells and cold water wells if drilling of the borehole confirms its suitability for use. ()

i. Thermoplastic casing must conform to ASTM F 480 and NSF-WC. The well driller must not use thermoplastic casing under any condition where the manufacturer's resistance to hydraulic collapse pressure (RHCP) or total depth specifications are exceeded. Thermoplastic casing extending above-ground must be protected from physical and ultraviolet light damage by enclosing it within steel casing extending at least twelve (12) inches above land surface and finished grade and to a minimum depth of eighteen (18) feet below land surface or five (5) feet below land surface for monitoring wells. ()

ii. Thermoplastic pipe used in wells as casing or liner must have a minimum rating of SDR-21. For nominal diameters of four (4) inches or less, a minimum rating of Schedule 40 is required. If used as casing within unconsolidated or unstable consolidated formations, thermoplastic pipe must be centralized and fully supported throughout the unstable zone(s) with filter pack or seal material as required by these rules. ()

iii. All thermoplastic casing and liner must be installed in accordance with the manufacturer's recommendations and specifications, and as required by these rules. The well driller will not treat thermoplastic pipe in any manner that would adversely affect its structural integrity. The well driller must: ()

(1) Ensure that the weight of the pump assembly, if secured to the thermoplastic pipe, does not exceed the weight limitations per manufacturer's recommendations or cause damage to the pipe resulting in breaks or leaks. ()

(2) Not use Type III (high-early strength) Portland cement-based seal materials in direct contact with thermoplastic pipe unless approved by the Director. ()

(3) Not drive, drop, force, or jack thermoplastic pipe into place. Thermoplastic pipe must be lowered or floated into an oversized, obstruction-free borehole. ()

c. Perforated Well Casing. Perforated well casing may be used in the construction or decommissioning of a well when such application does not violate any standards required by these rules. ()

05 Liner. In addition to well casing, liners may be installed in wells to prevent damage to pumping equipment. Steel or thermoplastic pipe may be installed as liner in a well with a bottom hole temperature of eighty-five (85) degrees Fahrenheit or less. Thermoplastic liner must conform to ASTM F 480 and NSF-WC. Thermoplastic liners must not be used in unconsolidated formations or unstable units. ()

06. Screen. Well screens must be used in constructing a well when necessary to avoid sand production (see sand production, Rule 25, Subsection 025.24). Well screens must be commercially manufactured, be slotted, louvered or wire wrapped, and be installed according the manufacturers specifications. ()

a. Screens may require a filter pack consisting of sand or gravel to further reduce the quantity of sand produced from the well. ()

b. The well driller will not install well screens, perforated casing or filter pack across a confining layer(s) separating aquifers of different pressure, temperature, or quality. ()

07. Use of Approved Sealing Materials and Required Annular Space. Well casings must be sealed in the required annular space with approved material to prevent the possible downward movement of contaminated surface waters or other fluids in any annular space around the well casing (Figure 02, Appendix A). Proper sealing is also required to prevent the movement of groundwater either upward or downward from zones of different pressure, temperature or quality within the well or outside the casing. The well driller must notify by phone the Department's appropriate Region Office at least four (4) hours in advance of placing any annular seal to provide Department staff the opportunity to observe seal placement. ()

a. All casing to be sealed must be adequately centralized to ensure uniform seal thickness around the well casing. Surface seals must extend to not less than thirty-eight (38) feet below land surface for well depths greater than thirty-eight (38) feet. For well depths less than thirty-eight (38) feet, seals must extend to depths as hereafter required. ()

b. Seals are required at depths greater than thirty-eight (38) feet in artesian wells or to seal through confining layers separating aquifers of differing pressure, temperature, or quality in any well. ()

c. When a well is modified and the existing casing is moved or the original seal is damaged, or a well driller discovers that a seal was not installed or has been damaged, the well driller must repair, replace, or install a seal around the permanent casing that is equal to or better than required when the well was originally constructed. ()

d. Manufactured packers and shale traps may be used as devices to retain approved seal material when installing a required annular seal. Whenever these devices are used to retain seal material, the well driller must comply with the manufacturer's recommendations for installation. ()

e. If a temporary casing has been installed, upon completion of the drilling, the annular space must be filled with approved seal material and kept full while withdrawing the temporary casing. Bentonite chips should be used with caution when the annular space between a temporary casing and permanent casing is filled with water. ()

i. When attempts at removing a temporary casing are unsuccessful, the casing must be sealed in place by a method approved by the department. ()

ii. The well driller must notify the department whenever a temporary casing can not be removed and propose a plan to adequately seal the casing to prevent waste and contamination of the ground water. The plan must detail how the casing will be sealed on the outside to a sufficient depth below land surface in addition to placement of any required formation seals through the interval at which the casing will remain. ()

f. For mixed grout seals the minimum annular space required must provide for a uniform seal thickness not less than one (1) inch on all sides of the casing or a borehole at least two (2) inches larger than the outside diameter (OD) of the casing to be sealed (Figure 02, Appendix A). (Note: a seven and seven-eighths (7 7/8) inch diameter (eight (8) inch nominal) borehole around a six and five-eighths (6 5/8) inch OD (six (6) inch nominal casing does not satisfy the minimum annular space requirements). ()

i. When placing grout seals with a removable tremie pipe between casing strings or between a borehole and casing, the required annular space must be at least one (1) inch or equal to the OD of the tremie pipe whichever is greater. Permanent tremie pipes will be considered as a casing string and subject to minimum annular space requirements in addition to the annular space requirements around the well casing (Figure 03, Appendix A). ()

ii. All grout seals must be placed from the bottom up, by using an approved method. Bentonite grout

must not be used above the water table unless specifically designed and manufactured for such use and approved by the Director in advance. ()

iii. If cement-based grout (neat cement or neat cement grout) is used to create a seal, the casing string sealed must not be moved or driven after the initial set. Construction must not resume for a minimum of twenty-four (24) hours following seal placement; ()

g. For dry bentonite seals the minimum annular space required must provide for a uniform seal thickness not less than one and five-eighths (1 5/8) inches on all sides of the casing or a borehole at least four (4) inches larger than the “nominal diameter” of the casing to be sealed. e.g., (six and five-eighths (6 5/8) inch OD (six (6) inch nominal) casing requires a ten and three fourths (10 3/4) inch OD (ten (10) inch nominal) temporary casing or a nine and seven-eighths (9 7/8) inch (ten (10) inch nominal) minimum borehole). Listed below are additional annular space requirements and limitations for placement of dry bentonite seals: ()

i. All dry bentonite seals must be tagged during placement and consider volumetric calculations to verify placement. ()

ii. Installation of dry bentonite seals must be consistent with the manufacturers’ recommendations and specifications for application and placement. ()

iii. Granular bentonite must not be placed through water. ()

iv. If a granular bentonite seal is placed deeper than two hundred (200) feet, the minimum annular space must be increased by at least one (1) inch e.g., (six and five-eighths (6 5/8) inch OD (six (6) inch nominal) casing requires a twelve and three fourths (12 3/4) inch OD (twelve (12) inch nominal) temporary casing or an eleven and seven eights (11 7/8) inch (twelve (12) inch nominal) minimum borehole). ()

v. Bentonite chips may be placed through water or drilling fluid of appropriate viscosity. Bentonite chip seals placed through more than fifty (50) feet of water or drilling fluid will require the minimum annular space to be increased by at least one (1) inch e.g., (six and five-eighths (6 5/8) inch OD (six (6) inch nominal) casing requires a twelve and three fourths (12 3/4) inch OD (twelve (12) inch nominal) temporary casing or an eleven and seven eights (11 7/8) inch (twelve (12) inch nominal) minimum borehole). ()

08. Sealing of Wells. Sealing requirements described herein are minimum standards that apply to all wells. The Director may establish alternate minimum sealing requirements in specific areas when it can be determined through detailed studies of the local hydrogeology that a specific alternate minimum will provide protection of the ground water from waste and contamination. ()

a. Consolidated Formations. When a water well is drilled into and acquires water from an aquifer that consists of consolidated formations that are above the water table, casing must be installed so that it extends and is sealed to a depth not less than thirty-eight (38) feet (Figure 04, Appendix A). If the well depth is less than thirty-eight (38) feet from land surface, well casing must be installed and sealed five (5) feet into the consolidated formation or to a depth of eighteen (18) feet, whichever is greater. ()

b. Unconsolidated Formations without Confining Layers of Clay. When a water well is drilled into and acquires water from an unconfined aquifer that is overlain with unconsolidated formations, such as sand and gravel without confining layers of clay, well casing must extend to at least five (5) feet below the water table and be sealed to a depth not less than thirty-eight (38) feet (Figure 05, Appendix A). If the well depth is less than thirty-eight (38) feet well casing must extend to at least five (5) feet below the water table or eighteen (18) feet, whichever is greater, and be sealed to a depth of at least eighteen (18) feet. ()

i. The extensive (for example, one hundred fifty (150) feet thick or more) unconsolidated, non-stratified, sand and gravel of the Rathdrum Prairie are characterized by extremely high transmissivity and hydraulic conductivity. Under these conditions, sealing wells to depths greater than eighteen (18) feet may not be additionally protective. When a water well is drilled within the boundaries of the Rathdrum Prairie, (shown in Figure 06, Appendix A of these rules), well casing must extend to at least five (5) feet below the water table and be sealed to a depth not less than eighteen (18) feet (Figure 07, Appendix A). ()

c. Unconsolidated Formations with Confining Layers of Clay. When a well is drilled into and acquires water from an aquifer that is overlain by unconsolidated deposits such as sand and gravel, and there are confining layers of clay above the water table, well casing must be installed from the land surface to the confining layer immediately above and in contact with the production zone and sealed to a depth not less than thirty-eight (38) feet (Figure 08, Appendix A). If the well depth is less than thirty-eight (38) feet from land surface, well casing must extend and be sealed into the first confining layer or to a depth of eighteen (18) feet, whichever is greater. ()

09. Sealing Artesian Wells. ()

a. Unconsolidated Formations. When artesian water is encountered in unconsolidated formations, the production zone or open interval must be limited to zones of like pressure, temperature, and quality. Water encountered in oxidized sediments must not be commingled with water encountered in reduced sediments. Well casing must extend from land surface into the lower most confining layer above the production zone, and must be sealed: ()

i. From land surface to a depth of at least thirty-eight (38) feet; and ()

ii, Through all confining layer(s); and ()

(1) A minimum of five (5) feet of seal material must be placed into or through the lower most confining layer above the production zone (Figure 09, Appendix A); or ()

(2) Five (5) feet into or through the lowermost confining layer above the production zone and continuously to land surface (Figure 09, Appendix A). ()

iii. If the well depth is less than thirty-eight (38) feet, the well must be cased and sealed from land surface to the confining layer in direct contact with the production zone or to a depth of eighteen (18) feet, whichever is greater. ()

b. Consolidated Formations. When artesian water is encountered in a consolidated formation, well casing must be installed and sealed from land surface to a depth of at least thirty-eight (38) feet; and ()

i. If the consolidated formation is overlain by a permeable formation(s) and water will rise above the consolidated formation, well casing must extend and be sealed at least five (5) feet into the confining portion of the consolidated formation (Figure 10, Appendix A). ()

ii. If the well depth is less than thirty-eight (38) feet, the well must be cased and sealed from land surface five (5) feet into the confining consolidated formation or to a depth of eighteen (18) feet, whichever is greater. ()

c. Control Device. Pursuant to Section 42-1603, Idaho Code, if the well flows at land surface, it must be equipped with a control device approved by the Director, so that the flow can be completely stopped. If leaks occur around the well casing or adjacent to the well, the well must be completed with seals, casing or cement grout to eliminate the leakage. ()

i. Flowing artesian wells must be equipped with an approved pressure gage fitting that will allow access for measurement of shut-in pressure of a flowing well. All pressure gage fittings must include control valves such that the pressure gage can be removed without resulting in artesian flow from the well. ()

ii. The well driller must not move his well drilling rig from the site until all requirements have been satisfied. Some mixing of water may be allowed to develop an adequate water well; however, the mixing must be restricted to water zones of similar pressure, temperature and quality. The driller must take precautions to case and seal out zones which may lead to waste or contamination. ()

10. Alternative Methods for Sealing Wells. To accommodate for new technology, and in consideration of the wide variety of drilling equipment used to construct wells, other methods of sealing wells not

specifically addressed in these rules may be allowed. The Director may consider specific proposals for alternative methods of sealing on a case by case basis. Director approval or acceptance of such procedures will not constitute a “waiver” of any requirements of these rules. In such cases, the well driller must provide sufficient information for the Director to determine that the full intent of the sealing requirements will be satisfied if an alternative method is employed. If it is determined that a specific alternate method will provide protection of the ground water from waste and contamination, the Director may issue a statement of acceptance qualifying the use and implementation of such methods. ()

11. Injection Wells. In addition to meeting the requirements of Rule 25 of these rules, the construction, modification, or decommissioning (abandonment) of all injection wells over eighteen (18) feet in vertical depth must also comply with the IDAPA 37.03.03, “Rules for the Construction and Use of Injection Wells,” and the injection well permit. Drillers must obtain from the Director a certified copy of the permit authorizing construction or modification of an injection well before beginning work. ()

12. Cathodic Protection Wells. All cathodic protection wells must be constructed by a licensed well driller in compliance with these rules. A detailed construction plan must be included with the drilling permit application. ()

13. Monitoring and Remediation Wells. All monitoring wells and remediation wells must be constructed and maintained in a manner that will prevent waste or contamination and as otherwise required by these rules. When a monitoring well or a remediation well is no longer useful or needed, the owner or operator of the well must decommission (abandon) the well in accordance with Rule 25, Subsection 025.16 of these rules. No person may divert ground water from a monitoring well or a remediation well for any purpose not authorized by the Director. The application for a permit for all monitoring wells and all remediation wells must include a design proposal prepared by a licensed engineer or registered geologist pursuant to Section 42-235, Idaho Code. Blanket permits for monitoring well and remediation well networks may be approved for site-specific monitoring and remediation programs. The designs and specification for monitoring wells and remediation wells must demonstrate that: ()

- a. The ground water resources are protected against waste and contamination; ()
- b. The well(s) will inject or withdraw only fluids, gases or solutions approved by the Director; ()
- c. The well(s) will be constructed so as to prevent aquifer commingling; and ()
- d. The well(s) will be properly decommissioned (abandoned) upon project completion and in accordance with these rules. ()

14. Closed Loop Heat Exchange Wells. The well driller must construct closed loop heat exchange wells consistent with these rules. The well driller is not required to install steel casing in such wells. When constructing a closed loop heat exchange well, the well driller must: ()

- a. Construct each borehole of sufficient size to provide the annular space required by these rules. ()
- b. Seal the annular space of each borehole with approved seal material in accordance with these rules; ()
- c. Install fluid-tight circulating pipe, composed of high-density polyethylene, grade PE3408, minimum cell classifications PE355434C or PE345434C conforming to ASTM Standard D3350, or other Director-approved pipe; ()
- d. Join pipe using thermal fusion techniques according to ASTM Standards D-3261 or D-2683. All personnel creating such system joints must be trained in the appropriate thermal fusion technologies; ()
- e. Use only propylene glycol, or other circulating fluid approved by the Director; ()
- f. Ensure that any other system additive is NSF approved and has prior approval from the Director; ()

- ()

g. Pressure test each loop with potable water prior to grout installation; ()
- h. Pressure test the system with potable water prior to installation of the circulating fluid at one hundred percent (100%) of the designed system operating pressure for a minimum duration of twenty-four (24) hours; and ()
- i. Properly repair or decommission (abandon) all loops failing the test by pressure pumping approved seal material through the entire length of each failed loop. After grouting, loop ends must be fused together or capped. ()

15. Access Port or Pressure Gage. Upon completion of a well and before removal of the well rig from the site, the well must be equipped with an access port that will allow for measurement of the depth to water or an approved pressure gage fitting that will allow access for measurement of shut-in pressure of an artesian flowing well. All pressure gage fittings must include control valves such that the pressure gage can be removed. Approved access ports are illustrated in Figure 11, APPENDIX A, together with approved locations for pressure gage fittings. Air lines are not a satisfactory substitution for an access port. Nonflowing domestic and stock water wells that are to be equipped with a sanitary seal with a built-in access port are exempt from this requirement. ()

16. Decommissioning (Abandoning) of Wells. ()

a. The well owner is charged with maintaining and properly decommissioning (abandoning) a well in a manner that will prevent waste or contamination, or both, of the ground water. No person is allowed to decommission a well in Idaho without first obtaining a driller's license or receiving a waiver of the license requirement from the Director of the Department of Water Resources. Authorization is required from the Director prior to decommissioning any well. Upon decommissioning, the person who decommissioned the well must submit to the Director a report describing the procedure. ()

b. The Director may require decommissioning of a well in compliance with the provisions of these rules, if the well: ()

- i. Does not meet minimum well construction standards; ()
- ii. Meets the definition of an unusable well; ()
- iii. Poses a threat to human health and safety; ()
- iv. Is in violation of IDAPA 58.01.11, "Ground Water Quality Rule"; or ()
- v. Has no valid water right or other authorization acceptable to the Director for use of the well. ()

c. When required by the Director, decommissioning must be done in accordance with the following: ()

i. Cased wells and boreholes without a continuous seal from the top of the intakes or screen to the surface. The well driller must use one (1) of the following methods as applicable: ()

(1) The Director may require that well casing be perforated every five (5) feet from the bottom of the casing to within five (5) feet of the surface. Perforations made must be adequate to allow the free flow of seal material into any voids outside the well casing. There must be at least four equally spaced perforations per section circumference. Approved grout must be pressure pumped to fill any voids outside of the casing. A sufficient volume must be used to completely fill the well and annular space; or ()

(2) Fill the borehole with approved seal material as the casing is being removed. ()

ii. Cased wells and boreholes with full-depth seals. If the well is cased and sealed from the top of the screen or production zone to the land surface, the well must be completely filled with approved seal material. ()

iii. Uncased wells must be completely filled with approved seal material. ()

iv. Dry hole wells or wells from which the quantity of water to meet a beneficial use cannot be obtained must be decommissioned with cement grout, concrete or other approved seal material in accordance with these rules. ()

17. Completion of a Well. The Director will consider that every well is completed when the well drilling equipment has been removed, unless written notice has been given to the Director by the well driller that he intends to return and do additional work on the well within a specified period of time. Upon completion of the well, the well must meet all of the required standards. ()

a. Upon completion of drilling and prior to removal of well drilling equipment from a water well site, the top of the casing must be completely covered with: ()

i. A one-fourth inch (1/4") thick solid, new or like-new steel plate with a three-fourths inch (3/4) threaded and plugged access port, welded to and completely covering the casing (Figure 12, Appendix A); or ()

ii. A threaded cap, or a commercially manufactured watertight sanitary well cap (Figure 12, Appendix A); or ()

iii. A commercially manufactured water-tight, snorkel-vented or non-vented well cap on any well susceptible to submergence; or ()

iv. A control device approved by the Director per Section 42-1603, Idaho Code, on any well that flows at land surface (Figure 11, Appendix A). ()

b. Upon the completion of every well, the well driller must permanently affix the stainless steel well tag to the steel surface casing in a manner and location that maintains tag legibility. For closed loop heat exchange wells, the well driller must obtain approval for the well tag placement and method of attachment. The well driller must secure each tag by: ()

i. A full-length weld across the top and down each side of the tag; or ()

ii. Using one (1) stainless steel, closed-end domed rivet near each of the four (4) corners of the tag. ()

iii. Prior to welding or riveting, the tag must be pre-shaped to fit the casing such that both sides to be welded or riveted touch the casing and no gaps exist between the tag and casing. ()

18. Pitless Adapters. When a pitless adaptor is used (Figure 12, Appendix A), the adaptor should be of the type approved by the NSF International testing laboratory or the approval code adopted by the Pitless Adaptor Division of the Water Systems Council. The pitless adaptor, including the cap or cover, casing extension, and other attachments, must be so designed and constructed to be water tight and to prevent contamination of the potable water supply from external sources. If a permanent surface or outer casing is installed and is cut off or breached to install the pitless adaptor on an inner well casing or liner, the space between the permanent outer casing and the liner or inner casing must be sealed. The well owner or person installing the pitless adaptor must then seal the excavation surrounding the pitless adaptor using an approved seal material. ()

19. Pump Installation. No person is allowed to install a pump into any well that would cause a violation of Rule 25, of these rules or other applicable rules or state law. ()

20. Explosives. Explosives used in well construction must never be detonated inside the required well

casing. Approved explosive casing perforators may be exempted by the Director. ()

21. Hydraulic Fracturing. Hydraulic fracturing must be performed only by well drillers licensed in Idaho. The pressure must be transmitted through a drill string and must not be transmitted to the well casing. The driller must provide a report to the Director of the fracturing work which must include well location, fracturing depth, fracturing pressures and other data as requested by the Director. ()

22. Drilling Fluids or Drilling Additives. The well driller must use only potable water and drilling fluids or drilling additives that are manufactured for use in water wells, are NSF International, American Petroleum Institute (API), or ASTM/ANSI approved; and do not contain a concentration of any substance in excess of Primary Drinking Water Standards, as set forth in IDAPA 58.01.08, "Rules for Public Drinking Water Systems," according to manufacturer's specifications. The well driller may seek approval from the Director to use specific, non-certified products on a case-by-case basis. In addition, the well driller must ensure the containment of all drilling fluids and materials used or produced to the immediate drilling site, and will not dispose of such fluids or materials into any streams, canals, boreholes, wells, or other subsurface pathways. ()

23. Disinfection and Decontamination. Upon completion of a well, the driller is responsible for adding the appropriate amount of disinfecting chemical compound and distributing it throughout the well to achieve a uniform concentration for "in place" disinfection of the well. Chlorine compounds used in accordance with the table listed below will satisfy this requirement. Other methods may be used if approved by the Director in advance.

Amount of Chlorine Needed Per 100 Feet of Water in Well			
Casing Diameter (in.)	Gallons of water in casing per 100 ft. of water depth	Amount of 5.25% Sodium Hypochlorite (Unscented Laundry Bleach)	Amount of 65% Calcium Hypochlorite (Chlorine Granules)
6	147	2 ¼ cups	3 tbsp
8	261	4 cups	5 tbsp
10	408	6 ¼ cups	½ cup
12	588	9 cups	¾ cup
16	1044	1 gal	1 ¼ cup
Note: 1 gal = 4 qt = 8 pt = 16 cups; 1 cup = 16 tbsp			
Chlorine granules or tablets must be dissolved and placed into the well as a solution.			
If another concentration of hypochlorite solution is used, the following equation should be used for calculating amounts.			
(Volume of water in gallons) X (0.08) / % Hypochlorite (e.g. 50% = 50) = cups of hypochlorite			
Example: To treat 147 gallons of water using a 50% concentration of hypochlorite solution: (147 gallons water) X (0.08) / 50 = .23 (or approximately 1/4) cup of 50% Hypochlorite solution			

()

24. Sand Production. The maximum sand content produced from a well after initial well development must not exceed fifteen (15) ppm. For the purpose of this rule, sand is considered to be any sediment particle retained on a U.S. standard sieve #200 (seventy-five hundredths (0.075) mm to two (2) mm). ()

a. When necessary to mitigate sand production the well driller must: ()

i. Construct each well with properly sized casing, screen(s) or perforated intake(s); and ()

- ii. Install properly sized filter pack(s); or ()
 - iii. Install pre-packed well screens; or ()
 - iv. Employ other methods approved by the Director. ()
- b.** The Director may grant a waiver exempting a well producing water that exceeds the maximum sand content only if the well driller has met the requirements of Rule 25, Subsection 025.24.a. ()
- c.** Sand production in public water system wells. Wells used in connection with a public water system have more stringent requirements. See IDAPA 58.01.08, "Idaho Rules for Public Water Systems." ()

25. Well Development and Testing. For each well the well driller must measure and record the static (non-pumping) water level and the pumping water level, and the production rate. The production rate will be determined by a pump, bailer, air-lift, or other industry approved test of sufficient duration to establish production from the well. For wells with no returns the driller must report no returns and the static water level. This information must be documented on the well driller's report. ()

026. -- 029. (RESERVED)

030. CONSTRUCTION OF LOW TEMPERATURE GEOTHERMAL RESOURCE WELLS AND BONDING (RULE 30).

01. General. Drillers constructing low temperature geothermal resource wells (bottom hole temperature more than eighty-five (85) degrees Fahrenheit and less than two hundred twelve (212) degrees Fahrenheit) must be qualified under the Well Driller Licensing Rules. All low temperature geothermal resource wells must be constructed in such a manner that the resource will be protected from waste due to lost artesian pressure and temperature. The owner or well driller is required to provide bottom hole temperature data, but the Director may make the final determination of bottom hole temperature, based upon information available to him. ()

a. All standards and guidelines for construction and decommissioning (abandonment) of cold water wells apply to low temperature geothermal resource wells except as modified by Rule 30, Subsections 030.03, 030.04, and 030.06. ()

b. A drilling prospectus must be submitted to and approved by the Director prior to the construction, modification, deepening or decommissioning (abandonment) of any low temperature geothermal resource well. The well owner and the well driller are responsible for the prospectus and subsequent well construction. ()

02. Well Owner Bonding. The owner of any low temperature geothermal resource well must file a surety bond or cash bond as required by Section 42-233, Idaho Code, with the Director in an amount not less than five thousand dollars (\$5,000) nor more than twenty thousand dollars (\$20,000) payable to the Director prior to constructing, modifying or deepening the well after July 1, 1987. The bond amount will be determined by the Director within the following guidelines. The bond will be kept in force for one (1) year following completion of the well or until released in writing by the Director, whichever occurs first. ()

a. Any well less than three-hundred (300) feet deep with a bottom hole temperature of less than one hundred twenty (120) degrees Fahrenheit and a shut-in pressure of less than ten (10) pounds per square inch gage (psig) at land surface must maintain a bond of five thousand dollars (\$5,000). ()

b. The owner of any well three hundred (300) feet to one thousand (1,000) feet deep with a bottom hole temperature of less than one hundred fifty (150) degrees Fahrenheit and a shut-in pressure of less than fifty (50) psig at land surface must maintain a bond of ten thousand dollars (\$10,000). ()

c. The owner of any low temperature geothermal resource well not covered by Rule 30, Subsections 030.02.a. and 030.02.b. must maintain a bond of twenty thousand dollars (\$20,000). ()

d. The Director may decrease or increase the bonds required if it is shown to his satisfaction that well

construction or other conditions merit an increase or decrease. ()

e. The bond requirements of Section 42-233, Idaho Code, are applicable to wells authorized by water right permits or licenses having a priority date earlier than July 1, 1987, if the well authorized by the permit or license was not constructed prior to July 1, 1987 or if an existing well constructed within the terms of the permit or license is modified, deepened or enlarged on or after July 1, 1987. ()

03. Casing. Low temperature geothermal resource wells must be properly cased and sealed to protect from cooling by preventing intermingling with cold water aquifers. ()

a. Steel casing which meets or exceeds the minimum specifications for permanent steel casing of Rule 25, Subsection 025.04 must be installed in every well. The Director may require a more rigid standard for collapse and burst strength as depths or pressures may dictate. Every low temperature geothermal resource well which flows at land surface must have a minimum of forty (40) feet of conductor pipe set and cemented its entire length. ()

b. Casing must be installed from twelve (12) inches above land surface into the overlying confining strata of the thermal aquifer. The casing schedule may consist of several different casing strings (i.e. conductor pipe, surface casing, intermediate casing, production casing) which may all extend to land surface or may be overlapped and sealed or packed to prevent fluid migration out of the casing at any depth (Figure 13, Appendix A). ()

i. Low temperature geothermal resource wells less than one thousand (1,000) feet deep and which encounter a shut-in pressure of less than fifty (50) psig at land surface must have two (2) strings of casing set and cemented to land surface. Conductor pipe must be a minimum of forty (40) feet in length or ten percent (10%) of the total depth of the well whichever is greater. Surface casing must extend into the confining stratum overlying the aquifer. ()

ii. Low temperature geothermal resource wells one thousand (1,000) feet or more in depth or which will likely encounter a shut-in pressure of fifty (50) psig or more at land surface require prior approval of the drilling plan by the Director and must have three strings of casing cemented their total length to land surface. Conductor pipe must be a minimum length of forty (40) feet. Surface casing must be a minimum of two hundred (200) feet in length or ten percent (10%) of the total depth of the well, whichever is greater. Intermediate casing must extend into the confining stratum overlying the aquifer. ()

c. Subsection 030.03.b. may be waived if it can be demonstrated to the Director through the lithology, electrical logs, geophysical logs, injectivity tests or other data that formations encountered below the last casing string set, will neither accept nor yield fluids at anticipated pressure to the borehole. ()

d. A nominal borehole size of two (2) inches in diameter larger than the Outside Diameter (O.D.) of the casing or casing coupler (whichever is larger) must be drilled. All casing designations must be by O.D. and wall thickness and must be shown to meet a given specification of the American Petroleum Institute, the American Society for Testing and Materials, the American Water Works Association or the American National Standards Institute. The last string of casing set during drilling operations must, at the Director's option, be flanged and capable of mounting a valve or blow out prevention equipment to control flows at the surface before drilling resumes. ()

04. Sealing of Casing. All casing must be sealed its entire length with cement or a cement grout mixture unless waived by the Director. The seal material must be placed from the bottom of the casing to land surface either through the casing or tubing or by use of a tremie pipe. The cement or cement grout must be undisturbed for a minimum of twenty-four (24) hours or as needed to allow adequate curing. ()

a. A caliper log may be run for determining the volume of cement to be placed with an additional twenty-five (25%) percent on site ready for mixing. If a caliper log is not run, an additional one hundred (100%) percent of the calculated volume of cement must be on site ready for placement. ()

b. If there is no return of cement or cement grout at the surface after circulating all of the cement mixture on site, the Director will determine whether remedial work should be done to insure no migration of fluids around the well bore. ()

c. The use of additives such as bentonite, accelerators, retarders, and lost circulation material must follow manufacturer's specifications. ()

05. Blow Out Prevention Equipment. The Director may require the installation of gate valves or annular blow out prevention equipment to prevent the uncontrolled blow out of drilling mud and geothermal fluid. ()

06. Repair of Wells. The well driller must submit a drilling prospectus to the Director for review and approval prior to the repair or modification of a low temperature geothermal resource well. ()

07. Decommissioning (Abandoning) of Wells. Proper decommissioning (abandonment) of any low temperature geothermal resource well requires the following: ()

a. All cement plugs must be pumped into the hole through drill pipe or tubing. ()

b. All open annuli must be completely filled with cement. ()

c. A cement plug at least one hundred (100) feet in vertical depth must be placed straddling (fifty (50) feet above and fifty (50) feet below) the zone where the casing or well bore meets the upper boundary of each ground water aquifer. ()

d. A minimum of one hundred (100) feet of cement must be placed straddling each drive shoe or guide shoe on all casing including the bottom of the conductor pipe. ()

e. A surface plug of either cement grout or concrete must be placed from at least fifty (50) feet below the top of the casing to the top of the casing. ()

f. A cement plug must extend at least fifty (50) feet above and fifty (50) feet below the top of any liner installed in the well. The Director may waive this rule upon a showing of good cause. ()

g. Other decommissioning (abandonment) procedures may be approved by the Director if the owner or operator can demonstrate that the low temperature geothermal resource, ground waters, and other natural resources will be protected. ()

h. Approval for decommissioning (abandonment) of any low temperature geothermal well must be in writing by the Director prior to the beginning of any decommissioning (abandonment) procedures. ()

031. -- 034. (RESERVED)

035. HEALTH STANDARDS (RULE 35).

01. Public Water System Wells. In addition to meeting these standards, all wells that are constructed for public supply of domestic water must meet all of the requirements set forth by the Idaho Department of Environmental Quality Rules, IDAPA 58.01.08, "Idaho Rules for Public Drinking Water Systems." ()

02. Special Standards for Construction of Wells When Mineralized or Contaminated Water Is Encountered. Any time in the construction of a well that mineralized or contaminated water is encountered, the well driller must take the appropriate steps necessary to prevent the poor quality waters from entering the well or moving up or down the annular space around the well casing. The method employed to case and seal out this water will be determined by the well driller, provided all other minimum standards are met. The well driller will take special precautions in the case of filter-packed wells to prevent water of inferior quality from moving vertically in the filter packed portions of the well. All actions taken will be clearly documented on the well driller's report. ()

03. Distances From Contaminant Sources. All water wells constructed for domestic use must comply with minimum distances from septic tanks, drain fields, drainfield replacement area and other siting requirements as set forth in Rule 25, Subsection 025.01.d. ()

036. OWNERS RESPONSIBILITIES FOR WELL USE AND MAINTENANCE (RULE 36).

After a well is completed the well owner is responsible for water quality testing, properly maintaining the well, and reporting problems with a well to the Director. All wells must be capped, covered and sealed such that debris cannot enter the well, persons or animals cannot fall into the well, and water cannot enter the well around the outside of the casing. Pursuant to Section 42-1603, Idaho Code, the owner of any artesian well that will flow at land surface is required to apply to the Director for approval of a flow control device. ()

01. Use. The well owner must not operate any well in a manner that causes waste or contamination of the ground water resource. Failure to operate, maintain, knowingly allow the construction of any well in a manner that violates these rules, or failure to repair or properly decommission (abandon) any well as herein required will subject the well owner to civil penalties as provided by statute. ()

02. Maintenance. The well owner must: ()

a. Not allow modification to wells under their control without first obtaining an approved Idaho Department of Water Resources (IDWR) permit, pursuant to Section 42-235, Idaho Code; ()

b. Maintain the minimum casing height of twelve (12) inches above land surface and finished grade; ()

c. Maintain the appropriate well cap, and control device if required, according to these Rules; and ()

d. Not install or allow the installation of any well pump that would cause a violation of the sand production requirements in accordance with these Rules or allow the well to pump in excess of that allowed by a valid water right or domestic exemption. ()

e. Maintain the well to prevent waste or contamination of ground waters through leaky casings, pipes, fittings, valves, pumps, seals or through leakage around the outside of the casings, whether the leakage is above or below the land surface. Any person owning or controlling a non-compliant well must have the well repaired by a licensed well driller under a permit issued by the Director in accordance with these Rules. ()

03. New Construction. The well owner must not construct or allow construction of any permanent building, except for buildings to house a well or plumbing apparatus, or both, closer than ten (10) feet from an existing well. ()

04. Maintain All Other Separation Distances. The well owner must not construct or install, or allow the construction or installation of any object listed in a location closer than that allowed by the table of Rule 25, Subsection 025.01.d. ()

05. Unusable Wells. The well owner must have any unusable well repaired or decommissioned (abandoned) by a licensed well driller under a permit issued by the Director in accordance with these Rules. ()

06. Wells Posing a Threat to Human Health and Safety or Causing Contamination of the Ground Water Resource. The well owner must have any well shown to pose a threat to human health and safety or cause contamination of the ground water resource immediately repaired or decommissioned (abandoned) by a licensed well driller under a permit issued by the Director in accordance with these Rules. ()

037. -- 039. (RESERVED)

040. AREAS OF DRILLING CONCERN (RULE 40).

01. General. ()

a. The Director may designate an "area of drilling concern" to protect public health, or to prevent waste and contamination of ground or surface water, or both, because of factors such as aquifer pressure, vertical depth to the aquifer, warm or hot ground water, or contaminated ground or surface waters. ()

b. The designation of an area of drilling concern does not supersede or preclude designation of part or all of an area as a Critical Ground Water Area (Section 42-233a, Idaho Code), Ground Water Management Area (Section 42-233b, Idaho Code), or Geothermal Resource Area (Sections 42-4002 and 42-4003, Idaho Code). ()

c. The designation of an area of drilling concern can include certain aquifers or portions thereof while excluding others. The area of drilling concern may include low temperature geothermal resources while not including the shallower cold ground water systems. ()

02. Bond Requirement. ()

a. The minimum bond to be filed by the well driller with the Director for the construction or modification of any well in an area of drilling concern is ten thousand dollars (\$10,000) unless it can be shown to the satisfaction of the Director that a smaller bond is sufficient. ()

b. The Director may determine on a case-by-case basis if a larger bond is required based on the estimated cost to repair, complete or properly decommission (abandon) a well. ()

03. Additional Requirements. ()

a. A driller must demonstrate to the satisfaction of the Director that he has the experience and knowledge to adequately construct or decommission (abandon) a well which encounters warm water or pressurized aquifers. ()

b. A driller must demonstrate to the satisfaction of the Director that he has, or has immediate access to, specialized equipment or resources needed to adequately construct or decommission (abandon) a well. ()

041. -- 044. (RESERVED)

045. DRILLING PERMIT REQUIREMENTS (RULE 45).

01. General Provisions. ()

a. Drilling permits are required pursuant to Section 42-235, Idaho Code, prior to construction or modification of any well. ()

b. Drilling permits will not be issued for construction of a well which requires another separate approval from the department, such as a water right permit, transfer, amendment or injection well permit, until the other separate permitting requirements have been satisfied. ()

c. The Director may allow the use of a start card permit or give verbal approval to a well driller for the construction of cold water single family domestic wells. Start cards must be received by the Department at least two office hours prior to commencing construction of the well. ()

d. The Director may give verbal approval to a well driller for the construction of a well for which other permitting requirements have been met, provided that the driller or owner has filed the drilling permit application and appropriate fee. ()

e. The Director will not give a verbal approval or allow the use of a start card permit for wells constructed in a designated Area of Drilling Concern, Critical Ground Water Area, or Ground Water Management Area. ()

f. A well driller will not construct, drill or modify any well until a drilling permit has been issued, or verbal approval granted. ()

02. Effect of a Permit. ()

a. A drilling permit authorizes the construction or modification of a well in compliance with these rules and the conditions of approval on the permit. ()

b. A drilling permit does not constitute a water right, injection well permit or other authorization which may be required, authorizing use of water from a well or discharge of fluids into a well. ()

c. A drilling permit may not be assigned from one owner to another or from one driller to another. ()

d. A drilling permit authorizes the construction of one (1) well, except for blanket monitoring well and blanket remediation well drilling permits. ()

03. Exclusions. For the purposes of these Rules, artificial openings and excavations that do not constitute a well and are not subject to the drilling permit requirements must be modified, constructed, or decommissioned (abandoned) in accordance with minimum well construction standards. The Director may require decommissioning (abandonment) of artificial openings and excavations constructed pursuant to Rule 45, Subsection 045.03 of these rules, when the use ceases or if the holes may contribute to waste or contamination of the ground water. The following types of artificial openings and excavations are not considered wells: ()

a. Artificial openings and excavations with total depth less than eighteen (18) feet. ()

b. Artificial openings and excavations for collecting soil or rock samples, determining geologic properties, or mineral exploration or extraction, including gravel pits. ()

c. Artificial openings and excavations for oil and gas exploration for which a permit has been issued pursuant to Section 47-320, Idaho Code. ()

d. Artificial openings and excavations constructed for de-watering building or dam foundation excavations. ()

04. Converting an Artificial Openings or Excavations Not Constructed as a Well for Use as a Well. Artificial openings and excavations that were not constructed as a well pursuant to a drilling permit, if subsequently converted to obtain water, monitor water quantity or quality, or to dispose of water or other fluids, must be reconstructed by a licensed driller in compliance with well construction standards and drilling permit requirements. ()

05. Fees. ()

a. Drilling permit fees are as prescribed by Section 42-235, Idaho Code. ()

b. The difference between the drilling permit fee required by Section 42-235 Idaho Code as applicable, must be paid when an existing well constructed on or after July 1, 1987, for which the lower drilling permit fee was paid, is authorized by the Director for a use which would require the larger drilling permit fee. ()

046. -- 049. (RESERVED)

050. PENALTIES (RULE 50).

A person owning or controlling a well that allows waste or contamination of the state's ground water resources or causes a well not to meet the construction standards provided in these Rules is subject to the civil penalties as provided by statute. A driller who violates the foregoing provisions of these well construction standards Rules is subject to enforcement action and the penalties as provided by Statute. ()

051. -- 999. (RESERVED)

37.03.10 – WELL DRILLER LICENSING RULES

000. LEGAL AUTHORITY (RULE 0).

The Idaho Water Resource Board adopts these rules under the authority provided by Section 42-238, Idaho Code. ()

001. TITLE AND SCOPE (RULE 1).

01. **Title.** The title of this chapter is “Well Driller Licensing Rules.” ()

02. **Scope.** These rules establish the requirements and procedures for obtaining and renewing authorization to drill wells in the state of Idaho. The rules also establish the requirements and procedures for obtaining authorization to operate drilling equipment under the supervision of a licensed driller. The licensing rules are applicable to all individuals and companies drilling or contracting to drill wells. ()

002. OTHER AUTHORITIES REMAIN APPLICABLE (RULE 2).

Nothing in these rules limits the director’s authority to take alternative or additional actions relating to the licensing of well drillers and permitting of operators as provided by Idaho law. ()

003. -- 009. (RESERVED)

010. DEFINITIONS (RULE 10).

Unless the context otherwise requires, the following definitions govern these rules. ()

01. **Abandonment.** See Decommissioned Well. ()

02. **Adequate Supervision.** Inspection and observation of each drilling operation and the associated drilling site by the licensed driller that has responsible charge during the critical phases of drilling to assure compliance with well construction standards and drilling permit conditions. ()

03. **Applicant.** An individual that submits to the department a complete application for a license or operator’s permit or a company that submits a complete application for a license. ()

04. **Area of Drilling Concern.** An area designated by the director in accordance with Section 42-238, Idaho Code, within which special drilling procedures and equipment are needed to prevent waste or contamination of the ground water. ()

05. **Auxiliary Equipment.** Powered equipment, other than the drill rig, used for grouting, installing or advancing casing, welding casings and screens, and other tasks necessary for drilling a well. ()

06. **Board.** The Idaho Water Resource Board. ()

07. **Bond.** A cash or surety bond obtained by a licensed driller or company payable to the director to provide funding for abandonment or repair should the driller fail to comply with well construction standards, and to allow information to be collected concerning the drilling of the well if the driller fails to submit a timely, accurate driller’s report. ()

08. **Bottom Hole Temperature of an Existing or Proposed Well.** The temperature of the ground water encountered in the bottom of a well or borehole. ()

09. **Company.** A firm, co-partnership, corporation or association licensed in accordance with these rules to drill or contract to drill wells. ()

10. **Compliance History.** An applicant’s record of compliance with the laws and rules of Idaho and other states relating to drilling of wells. The record includes, but is not limited to, the applicant’s record of obtaining and complying with drilling permits; filing accurate and complete well driller’s reports on time; adhering to well construction standards and other rules relating to drilling; and the number, nature and resolution of violations of laws, rules and conditions on licenses, operator’s permits and drilling permits. ()

11. **Continuing Education.** Education or training pertinent to the drilling industry and the construction, modification or decommissioning of wells. ()

12. **Continuing Education Committee (CEC).** A committee whose purpose is to review and approve

- activities related to continuing education credit. ()
- 13. Credit Unit.** The unit of measurement for continuing education requirements. ()
- 14. Critical Phases of Drilling.** Drilling tasks that require the added experience of a licensed driller to assure completion of the well in accordance with the well construction standards and conditions of drilling permits. These tasks include, but are not limited to, placement of required casings and seals, testing of casings and seals, and resolving problems such as casing or joint failures, heaving formations, lost circulation, and encountering high pressure or high temperature water. ()
- 15. Decommissioned (Abandoned) Well.** Any well which has been permanently removed from service and filled or plugged in accordance with these rules so as to meet the intent of these rules. A properly decommissioned well will not: ()
- a.** Produce or accept fluids; ()
 - b.** Serve as a conduit for the movement of contaminants inside or outside the well casing; or ()
 - c.** Allow the movement of surface or ground water into unsaturated zones, into another aquifer, or between aquifers. ()
- 16. Department.** The Idaho Department of Water Resources. ()
- 17. Director.** The director of the Idaho Department of Water Resources or his duly authorized representative. ()
- 18. Drilling or Well Drilling.** The act of constructing a new well, or modifying, changing the construction, or decommissioning an existing well. ()
- 19. Drilling Permit.** Authorization by the department to drill a well as provided in Section 42-235, Idaho Code. ()
- 20. Drilling Site.** The location of the drill rig and immediate area where the drill rig and auxiliary equipment are set up to drill a well. ()
- 21. Global Positioning System (GPS).** A global navigational receiver unit and satellite system used to triangulate a geographic position. ()
- 22. License.** A certificate issued by the director to an individual or a company upon meeting the requirements of Section 42-238, Idaho Code, and these rules authorizing the drilling of wells permitted in accordance with Section 42-235, Idaho Code. ()
- 23. Licensed Driller.** An individual having a license to drill wells and is authorized and required to supervise operators in the state of Idaho. ()
- 24. Modify.** To deepen a well, increase or decrease the diameter of the casing or the well bore, install a liner, place a screen, perforate existing casing or liners, alter the seal between the casing and the well bore, or alter the well to not meet well construction standards. ()
- 25. Operator.** An individual holding either a class I or class II operator's permit issued in accordance with these rules. ()
- 26. Operator's Permit.** A certificate issued by the director upon meeting the requirements of Section 42-238, Idaho Code, and these rules allowing the holder to operate a drill rig as provided in these rules. ()
- 27. Principal Driller.** A licensed driller in responsible charge of a company's drilling activities, which has been designated the principal driller by the company with the department. ()

28. Responsible Charge. The responsibility for direction and control of a drilling operation to meet the requirements of these rules including, but not limited to, the following activities: ()

- a. Contracting to drill a well; ()
- b. Coordinate with property owner to locate a well to comply with applicable well construction standards; ()
- c. Setting up drilling equipment at the drilling site; ()
- d. Drilling operations; and ()
- e. Testing the adequacy of casing and seal; ()
- f. Properly completing the well. ()

29. Start Card. An expedited drilling permit process for the construction of cold water Single Family residential wells. ()

30. Well. An artificial excavation or opening in the ground more than eighteen (18) feet in vertical depth below land surface by which ground water of any temperature is sought or obtained. The depth of a well is determined by measuring the maximum vertical distance between the land surface and the deepest portion of the well. Any water encountered in the well is considered to be obtained for the purpose of these rules. Well also means any waste disposal and injection well as defined by Section 42-3902, Idaho Code. ()

31. Well Construction Standards. IDAPA 37.03.09, "Well Construction Standards Rules," adopted by the board. ()

32. Well Driller's Report or Driller's Report. A report required by Section 42-238, Idaho Code, describing drilling of the well and supplying information required on forms provided by the department. ()

33. Well Log. A diary maintained at the drilling site consistent with Section 42-238, Idaho Code. ()

34. Well Rig or Drill Rig. Any power-driven percussion, rotary, boring, digging, jetting, or augering machine used in the drilling of a well. ()

011. -- 019. (RESERVED)

020. APPLICABILITY OF LICENSING REQUIREMENTS (RULE 20).

01. Licensing Requirements. A well shall only be drilled by or under the responsible charge of a licensed driller except that a property owner, who is not licensed, can construct a well on his property for his own use without the aid of power-driven mechanical equipment. ()

02. Driller to Have Responsible Charge of Other Workers. A licensed driller shall have responsible charge of all others engaged in a well drilling operation. ()

03. Operators to Have Permits. An individual assisting a licensed driller whose duties include operation of a drill rig or auxiliary equipment shall possess an operator's permit as provided in these rules. If the driller is not present at the well site at all times that drilling operations are being conducted, one or more of those operating the equipment in the driller's absence shall have a class II operator's permit. The driller shall provide adequate supervision of class II operators. An individual having a class I operator permit shall be supervised by a licensed driller or a class II operator at all times when operating the drill rig or auxiliary equipment. ()

04. Laborer Exempted. An individual whose duties at the drilling site do not include operation of the drill rig or auxiliary equipment at any time is not required to have either a driller's license or an operator's permit.

()

05. Company to be Licensed. No company shall drill or contract to drill a well or wells unless the company has been issued a license and has employed a principal driller as described in accordance with these rules.

()

06. Drillers to Decommission (Abandon) Wells. Only licensed drillers may decommission (abandon) wells, except that wells may be decommissioned (abandoned) by the owner after receiving a specific waiver from the Director.

()

021. CONSTRUCTION AND USE OF HOLES THAT ARE NOT WELLS (RULE 21).

01. When a License Is Not Required. A person drilling a hole that does not meet the definition of a well does not need a driller's license or operator's permit.

()

02. Holes Not Defined as Wells. The following list describes the types of holes that are not wells for purposes of these rules:

()

a. Holes with total depth less than eighteen (18) feet.

()

b. Holes for collecting soil or rock samples, determining geologic properties, or mineral exploration or extraction, including gravel pits.

()

c. Holes for oil and gas exploration for which a permit has been issued pursuant to Section 47-320, Idaho Code.

()

d. Holes for constructing building foundations or de-watering building or dam foundation excavations.

()

e. Holes for the installation of standpipes or piezometers to monitor the saturation of dam embankments or foundations or to measure uplift forces on buildings, dams and other structures.

()

03. Converting a Hole Not Constructed as a Well for Use as a Well. A hole that was not constructed as a well by or under the responsible charge of a driller, if subsequently converted to obtain water, to monitor water quantity or quality, or to dispose of water or other fluids, shall be reconstructed by a driller to comply with well construction standards and drilling permit conditions. The owner shall obtain a drilling permit, a water right or other approval if needed, and have the hole inspected and modified by a licensed driller as necessary to meet well construction standards. The driller shall file a driller's report for the well.

()

022. -- 029. (RESERVED)

030. OBTAINING A LICENSE FOR AN INDIVIDUAL DRILLER (RULE 30).

01. Application Requirements. An individual desiring a license shall file with the department a completed application on a form provided by the department accompanied by the following:

()

a. The application fee required by Section 42-238, Idaho Code.

()

b. Written documentation of drilling experience, compliance history, and the names and addresses of three (3) references to confirm the applicant's drilling experience.

()

c. A list of all drill rigs used by or under the responsible charge of the applicant providing the make, model, and type.

()

d. The names and addresses of all licensed drillers and permitted operators that will work under the responsible charge of the applicant.

()

02. Experience Requirements. ()

a. An applicant shall have a minimum of twenty-four (24) months of drilling experience. An applicant will be credited with one (1) month of drilling experience for each one hundred sixty (160) hours of employment as a driller or operator, or the equivalent, as determined by the director. Experience drilling monitoring wells, geothermal wells or other cased wells will be credited as experience by the Director if the equipment and drilling methods are applicable to water well construction. ()

b. An applicant for driller's license shall submit evidence to establish that the applicant, as an operator or driller, has successfully constructed a sufficient number of wells within the preceding twenty-four (24) months to demonstrate competency. Evidence of this experience can be demonstrated by the submission of driller's reports bearing the applicant's signature, well reports upon which the driller having responsible charge attests that the applicant drilled the wells or other documentation acceptable to the director. ()

c. Twelve (12) of the twenty-four (24) months drilling experience must have occurred within the five (5) year period immediately preceding the filing of the application. ()

d. Successful completion of classroom study in geology, well drilling, map reading, and other related subjects may be substituted for up to, but not exceeding, twelve (12) months of drilling experience. The director will determine the number of months of classroom study, up to twelve (12), to be credited as experience. ()

03. Examination. An applicant determined by the director to have adequate experience and an acceptable compliance history, as confirmed by references acceptable to the director, is eligible to take a written examination. The examination may include separate sections and shall test the applicant's knowledge of the following: ()

a. Idaho statutes and rules relating to appropriation and use of ground water, well drilling, construction and use of injection wells and geothermal wells, and well driller licensing under the provisions of Title 42, Idaho Code. ()

b. Land description by government lot, quarter-quarter, section, township and range, and the use of portable GPS units. ()

c. Geologic material identification including the use of correct terminology in describing the geologic material. ()

d. Well construction principles relating to the proper design, construction, development, and abandonment of wells. ()

e. The occurrence, nature, and movement of ground water. ()

f. The use of various types of drill rigs and auxiliary equipment. ()

031. OBTAINING A LICENSE FOR A COMPANY (RULE 31).

01. Application Requirements. A company shall file with the department a complete application for a company license upon a form provided by the department to be accompanied by the following: ()

a. The names and addresses of three (3) persons not affiliated with the company, whom the department can contact for information regarding the company's past well drilling operations, if any, and related business activities. ()

b. A complete record of the compliance history of the company and the owners and employees of the company. ()

c. Designation of a principal driller who shall be a full time employee of the company and shall drill wells only for the company. A licensed driller who renders only occasional, part-time or consulting drilling services to or for a company may not be designated as the principal driller. ()

- d. The names and addresses of drillers and operators presently employed. ()
 - e. A list of all drill rigs and other related equipment owned or used by the company providing the make, model, and type. ()
- 02. Application Processing.** Applications received under this rule will be processed in accordance with Rule 33. ()

032. OBTAINING AN OPERATOR’S PERMIT (RULE 32).

01. Application for Class I Operator’s Permit. A licensed driller or company proposing to employ a class I operator shall submit a completed application on a form provided by the director. The application shall: ()

- a. Be accompanied by the fee required by Section 42-238, Idaho Code. ()
- b. Be signed by the individual seeking the operator’s permit and the licensed driller or principal driller of the company proposing to employ the operator. ()

02. Application for Class II Operator’s Permit. A licensed driller or company proposing to employ an individual who does not currently hold a class II operator’s permit shall submit the following: ()

- a. A completed application on a form provided by the department. ()
- b. The fee required by Section 42-238, Idaho Code. No fee is required if the applicant is presently permitted as a class I operator, but the expiration date of the permit when converted to a class II operator’s permit will remain as originally issued. ()
- c. Documentation that the operator has successfully constructed a sufficient number of wells, or has constructed wells for a sufficient length of time, or a combination of both to demonstrate competency. ()

03. Written Examination. An examination is not required for a class I operator’s permit. An otherwise qualified applicant for a class II operator’s permit shall obtain a satisfactory score on an examination as provided in Rule 34. The examination may be comprised of separate sections and shall test the applicant's knowledge of the following: ()

- a. Idaho statutes and rules relating to appropriation and use of ground water, well drilling, construction and use of injection wells and geothermal wells, and well driller licensing under the provisions of Title 42, Idaho Code. ()
- b. Land description by government lot, quarter-quarter, section, township, and range, and the use of portable GPS units. ()
- c. Geologic material identification including the use of correct terminology in describing geologic material. ()
- d. Well drilling principles relating to proper design, construction, development, and abandonment of wells. ()
- e. The occurrence, nature, and movement of ground water. ()

04. Operator Drills Only for Licensed Driller or Company. An operator shall only drill for the licensed driller or company approved by the director. If an operator changes employment to another licensed driller or company, an application for an operator’s permit shall be filed as provided in this rule. ()

05. Processing an Application for Operator’s Permit. The department will process an application

for operator's permit in accordance with Rule 33. ()

033. PROCESSING APPLICATION FOR A DRILLER'S LICENSE OR OPERATOR'S PERMIT (RULE 33).

01. Incomplete Application. If an application is incomplete, not properly signed, or does not include the information required by these rules, the department will advise the applicant in writing of the deficiency. If the deficiencies are not satisfied within ninety (90) days of sending the notice of the deficiency, the application will be void. The application fee is not refundable. ()

02. Issuance of License. If the director, upon review of the application, determines that an applicant for license is qualified and the driller has subsequently taken and passed an examination, a notice will be sent to the applicant requesting a bond in an amount determined in accordance with Rule 60 be filed with the department. Upon receipt of a satisfactory bond, the director will issue a license to the applicant. ()

03. Issuance of Operator's Permits. If the director determines that an applicant is qualified and has passed an examination, if required, the department will mail a notice and operator's permit card to the principal driller on behalf of the applicant. ()

04. Driller's License or Operator's Permit Issued With Conditions or Denial of License or Operator's Permit. The Director may issue a license or operator's permit with specific conditions or limitations based on the applicant's experience and compliance history. The Director may refuse to issue or renew a driller's license permanently or for a designated period of time if the driller has previously constructed wells improperly or constructed a well without a valid driller's license. If the Director determines that the applicant is not qualified, the Director will deny the application. Notice of a denied application or a conditioned license or operator's permit will be given to the applicant in accordance with IDAPA 37.01.01, "Rules of Procedure of the Idaho Department of Water Resources." ()

034. EXAMINATION PROCEDURES (RULE 34).

01. Written Examination. Written examinations will be offered at department offices on the first Monday of each quarter. If the first Monday is a legal holiday, written examination will be offered on the first Tuesday. Re-examination may be taken at a regularly scheduled examination date during a following quarter and shall be scheduled with the department office originally testing the applicant. ()

02. Oral Examination. Successful passage of an oral examination may satisfy all or a part of the written testing requirements under the following circumstances: ()

a. The applicant requests an oral rather than a written examination and shows cause acceptable to the director why the examination should be oral rather than written. Applicants desiring to take the examination orally shall request that an oral examination be scheduled allowing at least fifteen (15) days to set an examination date. ()

b. The director determines that because of the applicant's compliance history, additional testing is needed to determine the applicant's qualifications. ()

03. Examination Scoring. The applicant shall pass each section of the examination with a score of seventy percent (70%) or higher. ()

04. Assistance Must Be Authorized. The use of written materials, equipment or other individuals to assist an applicant during an examination is prohibited unless specifically authorized by the department. An applicant receiving unauthorized assistance during an examination may be disqualified and the application may be rejected. An application filed by a disqualified applicant will not be processed for a period of up to one (1) year from the time of disqualification. ()

035. EXPIRATION AND RENEWAL OF LICENSE (RULE 35).

01. Expiration of Licenses. All licenses expire at the end of the licensing period for which they are issued. The licensing period begins April 1 and ends March 31 of the second year following issuance. ()

02. Renewal Application. A license may be renewed by submitting a license renewal application including the following: ()

a. A completed application on a form provided by the department. An application to renew a license for an individual licensed driller shall be signed by the individual and an application to renew a license for a company shall be signed by the principal driller. ()

b. The renewal fee required by Section 42-238, Idaho Code. ()

c. A new bond or continuation certificate for an existing bond covering the licensed driller or company. ()

d. If the application is for renewal of a license held by an individual, the application shall include verification that the applicant has obtained the required continuing education credits. ()

03. Continuing Education Requirements. Fourteen (14) credit units are required for renewal of a license for an individual for any licensing period beginning on or after April 1, 2011. ()

04. Welding Competency. A driller that has been issued a Notice of Violation for welding that does not comply with the well construction standards may be required to obtain a certificate of welding competency from the American Welding Society or similar organization. ()

036. EXPIRATION AND RENEWAL OF AN OPERATOR'S PERMIT (RULE 36).

01. Expiration of Operator's Permits. Class I and class II operator's permits shall expire on March 31 of the same year that the license of the licensed driller and company employing the operator expires. ()

02. Renewal Application. An operator's permit may be renewed by submitting to the department an application for renewal including the following: ()

a. A completed application on a form provided by the department. The operator seeking renewal and the driller under whose responsible charge the operator works shall sign the form. ()

b. The renewal fee required by Section 42-238, Idaho Code. ()

c. For renewal of a class II operator's permit, verification of the required continuing education credit units. ()

03. Continuing Education Required for Renewals. Fourteen (14) credit units are required for renewal of a class II operator's permit for a licensing period beginning on or after April 1, 2011. ()

04. Welding Competency. An operator's work that has resulted in a Notice of Violation for welding that does not comply with the Well Construction Standards may be required to obtain a certificate of welding competency from the American Welding Society or similar organization. ()

037. PROCESSING APPLICATION TO RENEW LICENSE OR OPERATOR'S PERMIT (RULE 37).

01. Processing Applications for Renewal. Applications for renewal will be processed in the order received by the department. The department shall receive a complete application for renewal no later than March 15 to assure that the license or operator's permit will remain in force without interruption. If the director determines that the application is complete and the applicant is qualified, the license or operator's permit will be renewed for the period ending on March 31 of the second year after approval of the renewal. ()

02. Regulatory Compliance Required for Renewals. A license or operator's permit will not be renewed if the applicant has not submitted all required driller's reports, applications for drilling permits, fees, agreed

civil penalties, has not complied with all orders requiring repair or abandonment of improperly constructed wells or is not otherwise in compliance with Sections 42-235 and 42-238, Idaho Code, and the applicable rules. ()

03. Compliance History. If the Director determines that the applicant has exhibited an unacceptable compliance history, the Director may deny renewal, refuse renewal for a specified time, or renew with conditions, including but not limited to an increased bond amount. ()

04. Renewal of Expired Licenses or Operator's Permits. A license or an operator's permit which has expired or otherwise not been in effect for a period not exceeding three (3) years shall be renewed in accordance with the requirements of Rule 35 or Rule 36 as appropriate. An applicant for renewal shall provide verification of earned credit units required for the entire period since the license or class II operator's permit was last issued. If a license or operator's permit has been expired or otherwise not effective for a period of more than three (3) years, an application for a new license shall be submitted in accordance with Rule 30 for an individual license, Rule 31 for a company or Rule 32 for an operator's permit. The director may waive the examination requirement if the applicant has been previously licensed or permitted in the state of Idaho. ()

05. Reuse of Identification Numbers. The identification number assigned to a license by the department will not be reused if the license has been expired or otherwise not in effect for three (3) years or more except, at the director's discretion, the number may be reissued to the original owner. ()

06. Condition or Denial of an Application for Renewal. If the Director determines that the applicant has not or cannot fully comply with these rules, a license or operator's permit may be issued with conditions. If the Director determines that the applicant is not qualified, the Director will deny the application. When there are documented violations of well drilling laws and/or rules, including well construction standards, the Director may consult with the Driller's Advisory Committee, created in accordance with Rule 80, prior to making a decision to issue a conditional license or operator's permit or to deny an application based on the applicant's compliance history. Notice of a denied application or a conditioned license will be given as provided in IDAPA 37.01.01, "Rules of Procedure of the Idaho Department of Water Resources." ()

038. -- 049. (RESERVED)

050. DUTIES AND RESPONSIBILITIES OF DRILLERS, COMPANIES AND OPERATORS (RULE 50).

01. Licensed Drillers and Principal Drillers. All licensed drillers and principal drillers shall: ()

a. Allow drilling only by those authorized by and under the supervision required by these rules and according to any conditions of the license or permit. ()

b. Complete each well in compliance with IDAPA 37.03.09, "Well Construction Standards Rules," and drilling permit conditions. ()

c. Have a valid cash or surety bond in effect, as defined in Rule 60. ()

d. Have the license number displayed in a conspicuous place on the drill rig using a metal identification plate provided by the department or other permanent marking approved by the director. The displayed license number shall represent the company or individual driller license under which the well is being drilled. One plate will be issued upon initial licensure with replacement and additional plates available for a fee. ()

e. Keep current the department's list of operators and drillers employed by the licensed driller or company, including current addresses for the company, drillers, and operators. The licensed driller or principal driller shall be held responsible for all drilling activity of a driller or operator under their supervision until such notification has been submitted in writing to the department that the driller or operator is no longer employed by the licensed driller or company. ()

f. Have at the drilling site the driller's license and drilling permit or other written authorization from the director to drill the well. ()

g. Only drill wells in contaminated areas identified by the department or in areas of drilling concern so designated by the department with specific written authorization of the director. Verbal authorizations to drill and pre-approved drilling permits (start cards) do not authorize drilling in these areas. ()

h. Only drill a public drinking water supply well, as defined in IDAPA 58.01.08, "Idaho Rules for Public Drinking Water Systems," low temperature geothermal resource or geothermal resource well with specific written authorization from the director. Verbal authorizations and start card permits (start cards) are not authorized for these uses. ()

i. Monitor and record bottom-hole temperature in areas where low temperature geothermal resources are known or suspected or when the well is being constructed pursuant to IDAPA 37.03.09, Rule 30, as a low temperature geothermal resource well. Bottom-hole temperature of every well being constructed pursuant to IDAPA 37.03.09, Rule 30, must be measured, recorded, and reported on the well drillers report. ()

j. Maintain a daily well log at the drilling site acceptable to the department and as required by Section 42-238(11), Idaho Code. Pertinent data required to be recorded on the daily log must include information sufficient to complete a well drillers report acceptable to the Director. The driller shall retain the well log for at least one (1) year after the driller's report is submitted to the department. ()

k. Submit driller's reports, acceptable to the Director, on forms approved by the department within thirty (30) days following removal of the drill rig from the drilling site at completion of the well. Driller's reports shall be prepared from information recorded on the daily well log. Driller's reports returned to the driller due to deficiencies must be corrected and returned to the department within thirty (30) days of mailing by the department. ()

l. Attach a well tag supplied by the department to every well drilled for which a drilling permit is required. The tag shall be affixed permanently to the casing, or other permanent object attached to the well, by a method approved by the Director prior to removing the well rig from the drilling site. ()

m. Cause all drilling activity under the supervision of the driller to cease when the driller's license expires, becomes invalid, or is suspended or revoked. ()

02. Companies. Companies shall: ()

a. Have a principal driller designated with the department at all times. ()

b. Notify the department within ten (10) days of the principal driller leaving employment with the company. The company's license shall immediately become void and of no effect when the principal driller leaves employment with the company and shall remain so until the department has been notified in writing that a new principal driller has been employed and designated by the company. Failure to designate a principal driller within ninety (90) days of the departure of the designated principal driller is cause for the director to take action to cancel the company's license. ()

c. Maintain a bond in force at all time as required in Rule 60. ()

03. Operators. Operators shall: ()

a. Have in their possession a valid operator's permit while drilling wells. ()

b. Only drill wells as authorized by the operator's permit. ()

c. Maintain a complete and accurate well log at the drilling site. ()

d. Co-sign with the driller a driller's report upon completion of the well. ()

051. -- 059. (RESERVED)

060. BONDING (RULE 60).

01. Bonding Requirements. Each licensed driller or company shall submit a surety bond or cash bond in an amount determined by the director, within the limits of 42-238, Idaho Code, for each driller employed by the company, payable to the director for the licensing period. ()

a. A company shall have a bond, which covers the drilling activities of each driller and operator employed by the company. If the licensed driller drills wells as an individual and not for a company, a separate bond must be filed with the director. ()

b. Drillers proposing to drill wells in an area of drilling concern, monitoring wells, public water supply wells, or wells to obtain or likely to encounter water with a bottom hole temperature greater than eighty-five (85) degrees Fahrenheit, shall submit an upgraded bond, in an amount determined by the director, at the time the drilling permit application is processed. Drillers anticipating drilling such wells may, instead, submit adequate bonding at the time of driller license application or renewal. ()

c. The amount of the bond, within the limits prescribed in Section 42-238, Idaho Code, will be determined by the director based on the applicant's compliance history, the size and depth of wells the applicant proposes to construct and is authorized to drill, the complexity of the wells, the resource to be recovered, the area of operation of the applicant, the number of drillers and operators employed by a company, and other relevant factors. ()

d. All bonds and continuation certificates must be on forms provided or approved by the department. ()

02. Cash Bonds. ()

a. Acceptable Cash Bonds. Cash bonds shall be in a separate account readily accessible to the director for use as provided in these rules. The director will review cash bond proposals made by an applicant. Cash bonds shall be retained in financial institutions within the state of Idaho unless waived by the director. ()

b. Retention. The director will hold cash bonds for two (2) years from the date the driller requests that the bond be released unless replaced by another bond or the director determines that all wells drilled by the driller satisfy well construction standards. The release of a cash bond must be requested in writing. ()

03. License Void Without Bond. If the issuing company cancels a bond, the bond expires or otherwise becomes non-effective during the term of a license, the license shall immediately become void and of no further effect until an adequate replacement bond is received by the department. ()

061. -- 069. (RESERVED)

070. CONTINUING EDUCATION (RULE 70).

01. Requirements. Every licensed driller or permitted operator must have earned at the time of renewal the applicable number of credit units required by these rules. The credit units shall have been obtained during the licensing period preceding the application for renewal. ()

02. Earning Credit Units. Credit units may be earned for time spent in attendance at workshops, seminars, short courses, and other educational opportunities devoted to drilling or related subjects acceptable to the Director and approved by the continuing education committee (CEC) and in compliance with the CEC guidelines. These may include completion of college courses, correspondence courses, videotaped courses, and other endeavors such as authoring appropriate publications. ()

03. Documentation. Documentation to support credit units claimed is the responsibility of the licensed driller and permitted operator. Records required include but are not limited to: ()

a. A log showing the type of activity claimed, sponsoring organization, duration, instructor's name,

and credit units. ()

b. Attendance verification records in the form of completion certificates or other official documents providing evidence of attendance and completion. ()

04. Submittal and Maintenance of Records. Copies of continuing education records for the preceding license period shall be submitted with applications to renew licenses or permits. These records shall be maintained for a period of three (3) years and shall be available for review by the department at the request of the director. ()

05. Insufficient Credit Units. If at the time of renewal, the applicant is unable to provide verification of the required credit units, the director will deny renewal of the driller's license or operator's permit, except as otherwise provided in the following: ()

a. The director may withhold action on an application for renewal for a period not to exceed ninety (90) days to allow the applicant to provide verification of the required credit units. The applicant is not authorized to drill until the verification is provided and the renewal is issued. ()

b. The director may exempt an applicant from all or part of the continuing education requirements if the applicant served on active duty in the armed forces of the United States for one hundred twenty (120) consecutive days or more during the licensing period prior to filing the application for renewal; or the applicant suffered physical disability, serious illness, or other extenuating circumstances that prevented the applicant from earning the required units. ()

c. A licensed driller or operator who has chosen to allow his license or permit to expire or otherwise become of no effect shall be exempt from continuing education requirements unless an application for renewal is filed less than three (3) years after the license or permit expired or otherwise became of no effect. ()

06. Out-of-State Residents. The continuing education requirements for a non-resident applicant for a license or operator's permit shall be the same as for resident applicants. ()

07. Responsibility for Education Development and Implementation. The Idaho Ground Water Association (IGWA) is delegated responsibility to develop and implement a program for continuing education for review and approval by the director. ()

071. CONTINUING EDUCATION COMMITTEE CONTINGENCY PLAN (RULE 71). Should the memorandum of understanding (MOU) and/or the contract between the department and the IGWA be breached, revoked, or not renewed, the CEC shall be organized and administered by the department. ()

072. -- 079. (RESERVED)

080. DRILLER'S ADVISORY COMMITTEE (RULE 80).

01. Selection and Duties. The Director may appoint a driller's advisory committee from the list of drillers holding valid licenses. The Director will solicit appointment recommendations from the IGWA and other licensed drillers. The Director will determine the term of appointment for members of the committee. The committee shall provide recommendations and suggestions concerning revision of these rules, the minimum standards for well construction, significant violations and other matters regarding well drilling. The committee members shall serve on a voluntary basis without compensation. The department will hold meetings at the discretion of the Director. ()

02. Reimbursement. Travel costs shall be paid to members of the advisory committee for travel and per diem and for costs associated with attendance of advisory committee meetings held by the department. Reimbursement shall be based on existing department policy covering travel and per diem expenses. ()

081. -- 089. (RESERVED)

090. ENFORCEMENT (RULE 90).

01. Violations. Violations of these rules or Sections 42-235 or 42-238, Idaho Code, will be enforced as provided in Sections 42-238 and 42-1701B, Idaho Code. ()

02. Enforcement Policy. An administrative policy providing guidelines for enforcement shall be published and maintained by department staff. A copy of the enforcement guidelines is available upon request at no charge. ()

091. -- 999. (RESERVED)

IDAPA 38 – DEPARTMENT OF ADMINISTRATION

DOCKET NO. 38-0000-2000F

NOTICE OF OMNIBUS RULEMAKING – ADOPTION OF PENDING FEE RULE

EFFECTIVE DATE: This rule has been adopted by the agency and is now pending review by the 2021 Idaho State Legislature for final approval. Pursuant to Section 67-5224(5)(c), Idaho Code, this pending rule will not become final and effective until it has been approved by concurrent resolution of the legislature because of the fee being imposed or increased through this rulemaking. The pending fee rule becomes final and effective upon adoption of the concurrent resolution or upon the date specified in the concurrent resolution unless the rule is rejected.

AUTHORITY: In compliance with Section 67-5224, Idaho Code, notice is hereby given that this agency has adopted a pending fee rule. The action is authorized pursuant to Section, 67-5708, Idaho Code.

DESCRIPTIVE SUMMARY: The following is a concise explanatory statement of the reasons for adopting the pending fee rule and a statement of any change between the text of the proposed rule and the text of the pending fee rule with an explanation of the reasons for the change.

This pending fee rule adopts and re-publishes the following existing rule chapter previously submitted to and reviewed by the Idaho Legislature under IDAPA 38, Rules of the Department of Administration:

IDAPA 38

- 38.04.04, *Rules Governing Capitol Mall Parking.*

There are no changes to the pending fee rule and it is being adopted as originally proposed. The complete text of the proposed rule was published in the Sept. 16, 2020, Idaho Administrative Bulletin, [Vol. 20-9SE, pages 2152-2161](#).

FEE SUMMARY: The following is a specific description of the fee or charge imposed or increased. This rulemaking does not impose a fee or charge, or increase a fee or charge, beyond what was previously approved and codified in the prior rules. Fee charges are necessary to fund security and maintenance of Capitol Mall parking lots and structures. Reserved parking fees are \$35 per month to an amount not-to-exceed \$40 and general permit fees are \$8.00 to an amount not-to-exceed \$10.00. This fee or charge is being imposed pursuant to Section 38.04.04, Idaho Code.

FISCAL IMPACT: The following is a specific description, if applicable, of any negative fiscal impact on the state general fund greater than ten thousand dollars (\$10,000) during the fiscal year: This rulemaking is not anticipated to have any fiscal impact on the state general fund because the FY2021 budget has already been set by the Legislature, and approved by the Governor, anticipating the existence of the rules and fees being reauthorized by this rulemaking.

ASSISTANCE ON TECHNICAL QUESTIONS: For assistance on technical questions concerning this pending fee rule, contact Keith Reynolds, (208) 332-1811.

Dated this 18th day of November, 2020.

Keith Reynolds, Director
Department of Administration
650 W. State Street
P.O. Box 83720
Boise, ID 83720-0024

IDAPA 38 – DEPARTMENT OF ADMINISTRATION

38.04.04 – RULES GOVERNING CAPITOL MALL PARKING

000. LEGAL AUTHORITY.

The following rules are promulgated pursuant to the authority of Section 67-5708, Idaho Code, and Senate Concurrent Resolution No. 135 (1976). ()

001. TITLE AND SCOPE.

01. **Title.** These rules are titled IDAPA 38.04.04, “Rules Governing Capitol Mall Parking.” ()

02. **Scope.** These rules govern parking in the Capitol Mall. ()

002. -- 009. (RESERVED)

010. DEFINITIONS.

01. **Capitol Mall.** The Capitol Mall consists of the following buildings: State Capitol (700 W. Jefferson Street), Joe R. Williams (700 W. State Street), Len B. Jordan (650 W. State Street), State parking garage #1 (550 W. State Street), Pete T. Cenarrusa (450 W. State Street), Division of Public Works (502 N. 4th Street), Alexander House (304 W. State Street), State Library (325 W. State Street), 954 Jefferson (954 W. Jefferson Street), Capitol Annex (514 W. Jefferson Street), Blind Commission (341 W. Washington Street), Borah Building (304 N. 8th Street), State Parking Garage #2 (608 W. Washington Street); and Idaho Supreme Court (451 W. State Street). ()

02. **Capitol Mall Employee.** A state employee whose assigned work area is in the Capitol Mall, and who receives a state of Idaho-issued paycheck from a tenant of the Capitol Mall. ()

03. **Carpool.** A vehicle carrying two (2) or more Capitol Mall employees who work at the Capitol Mall at least four (4) work days per week. ()

04. **Employee with a Disability.** An employee with a disability as defined in Section 49-117(7)(b), Idaho Code. ()

05. **Executive Branch Departments.** Pursuant to Section 67-2402, Idaho Code, and for purposes of this rule, the following are the departments of the executive branch: Department of Administration, Department of Agriculture, Department of Commerce, Department of Correction, Department of Environmental Quality, Department of Finance, Department of Fish and Game, Department of Health and Welfare, Idaho State Police, Idaho Transportation Department, Industrial Commission, Department of Insurance, Department of Juvenile Corrections, Department of Labor, Department of Lands, Department of Parks and Recreation, Department of Revenue and Taxation, State Board of Education and Department of Water Resources. This definition excludes the Department of Self-Governing Agencies. ()

06. **Facilities Services.** Bureau of Facilities Services, Division of Public Works, Department of Administration. ()

07. **General Parking.** A parking space used for all Capitol Mall employees registered for general parking. ()

08. **Legislative Personnel.** An employee hired by the Legislative branch that receives a state of Idaho-issued paycheck during the Legislative session or is a year round employee of the Legislative branch. ()

09. **Legislator.** A member of the Idaho Senate or the Idaho House of Representatives for the state of Idaho. ()

10. **Reserved Parking.** A parking space assigned to a specific person, vehicle or agency. ()

11. **State Elected Officials.** The governor, lieutenant governor, secretary of state, attorney general, state controller, state treasurer and superintendent of public instruction, for the state of Idaho. ()

12. **Temporary Contract Employee.** An employee of a temporary employment service company who

is working temporarily for a tenant of the Capitol Mall, and who does not receive a pay check issued by the state of Idaho. ()

13. Visitor. Any person visiting the Capitol Mall to carry out state business or attend a state-sponsored event. ()

011. -- 019. (RESERVED)

020. PARKING LOT LOCATIONS.

All Capitol Mall parking lots will be identified by signage. Capitol Mall Parking manages the state-owned parking lots at the following locations: 550 W. State Street Parking Garage, State Parking Garage #1; 608 W. Washington Street, State Parking Garage #2; 10th and Jefferson Streets, 8th Street between State and Jefferson Streets, and 3rd and Washington Streets. Capitol Mall Parking also manages parking spaces in and around the following Capitol Mall buildings: Capitol Annex, Len B. Jordan, Pete T. Cenarrusa, Division of Public Works, Borah Building and Idaho State Library. ()

021. TYPES OF AVAILABLE PARKING.

Designated parking spaces are available for reserved parking, state elected officials and directors of executive branch departments, Legislators, carpool, disabled employees and state agency vehicles. All other parking spaces, unless designated as public or visitor parking, are considered general parking. ()

022. PARKING SPACE ALLOCATION.

01. Reserved Parking Spaces. ()

a. Reserved parking spaces are available for state elected officials and directors of executive branch departments as defined in Subsections 010.05 and 010.11 of these rules. Capitol Mall Parking will assign a reserved space to each state elected official and director of executive branch departments upon request. ()

b. Reserved parking spaces will be made available to the Senate pro-tem, and the speaker of the House of Representatives. Capitol Mall Parking will assign a reserved space to each individual. ()

c. All other Capitol Mall employees may apply for a reserved parking space. General reserved parking spaces are assigned to Capitol Mall employees on a first-come, first-served basis when designated reserved parking spaces become available. ()

d. Reserved parking spaces for state elected officials, directors of executive branch departments and Capitol Mall employees are located in the following parking lots only: the first floor of State Parking Garage #1; the first and second floors of State Parking Garage #2, the Pete T. Cenarrusa Building parking lot, and the 8th Street parking lot between State and Jefferson Streets. ()

e. Capitol Mall Parking will determine the location of all reserved parking spaces. ()

f. Reserved parking spaces for state elected officials, directors of executive branch departments and Capitol Mall employees will not exceed twenty-five percent (25%) of parking spaces available within the Capitol Mall. ()

g. Capitol Mall employees may not sell, trade or barter the right to use their assigned reserved parking space. Capitol Mall Parking retains the right to assign, reassign, suspend or revoke Capitol Mall employees' reserved parking spaces at any time. ()

02. Legislators' Parking Spaces. During Legislative sessions and special sessions, Capitol Mall Parking will make available up to one hundred three (103) reserved Legislator parking spaces to Legislators. ()

a. Each Legislator will be assigned a reserved Legislator parking space. A Legislator who elects to park in the Capitol Mall is required to pay the fee for the reserved parking permit. ()

b. During the Legislative session, Legislator reserved parking spaces will be on the third floor of State Parking Garage #1, 8th Street parking lot, and the Capitol Annex parking lot and will be clearly marked. The Legislator reserved parking permit is only valid in the assigned reserved parking space; the permit is not valid in any other CMP general parking space during the Legislative session. When the Legislature is not in session, all Legislator parking spaces will be redesignated as general parking spaces. ()

c. When the Legislature is not in session, Legislators or Legislative personnel who hold a valid Capitol Mall parking permit, may park in any general parking space. ()

03. Disabled Employee Parking Spaces. Capitol Mall Parking will make available reserved disabled employee parking spaces for employees who have a proven disability. ()

a. A temporarily or permanently disabled employee who has obtained an Americans with Disabilities Act (ADA) placard issued by the Idaho Transportation Department may request a reserved disabled employee parking space as close as possible to the employee's work location. ()

b. A disabled employee requesting a reserved disabled employee parking space must provide either a copy of his Americans with Disabilities Act (ADA) placard issued by the Idaho Transportation Department or a copy of the application to the Idaho Department of Transportation for an Americans with Disabilities Act (ADA) placard. ()

c. A temporary reserved disabled employee parking space will be provided to any eligible employee who has applied for an Americans with Disabilities Act (ADA) placard with the Idaho Department of Transportation but has not yet received the placard. A temporary reserved disabled parking space will be made available for five (5) working days only per disabled employee. ()

d. Reserved disabled employee parking spaces will be marked with signage. ()

e. A permit for a reserved disabled employee parking space will be the same fee as a permit for a general parking space. ()

04. Carpool Parking Spaces. Capitol Mall Parking will make available an indeterminate number of carpool parking spaces, which will be clearly marked, to employees who carpool at least four (4) work days per week. ()

a. Capitol Mall employees who carpool may request a carpool parking permit from Capitol Mall Parking to use a designated carpool space. ()

b. Carpool parking spaces will be available on a first-come, first-served basis for vehicles carrying two (2) or more Capitol Mall employees. All carpooling employees must be employees of the Capitol Mall and at least one (1) carpooling employee must have a general parking space permit. ()

c. A permit for a carpool parking space will be the same fee as a permit for a general parking space. ()

d. All unoccupied reserved carpool parking spaces will be redesignated as general parking spaces after 9 a.m. work days. ()

e. It is a parking violation to park in a reserved carpool parking space when the vehicle is carrying less than two (2) Capitol Mall employees before 9 a.m. ()

05. State-Owned Vehicles Parking Spaces. Capitol Mall Parking will make available designated state-owned vehicle parking spaces. ()

a. Capitol Mall Parking will make available an indeterminate number of designated state-owned vehicle parking spaces to department tenants of the Capitol Mall. ()

b. Designated state-owned vehicle parking spaces will be on the fifth level of the State Parking Garage #1, and will be clearly marked "State Vehicle Only." ()

c. A Capitol Mall employee may park his personal vehicle in a designated state-owned vehicle parking space when removing a state vehicle for state purposes. The Capitol Mall employee's personal vehicle must display the reserved state-owned vehicle parking space permit. ()

d. A visiting agency employee conducting official business at the Capitol Mall may park a state vehicle in an unoccupied designated state-owned vehicle parking space or in any Capitol Mall visitor parking space. ()

06. Motorcycle Parking Spaces. Capitol Mall Parking will make available designated motorcycle parking spaces. ()

a. Capitol Mall employees may request a special motorcycle parking permit for motorcycles, at no additional cost, to park in the designated motorcycle parking areas. ()

b. In order to receive a motorcycle permit, the Capitol Mall employee must possess a valid general or reserved parking permit. ()

07. General Parking Spaces. All other undesignated parking is considered general parking. ()

a. All Capitol Mall employees whose parking fees are deducted from their paychecks by the State Controller's Office may request a general parking permit from Capitol Mall Parking. ()

b. General parking spaces are available on a first-come, first-served basis, and possession of a valid general parking permit does not guarantee the Capitol Mall employee a general parking space. ()

08. Visitor Parking Spaces. Capitol Mall Parking will make available a limited number of parking spaces for visitors and the public visiting the Capitol Mall. ()

a. Non-metered three (3) hour visitor parking spaces will be available at the parking lot at the Capitol Annex at 514 W. Jefferson Street and on the south side of the parking lot at the State Library Building at 325 W. State Street, and will be clearly marked. ()

b. State-owned vehicles that do not belong to the departments' tenants of the Capitol Mall, and non-Capitol Mall employees visiting the Capitol Mall on business, may park in visitor parking spaces. ()

c. Capitol Mall employees may not park in visitor parking spaces between 6 a.m. and 6 p.m., Monday through Friday, excluding legal holidays with the exception of Human Rights Day and Presidents' Day. ()

d. The maximum period of use of visitor parking spaces in the Capitol Mall is three (3) hours per day per vehicle. A change from one visitor parking space to another visitor parking space does not increase the maximum period of use for each vehicle beyond three (3) hours per day. ()

023. -- 029. (RESERVED)

030. PARKING PERMITS. Capitol Mall Parking will issue applicable parking permits to all eligible persons who apply for a permit. ()

01. Parking Permits for Reserved, Legislator, Disabled Employee, Carpool, State-Owned Vehicles and General Parking. ()

a. Capitol Mall Parking will reissue parking permits once a year. Outdated parking permits must be returned to Capitol Mall Parking. ()

b. Capitol Mall Parking will issue the applicable parking permit to each Capitol Mall state elected

official, director of an executive branch department, Legislator or employee, with the exception of the carpool parking permit and the special motorcycle parking permit. ()

c. Capitol Mall Parking will issue only one (1) parking permit per employee. Capitol Mall Parking will not provide duplicate general parking permits. State elected officials, directors of executive branch departments, and Capitol Mall employees with reserved parking spaces may request a duplicate reserved parking permit for a one-time fee equal to the general permit monthly fee. ()

d. All individuals and department tenants are responsible for displaying the parking permit in the front windshield or other prominent location of the parked vehicle at all times. ()

e. In the event that a parking permit is stolen, lost or destroyed, the official, Legislator or employee must sign a statement attesting that the parking permit was lost, stolen or destroyed and pay a replacement fee before Capitol Mall Parking will issue a new permit. The replacement fee is equal to the general permit monthly fee. ()

02. Temporary Monthly Parking Permits. ()

a. An individual performing work or providing services to a department tenant as a Temporary Contract Employee in the Capitol Mall, but who does not receive a state of Idaho-issued paycheck, may purchase a general monthly parking permit at the same cost as a general parking permit from Capitol Mall Parking. ()

b. Upon request and receipt of the general parking permit fee, Capitol Mall Parking may issue a monthly general parking permit to the following: ()

i. Individuals who do not receive a paycheck issued by the state of Idaho but are performing work or providing services to a department tenant in the Capitol Mall. This includes, but is not limited to, employees of the Idaho Central Credit Union, employees of vendors of the Commission for the Blind and Visually Impaired, and Capitol Mall tenant departments' temporary contract employees. ()

ii. Individuals who are employed by the state of Idaho, whose assigned work area is in the Capitol Mall, and who receive a state of Idaho-issued paycheck that is not issued by the State Controller's Office. This includes, but is not limited to, employees of the University of Idaho whose assigned work area is the Capitol Annex occupied by the University of Idaho. ()

03. Temporary Meeting Parking Permits. Upon submission of an application by a department tenant in the Capitol Mall, Capitol Mall Parking may issue temporary daily parking permits for meetings hosted by the department tenant. Parking will be allowed only in a limited number of parking spaces in the area designated by the permit and for the date set forth on the permit. ()

031. PARKING PERMIT FEES.

Pursuant to Sections 67-5701 and 67-5708, Idaho Code, parking permit fees will be established by the Department of Administration and administered by Capitol Mall Parking. ()

01. Elected Officials Parking Permits. The governor, lieutenant governor, secretary of state, attorney general, state controller, state treasurer, superintendent of public instruction, Senate pro-tem, and the speaker of the House of Representatives will be provided a reserved parking space at no charge. Additionally, upon request, Capitol Mall Parking will provide the governor four (4) additional reserved parking spaces. The fee for each additional reserved parking space provided to the governor will be the reserved parking permit monthly fee. ()

02. Directors of Executive Branch Departments. Directors of executive branch departments will be provided a reserved parking space at a cost not to exceed forty dollars (\$40) per month. Executive branch departments will be charged for the reserved parking spaces annually by Capitol Mall Parking. ()

03. Reserved Parking Permits. The fee for a reserved parking space permit will not exceed forty dollars (\$40) per month. ()

04. General Parking Permits. The fee for a general parking space permit will not exceed ten dollars (\$10) per month. ()

05. Payment for Parking Permits. Capitol Mall employees will be charged the respective permit fee in the first paycheck of each month through a payroll deduction or as determined by the State Controller. ()

06. Legislators. Legislators who request a Legislator parking space permit must pay the parking permit fee. Legislators and Legislative personnel who request parking spaces must pay the associated space fee for every month that the Legislature is in session. ()

07. State-Owned Vehicles. State-owned vehicles belonging to the tenant departments will receive state vehicle parking permits for a monthly fee not to exceed fifteen dollars (\$15). ()

08. Replacement Permits. If a parking permit is lost, stolen or destroyed, the official, Legislator, or Capitol Mall employee will be charged a fee equal to the general permit monthly fee for a new permit. A statement attesting that the parking permit was lost, stolen or destroyed must be signed before Capitol Mall Parking will issue a new permit. ()

032. -- 039. (RESERVED)

040. PARKING LOT VIOLATIONS.

01. Driving Violations. Any driving violation in a Capitol Mall parking lot or garage may result in the suspension or loss of parking privileges. ()

a. It is a violation of these rules to drive or operate a personal vehicle negligently or recklessly in any Capitol Mall parking lot or garage. It is a violation of these rules to drive or operate a vehicle under the influence of illegal substances or alcohol in any Capitol Mall parking lot or garage. ()

b. It is a violation for any individual to drive above the posted speed limits or drive against posted directional arrows. ()

02. Parking Violations. Any parking violation in a Capitol Mall parking lot or garage may result in the suspension or loss of parking privileges. ()

a. It is a violation of these rules to park in a location that is not marked as a parking space within the Capitol Mall. This includes, but is not limited to, parking in or on a driveway, sidewalk or other common driving areas of any parking lot or garage. It is also a violation to park one (1) vehicle in more than one (1) parking space. ()

b. It is a violation to park in a Legislator parking space without displaying the appropriate reserved parking permit during the Legislative session or to park in a general parking space without displaying the appropriate general parking permit. ()

c. It is a violation to park in a reserved parking space, in a reserved disabled employee parking space, ADA space, or in a reserved carpool parking space before 9 a.m., without displaying the appropriate parking permit. ()

d. It is a violation to park a motorcycle in any space not designated for motorcycle parking, unless a valid reserved parking permit is displayed and the motorcycle is parked in the designated reserved parking space. ()

e. It is a violation to park or store a personal trailer in a Capitol Mall parking lot. ()

f. It is a violation of these rules to: ()

i. Use an invalid parking permit; ()

- ii. Use a parking permit reported lost or stolen; ()
- iii. Fail to properly display a valid Capitol Mall parking permit; or ()
- iv. Transfer an invalid permit to another person. ()
- g.** It is a violation of these rules to park in one or more visitor parking spaces for a period in excess of the maximum period of use set forth in these rules. ()
- h.** It is a violation of these rules for a CMP permit holder to park in a visitor parking space at any time. ()

03. Other Violations. The Capitol Mall parking lots and garages are private property, and any tampering or other physical defacement of any vehicle parked on the lots or in the garage is considered a violation. ()

a. The distribution of flyers or other materials on vehicles parked on Capitol Mall parking lots and in State Parking Garages #1 and #2 is prohibited, and violators will be escorted off the property. ()

b. Any individual engaging in suspicious activity or threatening behavior, or an individual loitering in a Capitol Mall parking lot or in State Parking Garages #1 and #2, will be escorted off the property. ()

c. Public access is not allowed in State Parking Garages #1 and #2 before 6 a.m. and after 6 p.m. Violators will be considered trespassers. ()

04. Administrative Appeals. Alleged violations of these rules are not subject to the provisions of Title 67, Chapter 52, Idaho Code, regarding administrative appeals. ()

041. ENFORCEMENT.

01. Security and Patrol. Capitol Mall parking lots and State Parking Garages #1 and #2 are secured and patrolled by Capitol Mall Parking, or its authorized representative. ()

02. Notice of Violation. Upon witnessing or finding a violation of these rules, Capitol Mall Parking, or its authorized representative, will leave notice with the occupant of the vehicle or on the vehicle parked in violation of these rules. ()

a. Notice may be in the form of a warning or a ticket. The warning or ticket will indicate the date and hour of the violation, the nature of the violation, and the name of the Capitol Mall Parking employee or its authorized representative. A warning or ticket may be issued only for those violations that do not cause the loss of a parking space and do not cause a safety hazard. ()

b. A ticket may be issued by Capitol Mall Parking, or its authorized representative, for a fine of at least two dollars (\$2), but not more than twenty-five dollars (\$25). ()

c. If an individual is determined to have altered, counterfeited or otherwise misused a parking permit, a ticket may be issued by Capitol Mall Parking, or its authorized representative, for a fine not to exceed fifty dollars (\$50). ()

d. All tickets issued by Capitol Mall Parking, or its authorized representative, will be forwarded to the city of Boise, county of Ada, for collection or prosecution. ()

e. Capitol Mall Parking retains the right to suspend or revoke an individual's parking privileges if the warnings or tickets have been issued or fines imposed for repeated violations. ()

042. SUSPENSION OR REVOCATION OF PARKING PRIVILEGES.

01. Delinquent Payment. Capitol Mall Parking may suspend or revoke any individual's parking permit if the parking permit fee is unpaid and at least thirty (30) days delinquent. Upon payment in full, Capitol Mall Parking will restore the individual's parking permit. ()

02. Parking Privileges Suspension. ()

a. Capitol Mall Parking may suspend an individual's parking permit and privileges for up to six (6) months for a violation of these rules. ()

b. Any Capitol Mall Parking permit holder, including a temporary parking permit holder, who has been cited for three (3) violations of these rules within six (6) months, may have his parking permit and privileges revoked for up to twelve (12) months. ()

03. Towing and Impounding. ()

a. Capitol Mall Parking or its authorized representative may tow any vehicle from any Capitol Mall parking lot or the or State Parking Garages #1 and #2, belonging to an individual who has been cited for three (3) or more Capitol Mall parking violations within a twelve-month period. The owner of the vehicle is liable for any service fee owed for releasing the towed and impounded vehicle. ()

b. In the event that a vehicle is considered a security risk, Capitol Mall Parking will make reasonable efforts to locate the owner of the vehicle before it is towed. ()

04. Reactivating a Suspended Permit. A suspended parking permit may be reactivated after the applicable suspension period ends by reapplying for the automatic payroll deduction plan through Capitol Mall Parking and paying in full of any delinquent parking fees. ()

043. SURRENDER OF PARKING PERMIT.

01. Surrender of Permit. When an official, Legislator or Capitol Mall employee no longer works in the Capitol Mall or no longer needs to utilize Capitol Mall parking, the individual must submit a request to Capitol Mall Parking to cease automatic payroll deduction or billing for Capitol Mall parking. The individual must surrender the parking permit to Capitol Mall Parking within ten (10) days of the effective date of termination. ()

02. Cancellation of Automatic Payroll Deduction. ()

a. Capitol Mall Parking will notify the individual's agency's payroll clerk to cease the monthly parking fee deduction. Capitol Mall Parking will not refund a monthly parking fee after a monthly payroll deduction has been made. ()

b. Agency payroll clerks must receive a written request from Capitol Mall Parking prior to deleting the monthly parking fee from the employee's payroll deduction schedule. ()

044. -- 049. (RESERVED)

050. LOADING ZONE PARKING SPACES.

Capitol Mall Parking will designate and mark a limited number of parking spaces to be used for short-term collection or delivery services or by authorized service contractors. It is a violation to park in loading zone parking spaces for any unauthorized purpose. ()

051. WAIVER OF RULES.

Pursuant to Section 67-5708, Idaho Code, the administrator for the Division of Public Works may waive any or all of the provisions of these rules if the administrator determines that application could result in discrimination among employees or otherwise violate law. ()

052. -- 999. (RESERVED)

IDAPA 39 – IDAHO TRANSPORTATION DEPARTMENT

DOCKET NO. 39-0000-2000F

NOTICE OF OMNIBUS RULEMAKING – ADOPTION OF PENDING FEE RULE

EFFECTIVE DATE: This rule has been adopted by the agency and is now pending review by the 2021 Idaho State Legislature for final approval. Pursuant to Section 67-5224(5)(c), Idaho Code, this pending rule will not become final and effective until it has been approved by concurrent resolution of the legislature because of the fee being imposed or increased through this rulemaking. The pending fee rule becomes final and effective upon adoption of the concurrent resolution or upon the date specified in the concurrent resolution unless the rule is rejected.

AUTHORITY: In compliance with Section 67-5224, Idaho Code, notice is hereby given that this agency has adopted a pending fee rule. The action is authorized pursuant to Sections 40-312 and 49-201, Idaho Code.

DESCRIPTIVE SUMMARY: The following is a concise explanatory statement of the reasons for adopting the pending fee rule and a statement of any change between the text of the proposed fee rule and the text of the pending fee rule with an explanation of the reasons for the change.

This pending fee rule adopts and re-publishes the following existing rule chapter previously submitted to and reviewed by the Idaho Legislature under IDAPA 39, rules of the Idaho Transportation Department:

IDAPA 39

- 39.02.04, *Rules Governing Manufacturer & New Vehicle Dealer Hearing Fees;*
- 39.02.05, *Rules Governing Issuance of Certificate of Title;*
- 39.02.22, *Rules Governing Registration and Permit Fee Administration;*
- 39.02.26, *Rules Governing Temporary Vehicle Clearance for Carriers;*
- 39.02.41, *Rules Governing Special Provisions Applicable to Fees for Services;*
- 39.02.60, *Rules Governing License Plate Provisions;* and
- 39.03.03, *Rules Governing Special Permits – General Conditions and Requirements.*

There are no changes to the pending fee rule and it is being adopted as originally proposed. The complete text of the proposed rule was published in the Sept. 16, 2020, Idaho Administrative Bulletin, [Vol. 20-9SE, pages 2162-2209](#).

FEE SUMMARY: The following is a specific description of the fee or charge imposed. This rulemaking does not impose a fee or charge, or increase a fee or charge, beyond what was previously approved and codified in the prior rules. The fee or charge being imposed is pursuant to Sections of Idaho Code.

39.02.04, Rules Governing Manufacturer and New Vehicle Dealer Hearing Fees: ITD is required to collect filing fees for hearings when requested by a franchised dealer over disputes with a manufacturer. The Department is required to collect the fees, appoint a hearing officer and ensure all legal expenses including a court reporter, hearing transcripts and witness fees are reimbursed to the Department. Although the Department is not a party to the dispute, Idaho Code and this rule facilitate the hearing process between franchisees and manufacturers. The deposited fee of \$2,000 is utilized to cover initial expenses incurred by the Department. Any remaining part of the deposit is refunded to the dealer and additional expenses are billed to the responsible party. (See §49-1617, Idaho Code).

39.02.05, Rules Governing Issuance of Certificate of Title: The \$25 fee assessed under this rule is for an inspection of a vehicle to be performed by the Department's Motor Vehicle Investigators on vehicles with a special construction; including glider kits, replicas, street rods, replica street rods, assembled vehicles and specially constructed vehicles. This fee covers administrative costs of the Motor Vehicle Investigator for the physical inspection of the vehicle and preparation of necessary documents for the owner to obtain a title from the Department with the correct physical classification of the vehicle. (See §49-504 and §49-525, Idaho Code).

39.02.22, Rules Governing Registration & Permit Fee Administration: This rule provides for installment payment plans for commercial motor vehicle registrations. It covers administrative costs for services provided by the Department, which includes a \$50 fee for setting up each installment payment plan. To reinstate a payment plan that has been suspended, a \$40 fee is required. If there are insufficient funds, the rule allows the Department to collect a \$20 insufficient funds fee and provides the Department with the ability to collect a \$40 fee for reinstatement of a revoked or suspended commercial motor vehicle registration. (See §49-434, Idaho Code).

39.02.26, Rules Governing Temporary Vehicle Clearance for Carriers: This rule allows the Department to authorize and issue temporary clearance for a carrier who needs to immediately operate a commercial motor vehicle and who is in the process of obtaining and submitting requirements for full issuance of vehicle registration and license plates. This temporary permit provides for a 45-day intermediate clearance at a cost of \$18. (See §49-501, Idaho Code).

39.02.41, Rules Governing Special Provisions Applicable to Fees for Services: This rule includes fees associated with the costs of providing records (typically bulk data) for requestors other than law enforcement and specified state agencies which receive records free of charge. Depending on the format and nature of the records requested, there is a base charge of \$75. (See §49-201, Idaho Code).

39.02.60, Rules Governing License Plate Provisions: This rule encompasses several license plate programs and their identifiers/formats. It provides for dealer and loaner license plates, standard license plates, restricted vehicle license plates, transporter and wrecker license plates, the personalized plate program criteria, legislatively sponsored license plates and many others. Most fees for plate programs are set in Idaho Code; however there are two that are not and they are established by rule. For vehicle dealer registration and plates, the fee is \$15 annually or the dealer may purchase single trip permits. These are only valid on boat and utility trailers for demonstration purposes. The other fee within this rule is \$12 for standard sample plates to pay for the production of the plate and administrative fees. (See §49-202, Idaho Code).

39.03.03, Rules Governing Special Permits – General Conditions and Requirements: This is a new rule that was part of the Department’s efforts to consolidate and streamline commercial motor vehicle permit rules and was presented during the 2019 legislative session. The fees set in this rule cover a variety of commercial motor vehicle permits. These fees simply cover administrative costs for processing, issuing and enforcing special permits. This program is revenue-neutral. (See §49-1004, Idaho Code).

FISCAL IMPACT: The following is a specific description, if applicable, of any negative fiscal impact on the state general fund greater than ten thousand dollars (\$10,000) during the fiscal year: This rulemaking is not anticipated to have any fiscal impact on the state general fund because the FY2021 budget has already been set by the Legislature, and approved by the Governor, anticipating the existence of the rules and fees being reauthorized by this rulemaking.

ASSISTANCE ON TECHNICAL QUESTIONS: For assistance on technical questions concerning this pending fee rule, please contact Ramón Hobdey-Sánchez at (208) 334-8810.

Dated this 16th day of October, 2020.

39.02.04 – RULES GOVERNING MANUFACTURER AND NEW VEHICLE DEALER HEARING FEES

000. LEGAL AUTHORITY.

This rule is adopted under the authority of Sections 49-201 and 49-1617(4), Idaho Code, and the Vehicle Dealer Act, Chapter 16, Title 49, Idaho Code. ()

001. TITLE AND SCOPE.

This rule is titled IDAPA 39.02.04, “Rules Governing Manufacturer and New Vehicle Dealer Hearing Fees,” and clarifies the process of collecting filing fees for hearings conducted by the Department for settling disputes between manufacturers and new vehicle dealers. ()

002. -- 099. (RESERVED)

100. GENERAL PROVISIONS.

01. Hearing Officer Appointment. The Director will appoint a hearing officer to hear the dispute who is not a current employee of either a manufacturer or dealer. ()

02. Location of Hearings. All hearings will be held in Ada County, Boise, Idaho. ()

03. Hearing Filing Fee. The dealer requesting a hearing shall deposit a filing fee of two-thousand dollars (\$2,000) with the Department. The Department shall apply the filing fee toward the hearing costs which shall include: ()

a. The hearing officer fee and expenses; ()

b. Department legal expenses; ()

c. Department investigative expenses pertaining to the dispute; ()

d. A court recorder, hearing transcript, any witness fees; and ()

e. Other Department verifiable expenses. ()

04. Hearing Fee Refunds and Additional Charges. If the total verifiable costs of the hearing are less than two-thousand dollars (\$2,000), the Department shall refund the balance. If the costs exceed the two-thousand dollars (\$2,000) filing fee, the Department shall bill the responsible party for the remainder which is payable after the Department renders a decision. ()

101. -- 999. (RESERVED)

39.02.05 – RULES GOVERNING ISSUANCE OF CERTIFICATES OF TITLE

000. LEGAL AUTHORITY.

Under the authority of Sections 49-201, 49-504, 49-507 and 49-525, Idaho Code, the Department adopts the following rule. ()

001. TITLE AND SCOPE.

01. Title. These rules shall be cited as IDAPA 39.02.05 “Rules Governing Issuance of Certificates of Title.” ()

02. Scope. These rules identify requirements for the issuance of certificates of title, pursuant to Title 49, Chapter 5, Idaho Code. ()

003. – 009. (RESERVED)

010. DEFINITIONS.

01. Appropriate Governmental Entity. The agency or organization employing the authorized officers who take an abandoned vehicle into custody or direct a vehicle to be stored or towed. ()

02. Assembled Vehicle. A vehicle which has been constructed using parts from two (2) or more vehicles and has the same appearance as a vehicle that was manufactured under a specific make and model by a manufacturer. Changes may include frame and/or cab changes. See Section 305 for title application requirements. ()

03. Body/Center Passenger Area. The center structure, either of a unibody or frame-type passenger vehicle, consisting of a unit of sheet metal and structural components that extends from the firewall to the back of the rear seat or to the factory seam separating the rear section or the centerline of the rear wheels, i.e. cowl panel, dash panel, floor pans, center side body panels, side rails, rocker panels, and other such component parts that may be pertinent to this section. ()

04. Brand. A description on a certificate of title or title record, as determined by the Department or the equivalent agency of another jurisdiction, which indicates and advises future owners and interested parties that: ()

a. The vehicle has or has had a relevant physical condition, modification, construction, alteration or history of use; or ()

b. Past or present ownership of the vehicle could not be clearly established to the satisfaction of the Department or the equivalent agency of another jurisdiction. ()

05. Cab. The passenger compartment of a common truck or pickup truck. It is a unit of sheet metal and structural components including the top/roof and the cowl which may or may not include glass, instrumentation, steering column and seat. ()

06. Frame. The heavy metal structure that supports the auto body and other external component parts on body-over-frame constructed vehicles only. ()

07. Gray Market Vehicle. A vehicle manufactured outside of the U.S. for use in other countries that did not meet U.S. Federal Motor Vehicle Safety Standards or Environmental Protection Agency requirements at the time of manufacture. ()

08. Mileage. Actual distance that a vehicle has traveled. ()

09. Replica Street Rod. A vehicle made to replicate any pre-1949 vehicle which has had a significant drive train update from a more modern vehicle. Changes may include engine, transmission, rear axle and other suspension components. The body will resemble the same as the manufacturer's original issue. See Section 305 for title application requirements. ()

10. Street Rod Vehicle. Any pre-1949 manufactured vehicle which has had a significant drive train update from a more modern vehicle. Changes may include engine, transmission, rear axle, and other suspension components. The body will be the same as the manufacturer's original issue. See Section 305 for title application

requirements. ()

11. Transferee. Any person to whom the ownership of a motor vehicle is transferred, or any person who, as agent, accepts transfer of ownership of a motor vehicle for another, by purchase, gift or any means other than creation of a security interest. ()

12. Transferor. Any person who transfers vehicle ownership or any person who, as agent, transfers the ownership of another's motor vehicle by sale, gift or any means other than creation of a security interest. ()

011. – 099. (RESERVED)

100. GENERAL.

The Department will issue a Certificate of Title on any vehicle if the applicant can show proper documentation of ownership, there are no undisclosed security interests in the vehicle, and other requirements for titling have been satisfied. Unless otherwise specified in statute or administrative rule, such proper documentation of ownership will be limited to: ()

01. Certificate of Title. A valid Idaho Certificate of Title or a valid Certificate of Ownership issued by another state, province or country according to the applicable laws of another state, province or country, which has been duly assigned or transferred to the applicant if issued in another's name. ()

02. MCO/MSO. A properly executed Manufacturer's Certificate of Origin (MCO) or Manufacturer's Statement of Origin (MSO) in the case of a new vehicle being titled for the first time. ()

03. Certificate of Registration. A Certificate of Registration from a non-titling state, province or country, together with a bill of sale from the registrant if other than the applicant. ()

04. Transfer by Operation of Law. In the case of a transfer by operation of law, a certified copy of a valid court order, decree, or instrument upon which the claim of possession and ownership is founded, passing title to the applicant as a matter of law (for example: a property settlement, divorce decree, or execution sale's certificate of sale or bill of sale), together with an affidavit by the person or agent of the person to whom possession of the vehicle so passed, setting forth facts entitling him to possession and ownership. ()

05. Salvage Vehicles. For a salvage vehicle, a salvage certificate of title or other salvage ownership document issued by another state, province, or country according to the applicable laws of that state, province, or country, duly assigned or transferred to the applicant if issued in another's name. ()

06. Specially Constructed Vehicles. ()

a. For a specially constructed vehicle as defined by Section 49-123(p)(i) or (iii), Idaho Code, the original ownership document for the vehicle from which the body or cab being used has been taken unless the vehicle is from a state that requires the ownership document to remain with the frame in which case a copy of the ownership document verified to be a true and correct copy of the original, together with a bill of sale from the owner to whom the ownership document was issued if different than the applicant, and a bill of sale, invoice, or other proof of acquisition for any of the following major components used in the vehicle's construction: ()

i. Frame or rails; ()

ii. Engine or short block; ()

iii. Transmission and/or transfer case; ()

iv. Front and rear clips; or ()

v. Truck bed or box; ()

b. Each bill of sale for major component parts is to include the following: ()

- i. Name of purchaser; ()
 - ii. Vehicle Identification Number (VIN) or engine number for a motorcycle, if applicable; ()
 - iii. Description of major component part (by make, body type, year of manufacture, if applicable); ()
 - iv. Purchase price; and ()
 - v. Signature of seller. ()
- c.** For a specially constructed vehicle as defined by Section 49-123(p)(ii), Idaho Code, bills of sale, receipts, invoices or other proof of acquisition for the materials used in the construction. ()
- d.** For a specially constructed vehicle as defined by Section 49-123(p)(iv), Idaho Code, a properly executed manufacturer's certificate of origin (MCO) or manufacturer's statement of origin (MSO) for the custom kit, or if no MCO was issued, a factory invoice or bill of sale from the selling dealer, together with a statement certifying no MCO was issued for the kit. ()

101. – 199. (RESERVED)

200. LIEN FILING.

01. Date of Lien Filing. All title applications submitted to the Department or its agent for filing will include the date of filing. ()

a. If a lien is listed on a title application, the date the application is received by the Department or its agent will be the date of the filing of the lien. ()

b. A lien is perfected as of the date of the filing of a properly completed application with the department or an agent of the department. All liens filed with the department will take priority according to the order in which the properly completed applications are filed with the department or an agent of the department. The priority of liens will not be affected should the department fail to note one or more on the title or on the electronic records of the department due to error. ()

02. Out-of-State Transfer. If a lien was previously recorded on an out-of-state title, and the title is being surrendered to Idaho for issuance of a new certificate of title and the lien is still in effect, the Department will honor the previously recorded date shown on the out-of-state title, provided that at least one of the previous owners' names will remain on the new Idaho title. If there is no recorded date on the title, the following will be captured as the recorded date if displayed on the title with priority according to the order listed: ()

a. Application date; ()

b. Issue date; and ()

c. Print date ()

d. If none of the aforementioned dates are present, the Department will consider other evidence provided in the documentation submitted with the title application to determine a filing date. ()

e. In the event that no other evidence is provided to reasonably determine the date of the lien's filing, the date the title application is filed with the Department will be the recorded date. ()

03. Name Change Only. If a name change is being requested on a title containing a recorded lien, and the lien is not being released, the original recorded date will be retained for the lien filing, provided that the new title will retain the name of the same lienholder and at least one (1) of the previous owners. ()

04. Taxable Transfer of Ownership. In the case of a taxable transfer of ownership, where the lien was not released, and the new title will have the same lienholder, a new recorded date will be assigned to the lien, unless the lienholder has specified that the new owners have assumed the lien. ()

05. Lien Assumptions. If a lienholder specifies that a contract has been assumed by a new owner, and the new owner has assumed the terms of the previous lien, the original date will be retained on the new certificate of title. ()

201. ODOMETERS.

01. Procedures. ()

a. Department Requirement. The Department will enter the odometer reading and status as provided by a dealer or private seller or transferor on the Certificate of Title when printed unless previously recorded as exempt with no reading. ()

b. Used Vehicle Transferor/Seller Requirements. When a used vehicle is transferred, the transferor will record the odometer reading on the title certificate using indelible ink. If the vehicle has not been titled or if the title does not contain a space for the information required, the written disclosure will be executed as a separate statement. ()

c. New Vehicle Transferor/Seller Requirements. When a new vehicle is retailed, the transferor will provide a written disclosure on the MCO or on a separate document. ()

d. Use of Power of Attorney. When the transferor's title is physically held by a lienholder or if the transferor to whom the title was issued has lost the title and the transferee obtains a duplicate title on behalf of the transferor; the transferor may give a power of attorney to his transferee for the purposes of mileage disclosure. ()

e. Reassignments. When all available reassignments on a title certificate have been used, subsequent reassignments will be made on a separate reassignment document printed by the Department or by another state's motor vehicle Department. ()

02. Exemptions. ()

a. Transferor/Seller Exemptions. A transferor is not required to disclose the vehicle's odometer reading for any of the following: ()

i. A vehicle having a gross vehicle weight rating over sixteen thousand (16,000) pounds; ()

ii. A vehicle which is not self-propelled; ()

iii. A vehicle sold directly by the manufacturer to any agency of the United States in conformity with contractual specifications; ()

iv. A vehicle which is ten (10) years old or older. To calculate the vehicle's age, simply subtract the model year from the calendar year; or ()

b. Manufacturers' Exemptions. A manufacturer of a new vehicle may transfer, for purposes of resale, to a franchised dealer without disclosure of the vehicle's odometer. ()

202. VEHICLE IDENTIFICATION NUMBER (VIN) INSPECTIONS.

01. Authorized Inspectors. The following individuals, agents or agencies are authorized to complete Vehicle Identification Number (VIN) inspections: ()

a. Peace Officers and Special Agencies Inspections. As part of their regular assigned duties, any city, county, state or federal peace officer, or specified agent of the Department, may complete a VIN inspection. ()

b. Vehicle Dealer Inspections. Licensed Idaho vehicle dealers may complete VIN inspections. ()

c. Financial Institution Inspections. An employee of any bank that is authorized to do business in Idaho or an employee of any other financial institution registered with the Department of Finance, may complete VIN inspections as a part of normal business activity. ()

d. Special Agent Inspections. Other special designated agents of the Department may complete VIN inspections, as stipulated in a formal agreement between the Department and the special agent, i.e. vehicle rental companies allocating portions of their fleets to Idaho. ()

e. Out-of-state Inspectors. For a vehicle located in another state, a VIN inspection is acceptable when completed by any city, county, state or federal peace officer, or any employee of the state's vehicle titling and registration agency. ()

02. VIN Inspections Required. A VIN inspection is required whenever the current certificate of title was not issued for the vehicle by this state or whenever the Department is dissatisfied with the authenticity or accuracy of the vehicle identification number. ()

203. – 299. (RESERVED)

300. TITLE BRANDING.

01. Brand Disclosure. ()

a. Upon sale by a dealer of any salvage or total loss vehicle or branded vehicle or branded certificate of title, disclosure of the vehicle's salvage or branded status, will be conspicuously disclosed to the buyer and a record must be maintained by the dealer. Disclosure may be made on a form as provided by the Department for a report of sale. The buyer must sign that they have received disclosure of the vehicle brand. Proof of disclosure must be submitted to the Department. ()

b. Upon sale by a private party of any salvage or total loss vehicle or branded vehicle or vehicle with a branded certificate of title, disclosure of the vehicle's salvage or branded status, will be conspicuously disclosed to the buyer. ()

02. Branding Time Frame. Each branded vehicle and branded certificate of title will retain that brand throughout the existence of the vehicle regardless of its age or value unless the brand has an expiration date. ()

03. Brands Removed. ()

a. If any salvage vehicle leaves the state of Idaho with or without an Idaho salvage certificate of title and such vehicle returns to Idaho, it will once again be subject to the requirements under Idaho Code and this rule. ()

b. If a vehicle with a branded Idaho title leaves Idaho and then returns with a title or other ownership document issued by another jurisdiction that has either no brand or a different brand for the same incident that caused the brand on the Idaho title. ()

i. If the brand on the Idaho title originated in Idaho, the Idaho brand will be reinstated. This will occur even if the National Motor Vehicle Title Information System (NMVTIS) returns a different brand for the same incident. ()

ii. If the brand on the Idaho title originated in another state, the Idaho title will be issued with any brand retrieved from NMVTIS if for the same incident that caused the brand on the original Idaho title. If no brand is retrieved from NMVTIS for this incident, the brand on the previous Idaho title will be reinstated. ()

301. BONDED TITLE.

01. Conditions and Requirements. Application may be made for a “bonded title” when the applicant has actual possession of the vehicle but is unable to provide proper documentation of ownership. ()

a. Proper Documentation Cannot Be Obtained. The applicant must satisfy the Department that proper documentation to obtain a regular title cannot be obtained. However, the applicant must provide sufficient documentation to satisfy the Department that it is more probable than not that the applicant is the owner of the vehicle. ()

b. Vehicle Physical Inspection. The applicant must produce the vehicle for a physical inspection by a representative designated by the Department. ()

c. Affidavit of Explanation. The applicant must provide an affidavit explaining the reasons for the absence of a valid Certificate of Title or Certificate of Ownership or other documentation of ownership identified in Section 100 of this rule, and how the vehicle came into the possession of the applicant. A listing of any liens (loans) or encumbrances against the vehicle; the name of the state, province or country where the vehicle was last titled, or last registered if from a non-titling state, province, or country; and the name under which the vehicle was last titled, or last registered if from a non-titling state, province or country is also required. ()

d. Bond. The applicant will provide the Department with a bond in the amount of one (1) and one-half (1/2) times the value of the vehicle or a cash deposit of like amount, as provided in Section 49-523(b), Idaho Code. A cash bond will be in the form of a cashier’s check, money order or certified check made payable to the Idaho Transportation Department. The form of the bond will conform to the form ITD 3909, Vehicle Ownership Bond, which can be obtained by calling 208-334-8663 during regular business hours. ()

e. Vehicle Appraisal. The applicant will provide an appraisal of the vehicle either by a licensed Idaho automobile dealer on the dealer’s letterhead or other form provided by the Department with dealer’s number, or by a Motor Vehicle Investigator. The appraisal will reflect the current retail value of the vehicle. This appraisal will be considered by the Department to determine the value of the vehicle. ()

f. Application for Title. The applicant will apply for title within ninety (90) days of the bond’s issuance. Should the application for title occur more than ninety (90) days from the issue date of the bond or any subsequent rider, the applicant will obtain a rider to provide bond coverage for three (3) years. ()

g. Bonded Title Brand. Upon satisfying the Department’s requirements for a bonded title, the applicant will be issued a title bearing the brand “Bonded Title” and the brand’s expiration date, which will be three (3) years from the following: ()

i. Date of issuance of the bond unless a bond rider was issued; or ()

ii. If one or more bond riders were issued, the date of issuance of the most recent bond rider; or ()

iii. Date of receipt of a cash deposit. ()

02. Bond Surety. The bond must be issued by a corporate surety, qualified and licensed to do business in Idaho. ()

03. Claims Against The Bond. Should any expense, loss or damage occur, for any reason covered by the bond, persons or entities suffering such loss will make claim directly against the principal (applicant) and the surety. If the applicant has made a cash deposit, any claim will be made through the Department’s Motor Vehicle Administrator. ()

04. Expiration Of Bonding Requirement. Upon expiration of the brand, the bond or cash deposit will be returned without interest unless the Department has been notified in writing of a pending claim or action to recover

on the bond or deposit. If there has been no claim, the applicant may surrender the bonded title and apply for a Certificate of Title free of the bonded title brand. A Certificate of Title free of the bonded title brand will be issued upon certification of the application and payment of any applicable fees per Idaho Code Title 49, Chapters 2 and 5, and any applicable sales or use tax, per Title 63, Chapter 36, Idaho Code. ()

05. Return Of Bond Prior To Three Year Period. The bond or cash deposit will be returned prior to the expiration of the brand if the vehicle is no longer registered in this state, and the Department has not been notified of any claim or action to recover on the bond. ()

06. Sales And Use Tax. Any sales or use tax will be paid to the Department or to the county assessor prior to issuance of a bonded title. ()

302. SPECIALLY CONSTRUCTED VEHICLES.

01. Specially Constructed Vehicle Examples. Some examples of specially constructed vehicles are: Custom built vehicles, such as, kit conversions, homemade camp trailers, other homemade trailers that exceed two thousand (2,000) pounds unladen weight, motorcycles, vessels, snowmobiles, and slide-in truck-mounted campers. ()

02. Engine Changes. A vehicle that has an engine of a different make, model or year from the body, frame and running gear is not considered a specially constructed vehicle. These vehicles retain the original title and identification designation. ()

03. Title Application Requirements. ()

a. The applicant must provide proof of ownership for all significant parts that are replaced, such as frame, body, and other parts that carry vehicle identification numbers. The body must have a properly released title from the former owner. The frame only may be transferred with a bill of sale given by the legal owner showing the vehicle identification number (VIN). Other significant parts that are replaced must be verified by traceable invoices identifying the part or parts if purchased from an established new or used parts outlet. If the other significant parts are purchased from a private party, a bill of sale showing seller's name and address is required. An MCO must accompany the documents for manufactured kits or if no MCO was issued, a factory invoice or bill of sale from the selling dealer, together with a statement certifying no MCO was issued for the kit, is acceptable. ()

b. The model year will be the year that the specially constructed vehicle was first titled as a specially constructed vehicle. ()

c. he make code as shown on the certificate of title of a specially constructed vehicle will be identified as "SPCN" and the certificate of title will be branded "Specially Constructed." ()

d. When the vehicle is in operating condition, an inspection by a motor vehicle investigator is required. A fee of twenty-five dollars (\$25) is required for this inspection and the preparation of the statement of fact and indemnifying affidavit. In addition, if a vehicle identification number is assigned, the fee required by Section 49-202(2)(j), Idaho Code, will be charged. If the vehicle is eligible to be registered for road use, the owner will complete a self-certification on a form prescribed by the department stating that the vehicle is in compliance with Chapter 9, Title 49, Idaho Code, and meets the Federal Motor Vehicle Safety Standards in effect for the model. ()

303. REBUILT SALVAGE VEHICLES.

01. Rebuilt Salvage Vehicle. A rebuilt salvage vehicle, as defined by Section 49-123 (2)(m), Idaho Code, includes every "Salvage or Total Loss Vehicle" that has been rebuilt, in compliance with applicable federal motor vehicle safety standards and the requirements of Chapter 9, Title 49, Idaho Code, as regulated by Sections 49-524 and 49-525, Idaho Code. ()

02. Salvage Vehicles from Other Jurisdictions. Every vehicle that is coming into Idaho from another jurisdiction with a Salvage Certificate or other equivalent document showing evidence of a total loss payoff such as a bill of sale from an insurance company, or other documentation indicating that the vehicle may have been a salvage or

total loss vehicle and any vehicle for which information retrieved from the National Motor Vehicle Title Information System (NMVTIS) indicates it has been reported as “salvage” will be considered salvage unless there is sufficient evidence for the department to determine the salvage document or information retrieved from NMVTIS was in error. These vehicles may not be operated on Idaho highways until rebuilt in compliance with Chapter 9, Title 49, Idaho Code and all federal motor vehicle safety and emission standards in effect for the model year and type of vehicle. They will be issued an Idaho Salvage Certificate unless the other jurisdiction has issued a salvage certificate or other equivalent salvage ownership document. If any salvage vehicle is received by a “salvage pool” (as described in Section 49-120(4), Idaho Code), an Idaho salvage certificate of title must be issued, prior to sale unless the vehicle has a salvage certificate or other equivalent salvage ownership document issued by another jurisdiction. Any vehicle which has been declared junk, pursuant to Sections 49-516 and 49-522, Idaho Code, or is coming from another jurisdiction with a similar endorsement, or is designated by the owner or the insurance company as parts only, destroyed, or dismantled, may not be rebuilt for on-road use. Any vehicle for which information retrieved from NMVTIS indicates it has been reported as having been scrapped or crushed may not be retitled. Any vehicle for which information retrieved from NMVTIS indicates it has been reported by a salvage yard will be considered “salvage” and any vehicle for which information retrieved from NMVTIS indicates it has been reported by a junk yard will be considered “junk” unless otherwise indicated. The provisions of this section will not apply if there is sufficient evidence for the department to determine the information retrieved from NMVTIS was in error. ()

03. Title Application Requirements for Vehicles Defined as Salvage and Rebuilt Salvage Vehicles. ()

a. The applicant must provide a written statement which includes the vehicle information, vehicle identification numbers, salvage date, and the work done personally by the owner or supervised by the owner to restore the vehicle to the operating condition that existed prior to the event causing the vehicle to be salvaged. ()

b. In the event that the applicant did not personally repair the vehicle or supervise its repair, but another party performed the repairs, the applicant will certify to the best of his knowledge the name of the party that did repair the vehicle or personally supervised its repair. This certification shall be made on a salvage vehicle statement. ()

c. In the event that repairs were not necessary to bring the vehicle to operating condition pursuant to Chapter 9, Title 49, Idaho Code, the applicant will certify this on a salvage vehicle statement. ()

d. The applicant must sign an indemnifying statement agreeing to defend the title in all legal disputes arising out of his possession of the title to the vehicle, and attesting to the fact that all information contained in the statement and its attachments are true and correct. ()

e. The new Idaho title issued will be branded “REBUILT SALVAGE.” Such notation will remain on the title and on all subsequent transfers of the title. ()

04. Salvage Vehicle Damaged Out-of-State. If a vehicle that is titled in Idaho is damaged in another state or jurisdiction to the extent that the vehicle becomes a “salvage vehicle” as defined by Section 49-123(2)(o), Idaho Code, and the vehicle is not going to be returned to Idaho, the owner or insurer must, upon determining the vehicle to be salvage, notify the purchaser and the Department in writing of the salvage status. If this vehicle returns to Idaho, the title will be branded “Rebuilt Salvage” or carry another jurisdiction's comparable brand forward unless the vehicle has not yet been repaired and has not had a salvage certificate or other salvage ownership document issued by another jurisdiction in which case the owner must obtain an Idaho salvage certificate of title. ()

304. GLIDER KITS.

01. Title Application Requirements. ()

a. An MCO for the glider kit must be submitted with the application for title. ()

b. If the applicant dismantles a vehicle presently titled to the applicant and uses the significant parts with the glider kit, either a statement of fact will be prepared or the applicant will complete an affidavit, identifying

the significant parts by identifying numbers. If the significant parts were purchased separately from a new or used parts outlet, a bill of sale or invoice is required. If the significant parts were purchased from a private owner, a bill of sale is required. ()

c. If the frame and cab that the parts were stripped from will never be used again, i.e., frame and cab destroyed, not salvageable, the title must be surrendered with the application. If the frame or cab can be used again, the owner or motor vehicle investigator will mark the title "frame only" or "cab only." ()

d. The vehicle must be completely assembled and meet the requirements of Chapter 9, Title 49, Idaho Code, and the federal motor vehicle safety standards in effect for the model year at the time of application. ()

02. Assignment of VIN. The VIN will be the number assigned to the kit by the manufacturer. In the absence of such number, the motor vehicle investigator will assign a VIN. ()

03. Model Year. The model year will be the year of the kit, determined by priority in the following order: ()

a. Written statement from the manufacturer. ()

b. Seventeen (17) character VIN's model year designator; ()

c. Designation of model year shown on an approved MCO; or ()

04. Make of Vehicle. The make of the vehicle will be the make of the glider kit. ()

05. Title Branded. The designation "GLIDER KIT VEHICLE" will be branded on the title. ()

305. TITLE APPLICATION REQUIREMENTS FOR REPLICA, STREET RODS, REPLICA STREET RODS, AND ASSEMBLED VEHICLES.

01. Applicant Must Provide Proof of Ownership. The applicant must provide proof of ownership for all significant parts that are used in replicating or assembling the vehicle. The body must have a properly released title from the previous owner or a title in the applicant's name. The frame only may be transferred with a copy of a bill of sale given by the legal owner showing the vehicle identification number (VIN). Other significant parts that are used must be verified by traceable invoices identifying the significant part or parts if purchased from an established new or used parts outlet. If the other significant parts are purchased from a private party, a bill of sale showing the seller's name and address is required. An MCO must accompany the documents for manufactured kits or if no MCO was issued, a factory invoice or bill of sale from the selling dealer together with a statement certifying no MCO was issued for the kit is acceptable. ()

02. Model Year. The model year for replica vehicles and replica street rods will be the year that the vehicle replicates. The model year for assembled vehicles and street rods will be the model year of the vehicle body. ()

03. Inspection by a Motor Vehicle Investigator. When the vehicle is in operating condition an inspection by a motor vehicle investigator is required. A fee of twenty-five dollars (\$25) is required for this inspection and the preparation of the statement of fact and indemnifying statement. In addition, if a vehicle identification number is assigned, the fee required by Section 49-202(2)(j), Idaho Code, will be charged. If the vehicle is eligible to be registered for road use, the owner will complete a self-certification form prescribed by the Department stating that the vehicle is in compliance with Chapter 9, Title 49, Idaho Code, and meets the federal motor vehicle safety and emission standards in effect for the model year and type of vehicle. ()

306. -- 399. (RESERVED)

400. ABANDONED VEHICLES.

Abandoned vehicles not claimed before the day of sale will be sold by the appropriate governmental entity if one exists. This regulation will not prevent governmental entities from entering into agreements with other governmental

entities to conduct sales. ()

401. GRAY MARKET VEHICLES.

01. Required Documents. When the owner of a gray market vehicle applies for title and registration, the following documents must be presented. ()

a. Statement indemnifying the Department. ()

b. Statement of Facts from a motor vehicle investigator, unless waived by the Department based on facts presented by the owner. ()

c. All documents relating to ownership including but not limited to; manufacturer's certificate of origin, manufacturer's statement of origin, foreign title, or registration (if the vehicle is not from a titling country), and bills of sale. A complete chain of ownership must be presented from the manufacturer (for new vehicles) or from the last titled owner, or registered owner (if the vehicle is not from a titling country) to all subsequent owners of the vehicle both in the foreign market and the United States. ()

d. U.S. Department of Transportation bond release letter. ()

e. Environmental Protection Agency (EPA) bond release letter or Independent Commercial Importer (ICI) release letter or Designated Canadian Importer (DCI) release letter or EPA letter of waiver. ()

02. Designation of Model Year. The model year for titling and registering gray market vehicles will be determined in an order of priority, based on the following criteria: ()

a. The model year used by a specific manufacturer to designate a discrete vehicle model irrespective of the calendar year in which the vehicle was actually produced; ()

b. The model year shown on an ownership document issued by that vehicle's country of origin; ()

c. Any vehicle manufactured during a twelve (12) month period beginning September 1, and ending August 31, will bear the production year of the calendar year in which August 31 occurs; or ()

d. The model year by certification of the importer of record. The certification can be verified against vehicle production dates, based upon substantially similar models of the same make of vehicle. ()

03. Foreign Documents. When a foreign manufacturer's certificate of origin, manufacturer's statement of origin, or registration and/or titling documents are presented, a translation of the foreign documents may be required to clarify the information contained in the documents. If required, such translation will be at the owner's expense and certified by the translator as true and correct. ()

04. Conditional Registration. Until gray market vehicles meet Idaho registration and titling requirements, the county assessor will issue a conditional registration under the "Conditional Registration" program to allow time for the federal government to act upon the required releases or for the owner to obtain legal ownership documentation. ()

05. Exception. When the owner of a gray market vehicle has a current title issued by another state, the other requirements of Section 401 of this rule for title and registration will not apply unless the title carries the brand, "Gray Market Vehicle (not in compliance)" or another brand or notation indicating the vehicle was not brought into compliance with U.S. DOT and EPA requirements. If a gray market vehicle has a current title issued by another state that carries the brand, "Gray Market Vehicle (not in compliance)" or another equivalent brand or notation and the other requirements of Section 401 of this rule have not been met, the vehicle cannot be registered and the owner may only receive an Idaho title issued with same or equivalent brand or notation. ()

402. – 899. (RESERVED)

900. WAIVER OF TITLING REQUIREMENTS.

01. Purpose. This rule specifies the circumstances under which a person or entity may waive the thirty (30) day requirement to apply for title to a vehicle which has been acquired by operation of law, and to provide that the person or entity, in lieu of having a certificate of title issued in the person's name, may provide a bill of sale together with the court order or other instrument entitling the person or entity to the vehicle and any existing certificate of title, if available, to the buyer or transferee upon sale or transfer of the vehicle. ()

02. Law Enforcement Agencies. Vehicles awarded to law enforcement agencies through operations of law are not required to be titled if the vehicle is not to be put into service by the agency and is to be sold or transferred. In this case, the agency may provide a bill of sale to the purchaser together with a copy of the court order or other instrument awarding the vehicle to the agency, and any existing certificate of title, if available. ()

03. Inheritance. Vehicles coming into possession by inheritance will not be required to be titled in the name of the heir when the intent of the heir is not to use or register the vehicle, but to dispose of the vehicle to a transferee. Upon sale or transfer of the vehicle, the heir will provide a bill of sale to the purchaser or gift transfer affidavit to the transferee, together with an affidavit of inheritance or small estate affidavit and any existing certificate of title if available. ()

901. – 999. (RESERVED)

39.02.22 – RULES GOVERNING REGISTRATION AND PERMIT FEE ADMINISTRATION

000. LEGAL AUTHORITY.

This rule, governing registration and permit fee administration as provided for in Sections 49-434 and 49-439, Idaho Code, is adopted under authority of Section 49-201, Idaho Code. ()

001. TITLE AND SCOPE.

01. Title. This rule is titled IDAPA 39, Title 02, Chapter 22, “Rules Governing Registration and Permit Fee Administration.” ()

02. Scope. This rule clarifies the procedures for administering registration and permit fees. ()

002. -- 009. (RESERVED)

010. DEFINITIONS.

01. Combination of Vehicles. A tractor or truck tractor and one (1) or more trailers and/or semitrailers. ()

02. Customer. The individual or entity that is registering/permitting the vehicle. The following terms; customer, individual, company or registrant are interchangeable in this rule. ()

03. Insufficient Funds (ISF). ISF will be the abbreviation as it pertains to checks written on personal and/or business checking accounts without sufficient funds to cover the check, for payment to the department. ()

04. Non-Reducible Load. Defined in IDAPA 39.03.01, Rules Governing Definitions Regarding Special Permits. ()

05. Probable Cause. Information sufficient to create a reasonable belief that the registrant of a motor vehicle(s) has either not paid fees due or has under reported miles traveled or has underpaid fees due. ()

06. Quarterly Report. The form for registrants to report the laden miles traveled on Idaho highways during the preceding three (3) months when transporting non-reducible vehicles/loads under annual overweight/oversize permits. ()

07. Revocation of Registration. The termination of a registrant’s vehicle registrations and authority to operate on Idaho highways for failure to comply with requirements specified by the Department and Idaho Code. ()

08. Registrant. A person, firm, or corporation in whose name a vehicle or vehicles are registered, with an Idaho account number assigned by the department. ()

09. Road Use Fee. The fee per mile paid for non-reducible vehicles or combinations of vehicles hauling non-reducible loads. The fees are based on the number of axles on the vehicle or combination of vehicles and the total gross weight, in addition to the registration fee. ()

10. Suspension of Registration. The temporary withdrawal of a registrant’s vehicle registrations and authority to operate on Idaho highways for failure to comply with requirements specified by the department and Idaho Code. ()

11. Third-Party Checks. Checks payable to one entity, and endorsed over to another entity for payment. ()

011. -- 099. (RESERVED)

100. QUARTERLY ROAD USE FEE REPORTS FOR ANNUAL OVERWEIGHT PERMITS.

To comply with Section 49-1001, Idaho Code, the customer will make quarterly reports of laden only mileage to the department for the movements of non-reducible vehicle/loads, at the appropriate permitted weight level of the annual overweight/oversize permits. These fees are in addition to the registration fees required to be paid to the department. Mileage and road use fees for single trip overweight/oversize permits are calculated and collected at the time of issuance and are not reported quarterly. ()

101. QUARTERLY ROAD USE FEE REPORTING.

01. Quarterly Reporting Forms Issued. The department will generate an online quarterly report form for each valid annual overweight/oversize permit issued to them. Customers can choose to opt-in and receive a printed form via mail. ()

02. Use of Quarterly Reporting Form. The customer is required to report each quarter's information on the form provided online or on a Department printed copy that will be mailed on or before the due date specified on the quarterly report form, even when reporting zero (0) miles traveled. ()

a. If the customer does not receive a quarterly report form or report their information online, it is the customer's responsibility to notify the department allowing adequate time to submit the report before the due date. ()

b. Any report transmitted through the US Postal Service shall be considered filed and received by the department on the date shown by the post office cancellation mark stamped on the envelope or wrapper containing the report. A postage meter cancellation shall not be considered as a post office cancellation mark. ()

c. If the quarterly report form due date falls on a Saturday, Sunday, or legal holiday, the due date will be extended to the next business day. ()

d. Quarterly reports not submitted will result in the account being suspended. ()

03. Information Required on the Quarterly Report Form. Customers must report the following: ()

a. The number of laden miles traveled on Idaho highways when operating under an annual overweight/oversize permit with non-reducible vehicles and/or load that exceed eighty thousand (80,000) pounds and/or legal axle weights for the appropriate weight category for the quarter specified on the quarterly report form, rounded to the next full mile; and the road use fee due; and penalty, if the report is filed after the due date. ()

b. Total amount due. ()

c. Signature and title of company official, and date of report. All reports filed with the department must be signed by an authorized representative of the company/individual in order to be considered a valid report even if zero (0) miles are being reported. ()

d. Address change, if different from quarterly report form. ()

e. Customer telephone number ()

102. -- 199. (RESERVED)

200. INSTALLMENT PAYMENTS FOR COMMERCIAL VEHICLE REGISTRATION.
The department offers a Payment Plan for registrants in compliance with Sections 49-434, Idaho Code. ()

01. Requirements to Participate in Installment Payments. ()

a. Participant must sign participation contract agreement. ()

b. Only Full Fee and Idaho IRP registration fees are included in the payment plan. Other jurisdictions' IRP fees shall not be included. ()

c. Only full annual registration fees shall be included in payment plan. Registrations for less than one full year shall not be included. ()

d. Vehicles not registered within thirty (30) days after the previous year registration has expired shall not be eligible for the installment payment option. Submitted applications for registration that have been invoiced, but not paid for, by the last day of the registration effective month shall not be eligible for the installment payment option. ()

e. Installment contract requirements do not provide opportunity for registrant to opt out of any remaining installment payments. The balance of the payment plan shall continue to be paid even if the truck is not being operated. ()

f. If registrant meets the criteria in Section 300 of this rule, the prorated portion of the Idaho fee shall be credited toward the installment plan or refunded if the plan has been paid in full. ()

g. Registrant shall not participate in installment payment plan if the registrant's account has previously been suspended as stated in Subsection 200.06 of this rule. ()

h. The contract shall stipulate the payment periods and the installment payment vouchers shall stipulate the due dates of each subsequent payment. ()

i. An installment payment plan fee of fifty dollars (\$50) shall be required and collected at the time of setup for each installment payment plan created. ()

02. Billings, Payments and Due Dates of Installment Plan. ()

a. The department shall upon acceptance of the contract by the registrant, receive one-quarter of the annual registration fee along with the installment payment plan fee, and then shall bill the registrant for three (3) equal installments based upon the previously set payment periods outlined in the contract, which are due by the end of the third, sixth, and ninth months after the effective date of the registration. ()

b. Installment payment vouchers will be provided with the initial invoice. ()

c. US Postal Service postmark shall be used to determine if payment is received on time. If the envelope is postmarked on or before the last day of the month, the payment shall be considered "on time." ()

d. If the last day of the month falls on a Saturday, Sunday or legal holiday, the next business day shall be considered the due date. ()

e. Failure to retain provided payment vouchers does not relieve the burden of the registrant to pay the installment amount by the due date. ()

03. Failure to Pay Installment Payment by Due Date. ()

a. The department shall send out courtesy pre-suspension notices approximately five (5) days after the due date to registrants who have failed to remit payment by the due date printed on the quarterly billing. ()

b. The pre-suspension letter shall contain a late penalty fee of ten percent (10%) of the amount due and an additional one percent (1%) for each month or portion of a month that the payment is past due. ()

c. Registrant shall pay installment amount portion that is due, plus assessed penalties and interest. ()

04. Suspension of Registrant's Account Due to Non-Payment of Payment Plan. Approximately two (2) weeks after pre-suspension notices are mailed to the registrant, the department shall suspend accounts of registrant's that have failed to remit installment payment and/or interest and penalty. ()

05. Reinstatement Fee for Payment Plan Registration. ()

a. A forty dollar (\$40) reinstatement fee shall be applied to all payment plan accounts that have been

suspended. ()

b. Registrant must pay quarterly payment portion, penalty and interest, if applicable, and reinstatement fee before suspension shall be cleared from account. ()

06. Repetitive Suspensions Result. ()

a. After the registrant’s account has been suspended for delinquent installment payments two (2) or more times, the registrant shall not be allowed to participate in future payment plan programs unless; ()

i. Customer has twelve (12) consecutive months of no suspensions related to the account starting from the month the account is cleared; and ()

ii. Customer requests in writing to the department to participate in future installment payment plans and will be allowed to do so. ()

201. -- 299. (RESERVED)

300. REFUNDS.

01. Fees Eligible for Refund. ()

a. Commercial vehicle registration is eligible for refund when the criteria in Section 49-434, Idaho Code, are met. ()

b. If account has been overpaid, and no other fees are owed to the department. ()

c. Unexpired portion of Idaho based fees are refundable for: ()

i. A vehicle that has been sold or repossessed; ()

ii. A vehicle that has been damaged beyond repair; or ()

iii. A vehicle on which the lease has been terminated. ()

iv. Other refund requests will be reviewed and approved or denied on a case by case basis. ()

02. Fees Not Eligible for Refunds. Other jurisdiction’s fees are not refundable by Idaho. ()

03. Request for Refunds: ()

a. Registrant can make a request for refund of fees from the department. The refund request must include: ()

i. Proof of sale or repossession of the vehicle; ()

ii. Proof from the insurance company or law enforcement agency that the vehicle has been damaged beyond repair; or ()

iii. Proof of lease termination from the leasing company. ()

b. Request shall be subject to audit as provided in Idaho Code. ()

c. All refund requests shall be reviewed to ensure that all requests are valid and eligible. The Revenue Operations supervisor shall also approve/disapprove refunds. If the refund amount is greater than or equal to one thousand (\$1,000) dollars, a Financial Services manager shall also review and approve/disapprove the request before refund is processed. ()

d. Approval/disapproval shall be indicated by either signature, or electronic approval by means of the department's financial management system. ()

301. -- 599. (RESERVED)

600. INSUFFICIENT FUNDS.

Insufficient Funds will be indicated by the abbreviation ISF. ()

01. Payment With Insufficient Fund Check. If a customer pays a fee by check and the check is returned to the department as ISF, the transaction will be cancelled. The department reserves the right to not accept checks from a customer who has written two (2) or more ISF checks within four (4) years to the department. That customer will have to pay with cash, or verifiable check, or credit card. ()

02. Suspension of Account. The department will suspend the customer's account until the customer has paid the amount of the ISF check, along with the twenty dollar (\$20) ISF fee. ()

03. No Further Transactions. The department will not complete further transactions with the customer until the customer has paid the amount of the ISF check along with the twenty dollar (\$20) ISF fee. ()

601. ACCEPTANCE OF CHECKS.

The department will accept personal checks as form of payment with sufficient proof of identification. If check payment is received by mail, the check will be accepted unless the customer has written two (2) or more ISF checks within four (4) years to the department, per Subsection 600.01 of this rule. ()

602. CREDIT CARD PAYMENTS.

The department will accept only Visa, Discover, American Express, or Mastercard for any fees due to or purchases from the department. ()

603. -- 699. (RESERVED)

700. SUSPENSION OF REGISTRATION.

The department shall suspend the vehicle registration(s) by notifying the registrant in writing sent via first class pre-paid mail to the registrant's last known address if: ()

01. Failure to Comply. The registrant fails to comply with a billing letter requesting payment of fees and penalties. ()

02. Non-Filing by the Registrant. The registrant does not file quarterly reports or make installment payments to the department. ()

701. REVOCATION OF REGISTRATION.

The department shall revoke the vehicle registration(s) if the registrant fails to comply with a suspension notice within fifteen (15) days of receipt of the notice. ()

702. REQUIREMENTS FOR REINSTATEMENT OF REVOKED OR SUSPENDED VEHICLE REGISTRATION.

01. Revocation. In the case of a revocation, a registrant must pay all fees due and a forty dollar (\$40) reinstatement fee to be reinstated and must also re-register to resume operating. ()

02. Suspension. In the case of a suspension all fees, reports, and records required prior to the suspension must be provided to the department, including a forty dollar (\$40) reinstatement fee. ()

703. REQUIREMENTS FOR COLLECTIONS.

All unpaid amounts owed to the department may be sent to an external collection agency. Collection agencies may charge a fee for their efforts in collection of a debt as per Section 67-2358, Idaho Code. Accounts that have been

assigned to a collection agency must pay the collection agency all fees due. The department will not accept the payment once assigned to the collection agency. ()

704. -- 799. (RESERVED)

800. ENFORCEMENT.

01. Delayed Movement. If the registration of a vehicle is suspended the Ports of Entry shall delay movement of the vehicle until such time as the registrant complies with the condition(s) that caused the suspension. ()

02. Revoked Registrations. If a registrant's registrations are revoked for failure to respond to a suspension notice, the motor vehicle cannot be operated on Idaho highways until the registrant complies with Section 702 of this rule. Registrants with outstanding balances owed to the department or revoked registrations are not eligible to purchase trip permits. ()

801. -- 899. (RESERVED)

900. APPEAL PROCEDURE.

01. Filing of Appeal. A registrant wishing to contest a penalty or suspension of a registration or an account may file an appeal within ten (10) days of receipt of the notice. ()

02. Delivery of Appeal. The appeal must be either hand delivered or mailed to Compliance Manager, Idaho Transportation Department, P.O. Box 7129, Boise, Idaho 83707-1129. ()

03. Delivery of Decision. A copy of the final decision in response to the request will be sent to the registrant. ()

901. -- 999. (RESERVED)

39.02.26 – RULES GOVERNING TEMPORARY VEHICLE CLEARANCE FOR CARRIERS

000. LEGAL AUTHORITY.

This rule is adopted under the authority of Sections 49-201, 49-202, and 49-501, Idaho Code. ()

001. TITLE AND SCOPE.

01. Title. This rule is titled IDAPA 39.02.26, “Rules Governing Temporary Vehicle Clearance for Carriers,” IDAPA 39, Title 02, Chapter 26. ()

02. Scope. This rule provides for temporary vehicle clearance (TVC) procedures in Idaho, self issued by carriers or issued by the Department. ()

002. -- 009. (RESERVED)

010. DEFINITIONS.

01. Carrier. The person or company who is qualified for registration in Idaho, and whose vehicles are issued Temporary Vehicle Clearances. ()

02. Temporary Vehicle Clearance (TVC). Temporary clearance issued for immediate operation of a vehicle pending receipt of credentials. ()

011. -- 099. (RESERVED)

100. ADMINISTRATION.

Temporary Vehicle Clearances, valid for a maximum of forty-five (45) days or to the registration year expiration date, may be issued to a carrier whose account is in good standing. ()

101. -- 199. (RESERVED)

200. ISSUANCE OF TVC.

01. Temporary Vehicle Clearances. Carriers may request temporary vehicle clearances online, from the department or an Idaho port of entry. Fees are payable when the clearance is issued. ()

201. ISSUANCE OF VEHICLE REGISTRATION (CAB CARD) AND LICENSE PLATE(S).

01. Issuance of Vehicle Registration & License Plate(s). The vehicle registration and license plate(s) may be issued when: ()

a. The online application is received by the Department and all licensing requirements are met; ()

b. The carrier submits a copy of an Idaho title or title receipt showing that the vehicle is titled in the owners name; ()

02. Permanent Identification. When all criteria are met, a registration and a validation plate and/or sticker will be issued. ()

202. -- 299. (RESERVED)

300. COST AND PAYMENT.

The fee for temporary vehicle clearances issued via facsimile transceiver equipment or self issued by the carrier is eighteen dollars (\$18) per clearance, payable in advance by the carrier. ()

301. -- 999. (RESERVED)

39.02.41 – RULES GOVERNING SPECIAL PROVISIONS APPLICABLE TO FEES FOR SERVICES

000. LEGAL AUTHORITY.

This rule is adopted under the authority of Sections 49-201, Idaho Code. ()

001. TITLE AND SCOPE.

This rule is titled IDAPA 39.02.41, “Rules Governing Special Provisions Applicable to Fees for Services,” and identifies special provisions applicable to fees for services not specifically outlined in Title 49, Idaho Code. ()

002. -- 099. (RESERVED)

100. ADMINISTRATION.

Idaho Code provides for the collection of fees for related services. This rule provides for automation considerations and a fee schedule to uniformly apply the fee provided by Section 49-202(2)(h), Idaho Code. The following fees apply for services and copies of files regarding motor vehicle or other registrations, motor vehicle titles, driver’s licenses or commercial driver’s licenses, and are based on the per hour charge specified in Section 49-202(2)(h), Idaho Code. ()

01. Paper or Imaged Records. Copies of supporting driver’s license, registration, or title records from paper or imaged records, based on an average of twenty-four (24) minutes to fully process these requests at the per-hour rate specified in Section 49-202(2)(h), Idaho Code, and rounded to the nearest whole dollar. ()

02. Automated Records. Idaho Code does not provide a fee for complete county or statewide automated copies of registration or title files. A fee has been based on the costs to produce special file requests. ()

a. A base charge for programs requiring: One (1) to three (3) sorts, seventy-five dollars (\$75). Each additional sort, twenty-five (\$25). ()

b. In addition to the above, the computer cost, printer cost and tape access cost, as established by the information technology section will be charged. ()

c. Any mailing, shipping or special handling costs will also be added to the charges. ()

03. Electronic Media Must Be Provided. Requestors must provide electronic media for this purpose, unless the file can be transmitted electronically. Data is provided in a standard department format. Vehicle or driver history information is not included. The only selection criterion is by counties. ()

04. Records Provided Free of Charge. Motor vehicle and driver records will be provided free of charge to the following: ()

a. State Agencies. ()

b. County Assessors. ()

c. County Sheriffs. ()

d. Peace Officers requesting records in the performance of their duties as per Section 49-202(3), Idaho Code. ()

05. Rules for Providing Records Free of Charge. The Division of Motor Vehicles will observe the following guidelines when providing records free of charge: ()

a. Records will be provided free of charge only if they are a standard computer run that does not require special programming and/or sorting. Records requiring special handling will be provided for a fee equal to the cost of the additional handling. ()

b. Records will be provided free of charge electronically or on electronic media supplied by the requestor, or as a standard computer printout. All other formats will be provided for a fee equal to the cost of the additional materials. ()

c. The Assessor’s Clearinghouse and the Sheriff’s Clearinghouse shall each establish a single standardized computer printout that will be used for all motor vehicle and driver requests from their respective

agencies. ()

d. Records access agreements between the Division of Motor Vehicles and government agencies requesting motor vehicle and driver records shall be negotiated and renewed annually, and shall contain a list of all personnel who will have access to the records and/or on-line terminals. ()

e. On-line computer installation and equipment shall be charged at a rate defined in the annual agreement. ()

101. -- 199. (RESERVED)

200. LAW ENFORCEMENT INQUIRIES.

The Department provides full access to motor vehicle files by Law Enforcement at no charge through the Idaho Law Enforcement Telecommunication Systems (ILETS). There is also no charge to Law Enforcement for certified motor vehicle or driver record packets to peace officers. For additional services beyond access to motor vehicle records (special reports, etc...), actual costs incurred by the Department will be charged. ()

201. JURY LISTS.

Idaho Code provides for the use of motor vehicle records for jury lists. The Department does not charge the counties for this use. ()

202. SPECIAL AGREEMENTS.

01. Agreements for Services. The Department may enter into agreements for services and copies of motor vehicle files to requestors with special highway safety and statistical reporting requirements. Initial costs incurred by the Department shall be reimbursed by the requestor. Ongoing charges or fees will be based on the agreement. ()

02. Right to Receive Information Subject to Idaho Code. This rule is not intended to imply that a requestor has the right to receive information. The fees, as stipulated in this rule, apply when the requestor is eligible to receive the information, subject to Idaho Code. ()

203. MISCELLANEOUS.

The fee for vehicle inquiries by name will be based on the proper fee per vehicle record. Commercial vehicle inquiries shall be based on a per vehicle record fee. ()

204. -- 999. (RESERVED)

39.02.60 – RULES GOVERNING LICENSE PLATE PROVISIONS

000. LEGAL AUTHORITY.

This rule, establishing the policies used to administer Idaho's standard and specialized license plate programs, is adopted under the authority of Section 49-201, Idaho Code. ()

001. TITLE AND SCOPE.

01. **Title.** These rules are titled IDAPA 39.02.60 "Rules Governing License Plate Provisions." ()

02. **Scope.** This rule governs license plate provisions for standard license plates not otherwise detailed in Title 49, Idaho Code, and provisions for all specialty program license plates, personalized plates, and special eligibility plates. Subchapter A further establishes provisions for administering the exempt and undercover license plate programs not otherwise detailed in Title 49, Chapter 4, Idaho Code. ()

002. -- 009. (RESERVED)

010. DEFINITIONS.

01. **Authorized Employees.** Authorized employee as used in this rule means any non-salesperson or employee who is paid compensation for a minimum of thirty (30) hours each week, and appears on the records of the employer as an employee for which social security, income tax, and all deductions required by law have been made. ()

02. **Exempt License Plate.** Standard license plate issued to the entities described in Section 49-426(1), Idaho Code, which are exempt from payment of vehicle operating fees. ()

03. **Exempt Personalized License Plate.** An exempt plate which identifies the agency by a unique identifier specified by the agency that does not conform to the standard exempt identifier listed in Section 400; a plate wherein the serial number portion represents inventory control numbers, badge numbers, radio call signs, or other unique lettering or numbering schemes developed by the requesting agency; plates that are lettered and/or numbered to indicate a person's position in the hierarchy of an agency. ()

04. **Furtherance or Pursuance of Business.** Furtherance or pursuance of business as used in this rule or in Section 49-1627, Idaho Code, means any lawful use of a dealer or loaner plate by an authorized employee of a dealership for the movement of a vehicle to be sold, repaired or transferred from one (1) location to another. ()

05. **Leased or Rented Vehicles.** Leased or rented vehicles owned by the licensed dealer as used in Section 49-1627, Idaho Code, means vehicles titled in the name of the dealership which are leased or rented on a contractual basis to the public. ()

06. **Undercover License Plate.** A standard license plate issued upon application to the Department from an exempt agency with law enforcement authority. Undercover license plates will be randomly issued by the Department, and appear as a standard county plate. ()

07. **Vehicles Not Held in Stock.** Vehicles not held in stock for sale as used in Section 49-1627, Idaho Code, means vehicles titled in the name of the dealership or vehicles which cannot be titled or for which the dealership does not hold title. ()

08. **Vehicles Sold.** Vehicles which have been sold as used in Section 49-1627, Idaho Code, means vehicles for which a dealer has a signed contract of sale or other vehicles not belonging to the dealership. ()

011. LICENSE PLATE PROVISIONS FOR ALL LICENSE PLATES.

01. **Plate Numbering and Lettering.** The Idaho Transportation Department is authorized to assign unique plate letter/number spacing schemes and to use specific letter/number combination schemes as needed for the purpose of ensuring unique numbering systems for all license plate programs and to administer the provisions of this rule. ()

02. **Plate Life Expiration Date.** License plates will be valid for the period described in 49-443 (2) and will expire on the last day of the month, consistent with the month of the registration expiration. ()

012. PROOF OF REGISTRATION FOR NEW, REPLACEMENT, OR REISSUED LICENSE PLATES.

01. Proof of Registration Document. Upon receipt of payment for required registration and program fees proof of registration receipt document may be issued, indicating “license plates on order.” This option will be used whenever license plates are manufactured after the registration transaction has been completed. The proof of registration receipt document will provide proof that the vehicle has been registered and fees have been paid, and the vehicle may be operated until new plates have been received by the registrant. At the discretion of the Department, more than one (1) proof of registration may be issued, if needed, in order to manufacture license plates. ()

02. Placement of Proof of Registration Document. The proof of registration receipt document will be displayed in the rear window or on the rear of the vehicle for which it is issued in a manner that is readily legible for a distance of twenty five (25) feet and will be legible throughout the duration of the permit. When issued to a convertible, motorcycle, or other vehicle in which it is not possible to display in the rear window, the proof of registration must be conspicuously displayed where the expiration date of the newly issued plate may be easily read at a distance of twenty five (25) feet, and where it is protected from exposure to weather conditions, which would render it illegible. ()

03. Issuance of Manually Completed Temporary Registrations When Automated System is Unavailable. Upon receipt of payment for required registration and program fees, the county may issue a manual temporary registration valid for thirty (30) days, through use of a temporary form provided by the Department, in the event the automated system is unavailable. When the system resumes normal operation, the county office will enter such registration information in the system, and produce the registration form and validation decals and mail to the registered applicant. The manual temporary registration form will be displayed in the rear window of the vehicle for which it is issued in a manner that is readily legible for a distance of twenty five (25) feet and will be legible throughout the duration of the permit. When issued to a convertible, motorcycle, or other vehicle in which it is not possible to display in the rear window, the temporary registration must be conspicuously displayed where the expiration date of the permit may be easily read at a distance of twenty five (25) feet, and where it is protected from exposure to weather conditions, which would render it illegible. ()

013. -- 099. (RESERVED)

100. LICENSE PLATE PROVISIONS FOR STANDARD PLATES.

01. County Designations. The county in which a vehicle is registered will be designated by a number and letter on license plates for passenger cars, pick-up trucks eight thousand (8,000) pounds and under gross weight, hearses, ambulances, wreckers, farm vehicles between eight thousand one (8,001) and sixty thousand (60,000) pounds gross weight, and recreational trailers. The county designators are as follows:

County Designations			
1A - Ada	2A - Adams	1B - Bannock	2B - Bear Lake
3B - Benewah	4B - Bingham	5B - Blaine	6B - Boise
7B - Bonner	8B - Bonneville	9B - Boundary	10B - Butte
1C - Camas	2C - Canyon	3C - Caribou	4C - Cassia
5C - Clark	6C - Clearwater	7C - Custer	E - Elmore
1F - Franklin	2F - Fremont	1G - Gem	2G - Gooding
I - Idaho	1J - Jefferson	2J - Jerome	K - Kootenai
1L - Latah	2L - Lemhi	3L - Lewis	4L - Lincoln
1M - Madison	2M - Minidoka	N - Nez Perce	1O - Oneida
2O - Owyhee	1P - Payette	2P - Power	S - Shoshone
1T - Teton	2T - Twin Falls	V - Valley	W - Washington

()

02. Designation for Farm Vehicles. License plates for farm vehicles between eight thousand one (8,001) and sixty thousand (60,000) pounds gross weight will have the county designator, then a unique serial number followed by the letter "T". ()

03. Designation for Recreational Vehicles. License plates for recreational trailers will have the county designator, then a unique serial number followed by the letter "R". ()

04. Designations for Motor Homes. License plates for motor homes will have the county designator, then a unique serial number followed by the letter "M". ()

101. LICENSE PLATE PROVISIONS FOR RESTRICTED VEHICLE PLATES.

Per Section 49-402 (4), Idaho Code, the Idaho Transportation Department will provide restricted vehicle plates for issuance to all-terrain vehicles, utility type vehicles, and motorbikes. Idaho Transportation Department will provide these plates to county DMV offices and to the Idaho Department of Parks and Recreation (if needed). Per Section 49-443(1), Idaho Code, such plates will be four inch by seven inch (4" x 7") plates, be printed with a combination of letters and numbers as determined by the department, and be printed in black on a white reflective background. Plates will be printed with "Idaho Restricted Vehicle" on the top and no other inscription. The plate will also have a decal placed in the lower left-hand corner indicating the year it is required to be re-placed. The plate will not be valid without the registration sticker, issued pursuant to Section 67-7122, Idaho Code, affixed to the lower right-hand corner of the plate. Idaho restricted vehicle plates may not be personalized. ()

102. -- 149. (RESERVED)

150. VEHICLE DEALER LICENSE PLATES FORMATS.

01. Designation for Manufacturers Plates. Plates issued to manufacturers will bear the designation "MFR" and be numbered from nine thousand (9000) through nine thousand, nine hundred, ninety-nine (9999). ()

02. Designation for Dealer Plates. Plates issued to dealers will bear the designation "DLR" and the sequential license plate number will be a maximum of two (2) digits. ()

a. If a dealer is issued more than ninety-nine (99) plates, an alpha character will be placed in the first position, followed by a number. ()

b. The dealer number will be a maximum of four (4) digits. No dealer number may be preceded by a zero (0): Dealer number one (1), plate number one (1): 1-01; Dealer number one thousand one (1001), plate number one hundred (100): 1001-A1. ()

c. Dealer restricted vehicle plates will display the abbreviation "DLR" within the lower left hand box labeled "Restricted Vehicle". The dealer validation sticker will be displayed within the box labeled "Dealer Validation Sticker". ()

151. VEHICLE DEALER LICENSE PLATES RESTRICTIONS.

01. Restrictions. Restrictions on the use of manufacturer or dealer plates are provided for by Section 49-1627, Idaho Code. In addition, the following restrictions apply: ()

a. Authorized employees may operate vehicles displaying dealer plates only when operated in the furtherance of the dealer's business. The authorized employee must carry an identification card issued by the dealer. The identification card will contain the employee name, dealership, date of issue, dealer number and signature of an authorized representative of the dealership and the signature of the employee. This use will be limited to normal business hours unless the operator is in possession of a letter from the dealer listing the specific reason for the after-hour use. ()

b. A manufacturer will not display manufacturer plates on vehicle types other than those manufactured by the manufacturer. ()

c. A new or used motorcycle dealer will not display motorcycle dealer plates on other vehicle types nor on a new motorcycle that the dealer is not enfranchised to sell. ()

d. A new vehicle dealer will not display new vehicle dealer plates on new vehicles that the dealer is not enfranchised to sell. ()

e. A new or used motorbike, all terrain vehicle, or utility vehicle dealer will not display dealer restricted vehicle plates on other vehicle types nor on any new motorbike, all terrain vehicle, or utility vehicle that the dealer is not enfranchised to sell. ()

f. Vehicles displaying a dealer restricted vehicle plate are not required to display the Idaho Department of Parks and Recreation Off-highway registration to be valid, but are required to be validated in the same manner as are standard dealer plates and display the required annual validation sticker on the restricted plate. Use will be permitted pursuant to Section 49-426 (3) and (4), Idaho Code. ()

g. A prospective purchaser will not have in his possession a vehicle belonging to a dealership after normal business hours without a letter of authority from the dealership. ()

h. A dealer or manufacturer will not display a dealer plate for purposes other than provided for by law or regulation. ()

02. Penalties. In addition to the penalties for violation of plate use provided for in Section 49-236, Idaho Code, a dealer or manufacturer may have his license to do business in Idaho suspended for a period not less than fifteen (15) days nor more than thirty (30) days. ()

152. VEHICLE DEALER LOANER PLATES.

01. Numbering. Plates will be numbered from LAA001 to LZZ999. ()

02. Surrender of Plates. If the dealership license becomes invalid, the dealer must surrender the registration and loaner plates that have been issued. There will be no refund of fees. ()

03. Vehicle Log. Dealerships will maintain a vehicle log of each vehicle on which a loaner plate is displayed. The log will be available for inspection by any peace officer or agent of the Department and contain the: ()

a. Vehicle Identification Number (VIN) or dealership stock number if such stock number can be traced to the vehicle's VIN; ()

b. Date(s) the plates were displayed on a vehicle; ()

c. Number printed on the plate displayed; ()

d. Name of person authorized to use the plate; and ()

e. Purpose for which vehicle was used. ()

04. Identification Card. The Department will provide an identification card, (registration) for each plate showing the: ()

a. Dealership name and address; ()

b. Number printed on the plate; ()

c. Calendar year for which the registration is valid; ()

- d. Dealer number; ()
- e. Date of issue; and ()
- f. A place for the dealer's signature. ()

05. Letter of Authorization. Persons using the plate on loaner vehicles while waiting for their own vehicle to be repaired will have in their possession a letter of authorization or a document showing both the user and dealership name. The document or letter must be signed and dated by an authorized employee of the dealership. ()

06. Vehicle Use Donation for Civic and Charitable Events. Licensed dealers may authorize the use of their loaner plates when donating the use of vehicles held in their inventory for civic or charitable events. Such time period will not exceed thirty (30) days. The dealer will provide a letter of authorization to be carried in the vehicle and proof of current liability insurance, as required by Chapter 12, Title 49, Idaho Code. ()

07. User Fee. The dealer may charge the user a fee for vehicles held in stock for sale and provided to a customer of a dealership while the customer's vehicle is being repaired. ()

08. Fees. The fees charged for dealer loaner plates will be the same as the fees required by Section 49-402, Idaho Code, for new vehicles, and will be in addition to the current Emergency Medical Service (EMS) and plate fees. Applicants for new loaner plates received after January 1 will be charged one-twelfth (1/12) the annual fee required for a new vehicle for each month remaining in the licensing year, including the month of application. The annual EMS and plate fees are not prorated. ()

153. VEHICLE DEALER TRANSPORTER REGISTRATION AND PLATE.

01. Purpose. Utility and boat trailers that weigh under two thousand (2,000) pounds unladen may be moved by a manufacturer, dealer, or an employee of either, or by a transporter service contracted by the vehicle's manufacturer or dealer upon registration and payment of an annual fifteen dollar (\$15) transporter plate fee to the department, or by purchase of a single trip permit. These plates may be used only on boat trailers and utility trailers for demonstration purposes, and may be used while laden for demonstration purposes. ()

02. Numbering of Plates. Transporter plates will be numbered from PA1 TO PZ9999. Transporter plates are required to be displayed on the rear of the trailer. ()

03. Renewal of Plates. The transporter registration and plate are valid for one (1) year from January 1 through December 31 and may be renewed by use of a registration sticker showing the year of validation. ()

04. Use of Plates. Transporter plates may be moved by registrants from one (1) utility or boat trailer weighing under two thousand (2,000) pounds unladen to another trailer meeting this criteria during the current registration period. Vehicles towing a laden trailer displaying a transporter plate must be registered within the appropriate gross vehicle weight category for the combined load. ()

05. Possession of Registration. When transporting a vehicle displaying a transporter plate, the operator of a towing vehicle will carry the transporter registration in the towing vehicle at all times. ()

06. Violations. Violations of this section include: ()

a. Display of a transporter plate on any vehicle not required to be registered under this Section; and ()

b. Display of a transporter plate on a vehicle not lawfully under the control of the registration holder. ()

07. Penalties: ()

- a. Violation of this section will be a misdemeanor as provided for by Section 49-236, Idaho Code; and ()
- b. The plate and registration of anyone who displays a transporter plate other than provided for by this section may be canceled. ()

154. PROVISIONS FOR WRECKER PLATES.

01. Purpose. Wrecker plates are for the exclusive use of businesses engaged in the towing of a wrecked, abandoned, salvaged, or disabled motorized vehicle. Plates will not be used on vehicles being repossessed. ()

02. Numbering of Plates. Plates will be numbered as determined by the department and will display the abbreviation "WRKR" vertically on the left hand side of the plate. ()

03. Renewal of Plates. The wrecker registration and plate are valid for one (1) year from January 1 through December 31 and may be renewed by use of a registration sticker showing the year of validation. ()

04. Use of Plates. Plates are not to be displayed on the towing power unit vehicle nor are they to be used on a vehicle not being towed. Plates are to be displayed on the rear of the towed vehicle in such a manner as to be visible to vehicles approaching from the rear. Wrecker plates may be moved from one (1) towed motorized vehicle to another vehicle under the direct lawful control of the registration holder. ()

05. Possession of Registration. When towing a motorized vehicle displaying a wrecker plate, the operator of the towing vehicle will carry the wrecker plate registration in the towing vehicle. ()

06. Acquisition/Renewal of Wrecker Plates. Wrecker plates will be issued and renewed through the department by mail or by fax using an application and renewal process determined by the department. ()

155. PROVISIONS FOR SPECIAL LICENSE PLATE PROGRAM PREQUALIFICATION AND APPLICATION PROCEDURES.

01. Special License Plate Prequalification. After July 1, 2020, only those agencies authorized by Section 49-402C, Idaho Code, desiring legislation to establish a Special License Plate Program may make application to the Department on a Special Plate Program application form designed and provided by the Department. If all the prequalification requirements are met by the submission of other documentation, this will also be acceptable. A Special Plate Program Development Guide will also be provided to each applicant, detailing the procedures for the prequalification and application and providing information regarding the steps required to successfully accomplish a special plate program from prequalification through passage of the legislation, statutory requirements and standards for the plate color and license plate design. ()

02. Special License Plate Approved by the Legislature. If a special license plate program is approved by the Idaho legislature, prior to production and sale of the special license plates, the sponsor will meet the requirements outlined in Subsection 155.03 of this rule. ()

03. Special Plate Requirements: ()

a. The individual responsible for representing an agency meeting the requirements of Section 49-402C, Idaho Code, requesting the prequalification/application procedure will complete and sign a Special Plate Program application form that will contain a declaration of the responsible individual for certifying compliance with the requirements to the Department. ()

b. After July 1, 2020, the individual representing an eligible agency will acknowledge that all special plate sales proceeds will be deposited in the highway distribution account pursuant to Section 49-402D(a), Idaho Code. ()

c. On and before July 1, 2020, for non-profit agencies, the responsible individual will provide

evidence that the applicant has had 501 (c) Federal Income Tax status for at least two (2) years. ()

04. Special License Plate Program Application Approval: ()

a. Upon approval of application by Department, applicant will, by September 1, deposit programming and administration fees determined by an estimate of projected programming hours required. One thousand dollars (\$1,000) of this fee will not be refundable. ()

b. Applicant will complete and submit a list of two hundred fifty (250) applicants, currently registered in Idaho, who intend to purchase the Specialty License Plates when available. The form may be delivered to the Department by mail or electronic means such as e-mail or facsimile. ()

05. Submission to the Legislature. ()

a. For those desiring legislation, when all requirements have been met, the Department will forward the completed application to the chairman of the Senate Transportation Committee and the chairman of the House Transportation and Defense Committee of the Idaho State Legislature for consideration in the next Legislative Session. This submission will be on a form developed by the Department or other documentation that meets all the requirements listed in this rule. ()

b. For those Special License Plate Programs with enacting legislation that fail to meet the requirements of this Section, the Department will report such finding to the chairman of the Senate Transportation Committee and the chairman of the House Transportation and Defense Committee of the Idaho State Legislature, and will not proceed with production and sale of the special plates. ()

06. Annual Report. An annual report form, designed and provided by the Department, will be made available to special license plate sponsors for all special license plate programs receiving revenue in existence or passed by the legislature on or prior to July 1, 2020. The report will require an accounting of revenues and expenditures associated with the funds collected for the special license plate program. ()

a. The report will be completed and submitted to the Department by December 1 so that by January 15 of each year the Department has the necessary data compiled and the required information forwarded to the chairman of the Senate Transportation Committee and the chairman of the House Transportation and Defense Committee of the Idaho State Legislature. ()

i. All nonprofit agencies who have filed a 501(c)(3) federal income tax status will be required to submit an annual financial report. ()

ii. All government entities receiving any portion of revenue from the sale of specialty plates will be required to submit an annual financial report. ()

b. If the agency fails to provide the required report, the Department will immediately discontinue the special license plate sales for that program. ()

c. Military License Plate and Collegiate and University License Plate programs will not be included in this requirement. ()

d. All government entities with special plate programs for which revenue is deposited in the highway distribution account from the sale of their special plate program will not be included in this requirement. ()

07. Appeals. The appeals process will allow the applicant for a special license plate program to appeal the Department's decision to deny the application (See Section 003 of this rule). The notice of the appeal will be sent in writing via mail, electronic mail or facsimile within twenty (20) days of the denial. ()

08. Cancellation of Plate Programs. The cancellation of a plate program will occur when a nonprofit agency (who has filed a 501 (c) (3) federal income tax status) plate program fails to meet any of the following criteria: ()

- a. Fails to sell one thousand (1,000) plates, in the first year of availability. ()
- b. Fails to sell one thousand five hundred (1,500) plates, in the second year of availability. ()
- c. Fails to sell two thousand (2,000) plates in the third and any subsequent years of availability.()
- d. The Department will notify the plate program sponsor ninety (90) days prior to cancellation informing the sponsor of the intent to cancel the program due to low plate sales volume. Sales volume is calculated by determining the number of current, valid registrations for the plate program on file with the Department. ()
 - i. Upon the first year, second year, or third and subsequent year anniversary dates, if plate sales are below the mandatory volumes, provided in Section 49-402D, Idaho Code, the Department will notify the plate program sponsor that the program has been canceled and the effective date of the cancellation. Such programs will no longer be available at the county offices or the Department for new registrations. ()
 - ii. The Department will notify current registrants of the special plate program of the cancellation, and advise the registrant may retain and renew the registration with the additional program fees, and retain the plates until the physical plates are required to be replaced, however replacement plates will not be available, due to loss or damage. ()
 - iii. The portion of canceled special plate program fees no longer deposited with the nonprofit agency (who has filed a 501 (c) (3) federal income tax status) program sponsor will be deposited in the state highway account. ()
 - iv. Upon mandatory replacement of physical plates as required by statute, the customer may choose another plate program or standard county plates at the customer's preference. ()
 - v. The Department will include in its annual report to the chairman of the Senate Transportation Committee and the chairman of the House Transportation and Defense Committee of the Idaho State Legislature any special plate programs that have been canceled during the preceding year. ()

156. -- 198. (RESERVED)

199. LICENSE PLATE PROVISIONS FOR SPECIAL PROGRAM AND PERSONALIZED PLATES FOR TRAILERS.

Special program and personalized plates may be issued to trailers manufactured primarily for recreational vehicle uses. Such trailers will include camper, tent or fifth-wheel recreational trailers. Trailers with multiple uses such as utility, horse, or boat, with or without recreational vehicle facilities, will be excluded. ()

200. LICENSE PLATE PROVISIONS FOR SPECIAL PLATES.

01. Year of Manufacture Plates. ()

a. Owners of vehicles manufactured up through 1974, excluding model years 1969, 1971, 1972, and 1973, but including and ending with model year 1974, may apply for the renewal and use of previously canceled Idaho license plates which were originally issued to the same category of vehicle, where the year designation of the plate matches the year of manufacture of a motor vehicle. ()

b. The license plate must be in serviceable condition as originally manufactured, i.e., cannot be marred, bent, faded, or otherwise damaged to the point it is illegible. If the plate is repainted to bring it to a serviceable condition, the colors will match the original colors as closely as possible and will equal or exceed the original quality. The plate number cannot be a duplicate of a previously manufactured "year of manufacture" plate still in use. ()

c. The application for use of the plate will include a statement signed by the applicant attesting that the applicant understands, if the plate use is approved, the plate does not have reflectorized material which meets the

requirements of Section 49-443, Idaho Code. The responsibility for any accident or injury arising out of the possible consequence of not having this reflectorized safety feature on the license plate will be borne by the registrant. ()

d. “Classic” or “Old Timer” plates may be used in conjunction with this revived plate at the option of the registrant. ()

02. Centennial License Plates. Personalized and regular number plates are available in the centennial format. ()

03. Disabled Veteran License Plates. Disabled veteran license plates may, upon the registrant's request, display the international disability symbol to ensure reciprocal parking privileges in all states and provinces. ()

201. PROVISIONS FOR LEGISLATIVE LICENSE PLATES.

01. Option to Apply. Members of the Idaho Legislature have the option of applying to the Department's Special Plates Unit for one (1) set of specially numbered license plates bearing the designation “HOUSE” or “SENATE.” ()

02. Numbering Assignment List. On or before June 15 each year, the Department will request from the Speaker and Pro Tem a current list of license numbers assigned to all legislators. The Department will request that these lists be returned by September 1 or, in an election year, within fifteen (15) days after the election. ()

03. Plate Availability. Upon receipt of the lists, the Department will ensure that a complete set of special legislative license plates will be available for each legislator. ()

202. PROVISIONS FOR PERSONALIZED LICENSE PLATES.

01. Special Characters or Marks. No special characters, or punctuation marks, may be used for personalized messages on license plates. ()

a. Up to seven (7) letters or any combination of seven (7) letters and numbers and spaces (no half spaces) may be used for personalized messages on eligible six inch by twelve inch (6” x 12”) license plates. ()

b. Up to six (6) letters or any combination of six (6) letters and numbers and spaces (no half spaces) may be used for personalized messages on four inch by seven inch (4” x 7”) motorcycle plates. ()

c. Up to six (6) letters or any combination of six (6) letters and numbers and spaces (no half spaces) may be used for personalized messages on specialty program license plates. ()

d. Disability six inch by twelve inch (6” x 12”) plates will display the international disability symbol followed by up to five (5) letters, numbers, and spaces in the personalized message. Disability four inch by seven inch (4” x 7”) motorcycle plates will display the international disability symbol followed by up to four (4) letters, numbers, and spaces (no half spaces) in the personalized message. ()

02. Issue of Personalized Plates. Personalized plates may be issued to vehicles if no specific wording is required on the plate to identify the purpose for which the vehicle is registered. Personalized plates will not be issued if such plates would jeopardize the integrity of unique plate identification requirements. Examples include but are not limited to: ()

a. Commercial vehicles registered under the International Registration Plan (IRP), because the designators PRP are required to be printed on the plate; ()

b. Vehicles for which the designators “PRP” are required to be printed on the plate to identify the use; and ()

c. Utility, horse, or enclosed car hauling trailers with RV facilities or boat trailers. ()

03. Specific Requests. Requests for specific plate letters and/or numbers will be issued on a first come, first served basis. In the event of a request for the same plate by more than one (1) individual, the request with the earliest postmark, e-mail transmission time, or fax transmission time will prevail. If the postmarks are the same, the date stamped upon arrival at the Department will prevail. Applications submitted at county assessors' offices will be considered valid when date stamped in by the Department. Telephone requests will not be accepted. ()

04. Lack of Current Plates. When an applicant for personalized plates does not have current regular number plates: ()

a. The Department may issue a thirty (30) day temporary registration to allow time for the billing process for personalized plates. The fee for each thirty (30) day temporary registration will be as required by Section 49-523, Idaho Code. ()

b. The Department may, upon payment of all required fees, issue a proof of registration document as provided in Section 012 of these rules. ()

05. Credits. When personalized plates are issued before an applicant's current registration is expired, credit will be given for unexpired registration fees only. ()

06. Renewing Plates. The applicant will have the choice of renewing existing personalized plates with validation stickers or ordering a new set of plates at the time of renewal. If new plates are requested, the plate fee will be charged in addition to all other fees that are due. Personalized plates will be reissued in accordance with Section 49-443, Idaho Code. ()

07. Transfer of Plates. When personalized plates are issued, the vehicle's regular number plates may be transferred to another vehicle belonging to the owner. If registration credit is given from the regular number plates to the personalized, the regular number plate registration is canceled. ()

08. Acceptability of Plates Message. Acceptability of the personalized license plate message and issuance, denial or cancellation will be determined by the Department based on the following criteria: ()

a. The combination of numbers and letters requested or combinations of same may not duplicate an existing combination in use, pursuant to Idaho Code. ()

b. The message, in any language, may not carry a sexual connotation nor consist of a term that is considered to be one of obscenity, contempt, prejudice, hostility, insult, racial degradation, ethnic degradation, or profanity, or vulgarity, as defined in dictionaries of general use, including, but not limited to, Webster's Unabridged Dictionary and the Harper & Row New Dictionary of American Slang. ()

i. The message may not refer to any of the following: bodily functions, bodily fluids, or intimate body parts; sexual preference or orientation; acts of violence; illegal substances or the use thereof. ()

ii. The message may not represent a club, membership, or gang that is commonly known to promote violence, illegal substances or illegal acts. ()

c. The criteria in Paragraph 202.08.b. of these rules is not to be considered an exhaustive list. A compilation of offensive or obscene words, terms or letter/number combinations gathered from the experience of Idaho and other states may also be used as a guide. The Department may also rely on information obtained from law enforcement agencies within or outside of Idaho. ()

d. When a complaint is received from the public concerning an issued plate, the name of the complainant will not be recorded nor, if known, revealed. ()

e. Final determination regarding applications for questionable messages or cancellation of issued plates will be made by the Division of Motor Vehicles. The determination process will include a first review by technical staff, followed by a second review by supervisory and management staff. An applicant does, however, have

a right to a hearing on the decision. ()

09. Message Preferences. Applicants may submit three (3) message preferences including the specific meaning of each. The first choice that is available and acceptable will be issued. If none of the preferences are available or acceptable, the applicant will be notified by return mail or email. ()

10. Recalled Plates. Personalized plates may be recalled by the Department for the following reasons: ()

a. Error in manufacturing; or ()

b. Clerical error. ()

c. Unacceptable personalized messages as outlined in Paragraph 202.08.b. of these rules. ()

11. Unexpired Fees. If a set of personalized plates is recalled, the personalized plate program fee, unexpired portion of the registration fee, E.M.S. fee, plate fee, (if plates are returned to the Department), and all other applicable special plate fees, will be refunded or transferred to a new issue of personalized plates. ()

12. Expired Plates. Personalized plates that have their registration expire will become immediately available for reissue to another applicant. There is no grace period. ()

203. PROVISIONS FOR FORMER PRISONER OF WAR (POW) LICENSE PLATES.

01. Eligible Person. Any veteran who was a prisoner of war (POW) of an armed enemy of the United States during active service in the armed forces of the United States during the following recognized war periods may be eligible:

WORLD WAR I	April 6, 1917 to November 11, 1918
WORLD WAR II	December 7, 1941 to December 31, 1946
KOREAN WAR	June 27, 1950 to January 31, 1955
VIETNAM WAR	August 5, 1964 to May 7, 1975
USS PUEBLO	January 23, 1968 to December 23, 1968
PERSIAN GULF	August 2, 1990 (Congress has not assigned an ending date.)

()

02. Certified Documentation. Eligibility will be documented by a copy of the applicant's 53.55 or DD-214 Separation from Active Duty papers, or other specific documentation received from the Veterans Administration that certifies that the applicant was a prisoner of war during the recognized war periods stated above. ()

204. SURRENDER OF PLATES.

Registered owners desiring to surrender their license plate numbers may do so at any time. Upon surrender, license plate numbers shall immediately become available for use by another, upon application and payment of applicable plate, registration, and program fees. ()

205. -- 299. (RESERVED)

300. PROVISIONS FOR SAMPLE PLATES.

Sample plates are issued at on the "Scenic Idaho/Famous Potatoes" red, white, and blue plate or Special Program License plates as follows: ()

01. Plate Size. Plates carrying the word SAMPLE in both passenger car size (six inches by twelve inches (6" x 12")) and motorcycle size (four inches by seven inches (4" x 7")). ()

02. Personalized Sample Plates. Personalized Sample plates are issued on both plate sizes, passenger car with maximum of seven (7) characters and motorcycle size with a maximum of six (6). ()

a. The applicant completes an Application for Personalized Sample License Plate Form. ()

b. The acceptability screening process used is the same as that used for regular personalized plate application. ()

c. The Department will adopt written policy for the issuance of duplicate and replacement sample plates with personalized character combinations. ()

d. The department may include other special license plate programs for sample plate sale, when not prohibited by code, or that would not cause a compromise of a special eligibility plate program. ()

03. Penalties. There is a penalty for fictitious display of sample plates (Section 49-456, Idaho Code). ()

301. -- 399. (RESERVED)

**SUBCHAPTER A – RULES GOVERNING LICENSE PLATES
FOR GOVERNMENTAL AGENCIES AND TAXING DISTRICTS**

400. STANDARD EXEMPT PLATE DESIGNATORS.

The standard exempt license plate designators used to identify the agency, entity, or office will be assigned pursuant to Section 49-443B (2), Idaho Code. ()

401. ISSUING AGENCY.

All exempt and undercover license plates will be issued by the Idaho Transportation Department upon receipt of a request from an authorized agency. ()

402. INFORMATION TO BE PROVIDED BY AN AUTHORIZED AGENCY.

A request for exempt or undercover plates will contain: ()

01. Actual Name and Address. The name and address of the requesting agency. ()

02. Vehicle Description. The description of the vehicle(s) to be registered, including the year, the make, model, type, vehicle identification (VIN), color and title number, and truck weight if eight thousand one pounds (8,001 lbs.) or more. ()

03. Fictitious Name and Address. The name and address of the registrant to appear on the undercover plate registration, and title records of the Department. ()

04. Authorized Official. The request must be signed by an authorized official of the authorized agency. ()

403. VEHICLE TITLING.

01. For Exempt Registration and License Plates. If the vehicle is not titled, the title transaction will be completed at the local county assessor's office before requesting exempt plates. The control number from the title application may be used in lieu of the title number on the exempt plate request letter. ()

02. Undercover Vehicle Titling. The actual name and address of the requesting agency, along with the fictitious name and address of the registrant will be provided directly to the Department on a completed application approved by the authorized official. ()

404. EXEMPT AND UNDERCOVER PLATE FEES.

01. Department Reimbursement. State and federal agencies and taxing districts will reimburse the Department the cost of providing license plates. These costs will be determined by the cost of manufacture and the cost to the Department of processing the transaction. ()

02. Adjusted Fees. Periodically, fees may be adjusted in accordance with changes in manufacturing costs, postage, employee costs and legislative mandate. ()

405. EXEMPT PLATE DISPLAY.
Exempt license plates will be displayed in accordance with Section 49-428, Idaho Code. A pressure-sensitive sticker with the designator "EX" will be provided with each exempt plate and be attached to the plate(s) in the space provided for this purpose. The department may have the EX designator printed in the appropriate space on the plate as an alternative to the sticker. ()

406. UNDERCOVER PLATE DISPLAY.
Undercover license plates will be displayed in accordance with Section 49-428, Idaho Code. A pressure-sensitive sticker displaying an expiration date matching the plate number will be attached to the plate(s) in the space provided for this purpose. There will be no discerning markings to indicate that the plate or registration record is in undercover use. ()

407. ALTERNATIVE PLATES.
If an authorized agency requests a specialized license plate format normally reserved for the general public, all the statutory special program fees for the plate will be paid, with the exception of the registration (operating) fee, in addition to the department administrative and plate manufacturing fees. Special eligibility plates will not be issued to exempt vehicles. "Special eligibility" requires the individual registrant to meet specific requirements for programs such as: Purple Heart, Disabled Veteran, Disability, Military Reservist, Former Prisoner of War, Congressional Medal of Honor, National Guard and Air National Guard, Radio Amateur, Pearl Harbor Survivor, and Legislative plates. ()

408. EXEMPT PLATE STATUS.

01. Non-Expiring Plates. Exempt plates are non-expiring and require no annual renewal. ()

02. Transfer of Plates. Exempt plates may be transferred between vehicles. If an exempt plate is transferred to another vehicle, a transfer request must be made to the Department's Vehicle Services Section/Special Plates Unit. ()

03. Reissue of Plates. Exempt plates will be reissued in accordance with Section 49-443(2), Idaho Code. ()

409. UNDERCOVER PLATE STATUS.

01. Expiration of Plates. Undercover license plates will expire annually or biennially based upon the application of the authorized agency. Registration status will appear as valid, until expiration date. Renewals must be made to the Department upon expiration of the undercover license plate. ()

02. Transfer of Plates. Undercover license plates may be transferred between vehicles. If an undercover license plate is transferred to another vehicle, a transfer request must be made to the Department's Vehicle Services Section/Special Plates Unit. ()

03. Reissue of Plates. Undercover plates will be reissued in accordance with Section 49-443(2), Idaho Code. ()

04. Emission Testing of Undercover Vehicles. Vehicles issued undercover license plates who list an address in a county or area of required emission testing will need to check with the emission authority to be exempted from the testing requirement, or test as a typical registered vehicle. ()

410. -- 999. (RESERVED)

**39.03.03 – RULES GOVERNING SPECIAL PERMITS –
GENERAL CONDITIONS AND REQUIREMENTS**

000. LEGAL AUTHORITY.

This rule, governing the movement of vehicles or loads that are in excess of the sizes or weights allowed by Sections 49-1001, 49-1002 or 49-1010, Idaho Code, is adopted under the authority of Sections 40-312, 49-201, 49-1001, 49-1004, and 49-1005 Idaho Code. ()

001. TITLE AND SCOPE.

01. Title. This rule is titled IDAPA 39.03.03, “Rules Governing Special Permits – General Conditions and Requirements,” IDAPA 39, Title 03, Chapter 03. ()

02. Scope. This rule states the general conditions and requirements for special permits. ()

002. – 009. (RESERVED)

010. DEFINITIONS.

Refer to IDAPA 39.03.01, “Rules Governing Definitions Regarding Special Permits,” for definitions of the terms used in this rule. ()

01. Loaded Truck. A truck or truck combination equipped with VLS axles shall be considered to be hauling a load when VLS axles need to be fully deployed to reduce loads on fixed axles and groups of axles that would otherwise exceed legally prescribed weight limits as set forth in Section 49-1001, Idaho Code. ()

011. – 049. (RESERVED)

050. SAFETY INSPECTION REQUIREMENTS FOR PERMITTED VEHICLES AND/OR LOADS.

01. Inspections. All vehicles, tractors, trailers, and dolly converters operating under the authority of a special permit issued by the Department must have a valid annual inspection at the time a permit is issued. The inspection shall be completed in compliance with 49 CFR Part 396.17. ()

02. Inspectors. Inspectors completing required annual inspections shall meet the certifications requirement in 49 CFR 396.19 and brake inspector qualification in 49 CFR 396.25. ()

03. Drivers. All drivers shall meet the special training requirements for Longer Combination Vehicles as outlined in 49 CFR Part 380. ()

04. Motor Carriers. By applying for a special permit, motor carriers self-certify that they have performed inspections as set forth in 49 CFR Part 396.17. ()

05. Exemption. Oversize vehicles and/or loads operating under an exemption outlined in Section 67-2901B (2), Idaho Code, are exempt from this safety inspection requirement. ()

051. – 059. (RESERVED)

060. BRAKES.

Brakes shall meet the Federal Motor Carrier Safety Regulations and shall be maintained to the Federal Motor Vehicle Safety Standards No. 121 in effect at the time the commercial motor vehicle was manufactured. ()

061. – 069. (RESERVED)

070. LIGHTING REQUIREMENTS FOR LOADS TRAVELING AFTER DARK.

Those over dimensional vehicles and/or loads traveling during hours of darkness shall be required to display lights to mark the extremities of the vehicle and/or loads and shall be in addition to those clearance lights required on legal size vehicles when traveling at night. ()

01. Standards for Lights on Oversize Vehicles and/or Loads. ()

a. Lights are required on those vehicles traveling sunset to sunrise. ()

b. The lights must be visible from a minimum of five hundred (500) feet. ()

- c. The lights may be flashing or steady burning. ()
- d. The color of the lights shall be as follows: ()
 - i. Lights visible from the front of the oversized vehicle and/or loads and the extremities in the middle or near the front of the oversized vehicle and/or load shall be amber. ()
 - ii. Lights visible from the back of the oversized vehicle and/or load and the extremities near the back of the oversized vehicle and/or load shall be red. ()

02. Standards for Lights on Rear Overhang. Lights are required when rear overhang exceeds the end of the trailer by four (4') feet or more. ()

- a. If the overhang is two (2') feet wide or less, only one (1) light is required on the end of the overhang. ()
- b. If the overhang is over two (2') feet wide, two (2) lights are required on the end of the overhang to show the maximum width of the overhang. ()

071. – 079. (RESERVED)

080. FLAGGING REQUIREMENTS FOR OVERSIZE VEHICLES AND/OR LOADS.

Warning flags for oversize vehicles and/or loads, excluding extra-length vehicle combinations, shall be marked by warning flags meeting the following: ()

01. Warning Flags. Warning flags are required on all overwidth vehicles and/or loads, and when the rear overhang exceeds the end of the trailer by four (4') feet or more. ()

02. Size. Minimum size of flags is eighteen (18") inches by eighteen (18") inches. ()

03. Color. Red or fluorescent orange. ()

04. Placement of Flags. On overwidth vehicles and/or loads flags shall be placed at the four (4) corners and/or extremities of the vehicle and/or load as follows: ()

- a. Front. Fastened to each front corner of the oversized vehicle and/or load if it exceeds legal width. ()
- b. Rear. Fastened to each rear corner of the oversized vehicle and/or load if it exceeds legal width. ()
- c. Side. Fastened to mark any extremity, when extremity is wider than the front or the rear of the vehicle and/or load. ()
- d. Overhang. If the overhang is two (2') feet wide or less, only one (1) flag is required on the end of the overhang. If the overhang is over two (2') feet wide, two (2) flags are required on the end of the overhang to show the maximum width of the overhang. ()

081. – 089. (RESERVED)

090. SIGN REQUIREMENTS FOR VEHICLES COMBINATIONS INCLUSIVE OF LOAD.

Refer to IDAPA39.03.05, "Rules Governing Special Permits – Oversize Non-Reducible," for conditions in this rule. ()

091. – 099. (RESERVED)

100. RESPONSIBILITY OF ISSUING AUTHORITY.

01. Primary Concerns. The primary concern of the Department, in the issuance of special permits, shall be the safety and convenience of the general public and the preservation of the highway system. ()

02. Permit Issuance. The Department shall, in each case, predicate the issuance of a special permit on a reasonable determination of the necessity and feasibility of the proposed movement. ()

101. – 199. (RESERVED)

200. AUTHORITY TO ISSUE PERMITS.

The authority to issue permits on state highways is described in Subsection 200.01. Subsection 200.02 describes the Department’s authority to issue special permits on local jurisdiction highways pursuant to an agreement between the Department and the local highway jurisdictions. ()

01. Special Permit. The special permit authority of the Department shall cover travel on state highways only and special permits issued by the Department shall be valid only on completed sections of state highway, described on the permit by route number or otherwise. The right to use county highways or city streets is neither granted nor implied. The special permit authority of the Department shall include those sections of state highways within corporate limits of cities and towns, but will not include sections of state highways intersecting with local highways, when travel is occurring on the local highway(s). Contractors hauling loads within the limits of state highway construction projects do not require special permits, but the loads must comply with the weight limits specified in the state highway contract. ()

02. Authority. Special permit authority agreed to by the Department and local highway jurisdiction shall include travel on the local jurisdiction’s highways under the rules of this title, IDAPA 39.03.03, “Rules Governing Special Permits – General Conditions and Requirements.” ()

201. – 299. (RESERVED)

300. OFFICES FOR ISSUANCE OF SPECIAL PERMITS.

The Department shall maintain a centralized special permit office at the Department Headquarters, making permits available electronically at the following listed office and Ports of Entry throughout the State. Permits will be available Monday through Friday, state holidays excluded, from 7:30 a.m. to 5 p.m. Mountain Time. Special permits can also be obtained online at itd.idaho.gov or by phone. ()

01. Headquarters.

2452 E 1500 N
Terreton, Idaho 83450
(208) 228-3636 ()

301. – 399. (RESERVED)

400. INSURANCE OR BOND FOR EXTRAORDINARY HAZARD.

Evidence of insurance or the posting of a bond shall be required when necessary because of loads creating an extraordinary hazard to the traveling public or to protect the public investment when a load presents an extraordinary hazard to the highway system. In such cases of extraordinary hazard to the roadway or structures, the Department may require the posting of a cash bond in such amount as to cover the maximum damage that could be expected to occur to the highway with the permittee also required to reimburse the Department for any engineering required to ascertain the extent of damages, if any, occurring to the roadway during the movement of the excessive load. ()

401. – 449. (RESERVED)

450. RESPONSIBILITY OF PERMITTEE.

01. General Responsibilities. The permittee shall determine and declare the gross weight, distribution of weight, and the dimensions of the vehicle and load and shall submit all other required information before issuance of the permit. The acceptance of a special permit by the permittee is his agreement that the vehicle and load covered by the permit can and will be moved in compliance with the terms and limitations set forth in the permit. When a permit has been accepted by the permittee, such action shall be deemed an unequivocal assurance that he has complied, or will comply with all operating, licensing, and financial responsibility requirements. ()

02. Permit to Be Carried in Vehicle. ()

a. The special permit must be carried or available electronically in the vehicle to which it refers during the time of movement and shall upon demand be delivered for inspection to any peace officer or authorized agent of the Idaho Transportation Board or any officer or employee charged with the care and protection of the public highways. ()

b. When the route of the permitted vehicle will not pass in the vicinity of a state operated transceiver station, the applicant may complete Form ITD-216, APPLICATION FOR SPECIAL PERMIT NUMBER, and provide pertinent information by telephone to the special permit office. If the special permit office approves the application, a special permit number will be assigned to complete the Form ITD-216. Form ITD-216 will serve as evidence of intent to obtain the special permit and will be honored by law enforcement subject to the officer checking with the special permit office. The applicant must qualify for this procedure by obtaining a permit fee account number. The special permit office will complete the Special Permit Form ITD-216 and charge the fee to the applicant's permit fee account number. ()

03. Certification Load Is Non-Reducible. Upon application, the permittee must certify that steps have been taken to reduce the dimensions, the weight of vehicle, or the load, or all three, concerned in the permit to legal limitations or, if that is impractical, to reduce the excess to a minimum. ()

04. Basic Limitations Shall Not Be Exceeded. Special permits shall not be issued for vehicles or

loads in excess of the maximum limitations of size or weight or that otherwise exceed the limitations for loads as set forth in these rules unless exception is made by the Transportation Board, or as otherwise provided herein. ()

05. Hazardous Travel Conditions Restrictions. Extreme caution in the operation of a special-permitted vehicle shall be exercised when hazardous conditions exist. The driver of a permitted vehicle is responsible for checking the conditions of the permitted route before travel. The movement of vehicles or loads operating on valid permits shall automatically become invalid en route when: ()

a. The Idaho Transportation Department, Idaho State Police, or other law enforcement office determines and provides public notice by any available means that a hazardous road condition exists. ()

b. The driver reasonably knows that hazardous road conditions exist along route. ()

c. Whenever a road is marked “Difficult” on 511 or as having a hazardous condition. ()

d. Hazardous road conditions may include, but are not limited to: ()

i. Loss of traction on roadways due to ice, snow, frost, excessive water, or mud; ()

ii. Whenever a roadway is under conditions of wind over forty (40) mph; ()

iii. Visibility is less than five hundred (500) feet due to snow, rain, smoke, dust, or fog; ()

iv. Whenever a roadway becomes obstructed due to snow, water, mud, rocks, or other debris; or ()

v. Whenever a roadway is subject to a natural disaster or emergency. ()

06. Delaying Movement. Enforcement personnel responsible for any section of highway shall carry out enforcement action for violations involving special permit operations and may delay movements. ()

451. – 499. (RESERVED)

500. ALLOWABLE TOLERANCE, LEGAL OR PERMITTED SIZE LIMITS.

01. Determination of Vehicular Dimensions. Determination of vehicular length and/or width as defined by Idaho Code or by Board rule shall be exclusive of those external devices or appurtenances whose function is related to safe and efficient operation. ()

02. Appurtenances. Rearview mirrors, turn signal lamps, splash and spray suppressant devices; awnings on recreational vehicles, load induced tire bulge, and other noncargo carrying appurtenances shall be excluded from the calculation of allowable width. Front mounted refrigeration units, energy conservation devices, bolsters, mechanical fastening devices, hydraulic lift gates, external front mounted side curtain rollers, and other noncargo carrying appurtenances or devices shall be excluded from a determination of allowable length. ()

03. Other Appurtenances. Other appurtenances not listed above may not extend beyond three (3) inches on each side or end of a vehicle or load. Other appurtenances may include, but shall not be limited to, clearance lights, door handles, handholds, window fasteners, door and window trim, moldings, and load securement devices. ()

501. – 509. (RESERVED)

510. DROMEDARY TRACTORS.

A truck tractor containing a dromedary box, deck, or plate in legal operation on or before December 1, 1982, shall be authorized to continue to operate, notwithstanding its cargo carrying capacity, throughout its useful life. Proof of such legal operation on December 1, 1982, shall rest upon the operator of the equipment. ()

511. – 519. (RESERVED)

520. LOAD OVERHANG.

The overhang or extension of a load shall not extend beyond the limits as set forth in Section 49-1010, Idaho Code.

()

521. – 599. (RESERVED)

600. GENERAL.

A special permit, in writing, shall be required for any movement on any completed section of highway under the jurisdiction of the Department by any vehicle or vehicles with reducible or non-reducible loads that exceed the allowable weights or sizes established in Sections 49-1001, 49-1002 and 49-1010, Idaho Code.

()

601. – 619. (RESERVED)

620. COMPLIANCE WITH OTHER LAWS AND ORDINANCES.

The special permit will be effective only insofar as the Department has authority for its issue and does not release the permittee from complying with other existing laws, local ordinances or resolutions which may govern the movement.

()

621. – 629. (RESERVED)

630. WAIVER OF LIMITATIONS FOR EMERGENCY MOVEMENTS.

Notwithstanding other provisions of these rules, the Idaho Transportation Board may waive existing permit policy limitations in the event of an emergency, subject to such limitations or special requirements as the Board may impose.

()

01. Military Emergency Affecting National Security. Any movement by or for a military or other government agency which is in excess of permit policy maximum limits of weight or size or which is otherwise outside established rules must be certified as a military necessity involving national security before receiving any special consideration to provide any waiver of normal permit rules. Certification of military necessity must be made by an official designated as having such authority by the Department of Defense Directory, issued by the Office of the Chief of Transportation, Department of Army. All applications for military emergency movements must be channeled through the Special Permit Office, Idaho Transportation Department.

()

02. Emergencies Endangering the Public Health, Safety, or Welfare Including but Not Limited to Fire, Flood, or Earthquake. During an emergency endangering the public health, safety or welfare, there may be an urgent and immediate need for equipment and it will not be in the public interest to require that a special permit be in the vehicle prior to an over legal movement. Verbal approval to proceed without a special permit in the vehicle may be obtained from the Special Permit Office or an Idaho Port-of-Entry. Once the emergency movement is completed, formal application for a Special Permit must be submitted to the Special Permit Office.

()

03. Emergency Movement of Implements of Husbandry. It shall be considered an emergency when an implement of husbandry being operated on an official state holiday or a weekend breaks down and a dealer brings replacement equipment to the farmer that exceeds legal height, length, and weight. Verbal approval to proceed without a special permit in the vehicle may be obtained from the Special Permit on-call staff. That verbal authorization may include escort vehicle requirements based on the route of travel and dimensions of load. Once the emergency movement is completed, the permittee shall make formal application for a permit to the Special Permit Office on the first working day after the occurrence.

()

04. Economic Emergencies. When a circumstance occurs in which an economic hardship is expected to result due to the application of existing rules or limitations, the Transportation Board may consider a petition for the temporary waiver of those rules or limitations which are perceived as being the cause of such economic hardship.

()

631. – 699. (RESERVED)

700. SPRING BREAKUP SEASON TYPE OF LOAD RESTRICTIONS.

Depending upon the type of road construction, the amount of moisture, temperature conditions, and severity of frost heaves and breakup, routes or sections of routes will be posted for restricted loadings to one (1) of the following categories as required to protect the roadway and in the interests of public safety: ()

01. Legal Weight. Maximum of legal allowable weight; ()

02. 16,000 Pounds. Maximum of sixteen thousand (16,000) pounds on any axle; ()

03. 14,000 Pounds. Maximum of fourteen thousand (14,000) pounds on any axle; and ()

04. 12,000 Pounds. Maximum of twelve thousand (12,000) pounds on any axle. ()

701. – 709. (RESERVED)

710. WEIGHT LIMITS BASED ON TIRE SIZES.

In administering load limits based on tire sizes or width of tires, credit for tubed tires will be based on the manufacturer's width marked on the tire; for example, a ten point zero-zero by twenty-four (10.00 x 24) tire will be given credit for ten (10") inches of tire width. Tubeless tires will be given credit for the width of the conventional tubed tires that they replace. ()

711. – 719. (RESERVED)

720. WIDTH LIMITATION ON TWO LANE ROAD.

A spring breakup weight restriction to less than legal weight shall automatically place a restriction on width allowed by special permit. On any section of highway restricted to less than legal weight, the maximum width by special permit shall be restricted to twelve feet six (12'6") inches during the period of the weight restriction. ()

721. – 729. (RESERVED)

730. SPEED RESTRICTIONS.

On those sections of highways which are posted for a maximum of legal loads, or to less than legal loads, trucks and buses with a gross weight of ten thousand (10,000) pounds or more will be restricted in critical areas to a maximum speed of thirty (30) miles per hour. Restricted speed zones will be marked by red and green markers. A red marker will mean speed is restricted to thirty (30) miles per hour and a green marker will mean that legal speed may be resumed. These markers will generally be attached to existing highway sign posts and when properly used will afford protection to the highway subgrade and surface as well as speeding the flow of traffic. ()

731. – 739. (RESERVED)

740. SPECIAL PERMIT POLICY DURING SPRING BREAKUP.

01. Suspended Weight Limits. Normal overweight special permit limits will be suspended on all highways in the area when seasonal load and speed restrictions are imposed. ()

02. Weight Restrictions. Spring breakup weight restrictions are primarily concerned with limiting the weight imposed on the highway by individual axles rather than the total gross weight of vehicles or vehicle combination. It will therefore be permissible to issue special permits that exceed legal allowable total gross load for a vehicle combination subject to these conditions: ()

a. Minimum tire width is ten (10") inches or larger. ()

b. Maximum axle weight on single axle having two (2) single wheels shall not exceed ten thousand (10,000) pounds. ()

c. Maximum axle weight on single axle having four (4) or more tires shall not exceed fourteen thousand (14,000) pounds. ()

- d. Permits for nonreducible loads only. ()

741. – 749. (RESERVED)

750. LEGAL WEIGHT LIMITS MAINTAINED ON CERTAIN HIGHWAYS.

The policy of the Department will be to maintain legal load limits on the Interstate highway system and arterials serving through state traffic or connecting major terminals, unless conditions are such that severe breakup will result. ()

751. – 759. (RESERVED)

760. ENFORCEMENT OF POSTED WEIGHT AND/OR SPEED RESTRICTIONS.

The Districts will sign and mark affected state highways the day before the weight and/or speed restrictions are in effect. The weight and/or speed restrictions will be enforced the day after the Districts sign and mark a state highway. ()

761. – 769. (RESERVED)

770. TEMPORARY SUSPENSION OF POSTED WEIGHT AND SPEED RESTRICTIONS.

01. Why Required. Spring breakup restrictions are required because of a seasonal characteristic in which freeze/thaw cycles occur, making the roadway unstable and reducing its load-bearing capability. The load-bearing capacity may be temporarily restored by a freeze-up of the pavement after a section has been posted for load and speed restrictions. ()

02. Temporary Waiver of Spring Breakup. District Engineers may provide a temporary waiver of the spring breakup restrictions by posting GREEN markers on the speed limit signs, and on other signs, if appropriate, within a section of highway posted for reduced loads. ()

771. – 779. (RESERVED)

780. SPECIAL ALLOWANCES FOR EMERGENCY AND CRITICAL SERVICE VEHICLES.

District Engineers may allow exceptions to the spring breakup weight restrictions for emergency and critical service vehicle(s), ie. fire trucks, heating fuel trucks, and other such service vehicles that are critical to the health and safety of the public. Documentation of special allowance shall be in writing from the District Engineer and must be carried in the vehicle. ()

781. – 799. (RESERVED)

800. SPECIAL PERMIT FEES COSTS TO BE BORNE BY PERMITTEE.

The movement of oversize or overweight vehicles or vehicles with special loads is a privilege not accorded every user of the highway. Administrative cost incurred in the processing, issuance and enforcement of special permits shall be borne by such permittees and not by the general traveling public through expenditure of highway user funds. Special permits issued for non-reducible, overweight vehicles and/or loads will be charged a road use fee as set forth in Section 49-1004(2), Idaho Code. Tax supported agencies are required to obtain special permits if their loads exceed the sizes or weights stated in Idaho Code, but they are exempt from paying fees for the permits. ()

801. – 909. (RESERVED)

910. PAYMENT OF SPECIAL PERMIT FEES.

01. Payment of Fees. The Idaho Constitution prohibits the state from extending credit to any individual, corporation, municipality, or association. Permit fees are collectible at the time of issuance. ()

02. Refund. Permit fees are not refundable once they have been processed into the Department's accounting system, unless the permittee contacts the Special Permit Office no more than two (2) working days

(during office hours) following the start date of the special permit or the Department issued the special permit in error. ()

03. Permit Costs. Special permit fees listed below are intended to cover cost of administration and are subject to periodic change depending on costs incurred in processing, issuance, and enforcement of special permit rules. ()

04. Current Schedule of Fees. Periodic changes to the fee schedule will be subject to legislative review and approval procedures in accordance with Chapter 52, Title 67, Idaho Code, Administrative Procedure Act. ()

a. Oversize only, single trip, thirty dollars (\$30). ()

b. Oversize only, two (2) trips, thirty six dollars (\$36). ()

c. Oversize single trip exceeding sixteen (16') feet wide, or sixteen (16') feet high or one hundred ten (110') feet long, thirty-three dollars (\$33). ()

d. Reducible Loads, annual, twelve (12) consecutive months: Cylindrical hay bales, two (2) wide, Multiple width loads of kiln stacked lumber, reducible loads, up to and including fifteen (15') feet high, Disabled Vehicle, forty-five dollars (\$45). ()

e. Oversize Non-Reducible, annual, twelve (12) consecutive months: Manufactured homes, modular building and office trailers; Farm tractors exceeding nine (9') feet width on Interstate and implements of husbandry; Oversize/Overweight Snowplow; Multiple width loads of crane booms; Multiple width loads of conveyor units; East port/Canadian Weight; forty five dollars (\$45). ()

f. Extra Length/Weight (reducible) annual, twelve (12) consecutive months, authority to exceed eighty thousand (80,000) lbs. on reducible loads up to one hundred twenty nine thousand (129,000) pounds, or exceeding the length limits imposed in Section 49-1010, Idaho Code, forty five dollars (\$45). ()

g. Overweight/Oversize or Overweight only (non-reducible) single trip, thirty-three dollars (\$33). ()

h. Overweight/Oversize or Overweight only (non-reducible), two (2) trips, thirty-three dollars (\$33). ()

i. Overweight/Oversize (non-reducible) single trip, exceeding sixteen (16') feet wide, or sixteen (16') feet high or one hundred ten (110') feet long, thirty- three dollars (\$33). ()

j. Overweight/Oversize (non-reducible) two (2) trips within seven (7) days, exceeding sixteen (16') feet wide, or sixteen (16') feet high or one hundred ten (110') feet long, thirty-three dollars (\$33). ()

k. Overweight/Oversize (non-reducible) annual permit fee for twelve (12) consecutive months, one hundred twenty-eight dollars (\$128). ()

l. Fee for reissuance or transfers, fifteen dollars (\$15). ()

m. Annual special permits purchased online will be five dollars (\$5) less than the listed price. ()

05. Additional Fees. The Department may require reimbursement of actual costs incurred for extraordinary services provided, incidental and necessary to the planning and/or movement of loads that require a special permit moving under the requirements of a traffic control plan. ()

911. – 949. (RESERVED)

950. REVOCATION OF PERMIT FOR NON-COMPLIANCE WITH THE LIMITATIONS OR PROVISIONS OF THE PERMIT.

01. Disqualification of Permits. The permit shall become invalid and the cited vehicle may be disqualified for reissuance of permits if convicted of the following: ()

a. The vehicle combination does not satisfy the requirements of Federal Motor Carrier Safety Regulations Part 393. ()

b. The vehicle combination violates permitting conditions (other than weight) for the following: ()

i. Failure to travel on Extra Length or Up to 129,000 Pound designated routes. ()

ii. Failure to properly display required flags and/or signs. ()

iii. Failure to provide required number of pilot cars and/or proper placement. ()

iv. Failure to provide required lighting for travel during hours of darkness. ()

v. Failure to travel during the hours of operation as specified on the permit. ()

vi. Failure to comply with wind velocity requirements when moving manufactured housing, office trailers, and modular buildings. ()

vii. Failure to comply when travel conditions become hazardous. Hazardous conditions include, but are not limited to, ice, snow or frost; or when visibility is restricted to less than five hundred (500) feet. ()

c. The vehicle combination violates weight limits under Section 49-1001 (1)(2) and (9), Idaho Code. ()

i. Violating weight limits for single, tandem, tridem, quad, or other type axle groups by more than fifteen percent (15%). ()

ii. Violating gross or bridge weight allowances by more than seven percent (7%). ()

d. The motor carrier has violated an Out-of-Service order by the Federal Motor Carrier Safety Administration as described in Part 386 (386.73) of the Federal Motor Carrier Safety Regulations. ()

02. Permit Revocation Process. A copy of the judgment of conviction from the court and the special permit authorizing operation must be provided to the Permit Office by enforcement personnel. Paperwork will be reviewed for compliance with the provisions of this rule and, if met, notification will be sent to the company informing them of the pending revocation that will occur within ten (10) days of the letter being issued. ()

03. Disqualification Periods. When a permit has become invalid, the vehicle identified on the invalidated permit may be disqualified for reapplication for permit for a period of thirty (30) days after the first violation, for a period of six (6) months after the second violation, and for a period of one (1) year after the third violation. ()

04. Penalties. In addition to revocation of permits as authorized in this rule, the permittee shall be subject to all applicable penalties provided by law with regard to the provisions violated. ()

951. – 979. (RESERVED)

980. PERMITTEE RESPONSIBLE FOR INJURY TO PERSONS OR PROPERTY.

The permittee shall assume all responsibility for injury to persons or damage to public or private property caused directly or indirectly by the transportation of a vehicle or vehicle and load under special permit; and he shall hold

harmless the Department and all its officers, agents, employees, and servants from all suits, claims, damages or proceedings, of any kind, as a direct or indirect result of the transportation of the vehicle or vehicle with a load that requires a special permit. ()

981. – 999. (RESERVED)

**IDAPA 41 – IDAHO PUBLIC HEALTH DISTRICTS
(PANHANDLE HEALTH DISTRICT #1)**

DOCKET NO. 41-0101-2000

NOTICE OF OMNIBUS RULEMAKING – ADOPTION OF PENDING RULE

EFFECTIVE DATE: This rule has been adopted by the agency and is now pending review by the 2021 Idaho State Legislature for final approval. The pending rule becomes final and effective upon the conclusion of the legislative session, unless the rule is approved or rejected in part by concurrent resolution in accordance with Section 67-5224 and 67-5291, Idaho Code. If the pending rule is approved or rejected in part by concurrent resolution, the rule becomes final and full force and effect upon adoption of the concurrent resolution.

AUTHORITY: In compliance with Section 67-5224, Idaho Code, notice is hereby given that this agency has adopted a pending rule. The action is authorized pursuant to Section 39-408 *et seq.*, Idaho Code

DESCRIPTIVE SUMMARY: The following is a concise explanatory statement of the reasons for adopting the pending rule and a statement of any change between the text of the proposed rule and the text of the pending rule with an explanation of the reasons for the change.

This pending rule adopts and re-publishes the following existing rule chapter previously submitted to and reviewed by the Idaho Legislature under IDAPA 41, rules of the Panhandle Health District:

IDAPA 41

- 41.01.01, *Rules of Idaho Public Health District #1.*

There are no changes to the pending rule and it is being adopted as originally proposed. The complete text of the proposed rule was published in the Sept. 16, 2020, Idaho Administrative Bulletin, [Vol. 20-9SE, pages 2210-2238](#).

FISCAL IMPACT: The following is a specific description, if applicable, of any negative fiscal impact on the state general fund greater than ten thousand dollars (\$10,000) during the fiscal year: This rulemaking is not anticipated to have any fiscal impact on the state general fund because the FY2021 budget has already been set by the Legislature, and approved by the Governor, anticipating the existence of the rules and fees being reauthorized by this rulemaking.

ASSISTANCE ON TECHNICAL QUESTIONS: For assistance on technical questions concerning this pending rule, contact Mr. Erik Ketner, PHD#1 Environmental Health Section Manager at (208) 415-5224.

Dated this 22nd day of October, 2020.

Joe Righello
Division Administrator
Environmental and Health Protection Division
Panhandle Health District

**IDAPA 41 – IDAHO PUBLIC HEALTH DISTRICTS
(PANHANDLE HEALTH DISTRICT #1)**

41.01.01 – RULES OF IDAHO PUBLIC HEALTH DISTRICT #1

000. LEGAL AUTHORITY.

The rules and standards set forth hereinafter shall be known as the Environmental Code of Panhandle Health District 1. This Code is adopted pursuant to the authority granted to the District Board of Health under Chapter 4, Title 39, Idaho Code. The provisions of the Code are supplementary, and should be interpreted in a manner consistent with Chapter 1, Title 39, Idaho Code and any state or federal laws which establish exclusivity or primacy in a field of rule for another public entity as a matter of law. ()

01. Conflict. In the event of any conflict between city or county ordinances or heretofore existing rules of county health boards and departments and this Code, the respective provision which more completely protects public health or the environment, prevails. Nothing in this Code is deemed to prevent the enforcement of any standard, or rule relating to air, water, or health quality now existing or hereinafter adopted by the State Board of Health and Welfare or any interested agency of the federal government. Nothing in this Code is deemed to conflict with the enactment by any city or county in the District of any ordinance or rule placing additional restrictions or limitations which contribute to enhancement of water, air, land, or health quality. Where the provisions of this Code conflict with state or federal statutes or rules which preempt regulation of a particular subject or application of this Code in a particular manner, the preemptive state rule or federal regulation prevails to the extent that application of the conflicting rules cannot be accommodated. ()

02. Policy. This Environmental Health Code is based on the recognition that pollution of the air, land, and waters of this district constitutes a menace to public health and welfare, creates public nuisances, is harmful to wildlife, fish, and other aquatic life, and impairs domestic, agricultural, industrial, recreational, and other beneficial uses of air, land, and water. It is the duty of the Board to establish the quality standards of the environment in the interest of health, individual and community alike, and to prevent the outbreak and spread of dangerous and infectious disease. ()

001. TITLE AND SCOPE.

01. Title. This chapter is titled IDAPA 41.01.01, “Rules of Idaho Public Health District #1.” ()

02. Scope. These rules govern issues concerning the mission of Idaho Public Health District #1 as established by the Idaho Legislature, in particular addressing matters of local concern in order to protect public health and the environment in the counties that comprise the District. ()

002. OFFICE – OFFICE HOURS – MAILING ADDRESS – STREET ADDRESS.

01. Office Hours. 8 a.m. to 5 p.m., except Saturday, Sunday and legal holidays. ()

02. Mailing and Street Address. The District’s mailing/street address is: Panhandle Health District, 8500 N. Atlas Road, Hayden, ID 83835. ()

003. -- 009. (RESERVED)

010. DEFINITIONS.

The following definitions apply: ()

01. Board. The Board of Panhandle Health District 1. ()

02. Code. Environmental Health Code of Panhandle Health District 1, including the several sections which follow and the entire series of rules now and hereinafter adopted by the Board and by the State Board of Health and Welfare. ()

03. Floathouse. A watercraft that is not self-propelled and with a dwelling place on it for habitation by human beings, whether said habitat is seasonal, itinerant, temporary, or permanent; and whether the floathouse is attached to land, floating free in the water, or tied to a fixed structure. ()

04. Health Officer. Means the Director of Panhandle Health District 1, or any agent or employee

thereof whose duties include enforcement of any provision of this Code. ()

05. Public Sewage Treatment Facility. Any sewage collection and treatment system with more than two (2) individual service connections. ()

06. Variance. A grant of relief from the literal application of a Panhandle Health District 1 rule upon a showing that undue hardship, related to unique characteristics of a site, would result from literal adherence to such rule. ()

011. -- 099. (RESERVED)

100. WATER QUALITY CONTROL.

01. Sewage and Waste Disposal: Political Subdivisions. Any political subdivision within the District may enter into a sewage management plan agreement with the District, the purpose of which will be to establish permanent sewage disposal practices that will fulfill the needs and goals of the political subdivision and the responsibilities of the District. The Board has authority to enforce the provisions of sewage management plan agreements. ()

02. Sewage and Waste Disposal: Prohibited Conditions. ()

a. Domestic sewage, septage, sanitary sewage, industrial waste, agricultural waste, sewage effluent, or human excreta is not allowed to remain open to the atmosphere or on the surface of the ground in such a manner so as to be a source of noxious or offensive odors, to be dangerous to health, or to be a public nuisance. ()

b. Domestic sewage, sanitary sewage, septage, industrial sewage, industrial waste, agricultural waste, sewage effluent, or human excreta is not allowed to endanger any source or supply of drinking water, or cause damage to any public or private property. ()

c. Raw or untreated sewage, septage, or industrial waste, or agricultural waste is not allowed in any body of water, water course, or any underground water drain, any storm water drain, channel, or other surface water drain. ()

101. -- 109. (RESERVED)

110. SEWAGE DISPOSAL ON THE RATHDRUM PRAIRIE IN KOOTENAI COUNTY, IDAHO.

The Board has determined that extensive use of subsurface wastewater disposal on the Rathdrum Prairie presents a threat to the public health by contamination of the Rathdrum Aquifer, which is a drinking water source. It is the intent of the Board to adopt rules to govern subsurface sewage disposal on the Rathdrum Prairie. ()

01. Title. These rules, within this Section, are known and cited as the "Rathdrum Prairie Sewage Disposal Rules." ()

02. Scope. The provisions of this Section apply to subsurface sewage disposal systems installed on the Rathdrum Prairie. ()

03. Definitions. The following definitions apply to the Rathdrum Prairie sections of these rules. ()

a. Sewage Loading. The total liquid volume of sewage produced on any given parcel of land and expressed as gallons/day. ()

b. Dwelling Equivalent. The total sewage loading from a single family dwelling. When applied to structures or facilities other than housing units, a dwelling equivalent shall be equal to two-hundred and fifty (250) gallons per day or be equal to twenty (20) persons using a non-residential facility on forty (40) hour per week basis, with no wastewater generation except from restrooms. ()

c. Rathdrum Prairie. That area of land situated in Kootenai County and more particularly defined by the USGS map describing the boundaries of the Rathdrum Prairie Aquifer identified and designated under the authority of Section 1424(e) of the Safe Drinking Water Act (PL 93-523) (Federal Register, Vol. 43, No. 28 -Thursday, February 9, 1978). ()

d. Sewage Management Plan. A method of action, procedure, or arrangement approved by the Panhandle Health District 1 describing how collection, treatment, and disposal of sewage shall be addressed within the boundaries of a political subdivision and include a map of the area affected by the Sewage Management Plan. ()

04. Subsurface Sewage Disposal Systems. ()

a. All installations of subsurface sewage disposal systems must be made in compliance with the Code and the rules of the Idaho Department of Environmental Quality. ()

b. A subsurface sewage disposal system for one (1) dwelling equivalent may be installed without requirements other than Subsection 110.04.a., if the system is on a single parcel of land of five (5) acres or larger in surface area and the total loading for that parcel does not exceed one (1) dwelling equivalent per five (5) acres, except where one (1) system is replacing another. Every parcel of land created after December 20, 1977, except as otherwise permitted by these rules, maintains the dwelling equivalent(s) allowed for the original parcel of land. ()

c. No subsurface sewage disposal system may be installed on any parcel of land of less than (5) five acres in surface area except under the following conditions: ()

i. The parcel of land is located within the boundaries of a public sewer district or municipality where the governing board has adopted a Sewage Management Plan approved by the Board which will result in the construction and operation of, or connection to, a central sewage treatment plant. The Sewage Management Plan area must be entirely within the boundaries of the municipality, and the Sewage Management Plan must include a map delineating the boundaries of the Sewage Management Plan Area; ()

ii. Parcels of land less than five (5) acres in size and acquired or established prior to December 20, 1977, will be permitted for a subsurface sewage disposal system for a single-dwelling equivalent, provided such parcels meet all other rules governing individual and subsurface sewage disposal systems; or ()

iii. Where one (1) subsurface sewage disposal system is replacing another with no increase in sewage loading. ()

d. On all developments subject to the provisions of Subsection 110.04.c.iii., the subsurface sewage disposal system needs to have the dry or wet sewer system with necessary laterals installed within the development. All installations need to be done in coordination with local government planning, and approved by the state Department of Environmental Quality where applicable. ()

e. Upon notification by the Health Officer the owner of any parcel of land utilizing a subsurface sewage disposal system shall disconnect such system from any buildings on his parcel of land and connect the building sewer from the buildings to a collection and treatment system whenever it becomes available for service to his parcel. ()

111. -- 199. (RESERVED)

200. OPEN WATER PROTECTION.

01. Boats and Houseboats. ()

a. It is unlawful for any boat, motorboat, floathouse, sailboat, or any other kind of boat containing wastewater facilities to be on the waters of any stream, river, or lake in Panhandle Health District 1 unless such wastewater facilities shall be sealed to prevent a discharge into any waters. The method of sealing such wastewater facilities is subject to the approval of Panhandle Health District 1. ()

b. Any person authorized by the Health Officer or any law enforcement person may stop and board any boat on the said waters and examine the wastewater facilities on such boats to see that such facilities are properly closed and sealed. ()

c. It is unlawful for any person to throw overboard, dump, or otherwise dispose of or discharge, or cause, permit, or suffer to be discharged, any garbage, refuse, rubbish, waste, or sewage from any boat into or upon the waters of any stream, river, lake, or other body of water within the boundaries of Panhandle Health District 1. ()

d. If any watercraft located upon the waters of this District is found to have a marine toilet which is not in compliance with the requirements of this section, the Health Officer shall have the following alternative or cumulative powers to: ()

i. Cause the marine toilet to be locked and sealed to prevent usage; ()

ii. Require such watercraft to be removed from the waters of Panhandle Health District 1 until the marine toilets are made to conform with the requirements of this Code. ()

02. Public and Private Marinas. ()

a. Any marinas, whether public or private, providing moorage for vessels equipped with on-board wastewater facilities shall provide sewage waste disposal facilities. These facilities shall consist of a pump station that is capable of adequately cleaning waste retention tanks on the largest boat that could reasonably use the moorage. Such plans must be approved by the Department of Environmental Quality. ()

b. All marinas, whether public or private, must provide shore-based toilet facilities for their users. ()

03. Floathouses. ()

a. All floathouses must have approved wastewater facilities. ()

b. All discharges from all floathouses, whether old or new, regardless of source, are prohibited. ()

201. -- 399. (RESERVED)

400. CRITICAL MATERIALS AT FIXED FACILITIES ON THE RATHDRUM PRAIRIE IN KOOTENAI COUNTY, IDAHO.

01. Purpose and Intent. The purpose and intent of this section is to provide agencies that are currently involved with emergency planning and emergency response duties and businesses with duties to report their handling of chemicals and other potentially hazardous materials, with a mechanism to meet the mandate of existing rules by facilitating channels of communication. It is also intended to aid in protection of the Rathdrum Prairie Aquifer in Kootenai County, designated as a sole source aquifer by the United States of America, from potential sources of contamination from materials handling and storage at facilities located over or adjacent to the Aquifer. The rules strive to achieve such protection through proper use of secondary containment systems at Fixed Facilities that use, store, manufacture or handle Critical Materials. Reporting these chemicals to the concerned agencies will facilitate coordination among industry, government agencies and response personnel so that they may more successfully meet the requirements of the following: ()

a. Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA III). ()

b. The International Fire Code. ()

c. The International Building Code. ()

- d. Local building, planning and zoning codes applicable to lands which overlie the Aquifer. ()
- e. Any applicable rules administered by any other state, federal or local agency which has jurisdiction over matters related to Critical Materials. ()
- 02. Definitions.** The following have the following definitions: ()
 - a. Container. Any vessel used to hold critical materials. A single container is one not connected to any other container by way of valves, piping, etc. ()
 - b. Critical Material. Any liquid, semi-liquid, flowable, or water soluble solid that is listed on the most current Superfund Amendments and Reauthorization Act, Title III (SARA III) List of Lists published by the Office of Solid Waste and Emergency Response, U.S. Environmental Protection Agency, Washington, D.C. or is required by the U.S. Occupational Safety and Health Administration to have a safety data sheet (SDS). ()
 - c. Critical Materials Compliance Certificate (CMCC). A certificate indicating compliance with the reporting and secondary containment requirements of this rule. ()
 - d. Critical Materials Use Activity. Any undertaking that involves the use, storage, manufacture or handling of Critical Materials at a Fixed Facility above the secondary containment quantity set forth in this rule, or incorporated into this rule by reference. ()
 - e. Director. The Director of Panhandle Health District 1 or his designee. ()
 - f. Fixed Facility. Any established land use, building, dwelling, structure or site upon which or wherein a Critical Material Use Activity is conducted. ()
 - g. Key Box. A durable, locked box that holds keys firefighters or other emergency personnel may use to gain entry into a structure. The key box needs to be a type approved by the local fire chief pursuant to Section 10.209 of the Uniform Fire Code. ()
 - h. Local Emergency Planning Committee (LEPC). A standing committee established by the Office of the Governor through the State Emergency Response Commission (SERC) to fulfill Emergency Planning and Community Right to Know requirements pursuant to SARA III. ()
 - i. Safety Data Sheets (SDS). Documentation required by OSHA to provide a description of the characteristics and potential hazards of a wide range of substances that are potentially Critical Materials. ()
 - j. NFPA 704. The National Fire Protection Association's placarding system used to identify the health hazard, flammability, reactivity and potential to react with water of a particular substance. ()
 - k. Secondary Containment Quantity. The quantity of a Critical Material that requires compliance with this rule. For those Critical Materials specifically listed in the SARA III List of Lists (or as otherwise noted) the following quantities of qualifying substances are subject to this rule: ()
 - i. SARA Section 302 Extremely Hazardous Substances - ten (10) pounds in the aggregate, exclusive of solvent or other medium or, one hundred (100) pounds in the aggregate, inclusive of solvent or other medium. ()
 - ii. CERCLA Hazardous Substances (listed in 40 CFR 302, Table 302.4) - one hundred (100) pounds in the aggregate, exclusive of solvent or other medium or, one thousand (1000) pounds in the aggregate, inclusive of solvent or other medium. ()
 - iii. SARA Section 313 Toxic Chemicals - one hundred (100) pounds in the aggregate, exclusive of solvent or other medium or, one thousand (1000) pounds in the aggregate, inclusive of solvent or other medium. ()
 - iv. SARA Section 311 and 312 Chemicals (Not listed in the List of Lists) for which OSHA MSDS

must be developed pursuant to OSHA Hazard Communication Standards - five thousand (5000) pounds in the aggregate, inclusive of solvent or other medium. ()

l. Secondary Containment System. Site improvements and/or development criteria that are designed to isolate and prevent Critical Materials from entering the soil or surface or ground waters. ()

m. Rathdrum Prairie Aquifer (Aquifer). The underground water source identified and designated under the authority of Section 1424(e) of the Safe Drinking Water Act (PL 93- 523) (Federal Register, Vol. 43, No. 28 - Thursday, February 9, 1978). ()

03. Applicability. ()

a. This rule applies to any person, firm, corporation, or government agency owning, operating, or proposing to locate, establish, or operate a Fixed Facility over the Aquifer or within a recognized Aquifer recharge area in Kootenai County, Idaho. Any Fixed Facility so located shall comply with the requirements of this rule prior to initiation of operation or engaging in any Critical Materials Use Activity, if established after the effective date of this rule. Every owner or operator of a Fixed Facility needs to show compliance with this rule by obtaining a Critical Materials Compliance Certificate appropriate for current operations. ()

b. The following activities require a new application to the Panhandle Health District 1 to determine compliance with this rule: ()

i. Establishing a new use that could qualify as a Fixed Facility. ()

ii. Remodeling, operating changes, or expansion of an existing Fixed Facility which would modify the type or quantity of Critical Materials Use Activity. ()

iii. Changes in the location or method of use, storage, manufacture or handling of Critical Materials in any Fixed Facility. ()

iv. A change in ownership or addition of new Critical Materials meeting the quantity thresholds established by this rule at a Fixed Facility. ()

c. Any CMCC granted is specific to that action and the application filed therefore. Subsequent actions, meeting the criteria set by Subsection 400.03.b., shall require separate plan reviews and approvals to obtain compliance. ()

d. All businesses over the Rathdrum Prairie Aquifer in Kootenai County are subject to inspection in order to determine if they are governed by this rule. ()

04. Application Requirements of Fixed Facilities Engaged in Critical Materials Use Activities. Each applicant for a Critical Materials Compliance Certificate must provide: ()

a. Sufficient information to allow the Director to determine the type, quantity, and physical state of all Critical Materials that are used, stored, manufactured, or handled at the Fixed Facility location. The Director may require the applicant to provide a complete list of Critical Materials present at the Fixed Facility. ()

b. Building plans and site development drawings showing compliance with the secondary containment requirements established by this rule. Such plans shall also provide confirmation that the secondary containment methods are compatible with the materials to be contained and that Critical Materials at the Fixed Facility are isolated from storm water or other surface waters on the site. The Director may require that any such plans be certified by a licensed engineer. The building and/or site plans need to show at least the following: ()

i. Location of Critical Materials in buildings and other designated site areas. ()

ii. Location of Key Box if needed by the local fire chief. ()

- iii. Location of NFPA 704 placards if needed by the local fire chief. ()
 - c. Proof of contact and resultant acknowledgment from the agencies named below which have codes, standards, and/or rules which must be met by the applicant with respect to handling of Critical Materials. The Director will designate the agencies needing contact for each Fixed Facility based upon information provided by the applicant. ()
 - i. Local Fire Department. ()
 - ii. Local Emergency Planning Committee. ()
 - iii. Kootenai County Department of Planning and Zoning. ()
 - iv. Kootenai County Building Department. ()
 - v. Applicable City Building Department. ()
 - vi. Applicable City Planning and Zoning Department. ()
 - vii. Bureau of Pesticides, Department of Agriculture. ()
 - viii. Department of Environmental Quality. ()
 - ix. Idaho Department of Water Resources. ()
 - d. An opportunity for Panhandle Health District 1 to perform an inspection to assure compliance with secondary containment criteria previously approved through the plan review. If approved, and the agency review and reporting checklist (Subsection 400.04.c.) has been completed, a CMCC will be issued. The Director may delegate site inspection duties to officials of a cooperating agency. ()
- 05. Performance Standards for Fixed Facilities.** Each Fixed Facility, as defined in this rule, needs to conform to the following performance standards: ()
- a. Construct and maintain a secondary containment system for all Critical Materials. Said secondary containment system shall be designed to prevent infiltration of any Critical Materials into the ground in the event that they are released from their original storage containers. ()
 - b. The secondary containment system and methods must be non-reactive and resistant to the materials to be contained and isolate the Critical Materials at the Fixed Facility from storm water, other surface waters on the site, and from reactive critical materials present in the same Fixed Facility. ()
 - c. Secondary containment systems must be sized to contain at least one-hundred and ten percent (110%) of the volume of the largest container, or ten percent (10%) of the aggregate volume of all containers, whichever is greater, in any containment area within a Fixed Facility. ()
 - d. The owner or operator of any Fixed Facility shall report the presence of any Critical Materials Use Activities to the responsible local, state, and federal agencies as specified by statutes, rules, and provisions of this rule. ()
 - e. Any spilling, leaking, emitting, discharging, escaping, or leaching of any Critical Material into the secondary containment system or the environment must be reported to Panhandle Health District 1 or the local fire department immediately upon discovery of the release. ()
 - f. Should conflict arise among the applications of local, state rules, and federal regulations regarding Critical Materials Use Activities, the rule that provides the greatest degree of protection to the Aquifer shall prevail, except where legal preemption of regulatory authority by state or federal agencies may require application of a different standard of protection. ()

g. Each Fixed Facility is subject to biennial inspection to verify continued compliance with these rules. ()

06. Violation. Any owner or operator of a Fixed Facility shall be deemed to have violated this rule if: ()

a. A Fixed Facility is operated or if Critical Materials Use Activities are conducted on any site without first procuring a Critical Materials Compliance Certificate or if changes are made to Critical Materials Use Activities at a Fixed Facility as set forth in Section 400.03.b. without reapplying for a CMCC for the Fixed Facility. ()

b. An owner or operator of a Fixed Facility submits knowingly false or incomplete reports to the Panhandle Health District or other responsible agencies or officials concerning the nature or quantity of Critical Materials present at a Fixed Facility governed by this rule. ()

c. An owner or operator fails to implement or maintain secondary containment of Critical Materials at a Fixed Facility as necessitated by this rule. ()

d. An owner or operator fails to comply with time and reporting standards for any Critical Materials Use Activities or fails to report any discharge of Critical Materials into the secondary containment system necessitated by this rule. ()

401. -- 499. (RESERVED)

500. CONTAMINANT MANAGEMENT IN THE BUNKER HILL SUPERFUND SITE, SHOSHONE COUNTY, IDAHO.

01. Legal Authority. The Idaho Legislature has given the Board of Health of the District the authority to promulgate rules governing contaminant management pursuant to Section 39-416, Idaho Code. ()

02. Purpose. The purpose of these rules is to ensure that activities involving excavations, building development, construction and renovation and grading within the Bunker Hill Superfund Site provide for the installation and maintenance of Barriers and implementation of other Contaminant management standards to preclude the migration of, and particularly, human exposure to Contaminants within the Site as necessary to protect the public health and the environment. It is imperative that redevelopment and future development proceed in a manner which minimizes the release of Contaminants into the air or water to minimize exposure to workers, Site residents and the communities. Further, it is the purpose of these rules to complement existing land use authorities and permitting processes, and to provide a screening process to determine whether proposed activities are subject to these rules. ()

03. Definitions. The following terms are defined as follows: ()

a. Applicant. Any person, contractor, public utility, government or other entity that is required to apply for an ICP Permit. ()

b. Barrier. Any physical structure, material or mechanism which breaks the pathway between contaminants and human receptors, including but not limited to walls, floors, ceilings, soil, asphalt, concrete, fences, control over access, or other structure or covering which separates contaminants from contact with people or keeps contaminants in place. ()

c. Board. The Board of Health of the District. ()

d. B.O.P. Barrier Option Plan, which will be provided by an Applicant when required; such plans needs to set forth the location and type of Barrier which the Applicant intends to construct as part of the permitted work. ()

- e.** Building Renovation. Construction activity to be performed on any structure involving any ceiling or insulation removal or disturbance of soil in basements or crawl spaces. ()
- f.** Contaminants. Soil or other materials containing, or likely to contain, lead in excess of the levels established in Section 510 of these rules. ()
- g.** Director. The Director of the District. ()
- h.** Disposal. The placement of Contaminants into an authorized permanent repository. ()
- i.** District or PHD. The Idaho Public Health District No. 1 (also the Panhandle Health District). ()
- j.** Excavation. Any digging, breaching or disruption of a soil or other protective Barrier which may expose Contaminants to the environment. ()
- k.** Hearing Officer. A lawyer, engineer or other professional trained in conducting hearings, appointed by the Board for purposes of conducting hearings authorized by these rules. ()
- l.** ICP. The Institutional Controls Program for the Site. ()
- m.** ICP Permit. The Contaminant management authorization for projects subject to these rules. ()
- n.** Large Project. A project within the Site where one (1) cubic yard or more of soil containing Contaminants is disturbed or removed. Large Projects also include, but are not limited to, new building construction, demolition of existing buildings and construction of subdivisions and planned unit developments (PUD's) (and the infrastructure necessary to serve them) and construction within and maintenance of rights-of-way. ()
- o.** Owner. Any person, partnership, or corporation having ownership, title, or dominion over property for which an ICP permit is sought. ()
- p.** Record of Compliance. The record maintained by the District pursuant to Section 011 of these rules for Small Projects. ()
- q.** Site. The Area within the boundaries of the Bunker Hill Superfund Site Allocation Map dated December 10, 1993 attached as Appendix 1 to these rules. ()
- r.** Small Project. A project where less than one (1) cubic yard of soil containing Contaminants is disturbed or interior work that is not Building Renovation. ()
- s.** Working Day. Monday through Friday, but does not include any holiday recognized as such by the state of Idaho. ()
- 04. Statement of Intent.** It is the intent of Idaho Public Health District No. 1 (the 'District') to work with local governments, the state of Idaho, the United States Environmental Protection Agency and private parties in managing Contaminants within the regulated area by way of an Institutional Controls Program (herein referred to as the ICP). These rules establish standards for Barrier installation and maintenance, and other Contaminant management practices. These rules govern management of Contaminants by: ()

 - a.** Requiring ICP permits and requiring barriers for certain construction and excavation activities; ()
 - b.** Licensing contractors, utilities, and government entities which may disrupt or install Barriers, or otherwise disturb Contaminants; ()
 - c.** Adopting performance standards; ()

- d. Inspecting for project compliance as required; ()
 - e. Regulating the movement and disposal of Contaminants; ()
 - f. Making it unlawful to knowingly disrupt a barrier in a fashion likely to expose persons to contaminants. ()
- 05. Additional Provisions by District.** In conjunction with these Rules it is the intent of the District to provide, as needed: ()
- a. Technical assistance and testing; ()
 - b. Health screening and intervention; ()
 - c. That there will be a readily available repository for Contaminants; ()
 - d. Clean soil to restore Barriers for Small Projects; ()
 - e. Disposal containers to assist in removing contaminated soil for Small Projects and transport and disposal of such soil; ()
 - f. Health and safety information and education to licensees and the public; ()
 - g. Plastic, gravel and use of vacuums for interior projects; ()
 - h. A database tracking system to assist the public, lenders, and potential purchasers of property within the Site; and ()
 - i. Guidelines for managing Contaminants. ()

501. -- 509. (RESERVED)

510. THE BUNKER HILL SUPERFUND SITE; APPLICATION OF REGULATIONS.

These rules apply to the Bunker Hill Superfund Site in Shoshone County, Idaho, more particularly as shown on the Bunker Hill Superfund Site Allocation Map identified as Appendix 1 to these rules. These rules do not apply to operations undertaken at the direction of, under the supervision of, and subject to inspection by, the United States Environmental Protection Agency. ()

01. Standards Adopted. ()

- a. All Barriers now or hereinafter constructed within the Site shall be maintained and protected. ()
- b. Except as otherwise provided in this section, Contaminant management is required in connection with any Large or Small Project or Building Renovation involving the breaching or disturbance of a Barrier or the disturbance or migration of Contaminants exceeding one thousand (1000) ppm lead. ()
- c. No new PUD or subdivision may be occupied where the average concentration of Contaminants exceeds three hundred fifty (350) ppm lead or a single lot exceeds one thousand (1000) ppm lead without Contaminant management on any portion of the property that exceeds these levels. ()
- d. As necessary to protect public health and the environment, PHD may impose Contaminant management requirements, other than Barrier installations, on projects where soils exhibit lead concentrations in excess of three hundred fifty (350) ppm lead, particularly where a property has been remediated with either six (6) or twelve (12) inches of clean fill but Contaminants in the three hundred fifty to one thousand (350 - 1000) ppm lead range remain below the six (6) or twelve (12) inch depth and those Contaminants may be disturbed by a Large or

Small Project. ()

e. No person may conduct, except in accordance with these rules, any activity within the Site which breaches a Barrier, may breach a Barrier, or disturbs the same, or otherwise results in a threat to public health or the environment from the migration of Contaminants through tracking on tires or vehicles, visible airborne dust, excavation, transport, disposal, remodeling, demolition, or run-on or run-off from stormwater or in any other manner. ()

02. Barriers; Construction and Maintenance. ()

a. Barriers are required as necessary to attain the standards described in Section 510. Temporary Barriers also may be required to prevent the migration of Contaminants during construction activities. ()

b. Types of acceptable Barriers for specific uses and activities are set forth in Appendices 3, 4, and 5. ()

c. All twelve (12) inch permanent permeable exterior Barriers required to be installed under the ICP which overlay soils having lead levels in excess of one thousand (1000) ppm shall have an underlying visual delineator at the twelve (12) inch depth. Visual delineators are not required if the soil underlying the Barrier has tested under one thousand (1000) ppm lead. Permanent impermeable Barriers such as concrete and asphaltic concrete do not require delineators. ()

d. The minimum Barrier requirements for residential properties and other properties that are frequently used by children (zero (0) to twelve (12) years) and/or pregnant women are as follows: ()

i. All soil which contains lead in excess of one thousand (1000) ppm and lies within twelve inches (12") of the final grade shall be removed, replaced, or covered as appropriate with clean earthen material such that, after all work is completed, the soil remaining in the top twelve inches (12") has less than one thousand (1000) ppm lead. Replacement material must meet the requirements listed in Section 008.06. Acceptable soil removal and Barrier thicknesses for these properties are set forth in Appendix 6. ()

ii. Any such property with unrestricted access to an adjacent property not meeting the requirements of Subsection 510.02.a. shall restrict access to such adjacent property. ()

e. The minimum Barrier requirements for properties that are not frequently used by children (zero (0) to twelve (12) years) and/or pregnant women are as follows: ()

i. All soil which contains lead in excess of one thousand (1000) ppm and lies within six inches (6") of the final grade shall be removed, replaced, or covered as appropriate with clean earthen material such that, after all work is completed, the soil remaining in the top six inches (6") has less than one thousand (1000) ppm lead, and the replacement material meets the requirements listed in Section 510.02.f. ()

ii. Acceptable soil removal and Barrier thicknesses for these properties are set forth in Appendix 7. ()

f. No earthen materials containing, on average, more than one hundred (100) ppm of lead or arsenic, nor more than five (5) ppm of cadmium, with no individual sample containing more than one hundred fifty (150) ppm of lead, shall be utilized for a Barrier. ()

g. Should any inconsistency exist between the wording of these rules and the wording in any appendix, the wording in the rule supercedes the wording in the appendix. ()

03. ICP Permits. ()

a. ICP Permits are required for: ()

i. Large projects; ()

ii. Building renovations. ()

b. A permit is required for a change in use of property which has Contaminants located thereon to a use which requires an additional or more substantial Barrier; constructing or establishing such additional Barriers shall be required, unless waived by the District. ()

c. A single annual permit covering a specific list of projects may be obtained from the District by entities eligible under Section 015 at the beginning of each year's construction season. ()

511. CONTAMINANT MANAGEMENT RULES IN THE BUNKER HILL SUPERFUND SITE OPERABLE UNIT #3 INSTITUTIONAL CONTROLS ADMINISTRATIVE AREA, SHOSHONE AND KOOTENAI COUNTIES, IDAHO.

01. Purpose. The purpose of these Rules is to ensure that activities associated with excavation and grading such as infrastructure development and maintenance; building construction and renovation; and land development, redevelopment and/or modification within the Institutional Controls Administrative Area of the Bunker Hill Superfund Site Operable Unit #3 (OU-3) provide for the construction and maintenance of Contaminant Barriers and implementation of other Contaminant management requirements to preclude the release and migration of Contaminants as necessary to protect the public health and the environment. It is imperative that current and future development and construction activities proceed in a manner which minimizes the release of Contaminants into the environment to minimize exposure to Area residents, communities, to workers involved in Area project work, and to environmental receptors. Further, it is the purpose of these Rules to complement existing land use regulations and permitting processes, and to provide a screening process to determine whether proposed activities are subject to these Rules. These Rules will rely upon procedures and provisions applicable to the Institutional Controls Program set forth in Section 500 of these rules. Differences identified in Sections 511 and 512 of these rules, is deemed applicable only to the lands encompassed by OU-3. ()

02. Implementation Policy and Standards. Implementation policy and standards which pertain to the interpretation and enforcement of these Rules or to the documentation of compliance with these Rules have been developed by PHD and are available for inspection and/or copying at cost at the PHD office, 35 Wildcat Way, Kellogg, ID 83837. ()

03. Definitions. The following terms are defined as follows: ()

a. Agricultural Land. Land used for pasturing animals or for cultivation and production of agricultural crops including conservation reserve activities. ()

b. Applicant. Any person, contractor, public utility, government or other entity that is required to apply for an Institutional Controls Program (ICP) Permit. ()

c. Access Restrictions. Physical barriers such as fences, barricades, curbs, barrier rocks, trenches, etc. that provide restricted access by vehicles, pedestrians, and animals to contaminated areas. ()

d. Barrier. Any physical structure, material or mechanism which acts to break the pathway between Contaminants and human receptors, including but not limited to soil, crushed aggregate/gravel, asphalt and Portland cement concrete, fences, access restrictions, or other structure or covering which separates Contaminants from contact with people or keeps Contaminants in place. ()

e. Board. The Board of Health of the Idaho Public Health District No. 1. ()

f. B.O.P. Barrier Option Plan, a plan which will be provided by an Applicant, when required, that sets forth the location and type of Barrier which the Applicant intends to construct as part of the permitted work. ()

g. Building Construction. Construction activity to be performed for any new structure involving disturbance of soil in excess of one cubic yard. ()

- h.** Building Renovation. Construction activity to be performed on any existing structure involving ceiling or insulation removal, work in dirt crawl spaces or basements, or disturbance of soil in excess of one cubic yard. ()
- i.** CERCLA. Comprehensive Environmental Response, Compensation, and Liability Act. ()
- j.** Commercial Property. Retail, wholesale and secondhand businesses; public and common use areas; public buildings; and undeveloped properties accessed by a maintained road or street and zoned for commercial development as of the date of promulgation of these Rules. ()
- i.** Type I. Commercial Property predominantly used by Sensitive Populations (e.g. daycare facilities, municipal parks, playgrounds, etc.) ()
- ii.** Type II. All other Commercial Property. ()
- k.** Contaminants. Soil or other material containing, or likely to contain, concentrations of lead equal to or greater than one thousand (1000) ppm or concentrations of arsenic equal to or greater than one hundred (100) ppm. ()
- l.** Developed Recreation Area. Commercial and public recreation areas containing constructed features such as boat ramps, picnic areas, and campgrounds outside the city limits of incorporated communities in the Coeur d’Alene River corridor as defined in Subsection 511.04.s. of these rules. The Developed Recreation Areas of the Trail of the Coeur d’Alenes includes all constructed trail surfaces, stop and views, oases (rest stops) and trailheads, exclusive of all undeveloped areas within the trail right of way. ()
- m.** Director. The Director of the Idaho Public Health District No. 1. ()
- n.** Disposal. The placement of Contaminants into an authorized repository. ()
- o.** Environmental Office. PHD office in Kellogg, ID. ()
- p.** Excavation – Any digging, breaching or disruption of soil not including cultivation of Agricultural Lands and gardens or mining activities regulated under other state and federal programs which may release or expose Contaminants to the environment. ()
- q.** Health Officer. The Director or designee. ()
- r.** Hearing Officer. An attorney, engineer or other professional trained in conducting hearings, appointed by the Board for purposes of conducting hearings authorized by these Rules. ()
- s.** Institutional Controls Administrative Area. The Area designated by the Administrative Area Map in Appendix 2 which includes areas of mining, milling, and smelting related contamination in the South Fork of the Coeur d’Alene River corridor from its headwaters to the confluence with the North Fork Coeur d’Alene River and from the confluence of the North and South Fork to the mouth of the River and its confluence with Coeur d’Alene Lake including adjacent floodplains, tributaries, and fill areas. The Area also includes the Trail of the Coeur d’Alenes inside and outside the administrative boundary indicated on the map in Appendix 2 except that portion within the exterior boundaries of the Coeur d’Alene Indian Reservation. The Area does not include any area within OU-1 and OU-2 (Box) which has a separate ICP, or any other area excluded under this rule. The Area also includes areas in the Coeur d’Alene River corridor, as defined above, outside the administrative boundary indicated on the map in Appendix 2 where testing has verified that Contaminants related to mining, milling, and smelting have come to lie and remediation is required. ()
- t.** ICP. The Institutional Controls Program for the Institutional Controls Administrative Area as defined in Subsection 511.05.s. of these rules. ()
- u.** ICP Permit. The Contaminant management authorization for projects subject to these Rules. ()

v. Infrastructure. Facilities such as trails, roads, streets, highways, bridges; storm water, drinking water, and wastewater systems; flood prevention systems including dikes and levees; and utilities including electrical power and natural gas systems. ()

w. Large Project. A project where one cubic yard or more of soil containing Contaminants is disturbed or removed. Large Projects include, but are not limited to, infrastructure construction and maintenance, building construction, renovation, and demolition, land development or any change in the use of land that may result in the release or migration of Contaminants. ()

x. Owner. Any person, partnership, or corporation having ownership, title, or dominion over property for which an ICP permit is required. ()

y. PHD. The Idaho Public Health District No. 1 (also the Panhandle Health District). ()

z. PUD. Planned Unit Development. ()

aa. Record of Compliance. The record maintained by the PHD pursuant to Section 523 of these rules for Small Projects. ()

bb. Release. Any excavation, spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, dumping, or disposing of Contaminants into the environment. ()

cc. Residential Property. Property used by private individuals or families as a residence, and undeveloped properties accessed by a maintained road or street and zoned for residential development as of the date of promulgation of these Rules. ()

dd. Sensitive Populations. Pregnant women and children up to twelve (12) years old. ()

ee. Small Project. A project where less than one (1) cubic yard of soil containing Contaminants is disturbed or interior work that is not Building Renovation. ()

ff. Trail of the Coeur d'Alenes. All Developed Recreation Areas and undeveloped areas within the former Union Pacific Railroad Mullan and Wallace Branch right of way. ()

gg. Working day. Monday through Friday, excluding any legal holiday recognized as such by the State of Idaho. ()

04. Statement of Intent. It is the intent of the PHD to work with local governments, the State of Idaho, the United States Environmental Protection Agency, Federal Land Management Agencies (Bureau of Land Management, USDA Forest Service), Coeur d'Alene Tribe, and private parties in managing Contaminants within the regulated Institutional Controls Administrative Area by way of an ICP. These Rules establish standards for Barrier construction and maintenance, and other Contaminant management practices. These Rules do not address financial liability for Contaminant management resulting from a failure of a CERCLA remedy due to a natural disaster. These Rules govern management of Contaminants by: ()

a. Requiring ICP permits and requiring barriers for certain construction and excavation activities; ()

b. Licensing contractors, utilities, and state and local government entities which may disrupt or construct Barriers, or otherwise disturb Contaminants; ()

c. Adopting performance standards; ()

d. Inspecting for project compliance as required; ()

e. Regulating the movement and disposal of Contaminants; ()

f. Making it unlawful to knowingly disrupt a barrier in a fashion likely to expose persons or the environment to Contaminants; ()

g. Maintaining records of ICP activities. ()

05. Additional Provisions by PHD. In conjunction with these Rules it is the intent of the PHD to provide, depending on project size and complexity and at the discretion of PHD: ()

a. Technical assistance and soil testing; ()

b. Health screening and intervention; ()

c. Readily available repositories for disposal of Contaminants; ()

d. Clean material to restore Barriers for Small Projects; ()

e. Disposal containers for Small Projects to assist in removal, transportation and disposal of contaminated soil; ()

f. Health and safety information and education to licensees and the public; ()

g. Sheet plastic, crushed aggregate and gravel, or other items as appropriate; ()

h. A database tracking system to assist the public, lenders, and prospective purchasers of property within the Institutional Controls Administrative Area; ()

i. Guidelines for managing Contaminants. ()

512. APPLICATION OF REGULATIONS; INSTITUTIONAL CONTROLS ADMINISTRATIVE AREA.

These Rules apply to the Institutional Controls Administrative Area as defined in Subsection 511.05.s. of these rules. These Rules do not apply to the direct operations of the United States Environmental Protection Agency including directing, supervising, and inspecting project work or on lands owned or otherwise under the jurisdiction, custody and control of the Coeur d'Alene Tribe or the Federal Land Management Agencies such as the USDA Forest Service and the Bureau of Land Management. These Rules do not apply to the Union Pacific Railroad or its contractors when conducting activities within the Trail of the Coeur d'Alenes pursuant to the requirements of the Consent Degree entered August 25, 2000 by the United States District Court for the District of Idaho (Case Nos. 91-0342 and 99-606). ()

01. Standards Adopted. ()

a. Except as otherwise provided in Section 512 of these rules, contaminant management is required on all properties within the Institutional Controls Administrative Area including properties that have been remediated; properties tested and scheduled for remediation; properties not yet tested; and properties testing below action levels in the top eighteen (18) inches where Large or Small Projects may disturb Contaminants below eighteen (18) inches in excess of one thousand (1000) ppm lead or one hundred (100) ppm arsenic. Contaminant management may include testing of untested areas by the Applicant; testing of deep soils (below eighteen (18) inches) by the Applicant where a project may result in deep excavations; and replacement and repair of remediation Barriers in accordance with Subsection 512.02 of these rules; or other management activities. Contaminant Management on Residential Properties and Commercial Properties existing as of the date of promulgation of these Rules and requiring remediation, but not yet remediated will not require construction of final barriers in accordance with Subsection 512.02 of these rules, by the owner, but may require dust, erosion, health and safety and temporary cap controls to prevent further migration onto lands of others. Final barrier construction will be the responsibility of the state of Idaho and United States Environmental Protection Agency if needed. Applicant performed soil testing will be conducted consistent with sampling and analytic procedures developed by PHD. ()

b. Developed Recreation Areas with surface soil containing lead concentrations greater than seven

hundred (700) ppm lead and one hundred (100) ppm arsenic shall be capped pursuant to Subsection 512.02.c. of these rules. ()

c. Agricultural and undeveloped land within the Institutional Controls Administrative Area are exempt from these Rules unless excavation and grading activities such as soil transport off site or development by the owner or his/her agents on these lands is likely to result in the release or migration of Contaminants from these lands to adjacent non-agricultural or undeveloped areas. ()

d. All Barriers existing or hereinafter constructed shall be maintained and protected to original construction specifications. ()

e. No new PUD or subdivision containing concentrations of Contaminants exceeding one thousand (1000) ppm lead or one hundred (100) ppm arsenic shall be developed without Contaminant management. ()

f. No person may conduct, except in accordance with these Rules, any activity within the Institutional Controls Administrative Area which breaches a Barrier, may breach a Barrier, or disturbs the same, or otherwise results in a threat to public health or the environment from the migration of Contaminants through tracking on tires or vehicles, visible airborne dust, excavation, transport, disposal, renovation, demolition, or run-on or run-off from stormwater or in any other manner on properties tested and requiring remediation and on properties not yet tested within the Institutional Controls Administrative Area ()

02. Barriers; Construction and Maintenance. ()

a. The minimum Barrier construction requirements for Residential and Type I Commercial Properties are as follows: ()

i. All soil which contains lead equal to or in excess of one thousand (1000) ppm or arsenic equal to or in excess of one hundred (100) ppm and lies within twelve (12) inches of the final grade shall be removed and replaced with replacement material meeting the requirements of Subsection 512.02.d. of these rules. ()

ii. Any such property with unrestricted access to an adjacent property not meeting the requirements of Subsection 512.01.a. of these rules, shall restrict access to such adjacent property. ()

b. The minimum Barrier construction requirement for Type II Commercial Properties is a six (6) inch soil with vegetative cover barrier or six (6) inch crushed rock/gravel barrier or asphalt/Portland cement concrete cap. Excavation may be necessary for the installation of barriers to maintain grade or drainage requirements. ()

c. The minimum Barrier construction requirement for Developed Recreation Areas is a six (6) inch soil with vegetative cover barrier or six (6) inch crushed rock/gravel barrier or asphalt/Portland cement concrete cap. Excavation may be necessary for the installation of barriers to maintain grade or drainage requirements. ()

d. All twelve (12) inch deep Barriers of soil or crushed rock/gravel required pursuant to the ICP which overlay soils having concentrations of lead equal to or greater than one thousand (1000) ppm or arsenic concentrations equal to or greater than one hundred (100) ppm shall have an underlying visual delineator at the twelve (12) inch depth. Visual delineators are not required if the soil underlying the Barrier has tested under one thousand (1000) ppm lead and one hundred (100) ppm arsenic. Cap Barriers such as Portland cement and asphalt concrete do not require delineators. ()

e. Soil and crushed aggregate/gravel imported for barrier material shall contain less than one hundred (100) ppm lead, thirty five (35) ppm arsenic and five (5) ppm cadmium based on average of backfill sampling results. No single sample of replacement materials may exceed one hundred fifty (150) ppm lead or forty five (45) ppm arsenic. ()

f. Barriers needs to be maintained and repaired to original construction specifications. ()

g. Contaminated waste material generated in the construction, maintenance and repair of Barriers shall be disposed of in designated repositories or as directed by PHD. ()

03. ICP Permits. ()

a. Permits are required for Large Projects and Building Renovations. ()

b. A permit is required for a project which changes the use of a property containing Contaminants. A new Barrier or additional or more substantial Barrier may be required unless waived by the PHD. ()

c. A single annual permit covering a specific list of projects may be obtained from the PHD by entities eligible under Section 531 of these rules, at the beginning of each year's construction season. ()

513. -- 519. (RESERVED)

520. PERMIT APPLICATION AND ADMINISTRATION.

01. Application for ICP Permit. Application for an ICP Permit shall be made in writing at the Kellogg office of the District on forms provided by the District. ()

02. Applicant Information. All Applicants shall provide the following information when applying for an ICP Permit with the District: ()

a. Name, address and telephone number of the Applicant and the property owner. ()

b. Location of the work and whether the work is being done on private or public property, or both. ()

c. Description of work. The description must include methods of handling or storing, and transporting contaminated materials. A site plan may be required by the District if one has not been provided pursuant to the permit process. ()

d. Dates work will be started and completed. ()

e. Such other information as the District requires. ()

03. Use of Discretion on Requirements by District. The District may, at its own discretion, waive certain application requirements or information, or require additional or alternative actions or information, depending upon the type and extent of the project and conditions encountered. In no instance may a waiver violate the intent of this rule and/or the Record of Decision for the relevant Operable Unit. ()

04. Site Inspection or Waiver When Permit Required. Work requiring a permit may not commence until a site inspection has been made or waived by the District and a permit has been issued. ()

05. Other Inspections and Requirements. All permits granted pursuant to this Rule remain subject to such other inspections and requirements prescribed by state or local governments. ()

06. Work Involving Public Right-of-Way. If the permit involves work within any public right-of-way, the appropriate agencies must be notified of the work by the entity receiving the permit. ()

521. INSPECTION.

The Applicant shall notify the District by telephone when work is completed. Applicants shall call for inspection in accordance with the terms of the permit; forty-eight (48) hours notice (excluding weekends and holidays) to PHD needs to be provided. The inspector will note approval of the work in writing and enter same in the database tracking system, or note reasons for disapproval and steps which must be taken to complete the work. Upon completion of the work to the District's satisfaction, the District's final approval will be noted in the database tracking system. Such entry constitutes the Record of Compliance for such project. All work governed by these regulations is subject to inspection by the District or its designated agents and it is unlawful to obstruct or hinder any official, inspector or designated agent making an inspection. The District may obtain an inspection warrant if access to the property is

refused. The District reserves the right to waive the inspection requirement. ()

522. PERMIT REVOCATION OR STOP WORK ORDER.

Any Permit may be revoked or a Stop Work Order may be issued, without notice by the District, for non-compliance with or violation of any of the provisions of this chapter or any requirement or limitation of the Permit. If a Permit is revoked, the District may take such steps as are necessary to eliminate any danger from contamination, including completion of work by the District. The Applicant, contractor and/or Owner may be required to pay all costs and expenses for abatement of any danger and/or completion of the project, including legal fees incurred by the District to obtain compliance. The District will endeavor to provide written notice, but reserves the right to act summarily to protect public health and the environment. ()

523. RECORD OF COMPLIANCE.

A Record of Compliance for Small Projects which documents compliance with the performance standards established by these rules will be entered into the database tracking system based upon an inspection requested of PHD by the property owner or tenant. The Record signifies the property owner or tenant was informed of and provided with applicable performance standards and guidelines and materially complied with the same. ()

524. -- 529. (RESERVED)

530. CONTRACTOR LICENSING.

01. License Required. Any contractor performing Large Projects, Building Renovation or transportation or disposal of Contaminants within the Site or the Institutional Controls Administrative Area which is likely to expose the contractor, workers or others to Contaminants, must be licensed by the District. There will be no charge for a contractor's license. It is unlawful for a contractor to work on a project requiring an ICP permit without a current contractor's license issued by PHD. A contractor's license will not be required of an owner working on his or her own property. ()

02. Training. In order to obtain a contractor's license from the District, the Contractor must have those supervisors involved in activities dealing with Contaminants participate in training approved by the District and pass an annual examination focusing on the reasons for, and methods of, controlling Contaminants. The purpose of the examination is to assure that all of the Contractor's employees are aware of and observe the procedures and standards that will protect themselves and the public from the Contaminants. The District will create and administer the test. The trained supervisor must pass information on to employees as is necessary to protect their health and safety and assure compliance with these rules. The District will provide training which owners and employees may participate in. ()

03. Bonding. Any contractor whose license has been revoked by the District within the past three (3) years must, as a condition of reinstatement and maintaining the status of a licensed contractor, be bonded in the minimum amount of two-thousand dollars (\$2000). Said bond shall be at least five percent (5%) of the cost of any contract the contractor is engaged in whichever is greater, be in a form approved by the District, and must be suitable to insure payment for completion of Barrier work not completed by the Contractor. A cash deposit or other security acceptable to the District may be utilized in lieu of a bond. The District may establish a bonding program for all contractors, if deemed necessary to carry out these Rules. ()

04. Suspension or Revocation of License. ()

a. Upon a showing that a licensee has violated any provision of these Rules, or has violated any other health or building code within the boundaries of the Site or Institutional Controls Administrative Area, suspension or revocation of license may be imposed. Suspension may be made by any District health officer. Revocation may be made by the Director upon recommendation of the District health officer. Notification of suspension or revocation must be in writing. No suspension may be made for more than thirty (30) days without approval of the Director. Revocation of license may be made by the Director upon a showing of good cause. ()

b. Appeal. Suspension or revocation may be appealed by the licensee to the Board in writing within thirty (30) days of receipt of notice of suspension or revocation. Appeal stays the suspension or revocation unless the Director makes a finding that such stay is likely to present a health risk to a person or persons. ()

c. Any decision by the Board pertaining to a suspension or revocation of a license may be made only after a licensee has been accorded an opportunity for hearing at which the licensee has a right to appear and be heard, to be represented by counsel, to testify, to present evidence, to call witnesses and to rebut any evidence presented. A transcribable recording of all such hearings will be made and retained for at least six (6) months. Such hearing may be conducted by a hearing officer designated by the Board or by the Board itself. ()

d. If a license is revoked, the contractor may, upon payment of any cleanup or remediation costs related to past work, reapply for reinstatement of license after one (1) year, however, a contractor whose license has been revoked may not obtain a new license under a different corporate or partnership status until this provision is satisfied. ()

531. LICENSES FOR PUBLIC UTILITIES AND GOVERNMENT ENTITIES.

Upon a demonstration that supervisory employees of a public utility or government entity (city, county, special purpose district, or state of Idaho) have participated in an education program approved by, or provided by, the District, a utility company or government entity may receive an annual license which will allow their employees to perform excavation and grading operations without obtaining individual ICP permits. This license may be granted by the District and will require that the utility comply with performance standards and all other regulations contained herein or adopted by Resolution of the Board. All supervisory employees involved in and responsible for excavation and grading operations shall have participated in a District approved education program. The trained supervisor must pass information on to employees as is necessary to protect their health and safety and assure compliance with these rules. The District will provide training which owners and employees may participate in. Entities licensed under this section shall maintain a log of all excavations and grading operations on a form approved by the District. Such logs need to be forwarded to the District on a regular basis determined by the District. All licensees shall telephone the Shoshone or Kootenai County one-call locating service, as appropriate, prior to any excavation or grading operations. Licenses shall be renewed annually upon a showing that the utility or government entity has operated in compliance with this rule. This license may also be revoked as provided in Subsection 530.04. ()

532. -- 539. (RESERVED)

540. PERFORMANCE OF WORK.

01. Completion of Work. All work done pursuant to an ICP Permit shall be completed in a neat and workmanlike manner and so scheduled as to cause the minimum interference with traffic or public use (if applicable) and a minimum dispersal of Contaminants. ()

02. Work Delayed by Applicant. If the work is unduly delayed by the Applicant, and if the public interest reasonably so demands, the District has the authority, upon twenty-four (24) hours' written notice to the Applicant, to complete the work to the extent that the Barrier is restored and any hazardous material covered or removed. The actual cost of such work by the District (including legal fees), plus fifteen percent (15%) as an overhead charge, shall be charged to and paid by, the Applicant and/or the Owner. ()

541. PERFORMANCE STANDARDS.

The Board will adopt, and from time to time amend, performance standards by Resolution; said standards to ensure that work is performed in a safe and responsible manner and specify how work will be completed. Said standards shall be applicable to, but not be limited to, the following: materials handling; dust control; erosion/runoff control; disposal; transportation; barrier construction; demolition; renovation; grading; and subdivision development. Performance standards so adopted will not amend any standard adopted within these rules, and these rules apply should any conflict arise between a rule and a performance standard. ()

542. APPROVAL OF ALTERNATIVE STANDARDS.

Any person aggrieved by the substantive requirements of these rules or the performance standards, may appeal these requirements by providing a written request for approval of an alternative standard. The appeal shall be accompanied by an engineering report indicating why the appealing party should be relieved of the requirement for compliance or why the requested alternate standard is appropriate. At the Applicant's expense, the District may consult with its own engineer to confirm the applicability of these rules to the proposed project. The District health officer may approve an alternate standard where such approval does not jeopardize the public welfare or existing Barriers. The decision of

the District health officer will be in writing, stating the reasons therefor. ()

543. OWNER AND APPLICANT RESPONSIBILITY FOR CLAIMS AND LIABILITIES.

Both the Owner and the Applicant are responsible to ensure that all rules contained herein are complied with. Applicant is responsible for all claims and liabilities arising out of work performed by the Applicant under the ICP Permit or arising out of the Applicant's failure to perform obligations with respect to these regulations. Owner is responsible for all claims and liabilities for work done by the Owner with or without a permit and for work done at the direction of the owner without a permit. Owner remains responsible to complete the project or restore the premises to a safe condition to the satisfaction of the District should the Applicant fail to complete or restore it. ()

544. -- 899. (RESERVED)

900. ADMINISTRATIVE PROCEDURES, EXCEPTIONS, PENALTIES.

01. Responsibility of Permit Applicant. It is the responsibility of any person applying for, or required to apply for, a permit by this Code, to show affirmatively, by all reasonable means, that his undertaking complies with this Code or with any related rules, statutes, or ordinances. ()

02. Permit Revocation. Any permit or permission, actual or implied, granted by the Health Officer or his predecessors may be revoked, for cause, by written notice sent to the permit holder or his agent. Any person, association, or corporation who continues to act under such permit or permission actual or implied, more than ten days after the sending or delivery of notice of revocation is presumed to be in violation of this code and subject to the penalties provided herein. ()

03. Variance Standards. A variance may be granted only upon an affirmative showing by an applicant that a unique and undue hardship is caused by a physical characteristic of a site that is not of the applicant's making and that approval of the variance would not be contrary to the public interest or to the purposes of the Code. ()

04. Variance Procedures. ()

a. An applicant for a variance shall obtain a Variance Application Form from Panhandle Health District 1 and, after completing the application form, return it to the Environmental Office. The Variance Application shall require the applicant to provide, in addition to information required by the application form itself, the following: ()

i. An accurate site plan showing development of the site in question, present and proposed, depicting all features relevant to the variance request. The Director, or his designee, shall identify information necessary to proper processing of the request if information other than that normally required needs to be supplied. The applicant shall describe the current and proposed use of the site in question. ()

ii. A narrative statement addressing the efforts, including consideration of design alternatives, which the applicant has undertaken to comply with the rule from which a variance is sought. ()

iii. A narrative statement explaining the nature of the hardship, if any, imposed by literal compliance with the rule in question. ()

iv. A narrative statement explaining the effects of the requested variance on the interests of adjoining landowners and/or of the public at large. ()

v. A narrative statement detailing what use could be made of the site in question if the requested variance were not granted. ()

b. The completed Variance Application shall be returned to the Environmental Office accompanied by an initial filing fee as established by the Board. The completed application shall be submitted to the Panhandle Health District 1 Hearing Officer who will determine whether, on its face, it sets forth a colorable claim for a variance from the Code. If the Hearing Officer determines that the application does not set forth a colorable claim for variance, he

will return the application to the applicant with a written explanation of the action taken. Said initial determination and the accompanying explanation will be forwarded to the Board which will act upon the Hearing Officer's initial determination by affirming it or remanding it to the Hearing Officer for further proceedings. ()

c. If the Hearing Officer determines that the application presents a colorable claim for a variance, he shall return the application to the Environmental Office with instructions to prepare a notice of public hearing concerning the requested variance. The applicant shall pay an additional processing fee if the Hearing Officer makes such a finding. Said fee may be adjusted as with all other Panhandle Health District 1 fees in accordance with a sliding scale coordinated with Federal poverty standards. ()

d. The Environmental Office staff will notify the applicant that his application has passed the initial screening and that the names and mailing addresses, on self-adhesive labels, of all owners of land located within three hundred (300) feet of the external boundaries of the site in question must be provided. Said names will be provided or checked by a land title company or other business whose commercial purpose it is to provide such information. The applicant is solely responsible for the accuracy of such information. ()

e. Using the mailing list provided by the applicant, notice of public hearing will be sent by first class mail and posted on the site in question in a conspicuous manner. The Environmental Office will maintain records verifying completion of the notification process. Mailing and posting shall be accomplished at least fifteen (15) days prior to the date of the hearing established by the Hearing Officer. ()

f. Upon the appointed date, the Hearing Officer shall conduct a public hearing concerning the variance request. The applicant, Panhandle Health District 1 staff, interested members of the public, and public agency representatives will be allowed to participate in such hearing. The Hearing Officer may establish time limits or other rules of procedure to expedite hearing of the request. The Hearing Officer shall establish a record of the hearing and see that a tape recording is made of the proceedings. Exhibits shall be identified in the record in order that they may be associated with the taped record of the hearing. ()

g. Upon completion of the hearing and compilation of the record in each application, the Hearing officer shall prepare a recommended decision which is transmitted to the Board for final action. The Hearing Officer may recommend that the application be approved, be approved with conditions, or that the application be disapproved. His recommendation shall set forth facts found relevant to the decision, legal principles applicable to the recommended ruling, and conclusions drawn from the hearing process. ()

h. At its next regular meeting, or as soon as the application can be placed upon its agenda, the Board will consider the record compiled and the Hearing Officer's recommendation and decide the request without further hearing by the Board. The Board may accept the recommendation of the Hearing Officer, may reverse the recommendation, or may modify the recommended decision for reasons to be found in the record. If the Board modifies or reverses the Hearing Officer's recommendation it shall set forth its reasons for doing so in writing with reference to parts of the compiled record or conclusions drawn therefrom. The Board may also elect to remand the request to the Hearing Officer for clarification or for further hearings to obtain information the Board deems essential. Confirmation of the Hearing Officer's recommendation may be accomplished by Board action adopting the Hearing Officer's decision as its own. Appeals from Board action may be taken in accord with provisions of Section 39-418, Idaho Code. ()

901. (RESERVED)

902. VIOLATION AND ENFORCEMENT.

Violation of any provision of these rules is subject to the following enforcement procedures: ()

01. Violation of Rules. Any person, association, or corporation, or the officers thereof, violating any of the provisions of these rules is deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine not exceeding three hundred dollars (\$300), or by imprisonment in the county jail for a term not exceeding six (6) months, or by both such fine and imprisonment. ()

02. Liability of Violator. In addition to fine and imprisonment, any person, association, or corporation, or the officers thereof found to be in violation of these rules is liable, by civil action or restitution, for any expense

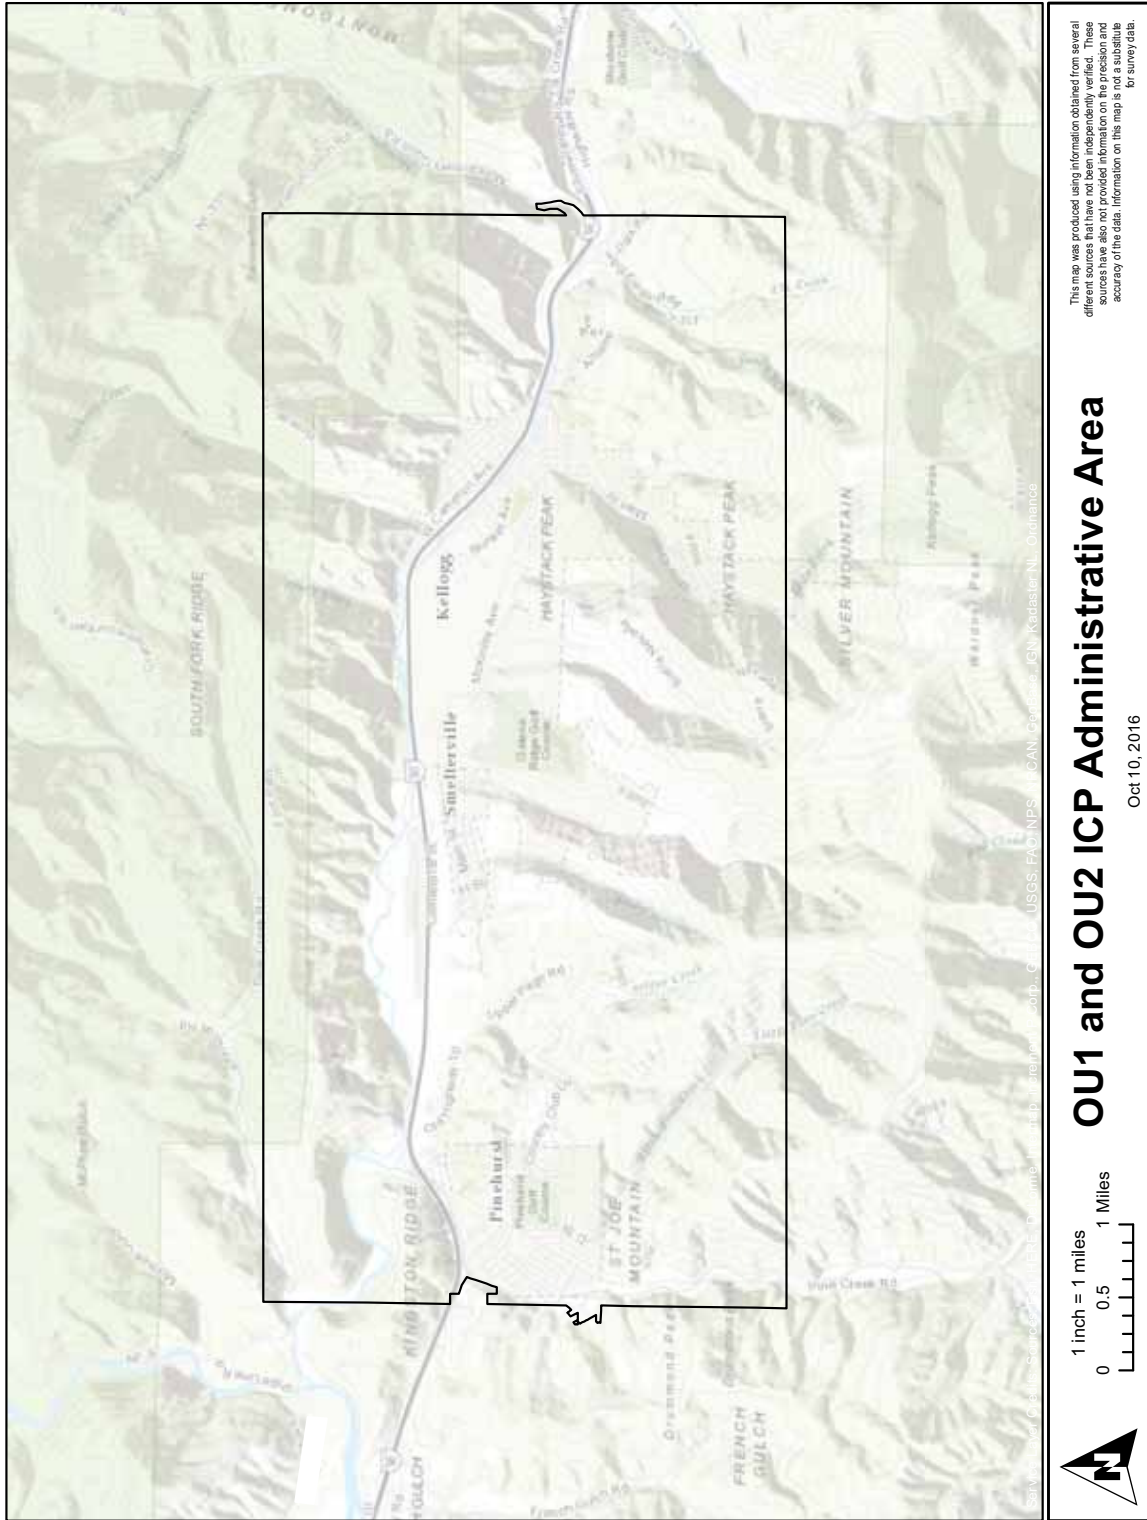

incurred by the District in enforcing this act, or in removing or terminating any nuisance or health hazard. ()

03. Other Action. Any person, association, or corporation, or the officers thereof is additionally subject to civil court action, including an injunction or restraining order, and to such penalties, costs, or fees as may be necessary to compel compliance. ()

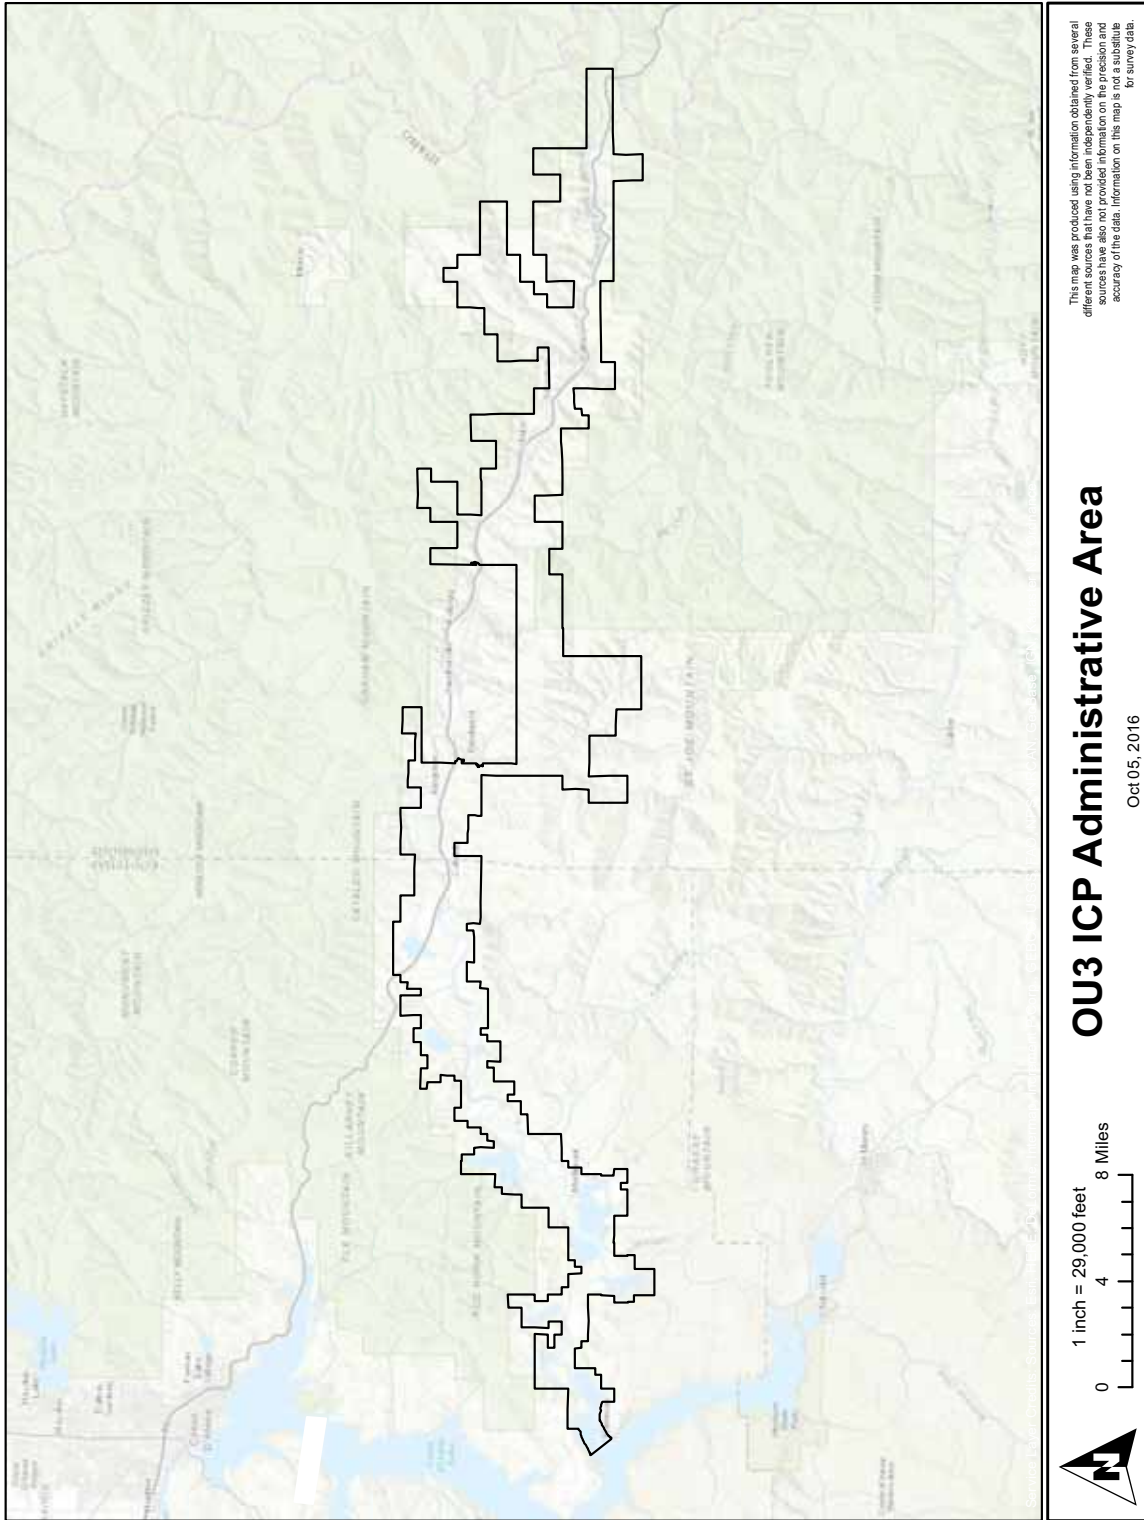

04. Successive Days in Violation. Each successive day in violation shall be considered a separate offense and be subject to individual penalties for each separate offense. ()

IDAPA 42 – IDAHO WHEAT COMMISSION

DOCKET NO. 42-0101-2000F

NOTICE OF OMNIBUS RULEMAKING – ADOPTION OF PENDING FEE RULE

EFFECTIVE DATE: This rule has been adopted by the agency and is now pending review by the 2021 Idaho State Legislature for final approval. Pursuant to Section 67-5224(5)(c), Idaho Code, this pending rule will not become final and effective until it has been approved by concurrent resolution of the legislature because of the fee being imposed or increased through this rulemaking. The pending fee rule becomes final and effective upon adoption of the concurrent resolution or upon the date specified in the concurrent resolution unless the rule is rejected.

AUTHORITY: In compliance with Section 67-5224, Idaho Code, notice is hereby given that this agency has adopted a pending fee rule. The action is authorized pursuant to Title 22, Chapter 33, Idaho Code.

DESCRIPTIVE SUMMARY: The following is a concise explanatory statement of the reasons for adopting the pending fee rule and a statement of any change between the text of the proposed fee rule and the text of the pending fee rule with an explanation of the reasons for the change.

This pending fee rule adopts and re-publishes the following existing rule chapter previously submitted to and reviewed by the Idaho Legislature under IDAPA 42, rules of the Idaho Wheat Commission:

IDAPA 42

- 42.01.01 *Rules of the Idaho Wheat Commission.*

There are no changes to the pending fee rule and it is being adopted as originally proposed. The complete text of the proposed rule was published in the Sept. 16, 2020, Idaho Administrative Bulletin, [Vol. 20-9SE, pages 2239-2241](#).

FEE SUMMARY: The following is a specific description of the fee or charge imposed or increased. This rulemaking does not impose a fee or charge, or increase a fee or charge, beyond what was previously approved and codified in the prior rules. The fees or charges, authorized in Section 22-3315, Idaho Code, allow for a three and one-half cents per bushel collection at point of first purchase.

FISCAL IMPACT: The following is a specific description, if applicable, of any negative fiscal impact on the state general fund greater than ten thousand dollars (\$10,000) during the fiscal year: This rulemaking is not anticipated to have any fiscal impact on the state general fund because the FY2021 budget has already been set by the Legislature, and approved by the Governor, anticipating the existence of the rules and fees being reauthorized by this rulemaking.

ASSISTANCE ON TECHNICAL QUESTIONS: For assistance on technical questions concerning this pending fee rule, contact Casey Chumrau, Executive Director, (208) 334-2353.

Dated this 18th day of November, 2020.

IDAPA 42 – IDAHO WHEAT COMMISSION

42.01.01 – RULES OF THE IDAHO WHEAT COMMISSION

000. LEGAL AUTHORITY.

In accordance with Section 22-3309, Idaho Code, the Idaho Wheat Commission has promulgated rules implementing the provisions of Title 22, Chapter 33, Idaho Code. ()

001. TITLE AND SCOPE.

01. Title. These rules are titled IDAPA 42.01.01, “Rules of the Idaho Wheat Commission,” IDAPA 42, Title 01, Chapter 01. ()

02. Scope. Pursuant to Section 22-3301, Idaho Code, the rules of the Idaho Wheat Commission promote the public health and welfare of the citizens of our state by providing means for the protection, promotion, study, research, analysis and development of markets concerning the growing and marketing of Idaho wheat. ()

002. -- 009. (RESERVED)

010. DEFINITIONS.

The definitions set forth in Section 22-3303, Idaho Code, apply to this chapter. ()

011 -- 099. (RESERVED)

100. WHEAT TAX RETURN FORM.

01. Form. Wheat Tax Return forms are available at the Commission office for use by the first purchaser (buyer) of Idaho grown wheat in transmitting the Idaho wheat tax to the Commission. ()

02. Procedures. At the end of each quarter, buyers shall execute the Wheat Tax Return (form). One (1) copy of the form and a check covering the entire amount of all wheat tax collections made during the quarter shall be mailed to the Executive Director of the Commission not later than the fifteenth day of the month at the end of each quarter (October 15, January 15, April 15, and July 15, respectively) of each calendar year. If no wheat has been purchased during any quarter, one (1) copy of the Wheat Tax Return form declaring that no wheat has been purchased, shall be signed and mailed to the Executive Director of the Commission. ()

101. MIXTURES.

When the grain is purchased as wheat, the tax must be collected on the full net weight of the grain purchased. The tax must also be collected on any mixtures containing fifty percent (50%) or more of wheat. ()

102. NET WEIGHT.

The tax must be collected on the net weight of the wheat after deduction of dockage and smut, and not upon the gross weight. ()

103. TRUCKERS.

When a trucker purchases wheat from a grower, it is his responsibility under the law to deduct the tax and remit the amount to the Commission. The trucker in such instances is liable for the deduction of tax. Those who purchase wheat from such truckers are not directly liable for the deduction of tax, but buyers should make sure that the trucker has in fact purchased the wheat from a grower and is not the person who produced the wheat. ()

104. WHEAT DELIVERED ON ACCOUNT OR EXCHANGED FOR OTHER WHEAT.

When wheat is delivered and credited to the account of a grower who is purchasing mixed feeds and other commodities, such transactions are really sales of the wheat delivered. In these cases, the buyer must deduct the tax from the amount credited to the grower and remit to the Commission just as though the sale had been made for cash. On the other hand, if the grower delivers the wheat in exchange for other wheat and no sale of the wheat is involved, the tax should not be deducted. ()

105. END USE.

Idaho wheat is subject to tax when it is first sold or contracted into commercial channels. Beside traditional uses of wheat for flour milling, domestic and export, commercial channels include sale of wheat for use as feed, or any industrial or chemurgic use. ()

106. -- 199. (RESERVED)

200. PENALTY FOR LATE PAYMENT OF WHEAT TAX.

01. Interest Penalties. Any person or firm who makes payment of wheat tax collections to the Commission at a date later than the fifteenth day of the month at the end of each quarter as prescribed in Subsection 100.02 of these rules, is subject to a late payment penalty of fifteen percent (15%) per annum on the amount due, unless that person or firm, within fifteen (15) days of the date, notifies the Commission in writing of any delay in payment and submits the payment of wheat tax collections within thirty (30) days of the prescribed due date. ()

02. Additional Penalties. The Commission is entitled, in addition to the penalty of fifteen percent (15%) per annum, to recover from the buyer, all costs, fees, and reasonable attorney's fees incurred in collecting the wheat tax collections and penalty as prescribed in Section 22-3315, Idaho Code. ()

201. -- 299. (RESERVED)

300. WHEAT UNDER COMMODITY CREDIT CORPORATION LOANS.

01. Payee. The Commission will be named as payee to receive three and one half cents (\$.3½) per bushel when the producer's note and loan agreement is executed by the Farm Service Agency (FSA). In such cases, the lending agency will send the tax directly to the Commission. When the producer's note and loan agreement shows that the tax has been deducted and sent to the Commission, it will not be necessary for the buyer to deduct the tax when the wheat is purchased. ()

02. Tax. Since the legislature has made the tax a lien prior to all other liens and encumbrances of the wheat, it is necessary for the grain buyer to make sure the tax has been paid in order to obtain clear title to the wheat. The tax should be deducted in all cases where there is not evidence that the tax was previously paid by a lending agency. In case errors occur and the tax is deducted by a lending agency and again deducted by a grain buyer, refund will be made by the Commission. ()

301. INVOICES AND RECORDS.

01. Invoices. Section 22-3316, Idaho Code, provides for invoices to be delivered to the grower for each purchase. The Wheat Commission is not providing a special form for this purpose and suggests that buyers use the final settlement vouchers of accounts of sale commonly used in Idaho. The amount of the Idaho state wheat tax deducted must be shown on each settlement voucher. ()

02. Vouchers. Buyers do not need to send the Commission copies of their settlement vouchers issued to individual growers but should keep copies available for examination by representatives of the Commission at a later date. Where it is not the practice to issue settlement vouchers of accounts of sale, buyers should be sure that they have accurate records of all wheat bought from growers and the amount of wheat bought from each grower. ()

03. Delivery of Documents to Commission. The first purchaser of wheat shall complete and return the Report of Tax, or equivalent, to the Commission office at the end of each production year (July 1 through June 30). The report is due on the same date as the final quarter wheat tax as specified in Section 22-3315(1), Idaho Code, and along with the following: ()

a. Name or names of the grower and seller; and ()

b. Address or addresses of the grower and seller. ()

302. -- 999. (RESERVED)

IDAPA 43 – IDAHO OILSEED COMMISSION

DOCKET NO. 43-0101-2000F

NOTICE OF OMNIBUS RULEMAKING – ADOPTION OF PENDING FEE RULE

EFFECTIVE DATE: This rule has been adopted by the agency and is now pending review by the 2021 Idaho State Legislature for final approval. Pursuant to Section 67-5224(5)(c), Idaho Code, this pending rule will not become final and effective until it has been approved by concurrent resolution of the legislature because of the fee being imposed or increased through this rulemaking. The pending fee rule becomes final and effective upon adoption of the concurrent resolution or upon the date specified in the concurrent resolution unless the rule is rejected.

AUTHORITY: In compliance with Section 67-5224, Idaho Code, notice is hereby given that this agency has adopted a pending fee rule. The action is authorized pursuant to Section 22-4710, Idaho Code.

DESCRIPTIVE SUMMARY: The following is a concise explanatory statement of the reasons for adopting the pending fee rule and a statement of any change between the text of the proposed fee rule and the text of the pending fee rule with an explanation of the reasons for the change.

This pending fee rule adopts and re-publishes the following existing rule chapter previously submitted to and reviewed by the Idaho Legislature under IDAPA 43, rules of the Idaho Oilseed Commission:

IDAPA 43

- IDAPA 43.01.01, *Rules Governing the Idaho Oilseed Commission.*

There are no changes to the pending fee rule and it is being adopted as originally proposed. The complete text of the proposed rule was published in the Sept. 16, 2020, Idaho Administrative Bulletin, [Vol. 20-9SE, pages 2242-2244](#).

FEE SUMMARY: The following is a specific description of the fee or charge imposed or increased. This rulemaking does not impose a fee or charge, or increase a fee or charge, beyond what was previously approved and codified in the prior rules. The fees or charges, authorized in Section 22-4716, Idaho Code, provide that if a person is late in paying the assessment on oilseed sold or contacted for, the fee rule sets a late payment penalty of twelve percent (12%) per annum on the amount due.

FISCAL IMPACT: The following is a specific description, if applicable, of any negative fiscal impact on the state general fund greater than ten thousand dollars (\$10,000) during the fiscal year: This rulemaking is not anticipated to have any fiscal impact on the state general fund because the FY2021 budget has already been set by the Legislature, and approved by the Governor, anticipating the existence of the rules and fees being reauthorized by this rulemaking.

ASSISTANCE ON TECHNICAL QUESTIONS: For assistance on technical questions concerning this pending fee rule, contact Benjamin Kelly, (208) 888-0988.

Dated this 18th day of November, 2020.

IDAPA 43 – IDAHO OILSEED COMMISSION

43.01.01 – RULES GOVERNING THE IDAHO OILSEED COMMISSION

000. LEGAL AUTHORITY.

The Idaho Oilseed Commission (hereinafter “Commission”) promulgates these rules implementing the provisions of Title 22, Chapter 47, Idaho Code. ()

001. TITLE AND SCOPE.

These rules are titled IDAPA 43.01.01, “Rules Governing the Idaho Oilseed Commission.” ()

002. -- 009. (RESERVED)

010. FIRST PURCHASER RULES.

01. Designated Quarters. In accordance with Section 22-4716, Idaho Code, the Commission shall designate the quarters (three (3) month periods) for the purpose of collecting the tax imposed by such statute as follows: ()

a. The Commission’s first quarter will begin on the first day of July and end the thirtieth day of September. The first quarter tax is due on or before the fifteenth day of October. ()

b. The Commission’s second quarter will begin on the first day of October and end the thirty-first day of December. The second quarter tax is due on or before the fifteenth day of January. ()

c. The Commission’s third quarter will begin on the first day of January and end the thirty-first day of March. The third quarter tax is due on or before the fifteenth day of April. ()

d. The Commission’s fourth quarter will begin on the first day of April and end the thirtieth day of June. The fourth quarter tax is due on or before the fifteenth day of July. ()

02. Oilseed Tax Invoice (Form Number 1). Pursuant to Section 22-4719, Idaho Code, the first purchaser of oilseed is required to complete and send the Oilseed Tax Invoice (Form Number 1) to the Commission office each and every quarter on or before the dates specified in these rules. Form Number 1 shall be on official forms as prescribed by the Commission and be provided to the first purchaser by the Commission and, at a minimum, require the following legible information: ()

a. The date of purchases and tax reporting period. ()

b. The name and address of the oilseed seller and purchaser. ()

c. The net weight of the oilseed sold in pounds or hundredweights. ()

d. The total amount of tax deducted from Idaho oilseed producers by the purchaser. ()

e. The total amount of tax due the Commission. ()

03. Late Payment Penalty. Per Section 22-4716(4), Idaho Code, any person or firm who makes payment to the Commission at a date later than prescribed by law, is subject to a late payment penalty of twelve percent (12%) per annum on the amount due. ()

011. -- 499. (RESERVED)

500. REFUND APPLICATIONS.

01. Assessment Refund. In accordance with Section 22-4717, Idaho Code, any seller may request from the Commission in writing, within thirty (30) days after payment thereof, a refund of all or any portion of an assessment levied on oilseed and paid by such seller. Sellers requesting an oilseed assessment refund, as specified in Section 22-4717, Idaho Code, are required to complete and return a refund application form (Form Number 2) to the Commission office no later than thirty (30) days after payment of the assessment. Form Number 2 will be available through the Commission office. Written requests for refund application forms must be sent to the Commission office.

()

02. Refund Application Form Number 2. Form Number 2 shall, at a minimum, require the following information from the applicant: ()

a. The applicant's name and address. ()

b. The applicant's federal tax identification number. ()

c. The first purchaser or lender who deducted the assessment from the applicant's settlement. ()

d. The applicant's date of settlement. ()

e. The hundredweight of oilseed sold by the applicant. ()

f. The dollar amount of oilseed assessment deducted from the applicant's settlement. ()

g. The applicant shall enclose evidence with the application proving the oilseed assessment was deducted by providing a copy of the invoice (Form Number 1) for which the refund is claimed. In the absence of a copy of the invoice, the Commission may, but is not bound to, accept other satisfactory evidence of payment. ()

IDAPA 48 – IDAHO GRAPE GROWERS AND WINE PRODUCERS COMMISSION

DOCKET NO. 48-0101-2000F

NOTICE OF OMNIBUS RULEMAKING – ADOPTION OF PENDING FEE RULE

EFFECTIVE DATE: This rule has been adopted by the agency and is now pending review by the 2021 Idaho State Legislature for final approval. Pursuant to Section 67-5224(5)(c), Idaho Code, this pending rule will not become final and effective until it has been approved by concurrent resolution of the legislature because of the fee being imposed or increased through this rulemaking. The pending fee rule becomes final and effective upon adoption of the concurrent resolution or upon the date specified in the concurrent resolution unless the rule is rejected.

AUTHORITY: In compliance with Section 67-5224, Idaho Code, notice is hereby given that this agency has adopted a pending fee rule. The action is authorized pursuant to Sections 54-3605(15) and 54-3610, Idaho Code.

DESCRIPTIVE SUMMARY: The following is a concise explanatory statement of the reasons for adopting the pending fee rule and a statement of any change between the text of the proposed fee rule and the text of the pending fee rule with an explanation of the reasons for the change.

This pending fee rule adopts and re-publishes the following existing rule chapter previously submitted to and reviewed by the Idaho Legislature under IDAPA 48, rules of the Idaho Grape Growers and Wine Producers Commission:

IDAPA 48

- 48.01.01, *Rules of the Idaho Grape Growers and Wine Producers Commission.*

There are no changes to the pending fee rule and it is being adopted as originally proposed. The complete text of the proposed rule was published in the Sept. 16, 2020, Idaho Administrative Bulletin, [Vol. 20-9SE, pages 2245-2247](#).

FEE SUMMARY: This rulemaking does not impose a fee or charge, or increase a fee or charge, beyond what was previously submitted to and reviewed by the Idaho Legislature in the prior rules.

The fees or charges, authorized in Section 54-3610 Idaho Code, are part of the agency's 2020/2021 fiscal year budget that relies upon the existence of these fees or charges to meet the state's obligations and provide necessary state services. Failing to reauthorize these temporary rules would create immediate danger to the state budget, immediate danger to necessary state functions and services, and immediate danger of a violation of Idaho's constitutional requirement that it balance its budget.

The following is a specific description of the fee or charge imposed or increased. This rulemaking does not impose a fee or charge, or increase a fee or charge, beyond what was previously approved and codified in the prior rules. The rule specifies the amount of grape and wine tax to be levied in accordance with statute. The rule also adopts a late payment penalty in accordance with statute.

- Seven dollars (\$7) per ton of grapes purchased by producers in Idaho during the previous calendar year for the production of wine in Idaho.
- Seven dollars (\$7) per ton of grapes harvested by growers in Idaho during the previous calendar year for the purpose of the production of wine in Idaho.
- Seven dollars (\$7) per ton of grapes purchased by producers outside Idaho during the previous calendar year for the purpose of the production of wine in Idaho.
- Four cents (\$.04) per gallons of grape juice purchased by producers outside Idaho during the previous calendar year for the purpose of the production of wine in Idaho.

FISCAL IMPACT: The following is a specific description, if applicable, of any negative fiscal impact on the state general fund greater than ten thousand dollars (\$10,000) during the fiscal year: This rulemaking is not anticipated to have any fiscal impact on the state general fund because the FY2021 budget has already been set by the Legislature, and approved by the Governor, anticipating the existence of the rules and fees being reauthorized by this rulemaking.

ASSISTANCE ON TECHNICAL QUESTIONS: For assistance on technical questions concerning this pending fee rule, contact Brenna Christison, (208) 332-1538.

Dated this 18th day of November, 2020.

IDAPA 48 – IDAHO GRAPE GROWERS AND WINE PRODUCERS COMMISSION

48.01.01 – RULES OF THE IDAHO GRAPE GROWERS AND WINE PRODUCERS COMMISSION

000. LEGAL AUTHORITY.

This chapter is adopted in accordance with Section 54-3605(15), Idaho Code. ()

001. TITLE AND SCOPE.

01. Title. The title of this chapter is IDAPA 48.01.01, “Rules of the Idaho Grape Growers and Wine Producers Commission.” ()

02. Scope. These rules include, but are not limited to, levy of taxes and penalties as provided by Section 54-3610, Idaho Code. ()

002. DEFINITIONS.

The definitions set forth in Title 54, Chapter 36, Idaho Code, apply to this chapter. ()

003. -- 019. (RESERVED)

020. TAX AND LATE PAYMENT PENALTY.

01. Levy and Rate of Tax. In accordance with Section 54-3610, Idaho Code, a tax is levied and imposed on wineries, grapes grown, used, or purchased, and grape juice purchased for the production of wine in Idaho. The rate of each tax is: ()

a. Seven dollars (\$7) per ton of grapes purchased by producers in Idaho during the previous calendar year for the production of wine in Idaho. ()

b. Seven dollars (\$7) per ton of grapes harvested by growers in Idaho during the previous calendar year for the purpose of the production of wine in Idaho. ()

c. Seven dollars (\$7) per ton of grapes purchased by producers outside Idaho during the previous calendar year for the purpose of the production of wine in Idaho. ()

d. Four cents (\$.04) per gallons of grape juice purchased by producers outside Idaho during the previous calendar year for the purpose of the production of wine in Idaho. ()

02. Minimum Levy. The minimum taxes paid by any grower or winery is one hundred dollars (\$100) annually. ()

03. Payment of Tax. All taxes must be paid on or before June 30 of each year as follows: ()

a. The grower harvesting grapes for the production of wine pays the tax levied upon the grower. ()

b. Each winery pays the tax levied upon the winery for the production of wine. ()

c. Purchasers of grapes grown or grape juice produced outside Idaho pay the taxes levied on such grapes and grape juice. ()

d. Purchasers of grape juice produced in Idaho pay the taxes levied on such grape juice. ()

04. Opt Out Alternative. A grower or producer may opt out of the levy of tax by submitting a letter to the Commission no later than June 30 of each year stating the grower or producer's name and address, and their intent to opt out of the application of the provisions of Title 54, Chapter 36, Idaho Code, for the upcoming fiscal year. ()

IDAPA 51 – IDAHO BEEF COUNCIL

DOCKET NO. 51-0101-2000F

NOTICE OF OMNIBUS RULEMAKING – ADOPTION OF PENDING FEE RULE

EFFECTIVE DATE: This rule has been adopted by the agency and is now pending review by the 2021 Idaho State Legislature for final approval. Pursuant to Section 67-5224(5)(c), Idaho Code, this pending rule will not become final and effective until it has been approved by concurrent resolution of the legislature because of the fee being imposed or increased through this rulemaking. The pending fee rule becomes final and effective upon adoption of the concurrent resolution or upon the date specified in the concurrent resolution unless the rule is rejected.

AUTHORITY: In compliance with Section 67-5224, Idaho Code, notice is hereby given that this agency has adopted a pending fee rule. The action is authorized pursuant to Section 25-2906 (9), Idaho Code.

DESCRIPTIVE SUMMARY: The following is a concise explanatory statement of the reasons for adopting the pending fee rule and a statement of any change between the text of the proposed fee rule and the text of the pending fee rule with an explanation of the reasons for the change.

This pending fee rule adopts and re-publishes the following existing rule chapter previously submitted to and reviewed by the Idaho Legislature under IDAPA 51, rules of the Idaho Beef Council:

IDAPA 51

- IDAPA 51.01.01, *Rules of the Idaho Beef Council*.

There are no changes to the pending fee rule and it is being adopted as originally proposed. The complete text of the proposed rule was published in the Sept. 16, 2020, Idaho Administrative Bulletin, [Vol. 20-9SE, pages 2248-2250](#).

FEE SUMMARY: The following is a specific description of the fee or charge imposed or increased. This rulemaking does not impose a fee or charge, or increase a fee or charge, beyond what was previously approved and codified in the prior rules. Assessments include \$1.50 per head of cattle at the time the cattle are sold. This includes one dollar (\$1.00) required by the National Beef Promotion and Research Act, and fifty cents (\$.50) authorized by Section 25-2907(1).

FISCAL IMPACT: The following is a specific description, if applicable, of any negative fiscal impact on the state general fund greater than ten thousand dollars (\$10,000) during the fiscal year: This rulemaking is not anticipated to have any fiscal impact on the state general fund because the FY2021 budget has already been set by the Legislature, and approved by the Governor, anticipating the existence of the rules and fees being reauthorized by this rulemaking.

ASSISTANCE ON TECHNICAL QUESTIONS: For assistance on technical questions concerning this pending fee rule, contact T.K. Kuwahara at (208) 376-6004.

IDAPA 51 – IDAHO BEEF COUNCIL

51.01.01 – IDAHO BEEF COUNCIL RULES

000. LEGAL AUTHORITY.

The Idaho Beef Council is authorized under Section 25-2906(9), Idaho Code, to adopt rules concerning the administration of the Beef Promotion Act. ()

001. TITLE AND SCOPE.

These rules are titled IDAPA 51.01.01, "Idaho Beef Council Rules," IDAPA 51, Title 01, Chapter 01. These rules provide for a coordinated federal and state program of beef promotion and research funded by a one dollar and fifty cents (\$1.50) assessment on each head of cattle marketed in the state of Idaho. ()

002. ADMINISTRATIVE APPEALS.

All contested cases are governed by the procedures set forth by the National Beef Promotion and Research Order, 7 CFR 1260, issued by the United States Department of Agriculture. All written communications and documents that are intended to be part of an official record for a decision in a contested case must be filed with the Chief Executive Officer of the Idaho Beef Council. All such documents are considered filed when the original and one (1) copy of each document is received by the Chief Executive Officer of the Idaho Beef Council. ()

003. INCORPORATION BY REFERENCE.

The Idaho Beef Council operates under the rules and regulations of the National Beef Promotion and Research Order, 7 CFR 1260 (Federal Register July 18, 1986). ()

004. -- 099. (RESERVED)

100. FUNDING.

01. Assessments. ()

a. Each producer shall pay an assessment of one dollar and fifty cents (\$1.50) per head of cattle at the time the cattle are sold. This assessment consists of: ()

i. One dollar (\$1) required by the National Beef Promotion and Research Order, and ()

ii. Fifty cents (\$.50) authorized by Section 25-2907(1), Idaho Code. ()

b. Producers selling or marketing cattle in interstate commerce will pay only one (1) assessment per individual sale of cattle. When cattle leave Idaho for the purpose of sale or slaughter, the assessment will be made at the time of brand inspection. When cattle leave Idaho for feeding or pasture where no change of ownership occurs, the promotion assessment will not be made. ()

c. When cattle enter Idaho for sale or slaughter, the assessment will be made only if the assessment has not been paid when the cattle left their state of origin. These cattle will be assessed by the Idaho Brand Inspector, but they will be considered cattle from their state of origin. All assessments will be remitted to the Idaho Beef Council, with these cattle indicated by their state of origin. The Idaho Beef Council will pay to the originating state the assessments due them in a timely manner after payment has been received from the State Brand Inspector. ()

d. The assessment implemented by this rule does not apply to the seller of cattle if the seller certifies that the seller's only share in the proceeds of a sale of cattle or beef is a sales commission, handling fee or other service fee; or if the seller certifies that he acquired ownership of cattle to facilitate the transfer of ownership of such cattle to a third party, establishes that such cattle are being resold not later than ten (10) days from the date on which the person acquired ownership and certifies that the assessment was collected from the seller when the person acquired ownership. A completed certificate of "non-producer status" must be given to the brand inspector or his agent at the time of inspection. If no certificate is produced the assessment will be levied. ()

02. **Collection.** The State Brand Inspector shall collect the assessment in addition to and at the same time and manner as the fee charged for state brand inspection. The assessment will be submitted each month to the Beef Council, less collection fee. In addition, the State Brand Inspector will submit monthly, a written accounting of total number of head marketed, number of cattle assessed and not assessed (along with copies of the appropriate non-

producer exemption forms), total collections, and state of origin documentation. ()

03. Refunds. ()

a. Producers/owners of cattle from whom an assessment is collected has the right to request a refund of not more than fifty cents (\$.50) per head (Section 25-2907, Idaho Code). Refund requests must be mailed to the Idaho Beef Council within ninety (90) calendar days of the assessment and include the: ()

i. Name and address of the producer; ()

ii. Name and address of the entity collecting the assessment (brand inspector or livestock market); ()

iii. Number of head on which a refund is requested; ()

iv. Total amount of refund requested; ()

v. Date of assessment; ()

vi. Producer's signature; and ()

vii. Proof of payment of the assessment. ()

b. The Idaho Beef Council will process the requested refunds on a calendar quarterly basis. Any refund request that is received by the Idaho Beef Council less than fifteen (15) days from the end of the calendar quarter shall be paid at the end of the next quarter. ()

101. -- 199. (RESERVED)

200. DISBURSEMENTS.

01. Collection Fee, Brand Inspector. The Idaho Beef Council will reimburse the State Brand Inspector for the reasonable and necessary expenses incurred in the collection of the assessment in an amount determined by the Beef Council and the State Brand Inspector, not to exceed five percent (5%) of gross collections. ()

02. National Beef Promotion and Research Board. The Idaho Beef Council will forward fifty cents (\$.50) credit per head of cattle assessed to the Cattlemen's Beef Promotion and Research Board. ()

03. Idaho Beef Council. Assessment funds remaining after payment of collection fee and disbursement to the National Beef Promotion and Research Board will be retained by the Idaho Beef Council and used to fund its activities and operations. ()

201. -- 299. (RESERVED)

300. PERSONNEL.

There will be a full time administrator whose title will be "Chief Executive Officer." Additional staff will be hired based upon Idaho Beef Council program needs and budget. ()

301. -- 999. (RESERVED)

IDAPA 52 – IDAHO STATE LOTTERY COMMISSION

DOCKET NO. 52-0103-2000F

NOTICE OF OMNIBUS RULEMAKING – ADOPTION OF PENDING FEE RULE

EFFECTIVE DATE: This rule has been adopted by the agency and is now pending review by the 2021 Idaho State Legislature for final approval. Pursuant to Section 67-5224(5)(c), Idaho Code, this pending rule will not become final and effective until it has been approved by concurrent resolution of the legislature because of the fee being imposed or increased through this rulemaking. The pending fee rule becomes final and effective upon adoption of the concurrent resolution or upon the date specified in the concurrent resolution unless the rule is rejected.

AUTHORITY: In compliance with Section 67-5224, Idaho Code, notice is hereby given that this agency has adopted a pending fee rule. The action is authorized pursuant to Section 67-7408(1), Idaho Code.

DESCRIPTIVE SUMMARY: The following is a concise explanatory statement of the reasons for adopting the pending fee rule and a statement of any change between the text of the proposed fee rule and the text of the pending fee rule with an explanation of the reasons for the change.

This pending fee rule adopts and re-publishes the following existing rule chapter previously submitted to and reviewed by the Idaho Legislature under IDAPA 52, rules of the Idaho State Lottery Commission:

IDAPA 52

- 52.01.03, *Rules Governing Operations of the Idaho State Lottery.*

There are no changes to the pending fee rule and it is being adopted as originally proposed. The complete text of the proposed rule was published in the Sept. 16, 2020, Idaho Administrative Bulletin, [Vol. 20-9SE, pages 2251-2300](#).

FEE SUMMARY: The following is a specific description of the fee or charge imposed or increased. This rulemaking does not impose a fee or charge, or increase a fee or charge, beyond what was previously approved and codified in the prior rules.

Sections 501 allows for an application fee for participating organizations and follow up fees based upon annual gross revenues. Section 601 allows for an annual license fee imposed upon vendors, those businesses or persons who manufacture, sell, distribute, furnish or supply gaming devices to Charitable Gaming organizations. Section 201 allows for an application fee for applicants interested in selling Lottery products. Subsection 205.13 allows for a reduced application fee if a current Lottery product retailer is interested in adding break open (PullTab) products to their portfolio. These fees or charges are being imposed pursuant to Section 67-7412, 67-7706, 67-7712 and 67-7715, Idaho Code.

FISCAL IMPACT: The following is a specific description, if applicable, of any negative fiscal impact on the state general fund greater than ten thousand dollars (\$10,000) during the fiscal year: This rulemaking is not anticipated to have any fiscal impact on the state general fund because the FY2021 budget has already been set by the Legislature, and approved by the Governor, anticipating the existence of the rules and fees being reauthorized by this rulemaking.

ASSISTANCE ON TECHNICAL QUESTIONS: For assistance on technical questions concerning this pending fee rule, contact Becky Schroeder, Chief Operating Officer, (208) 780-2501.

Dated this 21st day of October, 2020.

Jeffrey R. Anderson, Director
Idaho State Lottery

Boise, ID 83702
Phone: (208) 780-2500

IDAPA 52 – IDAHO STATE LOTTERY COMMISSION

52.01.03 – RULES GOVERNING OPERATIONS OF THE IDAHO STATE LOTTERY

SUBCHAPTER A – INTRODUCTORY PROVISIONS AND DEFINITIONS

000. LEGAL AUTHORITY.

These rules are adopted under the general legal authority of Title 67, Chapter 74, Idaho Code, and the specific legal authority of Sections 67-7401, 67-7404, 67-7406, 67-7408, and 67-7411, Idaho Code. ()

001. TITLE AND SCOPE.

The title of these rules is IDAPA 52.01.03, “Rules Governing Operations of the Idaho State Lottery.” The rules govern operations of the Idaho State Lottery. The rules also set forth which bingo games and raffles are legal in the state of Idaho and to bring all legal bingo games and raffles in the state of Idaho under the control of the Lottery. ()

002. -- 009. (RESERVED)

010. DEFINITIONS.

As used throughout these rules these terms have the following definitions: ()

01. Commission. The Idaho State Lottery Commission established and appointed according to Sections 67-7402, 67-7404(2) and 67-7405, Idaho Code. See Section 67-7702(4), Idaho Code. ()

02. Commissioner. A member of the Idaho State Lottery Commission. ()

03. Director. The Director of the State Lottery appointed and confirmed according to Section 67-7407, Idaho Code. ()

04. Lottery. The Idaho State Lottery created by Section 67-7402, Idaho Code, and, as context requires, the Lottery Commission and the Lottery’s officers and employees. ()

05. Person. See definition in Section 67-7702, Idaho Code. ()

011. -- 099. (RESERVED)

SUBCHAPTER B – OPERATIONS OF THE IDAHO STATE LOTTERY

100. DEFINITIONS.

These rules apply to Subchapter B only: ()

01. Administrative Costs. See definition in Section 67-7404, Idaho Code. ()

02. Benefit. Any thing, property or money, favorable consideration or advantage, profit, privileges, gain or interest to which a person is not otherwise entitled. ()

03. Certificate. The signed document issued by the Director authorizing a retailer to sell Lottery products. ()

04. Control Person. A person in a position of authority that is primarily defined according to organizational type. The following are control persons: ()

a. In a privately-owned corporation, the officers, directors, and stockholders of the parent company who own five percent (5%) or more of the company’s stock and, if applicable, any of its subsidiaries. ()

b. In a publicly-owned corporation, the officers and directors of the parent company and each of its subsidiaries. Additionally, stockholders who own five percent (5%) or more of the corporation’s stock are control persons. ()

c. In a trust, the trustee and all persons entitled to receive income or benefit from the trust. ()

- d. In an association, the members, officers, and directors. ()
- e. In a partnership or joint venture, the general partners, limited partners, or joint venturers. ()
- f. A member of the immediate family of any of who is a control person under Paragraphs 010.06.a. through 06.e. of this definition. ()
- g. A subcontractor of a vendor if the subcontractor performs more than half of the vendor's contract with the Lottery. ()
05. **Executive Staff.** The director of Lottery Security Division and the deputy directors appointed by the Director. ()
06. **Expenses.** See definition in Section 67-7404, Idaho Code. ()
07. **Fiscal Year.** The Lottery's fiscal year of twelve (12) months beginning on July 1 and ending on June 30. ()
08. **Gift.** A transfer, exchange or delivery of anything, property or money, of any value whatsoever, with or without an expectation by the giver to receive anything, tangible or intangible, in return. ()
09. **Immediate Family.** A natural person's spouse, children, brother, sister, or parent by blood, marriage, or adoption who resides as a member of the same household in the principal place of residence of any contractor, vendor, retailer, member, or employee of the State Lottery. ()
10. **Instant Game.** A game in which a ticket is purchased and upon removal of a latex or similar secure covering on the front of the ticket, the ticket bearer determines his or her winnings, if any. ()
11. **Invitation to Bid.** The solicitation of competitive offers in which specifications, price, and delivery (or project completion) will be the predominant award criteria. ()
12. **Lottery Contract or Contract.** Any contract entered into either by the Lottery or for the Lottery by another public agency, for the purchase, lease, or sale of goods or services. ()
13. **Lottery Contractor or Contractor.** See definition in Section 67-7404, Idaho Code. ()
14. **Lottery Employee or Employee.** Any person who works full- or part-time for the Lottery. ()
15. **Lottery Game or Game.** Any procedure authorized by the Commission whereby prizes are distributed among persons who have paid, or unconditionally agreed to pay, for tickets or shares which provide the opportunity to win such prizes. Lottery game themes must be approved by the Commission, be consonant with the dignity of the state. ()
16. **Lottery Game Retailer or Retailer.** See definition in Section 67-7404, Idaho Code. ()
17. **Lottery Revenue.** See definition in Section 67-7404, Idaho Code. ()
18. **Lottery Vendor or Vendor.** See definition in Section 67-7404, Idaho Code. ()
19. **Low, Medium and High Tier Claims.** See definition in Section 67-7404, Idaho Code. ()
20. **Major Procurement.** See definition in Section 67-7404, Idaho Code. ()
21. **Net Income.** See definition in Section 67-7404, Idaho Code. ()
22. **On-Line System.** The Lottery's on-line computer wagering system consisting of ticket issuing

- terminals, central processing equipment, and a communications network. ()
- 23. Play Symbols.** The numbers or symbols appearing in the designated area under the removable covering on the front of the ticket. ()
- 24. Prize.** Any award, financial or otherwise, awarded by the Director for successfully playing a Lottery game. ()
- 25. Redemption Value.** See definition in Section 67-7404, Idaho Code. ()
- 26. Request for Proposal.** The solicitation of competitive proposals, or offers, to be used in part as a basis for making an acquisition, or entering into a contract, when specification and price will not necessarily be the predominant award criteria. ()
- 27. Retailer Validation Code.** The symbols found under the removable rub-off covering over the play symbols on the front of each ticket. ()
- 28. Sensitive Procurement.** Those procurement actions or contracts, other than “major procurements,” that may either directly or indirectly affect the integrity, security, honesty, and fairness of the operation and administration of the Lottery. A typical example of this class of procurement is the acquisition of security systems that protect the security and integrity of the Lottery. ()
- 29. Share.** See definition in Section 67-7404, Idaho Code. ()
- 30. State Lottery Act of 1988 or Act.** The Act approved by the legislature creating the Lottery, which became effective November 23, 1988, as amended, which is codified at Title 67, Chapter 74, Idaho Code. ()
- 31. Subcontractor.** Any third party not in the employment of a contractor, who is performing all or part of the work in the contractor’s agreement with the Lottery under a separate contract with the contractor. The term “subcontractor” means subcontractor of any tier. ()
- 32. Temporary Retailer.** A retailer under contract with the Lottery for a temporary or seasonal period. A temporary contract may be subject to special conditions or limitations that the Director deems prudent. These limitations or conditions may include, but are not limited to: ()
- a. Length of ticket sale period; ()
 - b. Hours or days of sale; ()
 - c. Location of sale; ()
 - d. Specific persons who may sell Lottery tickets; ()
 - e. Specific sporting, charitable, social, or other special events where Lottery tickets may be sold. ()
- 33. Provisional Retailer.** A retailer granted a provisional certificate in accordance with these rules. A provisional certificate may contain some or all of the restrictions of a temporary retailer and additional restrictions deemed necessary by the Director. ()
- 34. Ticket.** See definition in Section 67-7404, Idaho Code. ()
- 35. Ticket Bearer.** The person who has signed the ticket or has possession of the unsigned ticket. ()
- 36. Ticket Validation Number or Validation Number.** The multidigit number found on the front of the ticket. It is either uncovered or found underneath the “Do Not Remove” area on the ticket or any stub. ()

37. Total Annual Revenue or Annual Revenue. The sum of all of the Lottery's proceeds and accrued income that is characterized as a reduction or recovery of expenses. ()

38. Unclaimed Prize. Any award, financial or otherwise, of more than twenty-five dollars (\$25) for which there is physical, tangible evidence of eligibility but for which the prize has not been paid within one (1) year. ()

39. Value. See definition in Section 67-7404, Idaho Code. ()

101. OPERATING PROVISIONS.

01. Purpose. These rules are established by the Commission to define and regulate the operation and administration of the Lottery and the Commission. ()

02. Lottery Commission. The Commission is charged with the authority and duty to regulate Lottery activities in the state of Idaho, consistent with the Idaho Constitution and the enabling legislation. The headquarters of the Commission and of the Lottery is in Boise. ()

03. Powers and Duties of the Commission. ()

a. Rule Promulgation. The Commission promulgates rules and conditions under which the statewide Lottery will be conducted. Subjects covered in such rules include but need not be limited to: ()

i. The types of Lottery games to be conducted; ()

ii. The prices of tickets in the Lottery; ()

iii. In general the numbers and sizes of prize disbursements, the manner and frequency of prize drawings, and the manner in which payment will be made to holders of winning tickets; ()

iv. The locations at which Lottery tickets may be sold, the manner in which they are to be sold, and contracting with Lottery vendors, retailers and contractors; ()

v. The manner in which Lottery sales revenues are to be collected; ()

vi. The amount of compensation to be paid to retailers; ()

vii. Other areas relating to the efficient and economical operation and administration of a statewide Lottery consonant with the public interest. ()

b. Delegation to Director. In addition to those duties assigned to the Director in the Act, the Commission may, insofar as is consistent with the Idaho Constitution and the Act, delegate the performance of executive or administrative functions to the Director. ()

04. Time and Place of Meetings. ()

a. Regular meetings of the Commission will be held at least quarterly; the date, time, and place will be set by the Commission and, if possible, with at least two (2) weeks' advance notice. The Commission may meet with the Director to make recommendations and set policy, to approve or reject reports of the Director, to adopt rules, and to transact other business. ()

b. Additional meetings necessary to discharge the business of the Commission may be called from time to time by the chairman or by a quorum of the Commission. ()

05. Open Meeting Law. All meetings of the Commission will be held in accordance with Idaho's Open Meeting Law, Sections 67-2340, et seq., Idaho Code, and in accordance with Section 67-7442, Idaho Code. All

meetings of the Commission are open to the public, except when executive session is allowed for part of the meeting under the Open Meeting Law. ()

06. Director. The Director is responsible for the operation of the Lottery and for managing the affairs of the Commission. A Deputy Director designated by the Director may act for the Director in the absence of the Director. If there is a vacancy in the office of Director, the Commission will designate the Deputy Director as Interim Director until the vacancy can be filled. ()

07. Powers and Duties of the Director. ()

a. The Director has the authority to implement and execute procedures that he may deem appropriate for the efficient administration of the Lottery. The Director may also recommend rules governing the establishment, administration, and operation of the Lottery to the Commission for its approval; ()

b. The Director is authorized to employ sufficient staff as may be required to carry out the functions of the Commission and the Lottery; ()

c. The Director may contract with retailers for the sale of Lottery games and will suspend or terminate any contract in accordance with the provisions of the Act and the rules of the Commission; ()

d. The Director will continuously study and investigate all matters pertinent to the efficient operation of the Lottery; and ()

e. The Director will maintain full and complete records of the operation of the Lottery and report on at least a monthly basis to the Commission and to the governor on the status of the Lottery. ()

f. The duties and responsibilities of the Director that are not otherwise specified in Idaho law or the rules adopted by the Commission may be maintained as a policy of the Commission for the purpose of establishing a working relationship between the Director and the Commission. ()

08. Lottery Budgets and Financial Statements. The Director must: ()

a. Submit quarterly financial statements to the Commission, the governor, the state treasurer, and the legislature. The quarterly financial statements must be prepared in accordance with generally accepted accounting principles and include a balance sheet, a statement of operations, a statement of changes in financial position, and related footnotes. The quarterly financial statements must be provided within forty-five (45) days of the last day of each quarter. ()

b. Submit annual financial statements to the Commission, the governor, the state treasurer, and each member of the legislature. The annual financial statements must be prepared in accordance with generally accepted accounting principles and must include a balance sheet, a statement of operations, a statement of changes in financial position, and related footnotes. The annual financial statements must be examined by the state controller or a firm of independent certified public accountants in accordance with generally accepted auditing standards and must be provided within ninety (90) days of the last day of the Lottery's fiscal year. ()

09. Contingency Reserve. ()

a. The Director may, with the approval of the Commission, allot from moneys available to pay administrative expenses an amount to be transferred to a contingency reserve established by the Commission. The money allotted can include amounts retained to fund specific future expenses or can be undesignated as to purpose. ()

b. When the Commission approves a contingency reserve, it must determine the amount necessary for a reasonable contingency reserve. ()

c. Upon approval of the Commission, money in the contingency reserve may be authorized to be used for specific purposes of the Lottery or to be used to fund general administrative expenses if there is a revenue

shortfall. Expenses funded from the contingency reserve cannot be included with other administrative expenses for purposes of determining compliance with current administrative expenditure limitations. ()

10. Special Drawings. ()

a. The Director may authorize special drawings to award prizes, such as vacation trips, automobiles, or other tangible items in addition to, or in lieu of, cash awards. The Director will determine the nature and number of awards for each special drawing. Special drawings for promotional awards may be held independently of the Lottery's regular prize drawings or may be incorporated therein. The promotional drawings may be cosponsored and conducted in conjunction with Lottery retailers or other independent businesses. In view of the temporary nature and indeterminate frequency of the promotional awards drawings, a press announcement and normal advertising media will be used to inform the public of the rules and prizes for each special drawing. ()

b. Notwithstanding the provisions of Paragraph 100.11.a. of this rule, the Director may, at his discretion, award in-lieu equivalent cash awards to the winners of tangible items, in those instances where the Director deems it appropriate. The value of noncash items will be estimated by using either the cost of the item or its fair-market value. ()

11. Retail Drawings. The Director and his designee may authorize retailers to conduct drawings using non-winning Lottery tickets in conjunction with a particular Lottery game. Such authorization will be in writing, specify the type of drawing to be conducted, and forth the methodology to be used in conducting the drawing. ()

12. Retail Ticket Price Discounts. ()

a. Notwithstanding the price adopted for the retail sale of a ticket in the rules for a specific Lottery game, the Commission may offer discounts for the retail sale of Lottery tickets. ()

i. Discounts for the retail sale of Lottery tickets may be offered to the public through the use of coupons approved by the Director or by any other method approved by the Director. ()

ii. Coupons that offer a discount on the retail price of Lottery tickets will be distributed using methods designed to reach the public. ()

b. Rules for a promotion conducted by the Lottery using retail ticket discounts will be published by the Director and made available at the Lottery's offices and retailer locations. ()

13. Allocation of Revenues for Prizes. ()

a. Purpose: The primary objective of the Lottery is to produce the maximum amount of net revenues to benefit the public purpose of raising revenue consonant with the dignity of the state and the sensibilities of its citizens. In accomplishing this objective, at least forty-five percent (45%) of the total annual revenues will be returned in the form of prizes. The Lottery may design and conduct games that return more than forty-five percent (45%) of the revenues received from the sale of tickets in the form of prizes as an incentive to increase the total amount of game sales over the level of sales that otherwise would have been reasonably expected using a lower prize percentage. Games may also be authorized that return less than forty-five percent (45%) of that game's revenues so long as forty-five percent (45%) of the total annual revenues is returned as prizes. ()

b. Prize payments: In addition to cash prize payments, money set aside by the Lottery and restricted for the payment of prizes is considered in satisfying the requirement of returning at least forty-five percent (45%) of total revenues to the public in the form of prizes. ()

c. Averaging game prize payments: Notwithstanding the prize structure adopted for a Lottery game, the amount of revenue returned for prizes among all the games offered by the Lottery may be reallocated so long as at least forty-five percent (45%) of the total revenue earned from all games is returned to the public in the form of prizes on an annual basis. The Director will report to the Commission on any reallocations made pursuant to Section 100 of these rules. ()

14. Ownership of Lottery Tickets. ()

a. Except for tickets claimed jointly in accordance with the provisions of Paragraph 100.14.d. of this rule, until a name is printed or placed upon a Lottery ticket in the designated area, the ticket is owned by the bearer, who is entitled to any prize attributable to the ticket. ()

b. If more than one (1) name appears on a ticket, the ticket must be claimed in accordance with the joint ownership procedures listed in Paragraph 100.14.d. of this rule. ()

c. Groups, family units, clubs, or other organizations may claim a winning ticket if the organization possesses a Federal Employer Identification Number (FEIN) issued by the Internal Revenue Service and that number is shown on the claim form. ()

d. If a ticket is claimed to be owned by two (2) or more people, the following steps will be taken for payment of the prize: ()

i. All people claiming ownership must complete and sign a claim form and declare their percentage of the prize prior to processing the claim. After the claim form is submitted to the Lottery, the percentage cannot be amended. The percentages claimed must add up to one hundred percent (100%) of the prize. ()

ii. At least one (1) of the people claiming ownership of the ticket must sign the ticket and also sign the claim form. ()

iii. The Lottery reserves the right to issue a single prize check instead of multiple prize checks to the owners of a ticket if the value of each individual prize check would be less than fifty dollars (\$50). ()

iv. Multiple winners of a Lottery prize will be paid only through the Boise Lottery office. Lottery retailers will not be required to pay more than one (1) winner of a single prize. ()

15. Claims. ()

a. Liability. By submitting a claim, the player agrees that the state, the Commission, the Lottery and all officials, officers, and employees of each are discharged from all further liability upon payment of the prize. ()

b. Publicity. By submitting a claim, the player also agrees that the Lottery may use the prize winner's name and photograph for publicity purposes. ()

c. Claim period. Prizes may be claimed for a period of one hundred eighty (180) days after the drawing in which the prize was won or from the last day tickets from the specific instant game were sold. Prizes won through an electronic terminal are payable in accordance with the Lottery's rules. If a claim is not made for the prize within the applicable period, the prize money may be added to future prize pools, to be used in addition to prize allotments already allocated, except as provided in Section 67-7433, Idaho Code. ()

d. Invalid tickets. If a ticket presented to the Lottery is invalid pursuant to the terms of these rules or the specific game rules, the ticket is not entitled to prize payment. ()

e. Ticket a bearer instrument. A ticket is a bearer instrument until signed in the space designated on the ticket for signature. The person who signs the ticket is considered the owner of the ticket. Payment of any prize may be made to a person in possession of an unsigned ticket. All liability of the state, the Commission, the Lottery, the Director, and Lottery employees terminates upon payment. ()

f. Time of prize payment. All prizes will be paid within a reasonable time after a claim is verified by the Lottery and a winner is determined. The date of the first installment payment of any prize to be paid in installment payments is the date the claim is validated and processed, unless a different date is specified for a particular game in these rules or in the specific game rules. Later installment payments will be made approximately weekly, monthly, or

annually, from the date the claim is processed and validated in accordance with the type of prize won and the rules applicable to the prize. The Lottery may, at any time, delay any prize payment in order to review a change in circumstances concerning the prize awarded, the payee, or the claim. ()

g. Prizes payable for winner's life. If any prize is for the life of the winner, only an individual may claim and receive the prize for life. If a group, corporation, or other organization is the winner, the life of the winner is deemed to be twenty (20) years. ()

16. Prizes Payable After Death of Winner. All prizes, and portions of prizes, that remain unpaid at the time of the prize winner's death will be payable to the personal representative of the prize winner's estate once satisfactory evidence of the personal representative's appointment has been provided, and the Director is satisfied that payment to the personal representative is lawful and proper. The Director may rely on a certified copy of a court order appointing a personal representative (or similar person responsible for the prize winner's estate, whether denominated an administrator, executor, executrix, or other representative of the prize winner's estate) or may petition the court to determine the proper payee. Payment to the personal representative of the estate of the deceased owner of any prize winnings will absolve the Director and the Lottery's employees of any further liability for payment of prize winnings. ()

17. Disability of Prize Winner. The Lottery may petition any court of competent jurisdiction for a determination of the rightful payee for the payment of any prize winnings that are or may become due to a person under a disability including, but not limited to, mental deficiency, or physical or mental incapacity. ()

18. Stolen or Lost Tickets. The Lottery has no responsibility for paying prizes attributable to stolen or lost tickets. ()

19. Effect of Game Rules. In purchasing a ticket the player agrees to comply with Title 67, Chapter 74, Idaho Code, these rules, the specific game rules, Lottery instructions and procedures, and the final decisions of the Lottery. The Lottery's decisions and judgments in respect to the determination of winning tickets or any other dispute arising from the payment or awarding of prizes will be final and binding upon all participants in the Lottery. If a dispute between the Lottery and a player occurs as to whether a ticket is a winning ticket and the prize is not paid, the Lottery may, solely at the Director's option, replace the ticket with an unplayed ticket of an equivalent price from any game or refund the price of the ticket. This will be the sole and exclusive remedy of the player. ()

20. Disputed Prizes. If there is a dispute, or it appears that there may a dispute concerning payment or ownership of any prize or any other legal issue involving the prize, the Lottery may refrain from making payment of the prize pending a final determination by the Lottery or by a court of competent jurisdiction as to the proper payment of the prize. ()

21. Sale of Lottery Tickets. Lottery tickets may be sold for cash, check, money order, credit card, electronic funds transfer, or debit card. ()

102. CONFLICT OF INTEREST POLICY.

01. Persons Subject to Conflict of Interest Policy. Every Commissioner, the Director, every Deputy Director, and every other Lottery officer and employee is considered a person subject to this rule on conflict of interest. If a statutory provision, rule, or policy applicable to the Lottery conflicts with Section 67-7443, Idaho Code, the more stringent provision applies. ()

02. Statements For Economic Interest. Every person listed in Subsection 110.01 of this rule, is prohibited from directly or indirectly, individually, or as a member of a partnership, or as a shareholder of a corporation, or as a participant in a joint venture or association with any other person, having an interest in dealing in a Lottery game or in the ownership or leasing of property used by or for a Lottery game. ()

03. Persons Ineligible For Prizes. Except as provided in Section 67-7440, Idaho Code, the following persons are disqualified from purchasing a Lottery ticket or share, and from receiving a Lottery prize: ()

a. Every person listed in Subsection 110.01 of this rule; ()

b. Any officer, director, or employee of any vendor of Lottery tickets or manufacturer of equipment used to determine winners in computerized Lottery games, and any of their subcontractors who may affect the security, integrity, or honesty of the Lottery; ()

c. Any Lottery contractor or consultant under agreement with the Lottery to review the Lottery's security procedures, and any other contractor or consultant that the Director deems ineligible if the Director reasonably determines that the security, honesty, and integrity of the Lottery may be adversely affected; ()

d. An immediate family member of any individual described in Paragraphs 110.03.a., 110.03.b., or 110.03.c. of this rule who is a member of the same household. ()

04. Gift Prohibitions. ()

a. Except as provided in Paragraph 110.03.b. of this rule, every person listed in Subsection 110.01 of this rule, including members of their immediate family, are prohibited from soliciting or receiving, directly or indirectly, a gift in excess of fifty dollars (\$50) from any person who might reasonably be expected to receive a benefit from the Lottery. ()

b. In appearances before civic groups and other organizations it is permissible to accept a meal if it is offered and it is the established practice of that group or organization. ()

05. Persons Prohibited From Providing Services. The following individuals and entities are prohibited from being a Lottery game retailer, Lottery vendor, or Lottery contractor, and shall not provide audits or study services as specified by Title 67, Chapter 74, Idaho Code: ()

a. Every person listed in Subsection 110.01 of this rule; ()

b. A member of the immediate family who is a member of the same household of any person listed in Subsection 110.01 of this rule; ()

06. Outside Activities Restricted. ()

a. The Director, all Deputy Directors, and all full-time Lottery officers and employees are required to render full-time service to the duties of their positions. Part-time, temporary, or seasonal Lottery employees are required to render service to the extent of their employment with the Lottery and are prohibited from accepting other employment that may conflict with the integrity of the Lottery. ()

b. Except when assisting another state lottery, no Commissioner, Director, Deputy Director or other Lottery officer or employee may provide consulting or contractual services, or accept an honorarium related to his State Lottery expertise. ()

c. When assisting another state lottery, it is permissible for the other state to reimburse normal travel costs to the individual providing the service, but no honorarium or pay to the individual will be accepted. If the other state has a policy of paying for the time of another state's employee while providing assistance, the payment will be made to the State Lottery. ()

d. Nothing contained in Paragraphs 110.06.a. through 110.06.c. of this rule precludes the Lottery from negotiating contracts in which the vendor to the Lottery must bear the expense of Lottery personnel making on-site inspections of the vendor's products or manufacturing facility, auditing the vendor, or other legitimate business reasons for traveling to the vendor's place of business or site of the vendor's records, and person listed in Subsection 110.01 of this rule may engage in travel at the vendor's expense for those legitimate business purposes. Nothing contained in Paragraphs 110.06.a. through 110.06.c. of this rule prevents a Commissioner, Director, Deputy Director or other Lottery officer or employee from participating in and traveling to educational or industry related programs. Actual expenses incurred may be reimbursed by a sponsoring entity if the integrity of the State Lottery is not adversely impacted. ()

07. Conduct of Commission Business. Business transactions conducted by the Commission, the Director, Deputy Directors, and all other Lottery officers and employees with Lottery vendors should be conducted in the Lottery's offices to the maximum extent possible. ()

08. Personal Conduct. Personal conduct that is illegal or generally considered improper or brings discredit to the Lottery may be subject to appropriate disciplinary action by the Director. ()

09. Use of Lottery Property. Every person listed in Subsection 110.01 of this rule is prohibited from using any Lottery vehicle or other Lottery property for personal use, except that telephones, computers, etc., may be used for personal use in the manner ordinarily accepted in an office setting when that use does not result in additional expense to the Lottery and when that use does not contravene state policy. ()

10. Signature of Conflict Policy Required. Every person listed in Subsection 110.01 of this rule is required to sign the following conflict of interest policy as a condition of employment. "I have read and understand the pertinent Sections of Idaho Constitution Article 7, Section 10, and Title 59, Chapter 7, Idaho Code, and these conflict of interest policies."

200. LOTTERY CONTRACTING RULES.

01. Classification of Lottery Contracts. ()

a. Lottery contracts for the acquisition of materials, supplies, services and personal and professional services are classified according to relative sensitivity, which in turn determines the level of review, procurement method and the extent of disclosure required by Lottery vendors or if no disclosure is required as in the case of Lottery contractors. The three (3) levels of procurement are as follows: ()

i. General procurements: These procurements are the least sensitive and are for materials, supplies, equipment, services and personal and professional services required to satisfy the day-to-day administrative, ministerial and operating needs of the Lottery. Disclosure filings by Lottery vendors are not normally required for this class of procurements. Lottery contractors may supply general procurement items. The Lottery may use formal invitations to bid, informal competitive quotes and requests for proposals to solicit contracts for these acquisitions, as may be determined by the Director to be the most appropriate process for a specific acquisition. ()

ii. Sensitive procurements: These procurements are of intermediate sensitivity and are for materials, supplies, equipment, services and personal and professional services which may have direct or indirect impact upon the security, credibility and integrity of the Lottery. Also included are special studies and services required by statute (demographic, communications and performance studies). The normal procedure for acquiring the materials and services is by request for proposal; however, the Director may authorize the use of competitive quotes when the cost of the acquisition is less than fifteen thousand dollars (\$15,000). The Director may prescribe special disclosure requirements governing Lottery contractors or vendors for this class of contracts. ()

iii. Major procurements: This class is the most sensitive of Lottery contracts. The Lottery Act requires these procurements to be let by the Commission and the filing of comprehensive disclosure statements by Lottery vendors. ()

b. The procedures for announcing or soliciting various classes of Lottery contracts outlined in Paragraph 200.01.a. of this rule are intended to be advisory only and do not limit the Commission or the Director in the selection of the most appropriate process to acquire a given product or service. ()

02. General Policy. ()

a. In all decisions affecting the Lottery, the Commission and Director are specifically directed by statute to take into consideration the particularly sensitive nature of the Lottery and to act in a manner to promote and insure the integrity, security, honesty and fairness of the Lottery. Additionally, the Director, in awarding contracts in response to solicitations for proposals, must award the contracts to the responsible contractor or vendor submitting the lowest and best proposal that provides maximum benefits to the state in relation to cost in the areas of security, competence, experience, timely performance, and maximization of net revenues to benefit the public purpose of the Lottery. Consistent with these statutory directives, it is the policy of the Lottery, to the extent possible, to conduct its contracting affairs in an open, competitive manner. However, the security and integrity of the Lottery are fundamental and overriding considerations in all decisions. ()

b. Although the Lottery is exempt from the provisions of Section 67-5715, Idaho Code, it is the policy of the Lottery to conduct its contracting affairs generally in accordance with the state's competitive bidding principles contained in Section 67-5715 et seq., Idaho Code, and consistent with the specific directives contained in Paragraph 200.02.a. of this rule. In implementing this policy, the Lottery reserves the right to use the procedures developed by the Department of Administration as guidelines to govern its procurement actions. Notwithstanding this reservation, the Lottery also reserves the right to use alternate contracting and purchasing practices that take account of market realities and modern or innovative contracting and purchasing methods that are also consistent with the public policy of encouraging competition. These methods may include, but are not limited to, specialized vendor prequalifications, competitive negotiations, performance incentives and disincentives, life cycle costing and solicitations emphasizing the request for proposal process. ()

c. When the Lottery uses a Request for Proposal (RFP) for a planned acquisition, the major considerations in determining the contract award will be the quality of the product or service, the likelihood of timely performance, and price. Qualitative factors normally address issues like the Vendor's demonstrated experience in performing comparable projects, performance credibility, availability of qualified personnel and equipment, and other special factors as may apply to a particular contract. The RFP will normally specify the criteria that will be used in the evaluation of offers and the award of the contract. ()

d. Because of the specialized character of Lottery contracts, the Lottery will not normally advertise bid proposals. Rather, the Lottery will circulate bid and proposal requests for materials, equipment and services to vendors known to specialize in the required procurement or to vendors that the Lottery may reasonably expect to have an interest in providing such services. The Lottery will develop its mailing lists as the service need arises. ()

e. The Director may prepare standard terms and conditions to govern the acquisition of materials, supplies and services by the State Lottery. To the extent possible, the standard terms and conditions should be as uniform as possible with the standard terms and conditions governing contracts entered into by other state agencies. ()

f. All major departures from the state contracting guidelines referred to in Paragraph 200.02.b. of this rule will be approved by the Commission. If there is a conflict between the state guidelines and the Lottery's adopted rules, the Lottery's rules take precedence. ()

03. Delegation of Purchasing Authority. ()

a. Authority is granted to the Director to initiate all purchase actions and enter into and execute contracts for materials, supplies and services, on behalf of the Commission and the Lottery, except as follows: ()

i. General contracts having an estimated one-time or annual cost in excess of fifty thousand dollars (\$50,000); ()

ii. Contracts defined as Sensitive Procurements having a one-time or annual cost of more than fifty thousand dollars (\$50,000); ()

iii. Contracts defined as Major Procurements; ()

iv. All personal service contracts other than major or sensitive procurements having a one-time or

annual cost in excess of fifteen thousand dollars (\$15,000); and ()

v. Procurement actions which are executed in a manner other than as provided in the contract exemption guidelines. ()

b. Notwithstanding the provisions of Subparagraph 200.03.a.i. of this rule, the Commission, having once approved a planned procurement action involving a general contract acquisition, grants authority to the Director to execute a contract or contracts for the purchase or service without further action by the Commission. ()

c. The Commission, having once approved a particular contract, delegates authority to the Director to make all disbursements and payments as provided in the contract, without further, specific approval action by the Commission. ()

d. The Commission grants authority to the Director to enter into emergency contracts when immediate and decisive action is required to protect the security, credibility or integrity of the Lottery or a Lottery game. All emergency contracts let by the Director in which the cost exceeds the delegated authority contained in Paragraph 200.03.a. of this rule, must be reported to the Commission within five (5) days of the contract award date, or at the next scheduled Commission meeting, whichever is sooner. Such procurement actions may be taken without competitive bid. The dollar value of a contract awarded by the Director under the provisions of this section may not exceed fifty thousand dollars (\$50,000). Any emergency contract for a major procurement in which the cost exceeds fifty thousand dollars (\$50,000), if not acted upon at a regularly scheduled Commission meeting, is subject to Commission approval by telephonic or electronic vote. ()

04. State Central Services Agenda. As provided in Section 67-7408, Idaho Code, the Lottery may contract with other state agencies for the performance of contracting responsibilities that may be required by the Lottery. Those services may include, but are not limited to, the acquisition of Fidelity and Faithful Performance Bonds covering the Commissioners, officers, and employees of the Lottery; bonding of retailers, annuity contracts; general equipment and supplies; equipment financing agreements; and disposal of surplus Lottery property. The Lottery is bound by all statutes and rules governing the actions of the state agency when the Lottery uses such services. ()

05. Idaho Preference. ()

a. In all contracts, the Lottery will prefer goods or services that have been manufactured or produced in this state if price, fitness, availability and quality are otherwise equal. ()

b. Where a Lottery contract is awarded to a foreign contractor and the contract price exceeds ten thousand dollars (\$10,000), the contractor must promptly report to the Idaho Tax Commission (ITC) on forms to be provided by ITC the total contract price, terms of payment, length of contract and such other information as the ITC may require before final payment can be received on the Lottery contract. The Lottery must satisfy itself that the requirements of this Paragraph have been complied with before it issues a final payment on a Lottery contract. For the purposes of this Paragraph, a foreign contractor is one who is not domiciled in or registered to do business in Idaho. ()

06. Equal Opportunity/Affirmative Action Contracts. The Lottery is an equal opportunity employer and also participates in any on-going state affirmative action programs. ()

07. Personal Services Contract. ()

a. Contracts between the Lottery and persons or firms such as advertising agencies, security consultants, auditors, other consultants required to conduct or prepare special studies and reports and other personal services contracts that may be required to fulfill the Lottery's responsibilities, will be awarded as outlined in this Subsection. The award of contracts will be either direct, informal or formal depending upon the sensitivity and estimated dollar value of the contract. In awarding personal services contracts, the Lottery will consider the contractor's qualifications in similar areas of demonstrated competency, availability, experience in successfully performing comparable projects, availability of qualified personnel, likelihood of timely performance, history of cost containment, compensation requirements and other special factors that may apply to a particular contract. ()

- b.** Direct Award Procedures. ()
- i. Any personal services contract having an estimated one-time or annual value of ten thousand dollars (\$10,000) or less may be awarded directly by the Director if the Director believes reasonable steps have been taken to obtain competitive quotes, if feasible, and the award will not negatively affect the security, credibility or integrity of the Lottery. ()
- ii. The Director, with the approval of the Commission, may directly award personal services contracts in any appropriate or reasonable amount, without competitive solicitations, when the project consists of work that has been substantially described, planned or otherwise studied in an earlier Lottery contract and the new contract would be a continuation of the earlier project, provided that the earlier contract was awarded by a formal selection procedure. In awarding contracts under this provision the Commission and Director will take into account the effects of that action on the security, credibility and integrity of the Lottery and further ensure that the contract awards will not encourage favoritism or substantially diminish competition and will result in substantial cost savings to the Lottery. ()
- iii. The Director, with the approval of the Commission, may directly award personal service contracts without competitive solicitation when an emergency or other condition exists that requires prompt and decisive action. The Commission and Director may exercise the provisions of this Paragraph only when immediate action is required to correct a situation that would threaten integrity, security, honesty, and fairness in the operation and administration of the Lottery or the objective of raising net revenues for the benefit of the public purpose described in the Act. ()
- c.** Informal Award Procedure: The Director may award any personal services contract having an estimated one-time annual value of more than ten thousand dollars (\$10,000), but not more than twenty-five thousand dollars (\$25,000), if the following informal award procedure is followed: ()
- i. An attempt is made to obtain a minimum of three (3) competitive quotes. If three (3) quotes are not available, fewer will suffice provided a written record is made of the effort to obtain three (3) quotes. ()
- ii. A written record must be maintained of the source and amount of quotes received. ()
- iii. The contract award will be made to the lowest priced vendor who best meets the contract award criteria of Paragraph 200.07.a. of this rule. ()
- iv. The Director maintains work papers documenting the basis of the award to ensure that the award will not negatively affect the security, credibility and integrity of the Lottery. ()
- d.** Formal Award Procedures: Unless otherwise awarded under the provisions of Subparagraphs 200.07.b.ii. or 200.07.b.iii. of this rule, all personal services contracts having an estimated one-time or annual cost of more than twenty-five thousand dollars (\$25,000) must be awarded according to the formal award procedure, as follows: ()
- i. The Lottery will distribute copies of the proposal (usually a Request for Proposal) to Lottery vendors or to appropriate contractors who have indicated an interest, or are anticipated to have an interest, in providing the required service to the Lottery. Every Request for Proposal will include a response deadline date. All responses received by the Lottery after the deadline may be rejected. ()
- ii. The Director will appoint an evaluation panel consisting of at least four (4) persons, at least two (2) of whom are members of the Lottery's staff. The Director of Lottery Security will be one of the appointees to evaluate the responses for any project involving the security of the Lottery. ()
- iii. The evaluation panel must develop a system to evaluate the vendor responses and score each vendor's response. Based upon this evaluation, the evaluation panel must rank the three (3) best responses and develop an award recommendation. ()

- iv. The contract will be awarded to the vendor who best meets the award criteria. ()
- e. No contract or other agreement for the purpose of providing services to the Lottery may be entered into, renewed, or extended with any person, unless the person certifies in writing, under penalty of perjury, that the person is not in violation of any Idaho tax laws on a form prescribed by the Idaho Tax Commission (ITC). A copy of the certification form may be obtained from the Lottery or the ITC. The original certification must be retained in the Lottery's contract file as required by the state's records retention guidelines. ()
- 08. Major Procurements.** ()
- a. All bid announcements, invitations, or proposals covering major procurements will identify that the planned acquisition is classified as a major procurement. ()
- b. All contracts or procurement actions classified as major procurements will be subject to the disclosure requirements specified in Section 67-7421, Idaho Code. Subsection 010.05 of these rules defines the term "control person" for purposes of disclosure requirements. The Lottery will enclose a copy of the disclosure requirements with each bid announcement or proposed request for such procurement. All disclosure filings are subject to the review and approval of the Director of the Lottery Security Division. Failure of any Lottery vendor to properly execute or timely submit the disclosure requirement may be grounds for rejection of the bid or proposal. ()
- c. No contract for a major procurement with any Lottery vendor may be entered into if any control person of that Lottery vendor has been convicted of a crime, other than traffic infractions. Background checks must be made by the Director of Lottery Security to rigorously enforce this requirement. ()
- d. The Lottery may prequalify Lottery vendors as having met the disclosure filing requirements for major procurements. The disclosure prequalifications may be renewed by July 1 of each year. The prequalifications will satisfy the disclosure requirements of the Act, providing a certification is received from the Lottery vendor at the time of submitting any subsequent bid, proposal or offer and that no changes have occurred in the vendor's status, or that of its control persons, since the last filing of the complete disclosure statement. ()
- e. Each Lottery vendor for a major procurement must maintain its disclosure filing in a current status during the tenure of the contract. Unless otherwise provided in the contract document, any changes in the status of the vendor, any of its listed control persons or additional control persons, must be reported to the Director within fourteen (14) days of the known change, and will require written submission of the same disclosure information to the Commission. ()
- f. Each Lottery vendor for a major procurement is required to post a performance bond with the Commission as provided in Section 67-7427, Idaho Code. The performance bond must be issued by a surety licensed to do business in this state and be for the duration specified in the procurement announcement. ()
- 09. Sensitive Procurements.** ()
- a. All bid announcements, invitations, or Requests for Proposal covering sensitive procurements as defined in Subparagraph 200.01.a.ii. of this rule will identify that the planned acquisition is a sensitive procurement and will be subject to the provisions of this rule. ()
- b. The Director may establish special disclosure requirements governing State Lottery contracts for sensitive procurements that will be included in the procurement announcement. Failure of any Lottery vendor or contractor to properly execute or timely submit the disclosure requirement may be grounds for rejection of the bid or proposal. All disclosure filings are subject to the review and approval of the Director of Lottery Security. ()
- c. No contract for a major procurement with any Lottery vendor may be entered into if any control person of that Lottery vendor has been convicted of a crime, other than traffic infractions. Background checks must be made by the Director of Lottery Security to rigorously enforce this requirement. ()
- d. The Lottery may prequalify Lottery vendors as having met the disclosure requirements of this rule.

The prequalification will satisfy the disclosure filing requirement providing a certification is received from the Lottery vendor, at the time of submitting any subsequent bid, proposal or offer, that no changes have occurred in the vendor's status or any of its principals since the last filing of the full disclosure statement. ()

e. Each Lottery vendor for a sensitive procurement must maintain its disclosure filing in a current status during the tenure of the contract. Unless otherwise provided in the contract document, any changes in the vendor's status or any of its principals, must be reported to the Director within fourteen (14) days of the known change, and will require written submission of the same disclosure information to the Commission. ()

f. Each Lottery contractor for a sensitive procurement may be required to post a performance bond with the Lottery. The performance bond must be issued by a surety licensed to do business in this state and be for the amount and duration specified in the procurement announcement. ()

10. Advertising and Promotional Contract. Because advertising and promotional contracts involve unique marketing strategies for Lottery games, the acquisition of these services and purchases may be made directly without using competitive procurement procedures. The prudent person rule will apply in the award of these contracts or the acquisition of these services. This exemption applies to all advertising and promotional contracts, whether placed through the Lottery's advertising agency or directly by the Commission or the Director. For the purpose of this rule, advertising and promotional contracts include but are not limited to: agreements with radio and television stations, acquisition of prizes, media selection, placement of advertising contracts, promotional printing, art work and development and placement of all forms of commercials and display presentations. ()

11. Investment Contracts. The Lottery may enter into contracts for the acquisition of structured settlements, place investments or acquire annuities related to the pay-off of major prize winners without following competitive bidding procedures. The Lottery will follow the prudent person rule in the placement of such investments. ()

12. Prequalification of Annuity Vendors. ()

a. For the purpose of acquiring annuities related to the pay-off of major prize winners, the Lottery will maintain an ongoing prequalification list of annuity vendors. A vendor must first be prequalified by the Lottery before submitting a bid to the Lottery for the award of an annuity contract. Vendors may submit their qualifications to the Lottery for evaluation any time in the year. ()

b. The following criteria must be met by each vendor before being placed on the prequalification list: ()

i. Each bidder must be an insurance company licensed to do business in Idaho and have been in business for a period of two (2) years immediately before submitting its bid. ()

ii. An insurance company must be a Best's "A+" rated company and have at least a Best's Class VII financial size classification. ()

iii. Each bidder's request for qualification must contain: ()

(1) The name, address, telephone number and contact person for the bidder. ()

(2) The current financial statement of the bidder certified by an independent certified public accountant. ()

(3) The names, addresses and telephone numbers of three (3) current or past annuity client references whom the Lottery may contact. ()

c. After a vendor has been prequalified, the vendor may submit bids to the Lottery in accordance with the procedures established by the Director. Furthermore, a vendor must keep its qualifications current by promptly reporting any changes in their status to the Lottery. ()

d. The total amount of annuities awarded to an insurance company cannot exceed five percent (5%) of its stated surplus. ()

e. Nothing contained in this rule will preclude a brokerage company from representing or submitting a bid on behalf of a qualified bidder. ()

201. CRITERIA FOR REVIEW OF RETAILER APPLICATIONS AND CONDUCT OF OPERATIONS.

01. Retailer's Application. Any person interested in obtaining a contract for a certificate to sell Lottery tickets must first file an application on forms provided by the Director. The forms will require disclosure of, but are not limited to, an applicant's personal, financial, and criminal history, and an authorization to investigate the applicant's criminal and credit history. ()

02. Fees, Procedure, and Criteria Precluding Issuing Contract. ()

a. All certificate applications must be accompanied by a minimum, nonrefundable, fee of twenty-five dollars (\$25). If a certificate is awarded, an additional, nonrefundable, certificate fee of one hundred dollars (\$100) must be paid. ()

b. A current retailer may be required to complete an additional application or application supplements. If a current retailer requests that the existing certificate be modified to allow the sale of additional Lottery products, no additional application fee will be charged. ()

c. The Lottery may waive the payment of any certificate fee to facilitate an experimental program or a research project. ()

03. Provisional Certifications. ()

a. The Lottery may issue a provisional certificate to an applicant for a Lottery certificate after receipt of a fully completed certificate application, the authorization of a complete personal background check, completion of a credit check, and completion of a preliminary background check. The provisional certificate will expire at the time of issuance of the requested certificate or ninety (90) days from the date the provisional certificate was issued, whichever occurs first, unless the provisional certificate is extended by the Lottery. ()

b. No contract shall be made with an applicant: ()

i. Who is under eighteen (18) years of age; ()

ii. Who will be engaged exclusively in the business of selling tickets; ()

iii. Who is an employee of the Lottery; ()

iv. Who is, or is owned or controlled or affiliated with, a supplier of instant tickets or a manufacturer of computer equipment used to operate instant or on-line games, or both; ()

v. Who is not a resident of Idaho, or a corporation that is not incorporated in Idaho or not authorized to do business in Idaho; ()

vi. Who has been found to have violated any rule, regulation, or order of the Commission or the Director; ()

vii. When any person, firm, association, or corporation other than the applicant will participate in the management of the affairs of the applicant. ()

04. Criteria That May Be Grounds For Refusal. Before contracting with an applicant, the Director will consider the factors set out below. In considering these factors, the Director will seek to determine which applicants will best serve the economical and efficient operation of a statewide Lottery through their ticket sales. If any of these factors lead the Director to determine that contracting with the applicant would not promote the

economical and efficient operation of a statewide Lottery consonant with the public interest, or would not serve the public interest, convenience, or trust, the Director may deny the application. ()

a. The Director will consider the financial responsibility and security of the person and the person's business or activity and consider the person's credit worthiness and integrity in past financial transactions. The Lottery may investigate the credit worthiness of the applicant by using the services of a commercial credit reporting agency. The Director may also consider the physical security of the applicant's place of business to determine whether tickets that will be sold to the applicant and the proceeds from ticket sales will be kept safe. ()

b. The Director will consider the accessibility to the public of an applicant's place of business or activity. The Director will contract only with applicants who have regular contact with significant numbers of persons at the applicant's place of business. Before contracting with any organization that has restricted membership policies, the Director must determine whether the restrictions are generally acceptable to the public and whether contracting with that group or organization or similar groups or organizations would best serve the interests of the Lottery. ()

c. The Director will consider the sufficiency of existing retailers to serve the public interest. The Director may seek to maximize total ticket sales by encouraging retailers with the highest potential volume in a particular area or neighborhood. ()

d. The Director will consider the volume of expected sales by the applicant. In determining the anticipated actual sales volume of the applicant, the Director may rely upon the experience and knowledge of the Lottery's staff as well as any other available professional expertise. The Director will determine whether the volume of an applicant's sales is likely to be sufficient that contracting with the applicant will be economically feasible. ()

e. The Director will consider the types of products, services, or entertainment offered at the applicant's place of business. The Director will determine whether the applicant's products, services, or entertainment are generally acceptable to the public and whether they would bear adversely upon the general credibility, integrity, and reputation of the Lottery. ()

f. The Director will consider the experience, character, or general fitness of the applicant. Entering into a contract with the applicant must be consistent with the public interest, convenience, and trust. ()

g. The Director will consider the veracity and completeness of the information submitted with the retailer's application. The Director will consider the criminal history of the applicant and any person whose name is required to be disclosed under Section 67-7412, Idaho Code, of the Act and may refuse to enter into a contract with any applicant when the applicant or such person has been convicted of violating any of the gambling laws of this state, general or local, or has been convicted at any time of any crime other than traffic infraction. ()

05. Reporting Changes in Circumstances of The Retailer. Every change of business structure of a certificated business, such as from a sole proprietorship to a corporation, and every change in the name of a business, must be reported to the Lottery before the change. Substantial changes in the ownership of a certificated business must also be reported to the Lottery before the change. A substantial change of ownership is defined as the transfer of ten percent (10%) or more equity in the certificated business from or to another single individual or legal entity. If a change involves the addition or deletion of one (1) or more existing owners or officers, the certificate holder must submit a certificate application reflecting the change and any other documentation that the Lottery may require. All changes will be reviewed by the Lottery to determine if the existing certificate should be continued. ()

06. Certificate Not a Vested or Legal Right. The possession of a certificate issued by the Lottery to any person to act as a retailer in any capacity is a privilege personal to that person and is not a vested or legal right. The possession of a certificate issued by the Lottery to any person to act as a retailer in any capacity does not automatically entitle that person to sell tickets or obtain materials for any particular game. ()

07. Suspension or Revocation of a Certificate. The Lottery may suspend or revoke any certificate issued pursuant to these rules for one (1) or more of the following reasons: ()

- a. Failing to meet or maintain the eligibility criteria for certificate application and issuance established by Title 67, Chapter 74, Idaho Code, or these rules; ()
 - b. Violation of any of the provisions of Title 67, Chapter 74, Idaho Code, these rules, or the certificate terms and conditions; ()
 - c. Failing to file any return or report or to keep records required by the State Lottery ()
 - d. Failing to maintain an acceptable level of financial responsibility as evidenced by the financial condition of the business, incidents of failure to pay taxes or other debts, or by the giving of financial instruments which are dishonored; ()
 - e. Fraud, deceit, misrepresentation, or other conduct prejudicial to the public confidence in the Lottery; ()
 - f. If the public convenience is adequately served by other certificate holders, failure to sell a minimum number of tickets as established by the Lottery; ()
 - g. A history of thefts or other forms of losses of tickets or revenue from the business; ()
 - h. Violating federal, state, or local law or allowing the violation of any of these laws on premises occupied by or controlled by any person over whom the retailer has substantial control; ()
 - i. Obtaining a certificate by fraud, misrepresentation, concealment or through inadvertence or mistake; ()
 - j. Making a misrepresentation of fact to the Commission or the Lottery on any report, record, application form, or questionnaire required to be submitted to the Commission or the Lottery; ()
 - k. Denying the Lottery or its authorized representative, including authorized local law enforcement agencies, access to any place where a certificate activity is conducted; ()
 - l. Failing to promptly produce for inspection or audit any book, record, document, or other item required to be produced by law, these rules, or the terms of the certificate; ()
 - m. Systemically pursuing economic gain in a manner or context that is in violation of the criminal or civil public policy of this state if there is cause to believe that the participation of such person in these activities is inimical to the proper operation of the authorized Lottery; ()
 - n. Failing to follow the instructions of the Lottery for the conduct of any particular game or special event; ()
 - o. Failing to follow security procedures of the Lottery for the management of personnel, handling of tickets, or for the conduct of any particular game or special event; ()
 - p. Misrepresenting a fact to a purchaser, or prospective purchaser, of a ticket, or to the general public with respect to the conduct of a particular game or special event; ()
 - q. Allowing activities on the licensed premises that could compromise the dignity of the state. ()
- 08. Surrender of Certificate Upon Revocation.** Upon revocation or suspension of a retailer's certificate, the retailer must surrender to the Lottery, by a date designated by the Lottery, the certificate and all other Lottery property. ()
- 09. Certified Retailers.** All Lottery retailers must be certified in the manner provided in these rules. Retailers are required to abide by all applicable laws and administrative rules, the terms and conditions of the contract and certificate, and all other directives and instructions issued by the Lottery. ()

10. Requirements For The Sale of Tickets. ()

a. Retailers must be knowledgeable about the Lottery and Lottery products and may be required to take training in the operation of Lottery games. Retailers must make the purchase of tickets convenient to the public. ()

b. Tickets must be sold at the price designated by the Lottery. Retailers cannot sell tickets for a greater amount than the amount specified by the Lottery. Retailers may sell tickets for a lesser amount for promotional purposes if authorized by the Lottery. ()

c. No retailer or any employee or member of a retailer shall attempt to identify a winning ticket before sale of the ticket. ()

d. When a retailer is required by its contract with the Lottery to pay a prize to a winner, the retailer must pay the prize whenever the winner tenders a winning ticket during the retailer's normal business hours at the location designated on the retailer's certificate. ()

e. Retailers are prohibited from purchasing tickets previously sold by the retailer. ()

11. Display of Certificate and Other Materials. Retailers must display the Lottery certificate in an area visible to the general public wherever tickets are being sold and also display point-of-sale material provided by the Lottery in a manner that is readily seen by and available to the public. Retailers may advertise and use or display other appropriate promotional and point-of-sale material. The Lottery may require the removal of objectionable material or the discontinuance of objectionable advertising that may have an adverse impact on the Lottery. ()

12. Dishonored Checks and Electronic Fund Transfers. Any payment made to the Lottery by an applicant for a certificate or by a certificated retailer either by a check that is dishonored or by an electronic funds transfer (EFT) that is not paid by the depository, is grounds for immediate denial of the application for a certificate or for suspension or revocation of an existing certificate. The Lottery may assess a surcharge for each dishonored check or EFT. The Lottery may also alter the payment terms of a retailer's certificate and require a retailer to reimburse the Lottery for costs that occur as a result of a dishonored check or EFT. ()

13. Inspection of Lottery Materials and Retailer Premises. Retailers must allow the Lottery to enter upon the retailer's certificated premises in order to inspect Lottery materials, tickets, and the premises. All books and records pertaining to the retailer's Lottery activities must be available to the Lottery for inspection and copying during the normal business hours of the retailer and between 8 a.m. and 5 p.m., Monday through Friday. All books and records pertaining to the retailer's Lottery activities are subject to seizure by the Lottery without prior notice. ()

202. GENERAL INSTANT TICKET GAME OPERATING RULES.

01. Instant Games -- Authorized -- Director's Authority. The Commission hereby authorizes instant games that meet the criteria set forth in these rules. The Director is hereby authorized to select, operate, and contract relating to and for the operation of instant games that meet the criteria set forth in these rules. ()

02. Definitions. As used in Section 202 of these rules, these terms have the following definitions: ()

a. Instant Ticket Validation Bar Code. The bar code that enables retailers to validate instant tickets. ()

b. ITA System. The Instant Ticket Automation system that validates winning instant tickets. ()

c. Pack. A package of instant game tickets with a designated number of tickets that may be (but do not have to be) fanfolded and attached to each other by perforations, which perforations the retailer tears when selling a ticket, and that are packaged in plastic shrink-wrapping, foil or some similar outer wrapping material. ()

d. Pack-Ticket Number. The number printed on the ticket. A game identification number must be included in the book-ticket number. ()

e. Play Symbol Caption. The small printed material appearing below each play symbol which repeats or explains the play symbol. One (1) and only one (1) play symbol captions appears under each play symbol. ()

f. Play Symbols. Figures printed in approved ink that appear under each of the rub-off spots on the front of the ticket. ()

g. Retailer Validation Code. The small letters found under the removable rub-off covering over the play symbols on the front of the ticket, which the ticket retailer uses to verify winners of twenty-five dollars (\$25) or less. The letters appear in varying locations beneath the removable rub-off covering and among the play symbols. ()

h. Ticket. An Idaho instant game ticket. ()

i. Ticket Validation Number. The unique number on the front of the ticket. ()

03. Sale of Tickets. ()

a. No person other than a retailer under a contract for the sale of tickets with the Lottery may sell Lottery tickets, except that nothing in this section prevents a person who may lawfully purchase tickets from making a gift of Lottery tickets to another. ()

b. Unless authorized by the Lottery, tickets may not be sold at a location other than the address listed on the retailer's contract with the Lottery. ()

c. Nothing in this section prohibits the Commission from designating certain of its agents and employees to sell Lottery tickets directly to the public. ()

04. Instant Games Ticket Price. The price of an instant game ticket will be set by the Director. No person may sell a ticket at a price other than that established in accordance with these rules. ()

05. Prize Structures. The Director will provide to all Lottery game retailers a detailed tabulation of the estimated number of prizes of each particular prize denomination that are expected to be awarded in each Lottery game and a close approximation of the odds of winning the prizes. ()

06. Number and Value of Instant Ticket Prizes. Lottery game prize structures, odds of winning, number of tickets, number and value of prizes, play symbol and captions used for validation will not be adopted by administrative rules. Rather, the Director will submit proposed games to the Commission, who must approve each game's general format before the initiation of each game. All instant games must be conducted in accordance with the rules of the Commission. ()

07. Official Start of Game. ()

a. Games with a prize structure adopted by the Commission pursuant to Subsection 202.07 of this rule may be started at a time selected by the Director. The Director will publicly announce the starting date of a new game by use of a press release or any other appropriate means. The Director may also issue game information that includes a description of the game, odds of winning a prize, the number and value of prizes, and the play symbols and captions used for prize validation. ()

b. Games using a prize structure other than a prize structure previously approved by the Commission must be approved by the Commission before game tickets can be sold to the public. ()

08. Determination of Winners. ()

a. Winners of an instant game are determined by the matching or specified alignment of the play symbols on the tickets. The play symbols are revealed by scratching or rubbing off the latex or similar secure material that covers spots on the ticket. The ticket bearer must notify the retailer or the Lottery of the win and submit the winning ticket to the retailer or the Lottery as provided in these rules. The winning ticket must be validated by the Lottery through use of the validation number or by any other means specified by the Director. ()

b. Unless otherwise provided by game rules, only the highest instant prize amount will be paid on a given ticket. ()

c. No portion of the play symbol captions, retailer validation codes, display printing nor any extraneous matter whatever will be usable or playable as a part of the instant game. ()

d. The ticket validation number or any portion thereof is not a play spot and is not usable or playable as such. ()

e. In all Lottery games, the determination of prize winners is subject to the general ticket validation requirements set forth in Subsection 200.14, et seq., and Subsection 202.11 of this rule, and the requirements set out on the back of each instant game ticket. ()

f. The length of operation of an instant game will be determined by the Director. The start date and closing date of the instant game will be publicly announced. ()

09. Payment of Prizes. The procedures for claiming instant ticket prizes are as follows: ()

a. Instant ticket prizes of less than six hundred dollars (\$600) may be claimed by one (1) of the following methods: ()

i. The claimant may present the winning ticket to any Lottery retailer. The retailer must verify the claim and, if acceptable, make payment of the amount due the claimant. A retailer may pay prizes in cash or by business check, or money order, or any combination thereof. A retailer that pays a prize with a check that is dishonored may be subject to suspension or termination of the retailer's contract. ()

ii. If the retailer cannot verify the claim, the claimant must fill out a claim form and the retailer must present the completed form and the disputed ticket to the Director. If the claim is validated, a check will be forwarded to the claimant in payment of the amount due. If the claim is not validated, the claim will be denied and the claimant will be promptly notified. ()

iii. The claimant may bring the ticket to the Lottery office or complete a claim form and mail it with the ticket to the Idaho State Lottery (registered mail recommended). Claim forms may be obtained from any Lottery game retailer or from the Lottery. ()

b. To claim an instant prize of six hundred dollars (\$600) or more, the claimant must either bring the winning ticket to the Lottery office or complete a claim form and mail the completed form together with the winning ticket to the Idaho State Lottery (registered mail recommended). ()

c. Prizes of six hundred dollars (\$600) or more can be paid only from the Boise Lottery office. Upon validation by the Director, a check will be forwarded to the claimant in payment of the amount due, less any applicable federal income tax withholding. ()

d. Any ticket not passing all the validation checks is void and ineligible for any prize and will not be paid. However, the Director may, solely at the Director's option, replace an invalid ticket with an unplayed ticket (or ticket of equivalent sales price from any other current game). If a defective ticket is purchased, the only responsibility or liability of the Lottery is the replacement of the defective ticket with another unplayed ticket (or ticket of equivalent sale price from any other current game). ()

e. All prizes will be paid within a reasonable time after they are awarded and after the claims are verified by the Director. For each prize requiring annual payments, all payments after the first payment will be made

on the anniversary date of the first payment in accordance with the type of prize awarded. The Director may, at any time, delay any payment in order to review a change of circumstances concerning the prize awarded, the payee, the claim, or any other matter that may have come to his attention. All delayed payments will be brought up to date immediately upon the Director's confirmation and continue to be paid on each original anniversary date thereafter.

()

10. Ticket Validation Requirements. In addition to meeting all of the other requirements in these rules or as may be printed on the back of each instant game ticket, the following validation requirements apply with regard to instant game tickets:

()

a. To be a valid instant game ticket, the ticket must: ()

i. Have been issued by the Director in an authorized manner. ()

ii. Not be altered, unreadable, or tampered with in any manner. ()

iii. Not be counterfeit in whole or in part. ()

iv. Not be stolen nor appear on any list of omitted tickets on file with the Lottery. ()

v. Be complete and not blank (or partially blank), miscut, misregistered, defective, or printed or produced in error. ()

vi. Under the opaque covered play area, have play symbols and the correct corresponding captions, exactly one (1) pack-ticket number, exactly one (1) agent verification code, and exactly one (1) validation number as required by each approved set of game rules, all of which must be present in their entirety, legible, right-side up, and not reversed in any manner. ()

vii. The validation number of an apparent winning ticket must appear on the Lottery's official list of validation numbers of winning tickets; and a ticket with that validation number cannot have been previously paid. ()

viii. Pass all additional confidential validation requirements established by the Director. ()

ix. Be signed if the prize is for six hundred dollars (\$600) or more. ()

b. Any ticket not passing all the validation checks in Paragraph 202.11.a. of this rule is void and ineligible for any prize and shall not be paid. However, the Director may, solely at the Director's option, replace an invalid ticket with an unplayed ticket (or tickets of equivalent sales price) from any other current Lottery game. If a defective ticket is purchased, the only responsibility or liability of the Lottery will be the replacement of the defective ticket with another unplayed ticket (or ticket of equivalent sales price from any other current Lottery game). ()

c. The Director may authorize reconstruction of an alleged winning ticket that was not received or cannot be located by the Lottery, provided, the person requesting reconstruction must submit to the Lottery sufficient evidence to enable reconstruction and submit a claim for the prize, if any, for that ticket. If the reconstructed ticket is a winning ticket and meets the validation requirements of Paragraph 202.11.a. of this rule and any specific validation requirements contained in the rules for its specific game, the Director may authorize payment of the prize. Provided, the ticket will not be validated nor the prize paid before the one hundred eighty-first (181) day following the official end of that instant game. A ticket(s) validated pursuant to this Subsection will not entitle the claimant to be entered into the grand prize drawing, if any, for that or any subsequent instant game. ()

11. Prize Rights Unassignable. No person's right to a prize already drawn is assignable, except that payment of any prize already drawn may be paid to the estate of a deceased prize winner, and a person other than the prize winner may be paid the prize to which the winner is entitled as provided by court order. The Director will be discharged of all liability upon payment of a prize pursuant to this rule. ()

12. Payment of Prizes to Persons Under Eighteen Years of Age. If a person entitled to a prize for a winning ticket is under the age of eighteen (18) years, the Director may direct payment of the prize to an adult

member of the minor's family or to the minor's guardian by a check or draft payable to the adult member of the minor's family or the minor's guardian. The adult member of the minor's family or the minor's guardian will have the same duties and powers as a person designated as a custodian in accordance with Idaho law. For purposes of this Subsection, the terms "adult member of a minor's family" and "guardian of a minor" have the same meaning as in the Idaho Gifts to Minors Law. The Director will be discharged of all liability upon payment of a prize to a minor pursuant to this rule. ()

13. Prizes Payable After Death or Disability of Owner. ()

a. All prizes, and portions of prizes that remain unpaid at the time of the prize winner's death will be payable to the personal representative of the prize winner's estate once satisfactory evidence of the personal representative's appointment has been provided, and the Director is satisfied that payment to the personal representative is lawful and proper. The Director may rely on a certified copy of a court order appointing a personal representative (or similar person responsible for the prize winner's estate, whether denominated an administrator, executor, executrix, or other representative of the prize winner's estate) or may petition the court to determine the proper payee. Payment to the personal representative of the estate of the deceased owner of any prize winnings will absolve the Director and the Lottery's employees of any further liability for payment of prize winnings. ()

b. The Lottery may petition any court of competent jurisdiction for a determination of the rightful payee for the payment of any prize winnings that are or may become due to a person under a disability including, but not limited to, mental deficiency, or physical or mental incapacity. ()

14. Governing Law. In purchasing a ticket, the customer agrees to comply with, and abide by, Idaho law, and all rules and final decisions of the Lottery, and all procedures and instructions established by the Lottery or the Director for the conduct of the game. ()

15. Discharge of All Liability Upon Payment. The state of Idaho, its agents, officers, employees, and representatives, the Lottery, its Director, agents, officers, employees and representatives, will be discharged of all liability upon payment of a prize or any one (1) installment thereof to the holder of any winning Lottery ticket or in accordance with the information set forth on the claim form supplied by the Director. If there is a conflict between the information on a winning Lottery ticket and the information on the claim form, the Lottery may rely on the claim form after the ticket for which it has been filed has been validated as a winning ticket and, in so doing, it will be relieved of all responsibility and liability in the payment of a prize in accordance with the information set forth therein. The Lottery's decisions and judgments in respect to the determination of a winning ticket or of any other dispute arising from payment or awarding of prizes are final and binding upon all participants in the Lottery unless otherwise provided by law or these rules. If a question arises concerning the winning ticket, a claim form, the payment, or the awarding of any prize, the Lottery may deposit the prize winnings into an escrow fund until it determines the controversy and reaches a decision, or it may petition a court of competent jurisdiction for instructions and a resolution of the controversy. ()

16. Unclaimed Prize Money. Any prize not claimed within the specified period will be forfeited and placed into the State Lottery Account. ()

17. Disclosure. The Lottery may use the names, addresses, and photographs of winners in any Lottery promotional or publicity campaign. The address used will not contain the winner's street or house number without the winner's consent. The Lottery may condition payment of the prize upon agreement to these terms and conditions. ()

18. Confidentiality of Tickets. All retailers and their employees and agents are prohibited from attempting to ascertain the numbers or symbols appearing in the designated areas under the removable latex or similar secure coverings or otherwise attempting to identify winning tickets. ()

19. Official End of Game. ()

a. The official end of an instant game will be announced by the Lottery. Prizes may be claimed up to one hundred eighty (180) days after the official end of the game. If the final day of the claim period falls on a Saturday, Sunday or a state holiday, the claim period will be extended to the end of the next business day. A player

may submit a winning ticket claim for prize payment up to one hundred eighty (180) days after the official end of the game. Depending on the prize amount, the ticket should be submitted to the location specified in Subsection 202.10 of this rule, "Payment of Prizes." To participate in one (1) of the Lottery's special drawings, if any, a player must redeem a ticket that qualifies for entry into that special drawing within the time limits specified by the Director. ()

b. A retailer must return to the Lottery all unsold Lottery tickets for each game within ninety (90) days of the official end of that game in order to receive credit from the Lottery as provided in retailer's contract. The Lottery has no obligation to grant credit for tickets returned after the time limit specified in the contract. ()

203. (RESERVED)

204. ON-LINE COMPUTER GAMES.

01. On-Line Games -- Authorized -- Director's Authority. The Commission hereby authorizes the Director to select and operate on-line games which meet the criteria set forth in these rules. ()

02. Definitions. As used in Rule 204 these terms have the following definitions: ()

a. "Drawing." The procedure determined by the Director by which the Lottery selects the winning combination in accordance with the rules of the game. Drawings are open to the public. ()

b. "On-line Game." ()

i. A Lottery game in which a player selects a combination of numbers or symbols, the type of game and amount of play, and the drawing date by use of a computer. In return for paying the appropriate price, the player receives a computer-generated ticket with the player's selection printed on it. Each ticket bearer whose valid ticket includes a winning combination will be entitled to a prize if claim is submitted within the specified time period. ()

ii. On-line terminal (OLT) instant ticket game having characteristics as defined in Paragraphs 202.02.a., 202.02.b., 202.02.d. and 202.02.i. of these rules. ()

c. "On-line Retailer." A person or business authorized by the Lottery to sell on-line tickets. ()

d. "On-line Terminal (OLT)." The computer hardware by which an on-line retailer or player enters the combination selected by the player and by which on-line tickets are generated and claims are validated. ()

e. "On-line Ticket." A computer-generated ticket issued by an on-line terminal to a player as a receipt for the combination a player has selected. That ticket is the only acceptable evidence of the combination of numbers or symbols selected. ()

f. "Ticket Bearer." The person who has signed the on-line ticket or who has possession of an unsigned ticket. ()

g. "Validation." The process of determining whether an on-line ticket presented for payment is a winning ticket. ()

h. "Winning Combination." One (1) or more numbers or symbols randomly selected by the State Lottery or its designee in a public drawing. ()

03. Distribution of Tickets. ()

a. Tickets will be sold by retailers selected by the Director. ()

b. The Director is authorized to arrange for the distribution of OLTs, player-activated terminals (PATs), ticket stock, and supplies to certificated retailers. ()

04. Sale of Tickets. ()

a. No person other than a retailer under a contract for the sale of tickets with the Lottery may sell on-line Lottery tickets, except that nothing in this section will be construed to prevent a person who may lawfully purchase tickets from making a gift of Lottery tickets to another. ()

b. Tickets may not be sold at a location other than the address listed on the retailer's contract with the Lottery. ()

c. Nothing in this section prohibits the Director from designating certain of its agents and employees to sell Lottery tickets directly to the public. ()

05. On-Line Games Criteria. ()

a. The base price of an on-line ticket will not be less than fifty cents (\$.50), except to the extent of discounts authorized by the Commission. ()

b. The price for a ticket in any particular on-line game will be set out in the game rules adopted by the Commission for that game. No person may sell a ticket at a price other than that established in accordance with these rules. On the average, the total of all prizes available to be won in an on-line game will not be less than forty-five percent (45%) of the on-line game's projected revenue. ()

c. The manner and frequency of drawings may vary with the type of on-line game as defined in Subparagraph 204.02.b.i. of these rules. ()

d. The times, locations, and drawing procedures will be determined by the Director. ()

e. OLT instant ticket game as defined in Subparagraph 204.02.b.ii. of these rules will operate with a finite number of tickets per game and a predetermined and guaranteed prize structure approved by the Director. ()

f. A ticket bearer entitled to a prize must submit the winning ticket as specified by the Director. The winning ticket must be validated by the Lottery or an on-line retailer through use of the validation number and any other means specified by the Director. ()

06. Payment of Prizes. ()

a. To claim an on-line game prize of less than six hundred dollars (\$600) the claimant may present the winning on-line ticket to any on-line retailer, or to the Lottery office: ()

i. If the claim is presented to an on-line retailer, the on-line retailer must validate the claim and, if determined to be a winning ticket, pay the amount due the claimant. If the on-line retailer cannot validate the claim, the claimant may obtain and complete a claim form and submit it with the disputed ticket to the Lottery by mail or in person. Upon determination that the ticket is a winning ticket, the Lottery will present or mail a check to the claimant in payment of the amount due. If the ticket is determined to be a non-winning ticket, the claim will be denied and the claimant will be promptly notified. Non-winning tickets will not be returned to the claimant. ()

ii. If the claim is presented to the Lottery office, the claimant will be required to complete a claim form and submit it with the winning ticket, either by mail or in person. Upon determination that the ticket is a winning ticket, the Lottery will present or mail a check to the claimant in payment of the amount due, less any withholding required by the Internal Revenue Code. If the ticket is determined to be a non-winning ticket, the claim will be denied and the claimant will be promptly notified. Non-winning tickets will not be returned to the claimant. ()

b. To claim an on-line prize of six hundred dollars (\$600) or more, the claimant must obtain and complete a claim form and submit it with the winning ticket to the Lottery office by mail or in person. Prizes of six

hundred dollars (\$600) or more can be paid only from the Lottery office. Upon determination that the ticket is a winning ticket, the Lottery will present or mail a check to the claimant in payment of the amount due, less any withholding required by the Internal Revenue Code and the state of Idaho. The amount due will be calculated according to the rules adopted for the particular on-line game. If the ticket is determined to be a non-winning ticket, the claim will be denied and the claimant will be promptly notified. Non-winning tickets will not be returned to the claimant. ()

c. All prizes must be claimed within one hundred eighty (180) days from the drawing in which the prize was won. If the final day of the one hundred eighty (180) day period falls on a Saturday, Sunday or a state holiday, the claim period will be extended to the end of the next business day. Any prize not claimed within the specified period will be forfeited and placed into the State Lottery account. ()

07. Drawings and End of Sales Prior to Drawings. ()

a. Drawings will be conducted in a location and at days and times designated by the Director. ()

b. For each type of on-line game, the Director will establish a time before the drawing for the end of sales. ()

c. The Director will designate the type of equipment to be used and will establish procedures to randomly select the winning combination for each type of on-line game. Drawing procedures will include provisions for the substitution of backup drawing equipment if the primary drawing equipment malfunctions or fails for any reason. ()

d. The equipment used to determine the winning combination will not be electronically or otherwise connected to the central computer or to any tapes, discs, files, etc., generated or produced by the central computer. The drawing results, including sales, number of winners and numbers drawn, will be audited and reviewed after each drawing to assure proper operation and lack of tampering or fraud. ()

e. All drawings may be broadcast live on television, provided the facilities for such broadcasts are available and operational and can be done at a reasonable cost. ()

f. The Director will establish procedures governing the conduct of drawings for each type of on-line game. The procedures must include provisions for deviations that include but are not limited to: ()

i. Malfunction of the drawing equipment before determination of the winning combination; ()

ii. Fouled drawing; ()

iii. Delayed drawing; and ()

iv. Other equipment, facility or personnel difficulties. ()

g. If a deviation occurs, the drawing will be completed under the supervision of the Lottery or its designee. The winning combination will be provided to the public. ()

h. If, during any live-broadcast drawing for a game, a mechanical failure or operator error causes an interruption in the selection of all numbers or symbols, a "foul" will be called by Lottery security or the Lottery's designee. Any number drawn before a "foul" is called will stand and be deemed official after passing inspection and certification by Lottery security or the Lottery's designee. ()

i. The Director will delay payment of all prizes if any evidence exists or there are grounds for suspicion that tampering or fraud has occurred. Payment will be made after an investigation is completed and the drawing approved by Lottery security or the Lottery's designee. If the drawing is not approved, it will be void and another drawing will be conducted to determine the actual winner. ()

08. Validation Requirements. ()

- a. To be a valid winning on-line ticket, the ticket must: ()
 - i. Have all printing on the ticket in its entirety, be legible, and correspond, using the computer validation file, to the combination and the date printed on the ticket. ()
 - ii. Be intact, not be mutilated, altered, or tampered with in any manner. ()
 - iii. Not be counterfeit or an exact duplicate of another winning ticket. ()
 - iv. Have been issued by an authorized on-line retailer or dispensed by a player-activated terminal in an authorized manner. ()
 - v. Not have been stolen or cancelled. ()
 - vi. Not have been previously paid. ()
 - vii. Pass all other confidential security checks of the Lottery. ()
 - viii. Be signed if the prize is for six hundred dollars (\$600) or more. ()
 - b. A ticket failing any of the validation requirements listed in Paragraph 204.08.a. of this rule is invalid and ineligible for a prize. The final decision on whether a prize is paid will be made by the Director. ()
 - c. If there is a dispute between the Director and a claimant whether a ticket is a winning ticket, and if the Director determines that the ticket is not valid and a prize is not paid, the Director may replace the disputed ticket with a ticket of equivalent sales price for a future drawing of the same type of game. This will be the sole and exclusive remedy of the claimant. ()
 - d. If a defective on-line ticket is purchased, the only responsibility or liability of the Lottery or of the on-line retailer is the replacement of the defective on-line ticket with another on-line ticket of equivalent value for a future drawing of the same type of game. ()
- 09. Retailer Duties.** Retailers with an on-line terminal (OLT) must perform the following duties: ()
- a. Pay costs associated with providing a telephone line or internet or similar connection that must be located as specified by the Lottery. Payment of the telephone line or internet or similar connection is nonrefundable after installation, except if the Lottery denies, through no fault of retailer, the installation of the on-line terminal. ()
 - b. Pay the Lottery for the local monthly telephone or internet or similar charges per OLT as specified by the Lottery. The Lottery will pay for the mileage charges (if any) between the retailer's location and the Lottery's central site. ()
 - c. Hold funds generated from the sale of on-line tickets in trust for the Lottery. At a time specified by the Lottery, the retailer must pay these funds to the Lottery plus the monthly communications charge specified above in Paragraph 204.09.b. of this rule, less: ()
 - i. Prizes paid; ()
 - ii. Any credit; and ()
 - iii. The retailer discount. ()
 - d. Locate the OLT within the retailer's premises at a point-of-sale location approved by the Lottery.

The retailer is prohibited from moving an OLT unless the retailer follows the procedures established by the Director, including reimbursing the State Lottery for any telephone or internet or similar charges associated with the change of OLT location if the retailer requested the change. ()

e. Provide dedicated AC power to within approximately five (5) feet of the terminal. Dedicated AC power means that there is no other equipment on the line that is to be used for the on-line terminal. The retailer is responsible for all costs associated with providing dedicated AC power. The Lottery will provide a schematic of outlet requirements to the retailer's electrical contractor. ()

f. Sell all Lottery games, including but not limited to instant game tickets offered by the Lottery. The retailer agrees to continue the sale of instant tickets from all cash registers or other points of purchase. ()

g. Conduct the sale of on-line tickets during all hours and days that the retailer's business is open and the on-line system is functioning. The retailer must post the hours that redemption of winning tickets may take place if these hours are different from the retailer's normal business hours. The retailer must monitor ticket supply levels and give timely notice when any item is in short supply. ()

h. Post winning numbers prominently where tickets are sold as soon as possible following the drawing. ()

i. Provide secure storage for OLT supplies and a secure area for the OLT. ()

j. Exercise due diligence in the operation of the OLT and immediately notify the Lottery and the central computer facility of any telephone line, internet, radio, or OLT malfunction, such as the issuance of invalid on-line Lottery ticket, inability to sell or redeem an on-line ticket, and non-issuance of an on-line ticket. The retailer is prohibited from performing mechanical or electrical maintenance on the OLT. ()

k. Replace ribbons and on-line or instant ticket stock and clear paper jams as required for the OLT per the instructions provided by the Lottery. ()

l. Pay, without reimbursement, all electricity charges in connection with the operation of OLT. ()

10. Payment of Prizes by On-Line Retailers. ()

a. An on-line retailer must pay to the ticket bearer on-line games prizes of less than six hundred dollars (\$600) for any validated claims presented to that on-line retailer. These prizes must be paid during all normal business hours of the on-line retailer, unless redemption hours differ from normal business hours that have been posted pursuant to Paragraph 204.09.g. of this rule, provided, that the on-line system is operational and claims can be validated. ()

b. An on-line retailer may pay prizes in cash or by business check, certified check, money order, or any combination thereof. An on-line retailer that pays a prize with a check that is dishonored may be subject to suspension or termination of its contract. ()

11. Retailer Settlement. ()

a. On-line retailers must establish an account for deposit of monies derived from on-line games with a financial institution that has the capability of electronic funds transfer (EFT). ()

b. The amount deposited must be sufficient to cover monies due the Lottery. The Lottery will withdraw by EFT the amount due the Lottery on the day specified by the Director. If the day specified for withdrawal falls on a state holiday, withdrawal may be delayed until the next business day. ()

12. Prize Rights Unassignable. No right of any person to a prize drawn is assignable, except that payment of any prize drawn may be paid to the estate of a deceased prize winner, and that any person may be paid the prize to which the winner is entitled pursuant to an appropriate judicial order. The Director will be discharged of all

liability upon payment of a prize pursuant to this rule. ()

13. Payment of Prizes to Persons Under Eighteen Years of Age. If a person entitled to a prize for a winning ticket is under the age of eighteen (18) years, the Director may direct payment of the prize to an adult member of the minor's family or to the minor's guardian by a check or draft payable to the adult member of the minor's family or to the minor's guardian. The adult member of the minor's family or the minor's guardian will have the same duties and powers as a person designated as a custodian in accordance with Idaho Law. For purposes of this Subsection the terms "adult member of a minor's family" and "guardian of a minor" have the same meaning as in the Idaho Gifts to Minors Law. The Director will be discharged of all liability upon payment of a prize to a minor pursuant to this rule. ()

14. Prizes Payable After Death or Disability of Owner. ()

a. All prizes, and portions of prizes, that remain unpaid at the time of the prize winner's death will be payable to the personal representative of the prize winner's estate once satisfactory evidence of the personal representative's appointment has been provided, and the Director is satisfied that payment to the personal representative is lawful and proper. The Director may rely on a certified copy of a court order appointing of a personal representative (or similar person responsible for the prize winner's estate, whether denominated an administrator, executor, executrix, or other representative of the prize winner's estate) or may petition the court to determine the proper payee. Payment to the personal representative of the estate of the deceased owner of any prize winnings will absolve the Director and the Lottery's employees of any further liability for payment of prize winnings. ()

b. The Lottery may petition any court of competent jurisdiction for a determination of the rightful payee of any prize winnings that are or may be due to a person under a disability including, but not limited to, minority, mental deficiency, physical or mental incapacity. ()

15. Discharge of State Lottery Upon Payment. The state of Idaho, its agents, officers, employees and representatives, the Lottery, its Director, agents, officers, employees and representatives are discharged of all liability upon payment of a prize or any one (1) installment thereof to the holder of any winning Lottery ticket or in accordance with the information set forth on the claim form supplied by the Director. If there is a conflict between the information on a winning Lottery ticket and the information on the claim form, the Lottery may rely on the claim form after the ticket for which it has been filed has been validated as a winning ticket and, in so doing, it will be relieved of all responsibility and liability in the payment of a prize in accordance with the information set forth therein. The Lottery's decisions and judgments in respect to the determination of a winning ticket or of any other dispute arising from payment or awarding of prizes will be final and binding upon all participants in the Lottery unless otherwise provided by law or these rules. If a question arises concerning the winning ticket, a claim form, the payment, or the awarding of any prize, the Lottery may deposit the prize winnings into an escrow fund until it determines the controversy and reaches a decision, or it may petition a court of competent jurisdiction for instructions and a resolution of the controversy. ()

16. Disclosure. The Lottery may use the names, addresses, and photographs of winners in any Lottery promotional or publicity campaign. The address used will not contain the winner's street or house number without the winner's consent. The Lottery may condition payment of the prize upon agreement to these terms and conditions. ()

205. BREAKOPEN INSTANT TICKET GAMES.

The Commission hereby authorizes the Director to select and operate breakopen instant ticket games that meet the criteria set forth in these rules. ()

01. Definitions. As used in Section 205 of these rules, these terms have the following definitions: ()

a. "Authorized Dispensing Device" means any machine, or mechanism designed for use of vending or dispensing of breakopen instant tickets. These devices may include mechanical, electrical, electro-mechanical or other devices approved by the Director of the Lottery pursuant to Section 100 of these rules. ()

- b.** “Box” means a group of breakopen instant tickets with the same unique serial number. ()
- c.** “Breakopen Instant Ticket” means a single folded or banded ticket or a card, the face of which is initially covered or otherwise hidden from view to conceal numbers or symbols, or both, a few of which numbers or symbols have been designated in advance and at random as prize winners when, for the opportunity to obtain each such folded or banded ticket or card, view the numbers or symbols thereon and possibly obtain a prize, a person pays an established price to a breakopen instant ticket retailer. ()
- d.** “Breakopen Instant Ticket Game” means a group of breakopen instant ticket boxes with the same thematic design and prize structure. ()
- e.** “Breakopen Instant Ticket Retailer” means any person who has been approved, certified and contracted with by the Lottery to sell breakopen instant tickets. ()
- f.** “Breakopen Instant Ticket Vendor” means any person who produces and provides breakopen instant tickets to the Lottery. ()
- g.** “Distributor” means any person who purchases or otherwise obtains authorized dispensing devices for use in breakopen instant ticket games from any person and sells or otherwise furnishes such device to another person for the resale of or the display or operation of that device. ()
- i.** As used in these rules, the term “distributor” includes a person who services and repairs authorized dispensing devices, so long as the person performing such servicing or repairs is approved by the distributor or distributor’s representative, and makes no addition to, or modification or alteration of, the authorized device. ()
- ii.** A manufacturer who sells or otherwise furnishes authorized dispensing devices not manufactured by him to any other person for resale or for display or operation of that authorized device is also a “distributor.” ()
- h.** “Distributor’s Representative” means any individual who represents a distributor in any of the distributor’s activities in connection with the sale or furnishing of authorized dispensing device for use in breakopen instant ticket activities. ()
- i.** “Flare” means a vendor-provided informational sign that, at a minimum, displays the prize structure, the serial number of the sleeve in play, the odds of winning a prize, and the price of the ticket. ()
- j.** “Manufacturer” means any person who assembles from raw materials or subparts a completed authorized dispensing device or pieces of the authorized device for use in breakopen instant ticket activities and who sells or otherwise furnishes the same to any distributor or retail outlet. ()
- k.** “Manufacturer’s representative” means any person who represents a manufacturer in any one of the manufacturer’s activities in connection with the sale or furnishing of authorized dispensing device for use in breakopen instant ticket activities. ()
- l.** “Sleeve” is a portion of a box; and is the smallest unit offered. ()
- 02. Breakopen Instant Ticket Special Inspection.** The Director or authorized representative has the authority to select any breakopen instant ticket sleeve and examine the quality and integrity of the sleeve in any manner, including pulling all chances remaining thereon: Provided, that if the sleeve so inspected is thereby altered by such inspection in any manner and no defect, alteration, deceptive condition, or other violation is discovered, then the owner shall be reimbursed by the Lottery at the owner’s cost for the sleeve or portion thereof, and the sleeve will become the property of the Lottery. Provided further, that for each sleeve inspected which is found to be defective in any area related to a vendor’s quality control deficiency, a fee may be assessed by the Director against the vendor of the breakopen instant ticket. ()
- 03. Breakopen Instant Ticket Operation.** ()

a. No person under the age of eighteen (18) years is allowed to play or sell any breakopen instant tickets. It is the responsibility of the retailer to determine that no unauthorized person is allowed to play or sell breakopen instant tickets. ()

b. No retailer is permitted to display or operate any breakopen instant ticket that has in any manner been marked, defaced, tampered with or otherwise placed in a condition, or operated in a manner, that may deceive the public or that affects the chances of winning or losing upon the taking of any chance thereon. ()

c. All records, reports, receipts and any unsold tickets relating to a breakopen instant ticket sleeve must be retained on the retailer's premises at least ninety (90) days after the sleeve is removed from play and be made available on demand to representatives of the Idaho Lottery. ()

04. Breakopen Instant Ticket Price per Play to Be Posted. No breakopen instant ticket sleeve may be placed for public play unless the cost to the player for each ticket is clearly posted on the flare. The price per ticket will be determined by the Director. ()

05. Claiming of Prizes. Prizes must be redeemed on the same day as purchased at the location where the winning ticket was purchased, and prizes will be awarded in cash or by check. ()

06. Limitation on Breakopen Instant Ticket Dispensing. No ticket once placed in an authorized dispensing device out for public play may be removed from the authorized device until the sleeve is permanently removed from public play, except only: ()

a. Those tickets actually played by players; ()

b. Those tickets removed by representatives of the Lottery inspecting the device or sleeve; and ()

c. Those tickets temporarily removed during necessary repair or maintenance of the device. Excepting only tickets removed under Paragraphs 205.06.b. and 205.06.c. of this rule, once a ticket has been removed from public play it cannot again be put out for public play. ()

07. All Devices Must Comply With Requirements. No retailer may display or put out for play, and no distributor or manufacturer or their representatives may sell or otherwise furnish any device for the dispensing of breakopen instant tickets, unless the device is approved for use by the Director, thereby making it an authorized device. ()

a. No person may sell or transfer to another person in this state or for use within this state, nor shall place out for public play, any device for the dispensing of breakopen instant tickets that is not constructed to allow a consumer to clearly see each ticket within the device before playing the device. ()

b. No person may put out for public play any device for the dispensing of breakopen instant tickets that is not constructed to provide for at least one (1) sleeve in play in the device. ()

c. No person may put out for public play any device for the dispensing of breakopen instant tickets that is designed, used, or constructed, in a manner that detracts from the breakopen instant tickets or that is deceptive in any way, as determined by the Director. ()

08. Breakopen Instant Ticket Series Assembly and Packaging. Vendors of breakopen instant ticket games must manufacture, assemble and package each game sleeve in a manner that none of the winning tickets, nor the location or approximate location of any of the winning tickets, can be determined in advance of opening the tickets. All breakopen instant ticket games must be approved and will be distributed and sold exclusively by the Lottery. The Lottery may adopt quality control standards for the manufacture of breakopen instant ticket games. ()

09. Standards For Flares. The flare advertising prizes available from the operation of any sleeve of breakopen instant tickets must: ()

a. Be placed near or upon the upper face, or on the top, of any authorized device used to dispense breakopen instant tickets in a manner clearly visible to the public; and ()

b. Clearly set out each of the prizes available and the combination of numbers or symbols which win prizes. Each flare describing the prizes and winning number or symbols for a sleeve of breakopen instant tickets in play must clearly set out the sleeve number assigned to that sleeve by the vendor. The sleeve number will be placed upon the flare by the vendor. The total number of tickets originally in the sleeve will be placed upon the flare by the vendor. ()

10. Prize Structure. The Director will establish a prize structure detailing the estimated number of prizes that are expected to be awarded in each sleeve and a close approximation of the odds of winning such prizes. ()

11. Retailers Eligible to Sell Breakopen Tickets. Any person interested in obtaining a contract for a certificate to sell Lottery tickets must file an application on forms provided by the Director that includes, but is not limited to, requiring an applicant's personal, financial, and criminal history, and an authorization to investigate the applicant's criminal and credit history. ()

12. Retailer Application and Fee. All applications to sell breakopen instant tickets must be accompanied by a nonrefundable fee of twenty-five dollars (\$25). If a certificate is awarded to sell only breakopen instant tickets, no additional certificate fee is necessary. ()

13. Certificate Modification. ()

a. Certified instant ticket retailers may apply for a certificate modification to allow for the sale of breakopen instant tickets. A current instant ticket retailer will be required to complete an additional application or application supplements. If a current instant ticket retailer requests that the existing certificate be modified to allow for the sale of breakopen instant tickets, no additional application fee will be charged upon approval. ()

b. Certified breakopen instant ticket retailers may apply for a certificate modification to allow for the sale of instant tickets. A current breakopen instant ticket retailer will be required to complete an additional application or application supplements. If a current breakopen instant ticket retailer requests that the existing certificate be modified to allow for the sale of instant tickets, an additional certificate fee of one hundred dollars (\$100) may be charged upon approval. ()

206. -- 299. (RESERVED)

SUBCHAPTER C – CHARITABLE GAMING RULES OF THE IDAHO STATE LOTTERY

300. DEFINITIONS.

As used in these rules, each word defined in this Section has the meaning given here unless a different meaning is clearly required from context: ()

01. Audit. The review of documents or other records pertaining to operation of bingo or raffles, including, but not limited to, ledgers, bank statements, checks and deposit records, nightly logs, receipts, register tapes, computer records, contracts and leases, records showing use of all revenues for charitable activities, and tax records, by representatives of the Lottery, the attorney general, other law enforcement agencies, or independent auditors. ()

02. Autodaubing Features or Autodaubing. Electronic bingo card daubers, including software or equipment interfaced with electronic bingo cards that automatically daub the numbers as called without requiring the player to manually input the number called. ()

03. Bingo. The traditional game of chance using a card with five (5) rows and five (5) columns containing numbers from a range of one (1) to seventy-five (75) and played for a prize determined before the game begins, as elaborated in Subsection 010.03 of these rules, and other games authorized by Title 67, Chapter 77, Idaho

Code, and by these rules, for example, “U-Pick Em.” See Section 67-7702(1), Idaho Code: ()

a. Bingo Cards, Regular. Regular bingo cards (reusable or disposable) contain five (5) rows and five (5) columns of squares arranged in a five-by-five (5x5) grid; each square is imprinted with randomly placed numbers from a range of one (1) through seventy-five (75), except for the center square, which may be a free space. The letters “B-I-N-G-O” must also be imprinted on the card in order with one (1) letter above each of the five (5) columns (the letter “B” above the first column and so on). ()

b. Bingo Cards, Electronic, or Face. An electronic facsimile of a regular bingo card. See Section 67-7702(6), Idaho Code. ()

c. Play Method. Players who have paid consideration for the cards that they are holding compete for a prize by covering numbers on their cards when designators with the same number are randomly drawn and called. The balls or other designators in the selection device are numbered in the same manner as the possible numbers on the bingo cards, from one (1) through seventy-five (75). The winner is the first player to cover a predetermined arrangement of numbers on the players’ cards, for example, any row, column or diagonal of the five (5) rows and (5) columns and two (2) diagonals of the bingo card. Upon approval of the Bingo-Raffle Advisory Board there may be other forms of bingo games allowed, such as, but not limited to, Blackouts, Bonanza, and “U-Pick Em” games. The game begins when the first number is called and ends when a player has covered the previously designated arrangement and declares a bingo. Each winning card must be independently verified by a floor worker and another player by calling back the winning combination of numbers in the predetermined arrangement or by entering the serial number printed on the bingo card into an electronic verification system that can verify whether a card is a winner. ()

d. Exclusions from Bingo. Bingo does not include “instant bingo,” which is a game of chance played by the selection of one (1) or more prepackaged cards, with the winner determined by the appearance of a preprinted winning designation on the card. ()

04. Bingo-Raffle Advisory Board or Board. The board established and appointed according to Sections 67-7702(2), 67-7703, and 67-7704, Idaho Code. ()

05. Blackout. A game of bingo where all numbers are covered on a bingo card. This game is also referred to as “coverall.” ()

06. Bonanza. A game of bingo that is played on a prefolded card or on another kind of card on which the numbers are not revealed until the card is purchased and in which a designated number of balls are emitted from the machine in the usual manner and displayed. If there is no “Bingo” called on these numbers, the game may continue with one (1) additional ball emitted at a time until there is a winner. ()

07. Charitable Contribution Acknowledgment Report Form or CCARF. A form, prepared by the Director, upon which the recipient of a donation for a charitable purpose must indicate the charitable purpose for which the donation will be used; the name, address, and phone number of the person receiving the donation; and acknowledgement that the recipient will provide any and all information necessary in order for the Director or his representatives to verify that the donation was used for a charitable purpose, as well as any other information needed by the Director to assure that the donation is used for a charitable purpose. See Section 67-7709(2), Idaho Code. ()

08. Charitable Donation Reporting Form. A form prepared by the Director, upon which each licensed organization shall record all charitable donations made from the proceeds of charitable bingo or raffles held during the license year on which they are reporting. This report shall require the names, addresses, contact person’s name, contact person’s telephone number, dollar amount and purpose of the donation. This report will be submitted to the Lottery along with the Annual Bingo Report or Annual Raffle Report and will be subject to audit as defined in Subsection 010.01. ()

09. Charitable Organization. See definition in Section 67-7702, Idaho Code. ()

10. Charitable Purpose. A purpose of supporting a bona fide charitable organization, as defined by

Section 67-7702(3), Idaho Code. ()

11. Concessions. Food and beverages or other incidental items (for example, caps or tee-shirts) unrelated to gaming that are sold to players at bingo games. ()

12. Disposable Paper Bingo Card. A non-reusable, paper bingo card. ()

13. Distributor. Any person who purchases or otherwise obtains or supplies equipment for use in conducting gaming activities, including, but not limited to, bingo or raffles, from any person or entity, and sells or otherwise furnishes such equipment or supplies to any person or entity who engages in gaming activity. ()

14. Duck Race. A charitable raffle as defined in Section 67-7702(5), Idaho Code. ()

15. Electronic Bingo Device. An electronic device used to monitor bingo games as defined by Section 67-7702(7), Idaho Code. Electronic bingo devices may be used to monitor bingo cards (“mind cards”) only if they meet the requirements of Section 67-7702(7)(a), Idaho Code. No devices described in Section 67-7702(7)(b), Idaho Code, can be lawfully used in a bingo operation. ()

16. Electronic Gaming Devices. Gaming or gambling devices electronically operated by inserting a coin or token and then pulling a handle or pushing a button to activate the game. Electronic gaming devices can generate points or payout slips for accumulated wins. ()

17. Gaming. Gambling as defined in Section 18-3801, Idaho Code, including gaming authorized by Title 67, Chapters 74 and 77, Idaho Code. ()

18. Gross Revenues. See definition in Section 67-7702, Idaho Code. ()

a. For Bingo. All moneys paid by players during a bingo game or session of play bingo, including fees for use of electronic bingo cards or electronic bingo devices, but excluding money paid for concessions. Gross revenues are calculated before any deductions for prizes or other expenses. ()

b. For Raffles and Other Gaming Authorized by Title 67, Chapter 77, Idaho Code. All moneys or other value paid to or due to any operator of a raffle or other gaming authorized by Title 67, Chapter 77, Idaho Code, activity for any chance taken or other fees for participation in the raffle or other gaming activity. Gross revenues are calculated before any deductions for prizes or other expenses. ()

19. Hard Bingo Cards. Reusable bingo cards with sliding windows or shutters to cover the numbers on the cards. Hard cards are legal in sessions with less than ten thousand dollars (\$10,000) of annual gross revenue or for special occasions. ()

20. Host System. See definition in Section 67-7702, Idaho Code. ()

21. Instant Bingo. A Lottery game played by the use of premarked cards which, when opened, scratched or otherwise revealed, determine whether the cardholder is a winner without any competition among players. “Instant Bingo” is not a game of “Bingo” as defined by these rules. ()

22. License. A permission issued by the Director of the Lottery to operate bingo games or raffles or to manufacture, sell, distribute, furnish or supply gaming machines, equipment or material. ()

23. Licensed Game Operator. A person who qualifies as a nonprofit or charitable organization who may operate bingo or raffles and who is licensed pursuant to Section 67-7711, Idaho Code. ()

24. Licensed Vendor. A person who manufactures, sells, distributes, furnishes or supplies gaming machines, equipment or material who is licensed pursuant to Section 67-7715, Idaho Code. ()

25. Manufacturer. Any person who fabricates or assembles a completed piece of gaming equipment or pieces of gaming equipment, or supplies completed gaming equipment, or pieces of gaming equipment for use in

gaming activities, including, but not limited to, bingo and raffles, and who sells or otherwise furnishes the completed gaming equipment or pieces of gaming equipment to any distributor, operator, or retail outlet. ()

26. Net Proceeds of a Charitable Raffle. The gross revenues of a charitable raffle less the cost of prizes awarded. Net proceeds of a duck race mean gross revenues less the cost of prizes awarded and the rental cost of the ducks used in the race (if there are rental costs). See Section 67-7710(3), Idaho Code. Donated prizes are considered to have no cost and do not reduce the receipts when calculating net proceeds. ()

27. Nonprofit Organization. See definition in Section 67-7702, Idaho Code. ()

28. Organization. A charitable organization or a nonprofit organization. ()

29. Raffle. An event in which prizes are won by random drawings or other selections of a ticket, duck or other means of identifying the one (1) or more persons purchasing chances. See Section 67-7702(14), Idaho Code. Duck races are a form of raffles. See Sections 67-7702(5) and 67-7702(9), Idaho Code. ()

30. Reusable Bingo Cards. Bingo cards constructed out of a durable material that use sliding windows or shutters or chips to cover the numbers and that can be reused from one (1) game to another. ()

31. Separate Bank Account. A bank account in the name of, and controlled by, a charitable or nonprofit organization established for purposes of complying with the accounting requirements of Section 67-7709(1), Idaho Code, regarding accounting for revenues and disbursements for bingo operations. All gross revenues received in connection with licensed bingo games must be placed in the separate bank account. Concessions and other moneys received (if any) from non-gaming revenues should not be deposited in the separate bank account. ()

32. Session. A period of time not to exceed eight (8) hours in any one (1) day in which players are allowed to participate in bingo games operated by a charitable or nonprofit organization. See Sections 67-7702(15) and 67-7708, Idaho Code. ()

33. Site System. See definition in Section 67-7702, Idaho Code. ()

34. Tracking. The documentation of sales by sequentially numbered bingo paper or numbered tickets in raffles. See Section 67-7709(3), Idaho Code. ()

35. U-Pick Ems. A game where players select their own numbers on a two (2) part duplicated bingo card. One (1) copy is retained by the player and used as a bingo card. Numbers are called until there is a winner. The winner is determined by the first player to cover the numbers on a "U-Pick-Em" card. ()

36. Vendor. See definition in Section 67-7702, Idaho Code. ()

SUB AREA: CONDUCT OF BINGO GAMES

301. BINGO BY CHARITABLE OR NONPROFIT ORGANIZATIONS.

All organizations operating bingo games, whether licensed or unlicensed, must abide by these rules. It is unlawful to conduct bingo sessions or bingo games in violation of Title 67, Chapter 77, Idaho Code, or in violation of these rules, and persons doing so may be subject to administrative, civil or criminal penalties. See Section 67-7707, Idaho Code. Sections 301 through 306 of these rules apply to all bingo operators. Sections 307 through 310 of these rules apply to operators using paper bingo cards. Sections 311 through 313 of these rules apply to operators using electronic bingo machines, as defined in Section 311 of these rules. Sections 306 through 309 of these rules apply to all bingo operators. ()

302. NUMBER OF SESSIONS PER WEEK.

Licensed operators of bingo games are limited to a maximum of three (3) bingo sessions per any calendar week (Sunday-Saturday). None of these sessions may exceed eight (8) consecutive hours in any one (1) day. See Section 67-7708, Idaho Code. A session is determined by the sale of paper for a continuous series of bingo games offered for a predetermined period of time. For special sessions it is permissible to extend the hours past midnight, but all hours

past midnight up to 2 a.m. on the following day will count as hours for the day during which the session started.

()

303. POSTING OF LICENSE AND HOURS.

The organization's current charitable gaming license issued by the Lottery must be displayed during bingo games and bingo sessions in plain view for all players and interested persons. Lottery Gaming Rules must be kept on site and available during all sessions. Days/hours of operation must be posted in plain view for all players and interested persons. If days or times change, it is the responsibility of the organization to provide written notice to the Lottery. House rules pertaining to bingo must be posted in plain view for all players and interested persons.

()

304. MEMBERS OF ORGANIZATION IN ATTENDANCE -- TRAINING OF EMPLOYEES.

At least one (1) member or representative of the licensed organization must be in attendance at each session of bingo to supervise all bingo-related activities of a licensed organization. See Section 67-7711(3), Idaho Code. All bingo game employees, volunteers, and managers of all organizations, whether licensed or unlicensed, must be trained in the proper conduct of the game and the control of funds.

()

305. EMPLOYEES INELIGIBLE TO PLAY.

All bingo game employees and managers are prohibited from playing in any game or in any session for which the employee or manager takes part as employee or manager. There should be no conflict of interest perceived by the public.

()

306. MINORS.

Persons under the age of eighteen (18) years are prohibited from playing bingo in a game in which a cash prize is offered, or where the prize exceeds twenty-five dollars (\$25) in value for merchandise, or where any merchandise is redeemable, in whole or in part, for cash. See Section 67-7707(2), Idaho Code. Bingo operators may allow minors to work in a bingo game or session as per local house rules.

()

307. TRACKING REQUIREMENTS IN GAMES USING PAPER BINGO CARDS.

01. Bingo Paper -- For Whom Required. All licensed organizations operating bingo sessions that use paper bingo cards and all organizations exempt from licensing under Section 67-7713, Idaho Code, that use paper bingo cards must track their bingo sales for each session by using sequentially numbered/colored bingo paper. Each such organization must keep a ledger of the numbers of all bingo papers used. The non-reusable colored paper cards must be manufactured with a pre-printed series and a pre-printed serial number on each card. These cards may be assembled in multiple card sheets, single sheets, or packets. A sequential series and serial number must be printed on each individual card.

()

02. Tracking by Game For Bingo Paper. The tracking may vary according to games sold at each session (packets, specials, singles, six (6) ons, three (3) ons, etc.) and may be designated by game name or color of paper.

()

03. Tracking By Bingo Paper Packet. If sales are completed by packet, then those packets must not be separated for sale as singles. Individual games or packets sold must be recorded sequentially for effective tracking. The tracking records must be retained with permanent records. Tracking records are not required to be submitted with the Annual Bingo Report form.

()

04. Late Players When Bingo Paper Used. Packets of bingo paper sold to late players must have the previously played games sheets removed and voided. The tracking must account for sheets removed and voided.

()

05. Designation of Bingo Paper Color For Games. Each game is assigned a particular color of paper card. Other colors will not be accepted.

()

06. Documentation For Bingo Paper. All bingo paper must be tracked as either sold, damaged, donated, or omitted from the original distributor or manufacturer. Invoices from the distributor or manufacturer and other documentation of transactions involving bingo funds must be kept with the records for that bingo operation. Operators may contact the Lottery Security Division for clarification concerning proper documentation to track sold, damaged, donated, or omitted bingo paper.

()

308. DUTIES OF BINGO CALLER AND EMPLOYEES OR VOLUNTEERS IN GAMES USING PAPER BINGO CARDS.

01. Pre-Game Duties. Before selecting or calling the first number in any game, the bingo caller must check the machine and balls for defects. This can be done by running all of the balls through the machine and placing them in their assigned slots to determine that there is one (1) ball for each number and only one (1) ball for each number. The caller will draw numbers for the Bonanza, Progressive or Hot Ball games if used and verified by a player. The caller must announce the color of paper card assigned to each game, the pattern or arrangement of squares to be covered to win the game, and the prize amount. ()

02. Displaying Numbers During Play. Each time that a number is selected, the bingo caller must display the ball or other designator in a receptacle to prevent it from being placed back into the selection pool. If electronic display boards are used the placement of the selected ball should activate the number or if not, the operator is required to manually activate each number on the board. ()

03. End of Game. After a winner has been verified as set forth in Section 108 of these rules, the caller must ask if there are additional winners. After asking for and verifying whether there are additional winners, the game is declared to be completed, and the ball machine must be cleared for the next game. ()

309. DETERMINING WINNERS WHEN A PLAYER USING A PAPER BINGO CARD CLAIMS TO BE A WINNER.

01. Winning Cards. A winning card is a card upon which the numbers drawn by the caller cover the previously designated arrangement of winning squares. ()

02. Player's Responsibility. It is the player's responsibility to notify the game operator or caller that the player has a winning card by yelling "bingo" loud enough for the caller to hear the player. ()

03. Game Stops to Verify Winner. When a player announces a winning card, the game must stop for winner verification before the next number is selected. The game must be secured so that it can be continued if the declaration of a winning bingo card is incorrect. If a player mistakenly announces a winning card and the card is not a winner, the game proceeds until a winner is declared. ()

04. Verification of Winning Card. To verify a winning card a bingo operator's employee or volunteer must call back the combination of numbers in the assigned pattern and the color of the paper card. The caller must verify the numbers called back. Electronic verifying devices may be used by entering the serial number of the winning card. A monitor must reveal the card and the winning pattern to verify its status as a valid bingo or an invalid bingo. Once a winner is declared the caller must announce "one (1) good winner" or "two (2)" or more if it applies to the game. ()

05. Prizes For Multiple Winners. If more than one (1) winner is declared, cash prizes must be divided equally, and merchandise prizes of equal value awarded. ()

310. MISCELLANEOUS RULES FOR GAMES USING NON-ELECTRONIC BINGO CARDS.

01. Hard Cards. Unlicensed charitable or nonprofit organizations with an annual gross bingo revenue of ten thousand dollars (\$10,000) or less may use hard cards. A licensed organization may request a special one (1) time use of hard cards for community fund-raising projects that it is sponsoring. No hard cards are allowed to be reserved for any players, with the exception of Braille cards. ()

02. Braille Cards. Braille cards are allowed in any bingo game for use by individuals who need them. ()

03. Two Part Disposable Cards. Two (2) part disposable cards may be used in "U-Pick-Em" games, if: ()

a. Original and Duplicate Copies. The cards are printed on two (2) part, self-duplicating paper that provides for an original and duplicate copy; ()

b. Operating Controls. Players mark their numbers on each card in a distinct, clear and legible manner before separation of the duplicate and original card, and operators establish and set forth in plain view house rules setting out any conditions by which an entry may be added, deleted or changed before separation, and changes are verified by a worker authorized by the bingo manager; and ()

c. Retention and Play of Duplicate Copy. The player retains and plays the duplicate copy, and all winning cards and their duplicate copies are retained by the operator as part of the operator's daily bingo records. ()

04. Card-Minding Devices. Card-minding devices are prohibited unless they meet the requirement for allowable electronic bingo devices set forth in Section 67-7702(7)(a)(i) through 67-7702(7)(a)(iv), Idaho Code. ()

05. Autodaubing Features. Autodaubing features are prohibited. ()

06. Use of Nonreusable Cards. With the exception of Braille bingo cards authorized for use pursuant to Subsection 310.02 of these rules, every organization that uses nonreusable paper bingo cards must use only nonreusable colored bingo paper or electronic bingo paper so that all sales can be tracked. Nonreusable colored bingo paper must have a series and serial number on each card. After each bingo session, an organization using nonreusable bingo paper must track its bingo sales for that session by recording the series and serial numbers of all paper sold, damaged, donated, used for promotion, or omitted by the manufacturer or distributor. See Section 67-7709(3), Idaho Code. ()

311. BINGO OPERATIONS USING ELECTRONIC BINGO MACHINES.

01. Electronic Bingo Machines Defined. Electronic bingo cards, electronic bingo devices, host systems, or site systems are individually and collectively called electronic bingo machines in these rules. ()

02. Use of Approved Hardware and Software. All organizations that offer or use any electronic bingo machines during play must use hardware or software, or both, approved by the Commission, provided that printers used in connection with site systems may be obtained from any source. See Sections 67-7716 and 67-7719(1), Idaho Code. ()

03. List of Approved Hardware and Software. The Director will maintain a list of approved hardware and software for electronic bingo machines and promptly update the list after any changes. ()

04. Requirements For Approved Site Systems. All site systems licensed by the Commission must have the ability to track, either with or without input from the bingo game's operators, the number of games played that are connected to the site system, revenue from the games played that are connected to the site system, the number of winners who are connected to the site system, and the distribution of cash and merchandise prizes to winners connected to the site system for each session played using the site system. ()

05. Inspection and Testing. All electronic bingo machines used by bingo game operators and all records that the electronic bingo machines generate must be available to be inspected or tested, or both, to determine whether the electronic bingo machines are properly functioning. Any agency or officer listed in Section 67-7709(5), Idaho Code, or their representative, is authorized to conduct an inspection and testing. See Sections 67-7717(8) and 67-7717(9), Idaho Code. ()

06. Pre-Game Testing. The Director or Lottery Security Division may by letter or other written communication prescribe appropriate pre-game testing procedures for electronic bingo machines as in their judgment are necessary for the particular hardware and software used. ()

312. REQUIREMENTS FOR BINGO GAME OPERATIONS USING ELECTRONIC BINGO MACHINES.

01. Maximum Number of Faces. Electronic bingo devices are hereby prohibited from monitoring more than fifty-four (54) faces (electronic bingo cards) per game. All electronic bingo devices are required to be restricted by their hardware or software so that they can monitor no more than fifty-four (54) faces per game. See Section 67-7717(1), Idaho Code. ()

02. Identification Number. Every electronic bingo device that requires a site system to download electronic bingo cards to the device must comply with the requirements of Section 67-7717(2), Idaho Code, concerning identification numbers. ()

03. Erasing Numbers. Every electronic bingo device must be programmed to erase electronic bingo cards and bingo card face numbers after a session has been completed, as required by Section 67-7717(3), Idaho Code. ()

04. Players Cannot Choose Numbers. No electronic bingo device that allows bingo players to design their own bingo cards by choosing, rearranging, or placing numbers on a card is permitted. See Section 67-7717(4), Idaho Code. ()

05. Connections to Site System. Site systems are prohibited from engaging in sales, voids, or reload transactions for an electronic bingo device unless the device is connected to and communicating with the site system. See Section 67-7717(5), Idaho Code. ()

06. Printouts. Site systems must be electronically connected to an on-site printer that upon request is capable of printing a transaction log for each player that shows the device identification number and all bingo cards and face numbers loaded into the device. The site system must be able to record and print on-site a receipt showing the device identification number, the date of the bingo session, the number of electronic bingo cards purchased or loaded, and the total amount charged for each of the electronic bingo cards. This receipt must be given to the player on request or as required by any agency or officer listed in Section 67-7709(5), Idaho Code, or their representative. See Section 67-7717(6), Idaho Code. The site system must be connected to an on-site printer that can print the winning game combinations on demand for the entire bingo session. See Section 67-7717(7). ()

07. Malfunctioning Electronic Bingo Machines. ()

a. Whenever the Lottery or any agency or officer listed in Section 67-7709(5), Idaho Code, or their representative, detects or discovers a malfunction or other problem with an electronic bingo machine that could affect the security or integrity of a bingo game or of an electronic bingo machine, every bingo operator using such a malfunctioning electronic bingo machine must discontinue its use as directed by a representative of the Lottery or correct the malfunction or other problem as directed by a representative of the Lottery. Failure to take the directed action may result in confiscation or seizure of the electronic bingo machine that is malfunctioning or has other problems. See Section 67-7717(8), Idaho Code. ()

b. Whenever a manufacturer, a distributor, a licensed bingo operation, a player, or any other person detects or discovers a malfunction or other problem with an electronic bingo machine that could affect the security or integrity of a bingo game or of an electronic bingo machine, every bingo operator using such a malfunctioning electronic bingo machine must discontinue the use of that electronic bingo machine and notify the Commission by telephone no later than the next working day of the action taken and the nature of the malfunction or other problem. The Commission may request further written explanation as necessary. See Section 67-7717(9), Idaho Code. For purposes of this paragraph, notification to an officer or employee of the Lottery Security Division will be considered notification to the Commission. ()

08. Receipts. The cash register or the site system must provide a receipt for the sale of all bingo cards used in conjunction with an electronic bingo device. Additional paper bingo cards must be separately receipted. The cash register receipt and the player's receipt must identify and show the sale of disposable paper bingo cards separately from receipts for electronic bingo cards. See Section 67-7719(12), Idaho Code. ()

313. PLAY USING ELECTRONIC BINGO MACHINES.

01. No Player-Owned Devices. Use of player-owned electronic bingo devices is prohibited. See Section 67-7719(2), Idaho Code. ()

02. Provision of Devices. Only the bingo game operator can provide electronic bingo devices. The operator may charge for the use of an electronic bingo device. If there is a charge for use of an electronic bingo device, the fee must be separately stated on the cash register and the bingo player's receipt and be included in the gross revenues. See Section 67-7719(3) and (11), Idaho Code. ()

03. Use of Devices On Premises. A player using an electronic bingo device must be on the premises during play to be eligible to play bingo or to win a prize. See Section 67-7719(3), Idaho Code. ()

04. Available Devices. Electronic bingo devices must be made available on a first-come, first-served basis, and no device can be reserved for any player, except a device may be reserved for players with a disability (within the meaning of the Americans with Disabilities Act) if the disability would restrict or impair the player's ability to mark bingo cards. A bingo game operator may provide and reserve electronic bingo devices exclusively for persons with disabilities and forbid their use by all other persons. See Section 67-7719(5), Idaho Code. ()

05. One Device Per Player. It is prohibited for any player to use more than one (1) electronic bingo device at a time. See Section 67-7719(6), Idaho Code. No electronic bingo device can be used to monitor hard bingo or shutter cards. See Section 67-7719(7), Idaho Code. ()

06. Reserve Devices. Every bingo game operator using electronic bingo devices must keep at least one (1) electronic bingo device in reserve as a backup in case a device in use malfunctions. See Section 67-7719(4), Idaho Code. A reserve device is not considered an available device under Subsection 302.04 of this rule. If a reserve device is put in use to replace a malfunctioning electronic bingo device, and if there are no more unused electronic bingo devices available to serve as a reserve device, the operator is not required to take an electronic bingo device from a player that is then using the device in order to maintain a reserve device, and the operator may continue to offer bingo games without a reserve device throughout the remainder of the session, unless one (1) or more electronic bingo devices are turned in before the session ends, in which case a device that was turned in will then become the reserve device. ()

07. Loading Electronic Bingo Devices. A bingo operator using an electronic bingo device is prohibited from downloading electronic bingo cards into an electronic bingo device before payment by the player. The player must be on the bingo operator's premises when the device is downloaded with electronic bingo cards. The device can only be downloaded with electronic bingo cards during the session. See Section 67-7719(10), Idaho Code. Players are prohibited from choosing or rejecting individual electronic bingo cards loaded into an electronic bingo device. See Section 67-7719(8), Idaho Code. ()

08. Additional Paper Cards. When a player who has purchased fifty-four (54) bingo cards per game is using an electronic bingo device to monitor up to fifty-four (54) cards, a bingo operator may allow the player to purchase additional disposable paper bingo cards to play using a manual daubing or marking method. See Section 67-7719(9), Idaho Code. ()

09. Other Requirements. The Director or the Director of Lottery Security, or his designee may by letter or other written communication prescribe appropriate procedures for play and determination of winners and other matters generally covered by Sections 307 through 309 of these rules for paper bingo cards whenever it is necessary to do so in conjunction with the use or playing characteristics or other attributes of a given hardware or software. These letters are public records within the meaning of Title 74, Chapter 1, Idaho Code. ()

314. MAXIMUM PRIZES. Maximum prizes are defined in Section 67-7708, Idaho Code. ()

315. (RESERVED)

316. LIMITS ON BINGO OPERATION'S PRIZE PAYOUT RATIOS AND ADMINISTRATIVE EXPENSES.

01. Applicability. All organizations conducting bingo games, whether licensed or unlicensed, must adhere to the required limits of statute and of this rule in dedicating their gross revenues from bingo operations. These limits or percentages, or both, pertain to annual gross revenues during a twelve (12) month license year. See Section 67-7708, Idaho Code. ()

02. Donated Merchandise. Donated merchandise offered as prizes is not included in the prize amounts paid out when calculating the prize payout ratio. The organization conducting the bingo game must document the value of the donated items, describe the donated items, and list the donated items on the daily reports as prizes. ()

03. Donated Cash Funds Prohibited. Donated cash may not be offered as prizes in bingo games nor deposited into the separate bingo account. ()

317. PAYMENT OF EXPENSES, WINNINGS, AND CHARITABLE CONTRIBUTIONS.

All payments for expenses and donations for charitable purposes must be paid by check from the Separate Bank Account and recorded in the bingo operation's general ledger. See Section 67-7709, Idaho Code. ()

318. MINIMUM CHARITABLE OR NONPROFIT DONATION.

A minimum of twenty percent (20%) of annual gross revenues of a bingo operation must be paid to a charitable or nonprofit organization to be used for charitable purposes. The licensed bingo operation must maintain records showing the charitable activities to which the proceeds are applied. See Section 67-7709, Idaho Code. Organizations are permitted and encouraged to donate more than twenty percent (20%) of their gross revenues from bingo operations to charitable or nonprofit organizations to be used for charitable purposes. No part of this twenty percent (20%) can be used, whether directly or indirectly, for any bingo expense. ()

319. MAXIMUM PRIZES.

By this rule the Commission exercises its authority over maximum prizes are set forth in Section 67-7708, Idaho Code. ()

01. Maximum Prize For One Game. The maximum prize in cash and merchandise that may be offered for any one (1) bingo game is three thousand dollars (\$3,000). ()

02. Maximum Prizes For One Session. The total of the maximum prizes in cash and merchandise that may be offered at any one (1) bingo session is twenty-five thousand dollars (\$25,000). ()

320. (RESERVED)

321. ACCOUNTING AND REPORTING REQUIRED.

Every organization conducting bingo games, whether licensed or unlicensed, must comply with the accounting requirements of Sections 121 through 126 of these rules. ()

322. SEPARATE BANK ACCOUNT AND LIMITATIONS ON USE.

01. Establishment of Account. All net proceeds received in connection with a bingo game required to be licensed under Title 67, Chapter 77, Idaho Code, and by these rules must be placed in a Separate Bank Account. See Section 67-7709(1), Idaho Code. Only bingo funds generated from bingo games may be distributed as prizes, administrative expenses, or charitable/nonprofit donations. ()

02. Disbursements Use of Funds. All disbursements must be documented as defined in Section 67-7709(1), Idaho Code, and by these rules. ()

323. GENERAL LEDGER.

01. Establishment of General Ledger. A general ledger must be established to account separately for the bingo operation and track all transactions for the funds generated from bingo. ()

02. Documentation. The accounting of revenues from sales of bingo cards or other entry fees and all

disbursements must be documented. The accounting should include, but not be limited to, total prize payouts per session, and bingo related expenses per session, charitable contributions per session, wages, date and purpose or payee for each entry. ()

03. Annual Report. Copies of general ledgers must accompany the Annual Bingo Report filed with the Lottery. Copies of the Charitable Contribution Acknowledgement Report Forms and Charitable Donation Reporting Form shall also accompany the Annual Bingo Report. All disbursements shall be recorded in the general ledger. ()

04. Retention of Records. An accounting of all gross revenues and disbursements required by statute and these rules must be retained in records with the organization for a period of five (5) years, including the date and amount of each transaction, as well as the name and address of each payee for all prize payments exceeding one hundred dollars (\$100). A copy of each CCARF and the Charitable Donation Reporting Form shall be retained in permanent records of the organization. ()

324. ANNUAL REPORT.

01. When Due. Every licensed charitable or nonprofit organization conducting bingo games shall prepare an annual report within thirty (30) days after the close of its license year and file the annual report with the Lottery. See Section 67-7709(2), Idaho Code. ()

02. Information Required By Forms. The nightly reports, receipts, winner records, and payouts must be documented and kept with the organization's records for five (5) years along with any further information required by the forms prescribed by the Lottery pursuant to statute and rule. ()

03. Independent Audit. Organizations that exceed two hundred thousand dollars (\$200,000) in annual gross revenue from bingo games, raffle events, or bingo games and raffles combined must submit an independent audit performed by a certified public accountant licensed in Idaho and who meets peer review requirements set forth by the Idaho State Board of Accountancy. This independent audit must be submitted within ninety (90) days of the end of the licensed organization's license year. ()

325. RECORDS OF PRIZE DISBURSEMENTS.

Organizations conducting bingo games must record names and addresses of winners for prize disbursements exceeding one hundred dollars (\$100). Any prizes exceeding one thousand one hundred ninety-nine dollars (\$1,199) must have a W2-G on file for a gaming income for these amounts as required by the Internal Revenue Service. See 26 U.S.C. Section 6041 and 26 CFR 7.6041-1 and 35a.9999-3 (question and answer 19). ()

326. ACCOUNTING OF REVENUES AND EXPENSES.

01. Deposit of Receipts. Bingo funds received in check form must be payable to the organization. All funds must be deposited in a Separate Bank Account. ()

02. Ledger Entries and Receipts For Expenses. All ledger entries must track disbursements of cash and checks with expenses documented with receipts. The receipts shall include the payee's name and address, date, and an authorized signature from the licensed organization. ()

03. Recording of Wages. Wages paid must be recorded on expense records as gross amounts before withholding of taxes or other withholding and net amount paid, with each item of withholding shown. Wages paid must be documented with copies of pay stubs, or other records showing gross wages and withholding. ()

04. Submission With Annual Report. Copies of ledgers containing the documentation of all transactions must be submitted with the Annual Bingo Report. Inventory tracking of sequentially numbered paper must be retained in records for a period of five (5) years and kept available for examination. All documents must be legible and compiled in an orderly manner. ()

327. INSPECTION OF FINANCIAL RECORDS AND DOCUMENTS.

All financial records and documents of an organization shall be kept as required by these rules and be open to

inspection by the county sheriff of the county where the bingo games were held, the chief of police of the city where the bingo games were held, the prosecuting attorney of the county where the bingo games were held, the Attorney General or the Lottery, or any of their agents, at reasonable times and during reasonable hours. All records must be kept for five (5) years. ()

328. -- 399. (RESERVED)

SUB AREA: CONDUCT OF RAFFLES

400. REQUIREMENTS FOR ORGANIZATIONS CONDUCTING RAFFLES.

All organizations conducting raffles, whether licensed or unlicensed, must abide by these rules. It is unlawful to conduct raffles in violation of Title 67, Chapter 77, Idaho Code, or in violation of these rules, and persons doing so may be subject to administrative, civil or criminal penalties. See Section 67-7710, Idaho Code. ()

401. LIMITATION ON ANNUAL NUMBER OF RAFFLES.

Charitable or non-profit organizations are limited to conducting twelve (12) raffle events per year, provided that this limitation shall not apply to public or private elementary or secondary schools located in the state. See Section 67-7710(2), Idaho Code. ()

402. OWNERSHIP OF PRIZES.

Organizations must be able to substantiate ownership of all prizes or other legally enforceable rights to obtain the prizes to be offered in a raffle prior to advertising or selling tickets for such prizes. Proof of ownership of prizes or other legally enforceable rights to obtain prizes must be provided to the Lottery upon request. ()

403. MAXIMUM PRIZES.

The maximum aggregate value of cash prizes that may be offered or paid for any single raffle event, which is not a duck race, is one thousand dollars (\$1,000). There is no limit on the maximum value of merchandise that may be offered as raffle prizes if the merchandise is not redeemable for cash. There is no limit on the maximum amount of the aggregate cash prizes for a duck race if the cash prize is underwritten by insurance, otherwise the maximum aggregate cash prize for a duck race is one thousand dollars (\$1,000). There is no limit on the maximum value for the merchandise used as prizes for a duck race if the merchandise is not redeemable for cash. See Section 67-7710(2), Idaho Code. ()

404. REQUIREMENTS FOR DONATION TO CHARITY -- LIMITATION ON EXPENSES.

At least eighty percent (80%) of the net proceeds from sales of raffle tickets or chances and duck races must be donated to a charitable or nonprofit organization to be used for a charitable purpose. (Net proceeds are defined in Subsection 301.30 of these rules.) The name and address of the charitable or nonprofit organizations awarded these funds must be listed on the annual raffle report submitted to the Lottery. The annual raffle report must also include the charitable purpose for which the charitable donation was used by the charitable organization or non-profit organization. A maximum of twenty percent (20%) of net proceeds is allowed for expenses. See Section 67-7710(3), Idaho Code. ()

405. GENERAL LEDGER AND RECORDKEEPING.

Every organization conducting a raffle event must establish a general ledger for the raffle. The organization must keep records that show the total number of tickets or chances sold, the revenues from tickets or chances sold, the expenses of conducting the raffle, and the prizes for each raffle. ()

406. ANNUAL RAFFLE REPORT.

Every licensed organization conducting a raffle shall prepare an annual raffle report and Charitable Donation Report and submit both reports to the Lottery within thirty (30) days after the close of its license year. See Section 67-7710, Idaho Code. ()

407. INDEPENDENT AUDIT OF LARGE RAFFLES.

Every charitable or non-profit organization whose gross annual revenues exceed two hundred thousand dollars (\$200,000) from the operation of raffles shall provide the Commission with a copy of an annual report of raffle events. The audit shall be performed by a certified public accountant licensed in Idaho and who meets the peer review requirements set forth by the Idaho State Board of Accountancy. The audit must be submitted within ninety (90) days

after the end of the organizations license year. ()

408. -- 499. (RESERVED)

**SUB AREA: LICENSING AND LICENSE FEES FOR ORGANIZATIONS
CONDUCTING BINGO GAMES OR RAFFLES**

500. APPLICATION.

All persons required by statute and by these rules to obtain a license before operating a bingo game or conducting a raffle must pay the license fees and apply for and receive a license under the rules in this sub area. See Section 67-7711(1), Idaho Code. ()

501. LICENSE FEES.

Each organization that applies to the Lottery for a license under these rules shall pay annually to the Lottery a nonrefundable license fee that is due upon submission of the application. An application approved by the Lottery, complete with all required information, must be submitted along with the appropriate fee to the Lottery Security Division. See Section 67-7712(1), Idaho Code. These non-refundable fees are based on flat initial fee for applicants without a license and a fee based on annual gross revenues from bingo sessions or raffle events for applicants with a license as follows:

\$100 fee - initial application
\$100 fee - up to \$25,000 annual gross revenues
\$200 fee - up to \$75,000 annual gross revenues
\$300 fee - over \$75,000 annual gross revenues

()

502. INFORMATION TO BE PROVIDED IN APPLICATION.

01. Background Check of Applicants. The application for an initial license and for a renewal license to operate a bingo game or to conduct a raffle will be reviewed and relevant background investigations will be conducted on all persons listed on the application as officers, directors or members of the charitable or nonprofit organization. The signature from the organization's representative on the application gives the Lottery authority to conduct the required investigations. The persons listed on the application must be officers or directors of the organization applying for a license and the application must be signed by an officer of the organization. ()

02. Proper Identification. The application must list the name, address, date of birth, driver's license number and social security or tax identification number of the applicant, if applicable. If the applicant is a corporation, association or similar legal entity, the application must also list the full name, current home address and phone number, date of birth, social security number, driver's license number and state of issuance, of each listed officer and director in order to conduct background investigations. See Section 67-7711(2)(a) and (b), Idaho Code. ()

03. Charitable Organizations. The application of a charitable organization must include a copy of the application for recognition of exemptions and a determination letter from the Internal Revenue Service that indicates that the organization is a charitable organization and that states the section of the tax code under which the exemption is granted, except that if the organization is a state or local branch, lodge, post of chapter or a national organization, a copy of the determination letter of the national organization will satisfy this requirement. See Section 67-7711(2)(c)(i), Idaho Code. The applicant must also provide verifiable documentation to prove charitable function, purpose and activities. Acceptable documentation includes, but is not limited to, meeting minutes, donation documentation, and membership list. ()

04. Incorporated Nonprofit Organizations. The application of an incorporated nonprofit organization must include a copy of the certificate of existence issued by the secretary of state pursuant to Title 30, Chapter 3, Idaho Code, establishing the organization's good corporate standing in the state. See Section 67-7711(2)(c)(ii), Idaho Code. The applicant must also provide verifiable documentation to prove charitable function,

purpose and activities. Acceptable documentation includes, but is not limited to, meeting minutes, donation documentation, and membership list. ()

05. Locations. The application must list the location or locations at which the applicant will conduct bingo games or bingo sessions or drawings for raffles. See Section 67-7711(2)(d), Idaho Code. ()

06. Raffle Drawings. Raffle drawings must be held in Idaho and conducted within the license year for licensed organizations or within twelve (12) months from the date the first ticket was sold for unlicensed organizations. ()

07. License Year and Fiscal Year. An organization may apply for a license to coincide with the organization's fiscal year. See Section 67-7711(5), Idaho Code. ()

08. Failure to Provide Information. Failure to provide all information required for an application may result in a delay in considering an application or denial or dismissal of an application for a bingo/raffle license. See Section 67-7711(1), Idaho Code. ()

503. MULTIPLE CHAPTERS LICENSED TOGETHER.

Different chapters of an organization may apply for and share one (1) raffle license so long as the information required in Subsections 502.01 through 502.06 of these rules is provided to the Lottery before the issuance of the license. See Section 67-7711(4), Idaho Code. When two (2) or more chapters share a license, in aggregate they are subject to the limitations of a single organization with a license; multiple chapters sharing a license are not entitled to multiples of the event or prize limits for a license. ()

504. COMPENSATION OF CERTAIN PERSONS AND CONTRACTS WITH CERTAIN PERSONS PROHIBITED.

Persons listed on the application as officers or directors and their relatives and members of their household are prohibited from being compensated for their participation in the organizations bingo operation. No organization shall contract with any person not employed by, or a volunteer for, the organization for the purpose of conducting a bingo game or raffle on the organizations behalf. See Section 67-7711(3), Idaho Code. ()

505. ACTION ON LICENSES.

01. Applications For Licenses. An application for a license will be approved, denied or dismissed in writing within fifteen (15) days of receipt of the written application and all other required documentation, except as provided in Section 67-7712(2)(j), Idaho Code, when a criminal prosecution of an applicant is pending or an appeal from a criminal prosecution of an applicant is pending. The application will be denied if the applicant does not meet the requirements of statute and of these rules. If an application is not received thirty (30) days in advance of a proposed event, it is possible that a license may not be granted before the event, and the event will not be allowed to proceed without a license. See Section 67-7711(1), Idaho Code. ()

02. Issuance of Licenses. A license will be issued when an application for a license is approved. A license expires one (1) year after its issuance. See Section 67-7711(1), Idaho Code. ()

03. Notice of Intended Actions. If the Lottery intends to deny an application for a license or the renewal of a license or intends to revoke, cancel, rescind or suspend a license, it will provide fifteen (15) days' written notice to the applicant or to the licensee of the general basis for its intended action. If the applicant or licensee does not agree to the Lottery's intended action, the applicant or licensee must in writing request a hearing within the fifteen (15) day notice period. If a timely written request for a hearing is made, the hearing will be conducted in the same manner as a contested case hearing under Title 67, Chapter 52, Idaho Code. If a timely written request for a hearing is not made, the intended action is final and not subject to appeal. See Section 67-7712(3), Idaho Code. ()

506. SUSPENSION OR REVOCATION OF LICENSE -- CIVIL AND CRIMINAL PENALTIES.

Violation of the bingo and raffle statutes or of these bingo/raffle rules or of any conditions of a license may be grounds for administrative, civil or criminal actions, including, but not limited to, placement on probationary status, suspension of operations, license revocation, penalties, or fines. See Section 67-7707, Idaho Code. See also Sections

500 through 504 of these rules. ()

507. EXEMPTION FROM LICENSING AND LICENSING FEES.

Section 67-7713, Idaho Code, exempts charitable and non-profit organizations operating certain low-stakes bingo or raffle games from licensing. ()

01. Low-Stakes Bingo. A charitable or nonprofit organization conducting a bingo game does not need to obtain a license if its gross annual bingo sales (gross revenues from bingo operations) are less than ten thousand dollars (\$10,000). ()

02. Low-Stakes Raffle. A charitable or nonprofit organization does not need to obtain a license to conduct a raffle if the maximum aggregate value of merchandise awarded as prizes for the raffle does not exceed five thousand dollars (\$5,000). ()

03. Exemption From Licensing Not Exemption From Rules. Organizations exempt from licensing under this rule must still comply with applicable requirements of statute and bingo/raffle rules. This information is available by contacting the Lottery. ()

508. RULES AND FORMS.

The Lottery will provide forms and reports necessary in regulating the charitable or nonprofit bingo and raffle events. The Commission is authorized to promulgate rules consistent with and in compliance with Title 67, Chapter 52, Idaho Code. ()

509. -- 599. (RESERVED)

SUB AREA: VENDORS AND VENDORS' LICENSES AND FEES – APPROVED GAMING DEVICES

600. VENDOR'S LICENSE REQUIRED.

All businesses or persons who manufacture, sell, distribute, furnish, or supply to any person or organization any gaming devices, equipment, or materials in this state shall first obtain a vendor's license from the Lottery. See Section 67-7715, Idaho Code. Vendors must file an application and submit all required forms for background investigations. ()

601. LICENSE FEES.

Each initial application for a vendor's license must be accompanied by a five hundred dollar (\$500) non-refundable annual license fee that is due upon submission of the application. An application form approved by the Lottery, completed with all required information, must be submitted with the appropriate fee to the Director of Lottery Security, or his designee. See Section 67-7715(3)-(5), Idaho Code. ()

602. INFORMATION TO BE PROVIDED IN APPLICATION.

01. Identification of Applicants. The application for initial license and for renewal of a license must list: ()

a. The name, address, date of birth, driver's license number and social security number of the applicant, and if the applicant is a corporation, proprietorship, association, partnership or other similar legal entity, the name, home address, date of birth, driver's license number and social security number of each of the officers of the corporation and their spouses, as well as the name and address of the directors and their spouses, or other persons similarly situated and the financial information required to complete the application form. See Section 67-7715(3)(a), Idaho Code. ()

b. The locations from which or persons with which the applicant will provide any gaming devices, equipment or material in this state or for use in this state. See Section 67-7715(3)(b), Idaho Code. ()

02. Incomplete Applications. Financial reports submitted with the license application will be reviewed as part of the background investigation. All requested data must be included on the application to avoid any delay. The application may be dismissed if it is incomplete. ()

603. APPROVAL, DENIAL OR DISMISSAL OF APPLICATION FOR ISSUANCE OF LICENSE.

The Lottery will approve, deny or dismiss an application for a vendor's license, within fifteen (15) days. At the applicant's request the Lottery may defer decision for a longer time. The application will be approved, denied or dismissed in writing. The Lottery will issue vendor licenses to successful applicants. See Section 67-7715, Idaho Code. ()

604. SUSPENSION OR REVOCATION OF LICENSE.

Any licensed vendor in violation of statute or of these rules or of any conditions of its license may face suspension or revocation of its vendor's license. ()

605. -- 609. (RESERVED)

610. GAMING DEVICES, EQUIPMENT OR MATERIALS.

Gaming devices, equipment, and materials include but are not limited to: ()

01. Number Selectors and Related Equipment. Number selection machines, manual mixing drums, or computerized random selectors, site systems, host systems or other electronic bingo machines used to select numbers for bingo or raffles are gaming devices, equipment or materials. ()

02. Bingo Cards. Numbered paper bingo cards and hard bingo cards as described in Paragraphs 310.03.a. and 301.19 of these rules, including Bonanza cards, "U-Pick-Ems," and electronic bingo cards, are gaming devices, equipment or materials. ()

03. Miscellaneous. Daubers, raffle tickets, record keeping materials, electronic bingo devices and other items used in the operation of bingo or raffles are gaming devices, equipment or materials. ()

611. PAPER BINGO CARD MANUFACTURERS STANDARDS.

Card manufacturers must follow these standards for paper cards: ()

01. Quality of Paper. The paper must be of sufficient weight and quality to allow for clearly readable numbers and to prevent ink from spreading or bleeding through a packet and obscuring other numbers or cards. ()

02. Random Assignment of Numbers. Numbers printed on the card must be randomly assigned. ()

03. Serial Numbers. Each set of cards must be comprised of cards bearing the same serial number. No serial number may be duplicated by a manufacturer in a given calendar year. ()

04. Packet Assembly. Cards assembled in books or packets must be glued, not stapled. ()

05. Labeling. A label must be placed on the exterior of each carton of bingo paper listing the type of product, number of packets or loose sheets, serial numbers, per (series) numbers, number of cases, cut of paper, and color of paper. ()

06. Packing Slips. A packing slip inside each case must list the same information as listed on the label. ()

07. Invoice. All orders must be accompanied by an invoice which lists the type of product, number of packets or loose sheets, serial numbers of all packets or loose sheets, per (series) numbers, number of cases, cut of paper, color of paper and pricing by item. The invoice must also include the supplier (vendor) name, and the name and address of the organization purchasing the paper. ()

612. NUMBER SELECTORS.

All number selectors for bingo operations must be approved by the Commission after review and advice by the Bingo-Raffle Advisory Board. Electronic random selectors must interact with players. Auto daubing systems for

paper bingo cards are prohibited. ()

613. DISTRIBUTION AND USE OF ELECTRONIC BINGO MACHINES.

01. Approved Sources. A licensed distributor of electronic bingo machines must purchase, rent, lease or otherwise provide electronic bingo machines only from a licensed manufacturer and purchase, lease, rent, or otherwise provide only electronic bingo machines that have been approved by the Commission. See Section 67-7718(1), Idaho Code. ()

02. Approved Users. A licensed distributor of electronic bingo machines is permitted to sell, rent, lease or otherwise provide electronic bingo machines only to licensed bingo operators. See Section 67-7718(2), Idaho Code. ()

03. Initial Use. The licensed distributor of electronic bingo machines must notify the Commission in writing of the sale, rental, lease, provision or installation of any electronic bingo machines before a licensed bingo operator's first use of the machines as follows: ()

- a.** The complete name and address of the licensed bingo operator and their license number. ()
- b.** The type of equipment and the serial numbers of equipment that was sold, rented, leased, provided or installed. ()
- c.** The expected date upon which the licensed bingo operator will begin to use the equipment. ()
- d.** A copy of any and all agreements or contracts between the licensed distributor and the licensed bingo operator regarding use of the equipment. ()

04. Installation, Maintenance, Service and Repair. The licensed distributor must be the initial contact for installation, service, maintenance or repair of electronic bingo machines and for ordering electronic bingo cards. The distributor may enlist the manufacturer's assistance for installation, service, maintenance or repair of electronic bingo machines. With the Commission's approval, a licensed manufacturer may authorize or subcontract with others for service, repair or maintenance of electronic bingo machines, but the licensed manufacturer retains ultimate responsibility and liability for service, maintenance and repair. See Section 67-7718(4), Idaho Code. ()

05. Invoices and Payments. The licensed distributor of electronic bingo machines must be the person who invoices for and collects payments for a licensed bingo operator's use of electronic bingo machines. The manufacturer may generate the invoice. All payments must be to the distributor and not the manufacturer. The invoice must contain the licensed distributor's name, complete address and license number of the licensed bingo operator. See Section 67-7718(5), Idaho Code. ()

06. Transportation Of Electronic Bingo Devices. A licensed distributor may transport electronic bingo devices from one (1) location to another for use by one (1) or more licensed bingo operator after the distributor has notified the Commission in writing of its schedule for rotating the electronic bingo devices from one (1) location to another. The notification must list the locations at which the devices will be used and name the licensed bingo operators that will be using the devices at each location. See Section 67-7718(6), Idaho Code. ()

07. Site Systems and Transportation of Site Systems. Each licensed bingo operator that uses a site system must have its own site system. A licensed bingo operator that uses a site system cannot transport its site system from one (1) location to another or allow another bingo operator to use its site system without prior written approval from the Commission. See Section 67-7718(6), Idaho Code. ()

614. -- 699. (RESERVED)

SUB AREA: SUSPENSION, REVOCATION, OR DENIAL OF A LICENSE

700. SUSPENSION, REVOCATION OR DENIAL OF LICENSE.

Any licensee or applicant for a license found by a court of competent jurisdiction or by the Lottery pursuant to the

procedures of Section 67-7712, Idaho Code, to be in violation of any statutes or rules governing operating, supplying of equipment for, participating in, or establishing of gaming in the state of Idaho may be subject to suspension, revocation or denial of its license. See Sections 67-7712 and 67-7715, Idaho Code. ()

701. GROUNDS FOR SUSPENSION, REVOCATION OR DENIAL OF LICENSE.

The Lottery may suspend, revoke or deny a license if it finds that the licensee or applicant for a license has violated any provision of Title 67, Chapter 77, Idaho Code, any of these rules, or any county ordinance adopted pursuant to Title 67, Chapter 77, Idaho Code, (See Section 67-7712(2), Idaho Code). ()

702. COMPLAINT AGAINST AND INVESTIGATION OF LICENSEES.

The Lottery may, upon its own motion, or upon a written verified complaint of any other person, investigate the operation of any gaming purportedly authorized by Title 67, Chapter 77, Idaho Code, or by these rules, whether the gaming is conducted by a licensed or an exempt operation, and whether gaming equipment or supplies comply with the requirements of Title 67, Chapter 77, Idaho Code. If the Lottery has reasonable cause to believe that any gaming described in Title 67, Chapter 77, Idaho Code, or in these rules, violates the provisions of the Idaho Code or of these rules, in its discretion it may under the procedures set forth in Section 67-7712(3), Idaho Code, and as provided by these rules propose to revoke, cancel, rescind or suspend any license for a period not to exceed one (1) year, or refuse to grant a renewal of the license, or take other action as may be appropriate under Idaho Code or these rules. See Section 67-7712(3), Idaho Code. ()

703. PROCEDURE UPON FINDING OF REASONABLE CAUSE.

If the Lottery refuses to grant a license or refuse to grant a renewal of a license or revoke, cancel, rescind or suspend a license, it shall give the applicant or licensee fifteen (15) calendar days' written notice of its intended action stating generally the basis for its action. Within the fifteen (15) calendar days' notice period, the applicant or licensee shall indicate its acceptance of the decision of the Lottery or request a hearing to be held in the same manner as hearings in contested cases pursuant to Title 67, Chapter 52, Idaho Code. See Section 67-7712(3), Idaho Code. ()

704. CONDUCT OF HEARING IN CONTESTED CASE.

The hearing in a contested case shall be conducted within twenty-one (21) days of the request. The applicant or licensee may appeal the decisions of the Lottery after the hearing pursuant to Title 67, Chapter 52, Idaho Code. Failure to make the request for hearing as provided in these rules shall render the decision of the Lottery final and not subject to further appeal. See Section 67-7712(3), Idaho Code. ()

705. -- 999. (RESERVED)

IDAPA 53 – IDAHO BARLEY COMMISSION

DOCKET NO. 53-0101-2000F

NOTICE OF OMNIBUS RULEMAKING – ADOPTION OF PENDING FEE RULE

EFFECTIVE DATE: This rule has been adopted by the agency and is now pending review by the 2021 Idaho State Legislature for final approval. Pursuant to Section 67-5224(5)(c), Idaho Code, this pending rule will not become final and effective until it has been approved by concurrent resolution of the legislature because of the fee being imposed or increased through this rulemaking. The pending fee rule becomes final and effective upon adoption of the concurrent resolution or upon the date specified in the concurrent resolution unless the rule is rejected.

AUTHORITY: In compliance with Section 67-5224, Idaho Code, notice is hereby given that this agency has adopted a pending fee rule. The action is authorized pursuant to Section 22-4009, Idaho Code.

DESCRIPTIVE SUMMARY: The following is a concise explanatory statement of the reasons for adopting the pending fee rule and a statement of any change between the text of the proposed fee rule and the text of the pending fee rule with an explanation of the reasons for the change.

This pending fee rule adopts and re-publishes the following existing rule chapter previously submitted to and reviewed by the Idaho Legislature under IDAPA 53, rules of the Idaho Barley Commission:

IDAPA 53

- IDAPA 53.01.01, *Rules of the Idaho Barley Commission.*

There are no changes to the pending fee rule and it is being adopted as originally proposed. The complete text of the proposed rule was published in the Sept. 16, 2020, Idaho Administrative Bulletin, [Vol. 20-9SE, pages 2301-2303](#).

FEE SUMMARY: The following is a specific description of the fee or charge imposed or increased. This rulemaking does not impose a fee or charge, or increase a fee or charge, beyond what was previously approved and codified in the prior rules. Idaho barley growers pay a Barley Tax that is currently three cents (\$.03) per hundredweight of barley marketed, which is collected at point of first purchase and remitted to the Idaho Barley Commission. Section 22-4015, Idaho Code, allows for the Barley Tax of up to four cents (\$.04) per hundredweight.

FISCAL IMPACT: The following is a specific description, if applicable, of any negative fiscal impact on the state general fund greater than ten thousand dollars (\$10,000) during the fiscal year: This rulemaking is not anticipated to have any fiscal impact on the state general fund because the FY2021 budget has already been set by the Legislature, and approved by the Governor, anticipating the existence of the rules and fees being reauthorized by this rulemaking.

ASSISTANCE ON TECHNICAL QUESTIONS: For assistance on technical questions concerning this pending fee rule, contact Laura Wilder, Executive Director, Idaho Barley Commission at (208) 608-4519.

Dated this 18th day of November, 2020.

IDAPA 53 – IDAHO BARLEY COMMISSION

53.01.01 – RULES OF THE IDAHO BARLEY COMMISSION

000. LEGAL AUTHORITY.

In accordance with Section 22-4009, Idaho Code, the Idaho Barley Commission has promulgated rules implementing the provisions of Chapter 40, Title 22, Idaho Code. ()

001. TITLE AND SCOPE.

These rules are titled IDAPA 53.01.01, “Rules of the Idaho Barley Commission,” IDAPA 53, Title 01, Chapter 01. These rules provide the means for the protection, promotion, study, research, analysis and development of markets concerning the growing and marketing of Idaho barley. ()

002. -- 009. (RESERVED)

010. DEFINITIONS.

The definitions set forth in Section 22-4003, Idaho Code, apply to this chapter ()

011. -- 099. (RESERVED)

100. FIRST PURCHASER RULES.

In accordance with Section 22-4015(1), Idaho Code, the Commission will designate the quarters (three (3) month periods) for the purpose of collecting the tax imposed on all barley grown, delivered into, or stored within the state of Idaho and sold or contracted in the state. ()

01. Designated Quarters. The quarters designated by the Commission for payment of tax are: ()

a. The Commission’s first quarter will begin on the first day of July and end the thirtieth day of September. The first quarter barley tax is due on or before the fifteenth day of October. ()

b. The Commission’s second quarter will begin on the first day of October and end the thirty-first day of December. The second quarter barley tax is due on or before the fifteenth day of January. ()

c. The Commission’s third quarter will begin on the first day of January and end the thirty-first day of March. The third quarter barley tax is due on or before the fifteenth day of April. ()

d. The Commission’s fourth quarter will begin on the first day of April and end the thirtieth day of June. The fourth quarter barley tax is due on or before the fifteenth day of July. ()

02. Barley Tax Return (Form Number 1). The first purchaser of barley is required to complete and send the Barley Tax Return (Form Number 1) to the commission office each and every quarter on or before the dates specified in these rules. The Barley Tax Return (Form Number 1) shall be provided to the first purchaser by the Commission and, at a minimum, require the following legible information: ()

a. The tax reporting period. ()

b. The name and address of the barley purchaser. ()

c. The net weight of the barley purchased (if any) in pounds or hundredweights. ()

d. The total amount of tax deducted (if any) from sellers by the purchaser. ()

e. The tax withheld by Commodity Credit Corporation loans. ()

f. The total amount of tax due the Commission (if any). ()

03. Delivery of Documents to Commission (Form Number 2). The first purchaser of barley shall complete and return the Report of Tax on Barley (Form Number 2), or equivalent, to the commission office each and every quarter on or before the dates specified in these rules. The Commission shall provide blank copies of Form Number 2 to the first purchaser. Form Number 2, or equivalent, will, at a minimum, require the following legible

information: ()

a. The name and address of the purchaser. ()

b. The quarter the barley was purchased. ()

c. The name or names and address or addresses of the grower and seller. ()

d. The number of pounds of barley purchased. ()

e. The total barley tax withheld from each purchase. ()

04. Deduction of Tax on Net Weight of Barley. The first purchaser shall deduct the barley tax on the NET weight of the barley after deduction of dockage. ()

05. Late Payment Penalty (As specified in Section 22-4018 (2), Idaho Code). Any person or firm who makes payment to the Commission at a date later than prescribed in Section 22-4015, Idaho Code, shall be subject to a late payment penalty of fifteen percent (15%) per annum on the amount due. ()

101. -- 199. (RESERVED)

200. EXEMPTIONS.

In accordance with Section 22-4015, Idaho Code, the barley assessment shall be imposed on all barley grown, delivered into or stored within, and sold or contracted in Idaho. If a barley assessment that serves a comparable purpose to the Idaho assessment was previously paid in a jurisdiction outside Idaho, the seller of the barley is exempt from payment of the Idaho barley assessment. The Commission will determine jurisdictions outside of Idaho that collect an assessment that serves a comparable purpose, which includes, as a minimum, funding for research and market development programs. In order to qualify for the exemption, the seller must demonstrate to the first purchaser in the state of Idaho that an assessment has been previously paid to such a jurisdiction. ()

201. -- 999. (RESERVED)

IDAPA 57 – SEXUAL OFFENDER MANAGEMENT BOARD

DOCKET NO. 57-0101-2000F

NOTICE OF OMNIBUS RULEMAKING – ADOPTION OF PENDING FEE RULE

EFFECTIVE DATE: This rule has been adopted by the agency and is now pending review by the 2021 Idaho State Legislature for final approval. Pursuant to Section 67-5224(5)(c), Idaho Code, this pending rule will not become final and effective until it has been approved by concurrent resolution of the legislature because of the fee being imposed or increased through this rulemaking. The pending fee rule becomes final and effective upon adoption of the concurrent resolution or upon the date specified in the concurrent resolution unless the rule is rejected.

AUTHORITY: In compliance with Section 67-5224, Idaho Code, notice is hereby given that this agency has adopted a pending fee rule. The action is authorized pursuant to Section 18-8314, Idaho Code.

DESCRIPTIVE SUMMARY: The following is a concise explanatory statement of the reasons for adopting the pending fee rule and a statement of any change between the text of the proposed fee rule and the text of the pending fee rule with an explanation of the reasons for the change.

This pending fee rule adopts and re-publishes the following existing rule chapter previously submitted to and reviewed by the Idaho Legislature under IDAPA 57, rules of the Sexual Offender Management Board:

IDAPA 57

- 57.01.01, *Rules Governing the Sexual Offender Management Board.*

There are no changes to the pending fee rule and it is being adopted as originally proposed. The complete text of the proposed rule was published in the Sept. 16, 2020, Idaho Administrative Bulletin, [Vol. 20-9SE, pages 2304-2320](#). The adoption of this pending rule revises Rule 003 to update the incorporated by reference information and allows providers to obtain all required continuing education training through online education resources.

FEE SUMMARY: The following is a specific description of the fee or charge imposed or increased. This rulemaking does not impose a fee or charge, or increase a fee or charge, beyond what was previously approved and codified in the prior rules.

- Seventy-five dollars (\$75) for initial certification applications and fifty dollars (\$50) for biennial certification renewal applications for: senior/approved level psychosexual evaluators, associate/supervised level sexual offender treatment provider, and associate/supervised level post-conviction sexual offender polygraph examiners.
- Fifty dollars (\$50) for initial certification applications and thirty dollars (\$30) for annual certification renewal applications for entry-level provisional/supervised psychosexual evaluators and provisional/supervised sexual offender treatment providers.
- Twenty-five dollars (\$25) for a 60-day continuing education (CEU) extension.

This fee or charge is being imposed pursuant to Section 18-8314, Idaho Code.

FISCAL IMPACT: The following is a specific description, if applicable, of any negative fiscal impact on the state general fund greater than ten thousand dollars (\$10,000) during the fiscal year: This rulemaking is not anticipated to have any fiscal impact on the state general fund because the FY2021 budget has already been set by the Legislature, and approved by the Governor, anticipating the existence of the rules and fees being reauthorized by this rulemaking.

ASSISTANCE ON TECHNICAL QUESTIONS: For assistance on technical questions concerning this pending fee rule, contact Nancy Volle at (208) 658-2002.

Dated this 18th day of November, 2020.

IDAPA 57 – SEXUAL OFFENDER MANAGEMENT BOARD

57.01.01 – RULES OF THE SEXUAL OFFENDER MANAGEMENT BOARD

000. LEGAL AUTHORITY.

This chapter is adopted under the legal authority of Section 18-8314(3), Idaho Code, to implement the provisions of Sections 18-8312 through 18-8316, Idaho Code. ()

001. TITLE AND SCOPE.

01. **Title.** These rules are titled IDAPA 57.01.01, “Rules of the Sexual Offender Management Board.” ()

02. **Scope.** These rules provide procedures for the Sexual Offender Management Board to: ()

a. Establish certified evaluator, sexual offender treatment provider and post conviction sexual offender polygraph examiner qualifications; ()

b. Establish standards for psychosexual evaluations and sexual offender treatment programs based on current and evolving best practices; ()

c. Approve, issue, renew, deny, suspend, revoke, restrict or otherwise monitor a certification; ()

d. Establish fees for initial and renewal certification; ()

e. Establish procedures for standards and qualification quality assurance; and ()

f. Establish standard protocols for sexual offender management, assessment and classification.()

03. **Relationship to the Department of Correction.** The Board is created within the Idaho Department of Correction, and relies upon the department for fiscal and administrative support. The governor appoints the Board members. The powers and duties of the Board are separate from the Department of Correction, and are set forth in Section 18-8314, Idaho Code. ()

002. ADMINISTRATIVE APPEALS.

The “Idaho Rules of Administrative Procedure of the Attorney General,” IDAPA 04.11.01, Sections 000 through 799 apply to contested cases of the Board. ()

003. INCORPORATION BY REFERENCE.

The following documents are incorporated by reference into these rules: ()

01. **The American Association of Police Polygraphists “Standards and Principles,” © AAPP 2018 v.14.110,** is herein incorporated by reference and is available from the American Association of Police Polygraphists, PO Box 657, Waynesville, Ohio 45068, website <https://www.americanassociationofpolicepolygraphists.org/web/public/standards>. ()

02. **The American Polygraph Association “Standards of Practice,” effective August 23, 2019, and “Code of Ethics,” effective September 1, 2015,** are herein incorporated by reference and are available from the American Polygraph Association, PO Box 8037, Chattanooga, Tennessee 37414, website <https://www.polygraph.org>. ()

03. **“Idaho Sexual Offender Management Board Standards and Guidelines for Adult Sexual Offender Management Practices,”** October 2020 revision, is herein incorporated by reference and is available from the Board’s office and on the Board website, <https://somb.idaho.gov/>. ()

04. **“Idaho Sexual Offender Management Board Standards and Guidelines for Practitioners, Evaluations and Treatment of Juvenile Sexual Offenders,”** October 2020 revision, is herein incorporated by reference and is available from the Board's office and on the Board's website, <https://somb.idaho.gov/>. ()

004. PUBLIC RECORDS ACT COMPLIANCE.

01. **Administrative Rules.** The rules contained herein are promulgated pursuant to Title 67, Chapter

52, Idaho Code, and are public records. ()

02. Public Records Requests. Requests for public information are processed in compliance with the Idaho Public Records Act, Title 74, Chapter 1, Idaho Code. ()

005. -- 009. (RESERVED)

010. DEFINITIONS.

01. Board. The Sexual Offender Management Board described in Section 18-8312, Idaho Code. ()

02. Central Roster. A roster of evaluators, treatment providers and polygraph examiners, who meet the qualifications and are certified by the Board to conduct psychosexual evaluations, provide sexual offender treatment or conduct post-conviction sexual offender polygraphs. ()

03. Certificate Holder. A person who has been approved by the Board and certified as meeting qualifications to conduct or assist in the conduct of psychosexual evaluations, provide sexual offender treatment or conduct post conviction sexual offender polygraphs. ()

04. Certified Evaluator. Either a psychiatrist licensed by this state pursuant to Title 54, Chapter 18, Idaho Code, or a master's or doctoral level mental health professional licensed by this state pursuant to Title 54, Chapters 23, 32, or 34, Idaho Code. The evaluator shall have by education, experience, and training, expertise in the assessment and treatment of sexual offenders, meet the qualifications, and be approved by the Board to perform psychosexual evaluations in this state, as described in Section 18-8314, Idaho Code. A person meeting this definition may be certified by the Board as either a senior/approved certified evaluator or an associate/supervised certified evaluator. ()

05. Certified Post Conviction Sex Offender Polygraph Examiner. A polygraph examiner who has received specialized post conviction sexual offender testing training, and who is certified by the Board to conduct post conviction sexual offender polygraph examinations as ordered or required by the court, Idaho Department of Correction, or Idaho Commission for Pardons and Parole. A person meeting this definition may be certified by the Board as either a senior/approved post conviction sexual offender polygraph examiner or an associate/supervised post conviction sexual offender polygraph examiner. ()

06. Certified Treatment Provider. A person who has been certified by the Board as meeting qualifications to provide sexual offender treatment as ordered by the court, Idaho Department of Correction, Idaho Commission for Pardons and Parole, or Idaho Department of Juvenile Corrections. Such person shall be licensed by this state or another state or jurisdiction as a psychiatrist, or a master's or doctoral level mental health professional, and who has by education, experience and training, expertise in the treatment of sexual offenders. A person meeting this definition may be certified by the Board as either a senior/approved sex offender treatment provider or an associate/supervised sex offender treatment provider. ()

07. Client. An adult or juvenile receiving services from a person certified by the Board pursuant to Section 18-8314, Idaho Code. ()

08. Established Standards. The "Idaho Sexual Offender Management Board Standards and Guidelines for Adult Sexual Offender Management Practices" and the "Idaho Sexual Offender Management Board Standards and Guidelines for Practitioners, Evaluations and Treatment of Juvenile Sexual Offenders" as referenced in Section 004 of these rules and established pursuant to Section 18-8314, Idaho Code. ()

09. Provisional/Supervised Psychosexual Evaluator. A person with limited clinical experience and specialized training, who may be licensed or is working toward licensure as a psychiatrist or master's or doctoral level mental health professional, who is authorized by the Board to assist with the conduct of psychosexual evaluations under the clinical supervision of a senior/approved psychosexual evaluator. A person with a provisional/supervised psychosexual evaluator certificate is not considered to be a certified evaluator as defined in Section 18-8303, Idaho Code or for the purposes of conducting a psychosexual evaluation in accordance with Section 18-8316,

Idaho Code. Certification approval is specific to adult or juvenile clients. ()

10. Provisional/Supervised Sex Offender Treatment Provider. A person with limited clinical experience and specialized training, who may be licensed or is working toward licensure as a psychiatrist or master's or doctoral level mental health professional, who is authorized by the Board to provide sexual offender treatment under the clinical supervision of a senior/approved sex offender treatment provider. Certification approval is specific to adult or juvenile clients. ()

11. Psychosexual Evaluation. A comprehensive evaluation and assessment specifically addressing a person's sexual development, sexual deviancy, sexual history and risk of re-offense. A psychosexual evaluation for the purpose of these rules is conducted post conviction, as ordered by the court pursuant to Section 18-8316, Idaho Code, or Title 20, Chapter 5, Idaho Code, by a person who has been certified by the Board. ()

12. Quality Assurance. Processes established by the Board to review psychosexual evaluations and sexual offender treatment procedures to assure minimum standards and certificate holder qualifications are met. All quality assurance reviews will be conducted under the direction of the Board. ()

13. Sexual Offender. A person adjudicated or convicted of an offense as listed in Section 18-8304, Idaho Code, or a substantially equivalent offense under the laws of another state, territory, commonwealth, or other jurisdiction of the United States including tribal courts and military courts; or who has been adjudicated or convicted of a sexual offense-related crime. ()

14. Sexual Offender Classification Board. A board in effect from 1998 to 2011 that determined whether a sexual offender should be designated as a violent sexual predator; set certified evaluator qualifications and standards; and administered an evaluator certification process. ()

15. Supervision. ()

a. For purposes of clinical practice supervision for associate/supervised psychosexual evaluator or associate/supervised sex offender treatment provider certification, supervision is generally considered as face-to-face direct contact, documented teleconferencing, or interactive video conferencing with a Board-approved supervisor using a ratio of one (1) hour of clinical supervision for every twenty (20) hours of direct service provided; or ()

b. For purposes of clinical practice supervision for provisional/supervised psychosexual evaluator or provisional/supervised treatment provider certification, supervision is considered as continual face-to-face direct contact with a Board-approved supervisor for the first two hundred fifty (250) hours of direct service provided followed by face-to-face direct contact with a Board-approved supervisor using a ratio of one (1) hour of clinical supervision for every fifteen (15) hours of direct service provided; or ()

c. For purposes of supervision for associate/supervised post conviction sexual offender polygraph examiners, supervision is generally considered as face-to-face direct contact with a Board-approved supervisor during conduct of the supervisee's first five (5) PCSOT polygraphs followed by review by a Board-approved supervisor of one (1) PCSOT polygraph for every five (5) PCSOT polygraphs conducted by the supervisee. Such review shall include chart and report review. ()

16. Treatment. For purposes of certification eligibility the provision of face-to-face individual, group, or family therapy with a person who has been investigated by law enforcement or child protective services for commission of a sexual offense, or who has been adjudicated or convicted of a sexual offense or sexual offense-related crime. Treatment must be directly relevant to the client's sexually offending behavior. ()

17. Violent Sexual Predator. A person who was designated as a violent sexual predator by the Sexual Offender Classification Board where such designation has not been removed by judicial action or otherwise. ()

011. ABBREVIATIONS.

01. APA. The American Polygraph Association. ()

02. PCSOT. “Post conviction sexual offender testing” is specialized instruction beyond the basic polygraph training for the purpose of specific polygraph testing of post convicted sexual offenders. ()

03. SOCB. The Sexual Offender Classification Board. ()

04. SOMB. The Sexual Offender Management Board. ()

012. -- 019. (RESERVED)

020. RECORDKEEPING.

01. Certificate Holders. Records on all applicants and certifications issued, renewed, denied, suspended, revoked, or otherwise monitored shall be maintained for a period not less than five (5) years. ()

02. Violent Sexual Predators. The file on a sexual offender who was designated as a violent sexual predator by the SOCB is maintained by the Board and is considered the official file for all purposes. ()

021. BOARD MEETINGS.

01. Meetings. The Board meets at least quarterly and may meet more frequently. All business of the Board is conducted in compliance with the open meeting law, pursuant to Title 67, Chapter 23, Idaho Code, and Section 18-8315, Idaho Code. ()

02. Agenda. An agenda for each regularly scheduled meeting is posted in compliance with Section 67-2343, Idaho Code. ()

022. -- 039. (RESERVED)

040. CERTIFIED EVALUATOR QUALIFICATIONS.

01. Certified Evaluators. Each evaluator who conducts or assists with the conduct of a psychosexual evaluation pursuant to Section 18-8316, Idaho Code, must meet the qualifications as set forth in the established standards issued by the Board and be certified by the Board. ()

a. Certification approval is specific to adult or juvenile clients. ()

b. A certificate holder may be separately approved to provide services to both adult and juvenile clients. ()

02. Certification Requirements. Minimum requirements for certification as a psychosexual evaluator include criteria, requirements, and expectations in the following categories: ()

a. Formal educational requirements; ()

b. Professional licensure requirements; ()

c. Clinical experience requirements; ()

d. Specialized training requirements; and ()

e. Continuing education and professional development requirements. ()

041. LEVELS OF PSYCHOSEXUAL EVALUATOR CERTIFICATION.

The Board issues certificates within three (3) levels reflective of a person’s training and experience specific to the population to be served: ()

01. Senior/Approved Psychosexual Evaluator. ()

a. Possesses a valid Idaho license to practice as a psychiatrist or master’s or doctoral level psychologist, social worker, professional counselor, or marriage and family therapist. ()

b. Has engaged in a combination of direct, face-to-face clinical practice with sexual offenders and received specialized training for a minimum of one thousand five hundred (1,500) hours. Of this requirement, a minimum of five hundred (500) combined hours shall have been accumulated within the three (3) years immediately preceding an initial application for certification at this level, as set forth in the established standards issued by the Board; and ()

c. Has conducted a minimum of nine (9) psychosexual evaluations within the three (3) years preceding an initial application for certification at this level. ()

02. Associate/Supervised Psychosexual Evaluator. ()

a. Possesses a valid Idaho license to practice as a psychiatrist or master’s or doctoral level psychologist, social worker, professional counselor, or marriage and family therapist. ()

b. Has engaged in a combination of supervised direct, face-to-face clinical practice with sexual offenders and received specialized training for a minimum of five hundred (500) hours. Of this requirement, a minimum of three hundred (300) combined hours shall have been accumulated within the three (3) years immediately preceding an initial application for certification at this level, as set forth in the established standards issued by the Board; ()

c. Has conducted a minimum of six (6) psychosexual evaluations within the three (3) years preceding an initial application for certification at this level; and ()

d. Shall only conduct psychosexual evaluations under the clinical practice supervision of a Board-approved supervisor as defined in Paragraph 010.15.a. of these rules, and under the terms of a formal clinical supervision agreement. ()

03. Provisional/Supervised Psychosexual Evaluator. ()

a. Possesses or is currently enrolled in a graduate program of study toward the attainment of a master’s or doctoral degree, preferably with an emphasis on the application of forensic clinical practice; ()

b. Possesses or is pursuing a valid license to practice as a psychiatrist or master’s or doctoral level psychologist, social worker, professional counselor, or marriage and family therapist; ()

c. May assist with the conduct of psychosexual evaluations only under the clinical supervision of a Board-approved supervisor as defined in Paragraph 010.15.b. of these rules, and under the terms of a formal clinical supervision agreement. Face-to-face supervision is required when providing direct clinical services to sex offenders. ()

042. -- 079. (RESERVED)

080. SEXUAL OFFENDER TREATMENT PROVIDER QUALIFICATIONS.

01. Certified Sexual Offender Treatment Provider. Each person who provides treatment to sexual offenders as ordered or required by the court, Idaho Department of Correction, Idaho Commission for Pardons and Parole, or the Idaho Department of Juvenile Corrections, in accordance with Section 18-8314, Idaho Code, must meet the qualifications as set forth in the established standards issued by the Board and be certified by the Board. ()

a. Certification approval is specific to adult or juvenile clients. ()

b. A certificate holder may be separately approved to provide services to both adult and juvenile clients. ()

02. Certification Requirements. Minimum requirements for certification as a sexual offender treatment provider include criteria, requirements, and expectations in the following categories: ()

- a. Formal educational requirements; ()
- b. Professional licensure requirements; ()
- c. Clinical experience requirements; ()
- d. Specialized training requirements; and ()
- e. Continuing education and professional development requirements. ()

081. LEVELS OF SEXUAL OFFENDER TREATMENT PROVIDER CERTIFICATION.

The Board issues certificates within three (3) levels reflective of a person’s training and experience specific to the population to be served: ()

01. Senior/Approved Sexual Offender Treatment Provider. ()

a. Possesses a valid license to practice in this state or another state or jurisdiction as a psychiatrist or master’s or doctoral level psychologist, social worker, professional counselor, or marriage and family therapist; and ()

b. Has engaged in a combination of direct, face-to-face clinical practice with sexual offenders and received specialized training for a minimum of one thousand five hundred (1,500) hours. Of this requirement, a minimum of five hundred (500) combined hours shall have been accumulated within the three (3) years immediately preceding an initial application for certification at this level, as set forth in the established standards issued by the Board. ()

02. Associate/Supervised Sexual Offender Treatment Provider. ()

a. Possesses a valid license to practice in this state or another state or jurisdiction as a psychiatrist or master’s or doctoral level psychologist, social worker, professional counselor, or marriage and family therapist. ()

b. Has engaged in a combination of supervised direct, face-to-face clinical practice with sexual offenders and received specialized training for a minimum of five hundred (500) hours. Of this requirement, a minimum of three hundred (300) combined hours shall have been accumulated within the three (3) years immediately preceding an initial application for certification at this level, as set forth in the established standards issued by the Board; and ()

c. Shall only provide treatment services under the clinical practice supervision of a Board-approved supervisor as defined in Paragraph 010.15.a. of these rules, and under the terms of a formal clinical supervision agreement. ()

03. Provisional/Supervised Sexual Offender Treatment Provider. ()

a. Possesses or is currently enrolled in a graduate program of study toward the attainment of a master’s or doctoral degree, preferably with an emphasis on the application of forensic clinical practice; and ()

b. Possesses or is pursuing a valid license to practice as a psychiatrist or master’s or doctoral level psychologist, social worker, professional counselor, or marriage and family therapist. ()

c. Shall only provide treatment services under the clinical supervision of a Board-approved supervisor as defined in Paragraph 010.15.b. of these rules, and under the terms of a formal clinical supervision agreement. Face-to-face supervision is required when providing direct clinical services to sex offenders. ()

082. -- 099. (RESERVED)

100. SPECIALIZED TRAINING FOR PSYCHOSEXUAL EVALUATORS AND SEXUAL OFFENDER TREATMENT PROVIDERS.

For initial certification as a psychosexual evaluator or sexual offender treatment provider, an applicant must have participated in specialized training in the field of sexual abuse, as set forth in the established standards issued by the Board. Sources for such training may be formal conferences, symposia, seminars and workshops in areas such as:

- 01. Sexually Abusive Behavior.** Contemporary research regarding the etiology of sexually abusive behavior; ()
- 02. Offending Behavior.** Research-identified risk factors for the development and continuation of sexually abusive/offending behavior; ()
- 03. Assessment, Treatment, and Management of Adult or Juvenile Sex Offenders.** Contemporary research and practice in the areas of assessment, treatment, and management of adult or juvenile sex offenders; ()
- 04. Specific Risk Assessment Tools.** Research-supported, sex offender-specific risk assessment tools; and ()
- 05. Deviant Sexual Arousal and/or Interests.** Physiological assessment of deviant sexual arousal and/or interests. ()

101. CONTINUING EDUCATION FOR PSYCHOSEXUAL EVALUATORS AND SEXUAL OFFENDER TREATMENT PROVIDERS.

To maintain certification as a psychosexual evaluator or sexual offender treatment provider, a certificate holder must receive continuing education in the field of sexual abuse. ()

- 01. Senior/Approved and Associate/Supervised Certification Levels.** A psychosexual evaluator or sexual offender treatment provider who is certified at a senior/approved or an associate/supervised level must receive a minimum of forty (40) hours of specialized continuing education in the form of formal conferences, symposia, seminars, workshops or on-line training over the course of the two-year period prior to each renewal period as set forth in the established standards issued by the Board. A certificate holder not meeting the continuing education requirements may formally petition the SOMB for a sixty-day extension to submit proof of meeting continuing education requirements. ()
- 02. Provisional/Supervised Certification Level.** A provisional/supervised psychosexual evaluator or sexual offender treatment provider must receive a minimum of twenty (20) hours of specialized continuing education in the form of formal conferences, symposia, seminars, workshops or on-line training annually as set forth in the established standards issued by the Board. A certificate holder not meeting the continuing education requirements may formally petition the SOMB for a sixty-day extension to submit proof of meeting continuing education requirements. ()

102. -- 149. (RESERVED)

150. REQUEST FOR CONDITIONAL WAIVER.

- 01. Conditional Waiver.** The Board may consider an initial applicant's request for a time limited conditional waiver for deficiencies in experience and specialized training qualifications as set forth in the established standards issued by the Board. ()
- 02. Duration.** A conditional waiver is limited to a period of two (2) years. Conditional waivers may not be extended or renewed after the third year. ()

03. Frequency. A conditional waiver request shall only be considered one (1) time for an initial certification application for psychosexual evaluator and sexual offender treatment provider applicants at the senior/approved or associate/supervised level. ()

151. (RESERVED)

152. RECIPROCITY.

The Board may consider reciprocity for any applicant who has been licensed or certified to conduct psychosexual evaluations or sexual offender treatment in another state or jurisdiction as set forth in the established standards issued by the Board. ()

153. EXCLUSION.

Each mental health employee of the Idaho Department of Correction or Idaho Department of Juvenile Corrections who conducts psychosexual evaluations or provides sexual offender treatment is exempt from the certification process. This exemption shall only apply while the employee is acting within the course and scope of his employment with the applicable agency. ()

154. REQUEST FOR CHANGE IN CERTIFICATION LEVEL.

01. Request to Advance in Level of Certification. A certificate holder may apply at any time during an effective certification to advance to the next higher level of certification provided that he meets the established qualifications and requirements as set forth in the established standards issued by the Board. ()

02. Request to Change to a Less Independent Level of Certification. A certificate holder may apply at any time during an effective certification for a reduction in his level of certification in the event that he no longer meets the established qualifications and requirements for his current level of certification as set forth in the established standards issued by the Board. ()

155. APPLICATION FOR CHANGE IN CERTIFICATION LEVEL.

Application for change in certification level shall be on a form provided by the Board and submitted with the required supporting documentation and applicable renewal application processing fee: ()

01. Advance to Senior/Approved Level of Certification Application Fee. A non-refundable renewal application fee payable to the Board in the amount of fifty dollars (\$50) provided that the application is submitted three hundred sixty-five (365) days or more after the most recent effective certification date. The application fee shall be waived if submission is within three hundred sixty-five (365) days from the most recent effective certification date. ()

02. Advance to Associate/Supervised Level of Certification Application Fee. A non-refundable renewal application fee payable to the Board in the amount of thirty dollars (\$30) provided that the application is submitted three hundred sixty-five (365) days or more after the most recent effective certification date. The application fee shall be waived if submission is within three hundred sixty-five (365) days from the most recent effective certification date. ()

03. Change to a Less Independent Level of Certification Application Fee. A non-refundable renewal application fee payable to the Board in the amount of fifty dollars (\$50) provided that the application is submitted three hundred sixty-five (365) days or more after the most recent effective certification date. The application fee shall be waived if submission is within three hundred sixty-five (365) days from the most recent effective certification date. ()

156. -- 199. (RESERVED)

200. POST CONVICTION SEXUAL OFFENDER POLYGRAPH EXAMINER QUALIFICATIONS.

01. Certified Examiner. Each person who conducts post conviction sexual offender polygraphs as ordered or required by the court, Idaho Department of Correction, or Idaho Commission for Pardons and Parole, in accordance with Section 18-8314, Idaho Code, must meet the qualifications as set forth in the established standards

issued by the Board and be certified by the Board. There shall not be a separate certification specific to adult or juvenile clients. ()

02. Certification Requirements. Minimum requirements for certification as a sexual offender treatment provider include criteria and requirements in the following categories: ()

- a. Educational requirements; ()
- b. Experience requirements; ()
- c. Specialized training requirements; and ()
- d. Continuing education and professional development requirements. ()

201. LEVELS OF POST CONVICTION SEXUAL OFFENDER POLYGRAPH EXAMINER CERTIFICATION.

The Board issues certificates within two (2) levels reflective of a person's experience in conducting post conviction sexual offender polygraphs. ()

01. Senior/Approved Post Conviction Sexual Offender Polygraph Examiner. ()

- a. Has graduated from an APA-accredited polygraph school; ()
- b. Has successfully completed a minimum of forty (40) hours of formal post conviction sexual offender polygraph testing beyond the basic polygraph training course requirements from an APA-accredited program or school; and ()
- c. Has successfully completed a minimum of one hundred (100) polygraph examinations. Of this requirement, a minimum of ten (10) sexual history polygraph examinations and a minimum of ten (10) PCSOT maintenance polygraph examinations shall have been conducted within the three (3) years immediately preceding an initial application for certification at this level, as set forth in the established standards issued by the Board; ()

02. Associate/Supervised Post Conviction Sexual Offender Polygraph Examiner. ()

- a. Has graduated from an APA-accredited polygraph school; ()
- b. Has successfully completed a minimum of forty (40) hours of formal post conviction sexual offender polygraph testing beyond the basic polygraph training course requirements from an APA-accredited program or school; and ()
- c. Shall only conduct polygraphs under the supervision of a Board-approved supervisor as defined in Paragraph 010.15.c. of these rules, and under the terms of a formal supervision agreement. ()

202. -- 230. (RESERVED)

231. CONTINUING EDUCATION FOR POST CONVICTION SEXUAL OFFENDER POLYGRAPH EXAMINERS.

To maintain certification as a post conviction sexual offender polygraph examiner, a certificate holder must receive a minimum of thirty (30) hours of continuing education related to the field of polygraphy in the form of formal conferences, symposia, seminars, or workshops over the course of the two-year period prior to each renewal period as set forth in the established standards issued by the Board. A certificate holder not meeting the continuing education requirements may formally petition the SOMB for a sixty-day extension to submit proof of meeting continuing education requirements. ()

232. -- 299. (RESERVED)

300. STANDARDS FOR PROFESSIONAL CONDUCT AND CLIENT RELATIONS.

01. General Considerations for Certified Evaluators and Certified Treatment Providers. Each person who is certified by the Board to conduct or assist with the conduct of psychosexual evaluations or provide sexual offender treatment shall: ()

a. Adhere to the ethical principles and codes, and all practice standards and guidelines for the person's respective discipline and area of professional licensure; ()

b. Be knowledgeable of statutes and scientific data relevant to specialized sexual offender evaluation and sexual offender treatment; ()

c. Be familiar with the statutory requirements for assessments and reports for the courts, pursuant to Section 18-8316, Idaho Code; ()

d. Be committed to community protection and safety; ()

e. Provide services in a manner that ensures humane and ethical treatment of clients; ()

f. Conduct testing in accordance with the person's licensing body, qualifications and experience, and in a manner that ensures the integrity of testing data; ()

g. Avoid relationships with clients that may constitute a conflict of interest, impair professional judgment and risk exploitation; and ()

h. Have no sexual relationships with any client. ()

02. General Considerations for Certified Post Conviction Sexual Offender Polygraph Examiners. Each person who is certified by the Board to conduct post conviction sexual offender polygraph examinations shall: ()

a. Adhere to the ethical principles and codes, and all practice standards and guidelines for the person's discipline, area of professional practice, or licensure as promulgated by any applicable regulatory board or licensing authority; ()

b. Adhere to the standards and guidelines specific to post conviction sexual offender testing as promulgated by the APA; ()

c. Adhere to the ethical principles and codes, and all practice standards and guidelines for the administration of polygraph examinations generally, as promulgated by the APA or the American Association of Police Polygraphists, as referenced in Section 003 of these rules; ()

d. Avoid relationships with clients that may constitute a conflict of interest, impair professional judgment and risk exploitation; ()

e. Have no sexual relationships with any client; ()

f. Take factors such as age, mental capacity and co-occurring mental health concerns into consideration when utilizing polygraphy with juvenile offenders; ()

g. Be committed to community protection and safety; and ()

h. Provide services in a manner that ensures humane and ethical treatment of clients. ()

301. -- 329. (RESERVED)

330. INITIAL CERTIFICATION APPLICATION.

An applicant seeking certification by the Board must submit a completed application on forms provided by the Board

for the applicant’s area of practice and client population, if applicable, accompanied by documentation as outlined in the established standards issued by the Board and an initial certification application fee made payable to the Board. ()

331. EXPIRATION AND RENEWAL OF CERTIFICATION.

No certification shall be renewed, except as follows: ()

01. Renewal. At least thirty (30) days prior to the expiration of a certification, a certificate holder shall apply for renewal of the certification on forms provided by the Board for the applicant’s area of practice and client population, if applicable, accompanied by documentation as outlined in the established standards issued by the Board and a renewal certification application fee made payable to the Board. ()

02. Removal from the Roster. A certificate holder who has not renewed his certification shall be removed from the central roster. ()

03. Renewal After Certification Expiration. A certificate holder whose certification has expired may reapply at any time for certification as follows: ()

a. A certificate holder whose certification has been expired for less than three hundred sixty-five (365) days may reapply following the certification renewal process as referenced in Subsection 331.01 of these rules. ()

b. A certificate holder whose certification has been expired for three hundred sixty-five (365) days or longer may reapply for certification following the initial certification process as referenced in Section 330 of these rules. ()

332. FEES.

The following non-refundable application processing fees are established by the Board: ()

01. Initial Certification. Application processing fees for initial certification are: ()

a. Senior/Approved Psychosexual Evaluator, Treatment Provider, or Post Conviction Sexual Offender Polygraph Examiner – Seventy-five dollars (\$75). ()

b. Associate/Supervised Psychosexual Evaluator, Treatment Provide, or Post Conviction Sexual Offender Polygraph Examiner – Seventy-five dollars (\$75). ()

c. Provisional/Supervised Psychosexual Evaluator or Treatment Provider – Fifty dollars (\$50). ()

02. Renewal Certification. Application processing fees for renewal certification are: ()

a. Senior/Approved Psychosexual Evaluator, Treatment Provider, or Post Conviction Sexual Offender Polygraph Examiner – Fifty dollars (\$50). ()

b. Associate/Supervised Psychosexual Evaluator, Treatment Provider, or Post Conviction Sexual Offender Polygraph Examiner – Fifty dollars (\$50). ()

c. Provisional/Supervised Psychosexual Evaluator or Treatment Provider – Thirty dollars (\$30). ()

03. Change in Certification Level. Application processing fees for a change in certification level are as referenced in Section 155 of these rules. ()

04. Continuing Education Extension. Application processing fee for a request for an extension of time to complete continuing education requirements is twenty-five dollars (\$25). ()

333. CERTIFICATION PERIOD.

Provided that the certificate holder continues to meet the criteria for certification and such certification has not been suspended, revoked, otherwise restricted or placed on voluntary inactive status, the effective period for certification is as follows: ()

01. Senior/Approved Psychosexual Evaluator or Treatment Provider. Certification shall remain in effect for two (2) years. Certification renewal shall typically occur during the certificate holder's month of birth two (2) years following initial certification and every two (2) years thereafter. ()

02. Associate/Supervised Psychosexual Evaluator or Treatment Provider. Certification shall remain in effect for two (2) years. Certification renewal shall typically occur during the certificate holder's month of birth two (2) years following initial certification and every two (2) years thereafter. ()

03. Provisional/Supervised Psychosexual Evaluator or Treatment Provider. Certification shall remain in effect for one (1) year. Certification renewal shall typically occur during the certificate holder's month of birth one (1) year following initial certification and annually thereafter. Certification at the provisional/supervised level is limited to a period of three (3) years, at which time the certificate holder must meet minimum requirements for upgrade to the associate/supervised level to be eligible for certification renewal. ()

04. Senior/Approved Post Conviction Sexual Offender Polygraph Examiner. Certification shall remain in effect for two (2) years. Certification renewal shall typically occur during the certificate holder's month of birth two (2) years following initial certification and every two (2) years. ()

05. Associate/Supervised Post Conviction Sexual Offender Polygraph Examiner. Certification shall remain in effect for two (2) years from the certificate holder's month of birth following initial certification. Thereafter, the certificate holder must meet minimum requirements for upgrade to the senior/approved level to be eligible for certification renewal. ()

334. APPLICABILITY AND NOTIFICATION OF CHANGES.

Certification shall only apply to the person named therein and is not transferable. The Board must be notified in writing within thirty (30) days of any change in the certificate holder's name, business address or phone number. ()

335. REQUEST FOR PLACEMENT ON INACTIVE STATUS.

Any certificate holder may request placement on inactive status by submitting a written request to the SOMB specifying the reasons for the request and indicating the inactive status effective date. A certificate holder who is placed on inactive status shall be removed from the central roster of certified evaluators, treatment providers and post conviction sexual offender polygraph examiners. A person who has been placed on inactive status may reapply for certification in accordance with the established standards issued by the Board. ()

336. -- 349. (RESERVED)

350. CENTRAL ROSTER OF PSYCHOSEXUAL EVALUATORS, SEXUAL OFFENDER TREATMENT PROVIDERS AND POST CONVICTION SEXUAL OFFENDER POLYGRAPH EXAMINERS.

01. Identification. The Board shall publish a central roster of psychosexual evaluators, sexual offender treatment providers and post conviction sexual offender polygraph examiners pursuant to Sections 18-8312 through 18-8316, Idaho Code. The central roster shall indicate: ()

- a. The certificate holder's name; ()
- b. The certificate holder's business address and telephone number; ()
- c. Whether the certificate holder is certified or approved by conditional waiver; ()
- d. The category and applicable level of certification; ()

- e. The expiration date of the certification or conditional waiver; ()
 - f. Whether the certificate holder is approved to provide services to adult or juvenile clients, or both; ()
- and
- g. Current formal disciplinary action imposed on a certificate holder by the Board. ()

02. Availability. A copy of the central roster may be obtained from the Board, and shall be posted on the Board's website. ()

351. -- 379. (RESERVED)

380. DENIAL AND GROUNDS FOR DISCIPLINE.

01. Cause. The Board may deny, suspend, revoke, restrict or otherwise monitor certification of an applicant or certificate holder for the following reasons: ()

- a. Failure to meet or maintain the minimum eligibility criteria and qualifications for certification; ()
- b. Falsification of any information or documentation, or concealing a material fact in the application for certification, or during any investigation or quality assurance review; ()
- c. Misrepresentation of current level or designation of certification, or practicing outside the scope or current level or designation of certification; ()
- d. Failure to comply with Section 18-8316, Idaho Code, any portion of this chapter, or the established standards issued by the Board; ()
- e. Failure to demonstrate an understanding of counter-transference issues and a broad knowledge of sexuality in the general populations, and basic theories and typologies of sexual offenders and sexual assault victims; ()
- f. Failure or refusal to comply with the quality assurance review process or to cooperate during any investigation concerning certification, including failure or refusal to provide data, information or records as requested by the Board or designee; ()
- g. Failure to comply with any informal disciplinary measures, remedial steps, corrective action or final order issued by the Board as a condition of continued certification, including practicing on a suspended or restricted certification; ()
- h. Engaging in conduct that departs from the established standards issued by the Board; ()
- i. Revocation, suspension, limitation, reprimand, voluntary surrender or any other disciplinary action or proceeding, including investigation against a license, certificate or privilege to practice by a professional licensing board; ()
- j. Conviction of, or entry of a withheld judgment or plea of nolo contendere to conduct constituting a felony or crime of moral turpitude; or ()
- k. Failure to notify the Board in writing of any circumstances that affect a certificate holder's eligibility for certification, including any disciplinary action taken by a respective professional licensing board or conviction of any felony or crime of moral turpitude. ()

02. Mirroring Orders. If a state licensing board with authority over a certificate holder's professional license takes action against the professional license which suspends, restricts, limits, or affects the certificate holder's ability to provide services pursuant to their SOMB certification, the SOMB is authorized to issue an order

suspending, restricting, limiting, or otherwise affecting the certificate holder's SOMB certification in the same fashion as the professional licensing board's action. ()

03. Emergency Suspension. Pursuant to Section 67-5247, Idaho Code, if the Board finds that public health, safety or welfare requires immediate emergency action the Board may take such action necessary to prevent or avoid the immediate danger as outlined in the established standards issued by the Board. ()

381. REAPPLICATION FOLLOWING CERTIFICATION DENIAL OR DISCIPLINARY ACTION.

01. Denial. An applicant whose certification was denied may reapply when evidence is available confirming that he meets the required qualifications for the respective area of practice as referenced in Sections 040, 080 or 200 of these rules; ()

02. Suspension. A person whose certification has been suspended may apply for reinstatement after the suspension period has expired and following completion of any remedial steps or corrective action ordered by the Board, as outlined in the established standards issued by the Board; ()

03. Restriction. A person whose certification has been restricted or otherwise monitored may request removal of the restrictions after the restriction period has expired. If no period of restriction was established, the request may be made following completion of any remedial steps or corrective action ordered by the Board, as outlined in the established standards issued by the Board; ()

04. Revocation. A person whose certification has been revoked may request reinstatement after the revocation period has expired, as outlined in the established standards issued by the Board. The Board shall have discretion to impose any monitoring conditions upon a certificate holder whose certification has been reinstated following revocation; ()

05. Withheld Discipline and Probation. A certificate holder whose formal discipline was withheld and placed on probationary status may request reinstatement after the probationary period has expired and any conditions imposed have been met, as outlined in the established standards issued by the Board. ()

382. LEVELS OF DISCIPLINE.

The levels of disciplinary action utilized by the Board against a certificate holder may generally include formal discipline, informal discipline or withholding formal discipline and probation. ()

383. FORMAL DISCIPLINE.

Formal disciplinary action consists of suspension, revocation or other restrictions. Formal disciplinary actions restrict or otherwise impede a certificate holder's ability to perform sexual offender services consistent with their certification level. ()

384. INFORMAL DISCIPLINE.

Informal disciplinary action consists of monitoring a certificate holder or issuing letters of informal reprimand or counseling. Informal disciplinary actions do not restrict or otherwise impede a certificate holder's ability to perform sexual offender services consistent with their certification level. ()

385. WITHHOLDING FORMAL DISCIPLINE AND PROBATION.

The Board may withhold the imposition of formal discipline and place the certificate holder on a period of probation not to exceed two (2) years. The Board may impose any conditions of probation as deemed necessary to ensure compliance with the established standards issued by the Board. Such probationary conditions may include attendance at specialized training, review of the certificate holder's work product by the Board or its designee, or supervised practice by a senior level certificate holder. Failure to comply with a probationary condition imposed by the Board may result in the imposition of any suspended disciplinary action. ()

386. COMPLAINTS.

Any individual may file against a certificate holder by submitting a written complaint to the Board, as outlined in the established standards issued by the Board. ()

01. Initial Review. The Board’s designee shall conduct an initial review of any complaint or information received to determine if the Board has jurisdiction. ()

02. Investigation. The Board’s designee shall conduct an investigation upon a determination that the Board has jurisdiction and a possible violation may exist. Investigative findings shall be presented to the Board as outlined in the established standards issued by the Board. ()

387. DISCIPLINARY PROCESS.

The disciplinary process may be initiated as a result of a complaint received by the Board or a quality assurance review, or be based upon a review of information submitted to the Board during the certification process, monitoring process or while under formal probation. ()

388. -- 399. (RESERVED)

400. QUALITY ASSURANCE.

Policies for technical review and quality assurance of psychosexual evaluation reports and sexual offender treatment services and polygraph examinations are outlined in the established standards issued by the Board. ()

401. -- 449. (RESERVED)

450. PSYCHOSEXUAL EVALUATIONS.

01. Adult Psychosexual Evaluations. Pre-sentence psychosexual evaluations on adult sexual offenders shall be conducted pursuant to the established standards issued by the Board and written utilizing the “Required Format for Psychosexual Evaluation Reports,” found in the Idaho Sexual Offender Management Board Standard and Guidelines for Adult Sexual Offender Management Practices incorporated by reference in Subsection 003.03 of these rules. ()

02. Juvenile Psychosexual Evaluations. Psychosexual evaluations on juveniles adjudicated for sexual offenses shall be conducted in accordance with the established standards issued by the Board and written utilizing the “Required Format for Juvenile Psychosexual Evaluation Reports,” found in the Idaho Sexual Offender Management Board Standard and Guidelines for Practitioners, Evaluations and Treatment of Juvenile Sexual Offenders incorporated by reference in Subsection 003.04 of these rules. ()

03. Testing. The evaluator shall utilize testing instrumentation and assessment measures as outlined in the established standards issued by the Board. ()

04. Client Participation. The client being evaluated may refuse or decline to participate in any testing, assessment measure, or physiological measure used for the pre-sentence psychosexual evaluation. The evaluator shall document the client’s refusal or declination in the psychosexual evaluation report. ()

451. -- 479. (RESERVED)

480. POLYGRAPH EXAMINATIONS.

Post conviction sexual offender polygraph examinations performed pursuant to an order or requirement by the court or requested by the Idaho Department of Correction or Idaho Commission for Pardons and Parole shall be conducted by a person certified by the Board to conduct such examinations and shall follow the established standards issued by the Board. ()

481. -- 499. (RESERVED)

500. SEXUAL OFFENDER TREATMENT.

Specialized sexual offender treatment conducted pursuant to an order or requirement by the court, the Idaho Department of Correction, the Idaho Commission for Pardons and Parole or the Idaho Department of Juvenile Corrections shall be conducted by a person certified by the Board to conduct such treatment and shall follow the established standards issued by the Board. ()

501. -- 999. (RESERVED)

IDAPA 58 – DEPARTMENT OF ENVIRONMENTAL QUALITY

DOCKET NO. 58-0000-2000F

NOTICE OF OMNIBUS RULEMAKING – ADOPTION OF PENDING FEE RULES AND ADOPTION OF TEMPORARY FEE RULE

EFFECTIVE DATE: These rules have been adopted by the Idaho Board of Environmental Quality (Board) and are now pending review by the 2021 Idaho State Legislature for final approval. Pursuant to Section 67-5224(5)(c), Idaho Code, the pending fee rules will not become final and effective until they have been approved by concurrent resolution of the legislature because of the fee being imposed or increased through this rulemaking. The pending fee rules become final and effective upon adoption of the concurrent resolution or upon the date specified in the concurrent resolution unless the rule is rejected. Fee rule chapter IDAPA 58.01.13, Rules for Ore Processing by Cyanidation, has been adopted as both a pending fee rule and as a temporary fee rule with an effective date of November 6, 2020. The November 6, 2020, temporary fee rule supersedes the March 20, 2020, temporary fee rule chapter IDAPA 58.01.13 adopted under Docket No. 58-0000-2000F.

AUTHORITY: In compliance with Section 67-5224, Idaho Code, notice is hereby given that the Board has adopted pending fee rules. This action is authorized by the following Idaho Code provisions. Citations to any federal statutes that provide the basis of authority or requirement for the rulemaking are also included.

- **IDAPA 58.01.01** – Sections 39-105, 39-107, 39-114(4), 39-115(3), and 39-116B, Idaho Code; Clean Air Act, 42 U.S.C. § 7401 *et seq.*
- **IDAPA 58.01.05** – Chapters 44 and 58, Title 39, Idaho Code; Solid Waste Disposal Act, 42 U.S.C. § 6901 *et seq.*
- **IDAPA 58.01.06** – Sections 39-105, 39-107, and 39-7408C, Idaho Code; Solid Waste Disposal Act, 42 U.S.C. § 6901 *et seq.*
- **IDAPA 58.01.07** – Chapters 1 and 88, Title 39, Idaho Code; Solid Waste Disposal Act, 42 U.S.C. §§ 6991 – 6991m
- **IDAPA 58.01.08** – Chapter 1, Title 39, Idaho Code; Chapter 21, Title 37, Idaho Code; Safe Drinking Water Act, 42 U.S.C. § 300f *et seq.*
- **IDAPA 58.01.09** – Sections 39-104A, 39-105, and 39-107, Idaho Code
- **IDAPA 58.01.11** – Sections 39-105, 39-107, 39-120, and 39-126, Idaho Code
- **IDAPA 58.01.12** – Chapters 1 and 36, Title 39, Idaho Code; Clean Water Act, 33 U.S.C. § 1251 *et seq.*
- **IDAPA 58.01.13** – Chapter 1, Title 39, Idaho Code
- **IDAPA 58.01.14** – Sections 39-105, 39-107, and 39-119, Idaho Code
- **IDAPA 58.01.18** – Sections 39-105, 39-107, 39-4405, and 39-7210, Idaho Code
- **IDAPA 58.01.25** – Chapter 1, Title 39, Idaho Code; Clean Water Act, 33 U.S.C. §§ 1342 and 1345

DESCRIPTIVE SUMMARY: In February 2020, the Board adopted as temporary fee rules the IDAPA 58 rule chapters as they were presented in the pending rule dockets adopted by the Board in 2019 and submitted to the Second Regular Session of the 65th Idaho Legislature for review. These temporary fee rules were effective March 20, 2020. The 2019 pending rule dockets are posted in the [2020 Legislative Review Books](#).

In September 2020, DEQ published the temporary rules, along with revisions to several of the rule chapters, as proposed rules inviting the public to submit comments. September 16, 2020, Idaho Administrative Bulletin, [Vol. 20-9SE, pages 2321-2909](#). After consideration of public comments, and in accordance with Section 67-5227, Idaho Code, IDAPA 58.01.13, Sections 007, 200, and 203 have been revised. The remaining rules have been adopted as initially proposed. All rule chapters in the rule docket have been adopted as pending fee rules. IDAPA 58.01.13, Rules for Ore Processing by Cyanidation, has been adopted as both a pending fee rule and a temporary fee rule with an effective date of November 6, 2020, and supersedes the March 20, 2020, temporary fee rule chapter IDAPA 58.01.13 adopted under Docket No. 58-0000-2000F. The board meeting documents can be obtained at deq.idaho.gov/58-0000-2000F or by contacting the undersigned.

TEMPORARY RULE JUSTIFICATION: Pursuant to Section 67-5226, Idaho Code, the Governor has found that temporary adoption of the rule is appropriate for the following reasons:

A temporary rule will bridge any gap between a pending rule being adopted by the Board in November 2020, and the approval of the pending rule by the Legislature upon the adjournment of the 2021 legislative session. In this

regard, the temporary rule will ‘confer a benefit’ to companies in a position to submit a cyanidation permit application under the revised Rules for Ore Processing by Cyanidation in the interim period prior to the end of the 2021 legislative session. The existing Rules, which were approved during the 2006 legislative session by concurrent resolution, include a fee structure and option for entering into an agreement with the Department for reimbursement of actual costs incurred. The proposed Rules eliminated the fee structure but retain that the applicant enter into an agreement with the Department for reimbursement of actual costs incurred. Therefore, there is no new fee that requires justification of its imposition. This fee is specifically authorized by the legislature in Idaho Code Section 39-118A(2)(c).

FEE SUMMARY: This rulemaking does not impose a fee or charge, or increase a fee or charge, beyond what was previously submitted to and reviewed by the Idaho Legislature in the prior rules. A description of each fee category is provided below.

Listed below are the DEQ fee rule chapters, fee categories, and the statutory authority for imposition of the fees.

IDAPA 58.01.01, Rules for the Control of Air Pollution in Idaho - crop residue burn fee, Idaho Code § 39-114(4); application fee for industrial or commercial air pollution source permits, Idaho Code § 39-115(3); motor vehicle inspection fee, Idaho Code § 39-116B

IDAPA 58.01.05, Rules and Standards for Hazardous Waste - hazardous waste siting license fee, Idaho Code § 39-5813(3)

IDAPA 58.01.06, Solid Waste Management Rules - commercial solid waste siting license fee, Idaho Code § 39-7408(C)

IDAPA 58.01.07, Rules Regulating Underground Storage Tank Systems – annual UST program fee, Idaho Code §§ 39-119, 39-8802(d)

IDAPA 58.01.08, Idaho Rules for Public Drinking Water Systems – annual drinking water system fee, Idaho Code § 39-119

IDAPA 58.01.09, Rules Regulating Swine Facilities - permit application fee, Idaho Code § 39-119

IDAPA 58.01.11, Ground Water Quality Rule - point of compliance application fee, Idaho Code § 39-119

IDAPA 58.01.12, Rules for Administration of Water Pollution Control Loans – loan fee to offset costs of administering loan program, Idaho Code §§ 39-119, 39-3627(4)

IDAPA 58.01.13, Rules for Ore Processing by Cyanidation – fee for processing permit applications, Idaho Code § 39-118A(2)(c)

Fee Summary - Revisions in IDAPA 58.01.13 Negotiated Under Docket No. 58-0113-1901:

The existing rule requires applicants to submit a fee ranging from \$5,000 for a pilot facility not processing more than 10,000 tons of ore to \$20,000 for a facility processing more than 120,000 tons of ore during the life of the facility. The existing rule also includes the option for the applicant to enter into an agreement with the Department for reimbursement of actual costs incurred to process an application and issue a final permit in lieu of paying a fee. This pending/temporary rule eliminates the fee structure but retains that the applicant enter into an agreement with the Department for reimbursement of actual costs incurred to process an application and issue a final permit. Section 39-118A(2)(c), Idaho Code, authorizes the Director of DEQ to require a reasonable fee for processing permit applications.

IDAPA 58.01.14, Rules Governing Fees for Environmental Operating Permits, Licenses, and Inspection Services – fees for environmental operating permits, licenses, inspection services and waiver application processing, Idaho Code § 39-119

IDAPA 58.01.18, Idaho Land Remediation Rules – voluntary remediation program application fee, Idaho Code § 39-7210(5)

IDAPA 58.01.25, Rules Regulating the Idaho Pollutant Discharge Elimination System Program – application fee and/or annual fee, Idaho Code § 39-175C

FISCAL IMPACT: The following is a specific description, if applicable, of any negative fiscal impact on the state general fund greater than ten thousand dollars (\$10,000) during the fiscal year:

This rulemaking is not anticipated to have any fiscal impact on the state general fund because the FY2021 budget has already been set by the Legislature, and approved by the Governor, anticipating the existence of the rules and fees being reauthorized by this rulemaking.

Fiscal Impact - Revisions in IDAPA 58.01.13 Negotiated Under Docket No. 58-0113-1901:

Section 39-118A(2)(c), Idaho Code, authorizes the Director of DEQ to require a reasonable fee for processing permit applications. The rule includes a fee for processing a permit application but does not include any fees following issuance of the permit. As facilities are permitted, there will be an impact to the state general fund for administration of a cyanidation permit program; however, it would vary based on the number and size of permitted facilities operating in Idaho. The estimated average annual general fund impact is \$6,000 per permitted facility.

ASSISTANCE ON TECHNICAL QUESTIONS: For assistance on questions concerning the rulemaking, contact the undersigned.

Dated this 5th day of November, 2020.

Paula J. Wilson
Hearing Coordinator
Department of Environmental Quality

paula.wilson@deq.idaho.gov

This rule has been adopted as a pending rule by the Agency and is now awaiting review and final approval by the 2021 Idaho State Legislature.

Additionally, this rule has been adopted as temporary for IDAPA 58.01.13 only, and is effective November 6, 2020.

Pursuant to Section 67-5226, Idaho Code, the full text of the temporary rule is being published in this Bulletin.

(The pending rule in this Bulletin following this notice, is being printed in its entirety, and includes changes from the original proposed text.)

IDAPA 58 – DEPARTMENT OF ENVIRONMENTAL QUALITY

58.01.01 – RULES FOR THE CONTROL OF AIR POLLUTION IN IDAHO

000. LEGAL AUTHORITY.

The Board of Environmental Quality is authorized to promulgate rules for the Department of Environmental Quality governing air pollution pursuant to Sections 39-105 and 39-107, Idaho Code. ()

001. TITLE AND SCOPE.

These rules are titled IDAPA 58.01.01, Rules of the Department of Environmental Quality, IDAPA 58.01.01, “Rules for the Control of Air Pollution in Idaho.” These rules provide for the control of air pollution in Idaho. ()

002. WRITTEN INTERPRETATIONS.

The Department of Environmental Quality has written statements which pertain to the interpretation of the rules of this chapter, or to the documentation of compliance with the rules of this chapter. The written statements are available for public inspection and copying at cost at the Department of Environmental Quality, 1410 N. Hilton, Boise, Idaho 83706-1255 at (208) 373-0502. ()

003. ADMINISTRATIVE APPEALS.

Persons may be entitled to appeal agency actions authorized under this chapter pursuant to IDAPA 58.01.23, “Rules of Administrative Procedure Before the Board of Environmental Quality.” ()

004. (RESERVED)

005. DEFINITIONS.

The purpose of Sections 005 through 008 is to assemble definitions used throughout this chapter. ()

006. GENERAL DEFINITIONS.

01. Accountable. Any SIP emission trading program must account for the aggregate effect of the emissions trades in the demonstration of reasonable further progress, attainment, or maintenance. ()

02. Act. The Environmental Protection and Health Act of 1972 as amended (Sections 39-101 through 39-130, Idaho Code). ()

03. Actual Emissions. The actual rate of emissions of a pollutant from an emissions unit as determined in accordance with the following: ()

a. In general, actual emissions as of a particular date shall equal the average rate, in tons per year, at which the unit actually emitted the pollutant during a two-year period which precedes the particular date and which is representative of normal source operation. The Department shall allow the use of a different time period upon a determination that it is more representative of normal source operation. Actual emissions shall be calculated using the unit’s actual operating hours, production rates, and types of materials processed, stored, or combusted during the selected time period. ()

b. The Department may presume that the source-specific allowable emissions for the unit are equivalent to actual emissions of the unit. ()

c. For any emissions unit (other than an electric utility steam generating unit as specified below) which has not yet begun normal operations on the particular date, actual emissions shall equal the potential to emit of the unit on that date. ()

d. For an electric utility steam generating unit (other than a new unit or the replacement of an existing unit) actual emissions of the unit following the physical or operational change shall equal the representative actual annual emissions of the unit, provided the source owner or operator maintains and submits to the Department, on an annual basis for a period of five (5) years from the date the unit resumes regular operation, information demonstrating that the physical or operational change did not result in an emissions increase. A longer period, not to exceed ten (10) years may be required by the Department if it determines such a period to be more representative of normal source post-change operations. ()

04. Adverse Impact on Visibility. Visibility impairment which interferes with the management, ()

protection, preservation, or enjoyment of the visitor's visual experience of the Federal Class I Area. This determination must be made on a case-by-case basis taking into account the geographic extent, intensity, duration, frequency, and time of visibility impairments, and how these factors correlate with: ()

- a. Times of visitor use of the Federal Class I Area; and ()
- b. The frequency and timing of natural conditions that reduce visibility. ()
- c. This term does not include affects on integral vistas when applied to 40 CFR 51.307. ()

05. Air Pollutant/Air Contaminant. Any substance, including but not limited to, dust, fume, gas, mist, odor, smoke, vapor, pollen, soot, carbon or particulate matter or any combination thereof. ()

06. Air Pollution. The presence in the outdoor atmosphere of any air pollutant or combination thereof in such quantity of such nature and duration and under such conditions as would be injurious to human health or welfare, to animal or plant life, or to property, or to interfere unreasonably with the enjoyment of life or property. ()

07. Air Quality. The specific measurement in the ambient air of a particular air pollutant at any given time. ()

08. Air Quality Criterion. The information used as guidelines for decisions when establishing air quality goals and air quality standards. ()

09. Allowable Emissions. The allowable emissions rate of a stationary source or facility calculated using the maximum rated capacity of the source or facility (unless the source or facility is subject to federally enforceable limits which restrict the operating rate, or hours of operation, or both) and the most stringent of the following: ()

- a. The applicable standards set forth in 40 CFR part 60 and 61; ()
- b. Any applicable State Implementation Plan emissions limitation including those with a future compliance date; or ()
- c. The emissions rate specified as a federally enforceable permit condition, including those with a future compliance date. ()

10. Ambient Air. That portion of the atmosphere, external to buildings, to which the general public has access. ()

11. Ambient Air Quality Violation. Any ambient concentration that causes or contributes to an exceedance of a national ambient air quality standard as determined by 40 CFR Part 50. ()

12. Atmospheric Stagnation Advisory. An air pollution alert declared by the Department when air pollutant impacts have been observed and/or meteorological conditions are conducive to additional air pollutant buildup. ()

13. Attainment Area. Any area which is designated, pursuant to 42 U.S.C. Section 7407(d), as having ambient concentrations equal to or less than national primary or secondary ambient air quality standards for a particular air pollutant or air pollutants. ()

14. BART-Eligible Source. Any of the following stationary sources of air pollutants, including any reconstructed source, which was not in operation prior to August 7, 1962, and was in existence on August 7, 1977, and has the potential to emit two hundred fifty (250) tons per year or more of any air pollutant. In determining potential to emit, fugitive emissions, to the extent quantifiable, must be counted. ()

- a. Fossil-fuel fired steam electric plants of more than two hundred fifty (250) million BTU's per hour

- heat input; ()
- b. Coal cleaning plants (thermal dryers); ()
 - c. Kraft pulp mills; ()
 - d. Portland cement plants; ()
 - e. Primary zinc smelters; ()
 - f. Iron and steel mill plants; ()
 - g. Primary aluminum ore reduction plants; ()
 - h. Primary copper smelters; ()
 - i. Municipal incinerators capable of charging more than two hundred fifty (250) tons of refuse per day; ()
 - j. Hydrofluoric, sulfuric, and nitric acid plants; ()
 - k. Petroleum refineries; ()
 - l. Lime plants; ()
 - m. Phosphate rock processing plants; ()
 - n. Coke oven batteries; ()
 - o. Sulfur recovery plants; ()
 - p. Carbon black plants (furnace process); ()
 - q. Primary lead smelters; ()
 - r. Fuel conversion plants; ()
 - s. Sintering plants; ()
 - t. Secondary metal production facilities; ()
 - u. Chemical process plants; ()
 - v. Fossil-fuel boilers of more than two hundred fifty (250) million BTU's per hour heat input; ()
 - w. Petroleum storage and transfer facilities with a capacity exceeding three hundred thousand (300,000) barrels; ()
 - x. Taconite ore processing facilities; ()
 - y. Glass fiber processing plants; and ()
 - z. Charcoal production facilities. ()
- 15. Baseline (Area, Concentration, Date).** See Section 579. ()

16. **Best Available Retrofit Technology (BART).** Means an emission limitation based on the degree of reduction achievable through the application of the best system of continuous emission reduction for each pollutant which is emitted by an existing stationary facility. The emission limitation must be established, on a case-by-case basis, taking into consideration the technology available, the costs of compliance, the energy and non-air quality environmental impacts of compliance, any pollution control equipment in use or in existence at the source, the remaining useful life of the source, and the degree of improvement in visibility which may reasonably be anticipated to result from the use of such technology. ()
17. **Board.** Idaho Board of Environmental Quality. ()
18. **Breakdown.** An unplanned failure of any equipment or emissions unit which may cause excess emissions. ()
19. **BTU.** British thermal unit. ()
20. **Clean Air Act.** The federal Clean Air Act, 42 U.S.C. Sections 7401 through 7671q. ()
21. **Collection Efficiency.** The overall performance of the air cleaning device in terms of ratio of materials collected to total input to the collector unless specific size fractions of the contaminant are stated or required. ()
22. **Commence Construction or Modification.** In general, this means initiation of physical on-site construction activities on an emissions unit which are of a permanent nature. Such activities include, but are not limited to, installation of building supports and foundations, laying of underground pipework, and construction of permanent storage structures. With respect to a change in method of operation, this term refers to those on-site activities, other than preparatory activities, which mark the initiation of the change. ()
23. **Complete.** A determination made by the Department that all information needed to process a permit application has been submitted for review. ()
24. **Construction.** Fabrication, erection, installation, or modification of a stationary source or facility. ()
25. **Control Equipment.** Any method, process or equipment which removes, reduces or renders less noxious, air pollutants discharged into the atmosphere. ()
26. **Controlled Emission.** An emission which has been treated by control equipment to remove all or part of an air pollutant before release to the atmosphere. ()
27. **Criteria Air Pollutant.** Any of the following: PM₁₀; PM_{2.5}; sulfur oxides; ozone, nitrogen dioxide; carbon monoxide; lead. ()
28. **Deciview.** A measurement of visibility impairment. A deciview is a haze index derived from calculated light extinction, such that uniform changes in haziness correspond to uniform incremental changes in perception across the entire range of conditions, from pristine to highly impaired. The deciview haze index is calculated based on the following equation (for the purposes of calculating deciview, the atmospheric light extinction coefficient must be calculated from aerosol measurements): Deciview Haze Index = $10 \ln_e (b_{\text{ext}}/10\text{Mm}^{-1})$ where b_{ext} = the atmospheric light extinction coefficient, expressed in inverse megameters (Mm^{-1}). ()
29. **Department.** The Department of Environmental Quality. ()
30. **Designated Facility.** Any of the following facilities: ()
- a. Fossil-fuel fired steam electric plants of more than two hundred fifty (250) million BTU's per hour heat input; ()
- b. Coal cleaning plants (thermal dryers); ()

- c. Kraft pulp mills; ()
- d. Portland cement plants; ()
- e. Primary zinc smelters; ()
- f. Iron and steel mill plants; ()
- g. Primary aluminum ore reduction plants; ()
- h. Primary copper smelters; ()
- i. Municipal incinerators capable of charging more than two hundred and fifty (250) tons of refuse per day; ()
- j. Hydrofluoric, sulfuric, and nitric acid plants; ()
- k. Petroleum refineries; ()
- l. Lime plants; ()
- m. Phosphate rock processing plants; ()
- n. Coke oven batteries; ()
- o. Sulfur recovery plants; ()
- p. Carbon black plants (furnace process); ()
- q. Primary lead smelters; ()
- r. Fuel conversion plants; ()
- s. Sintering plants; ()
- t. Secondary metal production facilities; ()
- u. Chemical process plants; ()
- v. Fossil-fuel boilers (or combination thereof) of more than two hundred and fifty (250) million BTU's per hour heat input; ()
- w. Petroleum storage and transfer facilities with a capacity exceeding three hundred thousand (300,000) barrels; ()
- x. Taconite ore processing facilities; ()
- y. Glass fiber processing plants; and ()
- z. Charcoal production facilities. ()
- 31. **Director.** The Director of the Department of Environmental Quality or his designee. ()
- 32. **Effective Dose Equivalent.** The sum of the products of absorbed dose and appropriate factors to account for differences in biological effectiveness due to the quality of radiation and its distribution in the body of reference man. The unit of the effective dose equivalent is the rem. It is generally calculated as an annual dose. ()
- 33. **Emission.** Any controlled or uncontrolled release or discharge into the outdoor atmosphere of any

air pollutants or combination thereof. Emission also includes any release or discharge of any air pollutant from a stack, vent, or other means into the outdoor atmosphere that originates from an emission unit. ()

34. Emission Standard. A permit or regulatory requirement established by the Department or EPA which limits the quantity, rate, or concentration of emissions of air pollutants on a continuous basis, including any requirements which limit the level of opacity, prescribe equipment, set fuel specifications, or prescribe operation or maintenance procedures for a source to assure continuous emission reduction. ()

35. Emissions Unit. An identifiable piece of process equipment or other part of a facility which emits or may emit any air pollutant. This definition does not alter or affect the term "unit" for the purposes of 42 U.S.C. Sections 7651 through 7651o. ()

36. EPA. The United States Environmental Protection Agency and its Administrator or designee. ()

37. Environmental Remediation Source. A stationary source that functions to remediate or recover any release, spill, leak, discharge or disposal of any petroleum product or petroleum substance, any hazardous waste or hazardous substance from any soil, ground water or surface water, and shall have an operational life no greater than five (5) years from the inception of any operations to the cessation of actual operations. Nothing in this definition shall be construed so as to actually limit remediation projects to five (5) years or less of total operation. ()

38. Excess Emissions. Emissions that exceed an applicable emissions standard established for any facility, source or emissions unit by statute, regulation, rule, permit, or order. ()

39. Existing Stationary Source or Facility. Any stationary source or facility that exists, is installed, or is under construction on the original effective date of any applicable provision of this chapter. ()

40. Facility. All of the pollutant-emitting activities which belong to the same industrial grouping, are located on one (1) or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control). Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same Major Group (i.e. which have the same two-digit code) as described in the Standard Industrial Classification Manual. The fugitive emissions shall not be considered in determining whether a permit is required unless required by federal law. ()

41. Federal Class I Area. Any federal land that is classified or reclassified "Class I." ()

42. Federal Land Manager. The Secretary of the department with authority over the Federal Class I Area (or the Secretary's designee). ()

43. Federally Enforceable. All limitations and conditions which are enforceable by EPA and the Department under the Clean Air Act, including those requirements developed pursuant to 40 CFR Parts 60 and 61 requirements within any applicable State Implementation Plan, and any permit requirements established pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR Parts 51, 52, 60, or 63. ()

44. Fire Hazard. The presence or accumulation of combustible material of such nature and in sufficient quantity that its continued existence constitutes an imminent and substantial danger to life, property, public welfare or adjacent lands. ()

45. Fuel-Burning Equipment. Any furnace, boiler, apparatus, stack and all appurtenances thereto, used in the process of burning fuel for the primary purpose of producing heat or power by indirect heat transfer. ()

46. Fugitive Dust. Fugitive emissions composed of particulate matter. ()

47. Fugitive Emissions. Those emissions which could not reasonably pass through a stack, chimney, vent, or other functionally equivalent opening. ()

48. Garbage. Any waste consisting of putrescible animal and vegetable materials resulting from the handling, preparation, cooking and consumption of food including, but not limited to, waste materials from households, markets, storage facilities, handling and sale of produce and other food products. ()

49. Gasoline. Any mixture of volatile hydrocarbons suitable as a fuel for the propulsion of motor vehicles or motor boats. Gasoline also means aircraft engine fuels when used for the operation or propulsion of motor vehicles or motor boats and includes gasohol, but does not include special fuels. ()

50. Gasoline Cargo Tank. Any tank or trailer used for the transport of gasoline from sources of supply to underground gasoline storage tanks. ()

51. Gasoline Dispensing Facility (GDF). Any facility with underground gasoline storage tanks used for dispensing gasoline. ()

52. Grain Elevator. Any plant or installation at which grain is unloaded, handled, cleaned, dried, stored, or loaded. ()

53. Grain Storage Elevator. Any grain elevator located at any wheat flour mill, wet corn mill, dry corn mill (human consumption), rice mill, or soybean extraction plant which has a permanent grain storage capacity of thirty five thousand two hundred (35,200) cubic meters (ca. 1 million bushels). ()

54. Grain Terminal Elevator. Any grain elevator which has a permanent storage capacity of more than eighty-eight thousand one hundred (88,100) cubic meters (ca. 2.5 million bushels), except those located at animal food manufacturers, pet food manufacturers, cereal manufacturers, breweries, and livestock feedlots. ()

55. Hazardous Air Pollutant (HAP). Any air pollutant listed pursuant to Section 112(b) of the Clean Air Act. Hazardous Air Pollutants are regulated air pollutants. ()

56. Hazardous Waste. Any waste or combination of wastes of a solid, liquid, semisolid, or contained gaseous form which, because of its quantity, concentration or characteristics (physical, chemical or biological) may: ()

a. Cause or significantly contribute to an increase in deaths or an increase in serious, irreversible, or incapacitating reversible illnesses; or ()

b. Pose a substantial threat to human health or to the environment if improperly treated, stored, disposed of, or managed. Such wastes include, but are not limited to, materials which are toxic, corrosive, ignitable, or reactive, or materials which may have mutagenic, teratogenic, or carcinogenic properties; provided that such wastes do not include solid or dissolved material in domestic sewage, or solid or dissolved materials in irrigation return flows or industrial discharges which are allowed under a national pollution discharge elimination system permit, or source, special nuclear, or by-product material as defined by 42 U.S.C. Sections 2014(e),(z) or (aa). ()

57. Hot-Mix Asphalt Plant. Those facilities conveying proportioned quantities or batch loading of cold aggregate to a drier, and heating, drying, screening, classifying, measuring and mixing the aggregate and asphalt for the purpose of paving, construction, industrial, residential or commercial use. ()

58. Incinerator. Any source consisting of a furnace and all appurtenances thereto designed for the destruction of refuse by burning. "Open Burning" is not considered incineration. For purposes of these rules, the destruction of any combustible liquid or gaseous material by burning in a flare stack shall be considered incineration. ()

59. Indian Governing Body. The governing body of any tribe, band, or group of Indians subject to the jurisdiction of the United States and recognized by the United States as possessing power of self-government. ()

60. Integral Vista. A view perceived from within the mandatory Class I Federal Area of a specific landmark or panorama located outside the boundary of the mandatory Class I Federal Area. ()

61. Kraft Pulping. Any pulping process which uses, for a cooking liquor, an alkaline sulfide solution containing sodium hydroxide and sodium sulfide. ()

62. Least Impaired Days. The average visibility impairment (measured in deciviews) for the twenty percent (20%) of monitored days in a calendar year with the lowest amount of visibility impairment. ()

63. Lowest Achievable Emission Rate (LAER). For any source, the more stringent rate of emissions based on the following: ()

a. The most stringent emissions limitation which is contained in any State Implementation Plan for such class or category of facility, unless the owner or operator of the proposed facility demonstrates that such limitations are not achievable; or ()

b. The most stringent emissions limitation which is achieved in practice by such class or category of facilities. This limitation, when applied to a modification, means the lowest achievable emissions rate for the new or modified emissions units within the facility. In no event shall the application of the term permit a proposed new or modified facility to emit any pollutant in excess of the amount allowable under an applicable new source standard of performance. ()

64. Mandatory Class I Federal Area. Any area identified in 40 CFR 81.400 through 81.437. ()

65. Member of the Public. For purposes of Subsection 006.108.a.xvi., a person located at any off-site point where there is a residence, school, business or office. ()

66. Mercury. Total mercury including elemental mercury and mercury compounds. ()

67. Mercury Best Available Control Technology (MBACT). An emission standard for mercury based on the maximum degree of reduction practically achievable as specified by the Department on an individual case-by-case basis taking into account energy, economic and environmental impacts, and other relevant impacts specific to the source. A Department approved MBACT shall be valid until the source subject to the MBACT is modified. If the proposed modification to the source subject to MBACT occurs within ten (10) years of the MBACT determination, a new MBACT review shall not be triggered as long as the source can meet the existing MBACT requirements. If the proposed modification occurs more than ten (10) years after the MBACT determination, then the proposed modification shall be subject to a new MBACT review. ()

68. Modification. ()

a. Any physical change in, or change in the method of operation of, a stationary source or facility which results in an emission increase as defined in Section 007 or which results in the emission of any regulated air pollutant not previously emitted. ()

b. Any physical change in, or change in the method of operation of, a stationary source or facility which results in an increase in the emissions rate of any state only toxic air pollutant, or emissions of any state only toxic air pollutant not previously emitted. ()

c. Fugitive emissions shall not be considered in determining whether a permit is required for a modification unless required by federal law. ()

d. For purposes of this definition of modification, routine maintenance, repair and replacement shall not be considered physical changes and the following shall not be considered a change in the method of operation: ()

i. An increase in the production rate if such increase does not exceed the operating design capacity of the affected stationary source, and if a more restrictive production rate is not specified in a permit; ()

ii. An increase in hours of operation if more restrictive hours of operation are not specified in a permit; and ()

iii. Use of an alternative fuel or raw material if the stationary source is specifically designed to accommodate such fuel or raw material before January 6, 1975 and use of such fuel or raw material is not specifically prohibited in a permit. ()

69. Monitoring. Sampling and analysis, in a continuous or noncontinuous sequence, using techniques which will adequately measure emission levels and/or ambient air concentrations of air pollutants. ()

70. Most Impaired Days. The average visibility impairment (measured in deciviews) for the twenty percent (20%) of monitored days in a calendar year with the highest amount of visibility impairment. ()

71. Multiple Chamber Incinerator. Any article, machine, equipment, contrivance, structure or part of a structure used to dispose of combustible refuse by burning, consisting of three (3) or more refractory lined combustion furnaces in series physically separated by refractory walls, interconnected by gas passage ports or ducts and employing adequate parameters necessary for maximum combustion of the material to be burned. ()

72. Natural Conditions. Includes naturally occurring phenomena that reduce visibility as measured in terms of light extinction, visual range, contrast, or coloration. ()

73. New Stationary Source or Facility. ()

a. Any stationary source or facility, the construction or modification of which is commenced after the original effective date of any applicable provision of this chapter; or ()

b. The restart of a nonoperating facility shall be considered a new stationary source or facility if: ()

i. The restart involves a modification to the facility; or ()

ii. After the facility has been in a nonoperating status for a period of two (2) years, and the Department receives an application for a Permit to Construct in the area affected by the existing nonoperating facility, the Department will, within five (5) working days of receipt of the application notify the nonoperating facility of receipt of the application for a Permit to Construct. Upon receipt of this Departmental notification, the nonoperating facility will comply with the following restart schedule or be considered a new stationary source or facility when it does restart: Within thirty (30) working days after receipt of the Department's notification of the application for a Permit to Construct, the nonoperating facility shall provide the Department with a schedule detailing the restart of the facility. The restart must begin within sixty (60) days of the date the Department receives the restart schedule. ()

74. Nonattainment Area. Any area which is designated, pursuant to 42 U.S.C. Section 7407(d), as not meeting (or contributes to ambient air quality in a nearby area that does not meet) the national primary or secondary ambient air quality standard for the pollutant. ()

75. Noncondensibles. Gases and vapors from processes that are not condensed at standard temperature and pressure unless otherwise specified. ()

76. Odor. The sensation resulting from stimulation of the human sense of smell. ()

77. Opacity. A state which renders material partially or wholly impervious to rays of light and causes obstruction of an observer's view, expressed as percent. ()

78. Open Burning. The burning of any matter in such a manner that the products of combustion resulting from the burning are emitted directly into the ambient air without passing through a stack, duct or chimney. ()

79. **Operating Permit.** A permit issued by the Director pursuant to Sections 300 through 386 and/or 400 through 461. ()
80. **Particulate Matter.** Any material, except water in uncombined form, that exists as a liquid or a solid at standard conditions. ()
81. **Particulate Matter Emissions.** All particulate matter emitted to the ambient air as measured by an applicable reference method, or any equivalent or alternative method in accordance with Section 157. ()
82. **Permit to Construct.** A permit issued by the Director pursuant to Sections 200 through 228. ()
83. **Person.** Any individual, association, corporation, firm, partnership or any federal, state or local governmental entity. ()
84. **PM₁₀.** All particulate matter in the ambient air with an aerodynamic diameter less than or equal to a nominal ten (10) micrometers as measured by a reference method based on Appendix J of 40 CFR Part 50 and designated in accordance with 40 CFR Part 53 or by an equivalent method designated in accordance with 40 CFR Part 53. ()
85. **PM₁₀ Emissions.** All particulate matter, including condensible particulates, with an aerodynamic diameter less than or equal to a nominal ten (10) micrometers emitted to the ambient air as measured by an applicable reference method, or an equivalent or alternative method in accordance with Section 157. ()
86. **PM_{2.5}.** All particulate matter in the ambient air with an aerodynamic diameter less than or equal to a nominal two point five (2.5) micrometers measured by a reference method based on Appendix L of 40 CFR Part 50 and designated in accordance with 40 CFR Part 53 or by an equivalent method designated in accordance with 40 CFR Part 53. ()
87. **PM_{2.5} Emissions.** All particulate matter, including condensible particulates, with an aerodynamic diameter less than or equal to a nominal two point five (2.5) micrometers emitted to the ambient air as measured by an applicable reference method, or an equivalent or alternative method in accordance with Section 157. ()
88. **Potential to Emit/Potential Emissions.** The maximum capacity of a facility or stationary source to emit an air pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the facility or source to emit an air pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored or processed, shall be treated as part of its design if the limitation or the effect it would have on emissions is state or federally enforceable. Secondary emissions do not count in determining the potential to emit of a facility or stationary source. ()
89. **Portable Equipment.** Equipment which is designed to be dismantled and transported from one (1) job site to another job site. ()
90. **PPM (parts per million).** Parts of a gaseous contaminant per million parts of gas by volume. ()
91. **Prescribed Fire Management Burning.** The controlled application of fire to wildland fuels in either their natural or modified state under such conditions of weather, fuel moisture, soil moisture, etc., as will allow the fire to be confined to a predetermined area and at the same time produce the intensity of heat and rate of spread required to accomplish planned objectives, including: ()
- a. Fire hazard reduction; ()
 - b. The control of pests, insects, or diseases; ()
 - c. The promotion of range forage improvements; ()

- d. The perpetuation of natural ecosystems; ()
- e. The disposal of woody debris resulting from a logging operation, the clearing of rights of way, a land clearing operation, or a driftwood collection system; ()
- f. The preparation of planting and seeding sites for forest regeneration; and ()
- g. Other accepted natural resource management purposes. ()
- 92. Primary Ambient Air Quality Standard.** That ambient air quality which, allowing an adequate margin of safety, is requisite to protect the public health. ()
- 93. Process or Process Equipment.** Any equipment, device or contrivance for changing any materials whatever or for storage or handling of any materials, and all appurtenances thereto, including ducts, stack, etc., the use of which may cause any discharge of an air pollutant into the ambient air but not including that equipment specifically defined as fuel-burning equipment or refuse-burning equipment. ()
- 94. Process Weight.** The total weight of all materials introduced into any source operation which may cause any emissions of particulate matter. Process weight includes solid fuels charged, but does not include liquid and gaseous fuels charged or combustion air. Water which occurs naturally in the feed material shall be considered part of the process weight. ()
- 95. Process Weight Rate.** The rate established as follows: ()
- a. For continuous or long-run steady-state source operations, the total process weight for the entire period of continuous operation or for a typical portion thereof, divided by the number of hours of such period or portion thereof; ()
- b. For cyclical or batch source operations, the total process weight for a period that covers a complete cycle of operation or an integral number of cycles, divided by the hours of actual process operation during such a period. Where the nature of any process or operation or the design of any equipment is such as to permit more than one (1) interpretation of this definition, the interpretation that results in the minimum value for allowable emission shall apply. ()
- 96. Quantifiable.** The Department must be able to determine the emissions impact of any SIP trading programs requirement(s) or emission limit(s). ()
- 97. Radionuclide.** A type of atom which spontaneously undergoes radioactive decay. ()
- 98. Regional Haze.** Visibility impairment that is caused by the emission of air pollutants from numerous sources located over a wide geographic area. Such sources include, but are not limited to, major and minor stationary sources, mobile sources, and area sources. ()
- 99. Regulated Air Pollutant.** ()
- a. For purposes of determining applicability of major source permit to operate requirements, issuing, and modifying permits pursuant to Sections 300 through 397, and in accordance with Title V of the federal Clean Air Act amendments of 1990, 42 U.S.C. Section 7661 et seq., "regulated air pollutant" shall have the same meaning as in Title V of the federal Clean Air Act amendments of 1990, and any applicable federal regulations promulgated pursuant to Title V of the federal Clean Air Act amendments of 1990, 40 CFR Part 70; ()
- b. For purposes of determining applicability of any other operating permit requirements, issuing, and modifying permits pursuant to Sections 400 through 410, the federal definition of "regulated air pollutant" as defined in Subsection 006.99.a. shall also apply; ()
- c. For purposes of determining applicability of permit to construct requirements, issuing, and

modifying permits pursuant to Sections 200 through 228, except Section 214, and in accordance with Part D of Subchapter I of the federal Clean Air Act, 42 U.S.C. Section 7501 et seq., “regulated air pollutant” shall mean those air contaminants that are regulated in non-attainment areas pursuant to Part D of Subchapter I of the federal Clean Air Act and applicable federal regulations promulgated pursuant to Part D of Subchapter I of the federal Clean Air Act, 40 CFR 51.165; and ()

d. For purposes of determining applicability of any other major or minor permit to construct requirements, issuing, and modifying permits pursuant to 200 through 228, except Section 214, “regulated air pollutant” shall mean those air contaminants that are regulated in attainment and unclassifiable areas pursuant to Part C of Subchapter I of the federal Clean Air Act, 40 CFR 52.21, and any applicable federal regulations promulgated pursuant to Part C of Subchapter I of the federal Clean Air Act, 42 U.S.C. Section 7470 et seq. ()

100. Replicable. Any SIP procedures for applying emission trading shall be structured so that two (2) independent entities would obtain the same result when determining compliance with the emission trading provisions. ()

101. Responsible Official. One (1) of the following: ()

a. For a corporation: a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or a duly authorized representative of such person if the representative is responsible for the overall operation of one (1) or more manufacturing, production, or operating facilities applying for or subject to a permit and either: ()

i. The facilities employ more than two hundred fifty (250) persons or have gross annual sales or expenditures exceeding twenty-five million dollars (\$25,000,000) (in second quarter 1980 dollars); or ()

ii. The delegation of authority to such representative is approved in advance by the Department. ()

b. For a partnership or sole proprietorship: a general partner or the proprietor, respectively. ()

c. For a municipality, State, Federal, or other public agency: either a principal executive officer or ranking elected official. For the purposes of Section 123, a principal executive officer of a Federal agency includes the chief executive officer having responsibility for the overall operations of a principal geographic unit of the agency (e.g., a Regional Administrator of EPA). ()

d. For Phase II sources: ()

i. The designated representative in so far as actions, standards, requirements, or prohibitions under 42 U.S.C. Sections 7651 through 7651o or the regulations promulgated thereunder are concerned; and ()

ii. The designated representative for any other purposes under 40 CFR Part 70. ()

102. Safety Measure. Any shutdown (and related startup) or bypass of equipment or processes undertaken to prevent imminent injury or death or severe damage to equipment or property which may cause excess emissions. ()

103. Salvage Operation. Any source consisting of any business, trade or industry engaged in whole or in part in salvaging or reclaiming any product or material, such as, but not limited to, reprocessing of used motor oils, metals, chemicals, shipping containers, or drums, and specifically including automobile graveyards and junkyards. ()

104. Scheduled Maintenance. Planned upkeep, repair activities and preventative maintenance on any air pollution control equipment or emissions unit, including process equipment, and including shutdown and startup of such equipment. ()

105. Secondary Ambient Air Quality Standard. That ambient air quality which is requisite to protect the public welfare from any known or anticipated adverse effects associated with the presence of air pollutants in the ambient air. ()

106. Secondary Emissions. Emissions which would occur as a result of the construction, modification, or operation of a stationary source or facility, but do not come from the stationary source or facility itself. Secondary emissions must be specific, well defined, quantifiable, and affect the same general area as the stationary source, facility, or modification which causes the secondary emissions. Secondary emissions include emissions from any offsite support facility which would not be constructed or increase its emissions except as a result of the construction or operation of the primary stationary source, facility or modification. Secondary emissions do not include any emissions which come directly from a mobile source regulated under 42 U.S.C. Sections 7521 through 7590. ()

107. Shutdown. The normal and customary time period required to cease operations of air pollution control equipment or an emissions unit beginning with the initiation of procedures to terminate normal operation and continuing until the termination is completed. ()

108. Significant. In reference to a net emissions increase or the potential of a source to emit any of the following pollutants, a rate of emissions that would equal or exceed any of the following: ()

- a. Pollutant and emissions rate: ()
 - i. Carbon monoxide, one hundred (100) tons per year; ()
 - ii. Nitrogen oxides, forty (40) tons per year; ()
 - iii. Sulfur dioxide, forty (40) tons per year; ()
 - iv. Particulate matter: ()
 - (1) Twenty-five (25) tons per year of particulate matter emissions; ()
 - (2) Fifteen (15) tons per year of PM₁₀ emissions; or ()
 - (3) Ten (10) tons per year of direct PM_{2.5} emissions; or forty (40) tons per year of sulfur dioxide emissions; or forty (40) tons per year of nitrogen oxide emissions; ()
 - v. Ozone, forty (40) tons per year of volatile organic compounds; ()
 - vi. Lead, six-tenths (0.6) of a ton per year; ()
 - vii. Fluorides, three (3) tons per year; ()
 - viii. Sulfuric acid mist, seven (7) tons per year; ()
 - ix. Hydrogen sulfide (H₂S), ten (10) tons per year; ()
 - x. Total reduced sulfur (including H₂S), ten (10) tons per year; ()
 - xi. Reduced sulfur compounds (including H₂S), ten (10) tons per year; ()
 - xii. Municipal waste combustor organics (measured as total tetra- through octa-chlorinated dibenzo-p-dioxins and dibenzofurans), thirty-five ten-millionths (0.0000035) tons per year; ()
 - xiii. Municipal waste combustor metals (measured as particulate matter), fifteen (15) tons per year; ()
 - xiv. Municipal waste combustor acid gases (measured as sulfur dioxide and hydrogen chloride), forty (40) tons per year; or ()

xv. Municipal solid waste landfill emissions (measured as nonmethane organic compounds), fifty (50) tons per year. ()

b. In reference to a net emissions increase or the potential of a source or facility to emit a regulated air pollutant not listed in Subsection 006.108.a. above and not a toxic air pollutant, any emission rate; or ()

c. For a major facility or major modification which would be constructed within ten (10) kilometers of a Class I area, the emissions rate which would increase the ambient concentration of an emitted regulated air pollutant in the Class I area by one (1) microgram per cubic meter, twenty-four (24) hour average, or more. ()

109. Significant Contribution. Any increase in ambient concentrations which would exceed the following: ()

a. Sulfur dioxide: ()

i. One (1.0) microgram per cubic meter, annual average; ()

ii. Five (5) micrograms per cubic meter, twenty-four (24) hour average; ()

iii. Twenty-five (25) micrograms per cubic meter, three (3) hour average; ()

b. Nitrogen dioxide, one (1.0) microgram per cubic meter, annual average; ()

c. Carbon monoxide: ()

i. One-half (0.5) milligrams per cubic meter, eight (8) hour average; ()

ii. Two (2) milligrams per cubic meter, one (1) hour average; ()

d. PM₁₀: ()

i. One (1.0) microgram per cubic meter, annual average; ()

ii. Five (5.0) micrograms per cubic meter, twenty-four (24) hour average; ()

e. PM_{2.5}: ()

i. Three-tenths (0.3) microgram per cubic meter, annual average; ()

ii. One point two (1.2) micrograms per cubic meter, twenty-four (24) hour average. ()

110. Small Fire. A fire in which the material to be burned is not more than four (4) feet in diameter nor more than three (3) feet high. ()

111. Smoke. Small gas-borne particles resulting from incomplete combustion, consisting predominantly, but not exclusively, of carbon and other combustible material. ()

112. Smoke Management Plan. A document issued by the Director to implement Sections 606 through 616, Categories of Allowable Burning. ()

113. Smoke Management Program. A program whereby meteorological information, fuel conditions, fire behavior, smoke movement and atmospheric dispersal conditions are used as a basis for scheduling the location, amount and timing of open burning operations so as to minimize the impact of such burning on identified smoke sensitive areas. ()

114. Source. A stationary source. ()

- 115. Source Operation.** The last operation preceding the emission of air pollutants, when this operation: ()
- a.** Results in the separation of the air pollutants from the process materials or in the conversion of the process materials into air pollutants, as in the case of fuel combustion; and ()
 - b.** Is not an air cleaning device. ()
- 116. Special Fuels.** All fuel suitable as fuel for diesel engines; a compressed or liquefied gas obtained as a by-product in petroleum refining or natural gasoline manufacture, such as butane, isobutane, propane, propylene, butylenes, and their mixtures; and natural gas, either liquid or gas, and hydrogen, used for the generation of power for the operation or propulsion of motor vehicles. ()
- 117. Stack.** Any point in a source arranged to conduct emissions to the ambient air, including a chimney, flue, conduit, or duct but not including flares. ()
- 118. Stage 1 Vapor Collection.** Used during the refueling of underground gasoline storage tanks to reduce hydrocarbon emissions. Vapors in the tank, which are displaced by the incoming gasoline, are routed through a hose into the gasoline cargo tank and returned to the terminal for processing. Two (2) types of Stage 1 systems exist: coaxial and dual point. ()
- a.** Coaxial System. A Stage 1 vapor collection system that requires only one (1) tank opening. The tank opening is usually four (4) inches in diameter with a three (3) inch diameter product fill tube inserted into the opening. Fuel flows through the inner tube while vapors are displaced through the annular space between the inner and outer tubes. ()
 - b.** Dual Point System. A Stage 1 vapor collection system that consists of two (2) separate tank openings, one (1) for delivery of the product and the other for the recovery of vapors. ()
- 119. Standard Conditions.** Except as specified in Subsection 576.02 for ambient air quality standards, a dry gas temperature of twenty degrees Celsius (20C) sixty-eight degrees Fahrenheit (68F) and a gas pressure of seven hundred sixty (760) millimeters of mercury (14.7 pounds per square inch) absolute. ()
- 120. Startup.** The normal and customary time period required to bring air pollution control equipment or an emissions unit, including process equipment, from a nonoperational status into normal operation. ()
- 121. Stationary Source.** Any building, structure, facility, emissions unit, or installation which emits or may emit any air pollutant. The fugitive emissions shall not be considered in determining whether a permit is required unless required by federal law. ()
- 122. Tier I Source.** Any of the following: ()
- a.** Any source located at any major facility as defined in Section 008; ()
 - b.** Any source, including an area source, subject to a standard, limitation, or other requirement under 42 U.S.C. Section 7411 or 40 CFR Part 60, and required by EPA to obtain a Part 70 permit; ()
 - c.** Any source, including an area source, subject to a standard or other requirement under 42 U.S.C. Section 7412, 40 CFR Part 61 or 40 CFR Part 63, and required by EPA to obtain a Part 70 permit, except that a source is not required to obtain a permit solely because it is subject to requirements under 42 U.S.C. Section 7412(r); ()
 - d.** Any Phase II source; and ()
 - e.** Any source in a source category designated by the Department. ()
- 123. Total Suspended Particulates.** Particulate matter as measured by the method described in 40 CFR

50 Appendix B. ()

124. Toxic Air Pollutant. An air pollutant that has been determined by the Department to be by its nature, toxic to human or animal life or vegetation and listed in Section 585 or 586. ()

125. Toxic Air Pollutant Carcinogenic Increments. Those ambient air quality increments based on the probability of developing excess cancers over a seventy (70) year lifetime exposure to one (1) microgram per cubic meter (1 ug/m³) of a given carcinogen and expressed in terms of a screening emission level or an acceptable ambient concentration for a carcinogenic toxic air pollutant. They are listed in Section 586. ()

126. Toxic Air Pollutant Non-carcinogenic Increments. Those ambient air quality increments based on occupational exposure limits for airborne toxic chemicals expressed in terms of a screening emission level or an acceptable ambient concentration for a non-carcinogenic toxic air pollutant. They are listed in Section 585. ()

127. Toxic Substance. Any air pollutant that is determined by the Department to be by its nature, toxic to human or animal life or vegetation. ()

128. Trade Waste. Any solid, liquid or gaseous material resulting from the construction or demolition of any structure, or the operation of any business, trade or industry including, but not limited to, wood product industry waste such as sawdust, bark, peelings, chips, shavings and cull wood. ()

129. TRS (Total Reduced Sulfur). Hydrogen sulfide, mercaptans, dimethyl sulfide, dimethyl disulfide and any other organic sulfide present. ()

130. Unclassifiable Area. An area which, because of a lack of adequate data, is unable to be classified pursuant to 42 U.S.C. Section 7407(d) as either an attainment or a nonattainment area. ()

131. Uncontrolled Emission. An emission which has not been treated by control equipment. ()

132. Upset. An unplanned disruption in the normal operations of any equipment or emissions unit which may cause excess emissions. ()

133. Visibility Impairment. Any humanly perceptible change in visibility (light extinction, visual range, contrast, coloration) from that which would have existed under natural conditions. ()

134. Visibility in Any Mandatory Class I Federal Area. Includes any integral vista associated with that area. ()

135. Wigwam Burner. Wood waste burning devices commonly called teepee burners, silos, truncated cones, and other such burners commonly used by the wood product industry for the disposal by burning of wood wastes. ()

136. Wood Stove Curtailment Advisory. An air pollution alert issued through local authorities and/or the Department to limit wood stove emissions during air pollution episodes. ()

007. DEFINITIONS FOR THE PURPOSES OF SECTIONS 200 THROUGH 228 AND 400 THROUGH 461.

01. Agricultural Activities and Services. For the purposes of Subsection 222.02.f., the usual and customary activities of cultivating the soil, producing crops and raising livestock for use and consumption. Agricultural activities and services do not include manufacturing, bulk storage, handling for resale or the formulation of any agricultural chemical listed in Sections 585 or 586. ()

02. Baseline Actual Emissions. The rate of emissions, in tons per year, of a regulated air pollutant as determined by the following provisions: ()

a. For any existing electric utility steam generating unit, baseline actual emissions means the average

rate, in tons per year, at which the unit actually emitted the regulated air pollutant during any consecutive twenty-four (24) month period selected by the owner or operator within the five (5) year period immediately preceding when the owner or operator begins actual construction of the project. The Director shall allow the use of a different time period upon a determination that it is more representative of normal source operation. ()

i. The average rate shall include fugitive emissions to the extent quantifiable, and emissions associated with startups, shutdowns, and malfunctions. ()

ii. The average rate shall be adjusted downward to exclude any non-compliant emissions that occurred while the source was operating above any emission limitation that was legally enforceable during the consecutive twenty-four (24) month period. ()

iii. For a regulated air pollutant, when a project involves multiple emissions units, only one (1) consecutive twenty-four (24) month period must be used to determine the baseline actual emissions for all the emissions units being changed. A different consecutive twenty-four (24) month period can be used for each regulated air pollutant. ()

iv. The average rate shall not be based on any consecutive twenty-four (24) month period for which there is inadequate information for determining annual emissions, in tons per year, and for adjusting this amount if required by Subsection 007.02.a.ii. ()

b. For an existing emissions unit (other than an electric utility steam generating unit), baseline actual emissions means the average rate, in tons per year, at which the emissions unit actually emitted the regulated air pollutant during any consecutive twenty-four (24) month period selected by the owner or operator within the ten (10) year period immediately preceding either the date the owner or operator begins actual construction of the project, or the date a complete permit application is received by the Director for a permit required under these rules, whichever is earlier, except that the ten (10) year period shall not include any period earlier than November 15, 1990. ()

i. The average rate shall include fugitive emissions to the extent quantifiable, and emissions associated with startups, shutdowns, and malfunctions. ()

ii. The average rate shall be adjusted downward to exclude any non-compliant emissions that occurred while the source was operating above an emission limitation that was legally enforceable during the consecutive twenty-four (24) month period. ()

iii. The average rate shall be adjusted downward to exclude any emission limitation with which the source must currently comply, had such source been required to comply with such limitations during the consecutive twenty-four (24) month period; however, if an emission limitation is part of a standard or other requirement under 40 CFR Part 63, the baseline actual emissions need only be adjusted if the Department has taken credit for such emissions reductions in an attainment demonstration or maintenance plan. ()

iv. For a regulated air pollutant, when a project involves multiple emissions units, only one (1) consecutive twenty-four (24) month period must be used to determine the baseline actual emissions for all the emissions units being changed. A different consecutive twenty-four (24) month period can be used for each regulated air pollutant. ()

v. The average rate shall not be based on any consecutive twenty-four (24) month period for which there is inadequate information for determining annual emissions, in tons per year, and for adjusting this amount if required by Subsections 007.02.b.ii. and 007.02.b.iii. ()

c. For a new emissions unit, the baseline actual emissions for purposes of determining the emissions increase that will result from the initial construction and operation of such unit shall equal zero (0); and, thereafter, for all other purposes, shall equal the unit's potential to emit. ()

d. For a plantwide applicability limit (PAL) for a stationary source, the baseline actual emissions shall be calculated for existing electric utility steam generating units in accordance with the procedures contained in Subsection 007.02.a, for other existing emissions units in accordance with the procedures contained in Subsection

007.02.b, and for a new emissions unit in accordance with the procedures contained in Subsection 007.02.c. ()

03. Begin Actual Construction. Commence construction. ()

04. Emissions Increase. The amount by which projected actual emissions exceed baseline actual emissions of an emissions unit. ()

05. Innovative Control Technology. Any system of air pollution control that has not been adequately demonstrated in practice, but would have a substantial likelihood of achieving greater continuous emissions reduction than any control system in current practice, or of achieving at least comparable reductions at lower cost in terms of energy, economics, or non-air quality environmental effects. ()

06. Net Emissions Increase. For purposes of Sections 204 and 205, a net emissions increase shall be defined by the federal regulations incorporated by reference. For purposes of Section 210, a net emissions increase shall be an emissions increase from a particular modification plus any other increases and decreases in actual emissions at the facility that are creditable and contemporaneous with the particular modification, where: ()

a. A creditable increase or decrease in actual emissions is contemporaneous with a particular modification if it occurs between the date five (5) years before the commencement of construction or modification on the particular change and the date that the increase from the particular modification occurs. Any replacement unit that requires shakedown becomes operational only after a reasonable shakedown period, not to exceed one hundred and eighty (180) days; ()

b. A decrease in actual emissions is creditable only if it satisfies the requirements for emission reduction credits (Section 460) and has approximately the same qualitative significance for public health and welfare as that attributed to the increase from the particular modification, and is federally enforceable at and after the time that construction of the modification commences. ()

c. The increase in toxic air pollutant emissions from an already operating or permitted source is not included in the calculation of the net emissions increase for a proposed new source or modification if: ()

i. The already operating or permitted source commenced construction or modification prior to July 1, 1995; or ()

ii. The uncontrolled emission rate from the already operating or permitted source is ten per cent (10%) or less of the applicable screening emissions level listed in Section 585 or 586; or ()

iii. The already operating or permitted source is an environmental remediation source subject to or regulated by the Resource Conservation and Recovery Act (42 U.S.C. Sections 6901-6992k) and IDAPA 58.01.05, "Idaho Rules and Standards for Hazardous Waste," (IDAPA 58.01.05.000 et seq.) or the Comprehensive Environmental Response, Compensation and Liability Act (42 U.S.C. 6901-6992k) or a consent order. ()

07. Pilot Plant. A stationary source located at least one quarter (1/4) mile from any sensitive receptor that functions to test processing, mechanical, or pollution control equipment to determine full-scale feasibility and which does not produce products that are offered for sale except in developmental quantities. ()

08. Projected Actual Emissions. ()

a. The maximum annual rate, in tons per year, at which an existing emissions unit is projected to emit a regulated air pollutant in any one (1) of the five (5) years (twelve (12) month period) following the date the unit resumes regular operation after the project, or in any one (1) of the ten (10) years following that date, if the project involves increasing the emissions unit's design capacity or its potential to emit that regulated air pollutant and full utilization of the unit would result in a significant emissions increase or a significant net emissions increase at an existing major stationary source. ()

b. In determining the projected actual emissions, the owner or operator of the stationary source: ()

i. Shall consider all relevant information including, but not limited to, historical operational data, the company's own representations, the company's expected business activity and the company's highest projections of business activity, the company's filings with state or federal regulatory authorities, and compliance plans under the approved state implementation plan; and ()

ii. Shall include fugitive emissions to the extent quantifiable and emissions associated with startups, shutdowns, and malfunctions; and ()

iii. Shall exclude, in calculating any increase in emissions that results from the particular project, that portion of the unit's emissions following the project that an existing unit could have accommodated during the consecutive twenty-four (24) month period used to establish the baseline actual emissions and that are also unrelated to the particular project, including any increased utilization due to product demand growth; or ()

iv. In lieu of using the method set out in Subsections 007.08.b.i. through 007.08.b.iii., may elect to use the emissions unit's potential to emit, in tons per year. ()

09. Reasonable Further Progress (RFP). Annual incremental reductions in emissions of the applicable air pollutant as identified in the SIP which are sufficient to provide for attainment of the applicable ambient air quality standard by the required date. ()

10. Sensitive Receptor. Any residence, building or location occupied or frequented by persons who, due to age, infirmity or other health based criteria, may be more susceptible to the deleterious effects of a toxic air pollutant than the general population including, but not limited to, elementary and secondary schools, day care centers, playgrounds and parks, hospitals, clinics and nursing homes. ()

11. Short Term Source. Any new stationary source or modification to an existing source, with an operational life no greater than five (5) years from the inception of any operations to the cessation of actual operations. ()

12. Toxic Air Pollutant Reasonably Available Control Technology (T-RACT). An emission standard based on the lowest emission of toxic air pollutants that a particular source is capable of meeting by the application of control technology that is reasonably available, as determined by the Department, considering technological and economic feasibility. If control technology is not feasible, the emission standard may be based on the application of a design, equipment, work practice or operational requirement, or combination thereof. ()

008. DEFINITIONS FOR THE PURPOSES OF SECTIONS 300 THROUGH 386.

01. Affected States. All States: ()

a. Whose air quality may be affected by the emissions of the Tier I source and that are contiguous to Idaho; or ()

b. That are within fifty (50) miles of the Tier I source. ()

02. Allowance. An authorization allocated to a Phase II source by the EPA to emit during or after a specified calendar year, one (1) ton of sulfur dioxide. ()

03. Applicable Requirement. All of the following if approved or promulgated by EPA as they apply to emissions units in a Tier I source (including requirements that have been promulgated through rulemaking at the time of permit issuance but which have future-effective compliance dates): ()

a. Any standard or other requirement provided for in the applicable state implementation plan, including any revisions to that plan that are specified in 40 CFR Parts 52.670 through 52.690. ()

b. Any term or condition of any permits to construct issued by the Department pursuant to Sections 200 through 223 or by EPA pursuant to 42 U.S.C. Sections 7401 through 7515; provided that terms or conditions

relevant only to toxic air pollutants are not applicable requirements. ()

- c. Any standard or other requirement under 42 U.S.C. Section 7411 including 40 CFR Part 60; ()
- d. Any standard or other requirement under 42 U.S.C. Section 7412 including 40 CFR Part 61 and 40 CFR Part 63; ()
- e. Any standard or other requirement of the acid rain program under 42 U.S.C. Sections 7651 through 7651o; ()
- f. Any requirements established pursuant to 42 U.S.C. Section 7414(a)(3), 42 U.S.C. Section 7661c(b) or Sections 120 through 128 of these rules; ()
- g. Any standard or other requirement governing solid waste incineration, under 42 U.S.C. Section 7429; ()
- h. Any standard or other requirement for consumer and commercial products and tank vessels, under 42 U.S.C. Sections 7511b(e) and (f); and ()
- i. Any standard or other requirement under 42 U.S.C. Sections 7671 through 7671q including 40 CFR Part 82. ()
- j. Any ambient air quality standard or increment or visibility requirement provided in 42 U.S.C. Sections 7470 through 7492, but only as applied to temporary sources receiving Tier I operating permits under Section 324. ()

04. Designated Representative. A responsible person or official authorized by the owner or operator of a Phase II unit to represent the owner or operator in matters pertaining to the holding, transfer, or disposition of allowances allocated to a Phase II unit, and the submission of and compliance with permits, permit applications, and compliance plans for the Phase II unit. ()

05. Draft Permit. The version of a Tier I operating permit that is made available by the Department for public participation and affected State review. ()

06. Emergency. For the purposes of Section 332, an emergency is any situation arising from sudden and reasonably unforeseeable events beyond the control of the owner or operator, including acts of God, which situation requires immediate corrective action to restore normal operation and that causes the Tier I source to exceed a technology-based emission limitation under the Tier I operating permit due to unavoidable increases in emissions attributable to the emergency. An emergency shall not include noncompliance to the extent caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error. ()

07. Final Permit. The version of a Tier I permit issued by the Department that has completed all review procedures required in Sections 364 and 366. ()

08. General Permit. A Tier I permit issued pursuant to Section 335. ()

09. Insignificant Activity. Those activities that qualify as insignificant in accordance with Section 317. ()

10. Major Facility. A facility (as defined in Section 006) is major if the facility meets any of the following criteria: ()

a. For hazardous air pollutants: ()

i. The facility emits or has the potential to emit ten (10) tons per year (tpy) or more of any hazardous air pollutant, other than radionuclides, which has been listed pursuant to 42 U.S.C. Section 7412(b); provided that

emissions from any oil or gas exploration or production well (with its associated equipment) and emissions from any oil or gas pipeline compressor or pump station shall not be aggregated with emissions from other similar emission units within the facility. ()

ii. The facility emits or has the potential to emit twenty-five (25) tpy or more of any combination of any hazardous air pollutants, other than radionuclides, which have been listed pursuant to 42 U.S.C. 7412(b); provided that emissions from any oil or gas exploration or production well (with its associated equipment) and emissions from any oil or gas pipeline compressor or pump station shall not be aggregated with emissions from other similar emission units within the facility. ()

b. For non-attainment areas: ()

i. The facility is located in a “serious” particulate matter (PM-10) nonattainment area and the facility has the potential to emit seventy (70) tpy or more of PM-10. ()

ii. The facility is located in a “serious” carbon monoxide nonattainment area in which stationary sources are significant contributors to carbon monoxide levels and the facility has the potential to emit fifty (50) tpy or more of carbon monoxide. ()

iii. The facility is located in an ozone transport region established pursuant to 42 U.S.C. Section 7511c and the facility has the potential to emit fifty (50) tpy or more of volatile organic compounds. ()

iv. The facility is located in an ozone nonattainment area and, depending upon the classification of the nonattainment area, the facility has the potential to emit the following amounts of volatile organic compounds or oxides of nitrogen; provided that oxides of nitrogen shall not be included if the facility has been identified in accordance with 42 U.S.C. Section 7411a(f)(1) or (2) if the area is “marginal” or “moderate,” one hundred (100) tpy or more, if the area is “serious,” fifty (50) tpy or more, if the area is “severe,” twenty-five (25) tpy or more, and if the area is “extreme,” ten (10) tpy or more. ()

c. The facility emits or has the potential to emit one hundred (100) tons per year or more of any regulated air pollutant. The fugitive emissions shall not be considered in determining whether the facility is major unless the facility belongs to one (1) of the following categories: ()

i. Designated facilities. ()

ii. All other source categories regulated by 40 CFR Part 60, 40 CFR Part 61 or 40 CFR Part 63, but only with respect to those air pollutants that have been regulated for that category and only if determined by rule by the Administrator of EPA pursuant to Section 302(j) of the Clean Air Act. ()

009. DEFINITIONS FOR THE PURPOSES OF 40 CFR PART 60.

Notwithstanding the definitions listed in Sections 006 through 008, the definitions in 40 CFR Part 60 shall have the meaning given in that Part, except that the term “Administrator” shall mean “Department.” ()

010. DEFINITIONS FOR THE PURPOSES OF 40 CFR PART 61 AND 40 CFR PART 63.

Notwithstanding the definitions listed in Sections 006 through 008, the definitions in 40 CFR Part 61 and 40 CFR Part 63 shall have the meaning given in those Parts, except that the term “Administrator” shall mean “Department.” ()

011. DEFINITIONS FOR THE PURPOSES OF SECTIONS 790 THROUGH 799.

01. Best Management Practice. The best management practice (BMP) employed within an industry to control fugitive emissions. ()

02. Control Strategy Trigger. An event or condition that indicates that a control action is needed to prevent violation of a standard or a provision of the rule. ()

03. Nonmetallic Mineral Processing Plant. Any combination of equipment that is used to crush or

grind any nonmetallic mineral or rock wherever it may be located, including equipment located at lime plants, power plants, steel mills, asphalt concrete plants, Portland cement plants, or any other facility or location processing nonmetallic minerals. ()

04. NSPS Regulated Facility or Plant. A facility or processing plant that is subject to a standard, limitation, or other requirement of 40 CFR 60, Standards for the Performance of New Stationary Sources. ()

05. Permit by Rule. A provision of the rules under which a facility or source registers with the Department and meets the specific requirements for that type of source. The source is then deemed to have a permit, thereby authorizing construction and operation without first obtaining a "Permit to Construct" as required in Section 201. Operating in accordance with a "Permit by Rule" (PBR) does not relieve the owner or operator from complying with all applicable federal, state, and local rules and regulations. ()

06. Progressive Control Strategy. A sequence of control actions that when progressively employed can reduce the potential for violation of a standard or a provision of the rules. Control actions, beginning with those early in the sequence, shall be progressively applied until an adequate level of control is achieved. ()

07. Site of Operations. The specific operating location of a nonmetallic mineral processing plant. ()

107. INCORPORATIONS BY REFERENCE.

01. General. Unless expressly provided otherwise, any reference in these rules to any document identified in Subsection 107.03 constitutes the full incorporation into these rules of that document for the purposes of the reference, including any notes and appendices therein. The term “documents” includes codes, standards or rules which have been adopted by an agency of the state or of the United States or by any nationally recognized organization or association. ()

02. Availability of Referenced Material. Copies of the documents incorporated by reference into these rules are available at the following locations: ()

- a. All federal publications: U.S. Government Printing Office at <http://www.ecfr.gov/cgi-bin/ECFR>; and; ()
- b. Statutes of the state of Idaho: <http://legislature.idaho.gov/idstat/TOC/IDStatutesTOC.htm>; and ()
- c. All documents herein incorporated by reference: ()
- i. Department of Environmental Quality, 1410 N. Hilton, Boise, Idaho 83706-1255 at (208) 373-0502. ()
- ii. State Law Library, 451 W. State Street, P.O. Box 83720, Boise, Idaho 83720-0051, (208) 334-3316. ()

03. Documents Incorporated by Reference. The following documents are incorporated by reference into these rules: ()

a. Requirements for Preparation, Adoption, and Submittal of Implementation Plans, [40 CFR Part 51](#) revised as of July 1, 2020. The following portions of 40 CFR Part 51 are expressly excluded from any incorporation by reference into these rules: ()

- i. All sections included in 40 CFR Part 51, Subpart P, Protection of Visibility, except that 40 CFR 51.301, 51.304(a), 51.307, and 51.308 are incorporated by reference into these rules; and ()
- ii. Appendix Y to Part 51, Guidelines for BART Determinations Under the Regional Haze Rule. ()

b. National Primary and Secondary Ambient Air Quality Standards, [40 CFR Part 50](#), revised as of July 1, 2020. ()

c. Approval and Promulgation of Implementation Plans, [40 CFR Part 52](#), Subparts A and N and

- Appendices D and E, revised as of July 1, 2020. ()
- d. Ambient Air Monitoring Reference and Equivalent Methods, [40 CFR Part 53](#), revised as of July 1, 2020. ()
 - e. Ambient Air Quality Surveillance, [40 CFR Part 58](#), revised as of July 1, 2020. ()
 - f. Standards of Performance for New Stationary Sources, [40 CFR Part 60](#), revised as of July 1, 2020. ()
 - g. National Emission Standards for Hazardous Air Pollutants, [40 CFR Part 61](#), revised as of July 1, 2020. ()
 - h. Federal Plan Requirements for Hospital/Medical/Infectious Waste Incinerators Constructed on or Before December 1, 2008, [40 CFR Part 62, Subpart HHH](#), revised as of July 1, 2020. ()
 - i. National Emission Standards for Hazardous Air Pollutants for Source Categories, [40 CFR Part 63](#), revised as of July 1, 2020. ()
 - j. Compliance Assurance Monitoring, [40 CFR Part 64](#), revised as of July 1, 2020. ()

108. -- 120. (RESERVED)

121. COMPLIANCE REQUIREMENTS BY DEPARTMENT.

Any person engaged in an activity which may violate the air quality provisions of the Act, violate an air quality order issued or entered in accordance with the Act or these rules, or violate any of these rules, may be required by the Department to do any of the following: ()

- 01. Schedule.** Prepare a proposed schedule whereby the unlawful activity will be brought into compliance over a specified period of time. ()
- 02. Report.** Submit periodic reports to the Department indicating progress in achieving compliance. ()
- 03. Records.** Submit, keep and maintain appropriate records. ()
- 04. Monitoring.** Monitor air pollutants at the source, in the ambient air, or in vegetation to demonstrate compliance. ()
- 05. Episode Plans.** Develop emergency episode plans to help prevent ambient air pollution concentrations from reaching levels which would cause substantial endangerment to health or the environment. ()

122. INFORMATION ORDERS BY THE DEPARTMENT.

The Department may issue information orders as follows: ()

- 01. Purpose.** For the purpose of: ()
- a.** Developing or assisting in the development of any implementation plan, any standard of performance, any emission standard or any rule; ()
 - b.** Determining whether any person is in violation of any standard of performance, any emission standard, any implementation plan or any rule; or ()
 - c.** Carrying out any air quality provisions of the Act, any air quality order issued or entered in accordance with the Act or rules, or any of these rules. ()
- 02. Persons.** The Department may issue an information order to any person who: ()
- a.** Owns or operates any emission source; ()
 - b.** Manufactures emission control equipment; ()
 - c.** The Department believes may have information necessary to meet the intent of these rules; or ()
 - d.** Is subject to any requirement of these rules. ()
- 03. Requirements.** The information order may require the person to perform the following on a one-time, periodic or continuous basis: ()
- a.** Establish, maintain and submit records; ()
 - b.** Make reports; ()
 - c.** Install, use, and maintain monitoring equipment, and use audit procedures or methods; ()
 - d.** Sample emissions in accordance with procedures or methods, at such locations, at such intervals, during such periods and in such manner as the Department shall prescribe; ()
 - e.** Keep records on control equipment parameters, production variables or other indirect data when the Department determines that direct monitoring of emissions is impractical; ()
 - f.** Submit compliance certifications including: ()
 - i.** Identification of the applicable requirement that is the basis of the certification; ()
 - ii.** The method(s) or other means used by the owner or operator for determining the compliance status for each applicable requirement, and whether such methods or other means provide continuous or intermittent data; and ()
 - iii.** The status of compliance with each applicable requirement, based on the method or means designated in Subsection 122.03.f.ii. The certification shall identify each deviation and take it into account in the compliance certification. The certification shall also identify as possible exceptions to compliance any periods during which compliance is required and in which an excursion or exceedance as defined under 40 CFR Part 64 occurred; and ()
 - g.** Provide such other information as the Department may require. ()

123. CERTIFICATION OF DOCUMENTS.

All documents, including but not limited to, application forms for permits to construct, application forms for operating permits, progress reports, records, monitoring data, supporting information, requests for confidential

treatment, testing reports or compliance certifications submitted to the Department shall contain a certification by a responsible official. The certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete. ()

124. TRUTH, ACCURACY AND COMPLETENESS OF DOCUMENTS.

All documents submitted to the Department shall be truthful, accurate and complete. ()

125. FALSE STATEMENTS.

No person shall knowingly make any false statement, representation, or certification in any form, notice, or report required under any permit, or any applicable rule or order in force pursuant thereto. ()

126. TAMPERING.

No person shall knowingly render inaccurate any monitoring device or method required under any permit, or any applicable rule or order in force pursuant thereto. ()

127. FORMAT OF RESPONSES.

All responses and information submitted to the Department shall be provided in a format approved by the Department. ()

128. CONFIDENTIAL INFORMATION.

Information obtained by the Department under these rules is subject to public disclosure pursuant to the provisions of Chapter 1, Title 74, Idaho Code and Section 39-111, Idaho Code. Information submitted under a trade secret claim may be entitled to confidential treatment by the Department as provided in Section 74-114, Idaho Code, and IDAPA 58.01.21, "Rules Governing the Protection and Disclosure of Records in the Possession of the Department of Environmental Quality." If the information for which the person is requesting confidential treatment is submitted to the Department under Sections 300 through 386 or the terms or conditions of a Tier I operating permit, the person shall also submit the same information directly to the EPA. ()

129. (RESERVED)

130. STARTUP, SHUTDOWN, SCHEDULED MAINTENANCE, SAFETY MEASURES, UPSET AND BREAKDOWN.

The purpose of Sections 130 through 136 is to establish procedures and requirements to be implemented in all excess emissions events and to establish criteria to be applied by the Department in determining whether to take enforcement action to impose penalties for an excess emissions event where the excess emissions are caused by startup, shutdown, scheduled maintenance, upset, or breakdown of any emissions unit or which occur as a direct result of the implementation of any safety measure. ()

131. EXCESS EMISSIONS.

01. Applicability. The owner or operator of a facility or emissions unit generating excess emissions shall comply with Sections 131, 132, 133.01, 134.01, 134.02, 134.03, 135, and 136, as applicable. If the owner or operator anticipates requesting consideration under Subsection 131.02, then the owner or operator shall also comply with the applicable provisions of Subsections 133.02, 133.03, 134.04, and 134.05. ()

02. Enforcement Action Criteria. Where an excess emissions event occurs as a direct result of startup, shutdown, or scheduled maintenance, or an unavoidable upset or unavoidable breakdown, or the implementation of a safety measure, the Department shall consider the sufficiency of the information submitted and the following criteria to determine if an enforcement action to impose penalties is warranted: ()

a. Whether prior to the excess emissions event, the owner or operator submitted and implemented procedures pursuant to Subsections 133.02 and 133.03 or Subsections 134.04 and 134.05, as applicable; ()

b. Whether the owner or operator complied with all relevant portions of Subsections 131, 132, 133.01, 134.01, 134.02, 134.03, 135, and 136; ()

c. Whether the excess emissions event was part of a recurring pattern of excess emissions events

indicative of inadequate design, operation or maintenance of the facility or emissions unit; and ()

d. Where appropriate, whether the excess emissions event was caused by an activity necessary to prevent loss of life, personal injury or severe property damage. ()

03. Effect of Determination. Any decision by the Department under Subsection 131.02 shall not excuse the owner or operator from compliance with the relevant emission standard and shall not preclude the Department from taking an enforcement action to enjoin the activity causing the excess emissions. Any decision made by the Department under Subsection 131.02 shall not preclude the Department from taking an enforcement action for future or other excess emission events. The affirmative defense for emergencies under Section 332 of these Rules may be applied in addition to the provisions of Sections 130 through 136. ()

132. CORRECTION OF CONDITION.

The person responsible for, or in charge of a facility during, an excess emissions event shall, with all practicable speed, initiate and complete appropriate and reasonable action to correct the conditions causing such excess emissions event; to reduce the frequency of occurrence of such events; to minimize the amount by which the emission standard is exceeded; and shall, as provided below or upon request of the Department, submit a full report of such occurrence, including a statement of all known causes, and of the scheduling and nature of the actions to be taken. ()

133. STARTUP, SHUTDOWN AND SCHEDULED MAINTENANCE REQUIREMENTS.

The requirements in Subsection 133.01 shall apply in all cases where startup, shutdown, or scheduled maintenance of any equipment or emissions unit is expected to result or results in an excess emissions event. The owner or operator of the facility or emissions unit generating the excess emissions shall demonstrate compliance with all of the requirements of Subsection 133.01, as well as the development and implementation of procedures pursuant to Subsections 133.02 and 133.03 as a prerequisite to any consideration under Subsection 131.02. ()

01. General Provisions. The following shall pertain to all startup, shutdown, and scheduled maintenance activities expected to result or resulting in excess emissions: ()

a. No scheduled startup, shutdown, or maintenance resulting in excess emissions shall occur during any period in which an Atmospheric Stagnation Advisory and/or a Wood Stove Curtailment Advisory has been declared by the Department within an area designated by the Department as a PM-10 nonattainment area, unless the permittee demonstrates that such is reasonably necessary to facility operations and cannot be reasonably avoided and the Department approves such activity in advance, to the extent advance approval by the Department is feasible. This prohibition on scheduled startup, shutdown or maintenance activities during Advisories does not apply to situations where shutdown is necessitated by urgent situations, such as imminent equipment failure, power curtailment, worker safety concerns or similar situations. ()

b. The owner or operator of a source of excess emissions shall notify the Department of any startup, shutdown, or scheduled maintenance event that is expected to cause an excess emissions event. Such notification shall identify the time of the excess emissions, specific location, equipment involved, and type of excess emissions event (i.e. startup, shutdown, or scheduled maintenance). The notification shall be given as soon as reasonably possible, but no later than two (2) hours prior to the start of the excess emissions event unless the owner or operator demonstrates to the Department's satisfaction that a shorter advanced notice was necessary. The Department may prohibit or postpone any scheduled startup, shutdown, or maintenance activity upon consideration of the factors listed in Subsection 134.03. ()

c. The owner or operator of a source of excess emissions shall report and record the information required pursuant to Sections 135 and 136 for each excess emissions event due to startup, shutdown, or scheduled maintenance. ()

d. The owner or operator of a source of excess emissions must make the maximum reasonable effort, including off-shift labor where practicable to accomplish maintenance during periods of nonoperation of any related source operations or equipment. ()

02. Excess Emissions Procedures. For all equipment or emissions unit from which excess emissions

may occur during startup, shutdown, or scheduled maintenance, the facility owner or operator shall prepare, implement and file with the Department specific procedures which will be used to minimize excess emissions during such events. Specific information for each of the types of excess emissions events (i.e. startup, shutdown and scheduled maintenance) shall be established or documented for each piece of equipment or emissions unit and shall include all of the following (which may be based upon the facility owner or operator's knowledge of the process or emissions where measured data is unavailable): ()

- a. Identification of the specific equipment or emissions unit and the type of event anticipated. ()
- b. Identification of the specific emissions in excess of applicable emission standards during the startup, shutdown, or scheduled maintenance period. ()
- c. The estimated amount of excess emissions expected to be released during each event. ()
- d. The expected duration of each excess emissions event. ()
- e. An explanation of why the excess emissions are reasonably unavoidable for each of the types of excess emissions events (i.e. startup, shutdown, and scheduled maintenance). ()
- f. Specification of the frequency at which each of the types of excess emissions events (i.e. startup, shutdown, and scheduled maintenance) are expected to occur. ()
- g. For scheduled maintenance, the owner or operator shall also document detailed explanations of: ()
 - i. Why the maintenance is needed. ()
 - ii. Why it is impractical to reduce or cease operation of the equipment or emissions unit during the scheduled maintenance period. ()
 - iii. Why the excess emissions are not reasonably avoidable through better scheduling of the maintenance or through better operation and maintenance practices. ()
 - iv. Why, where applicable, it is necessary to by-pass, take off line, or operate equipment or emissions unit at reduced efficiency while the maintenance is being performed. ()
- h. Justification to explain why the piece of equipment or emissions unit cannot be modified or redesigned to eliminate or reduce the excess emissions which occur during startup, shutdown, and scheduled maintenance. ()
- i. Detailed specification of the procedures to be followed by the owner or operator which will minimize excess emissions at all times during startup, shutdown, and scheduled maintenance. These procedures may include such measures as preheating or otherwise conditioning the emissions unit prior to its use or the application of auxiliary equipment or emissions unit to reduce the excess emissions. ()

03. Amendments to Procedures. The owner or operator shall amend, and the Department may require amendments to, the procedures established pursuant to Section 133 from time to time and as deemed reasonably necessary to ensure that the procedures are and remain consistent with good pollution control practices. ()

04. Filing of Excess Emissions Procedures. ()

a. Unless otherwise required by the Department, the failure to prepare or file procedures pursuant to Subsection 133.02 shall not be a violation of these Rules in and of itself. ()

b. To the extent procedures or plans for excess emissions resulting from startup, shutdown, or scheduled maintenance are required to be or are otherwise submitted to the Department with any permit application,

such submission, if deemed adequate by the Department, shall fulfill the requirement under this Section to file plans and procedures with the Department. ()

134. UPSET, BREAKDOWN AND SAFETY REQUIREMENTS.

The requirements in Subsections 134.01, 134.02, and 134.03 shall apply in all cases where upset or breakdown of equipment or an emissions unit, or the initiation of safety measures, result or may result in an excess emissions event. The owner or operator of the facility or emissions unit generating the excess emissions shall demonstrate compliance with all of the requirements of Subsections 134.01, 134.02 and 134.03 as well as the development and implementation of procedures pursuant to Subsections 134.04 and 134.05 as a prerequisite to any consideration under Subsection 131.02. Where the owner or operator demonstrates that because of the unforeseeable nature of the excess emissions event it is impractical to develop procedures pursuant to Subsection 134.04, the Department shall exercise its enforcement discretion on a case by case basis. ()

01. Routine Maintenance and Repairs. For all equipment or emissions units from which excess emissions may occur during upset conditions or breakdowns or implementation of safety measures, the facility owner or operator shall: ()

a. Implement routine preventative maintenance and operating procedures consistent with good pollution control practices for minimizing upsets and breakdowns or events requiring implementation of safety measures, and ()

b. Make routine repairs in an expeditious fashion when the owner or operator knew or should have known that an excess emissions event was likely to occur. Off-shift labor and overtime shall be utilized, to the extent practicable, to ensure that such repairs are made expeditiously. ()

02. Excess Emissions Minimization and Notification. For all equipment or emissions units from which excess emissions result during upset or breakdown conditions, or for other situations that may necessitate the implementation of safety measures which cause excess emissions, the facility owner or operator shall comply with the following: ()

a. The owner or operator shall immediately undertake all appropriate measures to reduce and, to the extent possible, eliminate excess emissions resulting from the event and to minimize the impact of such excess emissions on the ambient air quality and public health. ()

b. The owner or operator shall notify the Department of any upset/breakdown/safety event that results in excess emissions. Such notification shall identify the time, specific location, equipment or emissions unit involved, and (to the extent known) the cause(s) of the occurrence. The notification shall be given as soon as reasonably possible, but no later than twenty-four (24) hours after the event, unless the owner or operator demonstrates to the Department's satisfaction that the longer reporting period was necessary. ()

c. The owner or operator shall report and record the information required pursuant to Sections 135 and 136 for each excess emissions event caused by an upset, breakdown, or safety measure. ()

03. Discretionary Reduction or Cessation Provisions. During any period of excess emissions caused by upset, breakdown, or operation under facility safety measures, the Department may require the owner or operator to immediately reduce or cease operation of the equipment or emissions unit causing the excess emissions until such time as the condition causing the excess emissions has been corrected or brought under control. Such action by the Department shall be taken upon consideration of the following factors and after consultation with the facility owner or operator: ()

a. Potential risk to the public or the environment. ()

b. Whether ceasing operations could result in physical damage to the equipment, emissions unit or facility, or cause injury to employees. ()

c. Whether continued excess emissions were reasonably unavoidable as determined by the Department. ()

d. The effect of the increase in pollution resulting from the shutdown and subsequent restart of the equipment or emissions unit or facility. ()

e. The owner or operator shall not be required to reduce or cease operations at the entire facility if reducing or ceasing operations at a portion of the facility eliminates or adequately reduces the excess emissions. ()

04. Excess Emissions Procedures. For equipment or emissions units and process upsets and breakdowns and situations that require implementation of safety measures, which events can reasonably be anticipated to occur periodically but which cannot be reasonably avoided or predicted with certainty, the owner or operator shall prepare, implement, and file with the Department specific procedures which will be used to minimize such events and excess emissions during such events. To the extent possible and reasonably practicable (and based upon knowledge of the process or emissions where measured data is not available), specify the following information for each type of anticipated upset/ breakdown/safety event: ()

a. The specific air pollution control equipment or emissions unit and the type of event anticipated. ()

b. The specific emissions in excess of applicable emission standards during the event. ()

c. The estimated amount of excess emissions expected to be released during each event. ()

d. The expected duration of each excess emissions event. ()

e. An explanation of why the excess emissions are reasonably unavoidable. ()

f. The frequency of the type of event, based on historic occurrences. ()

g. Justification to explain why the piece of control equipment or emissions unit cannot be modified or redesigned to eliminate or reduce the particular type of event. ()

h. Detailed specification of the procedures to be followed by the owner or operator which will minimize excess emissions at all times during such events, including without limitation those procedures listed under Subsection 134.05. ()

05. Amendments to Procedures. The owner or operator shall amend, and the Department may require amendments to, the procedures established pursuant to Section 134 from time to time and as deemed reasonably necessary to ensure that the procedures are and remain consistent with good pollution control practices. ()

06. Filing of Excess Emissions Procedures. ()

a. Failure to follow procedures filed with the Department shall not preclude the Department from making a determination under Subsection 131.02 if the owner or operator demonstrates to the Department's satisfaction that alternate and equivalent procedures were used and were necessitated by the exigency of the circumstances. ()

b. Unless otherwise required by the Department, the failure to prepare or file procedures pursuant to Subsection 134.04 shall not be a violation of these Rules in and of itself. ()

c. To the extent procedures or plans for excess emissions resulting from upsets, breakdowns or safety measures are required to be or are otherwise submitted to the Department with any permit application, such submission, if deemed adequate by the Department, shall fulfill the requirement under this Section to file plans and procedures with the Department. ()

135. EXCESS EMISSIONS REPORTS.

01. Deadline for Excess Emissions Reports. A written report for each excess emissions event shall be submitted to the Department by the owner or operator no later than fifteen (15) days after the beginning of each such event. ()

02. Contents of Excess Emissions Reports. Each report shall contain the following information: ()

a. The time period during which the excess emissions occurred; ()

b. Identification of the specific equipment or emissions unit which caused the excess emissions; ()

c. An explanation of the cause, or causes, of the excess emissions and whether the excess emissions occurred as a result of startup, shutdown, scheduled maintenance, upset, breakdown or a safety measure; ()

d. An estimate of the emissions in excess of any applicable emission standard (based on knowledge of the process and facility where emissions data is unavailable); ()

e. A description of the activities carried out to eliminate the excess emissions; and ()

f. Certify compliance status with the requirements of Sections 131, 132, 133.01, 134.01 through 134.03, 135, and 136. ()

g. If requesting consideration under Subsection 131.02, certify compliance status with Sections 131, 132, 133.01 through 133.03, 134.01 through 134.05, 135, and 136. ()

136. EXCESS EMISSIONS RECORDS.

01. Maintenance of Excess Emissions Records. The owner or operator shall maintain excess emissions records at the facility for the most recent five (5) calendar year period. ()

02. Availability of Excess Emissions Records. The excess emissions records shall be made available to the Department upon request. ()

03. Contents of Excess Emissions Records. The excess emissions records shall include the following: ()

a. An excess emissions log book for each emissions unit or piece of equipment containing copies of all reports that have been submitted to the Department pursuant to Section 135 for the particular emissions unit or equipment; and ()

b. Copies of all startup, shutdown, and scheduled maintenance procedures and upset/breakdown/safety preventative maintenance plans which have been developed by the owner or operator in accordance with Sections 133 and 134, and facility records as necessary to demonstrate compliance with such procedures and plans. ()

04. Protections Under Section 128. The protections under Section 128 for confidential information shall be available for excess emissions reports and records upon proper request of the owner or operator in accordance with Section 128. ()

137. -- 139. (RESERVED)

140. VARIANCES.
The purpose of Sections 140 through 149 is to establish procedures for obtaining variances. ()

141. PETITION.
A variance proceeding shall be commenced by filing three (3) copies of a petition for variance with the Department.

The complaint may be accompanied by such affidavits or other proof as the petitioner may submit in order to make it possible for the Department, if it so desires, to dispose of the matter without a hearing. The petition shall contain the following: ()

01. Statement of Facts. A concise statement of the facts upon which the variance is requested, including a description of the business or activity in question; the quantity and type of raw materials processed; an estimate of the quantity and type of contaminants discharged; a description of existing and proposed equipment for the control of discharges; and a time schedule for bringing the activity into compliance. ()

02. Statement of Reasons. A concise statement of why the petitioner believes that compliance with the provision from which variance is sought would impose an arbitrary or unreasonable hardship, including a description of the costs that compliance would impose on the petitioner and others, and of the injury that the grant of the variance would impose on the public. ()

03. Requested Relief. A clear statement of the precise extent of the relief sought. ()

142. NOTICE.

The Department shall give notice of all variance petitions as required by law. ()

143. INVESTIGATION AND RECOMMENDATION.

After investigating the variance petition and considering the views of persons who might be adversely affected by the grant of the variance, the Department staff shall, within twenty-one (21) days after the filing of the petition, make a recommendation to the Department as to the disposition of the petition. The recommendation, a copy of which shall be served on the petitioner, shall include: ()

01. Efforts. A description of the efforts made by the staff to investigate the facts as alleged and to ascertain the views of persons who might be affected, and a summary of the views so ascertained. ()

02. Disputed Facts. A statement of the degree to which, if at all, the staff disagrees with the facts as alleged in the petition. ()

03. Other Facts. Allegations of any other facts the staff believes relevant to the disposition of the petition. ()

04. Costs. The staff's assessment of the costs that compliance would impose on the petitioner and on others and of the injury that the grant of the variance would impose on the public. ()

05. Recommendations. The staff's reasoned recommendations as to what disposition should be made of the petition. ()

144. OBJECTIONS TO PETITION.

Any person may file with the Department, within twenty-one (21) days after the filing of the petition, a written objection to the grant of the variance. A copy of such objection shall be provided by the Department to the petitioner. ()

145. AUTHORIZATION OF HEARING.

01. No Objection. If no objection is made by the staff or by any other person to the grant of the variance within twenty-one (21) days after the filing of the petition, the Department shall authorize a hearing unless it determines either: ()

a. That even if all the facts alleged in the petition are true, the petitioner is not entitled to variance; or ()

b. That the petitioner has shown from affidavits or other proof that compliance with the provision from which variance is sought would impose an arbitrary or unreasonable hardship. ()

02. No Hearing. If the Department decides not to hold a hearing, it shall pass upon the petition and shall prepare an opinion stating its reasons both for the grant or denial of the petition and for its decision not to hold a hearing. ()

03. Early Hearing. The Department may authorize a hearing without waiting for the expiration of the twenty-one (21) days during which objections may be filed; provided that if a hearing is not held the Department shall not rule upon the petition until the twenty-one (21) days have elapsed. ()

146. NOTICE OF HEARING.

The Hearing Officer, after appropriate consultation with the parties, shall set a time and place for hearing and give notice to the petitioner, the EPA, and anyone who has filed an objection to the petition at least twenty-one (21) days prior to the date of the hearing. The hearing shall be set for a date no later than sixty (60) days after the filing of the petition. Any request by the petitioner for a continuance shall constitute a waiver of the right to a decision within ninety (90) days for the period of the continuance. ()

147. DECISION.

The Department shall render a final decision upon the petition within ninety (90) days after the filing of the petition, except that time included in a continuance granted at the request of the petitioner shall not be counted. When exigencies of time require, the Department may delay the filing of an opinion until not more than thirty (30) days after the filing of its final order. ()

148. PROOF OF HARDSHIP.

No variance shall be granted, with or without hearing, without adequate proof by the petitioner that compliance would impose an arbitrary or unreasonable hardship. ()

149. VARIANCE FROM NEW RULE.

If any person files a petition for variance from a rule within twenty (20) days after the original effective date of such a rule, the operation of such rule shall be stayed as to such person, pending the disposition of the petition. The Department may hold a hearing upon said petition within five (5) days from the notice of such hearing, but in all other respects, the rules in Sections 140 through 149 shall apply to the extent they are consistent with the hearing date set by the hearing officer. ()

150. -- 154. (RESERVED)

155. CIRCUMVENTION.

No person shall willfully cause or permit the installation or use of any device or use of any means that conceals emissions of pollutants that would otherwise violate the provisions of this chapter without resulting in a reduction in the total amount of emissions. ()

156. TOTAL COMPLIANCE.

Where more than one (1) section of these rules applies to a particular situation, all such rules must be met for total compliance, unless otherwise provided for in these rules. ()

157. TEST METHODS AND PROCEDURES.

The purpose of this Section is to establish procedures and requirements for test methods and results. Unless otherwise specified in these rules, permit, order, consent decree, or prior written approval by the Department: ()

01. General Requirements. If a source test is performed to satisfy a performance test requirement or a compliance test requirement imposed by state or federal regulation, rule, permit, order or consent decree, then the test methods and procedures shall be conducted in accordance with the requirements of Section 157. ()

a. Prior to conducting any emission test, owners or operators are strongly encouraged to submit to the Department in writing, at least thirty (30) days in advance, the following for approval: ()

i. The type of method to be used; ()

ii. Any extenuating or unusual circumstances regarding the proposed test; and ()

iii. The proposed schedule for conducting and reporting the test. ()

b. Without prior Department approval, any alternative testing is conducted solely at the owner's or operator's risk. If the owner or operator fails to obtain prior written approval by the Department for any testing deviations, the Department may determine the test does not satisfy the testing requirements. ()

02. Test Requirements. Tests shall be conducted in accordance with the following requirements. ()

a. The test must be conducted under operational conditions specified in the applicable state or federal regulation, rule, permit, order, consent decree or by Department approval. If the operational requirements are not specified, the source should test at worst-case normal operating conditions. Worst-case normal conditions are those conditions of fuel type, and moisture, process material makeup and moisture and process procedures which are changeable or which could reasonably be expected to be encountered during the operation of the facility and which would result in the highest pollutant emissions from the facility. ()

b. The Department may impose operational limitations or require additional testing in a permit, order or consent decree if the test is conducted under conditions other than worst-case normal. ()

c. The Department will accept the methods approved for the applicable pollutants, source type and operating conditions found in 40 CFR Parts 51, 60, 61, and 63 in determining the appropriate test method for an emission limit where one is not otherwise specified. ()

d. The following requirements apply to owners or operators requesting minor changes in the test method. As stated in Subsection 157.01 above, without prior Department approval, other changes may result in rejection of the test results by the Department. ()

i. For federal emission standards codified at 40 CFR Parts 60, 61, and 63, the Department will accept those minor changes which have received written approval of the U.S. EPA Administrator so long as the Department determines they are appropriate for the specific application. ()

ii. For all other emission standards in these rules or for permit requirements, the Department will accept those minor changes that the Department determines are appropriate for the specific application. ()

e. An owner or operator proposing to use an alternative test method not considered a minor change in Subsection 157.02.d. above, must: ()

i. Demonstrate to the Department by comparative testing or sufficient analysis, that the alternative method is comparable and equivalent to the designated test method. ()

ii. Submit the request for approval to use an alternative test method to the Department at least thirty (30) days in advance of a scheduled test. ()

iii. Obtain, and submit to the Department, EPA approval for use of the alternative test method for emission standards in these rules (except for state only toxic air pollutant standards) or for federal emission standards codified at 40 CFR Parts 60, 61, and 63. ()

iv. Obtain verification that any prior approval of an alternative test method by the Department continues to be acceptable. Alternative methods may cease to be acceptable if new or different information indicates that the alternative test method is less accurate, less reliable, or not comparable with any current state or federal regulation, rule order, permit, or consent decree. ()

f. Prior approval by the Department may not constitute Department approval for subsequent tests if new or different information indicates that a previously Department approved test method is less accurate, less reliable or not comparable with any current state or federal regulation, rule, order, permit or consent decree. ()

03. Observation of Tests by Department Staff. The owner or operator shall provide notice of intent to test to the Department at least fifteen (15) days prior to the scheduled test, or shorter time period as provided in a permit, order, consent decree or by Department approval. The Department may, at its option, have an observer present at any emissions tests conducted on a source. ()

04. Reporting Requirements. If the source test is performed to satisfy a performance test requirement imposed by state or federal regulation, rule, permit, order, or consent decree, a written report shall be submitted to the Department within sixty (60) days of the completion of the test. The written report shall: ()

a. Meet the format and content requirements specified by the Department in any applicable rule, regulation, guidance, permit, order, or consent decree. Any deviations from the format and contents specified require prior written approval from the Department. Failure to obtain such approval may result in the rejection of the test results. ()

b. Include all data required to be noted or recorded in any referenced test method. ()

05. Test Results Review Criteria. The Department will make every effort to review test results within a reasonable time. The Department may reject tests as invalid for: ()

a. Failure to adhere to the approved/required method; ()

b. Using a method inappropriate for the source type or operating conditions; ()

c. An incomplete written report; ()

d. Computational or data entry errors; ()

e. Clearly unreasonable results; ()

f. Failure to comply with the certification requirements of Section 123 of these rules; or ()

g. Failure of the source to conform to operational requirements in orders, permits, or consent decrees at the time of the test. ()

158. -- 159. (RESERVED)

160. PROVISIONS GOVERNING SPECIFIC ACTIVITIES AND CONDITIONS.

Sections 160 through 164 establish provisions governing specific activities and conditions. Test methods and procedures shall comply with Section 157. ()

161. TOXIC SUBSTANCES.

Any contaminant which is by its nature toxic to human or animal life or vegetation shall not be emitted in such quantities or concentrations as to alone, or in combination with other contaminants, injure or unreasonably affect human or animal life or vegetation. ()

162. MODIFYING PHYSICAL CONDITIONS.

When physical conditions such as tall adjacent buildings, valley and mountain terrain, etc., are such as to limit the normal dispersion of air pollutants, the Board may set more restrictive emission limitations on those sources affected by the unusual conditions when air quality standards would reasonably be expected to be exceeded. ()

163. SOURCE DENSITY.

Should areas develop where each individual source is meeting the requirements of this chapter, yet the ambient air quality standards are being exceeded or might reasonably be expected to be exceeded, the Board may set more restrictive emission limits than are contained in this chapter. ()

164. POLYCHLORINATED BIPHENYLS (PCBS).

01. Prohibition on Burning. Burning any material containing greater than five (5) parts per million of polychlorinated biphenyls (PCBs) is prohibited, except for incineration for the purpose of disposal. Incineration for disposal shall comply with the following provisions: ()

a. No person shall commence construction or modification of a PCB incinerator without a permit issued according to Sections 200 through 225. ()

b. The Department must provide opportunity for public comments prior to a final decision for a permit to construct or modify a new PCB incinerator. ()

c. A permit issued according to Sections 200 through 225 for construction or modification of a PCB incinerator shall require, as a minimum, best available control technology and monitoring instrumentation. ()

d. No permit to operate, construct or modify a PCB incinerator shall be processed or issued prior to March 16, 1987, or such earlier date as shall be determined by the State Board of Environmental Quality. ()

02. Prohibition on Sales. No person shall sell, distribute or provide any materials containing greater than five (5) parts per million PCBs for home or commercial heating equipment. ()

165. -- 174. (RESERVED)

175. PROCEDURES AND REQUIREMENTS FOR PERMITS ESTABLISHING A FACILITY EMISSIONS CAP.

The purpose of Sections 176 through 181 is to establish uniform procedures to obtain a Facility Emissions Cap (FEC) for stationary sources or facilities (hereinafter referred to as facility or facilities). A permit establishing a FEC will be issued pursuant to Sections 200 through 228 or Sections 400 through 410. ()

176. FACILITY EMISSIONS CAP.

01. Optional Facility Emissions Cap. An owner or operator of a facility may request a FEC to establish an enforceable facility-wide emission limitation. ()

02. Applicability. ()

a. The owner or operator of any facility, which is not a major facility as defined in Sections 204 or 205, may apply to the Department for a permit to establish a FEC. ()

b. FECs are available for new and existing facilities that are not major as defined in Section 204 or 205 or existing facilities undergoing a modification that does not make the facility a major facility as defined in Section 204 or 205. ()

c. Facilities that become major facilities as defined in Section 204 or 205 are no longer eligible for a FEC under Section 176. ()

03. Definitions. For the purposes of Sections 175 through 181, the following terms shall be defined as below. ()

a. Baseline actual emissions. As defined in Section 007. ()

b. Design concentration. The ambient concentration used in establishing the FEC. ()

c. Facility emissions cap (FEC). A facility-wide emission limitation expressed in tons per year, for any criteria pollutant or hazardous air pollutant established in accordance with Sections 176 through 181. A FEC is calculated using baseline actual emissions plus an operational variability component and a growth component. A FEC, which is defined in tons per year on a twelve (12) month rolling basis, must be set below major facility thresholds as defined in Sections 204 and 205. ()

- d. FEC pollutant. The pollutant for which a FEC is established. ()
- e. Growth component. The level of emissions requested by the applicant and approved by the Department to allow for potential future business growth or facility changes that may increase emissions above baseline actual emissions plus the operational variability component. ()
- f. Operational variability component. The level of emissions up to the significant emission rate (SER) minus one (1) ton per year but no more than the facility's potential to emit (PTE). If the proposed FEC pollutant does not have a SER listed in Section 006 or has a SER less than or equal to ten (10) tons per year, the operational variability component is the level of emissions requested by the applicant and approved by the Department. The operational variability component cannot be more than the facility's PTE. ()

177. APPLICATION PROCEDURES.

In addition to the information required pursuant to Sections 202 or 402, whichever is applicable, applications requesting a FEC must include the information required under Sections 176 through 181 and Subsections 177.01 through 177.03. ()

01. Estimates of Emissions. A proposed FEC for each pollutant requested by the facility, including the basis for calculating the FEC. ()

02. Estimates of Ambient Concentrations. ()

a. Estimates of ambient concentrations will be determined as described in Subsection 202.02. ()

b. Estimates of ambient concentrations may include projections of alternative future changes within the proposed FEC. ()

c. For a new, existing, or modified facility, a demonstration that for each FEC pollutant, the FEC will not cause or significantly contribute to a violation of any ambient air quality standard. ()

d. For renewal of terms and conditions establishing a FEC, it is presumed that the previous permitting analysis is satisfactory, unless the Department determines otherwise. ()

03. Monitoring and Recordkeeping. The application must include proposed means for the facility to determine facility emissions on a rolling twelve (12) month consecutive basis. ()

178. STANDARD CONTENTS OF PERMITS ESTABLISHING A FACILITY EMISSIONS CAP.

In addition to the elements required by Sections 203 and 211 or Sections 403 and 405, whichever is applicable, the Department shall have the authority to impose, implement and enforce the terms in Subsections 178.01 through 178.05 and conditions establishing a FEC. ()

01. Emission Limitations and Standards. All permits establishing use of a FEC shall contain annual facility wide emissions limitations for each FEC pollutant. ()

02. Monitoring. All permits establishing a FEC shall contain sufficient monitoring to ensure compliance with the FEC on a rolling twelve (12) month consecutive basis. ()

03. Recordkeeping. All permits establishing a FEC shall include the following: ()

a. Sufficient recordkeeping to assure compliance with the FEC. ()

b. Retention of required monitoring records and support information for a period of at least five (5) years from the date of the monitoring sample, measurement, report or application. Supporting information includes, but is not limited to, calibration and maintenance records and original strip-chart recordings for continuous monitoring instrumentation and copies of all reports required by the permit. ()

- 04. Reporting.** All permits establishing a FEC shall include the following: ()
- a.** Sufficient reporting to assure compliance with the permit establishing the FEC. ()
 - b.** Submittal of an annual report each year on or before the anniversary date of permit issuance. All required reports must be certified in accordance with Section 123. ()
- 05. Duration.** Each permit establishing a FEC shall state that the terms and conditions establishing the FEC are effective for a fixed term of five (5) years. ()

179. PROCEDURES FOR ISSUING PERMITS ESTABLISHING A FACILITY EMISSIONS CAP.

01. General Procedures. Procedures for issuing permits establishing a FEC will follow Sections 209 or 404, whichever is applicable. ()

02. Renewal. The renewal of the terms and conditions establishing a FEC are subject to the same procedural requirements for issuing permits (Subsection 179.01) and Subsections 179.02.a. through 179.02.d.: ()

a. The permittee shall submit a complete application to the Department for a renewal of the terms and conditions establishing the FEC at least six (6) months before, but no earlier than eighteen (18) months before, the expiration date of the existing permit. To ensure that the term of the permit does not expire before the terms and conditions are renewed, the permittee is encouraged to submit the application nine (9) months prior to expiration. ()

b. If a timely and complete application for a renewal of the terms and conditions establishing the FEC is submitted, but the Department fails to issue or deny the renewal permit before the end of the term of the previous permit, then all the terms and conditions of the previous permit shall remain in effect until the renewal permit has been issued or denied. ()

c. Expiration of the terms and conditions establishing a FEC may be grounds to terminate the facility's right to operate pursuant to Sections 176 through 181, unless a timely and complete renewal application has been submitted. ()

d. On renewal, the Department may adjust a FEC with an unused growth component in accordance with the Idaho Environmental Protection and Health Act, Chapter 1, Title 39, Idaho Code, and these rules. ()

03. Reopening the FEC. The Department may reopen a FEC to: ()

a. Reduce the FEC to reflect newly applicable federal requirements (for example, NSPS) with compliance dates after the issuance of the permit establishing the FEC. ()

b. Reduce the FEC consistent with any other requirement that is enforceable as a practical matter, and that the state may impose on the facility under the Idaho Environmental Protection and Health Act, Chapter 1, Title 39, Idaho Code, and these rules. ()

04. FEC Termination. The Director may approve a revision of a permit establishing a FEC to terminate the FEC, provided the permittee complies with Subsections 209.04 or 404.04, as applicable, and Subsections 179.04.a. through 179.04.c.: ()

a. The permittee may request a revision of the permit establishing the FEC to terminate the FEC at anytime prior to the expiration of the permit. The permittee is encouraged to submit an application for a permit to construct or Tier I operating permit, as applicable, six (6) months prior to the time the permittee wishes to terminate the FEC. ()

b. The FEC established in the permit shall remain in effect until the Department issues a new permit to construct or Tier I operating permit, as applicable. ()

c. Nothing in Section 179 prohibits a permittee from requesting a permit revision to terminate the FEC during the permit renewal process. ()

180. REVISIONS TO PERMITS ESTABLISHING A FACILITY EMISSIONS CAP.

Section 180 requires revisions to terms and conditions establishing a FEC. The permittee is exempt from Sections 200 through 228 unless the permittee chooses to use those rules to process any change to the permit, except as provided in Subsection 180.02. ()

01. Criteria. A permit revision is required for the following: ()

a. A change to existing monitoring, reporting or recordkeeping requirements in the permit establishing the FEC; ()

b. A change to the FEC; or ()

c. A change to the facility that would impose new requirements not included in the permit establishing the FEC. ()

02. Permit Revision Application Procedures. A permittee may initiate a permit revision by submitting a permit revision application to the Department or by complying with other applicable sections (Sections 200 or 400). For revision of terms and conditions establishing the FEC, it is presumed that the previous permitting analysis is satisfactory unless the Department determines otherwise. A permit revision application shall: ()

a. Meet the standard application requirements of Section 177; ()

b. Describe the proposed permit revision; ()

c. Describe and quantify the change in emissions above the FEC permit limit; and ()

d. Identify new requirements resulting from the change. ()

03. Permit Revisions. The Department will process permit revisions pursuant to Section 209 or Section 404. ()

181. NOTICE AND RECORD-KEEPING OF ESTIMATES OF AMBIENT CONCENTRATIONS.

Section 181 authorizes facility changes that comply with the terms and conditions establishing the FEC, but that are not included in the estimate of ambient concentration analysis approved for the permit establishing the FEC. No permit revision shall be required for facility changes implemented in accordance with Section 181. ()

01. Notice. For facility changes that comply with the terms and conditions establishing the FEC, but are not included in the estimate of ambient concentration analysis approved for the permit establishing the FEC, the permittee shall review the estimate of ambient concentration analysis. ()

a. In the event that the facility change would result in a significant contribution above the design concentration determined by the estimate of ambient concentration analysis approved for the permit establishing the FEC, but does not cause or significantly contribute to a violation to any ambient air quality standard, the permittee shall provide notice to the Department in accordance with Subsection 181.01.b. ()

b. Notice procedures. The permittee may make a facility change under Section 181 if the permittee provides written notification to the Department so that the notification is received at least seven (7) days in advance of the proposed change or, in the event of an emergency, the permittee provides the notification so that it is received at least twenty-four (24) hours in advance of the proposed change. For each such change, the written notification shall: ()

i. Describe the proposed change; ()

- ii. Describe and quantify expected emissions; and ()
- iii. Provide the estimated ambient concentration analysis. ()

02. Recordkeeping. For facility changes that comply with the terms and conditions establishing the FEC, but are not included in the estimate of ambient concentration analysis approved for the permit establishing the FEC, the permittee shall review the estimate of ambient concentration analysis. In the event the facility change would not result in a significant contribution above the design concentration determined by the estimate of ambient concentration analysis approved for the permit establishing the FEC, the permittee shall record and maintain documentation on-site of the review. ()

03. Estimates of Ambient Concentrations. Estimates of ambient concentrations shall be determined during the term of this permit using the same model and model parameters as used with the estimate of ambient concentration analysis approved for the permit establishing the FEC. The permittee shall include any changes to the facility that are not included in the originally approved estimate of ambient concentration analysis. ()

182. -- 199. (RESERVED)

200. PROCEDURES AND REQUIREMENTS FOR PERMITS TO CONSTRUCT.

The purposes of Sections 200 through 228 is to establish uniform procedures and requirements for the issuance of "Permits to Construct." As used throughout Sections 200 through 228 and 578 through 581, major facility shall be defined as major stationary source in 40 CFR 52.21(b) and 40 CFR 51.165, incorporated by reference into these rules at Section 107, and major modification shall be defined as in 40 CFR 52.21(b) and 40 CFR 51.165, incorporated by reference into these rules at Section 107. These CFR sections have been codified in the electronic CFR which is available at www.ecfr.gov. ()

201. PERMIT TO CONSTRUCT REQUIRED.

No owner or operator may commence construction or modification of any stationary source, facility, major facility, or major modification without first obtaining a permit to construct from the Department which satisfies the requirements of Sections 200 through 228 unless the source is exempted in any of Sections 220 through 223, or the owner or operator complies with Section 213 and obtains the required permit to construct, or the owner or operator complies with Sections 175 through 181, or the source operates in accordance with all of the applicable provisions of a permit by rule. ()

202. APPLICATION PROCEDURES.

Application for a permit to construct must be made using forms furnished by the Department, or by other means prescribed by the Department. The application shall be certified by the responsible official in accordance with Section 123 and shall be accompanied by all information necessary to perform any analysis or make any determination required under Sections 200 through 228. ()

01. Required Information. Depending upon the proposed size and location of the new or modified stationary source or facility, the application for a permit to construct shall include all of the information required by one or more of the following provisions: ()

- a.** For any new or modified stationary source or facility: ()
 - i. Site information, plans, descriptions, specifications, and drawings showing the design of the stationary source, facility, or modification, the nature and amount of emissions (including secondary emissions), and the manner in which it will be operated and controlled. ()
 - ii. A schedule for construction of the stationary source, facility, or modification. ()
- b.** For any new major facility or major modification in a nonattainment area which would be major for the nonattainment regulated air pollutant(s): ()
 - i. A description of the system of continuous emission control proposed for the new major facility or ()

major modification, emission estimates, and other information as necessary to determine that the lowest achievable emission rate would be applied. ()

ii. A description of the emission offsets proposed for the new major facility or major modification, including information on the stationary sources, mobile sources, or facilities providing the offsets, emission estimates, and other information necessary to determine that a net air quality benefit would result. ()

iii. Certification that all other facilities in Idaho, owned or operated by (or under common ownership of) the proposed new major facility or major modification, are in compliance with all local, state or federal requirements or are on a schedule for compliance with such. ()

iv. An analysis of alternative sites, sizes, production processes, and environmental control techniques which demonstrates that the benefits of the proposed major facility or major modification significantly outweigh the environmental and social costs imposed as a result of its location, construction, or modification. ()

v. An analysis of the impairment to visibility of any federal Class I area, Class I area designated by the Department, or integral vista of any mandatory federal Class I area that the new major facility or major modification would impact (including the monitoring of visibility in any Class I area near the new major facility or major modification, if requested by the Department). ()

c. For any new major facility or major modification in an attainment or unclassifiable area for any regulated air pollutant. ()

i. A description of the system of continuous emission control proposed for the new major facility or major modification, emission estimates, and other information as necessary to determine that the best available control technology would be applied. ()

ii. An analysis of the effect on air quality by the new major facility or major modification, including meteorological and topographical data necessary to estimate such effects. ()

iii. An analysis of the effect on air quality projected for the area as a result of general commercial, residential, industrial, and other growth associated with the new major facility or major modification. ()

iv. A description of the nature, extent, and air quality effects of any or all general commercial, residential, industrial, and other growth which has occurred since August 7, 1977, in the area the new major facility or major modification would affect. ()

v. An analysis of the impairment to visibility, soils, and vegetation that would occur as a result of the new major facility or major modification and general commercial, residential, industrial, and other growth associated with establishment of the new major facility or major modification. The owner or operator need not provide an analysis of the impact on vegetation or soils having no significant commercial or recreational value. ()

vi. An analysis of the impairment to visibility of any federal Class I area, Class I area designated by the Department, or integral vista of any mandatory federal Class I area that the new major facility or major modification would affect. ()

vii. An analysis of the existing ambient air quality in the area that the new major facility or major modification would affect for each regulated air pollutant that a new major facility would emit in significant amounts or for which a major modification would result in a significant net emissions increase. ()

viii. Ambient analyses as specified in Subsections 202.01c.vii., 202.01c.ix., 202.01c.x., and 202.01c.xii., may not be required if the projected increases in ambient concentrations or existing ambient concentrations of a particular regulated air pollutant in any area that the new major facility or major modification would affect are less than the amounts listed under 40 CFR 52.21(i)(5)(i), or the regulated air pollutant is not listed therein. ()

ix. For any regulated air pollutant which has an ambient air quality standard, the analysis shall include

continuous air monitoring data, gathered over the year preceding the submittal of the application, unless the Department determines that a complete and adequate analysis can be accomplished with monitoring data gathered over a period shorter than one (1) year, but not less than four (4) months, which is adequate for determining whether the emissions of that regulated air pollutant would cause or contribute to a violation of the ambient air quality standard or any prevention of significant deterioration (PSD) increment. ()

x. For any regulated air pollutant which does not have an ambient air quality standard, the analysis shall contain such air quality monitoring data that the Department determines is necessary to assess ambient air quality for that air pollutant in any area that the emissions of that air pollutant would affect. ()

xi. If requested by the Department, monitoring of visibility in any Class I area the proposed new major facility or major modification would affect. ()

xii. Operation of monitoring stations shall meet the requirements of Appendix B to 40 CFR Part 58 or such other requirements as extensive as those set forth in Appendix B as may be approved by the Department. ()

02. Estimates of Ambient Concentrations. All estimates of ambient concentrations shall be based on the applicable air quality models, data bases, and other requirements specified in 40 CFR 51, Appendix W (Guideline on Air Quality Models). ()

a. Where an air quality model specified in the "Guideline on Air Quality Models," is inappropriate, the model may be modified or another model substituted, subject to written approval of the Administrator of the U.S. Environmental Protection Agency and public comment pursuant to Subsection 209.01.c.; provided that modifications and substitutions of models used for toxic air pollutants will be reviewed by the Department. ()

b. Methods like those outlined in the U.S. Environmental Protection Agency's "Interim Procedures for Evaluating Air Quality Models (Revised)" (September 1984) should be used to determine the comparability of air quality models. ()

03. Additional Information. Any additional information, plans, specifications, evidence or documents that the Department may require to make the determinations required under Sections 200 through 225 shall be furnished upon request. ()

203. PERMIT REQUIREMENTS FOR NEW AND MODIFIED STATIONARY SOURCES.
No permit to construct shall be granted for a new or modified stationary source unless the applicant shows to the satisfaction of the Department all of the following: ()

01. Emission Standards. The stationary source or modification would comply with all applicable local, state or federal emission standards. ()

02. NAAQS. The stationary source or modification would not cause or significantly contribute to a violation of any ambient air quality standard. ()

03. Toxic Air Pollutants. Using the methods provided in Section 210, the emissions of toxic air pollutants from the stationary source or modification would not injure or unreasonably affect human or animal life or vegetation as required by Section 161. Compliance with all applicable toxic air pollutant carcinogenic increments and toxic air pollutant non-carcinogenic increments will also demonstrate preconstruction compliance with Section 161 with regards to the pollutants listed in Sections 585 and 586. ()

204. PERMIT REQUIREMENTS FOR NEW MAJOR FACILITIES OR MAJOR MODIFICATIONS IN NONATTAINMENT AREAS.

New major facilities or major modifications proposed for location in a nonattainment area and which would be major for the nonattainment regulated air pollutant are considered nonattainment new source review (NSR) actions and are subject to the requirements in Section 204. Section 202 contains application requirements and Section 209 contains processing requirements for nonattainment NSR permitting actions. The intent of Section 204 is to incorporate the

federal nonattainment NSR rule requirements. ()

01. Incorporated Federal Program Requirements. Requirements contained in the following subparts of 40 CFR 51.165 are incorporated by reference into these rules at Section 107. Requirements contained in the following subparts of 40 CFR 52.21, are incorporated by reference at Section 107 of these rules. These CFR sections have been codified in the electronic CFR at www.ecfr.gov.

40 CFR Reference	40 CFR Reference Title
40 CFR 51.165(a)(1)	Definitions
40 CFR 51.165(a)(2)(ii) - 51.165(a)(3)	Applicability Provisions
40 CFR 51.165(a)(6)(i) - (v)	Applicability Provisions
40 CFR 52.21(aa)	Actual PALs

()

02. Additional Requirements. The applicant must demonstrate to the satisfaction of the Department the following: ()

a. LAER. Except as otherwise provided in Section 204, the new major facility or major modification would be operated at the lowest achievable emission rate (LAER) for the nonattainment regulated air pollutant, specifically: ()

i. A new major facility would meet the lowest achievable emission rate at each new emissions unit which emits the nonattainment regulated air pollutant; and ()

ii. A major modification would meet the lowest achievable emission rate at each new or modified emissions unit which has a net emissions increase of the nonattainment regulated air pollutant. ()

b. Required offsets. Allowable emissions from the new major facility or major modification are offset by reductions in actual emissions from stationary sources, facilities, and/or mobile sources in the nonattainment area so as to represent reasonable further progress. All offsetting emission reductions must satisfy the requirements for emission reduction credits (Section 460) and provide for a net air quality benefit which satisfies the requirements of Section 208. If the offsets are provided by other stationary sources or facilities, a permit to construct shall not be issued for the new major facility or major modification until the offsetting reductions are made enforceable through the issuance of operating permits. The new major facility or major modification may not commence operation, and an operating permit for the new major facility or major modification shall not be effective before the date the offsetting reductions are achieved. ()

c. Compliance status. All other sources in the State owned or operated by the applicant, or by any entity controlling, controlled by or under common control with such person, are in compliance with all applicable emission limitations and standards or subject to an enforceable compliance schedule. ()

d. Effect on visibility. The effect on visibility of any federal Class I area, Class I area designated by the Department, or integral vista of a mandatory Class I Federal Area, by the new major facility or major modification, is consistent with making reasonable progress toward the national visibility goal referred to in 40 CFR 51.300(a). The Department may take into account the costs of compliance, the time necessary for compliance, the energy and non-air quality environmental impacts of compliance and the useful life of the source. Any integral vista which the Federal Land Manager has not identified at least six (6) months prior to the submittal of a complete application, or which the Department determines was not identified in accordance with the criteria adopted pursuant to 40 CFR 51.304(a), may be exempted from Section 204 by the Department. ()

03. Nonmajor Requirements. If the proposed action meets the requirements of an exemption or exclusion under the provisions of 40 CFR 51.165 or 40 CFR 52.21 incorporated in Section 204, the nonmajor facility or stationary source permitting requirements of Sections 200 through 228 apply, including the exemptions in Sections

220 through 223. ()

205. PERMIT REQUIREMENTS FOR NEW MAJOR FACILITIES OR MAJOR MODIFICATIONS IN ATTAINMENT OR UNCLASSIFIABLE AREAS.

The prevention of significant deterioration (PSD) program is a construction permitting program for new major facilities and major modifications to existing major facilities located in areas in attainment or in areas that are unclassifiable for any criteria air pollutant. Section 202 contains application requirements and Section 209 contains processing requirements for PSD permit actions. The intent of Section 205 is to incorporate the federal PSD rule requirements. ()

01. Incorporated Federal Program Requirements. Requirements contained in the following subparts of 40 CFR 52.21 are incorporated by reference into these rules at Section 107. These CFR sections have been codified in the electronic CFR which is available at www.ecfr.gov.

40 CFR Reference	40 CFR Reference Title
40 CFR 52.21(a)(2)	Applicability Procedures
40 CFR 52.21(b)	Definitions
40 CFR 52.21(i)	Review of Major Stationary Sources and Major Modifications - Source Applicability and Exempting
40 CFR 52.21(j)	Control Technology Review
40 CFR 52.21(k)	Source Impact Analysis
40 CFR 52.21(r)	Source Obligation
40 CFR 52.21(v)	Innovative Control Technology
40 CFR 52.21(w)	Permit Rescission
40 CFR 52.21(aa)	Actual PALS

()

02. Effect on Visibility. The applicant must demonstrate that the effect on visibility of any federal Class I area, Class I area designated by the Department, or integral vista of a mandatory Class I Federal Area, by the new major facility or major modification, is consistent with making reasonable progress toward the national visibility goal referred to in 40 CFR 51.300(a). The Department may take into account the costs of compliance, the time necessary for compliance, the energy and non-air quality environmental impacts of compliance and the useful life of the source. Any integral vista which the Federal Land Manager has not identified at least six (6) months prior to the submittal of a complete application, or which the Department determines was not identified in accordance with the criteria adopted pursuant to 40 CFR 51.304(a), may be exempted from this requirement by the Department. ()

03. Exception to Incorporation by Reference of 40 CFR 52.21. Every use of the word Administrator in 40 CFR 52.21 means the Department except for the following: ()

a. In 40 CFR 52.21(b)(17), the definition of federally enforceable, Administrator means the EPA Administrator. ()

b. In 40 CFR 52.21(l)(2), air quality models, Administrator means the EPA Administrator. ()

c. In 40 CFR 52.21(b)(43), permit program approved by the Administrator, Administrator means the EPA Administrator. ()

d. In 40 CFR 52.21(b)(48)(ii)(c), MACT standard that is proposed or promulgated by the Administrator, Administrator means the EPA Administrator. ()

e. In 40 CFR 52.21(b)(50)(i), regulated NSR pollutant as defined by Administrator, Administrator means the EPA Administrator. ()

04. Nonmajor Requirements. If the proposed action meets the requirements of an exemption or exclusion under the provisions of 40 CFR 52.21 incorporated in Section 205, the nonmajor facility or stationary source permitting requirements of Sections 200 through 228 apply, including the exemptions in Sections 220 through 223. ()

206. OPTIONAL OFFSETS FOR PERMITS TO CONSTRUCT.

The owner or operator of any proposed new or modified stationary source, new major facility, or major modification, which cannot meet the requirements of Subsections 202.01.c.vi., 203.02, 203.03, 204.02.d., 205.01 (40 CFR 52.21(k)), and 209.02.b.vi., may propose the use of an emission offset in order to meet those requirements and thereby obtain a permit to construct. Any proposed emission offset must satisfy the requirements for emission reduction credits, Section 460, and demonstrate, through appropriate dispersion modeling, that the offset will reduce ambient concentrations sufficiently to meet the requirements at all modeled receptors which could not otherwise have met the requirements. ()

207. REQUIREMENTS FOR EMISSION REDUCTION CREDIT.

In order to be credited in a permit to construct, any emission reduction credit must satisfy the requirements of Section 460. ()

208. DEMONSTRATION OF NET AIR QUALITY BENEFIT.

The demonstration of net air quality benefit shall: ()

01. VOCs. For trades involving volatile organic compounds, show that total emissions are reduced for the air basin in which the stationary source or facility is located; ()

02. Other Regulated Air Pollutants. For trades involving any other regulated air pollutant, show through appropriate dispersion modeling that the trade will not cause an increase in ambient concentrations at any modeled receptor; ()

03. Mobile Sources. For trades involving mobile sources, show a reduction in the ambient impact of emissions upon air quality by obtaining sufficient emission reductions to, at a minimum, compensate for adverse ambient impact where the major facility or major modification would otherwise cause or significantly contribute to a violation of any national ambient air quality standard. ()

209. PROCEDURE FOR ISSUING PERMITS.

01. General Procedures. General procedures for permits to construct. ()

a. Within thirty (30) days after receipt of the application for a permit to construct, the Department shall determine whether the application is complete or whether more information must be submitted and shall notify the applicant of its findings in writing. ()

b. Within sixty (60) days after the application is determined to be complete the Department shall: ()

i. Upon written request of the applicant, provide a draft permit for applicant review. Agency action on the permit under this Section may be delayed if deemed necessary to respond to applicant comments. ()

ii. Notify the applicant in writing of the approval, conditional approval, or denial of the application if an opportunity for public comment is not required pursuant to Subsection 209.01.c. The Department shall set forth reasons for any denial; or ()

iii. Issue a proposed approval, proposed conditional approval, or proposed denial. ()

c. An opportunity for public comment will be provided on all applications requiring a permit to ()

construct. Public comment shall be provided on an application for any new major facility or major modification, any new facility or modification which would affect any Class I area, any application which uses fluid modeling or a field study to establish a good engineering practice stack height pursuant to Sections 510 through 516, any application which uses an interpollutant trade pursuant to Subsection 210.17, any application which the Director determines an opportunity for public comment should be provided, and any application upon which the applicant so requests. ()

i. The Department's proposed action, together with the information submitted by the applicant and the Department's analysis of the information, shall be made available to the public in at least one (1) location in the region in which the stationary source or facility is to be located. ()

ii. The availability of such materials shall be made known by notice published in a newspaper of general circulation in the county(ies) in which the stationary source or facility is to be located. ()

iii. A copy of such notice shall be sent to the applicant and to appropriate federal, state and local agencies. ()

iv. There shall be a thirty (30) day period after initial publication for comment on the Department's proposed action, such comment to be made in writing to the Department. ()

v. After consideration of comments and any additional information submitted during the comment period, and within forty-five (45) days after initial publication of the notice, or notice of public hearing if one is requested under Subsections 209.02.b.iv. or 209.02.a.ii., unless the Director deems that additional time is required to evaluate comments and information received, the Department shall notify the applicant in writing of approval, conditional approval, or denial of the permit. The Department shall set forth the reasons for any denial. ()

vi. All comments and additional information received during the comment period, together with the Department's final determination, shall be made available to the public at the same location as the preliminary determination. ()

d. A copy of each permit will be sent to the U.S. Environmental Protection Agency. ()

02. Additional Procedures for Specified Sources. ()

a. For any new major facility or major modification in an attainment or unclassifiable area for any regulated air pollutant. ()

i. The public notice issued pursuant to Subsection 209.01.c.ii. shall indicate the degree of increment consumption that is expected from the new major facility or major modification; and ()

ii. The public notice issued pursuant to Subsection 209.01.c.ii. shall indicate the opportunity for a public hearing for interested persons to appear and submit written or oral comments on the air quality effects of the new major facility or major modification, alternatives to it, the control technology required, and other appropriate considerations. All requests for public hearings during a comment period with an opportunity for a hearing must be requested in writing by interested persons within fourteen (14) days of the publication of the legal notice of the proposed permit to construct or within fourteen (14) days prior to the end of the comment period, whichever is later. ()

b. For any new major facility or major modification which would affect a federal Class I area or an integral vista of a mandatory federal Class I area. ()

i. If the Department is notified of the intent to apply for a permit to construct, it shall notify the appropriate Federal Land Manager within thirty (30) days; ()

ii. A copy of the permit application and all relevant information, including an analysis of the anticipated effects on visibility in any federal Class I area, shall be sent to the Administrator of the U.S. Environmental Protection Agency and the Federal Land Manager within thirty (30) days of receipt of a complete

application and at least sixty (60) days prior to any public hearing on the application; ()

iii. Notice of every action related to the consideration of the permit shall be sent to the Administrator of the U.S. Environmental Protection Agency; ()

iv. The public notice issued pursuant to Subsection 209.01.c.ii. shall indicate the opportunity for a public hearing for interested persons to appear and submit written or oral comments on the air quality effect of the new major facility or major modification, alternatives to it, the control technology required, and other appropriate considerations. All requests for public hearings during a comment period with an opportunity for a hearing must be requested in writing by interested persons within fourteen (14) days of the publication of the legal notice of the proposed permit to construct or within fourteen (14) days prior to the end of the comment period, whichever is later. ()

v. The notice of public hearing, if required, shall explain any differences between the Department's preliminary determination and any visibility analysis performed by the Federal Land Manager and provided to the Department within thirty (30) days of the notification pursuant to Subsection 209.02.b.ii. ()

vi. Upon a sufficient showing by the Federal Land Manager that a proposed new major facility or major modification will have an adverse impact upon the air quality related values (including visibility) of any federal mandatory Class I area, the Director may deny the application notwithstanding the fact that the concentrations of regulated air pollutants would not exceed the maximum allowable increases for a Class I area. ()

03. Establishing a Good Engineering Stack Height. The Department will notify the public of the availability of any fluid model or field study used to establish a good engineering practice stack height and provide an opportunity for a public hearing before issuing a permit or setting an emission standard based thereon. ()

04. Revisions of Permits to Construct. The Director may approve a revision of any permit to construct provided the stationary source or facility continues to meet all applicable requirements of Sections 200 through 228. Revised permits will be issued pursuant to procedures for issuing permits (Section 209), except that the requirements of Subsections 209.01.c., 209.02.a., and 209.02.b., shall only apply if the permit revision results in an increase in emissions authorized by the permit or if deemed appropriate by the Director. ()

05. Permit to Construct Procedures for Tier I Sources. For Tier I sources that require a permit to construct, the owner or operator shall either: ()

a. Submit only the information required by Sections 200 through 219 for a permit to construct, in which case: ()

i. A permit to construct or denial will be issued in accordance with Subsections 209.01.a. and 209.01.b. ()

ii. The owner or operator may construct the source after permit to construct issuance or in accordance with Subsection 213.02.c. ()

iii. The owner or operator may operate the source after permit to construct issuance so long as it does not violate any terms or conditions of the existing Tier I operating permit and complies with Subsection 380.02. ()

iv. Unless a different time is prescribed by these rules, the applicable requirements contained in a permit to construct will be incorporated into the Tier I operating permit during renewal (Section 369). Where an existing Tier I permit would prohibit such construction or change in operation, the source must obtain a permit revision before commencing operation. Tier I sources required to meet the requirements under Section 112(g) of the Clean Air Act (Section 214), or to have a permit under the preconstruction review program approved into the applicable implementation plan under Part C (Section 205) or Part D (Section 204) of Title I of the Clean Air Act, shall file a complete application to obtain a Tier I permit revision within twelve (12) months after commencing operation. ()

- v. The application or minor or significant permit modification request shall be processed in accordance with timelines: Section 361 and Subsections 367.02 through 367.05. ()
- vi. The final Tier I operating permit action shall incorporate the relevant terms and conditions from the permit to construct; or ()
- b.** Submit all information required by Sections 200 through 219 for a permit to construct and Sections 300 through 386 for a Tier I operating permit, or Tier I operating permit modification, in which case: ()
- i. Completeness of the application shall be determined within thirty (30) days. ()
- ii. The Department shall prepare a proposed permit to construct or denial in accordance with Sections 200 through 219 and a draft Tier I operating permit or Tier I operating permit modification in accordance with Sections 300 through 386 within sixty (60) days. ()
- iii. The Department shall provide for public comment and affected state review in accordance with Sections 209, 364 and 365 on the proposed permit to construct or denial and draft Tier I operating permit or Tier I operating permit modification. ()
- iv. Except as otherwise provided by these rules, the Department shall prepare and issue to the owner or operator a final permit to construct or denial within fifteen (15) days of the close of the public comment period. The owner or operator may construct the source after permit to construct issuance or in accordance with Subsection 213.02.c. ()
- v. The final permit to construct will be sent to EPA, along with the proposed Tier I operating permit or modification. The proposed Tier I operating permit or modification shall be sent for review in accordance with Section 366. ()
- vi. The Tier I operating permit, or Tier I operating permit modification, will be issued in accordance with Section 367. The owner or operator may operate the source after permit to construct issuance so long as it does not violate any terms or conditions of the existing Tier I operating permit and complies with Subsection 380.02; or ()
- c.** Submit all information required by Sections 200 through 219 for a permit to construct and Sections 300 through 381 for a Tier I operating permit, or Tier I operating permit modification, in which case: ()
- i. Completeness of the application shall be determined within thirty (30) days. ()
- ii. The Department shall prepare a draft permit to construct or denial in accordance with Sections 200 through 219 and that also meets the requirements of Sections 300 through 381 within sixty (60) days. ()
- iii. The Department shall provide for public comment and affected state review in accordance with Sections 209, 364, and 365 on the draft permit to construct or denial. ()
- iv. The Department shall prepare and send a proposed permit to construct or denial to EPA for review in accordance with Section 366. EPA review of the proposed permit to construct or denial in accordance with Section 366 can occur concurrently with public comment and affected state review of the draft permit, as provided in Subsection 209.05.c.iii. above, except that if the draft permit or denial is revised in response to public comment or affected state review, the Department must send the revised proposed permit to construct or denial to EPA for review in accordance with Section 366. ()
- v. Except as otherwise provided by these rules, the Department shall prepare and issue to the owner or operator a final permit to construct or denial in accordance with Section 367. The owner or operator may construct the source after permit to construct issuance or in accordance with Subsection 213.02.c. ()
- vi. The permittee may, at any time after issuance, request that the permit to construct requirements be incorporated into the Tier I operating permit through an administrative amendment in accordance with Section 381.

The owner or operator may operate the source or modification upon submittal of the request for an administrative amendment. ()

06. Transfer of Permits to Construct. ()

a. Transfers by Revision. A permit to construct may be transferred to a new owner or operator in accordance with Subsection 209.04. ()

b. Automatic Transfers. Any permit to construct, with or without transfer prohibition language, may be automatically transferred if: ()

i. The current permittee notifies the Department at least thirty (30) days in advance of the proposed transfer date; ()

ii. The notice provides written documentation signed by the current and proposed permittees containing a date for transfer of permit responsibility, designation of the proposed permittee's responsible official, and certification that the proposed permittee has reviewed and intends to operate in accordance with the permit terms and conditions; and ()

iii. The Department does not notify the current permittee and the proposed permittee within thirty (30) days of receipt of the notice of the Department's determination that the permit must be revised pursuant to Subsection 209.04. If the Department does not issue such notice, the transfer is effective on the date provided in the notice described in Subsection 209.06.b.ii. ()

210. DEMONSTRATION OF PRECONSTRUCTION COMPLIANCE WITH TOXIC STANDARDS.

In accordance with Subsection 203.03, the applicant shall demonstrate preconstruction compliance with Section 161 to the satisfaction of the Department. The accuracy, completeness, execution and results of the demonstration are all subject to review and approval by the Department. ()

01. Identification of Toxic Air Pollutants. The applicant may use process knowledge, raw materials inputs, EPA and Department references and commonly available references approved by EPA or the Department to identify the toxic air pollutants emitted by the stationary source or modification. ()

02. Quantification of Emission Rates. ()

a. The applicant may use standard scientific and engineering principles and practices to estimate the emission rate of any toxic air pollutant at the point(s) of emission. ()

i. Screening engineering analyses use unrefined conservative data. ()

ii. Refined engineering analyses utilize refined and less conservative data including, but not limited to, emission factors requiring detailed input and actual emissions testing at a comparable emissions unit using EPA or Department approved methods. ()

b. The uncontrolled emissions rate of a toxic air pollutant from a source or modification is calculated using the maximum capacity of the source or modification under its physical and operational design without the effect of any physical or operational limitations. ()

i. Examples of physical and operational design include but are not limited to: the amount of time equipment operates during batch operations and the quantity of raw materials utilized in a batch process. ()

ii. Examples of physical or operational limitations include but are not limited to: shortened hours of operation, use of control equipment, and restrictions on production which are less than design capacity. ()

c. The controlled emissions rate of a toxic air pollutant from a source or modification is calculated using the maximum capacity of the source or modification under its physical and operational design with the effect of any physical or operational limitation that has been specifically described in a written and certified submission to the ()

Department. ()

d. The T-RACT emissions rate of a toxic air pollutant from a source or modification is calculated using the maximum capacity of the source or modification under its physical and operational design with the effect of: ()

i. Any physical or operational limitation other than control equipment that has been specifically described in a written and certified submission to the Department; and ()

ii. An emission standard that is T-RACT. ()

03. Quantification of Ambient Concentrations. ()

a. The applicant may use the modeling methods provided in Subsection 202.02 to estimate the ambient concentrations at specified receptor sites for any toxic air pollutant emitted from the point(s) of emission. ()

b. The point of compliance is the receptor site that is estimated to have the highest ambient concentration of the toxic air pollutant of all the receptor sites that are located either at or beyond the facility property boundary or at a point of public access; provided that, if the toxic air pollutant is listed in Section 586, the receptor site is not considered to be at a point of public access if the receptor site is located on or within a road, highway or other transportation corridor transecting the facility. ()

c. The uncontrolled ambient concentration of the source or modification is estimated by modeling the uncontrolled emission rate. ()

d. The controlled ambient concentration of the source or modification is estimated by modeling the controlled emission rate. ()

e. The approved net ambient concentration from a modification for a toxic air pollutant at each receptor is calculated by subtracting the estimated decreases in ambient concentrations for all sources at the facility contributing an approved creditable decrease at the receptor site from the estimated ambient concentration from the modification at the receptor. ()

f. The approved offset ambient concentration from a source or modification for a toxic air pollutant at each receptor is calculated by subtracting the estimated decreases in ambient concentrations for all sources contributing an approved offset at the receptor from the estimated ambient concentration for the source or modification at the receptor. ()

g. The T-RACT ambient concentration of the source or modification is estimated by using refined modeling and the T-RACT emission rate. ()

h. The approved interpollutant ambient concentration from a source or modification for a toxic air pollutant at each receptor is calculated as follows: ()

i. Step 1: Calculate the estimated decrease in ambient concentrations for each toxic air pollutant from each source contributing an approved interpollutant trade at the receptor by multiplying the approved interpollutant ratio by the overall decrease in the ambient concentration of the toxic air pollutant at the receptor site. ()

ii. Step 2: Calculate the total estimated decrease at the receptor by summing all of the individual estimated decreases calculated in Subsection 210.03.h.i. for that receptor. ()

iii. Step 3: Calculate the approved interpollutant ambient concentration by subtracting the total estimated decrease at the receptor from the estimated ambient concentration for the source or modification at the receptor. ()

04. Preconstruction Compliance Demonstration. The applicant may use any of the Department

approved standard methods described in Subsections 210.05 through 210.08, and may use any applicable specialized method described in Subsections 210.09 through 210.12 to demonstrate preconstruction compliance for each identified toxic air pollutant. ()

05. Uncontrolled Emissions. ()

a. Compare the source's or modification's uncontrolled emissions rate for the toxic air pollutant to the applicable screening emission level listed in Sections 585 or 586. ()

b. If the source's or modification's uncontrolled emission rate is less than or equal to the applicable screening emission level, no further procedures for demonstrating preconstruction compliance will be required for that toxic air pollutant as part of the application process. ()

06. Uncontrolled Ambient Concentration. ()

a. Compare the source's or modification's uncontrolled ambient concentration at the point of compliance for the toxic air pollutant to the applicable acceptable ambient concentration listed in Sections 585 or 586. ()

b. If the source's or modification's uncontrolled ambient concentration at the point of compliance is less than or equal to the applicable acceptable ambient concentration, no further procedures for demonstrating preconstruction compliance will be required for that toxic air pollutant as part of the application process. ()

07. Controlled Emissions. ()

a. Compare the source's or modification's controlled emissions rate for the toxic air pollutant to the applicable screening emission level listed in Sections 585 or 586. ()

b. If the source's or modification's controlled emission rate is less than or equal to the applicable screening emission level, no further procedure for demonstrating preconstruction compliance is required for that toxic air pollutant as part of the application process. ()

08. Controlled Ambient Concentration. ()

a. Compare the source's or modification's controlled ambient concentration at the point of compliance for the toxic air pollutant to the applicable acceptable ambient concentration listed in Sections 585 or 586. ()

b. If the source's or modification's controlled ambient concentration at the point of compliance is less than or equal to the applicable acceptable ambient concentration, no further procedures for demonstrating preconstruction compliance will be required for that toxic air pollutant as part of the application process. ()

c. The Department shall include an emission limit for the toxic air pollutant in the permit to construct that is equal to or, if requested by the applicant, less than the emission rate that was used in the modeling. ()

09. Net Emissions. ()

a. As provided in Section 007 (definition of net emissions increase) and Sections 460 and 461, the owner or operator may net emissions to demonstrate preconstruction compliance. ()

b. Compare the modification's approved net emissions increase (expressed as an emission rate) for the toxic air pollutant to the applicable screening emission level listed in Sections 585 or 586. ()

c. If the modification's approved net emissions increase is less than or equal to the applicable screening emission level, no further procedures for demonstrating preconstruction compliance will be required for that toxic air pollutant as part of the application process. ()

d. The Department shall include emission limits and other permit terms for the toxic air pollutant in

the permit to construct that assure that the facility will be operated in the manner described in the preconstruction compliance demonstration. ()

10. Net Ambient Concentration. ()

a. As provided in Section 007 (definition of net emission increase) and Sections 460 and 461, the owner or operator may net ambient concentrations to demonstrate preconstruction compliance. ()

b. Compare the modification's approved net ambient concentration at the point of compliance for the toxic air pollutant to the applicable acceptable ambient concentration listed in Sections 585 or 586. ()

c. If the modification's approved net ambient concentration at the point of compliance is less than or equal to the applicable acceptable ambient concentration, no further procedures for demonstrating preconstruction compliance will be required for that toxic air pollutant as part of the application process. ()

d. The Department shall include emission limits and other permit terms for the toxic air pollutant in the permit to construct that assure that the facility will be operated in the manner described in the preconstruction compliance demonstration. ()

11. Toxic Air Pollutant Offset Ambient Concentration. ()

a. As provided in Sections 206 and 460, the owner or operator may use offsets to demonstrate preconstruction compliance. ()

b. Compare the source's or modification's approved offset ambient concentration at the point of compliance for the toxic air pollutant to the applicable acceptable ambient concentration listed in Sections 585 or 586. ()

c. If the source's or modification's approved offset ambient concentration at the point of compliance is less than or equal to the applicable acceptable ambient concentration, no further procedures for demonstrating preconstruction compliance will be required for that toxic air pollutant as part of the application process. ()

d. The Department shall include emission limits and other permit terms for the toxic air pollutant in the permit to construct that assure that the facility will be operated in the manner described in the preconstruction compliance demonstration. ()

12. T-RACT Ambient Concentration for Carcinogens. ()

a. As provided in Subsections 210.12 and 210.13, the owner or operator may use T-RACT to demonstrate preconstruction compliance for toxic air pollutants listed in Section 586. ()

i. This method may be used in conjunction with netting (Subsection 210.09), and offsets (Subsection 210.11). ()

ii. This method is not to be used to demonstrate preconstruction compliance for toxic air pollutants listed in Section 585. ()

b. Compare the source's or modification's approved T-RACT ambient concentration at the point of compliance for the toxic air pollutant to the amount of the toxic air pollutant that would contribute an ambient air cancer risk probability of less than one to one hundred thousand (1:100,000) (which amount is equivalent to ten (10) times the applicable acceptable ambient concentration listed in Section 586). ()

c. If the source's or modification's approved T-RACT ambient concentration at the point of compliance is less than or equal to the amount of the toxic air pollutant that would contribute an ambient air cancer risk probability of less than one to one hundred thousand (1:100,000), no further procedures for demonstrating preconstruction compliance will be required for that toxic air pollutant as part of the application process. ()

d. The Department shall include emission limits and other permit terms for the toxic air pollutant in the permit to construct that assure that the facility will be operated in the manner described in the preconstruction compliance demonstration. ()

13. T-RACT Determination Processing. ()

a. The applicant may submit all information necessary to the demonstration at the time the applicant submits the complete initial application or the applicant may request the Department to review a complete initial application to determine if Subsection 210.12 may be applicable to the source or modification. ()

b. Notwithstanding Subsections 209.01.a. and 209.01.b., if the applicant requests the Department to review a complete initial application and Subsection 210.12 is determined to be applicable, the completeness determination for the initial application will be revoked until a supplemental application is submitted and determined complete. When the supplemental application is determined complete, the timeline for agency action shall be reinitiated. ()

14. T-RACT Determination. T-RACT shall be determined on a case-by-case basis by the Department as follows: ()

a. The applicant shall submit information to the Department identifying and documenting which control technologies or other requirements the applicant believes to be T-RACT. ()

b. The Department shall review the information submitted by the applicant and determine whether the applicant has proposed T-RACT. ()

c. The technological feasibility of a control technology or other requirements for a particular source shall be determined considering several factors including, but not limited to: ()

i. Process and operating procedures, raw materials and physical plant layout. ()

ii. The environmental impacts caused by the control technology that cannot be mitigated, including, but not limited to, water pollution and the production of solid wastes. ()

iii. The energy requirements of the control technology. ()

d. The economic feasibility of a control technology or other requirement, including the costs of necessary mitigation measures, for a particular source shall be determined considering several factors including, but not limited to: ()

i. Capital costs. ()

ii. Cost effectiveness, which is the annualized cost of the control technology divided by the amount of emission reduction. ()

iii. The difference in costs between the particular source and other similar sources, if any, that have implemented emissions reductions. ()

e. If the Department determines that the applicant has proposed T-RACT, the Department shall determine which of the options, or combination of options, will result in the lowest emission of toxic air pollutants, develop the emission standards constituting T-RACT and incorporate the emission standards into the permit to construct. ()

f. If the Department determines that the applicant has not proposed T-RACT, the Department shall disapprove the submittal. If the submittal is disapproved, the applicant may supplement its submittal or demonstrate preconstruction compliance through a different method provided in Section 210. If the applicant does not supplement its submittal or demonstrate preconstruction compliance through a different method provided in Section 210, the Department shall deny the permit. ()

15. Short Term Source Factor. For short term sources, the applicant may utilize a short term adjustment factor of ten (10). For a carcinogen, multiply either the applicable acceptable ambient concentration (AACC) or the screening emission rate, but not both, by ten (10), to demonstrate preconstruction compliance. This method may be used for TAPs listed in Section 586 only and may be utilized in conjunction with standard methods for quantification of emission rates (Subsections 210.05 through 210.08). ()

16. Environmental Remediation Source. ()

a. For Remediation sources subject to or regulated by the Resource Conservation and Recovery Act (42 U.S.C. Sections 6901-6992k) and the "Idaho Rules and Standards for Hazardous Waste," (IDAPA 58.01.05.000 et seq.) or the Comprehensive Environmental Response, Compensation and Liability Act (42 U.S.C. 6901-6992k) or a consent order, if the estimated ambient concentration at the point of impact is greater than the acceptable ambient impacts listed in Sections 585 and 586, Best Available Control Technology shall be applied and operated until the estimated uncontrolled emissions from the remediation source are below the acceptable ambient concentration. ()

b. For Remediation sources not subject to or regulated by the Resource Conservation and Recovery Act (42 U.S.C. Sections 6901-6992k) and the "Idaho Rules and Standards for Hazardous Waste," (IDAPA 58.01.05.000 et seq.) or the Comprehensive Environmental Response, Compensation and Liability Act (42 U.S.C. 6901-6992k) or a consent order, shall, for the purposes of these rules, be considered the same as any other new or modified source of toxic air pollution. ()

c. For an environmental remediation source that functions to remediate or recover any release, spill, leak, discharge or disposal of any petroleum product or petroleum substance, the Department may waive the requirements of Section 513 of these rules. ()

17. Interpollutant Trading Ambient Concentration. ()

a. As provided in Subsections 209.01.c., 210.17 through 210.19, the owner or operator may use interpollutant trading to demonstrate preconstruction compliance. This method may be used in conjunction with netting (Subsection 210.10), and offsets (Subsection 210.11) ()

b. Compare the source's or modification's approved interpollutant ambient concentration at the point of compliance for the toxic air pollutant emitted by the source or modification to the applicable acceptable ambient concentration listed in Sections 585 or 586. ()

c. If the source's or modification's approved interpollutant ambient concentration at the point of compliance is less than or equal to the applicable acceptable ambient concentration listed in Sections 585 or 586, no further procedures for demonstrating preconstruction compliance will be required for that toxic air pollutant as part of the application process. ()

d. The Department shall include emission limits for all of the toxic air pollutants involved in the trade in the permit to construct. The Department shall also include other permit terms in the permit to construct that assure that the facility will be operated in the manner described in the preconstruction compliance demonstration. ()

18. Interpollutant Trading Determination Processing. ()

a. The applicant may submit all information necessary to the demonstration at the time the applicant submits the complete initial application or the applicant may request the Department to review a complete initial application to determine if Subsection 210.17 may be applicable to the source or modification. ()

b. Notwithstanding Subsections 209.01.a. and 209.01.b., if the applicant requests the Department to review a complete initial application and Subsection 210.17 is determined to be applicable, the completeness determination for the initial application will be revoked until a supplemental application is submitted and determined complete. When the supplemental application is determined complete, the timeline for agency action shall be reinitiated. ()

- 19. Interpollutant Determination.** ()
- a.** The applicant may request an interpollutant trade if the Department determines that: ()
- i.** The facility complies with an emission standard at least as stringent as best available control technology (BACT); and ()
- ii.** The owner or operator has instituted all known and available methods of pollution prevention at the facility to reduce, avoid or eliminate toxic air pollution prior to its generation including, but not limited to, recycling, chemical substitution, and process modification provided that such pollution prevention methods are compatible with each other and the product or service being produced; and ()
- iii.** The owner or operator has taken all available offsets; and ()
- iv.** The owner or operator has identified all geographical areas and populations that may be impacted by the proposed interpollutant trade. ()
- b.** Interpollutant trades shall be approved or denied on a case-by-case basis by the Department. Denials shall be within the discretion of the Department. Approvals shall be granted only if: ()
- i.** The Department of Health and Welfare's Division of Health approves the interpollutant trade; and ()
- ii.** The Department of Environmental Quality determines that the interpollutant trade will result in a overall benefit to the environment; and ()
- iii.** An EPA approved database or other EPA approved reference provides relative potency factors, or comparable factors, or other data that is sufficient to allow for adequate review and approval of the proposed trade by the Department and the Department of Health and Welfare's Division of Health is submitted for all of the toxic air pollutants being traded; and ()
- iv.** The reductions occur at the same facility where the proposed source or modification will be constructed; and ()
- v.** The interpollutant trade will not cause an increase in sum of the ambient concentrations of the carcinogenic toxic air pollutants involved in the particular interpollutant trade at any receptor site; and ()
- vi.** The total cancer risk with the interpollutant trade will be less than the total cancer risk without the interpollutant trade; and ()
- vii.** The total non-cancer health risk with the interpollutant trade will be less than the total non-cancer health risk without the interpollutant trade. ()
- 20. NSPS and NESHAP Sources.** No demonstration of compliance with the toxic air pollutant provisions is required to obtain a permit to construct or to demonstrate permit to construct exemption criteria for a new source or for modification of an existing source if the toxic air pollutant is also a listed hazardous air pollutant from: ()
- a.** The equipment or activity covered by a NSPS or NESHAP; or ()
- b.** The source category of equipment or activity addressed by a NSPS or NESHAP even if the equipment or activity is not subject to compliance requirements under the federal rule. ()
- 21. Permit Compliance Demonstration.** Additional procedures and requirements to demonstrate and ensure actual and continuing compliance may be required by the Department in the permit to construct. ()
- 22. Interpretation and Implementation of Other Sections.** Except as specifically provided in other

sections of these rules, the provisions of Section 210 are not to be utilized in the interpretation or implementation of any other section of these rules. ()

211. CONDITIONS FOR PERMITS TO CONSTRUCT.

01. Reasonable Conditions. The Department may impose any reasonable conditions upon an approval, including conditions requiring the stationary source or facility to be provided with: ()

a. Sampling ports of a size, number, and location as the Department may require; ()

b. Safe access to each port; ()

c. Instrumentation to monitor and record emissions data; ()

d. Instrumentation for ambient monitoring to determine the effect emissions from the stationary source or facility may have, or are having, on the air quality in any area affected by the stationary source or facility; and ()

e. Any other sampling and testing facilities as may be deemed reasonably necessary. ()

02. Cancellation. The Department may cancel a permit to construct if the construction is not begun within two (2) years from the date of issuance, or if during the construction, work is suspended for one (1) year. ()

03. Notification to The Department. Any owner or operator of a stationary source or facility subject to a permit to construct shall furnish the Department written notifications as follows: ()

a. A notification of the anticipated date of initial start-up of the stationary source or facility not more than sixty (60) days or less than thirty (30) days prior to such date; and ()

b. A notification of the actual date of initial start-up of the stationary source or facility within fifteen (15) days after such date. ()

04. Performance Test. Within sixty (60) days after achieving the maximum production rate at which the stationary source or facility will be operated but not later than one hundred eighty (180) days after initial start-up of such stationary source or facility, the owner or operator of such stationary source or facility may be required to conduct a performance test in accordance with methods and under operating conditions approved by the Department and furnish the Department a written report of the results of such performance test. ()

a. Such test shall be at the expense of the owner or operator. ()

b. The Department may monitor such test and may also conduct performance tests. ()

c. The owner or operator of a stationary source or facility shall provide the Department fifteen (15) days prior notice of the performance test to afford the Department the opportunity to have an observer present. ()

212. OBLIGATION TO COMPLY.

01. Responsibility to Comply with All Requirements. Receiving a permit to construct shall not relieve any owner or operator of the responsibility to comply with all applicable local, state and federal statutes, rules and regulations. ()

02. Relaxation of Standards or Restrictions. At such time that a particular facility or modification becomes a major facility or major modification solely by virtue of a relaxation in any enforceable emission standard or restriction on the operating rate, hours of operation or on the type or amount of material combusted, stored or processed, which was used to exempt the facility or modification from certain requirements for a permit to construct,

the requirements for new major facilities or major modifications shall apply to the facility or modification as though construction had not yet commenced. ()

213. PRE-PERMIT CONSTRUCTION.

This section describes how owners or operators may commence construction or modification of certain stationary sources before obtaining the required permit to construct. ()

01. Pre-Permit Construction Eligibility. Pre-permit construction approval is available for non-major sources and non-major modifications and for new sources or modifications proposed in accordance with Subsection 213.01.d. Pre-permit construction is not available for any new source or modification that: uses emissions netting to stay below major source levels; uses optional offsets pursuant to Section 206; or would have an adverse impact on the air quality related values of any Class I area. Owners or operators may ask the Department for the ability to commence construction or modification of qualifying sources under Section 213 before receiving the required permit to construct. To obtain the Department's pre-permit construction approval, the owner or operator shall satisfy the following requirements: ()

a. The owner or operator shall apply for a permit to construct in accordance with Subsections 202.01.a., 202.02, and 202.03 of this chapter. ()

b. The owner or operator shall consult with Department representatives prior to submitting a pre-permit construction approval application. ()

c. The owner or operator shall submit a pre-permit construction approval application which must contain, but not be limited to: a letter requesting the ability to construct before obtaining the required permit to construct, a copy of the notice referenced in Subsection 213.02; proof of eligibility; process description(s); equipment list(s); proposed emission limits and modeled ambient concentrations for all regulated air pollutants and toxic air pollutants, such that they demonstrate compliance with all applicable air quality rules and regulations. The models shall be conducted in accordance with Subsection 202.02 and with written Department approved protocol and submitted with sufficient detail so that modeling can be duplicated by the Department. ()

d. Owners or operators seeking limitations on a source's potential to emit such that permitted emissions will be either below major source levels or below a significant increase must describe in detail in the pre-permit construction application the proposed restrictions and certify in accordance with Section 123 that they will comply with the restrictions, including any applicable monitoring and reporting requirements. ()

02. Permit to Construct Procedures for Pre-Permit Construction. ()

a. Within ten (10) days after the submittal of the pre-permit construction approval application, the owner or operator shall hold an informational meeting in at least one (1) location in the region in which the stationary source or facility is to be located. The informational meeting shall be made known by notice published at least ten (10) days before the meeting in a newspaper of general circulation in the county(ies) in which the stationary source or facility is to be located. A copy of such notice shall be included in the application. ()

b. Within fifteen (15) days after the receipt of the pre-permit construction approval application, the Department shall notify the owner or operator in writing of pre-permit construction approval or denial. The Department may deny the pre-permit construction approval application for any reason it deems valid. ()

c. Upon receipt of the pre-permit construction approval letter issued by the Department, the owner or operator may begin construction at their own risk as identified in Subsection 213.02.d. Upon issuance of the pre-permit construction approval letter, any and all potential to emit limitations addressed in the pre-permit construction application pursuant to Subsection 213.01.d. shall become enforceable. The owner or operator shall not operate those emissions units subject to permit to construct requirements in accordance with Section 200 unless and until issued a permit pursuant to Section 209. ()

d. If the pre-permit construction approval application is determined incomplete or the permit to construct is denied, the Department shall issue an incompleteness or denial letter pursuant to Section 209. If the Department denies the permit to construct, then the owner or operator shall have violated Section 201 on the date it

commenced construction as defined in Section 006. The owner or operator shall not contest the final permit to construct decision based on the fact that they have already begun construction. ()

214. DEMONSTRATION OF PRECONSTRUCTION COMPLIANCE FOR NEW AND RECONSTRUCTED MAJOR SOURCES OF HAZARDOUS AIR POLLUTANTS.

01. Permitting Authority. For purposes of this section, Sections 112(g) and (j) of the Clean Air Act, and 40 CFR Part 63, the permitting authority shall be the Department. ()

02. Definitions. Unless specifically provided otherwise, the definitions for terms set forth in this section shall be the definitions set forth in Section 112 of the Clean Air Act and 40 CFR Part 63 as incorporated by reference into these rules at Section 107. For purposes of determining if a source is a major source of hazardous air pollutants, the definition of potential to emit at Section 006 of these rules shall apply. ()

03. Compliance with Federal MACT. All owners or operators of major sources of hazardous air pollutants which are subject to an applicable Maximum Available Control Technology (MACT) standard promulgated by EPA pursuant to Section 112 of the Clean Air Act and 40 CFR Part 63 shall comply with the applicable MACT standard and such owners or operators are not subject to Subsections 214.04 and 214.05. ()

04. Requirement to Obtain Preconstruction MACT Determination from the Director. No owner or operator may construct or reconstruct a major source of hazardous air pollutants unless such owner or operator has obtained a MACT standard determination from the Director. The Director shall make the MACT standard determination on a case by case basis and in accordance with Section 112(g)(2)(B) of the Clean Air Act and 40 CFR 63.40 through 63.44 as incorporated by reference into these rules at Section 107. ()

05. Development of MACT by the Director After EPA Deadline. In the event that EPA fails to promulgate a MACT standard for a category or subcategory of major sources of hazardous air pollutants identified by the EPA under the Clean Air Act by the date established under Section 112(e) of the Clean Air Act, the owner or operator of any major source of hazardous air pollutants in such category or subcategory shall submit an application to the Director for a MACT standard determination. The Director shall make the MACT standard determination on a case by case basis and in accordance with Section 112(j) of the Clean Air Act and 40 CFR 63.50 through 63.56 as incorporated by reference into these rules at Section 107. ()

215. MERCURY EMISSION STANDARD FOR NEW OR MODIFIED SOURCES.

No owner or operator may commence construction or modification of a stationary source or facility that results in an increase in annual potential emissions of mercury of twenty-five (25) pounds or more unless the owner or operator has obtained a permit to construct under Sections 200 through 228 of these rules. The permit to construct application shall include an MBACT analysis for the new or modified source or sources for review and approval by the Department. A determination of applicability under Section 215 shall be based upon the best available information. Fugitive emissions shall not be included in a determination of applicability under Section 215. ()

01. Exemptions. New or modified stationary sources within a source category subject to 40 CFR Part 63 are exempt from the requirements of Section 215. ()

02. Applicability. Except as provided in Subsection 215.01, Section 215 applies to all new or modified sources for which an application for a permit to construct was submitted to the Department on or after July 1, 2011. ()

216. -- 219. (RESERVED)

220. GENERAL EXEMPTION CRITERIA FOR PERMIT TO CONSTRUCT EXEMPTIONS.

01. General Exemption Criteria. Sections 220 through 223 may be used by owners or operators to exempt certain sources from the requirement to obtain a permit to construct. Nothing in these sections shall preclude an owner or operator from choosing to obtain a permit to construct. For purposes of Sections 220 through 223, the term source means the equipment or activity being exempted. For purposes of Sections 220 through 223, fugitive emissions shall not be considered in determining whether a source meets the applicable exemption criteria unless

required by federal law. No permit to construct is required for a source that satisfies all of the following criteria, in addition to the criteria set forth at Sections 221 and 223 or 222 and 223 (as required): ()

a. The maximum capacity of a source to emit an air pollutant under its physical and operational design without consideration of limitations on emission such as air pollution control equipment, restrictions on hours of operation and restrictions on the type and amount of material combusted, stored or processed would not: ()

i. Equal or exceed one hundred (100) tons per year of any regulated air pollutant. ()

ii. Cause an increase in the emissions of a major facility that equals or exceeds the significant emissions rates set out in the definition of significant at Section 006. ()

b. Combination. The source is not part of a proposed new major facility or part of a proposed major modification. ()

02. Record Retention. Unless the source is subject to and the owner or operator complies with Section 385, the owner or operator of the source, except for those sources listed in Subsections 222.02.a. through 222.02.g., shall maintain documentation on site which shall identify the exemption determined to apply to the source and verify that the source qualifies for the identified exemption. The records and documentation shall be kept for a period of time not less than five (5) years from the date the exemption determination has been made or for the life of the source for which the exemption has been determined to apply, which ever is greater, or until such time as a permit to construct or an operating permit is issued which covers the operation of the source. The owner or operator shall submit the documentation to the Department upon request. ()

221. CATEGORY I EXEMPTION.

No permit to construct is required for a source that satisfies the criteria set forth in Section 220 and the following: ()

01. Below Regulatory Concern. The maximum capacity of a source to emit an air pollutant under its physical and operational design considering limitations on emissions such as air pollution control equipment, restrictions on hours of operation and restrictions on the type and amount of material combusted, stored or processed shall be less than ten percent (10%) of the significant emission rates set out in the definition of significant at Section 006. ()

02. Radionuclides. The source is not required to obtain approval to construct in accordance with the applicable radionuclides standard in 40 CFR Part 61, Subpart H. ()

03. Toxic Air Pollutants. The source shall comply with Section 223. ()

04. Mercury. The source shall have potential emissions that are less than twenty-five (25) pounds per year of mercury. Fugitive emissions shall not be included in the calculation of potential mercury emissions. ()

222. CATEGORY II EXEMPTION.

No permit to construct is required for the following sources. ()

01. Exempt Source. A source that satisfies the criteria set forth in Section 220 and that is specified below: ()

a. Laboratory equipment used exclusively for chemical and physical analyses, research or education, including, but not limited to, ventilating and exhaust systems for laboratory hoods. To qualify for this exemption, the source shall: ()

i. Comply with Section 223. ()

ii. Not be required to obtain approval to construct in accordance with the applicable radionuclides standard in 40 CFR Part 61, Subpart H. ()

b. Environmental characterization activities including emplacement and operation of field instruments, drilling of sampling and monitoring wells, sampling activities, and environmental characterization activities. ()

c. Stationary internal combustion engines of less than or equal to six hundred (600) horsepower and which are fueled by natural gas, propane gas, liquefied petroleum gas, distillate fuel oils, residual fuel oils, and diesel fuel; waste oil, gasoline, or refined gasoline shall not be used. To qualify for this exemption, the source must be operated in accordance with the following: ()

i. One hundred (100) horsepower or less -- unlimited hours of operation. ()

ii. One hundred one (101) to two hundred (200) horsepower -- less than four hundred fifty (450) hours per month. ()

iii. Two hundred one (201) to four hundred (400) horsepower -- less than two hundred twenty-five (225) hours per month. ()

iv. Four hundred one (401) to six hundred (600) horsepower -- less than one hundred fifty (150) hours per month. ()

d. Stationary internal combustion engines used exclusively for emergency purposes which are operated less than five hundred (500) hours per year and are fueled by natural gas, propane gas, liquefied petroleum gas, distillate fuel oils, residual fuel oils, and diesel fuel; waste oil, gasoline, or refined gasoline shall not be used. ()

e. A pilot plant that uses a slip stream from an existing process stream not to exceed ten percent (10%) of that existing process stream and which satisfies the following: ()

i. The source shall comply with Section 223. For carcinogen emissions, the owner or operator may utilize a short term adjustment factor of ten (10) by multiplying either the acceptable ambient concentration or the screening emissions level, but not both, by ten (10). ()

ii. The source is not required to obtain approval to construct in accordance with the applicable radionuclides standard in 40 CFR Part 61, Subpart H. ()

iii. The exemption for a pilot plant shall terminate one (1) year after the commencement of operations and shall not be renewed. ()

02. Other Exempt Sources. A source that satisfies the criteria set forth in Section 220 and that is specified below: ()

a. Air conditioning or ventilating equipment not designed to remove air pollutants generated by or released from equipment. ()

b. Air pollutant detectors or recorders, combustion controllers, or combustion shutoffs. ()

c. Fuel burning equipment for indirect heating and for heating and reheating furnaces using natural gas, propane gas, liquefied petroleum gas, or biogas (gas produced by the anaerobic decomposition of organic material through a controlled process) with hydrogen sulfide concentrations less than two hundred (200) ppmv exclusively with a capacity of less than fifty (50) million btu's per hour input. ()

d. Other fuel burning equipment for indirect heating with a capacity of less than one million (1,000,000) btu's per hour input. ()

e. Mobile internal combustion engines, marine installations and locomotives. ()

f. Agricultural activities and services. ()

- g. Retail gasoline, natural gas, propane gas, liquefied petroleum gas, distillate fuel oils and diesel fuel sales. ()
- h. Used Oil Fired Space Heaters which comply with all the following requirements: ()
- i. The used oil fired space heater burns only used oil that the owner or operator generates on site, that is derived from households, such as used oil generated by individuals maintaining their personal vehicles, or on-specification used oil that is derived from commercial generators provided that the generator, transporter and owner or operator burning the oil for energy recovery comply fully with IDAPA 58.01.05.015, "Rules and Standards for Hazardous Waste"; ()
- (1) For the purposes of Subsection 222.02.h., "used oil" refers to any oil that has been refined from crude oil or any synthetic oil that has been used and, as a result of such use, is contaminated by physical or chemical impurities. ()
- (2) For the purposes of Subsection 222.02.h., "used oil fired space heater" refers to any furnace or apparatus and all appurtenances thereto, designed, constructed and used for combusting used oil for energy recovery to directly heat an enclosed space. ()
- ii. Any used oil burned is not contaminated by added toxic substances such as solvents, antifreeze or other household and industrial chemicals; ()
- iii. The used oil fired space heater is designed to have a maximum capacity of not more than one half (0.5) million BTU per hour; ()
- iv. The combustion gases from the used oil fired space heater are vented to the ambient air through a stack equivalent to the type and design specified by the manufacturer of the heater and installed to minimize down wash and maximize dispersion; and ()
- v. The used oil fired space heater is of modern commercial design and manufacture, except that a homemade used oil fired space heater may be used if, prior to the operation of the homemade unit, the owner or operator submits documentation to the Department demonstrating, to the satisfaction of the Department, that emissions from the homemade unit are no greater than those from modern commercially available units. ()
- i. Multiple chamber crematory retorts used to cremate human or animal remains using natural gas exclusively with a maximum average charge capacity of two hundred (200) pounds of remains per hour and a minimum secondary combustion chamber temperature of one thousand five hundred (1500) degrees Fahrenheit while operating. ()
- j. Petroleum environmental remediation source by vapor extraction with an operation life not to exceed five (5) years (except for landfills). The short-term adjustment factor in Subsection 210.15 cannot be used if the remediation is within five hundred (500) feet of a sensitive receptor. Forms are available at the DEQ website at <http://www.deq.idaho.gov>, to help assist sources in this exemption determination. ()
- k. Dry cleaning facilities that are not major under, but subject to, 40 CFR Part 63, Subpart M. ()

223. EXEMPTION CRITERIA AND REPORTING REQUIREMENTS FOR TOXIC AIR POLLUTANT EMISSIONS.

No permit to construct for toxic air pollutants is required for a source that satisfies any of the exemption criteria below, the recordkeeping requirements at Subsection 220.02, and reporting requirements as follows: ()

01. Below Regulatory Concern (BRC) Exemption. The source qualifies for a BRC exemption if the uncontrolled emission rate (refer to Section 210) for all toxic air pollutants emitted by the source is less than or equal to ten percent (10%) of all applicable screening emission levels listed in Sections 585 and 586. ()

02. Level I Exemption. To obtain a Level I exemption, the source shall satisfy the following criteria: ()

a. The uncontrolled emission rate (refer to Section 210) for all toxic air pollutants shall be less than or equal to all applicable screening emission levels listed in Sections 585 and 586; or ()

b. The uncontrolled ambient concentration (refer to Section 210) for all toxic air pollutants at the point of compliance shall be less than or equal to all applicable acceptable ambient concentrations listed in Sections 585 and 586. ()

03. Level II Exemption. To obtain a Level II exemption, the maximum capacity of a source to emit a toxic air pollutant under its physical and operational design considering limitations on emissions such as air pollution control equipment, restrictions on hours of operation and restrictions on the type and amount of material combusted, stored or processed at the point of compliance is less than or equal to ten percent (10%) of all applicable screening emission levels listed in Sections 585 and 586. ()

04. Annual Report for Toxic Air Pollutant Exemption. The owner or operator of a source claiming a Level I or II exemption shall submit a certified report, on or before May 1 for the previous calendar year, to the Department for each Level I or II exemption determination. The owner or operator is not required to annually submit a certified report for a Level I or II exemption determination previously claimed and reported. The report shall be labeled "Toxic Air Pollutant Exemption Report" and shall state the date construction has or will commence and shall include copies of all exemption determinations completed by the owner or operator for each Level I and II exemption. ()

224. PERMIT TO CONSTRUCT APPLICATION FEE.

All applicants for a permit to construct shall submit a permit to construct application fee of one thousand dollars (\$1,000) to the Department at the time of the original submission of the application. The permit to construct application fee is not required to be submitted for: ()

01. Exemption Applicability Determinations. Exemption applicability determinations set forth in Sections 220 through 223; ()

02. Typographical Errors. Changes to correct typographical errors; or ()

03. Name or Ownership Change. A change in the name or ownership of the holder of a permit to construct when the Department determines no other review or analysis is required. ()

225. PERMIT TO CONSTRUCT PROCESSING FEE.

A permit to construct processing fee, calculated by the Department pursuant to the categories provided in the following table, shall be paid to the Department by the person receiving the permit. The applicable processing fee category shall be determined by adding together the amount of increases of regulated pollutant emissions and subtracting any decreases of regulated pollutant emissions as identified in the permit to construct. The fee calculation shall not include fugitive emissions.

PERMIT TO CONSTRUCT CATEGORY	FEE
General permit, no facility-specific requirements (Defined as a source category specific permit for which the Department has developed standard emission limitations, operating requirements, monitoring and recordkeeping requirements, and that require minimal engineering analysis. General permit facilities may include portable concrete batch plants, portable hot-mix asphalt plants and portable rock crushing plants.)	\$500
New source or modification to existing source with increase of emissions of less than one (1) ton per year	\$1,000
New source or modification to existing source with increase of emissions of one (1) to less than ten (10) tons per year	\$2,500

PERMIT TO CONSTRUCT CATEGORY	FEE
New source or modification to existing source with increase of emissions of ten (10) to less than one hundred (100) tons per year	\$5,000
Nonmajor new source or modification to existing source with increase of emissions of one hundred (100) tons per year or more	\$7,500
New major facility or major modification	\$10,000
Permit modifications where no engineering analysis is required	\$250
Application submittals for exemption applicability determinations, typographical errors, and name and ownership changes as described in Subsections 224.01, 224.02, 224.03	\$0.00

()

226. PAYMENT OF FEES FOR PERMITS TO CONSTRUCT.

01. Fee Submittal. The permit to construct application fee shall be submitted with the application. The permit to construct processing fee shall be payable upon receipt of an assessment sent to the person receiving a permit by the Department. The permit to construct application and processing fees shall be sent to:

Air Quality Permit to Construct Fees
Fiscal Office,
Idaho Department of Environmental Quality
1410 N. Hilton, Boise, ID 83706-1255

()

02. Delinquency. No application for a permit to construct shall be processed by the Department unless accompanied by a permit to construct application fee. No permit to construct shall be issued by the Department until the Department has received the permit to construct processing fee.

()

227. RECEIPT AND USAGE OF FEES.

Permit to construct application and processing fee receipts shall be deposited by the Department into a stationary source permit account. Monies from this account shall be used solely toward technical, legal and administrative support of the Department's permit to Construct and Tier II permit programs and shall not be used for those activities supported by the fund created for implementing the operating permit program required under Title V of the federal Clean Air Act amendments of 1990. The permit to construct application fee payable under Section 227 shall be retained by the Department regardless of whether a permit to construct is issued by the Department in response to an application. The Department will review the fee schedule at least every two (2) years.

()

228. APPEALS.

A person may be able to file an appeal within thirty-five (35) days of the date the person receives an assessment from the Department under Section 225, in accordance with IDAPA 58.01.23, "Rules of Administrative Procedure Before the Board of Environmental Quality."

()

229. -- 299. (RESERVED)

300. PROCEDURES AND REQUIREMENTS FOR TIER I OPERATING PERMITS.

The purposes of Sections 300 through 399 are to establish requirements and procedures for the issuance of Tier I operating permits.

()

301. REQUIREMENT TO OBTAIN TIER I OPERATING PERMIT.

01. Prohibition. No owner or operator shall operate, or allow or tolerate the operation of, any Tier I source without an effective Tier I operating permit.

()

02. Exceptions.

()

- a. No Tier I operating permit is required if the owner or operator is in compliance with Sections 311 through 315 and the Department has not taken final action on the application. ()
- b. Tier I sources not located at major facilities do not require a Tier I operating permit until: ()
 - i. December 31, 1997 for Phase II sulfur dioxide sources; ()
 - ii. January 1, 1999 for Phase II nitrogen oxides sources; ()
 - iii. January 1, 2000 for solid waste incineration units required to obtain a permit pursuant to 42 U.S.C. Section 7429(e); and ()
 - iv. The source becomes a Tier I source under Section 006 of this chapter. ()
- c. No Tier I operating permit is required for the following Tier I sources: ()
 - i. All sources and source categories that would be required to obtain a permit solely because they are subject to 40 CFR Part 60, Subpart AAA; and ()
 - ii. All sources and source categories that would be required to obtain a permit solely because they are subject to 40 CFR Part 61.145. ()

302. OPTIONAL TIER I OPERATING PERMIT.

Any facility listed in Section 301 not required to obtain a Tier I operating permit may opt to apply for a Tier I operating permit. ()

303. -- 310. (RESERVED)

311. STANDARD PERMIT APPLICATIONS.

The purpose of Sections 311 through 315 is to establish standard Tier I operating permit application procedures. ()

312. DUTY TO APPLY.

For each Tier I source, the owner or operator shall submit a timely and complete permit application in accordance with Sections 311 through 315. ()

313. TIMELY APPLICATION.

01. Original Tier I Operating Permits. ()

a. For Tier I sources existing on May 1, 1994, the owner or operator of the Tier I source shall submit to the Department a complete application for an original Tier I operating permit by no later than June 1, 1996, or within twelve (12) months of EPA approval of the Tier I operating program, whichever is earlier, unless: ()

- i. The Department provides written notification of an earlier date to the owner or operator. ()
- ii. The Tier I source is identified in Subsections 301.02.b. or 301.02.c. ()

b. For sources that become Tier I sources after May 1, 1994, that are located at a facility not previously authorized by a Tier I operating permit, the owner or operator of the Tier I source shall submit to the Department a complete application for an original Tier I operating permit within twelve (12) months after becoming a Tier I source or commencing operation, unless: ()

- i. The Department provides written notification of an earlier date to the owner or operator. ()
- ii. The Tier I source is identified in Subsections 301.02.b. or 301.02.c. ()

c. For initial phase II acid rain sources identified in Subsections 301.02.b.i. or 301.02.b.ii., the owner or operator of the initial Phase II acid rain source shall submit to the Department a complete application for an original Tier I operating permit by January 1, 1996 for sulfur dioxide, and by January 1, 1998 for nitrogen oxides. ()

d. For Tier I sources identified in Subsection 301.02.b.iii.: ()

i. Existing on July 1, 1998, the owner or operator of the Tier I source shall submit to the Department a complete application for an original Tier I operating permit by no later than January 1, 1999, unless the Department provides written notification of an earlier date to the owner or operator. ()

ii. That become Tier I sources after July 1, 1998, located at a facility not previously authorized by a Tier I operating permit, the owner or operator of the Tier I source shall submit to the Department a complete application for an original Tier I operating permit within twelve (12) months after becoming a Tier I source or commencing operation, unless the Department provides written notification of an earlier date to the owner or operator. ()

02. Earlier Dates During Initial Period. Except as otherwise provided in these rules, during the initial period which begins May 1, 1994 and ends three (3) years after EPA approval of the Tier I operating program, the Department may designate Tier I sources for processing as follows: ()

a. The Department may develop a general estimate of the total work load and benefits associated with the Tier I operating permit applications that are predicted to be submitted during the initial period including, but not limited to, original permit applications and significant permit modification applications. ()

b. Considering the complexity of the applications, air quality benefits of permitting and requests for early actions from owners and operators, the Department may divide the applications into three (3) groups each representing approximately one-third (1/3) of the total work load and benefits. ()

c. The Department may prioritize the three (3) groups and the Tier I sources within each group for processing, establish early application deadlines and notify the owners or operators of the Tier I sources in the group in writing of a required submittal date earlier than the general deadlines provided in Subsection 313.01. ()

03. Renewals of Tier I Operating Permits. The owner or operator of the Tier I source shall submit a complete application to the Department for a renewal of the Tier I operating permit at least six (6) months before, but no earlier than eighteen (18) months before, the expiration date of the existing Tier I operating permit. To ensure that the term of the operating permit does not expire before the permit is renewed, the owner or operator is encouraged to submit the application nine (9) months prior to expiration. ()

04. Changes to Tier I Operating Permits. Sections 380 through 386 provide the requirements and procedures for changes at Tier I sources and to Tier I operating permits. ()

314. REQUIRED STANDARD APPLICATION FORM AND REQUIRED INFORMATION.

01. General Requirements. ()

a. Applications shall be submitted on a form or forms provided by the Department or by other means prescribed by these rules or the Department. The application shall be certified by the responsible official in accordance with Section 123. ()

i. If the Tier I source is regulated under 42 U.S.C. Sections 7651 through 7651o, the owner or operator shall also submit nationally-standardized acid rain forms provided by EPA. ()

b. All information shall be in sufficient detail so that the Department may efficiently and effectively determine the applicability of requirements and make all other necessary evaluations and determinations. ()

- 02. General Information for the Facility.** ()
- a.** Provide identifying information, including the name, address and telephone number of: ()
 - i. The owner; ()
 - ii. The operator; ()
 - iii. The facility where the Tier I source is located; ()
 - iv. The registered agent of the owner, if any; ()
 - v. The registered agent of the operator, if any; ()
 - vi. The responsible official, if other than the owner or operator; and ()
 - vii. The contact person. ()
 - b.** Provide a general description of the processes used and products produced by the facility where the Tier I source is located, including any associated with each requested alternative operating scenario and trading scenario. The description shall include narrative and applicable SIC codes. ()
 - c.** Provide a general description of each process line affecting a Tier I source. ()
- 03. Specific Information for Each Emissions Unit.** The owner or operator shall provide, in an itemized format, all of the information identified in Subsections 314.04 through 314.11 for each emissions unit, unless the emissions unit is an insignificant activity. ()
- 04. Emissions.** ()
- a.** Identify and describe all emissions of pollutants for which the source is major and all emissions of regulated air pollutants from each emissions unit. Fugitive emissions shall be included in the application in the same manner as stack emissions, regardless of whether the source category is included in the list of sources contained in the definition of major facility (Section 008). ()
 - b.** Emissions rates shall be quantified in tons per year (tpy) or for radionuclides the effective dose equivalent (EDE) in millirem per year and in such additional terms as are necessary to determine compliance consistent with the applicable test method. ()
 - c.** Identify and describe all points of emissions in sufficient detail to establish the basis for fees and applicability of requirements of the Clean Air Act. ()
 - d.** To the extent it is needed to determine or regulate emissions, identify and quantify all fuels, fuel use, raw materials, production rates, and operating schedules. ()
 - e.** Identify and describe all air pollution control equipment and compliance monitoring devices or activities. ()
 - f.** Identify and describe all limitations on source operation or any work practice standards affecting emissions. ()
 - g.** Provide the calculations on which the information provided under Subsections 314.04.a. through 314.04.e. is based. ()
- 05. Applicable Requirements.** ()
- a.** Cite and describe all applicable requirements affecting the emissions unit; and ()

b. Describe or reference all methods required by each applicable requirement for determining the compliance status of the emissions unit with the applicable requirement, including any applicable monitoring, recordkeeping and reporting requirements or test methods. ()

06. Other Requirements. Other specific information that may be necessary to determine the applicability of, implement or enforce any requirement of the Act, these rules, 42 U.S.C. Sections 7401 through 7671q or federal regulations. ()

07. Proposed Determinations of Nonapplicability. Identify requirements for which the applicant seeks a determination of nonapplicability and provide an explanation of why the requirement is not applicable to the Tier I source. ()

08. Alternative Operating Scenarios. ()

a. Identify all requested alternative operating scenarios. ()

b. Provide a detailed description of all requested alternative operating scenarios. Include all the information required by Section 314 that is relevant to the alternative operating scenario. ()

09. Compliance Certifications. ()

a. Provide a compliance certification regarding the compliance status of each emissions unit at the time the application is submitted to the Department that: ()

i. Identifies all applicable requirements affecting each emissions unit. ()

ii. Certifies the compliance status of each emissions unit with each of the applicable requirements. ()

iii. Provides a detailed description of the method(s) used for determining the compliance status of each emissions unit with each applicable requirement, including a description of any monitoring, recordkeeping, reporting and test methods that were used. Also provide a detailed description of the method(s) required for determining compliance. ()

iv. Certifies the compliance status of the emissions unit with any applicable enhanced monitoring requirements. ()

v. Certifies the compliance status of the emissions unit with any applicable enhanced compliance certification requirements. ()

vi. Provides all other information necessary to determining the compliance status of the emissions unit. ()

b. Provide a schedule for submission of compliance certifications during the term of the Tier I operating permit. The schedule shall require compliance certifications to be submitted no less frequently than annually, or more frequently if specified by the underlying applicable requirement or by the Department. ()

10. Compliance Plans. ()

a. Provide a compliance description as follows: ()

i. For each applicable requirement with which the emissions unit is in compliance, state that the emissions unit will continue to comply with the applicable requirement. ()

ii. For each applicable requirement that will become effective during the term of the Tier I operating permit that does not contain a more detailed schedule, state that the emissions unit will meet the applicable

requirement on a timely basis. ()

iii. For each applicable requirement that will become effective during the term of the Tier I operating permit that contains a more detailed schedule, state that the emissions unit will comply with the applicable requirement on the schedule provided in the applicable requirement. ()

iv. For each applicable requirement with which the emission unit is not in compliance, state that the emissions unit will be in compliance with the applicable requirement by the time the Tier I operating permit is issued or provide a compliance schedule in accordance with Subsection 314.10.b. ()

b. All compliance schedules shall: ()

i. Include a schedule of remedial measures leading to compliance, including an enforceable sequence of actions and specific dates for achieving milestones and achieving compliance. ()

ii. Incorporate the terms and conditions of any applicable consent order, judicial order, judicial consent decree, administrative order, settlement agreement or judgment. ()

iii. Be supplemental to, and shall not sanction noncompliance with, the applicable requirements on which it is based. ()

c. Provide a schedule for submission to the Department of periodic progress reports no less frequently than every six (6) months or at a more frequent period if one (1) is specified in the underlying applicable requirement or by the Department. ()

11. Trading Scenarios. ()

a. Identify all requested trading scenarios, including alternative emissions limits (bubbles) authorized by Section 440. ()

b. Provide a detailed description of all requested trading scenarios. Include all the information required by Section 314 that is relevant to the trading scenario and all the information required by Section 440, if applicable. Emissions trades must comply with all applicable requirements. ()

c. Provide proposed replicable procedures and permit terms that ensure the emissions trades are quantifiable and enforceable. Emissions trades involving emissions units for which the emissions are not quantifiable or for which there are no replicable procedures to enforce the emissions trade shall not be approved. ()

12. Additional Information. Provide all additional information that the Department determines is necessary for the Department to efficiently and effectively perform its functions. Such functions include, but are not limited to, determining the applicability of requirements for all regulated air pollutants, determining compliance with applicable requirements, developing or defining Tier I operating permit terms and conditions, defining all approved alternative operating scenarios, evaluating excess emissions procedures or making all necessary evaluations and determinations. ()

315. DUTY TO SUPPLEMENT OR CORRECT APPLICATION.

01. Failure to Submit. Any applicant who fails to submit any relevant facts or who has submitted incorrect information in a permit application shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary facts or corrected information. ()

02. Necessary Additional Information. If, while processing an application that has been determined or deemed to be complete, the Department determines that additional information is necessary to evaluate or take final action on that application, the Department may request such information in writing and set a deadline for a response. The applicant shall submit the requested information on or before the deadline set by the Department. ()

03. Additional Information After Completeness. The applicant shall promptly provide additional information as necessary to address any requirements that become applicable to the Tier I source after the date a complete application was filed but prior to release of a proposed action. ()

316. EFFECT OF INACCURATE INFORMATION IN APPLICATIONS OR FAILURE TO SUBMIT RELEVANT INFORMATION.

Notwithstanding the shield provisions of Section 325, the owner or operator shall be subject to enforcement action for operation of the Tier I source without a Tier I operating permit if the owner or operator submitted an incomplete or inaccurate application or the Tier I source is later determined not to qualify for coverage under the conditions and terms of the Tier I operating permit. ()

317. INSIGNIFICANT ACTIVITIES.

01. Applicability Criteria. This Section contains the criteria for identifying insignificant activities for the purposes of the Tier I operating permit program. Notwithstanding any other provision of this rule, no emission unit or activity subject to an applicable requirement shall qualify as an insignificant emission unit or activity. Applicants may not exclude from Tier I operating permit applications information that is needed to determine whether the facility is major or whether the facility is in compliance with applicable requirements. ()

- a.** Presumptively insignificant emission units. ()
 - i.** Except as provided above, the activities listed in this section may be omitted from the permit application. ()
 - (1) Blacksmith forges. ()
 - (2) Mobile transport tanks on vehicles except for those containing asphalt and not including loading and unloading operations. ()
 - (3) Natural gas pressure regulator vents, excluding venting at oil and gas production facilities. ()
 - (4) Storage tanks, reservoirs and pumping and handling equipment of any size, limited to soaps, lubricants, lubricating oil, treater oil, hydraulic fluid, vegetable oil, grease, animal fat, aqueous salt solutions or other materials and processes using appropriate lids and covers where there is no generation of objectionable odor or airborne particulate matter. ()
 - (5) Pressurized storage of oxygen, nitrogen, carbon dioxide, air, or inert gases. ()
 - (6) Storage of solid material, dust-free handling. ()
 - (7) Boiler water treatment operations, not including cooling towers. ()
 - (8) Vents from continuous emission monitors and other analyzers. ()
 - (9) Vents from rooms, buildings and enclosures that contain permitted emissions units or activities from which local ventilation, controls, and separate exhaust are provided. ()
 - (10) Internal combustion engines for propelling or powering a vehicle. ()
 - (11) Recreational fireplaces including the use of barbecues, campfires and ceremonial fires. ()
 - (12) Brazing, soldering, and welding equipment and cutting torches for use in cutting metal wherein components of the metal do not generate hazardous air pollutants or hazardous air pollutant precursors. ()
 - (13) Atmospheric generators used in connection with metal heat treating processes using non-hazardous air pollutant metals as the primary raw material. ()

- (14) Non-hazardous air pollutant metal finishing or cleaning using tumblers. ()
- (15) Drop hammers or hydraulic presses for forging or metalworking. ()
- (16) Electrolytic deposition, used to deposit brass, bronze, copper, iron, tin, zinc, precious and other metals not listed as the parents of hazardous air pollutants. ()
- (17) Equipment used for surface coating, painting, dipping or spraying operations, except those that will emit volatile organic compound or hazardous air pollutant. ()
- (18) Process water filtration systems. ()
- (19) Portable electrical generators that can be moved by hand from one (1) location to another. Moved by hand means that it can be moved without the assistance of any motorized or non-motorized vehicle, conveyance, or device. ()
- (20) Plastic and resin curing equipment, excluding FRP and provided these activities are not related to the source's primary business activity. ()
- (21) Extrusion equipment, metals, minerals, plastics, grain or wood used without solvents containing hazardous air pollutant. ()
- (22) Presses and vacuum forming, for curing rubber and plastic products or for laminating plastics without solvents containing hazardous air pollutants present. ()
- (23) Roller mills and calendars for use with rubber and plastics without solvents containing hazardous air pollutants. ()
- (24) Conveying and storage of plastic pellets. ()
- (25) Plastic compression, injection, and transfer molding and extrusion, rotocasting, pultrusion, blowmolding, excluding acrylics, PVC, polystyrene and related copolymers and the use of plasticizer. Only oxygen, carbon dioxide, nitrogen, air or inert gas allowed as blowing agent. ()
- (26) Plastic pipe welding. ()
- (27) Wax application in either a molten state or aqueous suspension. ()
- (28) Plant maintenance and upkeep including routine housekeeping, janitorial activities, cleaning and preservation of equipment, preparation for and painting of structures or equipment, retarring roofs, applying insulation to buildings in accordance with applicable environmental and health and safety requirements and lawn, landscaping and groundskeeping activities. Provided these activities are not conducted as part of a manufacturing process, are not related to the source's primary business activity, and not otherwise triggering a permit modification. ()
- (29) Agricultural activities on a facility's property that are not subject to registration or new source review by the permitting authority. ()
- (30) Maintenance of paved streets and parking lots including paving, stripping, salting, sanding, cleaning and sweeping of streets and paved surfaces. Provided these activities are not related to the source's primary business activity, do not otherwise trigger a permit modification, and fugitive emissions are reasonably controlled as required in Section 808. ()
- (31) Ultraviolet curing processes. ()
- (32) Hot melt adhesive application with no volatile organic compounds or hazardous air pollutants in the adhesive formula. ()

- (33) Laundering, dryers, extractors, tumblers for fabrics, using water solutions of bleach and/or detergents except for boilers. ()
- (34) Steam cleaning operations. ()
- (35) Steam sterilizers. ()
- (36) Food service activities including cafeterias, kitchen facilities and barbecues located at a source for providing food service on premises. ()
- (37) Portable drums and totes. ()
- (38) Fluorescent light tube and aerosol can crushing in units designed to reduce emissions from these activities. ()
- (39) Flares used to indicate danger to the public. ()
- (40) General vehicle maintenance including vehicle exhaust from repair facilities provided these activities are not related to the source's primary business activity and do not have applicable requirements under title VI of the Clean Air Act. ()
- (41) Comfort air conditioning or air cooling systems, not used to remove air contaminants from specific equipment. ()
- (42) Natural draft hoods, natural draft stacks, or natural draft ventilators for sanitary and storm drains, safety valves, and storage tanks subject to size and service limitations expressed elsewhere in this section. ()
- (43) Natural and forced air vents for bathroom/toilet facilities. ()
- (44) Office activities. ()
- (45) Equipment used for quality control/assurance or inspection purposes, including sampling equipment used exclusively to withdraw materials for laboratory analyses and testing. ()
- (46) Fire suppression systems and similar safety equipment and equipment used to train firefighters including fire drill pits. ()
- (47) Materials and equipment used by, and activity related to operation of infirmary; infirmary is not the source's business activity except equipment affected by the radionuclide NESHAP. ()
- (48) Satellite Accumulation Areas (SAAs) and Temporary Accumulation Areas (TAAs) managed in compliance with RCRA. ()
- (49) Equipment for carving, cutting, routing, turning, drilling, machining, sawing, surface grinding, sanding, planing, buffing, shot blasting, sintering, or polishing: Ceramics, glass, leather, metals, plastics, rubber, concrete, paper stock, or wood provided that these activities are not conducted as part of a manufacturing process. ()
- (50) Oxygen, nitrogen, or rare gas extraction and liquefaction equipment subject to other exemption limitation, e.g., internal and external combustion equipment. ()
- (51) Slaughterhouses, such as rendering cookers, boilers, heating plants, incinerators, and electrical power generating equipment. ()
- (52) Ozonation equipment. ()

- (53) Temporary construction activities at a facility provided that the installation or modification of emissions units must comply with all applicable federal, state, and local rules and regulations. ()
- (54) Batch loading and unloading of solid phase catalysts. ()
- (55) Pulse capacitors. ()
- (56) Gas cabinets using only gases that are not regulated air pollutants. ()
- (57) CO2 lasers, used only on metals and other materials which do not emit hazardous air pollutants in the process. ()
- (58) Structural changes not having air contaminant emissions. ()
- (59) Equipment used to mix, package, store and handle soaps, lubricants, vegetable oil, grease, animal fat, and non-volatile aqueous salt solutions, provided appropriate lids and covers are utilized. ()
- (60) Photographic process equipment by which an image is reproduced upon material sensitized to radiant energy, e.g., blueprint activity, photocopiers, mimeograph, telefax, photographic developing, and microfiche provided these activities are not related to the source's primary business activity. ()
- (61) Pharmaceutical and cosmetics packaging equipment. ()
- (62) Paper trimmers/binders provided these activities are not related to the source's primary business activity. ()
- (63) Bench-scale laboratory equipment and laboratory equipment used exclusively for physical or chemical analysis, including associated vacuum producing devices but excluding research and development facilities. ()
- (64) Repair and maintenance shop activities not related to the source's primary business activity. ()
- (65) Handling equipment and associated activities for glass and aluminum which is destined for recycling, provided these activities are not related to the source's primary business activity. ()
- (66) Hydraulic and hydrostatic testing equipment. ()
- (67) Batteries and battery charging stations, except at battery manufacturing plants. ()
- (68) Porcelain and vitreous enameling equipment. ()
- (69) Solid waste containers. ()
- (70) Salt baths using nonvolatile salts that do not result in emissions of any regulated air pollutants. ()
- (71) Shock chambers. ()
- (72) Wire strippers. ()
- (73) Humidity chambers. ()
- (74) Solar simulators. ()
- (75) Environmental chambers not using hazardous air pollutant gases. ()

- (76) Totally enclosed conveyors not including transfer points. ()
- (77) Steam vents and safety relief valves. ()
- (78) Air compressors, pneumatically operated equipment, systems, and hand tools. ()
- (79) Steam leaks. ()
- (80) Boiler blow-down tank. ()
- (81) Salt cake mix tanks at pulp mills. ()
- (82) Digester chip feeders at pulp mills. ()
- (83) Weak liquor and filter tanks at pulp mills. ()
- (84) Process water and white water storage tanks at pulp mills. ()
- (85) Demineralizer water tanks, demineralization, demineralizer vents, and oxygen scavenging (deaeration) of water. ()
- (86) Clean condensate tanks. ()
- (87) Alum tanks. ()
- (88) Broke beaters, repulpers, pulp and repulping tanks, stock chests and pulp handling. ()
- (89) Lime and mud filtrate tanks. ()
- (90) Hydrogen peroxide tanks. ()
- (91) Lime mud washer. ()
- (92) Lime mud filter. ()
- (93) Hydro and liquor clarifiers or filters and storage tanks and associated pumping, piping, and handling. ()
- (94) Lime grits washers, filters, and handing. ()
- (95) Lime silos and feed bins. ()
- (96) Paper forming. ()
- (97) Starch cooking. ()
- (98) Pulp stock cleaning and screening. ()
- (99) Paper winders or other paper converting equipment. ()
- (100) Sludge dewatering and wet sludge handling. ()
- (101) Screw press vents. ()
- (102) Pond dredging. ()
- (103) Polymer tanks and storage devices and associated pumping and handling equipment, used for solids ()

- dewatering and flocculation. ()
- (104) Non-PCB oil filled circuit breakers, oil filled transformers and other equipment that is analogous to, but not considered to be, a tank. ()
- (105) Lab-scale electric or steam-heated drying ovens and autoclaves. ()
- (106) Sewer manholes, junction boxes, sumps and lift stations associated with waste water treatment systems. ()
- (107) Water cooling towers processing exclusively noncontact cooling water. ()
- (108) Paper coating and sizing. ()
- (109) Process waste water and ponds. ()
- (110) Outdoor firearms practice ranges. ()
- b.** Insignificant activities on the basis of size or production rate. ()
- i. This section contains lists of units or activities that are insignificant on the basis of size or production rate. Units and activities listed in this section must be listed in the permit application. The following units and activities are determined to be insignificant based on their size or production rate: ()
- (1) Operation, loading and unloading of storage tanks and storage vessels, with lids or other appropriate closure and less than two hundred sixty (260) gallon capacity thirty five cubic feet (35cft), heated only to the minimum extend to avoid solidification if necessary. ()
- (2) Operation, loading and unloading of storage tanks, not greater than one thousand one hundred (1,100) gallon capacity, with lids or other appropriate closure, not for use with hazardous air pollutants, maximum (max.) vp five-hundred fifty (550) mm Hg. ()
- (3) Operation, loading and unloading of volatile organic compound storage tanks, ten thousand (10,000) gallons capacity or less, with lids or other appropriate closure, vp not greater than eighty (80) mm Hg at twenty-one (21) degrees C. Operation, loading and unloading of gasoline storage tanks, ten thousand (10,000) gallons capacity or less, with lids or other appropriate closure. ()
- (4) Operation, loading and unloading storage of butane, propane, or liquefied petroleum gas (LPG), storage tanks, vessel capacity under forty thousand (40,000) gallons. ()
- (5) Combustion source, less than five million (5,000,000) Btu/hr, exclusively using natural gas, butane, propane, and/or LPG. ()
- (6) Combustion source, less than five hundred thousand (500,000) Btu/hr, using any commercial fuel containing less than four-tenths percent (.4%) by weight sulfur for coal or less than one percent (1%) by weight sulfur for other fuels. ()
- (7) Combustion source, of less than one million (1,000,000) Btu/hr, if using kerosene, No. 1 or No. 2 fuel oil. ()
- (8) Combustion source, not greater than five hundred thousand (500,000) Btu/hr, if burning waste wood, wood waste or waste paper. ()
- (9) Welding using not more than one (1) ton per day of welding rod. ()
- (10) Foundry sand molds, unheated and using binders with less than twenty-five hundredths percent (.25%) free phenol by sand weight. ()

- (11) "Parylene" coaters using less than five hundred (500) gallons of coating per year. ()
- (12) Printing and silkscreening, using less than two (2) gallon/day of any combination of the following: Inks, coatings, adhesives, fountain solutions, thinners, retarders, or nonaqueous cleaning solutions. ()
- (13) Water cooling towers and ponds, not using chromium-based corrosion inhibitors, not used with barometric jets or condensers, not greater than ten thousand (10,000) gpm, not in direct contact with gaseous or liquid process streams containing regulated air pollutants. ()
- (14) Combustion turbines, of less than five hundred (500) HP. ()
- (15) Batch solvent distillation, not greater than fifty-five (55) gallons batch capacity. ()
- (16) Municipal and industrial water chlorination facilities of not greater than twenty million (20,000,000) gallons per day capacity. The exemption does not apply to waste water treatment. ()
- (17) Surface coating, using less than two (2) gallons per day. ()
- (18) Space heaters and hot water heaters using natural gas, propane or kerosene and generating less than five million (5,000,000) Btu/hr. ()
- (19) Tanks, vessels, and pumping equipment, with lids or other appropriate closure for storage or dispensing of aqueous solutions of inorganic salts, bases and acids excluding: ()
- (a) Ninety-nine percent (99%) or greater H₂SO₄ or H₃PO₄. ()
- (b) Seventy percent (70%) or greater HNO₃. ()
- (c) Thirty percent (30%) or greater HCl. ()
- (d) More than one (1) liquid phase where the top phase is more than one percent (1%) volatile organic compounds. ()
- (20) Equipment used exclusively to pump, load, unload, or store high boiling point organic material, material with initial boiling point (IBP) not less than one hundred fifty (150) degrees C or vapor pressure (vp) not more than five (5) mm Hg at twenty-one (21) degrees C with lids or other appropriate closure. ()
- (21) Smokehouses under twenty (20) square feet. ()
- (22) Milling and grinding activities, using paste-form compounds with less than one percent (1%) volatile organic compounds. ()
- (23) Rolling, forging, drawing, stamping, shearing, or spinning hot or cold metals. ()
- (24) Dip-coating operations, using materials with less than one percent (1%) volatile organic compounds. ()
- (25) Surface coating, aqueous solution or suspension containing less than one percent (1%) volatile organic compounds. ()
- (26) Cleaning and stripping activities and equipment, using solutions having less than one percent (1%) volatile organic compounds by weight. On metallic substrates, acid solutions are not considered for listing as insignificant. ()
- (27) Storage and handling of water based lubricants for metal working where the organic content of the lubricant is less than ten percent (10%). ()

(28) Municipal and industrial waste water chlorination facilities of not greater than one million (1,000,000) gallons per day capacity. ()

(29) Domestic sewage treatment ponds with average flowrates less than four hundred (400) gpm or treating waste from less than three thousand (3000) people from non-residential sources. ()

(30) An emission unit or activity with potential emissions less than or equal to the significant emission rate as defined in Section 006 and actual emissions less than or equal to ten percent (10%) of the levels contained in Section 006 of the definition of significant and no more than one (1) ton per year of any hazardous air pollutant. ()

318. -- 320. (RESERVED)

321. TIER I OPERATING PERMIT CONTENT.

The purpose of Sections 321 through 336 is to mandate and authorize the contents of Tier I operating permits. ()

322. STANDARD CONTENTS OF TIER I OPERATING PERMITS.

All Tier I operating permits shall contain and the Department shall have the authority to impose, implement and enforce, the following elements for all permitted operating scenarios and emissions trading scenarios. Fugitive emissions shall be included in the Tier I operating permit in the same manner as stack emissions. ()

01. Emission Limitations and Standards. All Tier I operating permits shall contain emission limitations and standards, including, but not limited to, those operational requirements and limitations that assure compliance with the applicable requirements identified in the application, or determined by the Department to be applicable to the source. ()

02. Authority for and Form of Terms and Conditions. All Tier I operating permits shall specify and reference the origin of and authority for each term or condition, and identify any difference in form as compared to the applicable requirement upon which the term or condition is based. ()

03. Terms or Conditions for Applicable Requirements. All Tier I operating permits shall contain at least one (1) permit term or condition for every applicable requirement specifically identified in the application or determined by the Department to be applicable to the source. ()

04. Alternative Operating Scenarios. All Tier I operating permits shall contain terms and conditions to ensure compliance with all applicable requirements for each alternative operating scenario that was requested by the applicant and approved by the Department, including, but not limited to, a requirement that the owner or operator of the source, contemporaneously with making a change from one (1) operating scenario to another, record the change in an operating scenario log located and retained at the permitted facility. ()

05. Trading Scenarios. ()

a. All Tier I operating permits shall contain terms and conditions for each trading scenario that was requested by the applicant and approved by the Department including, but not limited to, terms and conditions which ensure that any emission trade is quantifiable, accountable, enforceable and based on replicable procedures. ()

b. The Tier I operating permit shall state that no permit revision shall be required under approved economic incentives, marketable permits, emissions trading, and other similar programs or processes for changes that are provided for in the permit. ()

c. The Tier I operating permit shall, at a minimum, include a requirement that the owner or operator of the source, contemporaneously with making a change from one (1) trading scenario to another, record the change in a trading scenario log located and retained at the permitted facility and provide notice to the Department in accordance with Section 383. ()

- 06. Monitoring.** All Tier I operating permits shall contain the following with respect to monitoring: ()
- a.** Sufficient monitoring to ensure compliance with all of the terms and conditions of the Tier I operating permit; ()
 - b.** All emissions monitoring and analysis procedures or test methods required under the applicable requirements; ()
 - c.** If the applicable requirement does not require specific periodic testing or monitoring, terms and conditions requiring periodic monitoring, recordkeeping, or both, that is sufficient to yield reliable data for the relevant time periods that are representative of the emissions unit's compliance with the Tier I operating permit, as reported pursuant to Subsection 322.08, and ensuring the use of terms, test methods, units, averaging periods, and other statistical conventions consistent with the applicable requirement; and ()
 - d.** Requirements that the Department determines are necessary, concerning the use, maintenance and installation of monitoring equipment or methods. ()
- 07. Recordkeeping.** All Tier I operating permits shall incorporate by reference all applicable requirements regarding recordkeeping and require all of the following: ()
- a.** Sufficient recordkeeping to assure compliance with all of the terms and conditions of the Tier I operating permit. ()
 - b.** Recording of monitoring information including but not limited to the following: ()
 - i.** The date, place (as defined in the Tier I operating permit) and time of sampling or measurements; ()
 - ii.** The date(s) analyses were performed; ()
 - iii.** The company or entity that performed the analyses; ()
 - iv.** The analytical techniques or methods used; ()
 - v.** The results of such analyses; and ()
 - vi.** The operating conditions existing at the time of sampling or measurement. ()
 - c.** Retention of all monitoring records and support information for a period of at least five (5) years from the date of the monitoring sample, measurement, report or application. Supporting information includes but is not limited to all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation and copies of all reports required by the Tier I operating permit. ()
- 08. Reporting.** All Tier I operating permits shall incorporate by reference all applicable requirements regarding reporting and require all of the following: ()
- a.** Sufficient reporting to assure compliance with all of the terms and conditions of the Tier I operating permit. ()
 - b.** Prompt reporting of deviations from permit requirements including, but not limited to, those attributable to excess emissions. If the deviation is an excess emission, the report shall be submitted in accordance with the requirements of Sections 130 through 136. For all other deviations, the report shall be submitted in accordance with Subsection 322.08.c. unless the permit specifies another time frame. The reports shall describe the probable cause of such deviations and any corrective actions or preventative measures taken. ()
 - c.** Submittal of reports for any required monitoring at least every six (6) months. All instances of

deviations from Tier I operating permit requirements, which include monitoring, recordkeeping, and reporting, must be clearly identified in such reports. All required reports must be certified in accordance with Section 123. ()

09. Testing. All Tier I operating permits shall contain terms and conditions requiring sufficient testing to assure compliance with all of the terms and conditions of the Tier I operating permit. ()

10. Compliance Schedule and Progress Reports. All Tier I operating permits shall contain terms and conditions regarding the compliance plan submitted in the application in accordance with Subsection 314.10 including all of the following: ()

a. For each applicable requirement for which the source is not in compliance at the time of the permit issuance, terms and conditions consistent with the compliance schedule submitted by the applicant including all of the following: ()

i. A schedule of remedial measures leading to compliance including an enforceable sequence of actions and specific dates for achieving the milestones and achieving compliance. ()

ii. A requirement that the permittee submit periodic progress reports to the Department no less frequently than every six (6) months or at a more frequent period if one is specified in the underlying applicable requirement or by the Department. ()

iii. A requirement that any progress report shall include a statement of when the milestones and compliance were or will be achieved, an explanation of why any dates in the compliance schedule submitted by the applicant or in the terms or conditions of the Tier I operating permit were not or will not be met and a detailed description of any preventative or corrective measures undertaken by the permittee. ()

iv. All terms and conditions of any applicable consent order, judicial order, judicial consent decree, administrative order, settlement agreement or judgment. ()

v. A statement that the terms and conditions regarding the compliance schedule are supplemental to, and do not sanction noncompliance with, the underlying applicable requirement. ()

b. For each applicable requirement that will become effective during the term of the Tier I operating permit and that requires a detailed compliance schedule, the permit shall include such compliance schedule. ()

c. For each applicable requirement that will become effective during the term of the Tier I operating permit that does not require a detailed compliance schedule, the permit shall include a statement that the permittee shall meet, on a timely basis, all such applicable requirements. ()

11. Periodic Compliance Certifications. Each Tier I operating permit shall require submittal of compliance certifications during the term of the permit for each emissions unit to the Department and the EPA as follows: ()

a. Compliance certifications for all emissions units shall be submitted no less frequently than annually, or more frequently if specified by the underlying applicable requirement or by the Department. ()

b. The compliance certification for each emissions unit shall address all of the terms and conditions contained in the Tier I operating permit that are applicable to such emissions unit including emissions limitations, standards and work practices. ()

c. The compliance certification shall be in an itemized format providing the following information: ()

i. The identification of each term or condition of the Tier I operating permit that is the basis of the certification; ()

ii. The identification of the method(s) or other means used by the owner or operator for determining

the compliance status with each term and condition during the certification period. Such methods and other means shall include, at a minimum, the methods and means required under Subsections 322.06, 322.07, and 322.08; ()

iii. The status of compliance with the terms and conditions of the Tier I operating permit for the period covered by the certification, including whether compliance during the period was continuous or intermittent. The certification shall be based on the method or means designated in Subsection 322.11.c.ii. above. The certification shall identify each deviation and take it into account in the compliance certification. The certification shall also identify as possible exceptions to compliance any periods during which compliance is required and in which an excursion or exceedance as defined under 40 CFR Part 64 occurred; and ()

iv. Such information as the Department may require to determine the compliance status of the emissions unit. ()

d. All original compliance certifications shall be submitted to the Department and a copy of all compliance certifications shall be submitted to the EPA; ()

12. Permit Conditions Regarding Acid Rain Allowances. ()

a. A permit condition prohibiting emissions exceeding any allowances that the source lawfully holds. ()

b. No limit shall be placed on the number of allowances held by the source and no permit revisions shall be required for increases in emissions that are authorized by allowances acquired pursuant to the acid rain program, provided that such increases do not require a permit revision under any other applicable requirement. ()

c. The source may not, however, use allowances as a defense to noncompliance with any other applicable requirement. ()

d. Any such allowance shall be accounted for according to the procedures established in 40 CFR Part 72 and 40 CFR Part 73. ()

13. Permit Duration. Each Tier I operating permit shall state that it is effective for a fixed term of five (5) years; except that during the first four (4) years after EPA approval of the Tier I operating permit program, the permit may be issued with an initial term of three (3) years to five (5) years unless the Tier I source is also a Phase II source. ()

14. Other Specific Requirements. Any terms or conditions determined by the Department to be necessary for approval of the Tier I operating permit. ()

15. General Requirements. Each Tier I operating permit shall contain provisions stating the following: ()

a. The permittee shall comply with all conditions of this permit. Any permit noncompliance constitutes a violation and is grounds for enforcement action; for permit revocation, termination, revocation and reissuance, or revision; or for denial of a permit renewal application. ()

b. It shall not be a defense in an enforcement action that it would have been necessary to halt or reduce any activity in order to maintain compliance with the terms and conditions of this permit. ()

c. This permit may be revised, revoked, reopened and reissued, or terminated for cause. ()

d. The filing of a request by the permittee for a permit revision, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition. ()

- e.** This permit does not convey any property rights of any sort, or any exclusive privilege. ()
- f.** The permittee shall furnish all information requested by the Department, within a reasonable time, that the Department may request in writing to determine whether cause exists for modifying, revoking and reissuing or terminating the permit or to determine compliance with the permit. ()
- g.** Upon request, the permittee shall furnish to the Department copies of records required to be kept by this permit. ()
- h.** The provisions of this permit are severable, and if any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit shall not be affected thereby. ()
- i.** The permittee shall comply with Sections 380 through 386 as applicable. ()
- j.** Unless specifically identified as a “State Only” provision, all terms and conditions in the this permit, including any terms and conditions designed to limit a source's potential to emit, are enforceable: ()
- i.** By the Department in accordance with State law; and ()
- ii.** By the United States or any other person in accordance with Federal law. ()
- k.** Provisions specifically identified as a “State Only” provision are enforceable only in accordance with State law. “State Only” provisions are those that are not required under the Federal Clean Air Act or under any of its applicable requirements or those provisions adopted by the State prior to federal approval. ()
- l.** Upon presentation of credentials, the permittee shall allow the Department or an authorized representative of the Department to do the following: ()
- i.** Enter upon the permittee's premises where a Tier I source is located or emissions-related activity is conducted, or where records are kept under the conditions of this permit; ()
- ii.** Have access to and copy, at reasonable times, any records that are kept under the conditions of this permit; ()
- iii.** Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit; and ()
- iv.** Sample or monitor at reasonable times substances or parameters for the purpose of determining or ensuring compliance with this permit or applicable requirements. ()
- m.** Nothing in this permit shall alter or affect the following: ()
- i.** Any administrative authority or judicial remedy available to prevent or terminate emergencies or imminent and substantial dangers; ()
- ii.** The liability of an owner or operator of a source for any violation of applicable requirements prior to or at the time of permit issuance; ()
- iii.** The applicable requirements of the acid rain program, consistent with 42 U.S.C. Section 7651g(a); ()
- iv.** The owner or operator's duty to provide information. ()
- n.** The owner or operator of a Tier I source shall pay registration fees to the Department in accordance with Sections 387 through 399, which are hereby incorporated by reference. ()

o. All documents submitted to the Department shall be certified in accordance with Section 123 and comply with Section 124. ()

p. If a timely and complete application for a Tier I operating permit renewal is submitted, but the Department fails to issue or deny the renewal permit before the end of the term of the previous permit, then all the terms and conditions of the previous permit including any permit shield that may have been granted pursuant to Section 325 shall remain in effect until the renewal permit has been issued or denied. ()

q. The permittee shall promptly report deviations from permit requirements including, but not limited to, those attributable to excess emissions. If the deviation is an excess emission, the report shall be submitted in accordance with the requirements of Sections 130 through 136. For all other deviations, the report shall be submitted in accordance with Subsection 322.08.c. unless the permit specifies another time frame. The reports shall describe the probable cause of such deviations and any corrective actions or preventative measures taken. ()

323. -- 324. (RESERVED)

325. ADDITIONAL CONTENTS OF TIER I OPERATING PERMITS -- PERMIT SHIELD.

Each Tier I operating permit shall include provisions stating: ()

01. General Permit Shield. Compliance with the terms and conditions of the Tier I operating permit, including those applicable to all alternative operating scenarios and trading scenarios, shall be deemed compliance with all of the following: ()

a. Applicable requirements as of the date of permit issuance that are specifically identified in the Tier I operating permit and have a corresponding term or condition in the Tier I operating permit. ()

b. Non-applicable requirements. For a requirement to be a non-applicable requirement, all of the following criteria must be met: ()

i. The permittee must have provided the information required by Subsection 314.08.b. in the application. ()

ii. The requirement must be specifically identified in the Tier I operating permit as a non-applicable requirement. ()

iii. The requirement must have been determined by the Department, in writing and in acting on the permit application or revision, to not be applicable to the Tier I source. ()

iv. Tier I operating permit must include the Department's determination or a concise summary thereof. ()

02. Limitation on Permit Shield. Permit revisions and other actions authorized by Sections 300 through 386 may eliminate, modify or suspend the permit shield. ()

326. -- 331. (RESERVED)

332. EMERGENCY AS AN AFFIRMATIVE DEFENSE REGARDING EXCESS EMISSIONS.

01. General. An emergency, as defined in Section 008, constitutes an affirmative defense to an action brought for noncompliance with such technology-based emission limitation if the conditions of Subsection 332.02 are met. ()

02. Demonstration of Emergency. The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that: ()

a. An emergency occurred and that the permittee can identify the cause(s) of the emergency; ()

- b.** The permitted facility was at the time being properly operated; ()
- c.** During the period of the emergency, the permittee took all reasonable steps, as determined by the Department, to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and ()
- d.** The permittee submitted written notice of the emergency to the Department within two (2) working days of the time when emission limitations were exceeded due to the emergency. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken. Compliance with this section satisfies the written reporting requirements under Section 135 and Subsection 322.15.q. ()

03. Burden of Proof. In any enforcement proceeding, the permittee seeking to establish the occurrence of an emergency has the burden of proof. ()

04. Applicability. Section 332 is in addition to any emergency or upset provision contained in any applicable requirement. ()

333. -- 334. (RESERVED)

335. GENERAL TIER I OPERATING PERMITS AND AUTHORIZATIONS TO OPERATE.

01. Issuance of General Tier I Operating Permits. The Department may, after notice and opportunity for public participation provided in accordance with Section 364, issue a general Tier I operating permit covering numerous similar sources. ()

02. Contents of General Tier I Operating Permits. Each general Tier I operating permit: ()

a. Shall include all terms and conditions identified in Sections 322 and 325. ()

b. Shall include specific criteria by which sources may qualify for coverage under the general Tier I operating permit; and ()

c. May provide for applications which deviate from the requirements of Sections 311 through 315, provided that such applications meet all other requirements of 42 U.S.C. 7661 through 7661f and include all information necessary to determine qualification for, and to ensure compliance with, the general Tier I operating permit. ()

03. Applications for Authorizations to Operate. The owner or operator of a Tier I source may apply for an authorization to operate under the terms and conditions of a general Tier I operating permit by: ()

a. Stating in the application submitted pursuant to Sections 311 through 315 that the owner or operator has determined that the Tier I source qualifies for coverage under a specifically identified general Tier I operating permit and that the owner or operator requests that operations of the Tier I source be authorized under a specifically identified general Tier I operating permit; or ()

b. Complying with the specific application requirements, if any, provided in the general Tier I operating permit. ()

04. Procedures for Issuing Authorizations to Operate. Without repeating the public participation procedures required under Section 364, the Department shall issue an authorization to operate a Tier I source under a specifically identified general Tier I operating permit if the Department determines that the Tier I source qualifies for coverage. ()

05. Review of Authorizations to Operate. The issuance of an authorization to operate shall be a final agency action for purposes of administrative and judicial review of the authorization. The general Tier I operating permit shall not be subject to administrative or judicial review upon the issuance of an authorization to operate. ()

06. Phase II Sources. General Tier I operating permits shall not be authorized for Phase II sources under the acid rain program unless otherwise provided in 40 CFR Part 72. ()

336. TIER I OPERATING PERMITS FOR TIER I PORTABLE SOURCES.

01. Issuance of Tier I Operating Permits for Portable Tier I Sources. ()

a. The Department may issue a single Tier I operating permit authorizing emissions from similar operations of a portable Tier I source by the owner or operator at multiple temporary locations. ()

b. The operation must be temporary and involve at least one (1) change of location for the portable Tier I source during the term of the Tier I operating permit. ()

02. Phase II Sources. No Phase II source shall be permitted as a portable Tier I source. ()

03. Contents of Tier I Operating Permits for Portable Tier I Sources. Tier I operating permits for portable Tier I sources shall include the following: ()

a. Terms and conditions that will ensure compliance with all applicable requirements at all authorized locations; ()

b. Requirements that the owner or operator notify the Department at least ten (10) days in advance of each change in location in accordance with Section 500; and ()

c. All terms and conditions identified in Sections 322 and 325 through 332. ()

337. -- 359. (RESERVED)

360. STANDARD PROCESSING OF TIER I OPERATING PERMIT APPLICATIONS.

The purposes of Sections 360 through 369 is to establish standard procedures and requirements for processing Tier I operating permits. ()

361. COMPLETENESS OF APPLICATIONS.

01. Criteria for Completeness. Except as otherwise provided by these rules, the application must comply with Section 314 including that the information must be in sufficient detail. ()

02. Timelines for Determinations of Completeness. The Department shall send written notice to the applicant of whether the application is complete within sixty (60) days of receiving the application. If the Department fails to send the written notice to the applicant within sixty (60) days of receipt, the application shall be deemed complete. ()

03. Effects of Completeness Determination. ()

a. The submittal of a complete application activates the application shield provided by Subsection 361.02. ()

b. The submittal of a complete Tier I operating permit application shall not affect the permit to construct requirements of Sections 200 through 225 or 42 U.S.C. Sections 7401 through 7515. ()

c. The timelines for final agency action provided in Subsections 367.02 and 367.03 begin on the date of the completeness determination. ()

362. TECHNICAL MEMORANDUMS FOR TIER I OPERATING PERMITS.

01. Memorandum for Draft Permit. As part of its review of the Tier I operating permit application,

the Department shall prepare a technical memorandum that sets forth the legal and factual basis for the draft Tier I operating permit terms and conditions (including references to the applicable statutory or regulatory provisions) or the draft denial. ()

02. Revised Memorandum for Proposed Permit. If the Department revises its analysis, its conclusions or the terms or conditions of the Tier I operating permit in response to public comment, the Department may revise the technical memorandum for the proposed permit or the proposed denial. ()

03. Release of Memorandum. The technical memorandum(s) shall be made available to the public in accordance with Section 364 and sent to the EPA with the proposed Tier I operating permit or proposed denial. ()

363. PREPARATION OF DRAFT PERMIT OR DRAFT DENIAL.

Except as otherwise provided in these rules, the Department shall prepare a draft permit or draft denial as promptly as practicable or one hundred twenty (120) days before the deadline for final action, whichever is earlier. ()

364. PUBLIC NOTICES, COMMENTS AND HEARINGS.

01. Generally. Except as otherwise provided in these rules, all Tier I operating permit proceedings shall provide for public notice and public comment, including offering an opportunity for a hearing, on a draft permit or on a draft denial. ()

02. Public Comment Package. A public comment package including the draft permit or draft denial, the technical memorandum and the application shall be prepared and distributed to appropriate public locations, the applicant and affected States. ()

03. Giving Notice. Notice shall be given: by publication in a newspaper of general circulation in the area where the Tier I source is located or in a State publication designed to give general public notice; by mailing the notice to persons on a mailing list developed by the Department, including those who request in writing to be on the list; by mailing the notice to all affected States; and by other means if necessary to ensure adequate notice to the affected public. ()

04. Content of the Notice. The notice shall identify the affected facility; provide the name and address of the permittee; provide the name and address of the Department processing the application; identify the draft permit action; identify the emissions change if the permit action is a permit revision or reopening; provide the locations where the public may locate a copy of the public comment package; provide the name, address, and telephone number of a person from whom interested persons may obtain additional information that is relevant to the permit decision by filing a written public documents request and paying any costs; provide a brief description of the comment procedures, including the deadline for comments and the name and address of the person to whom written comments must be delivered; and state the time and place of any hearing that has been scheduled or provide information regarding how a person may request a hearing. ()

05. Public Comment Procedures. ()

a. The Department shall provide at least thirty (30) days for public comment. ()

b. The Department may designate the person to receive written comments. ()

c. The Department shall give notice of any public hearing at least thirty (30) days in advance of the hearing. ()

d. The public hearing, if any, shall be an informal meeting, conducted by a hearing officer designated by the Department and transcribed. Written comments or supporting documents may be submitted during the hearing. ()

e. The public comments and additional information received during the comment period shall be available to the public upon the filing of a written public documents request and the payment of any costs. ()

365. PREPARATION OF PROPOSED PERMIT OR PROPOSED DENIAL.

01. Timeline. Except as otherwise provided by these rules, the Department shall prepare a proposed permit or proposed denial within thirty (30) days after the close of the public comment period, unless the Department determines that additional time is required to evaluate comments and information received. ()

02. Availability. The proposed permit or proposed denial shall be available to the public upon the filing a written public documents request and the payment of any costs. ()

03. Notice to Affected States. If the Department refuses to accept all recommendations that an affected State submitted during the public comment period, the Department shall send a copy of the notice sent to EPA in accordance with Subsection 366.01.d. to the affected State that submitted the recommendation. ()

366. EPA REVIEW PROCEDURES.

01. Submittal of Proposal to EPA. Except as otherwise provided in these rules and unless EPA waives its opportunity to review a proposed permit, the Department will transmit the following to EPA: ()

a. The proposed permit or proposed denial. ()

b. The technical memorandum, as revised if appropriate. ()

c. The application including all supplements and corrections submitted by the applicant, unless the applicant has submitted the information under a claim of confidentiality or unless the Department has entered an agreement with EPA to submit only a summary form and relevant portions of the permit application. ()

d. Notice of any refusal by the Department to accept all recommendations for the proposal that any affected State submitted during the public comment period. The notice shall include the Department's reasons for not accepting any such recommendation. The Department is not required to accept recommendations that are not based on applicable requirements. ()

02. Opportunity for EPA Objection. ()

a. EPA may submit to the Department a written objection to the proposal within forty-five (45) days of receipt of the transmittal identified in Subsection 366.01. ()

b. The written objection shall state the EPA's reasons for the objection and provide the terms and conditions that the Tier I operating permit must include to respond to the objection or state that the permit must be denied. ()

c. EPA shall provide a copy of the written objection to the applicant. ()

03. Response to EPA Objections. Within ninety (90) days of receiving a written objection from EPA, the Department shall prepare a revised proposal and submit it to EPA in accordance with Subsection 366.01. If EPA determines that the revised proposal is objectionable, the Department will review the permit action taken by EPA and take a comparable final permit action in accordance with Section 367. ()

04. Public Petitions to EPA. ()

a. If the EPA does not object in writing under Subsection 366.02, any person may petition the EPA within sixty (60) days after the expiration of the EPA's forty-five (45) day review period to make such objection. ()

b. Any such petition shall be based only on objections to the draft permit or draft denial that were raised with specificity during the public comment period provided for in Section 364 unless the petitioner demonstrates that it was impracticable to raise such objections within such period, or unless the grounds for such

objection arose after such period. ()

c. If the EPA objects to the proposal in accordance with Subsection 366.02 as a result of a petition filed under Subsections 366.04.a. and 366.04.b., the Department shall: ()

i. Not issue a permit action until EPA's objection has been resolved, except that a petition for review does not stay the effectiveness of a Tier I operating permit or its requirements pending EPA's review of the petition and Department review of the objection if the Tier I operating permit was issued by the Department after the end of the forty-five (45) day review period and prior to an EPA objection initiated by a petition. ()

ii. Process the objection in accordance with Subsection 366.03. ()

367. ACTION ON APPLICATION.

01. Issuance Conditions. Except as otherwise provided by these rules, a Tier I operating permit, or any portion thereof, may be issued only if all of the following conditions have been met: ()

a. The owner or operator has submitted a complete application in accordance with Section 361. ()

b. The public has been provided notice and opportunities for comment and a hearing in accordance with Section 364. ()

c. Affected States have been provided notice in accordance with Section 364 and Subsection 365.03. ()

d. The terms and conditions of the Tier I operating permit comply with Sections 321 through 336 including providing for compliance with all applicable requirements. ()

e. The EPA has been provided with the proposal and an opportunity to object and the Department has responded as required by Section 366. ()

02. Deadlines for Final Actions During Initial Period. Except as otherwise provided in these rules, during the initial period beginning May 1, 1994 and ending three (3) years after EPA approval of the Tier I operating program, the Department will prioritize all of the applications predicted to be submitted during the initial period considering the groups established in accordance with Subsection 313.02, if any. The prioritization will result in the Department taking final action on one-third (1/3) of all such permit applications during each of the one (1) year periods following EPA approval of the program. ()

03. Deadlines for Final Actions After Initial Period. Except as otherwise provided in these rules, during the period beginning three (3) years after EPA approval of the Tier I operating program, the Department shall take final action on complete applications within eighteen (18) months. ()

04. Deadline for Tier I Operating Permits with Early Reductions. The Department shall take final action on any complete Tier I operating permit application containing an early reduction demonstration under 42 U.S.C. Section 7412 (i)(5) within nine (9) months of receipt of the complete application. ()

05. Deadline for Tier I Operating Permits for Phase II Sources. The permitting of phase II sources shall occur in accordance with the deadlines in 42 U.S.C. Section 7651 through 7651o. ()

06. Copy to EPA. The Department shall send a copy of the final Tier I operating permit to EPA. ()

07. Original to Permittee. The Department shall send the original Tier I operating permit to the permittee. ()

368. EXPIRATION OF PRECEDING PERMITS.

If a timely and complete Tier I permit application is received by the Department and is not acted upon in a timely manner as prescribed by these rules, the permit to construct, Tier I operating permit or Tier II operating permit, if any, that has been previously issued to the owner or operator of the Tier I source by the Department or EPA shall continue in full force until the Department has completed action of the permit application. No Tier I operating permit will be considered to have expired due solely to the Department's inaction on a timely Tier I operating permit application. ()

369. TIER I OPERATING PERMIT RENEWAL.

01. Renewal Procedures. Tier I operating permits being renewed are subject to the same procedural requirements, including those for public participation, including affected State review, and EPA review, that apply to initial Tier I operating permit issuance. ()

02. Expiration and Renewal Application Shield. Tier I operating permit expiration terminates the source's right to operate unless a timely and complete renewal application has been submitted. ()

370. -- 379. (RESERVED)

380. CHANGES TO TIER I OPERATING PERMITS.

01. Applicability. Sections 380 through 399 establish procedures and requirements for permit revisions and changes requiring notice. These provisions do not alter the requirements for permits to construct set forth at Sections 200 through 228. ()

02. Changes Requiring Permit Revisions. Sections 381 through 383 establish procedures and requirements for Tier I operating permit revisions. A permit revision is required for changes that are not addressed or prohibited by the Tier I operating permit if such changes are subject to any requirements under Title IV of the Clean Air Act or are modifications under any provision of Title I of the Clean Air Act. ()

03. Changes Requiring Notice. Sections 384 and 385 establish procedures and requirements for providing notice by the permittee to the Department and EPA of certain emission trades and changes that contravene a permit term (Section 384), or certain changes that are not addressed or prohibited by the permit (Section 385). ()

04. Reopening. Section 386 establishes procedures for reopening the permit for cause by the Department, EPA, or the permittee. ()

05. Acid Rain. Changes regulated under Title IV of the Clean Air Act, 42 U.S.C. Sections 7651 through 7651o, shall be governed by regulations promulgated under Title IV of the Act. ()

381. ADMINISTRATIVE PERMIT AMENDMENTS.

01. Criteria. An administrative permit amendment is a permit revision that: ()

a. Corrects typographical errors; ()

b. Identifies a change in the name, address, or phone number of any person identified in the Tier I operating permit, or provides a similar minor administrative change at the Tier I source; ()

c. Requires more frequent monitoring or reporting by the permittee; ()

d. Allows for a change in ownership or operational control of a Tier I source where the Department determines that no other change in the Tier I operating permit is necessary, provided that a written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittee has been submitted to the Department; ()

e. Incorporates into the Tier I operating permit the requirements from a permit to construct that was

issued by the Department in accordance with Subsection 209.05.c.; or ()

f. Is any other type of change that EPA and the Department have determined as part of the Part 70 program to be similar to those in Subsections 381.01.a. through 381.01.d. ()

02. Administrative Permit Amendment Application Procedures. ()

a. If initiated by the permittee, the permittee shall submit a request to the Department. The request shall: ()

i. State at the beginning of the request that it is a "REQUEST FOR ADMINISTRATIVE PERMIT AMENDMENT." ()

ii. Describe the proposed administrative permit amendment including any permit to construct to be incorporated; ()

iii. State the date on which the proposed administrative amendment will occur at the facility; ()

iv. Identify any Tier I operating permit term or condition that is no longer applicable as a result of the change; and ()

v. Identify any applicable requirement that would apply to the Tier I source as a result of the change. ()

b. If initiated by the Department, the Department shall notify the permittee that the Department is initiating an administrative permit amendment and provide a brief summary of the proposed administrative permit amendment including all of the information required by Subsection 381.02.a.i. through 381.02.a.v. ()

c. The Department shall, within sixty (60) days of the receipt of a request for an administrative permit amendment, take final action on the request and may incorporate such changes without providing notice to the public or affected States provided that the Department designates any such administrative permit amendment as having been made pursuant to Section 381. The Department shall submit a copy of the revised permit, or an addendum, to the EPA and send the original to the permittee. ()

03. Implementation Procedures. ()

a. The permittee may implement the changes addressed in the request for an administrative permit amendment under Subsections 381.01.a. through 381.01.f. immediately upon submittal of the request. ()

b. If the permittee obtains a permit to construct under Subsection 209.05.c., then so long as the change does not violate any terms or conditions of the existing Tier I operating permit, the permittee may operate the source described in the permit to construct immediately upon submittal of the request for an administrative permit amendment. ()

04. Permit Shield. Upon final action by the Department, the permit shield described in Section 325 shall extend only to administrative permit amendments identified in Subsection 381.01.e. ()

382. SIGNIFICANT PERMIT MODIFICATION.

01. Criteria. Significant modification procedures shall be used for applications requesting permit revisions that do not qualify as minor permit modifications or as administrative amendments. Nothing herein shall be construed to preclude the permittee from making changes consistent with this chapter that would render existing permit compliance terms and conditions irrelevant. A significant permit modification is a permit revision for changes that: ()

a. Violate an existing Tier I permit term or condition derived from an applicable requirement; ()

b. Involve significant changes to existing monitoring, reporting or recordkeeping requirements in the permit. Every significant change in existing monitoring terms or conditions (except more frequent monitoring or reporting under Subsection 381.01.c.) and every relaxation of reporting or recordkeeping terms or conditions shall be considered significant; ()

c. Require or change a case-by-case determination of an emission limitation or other standard; a source-specific determination for temporary sources of ambient impacts; or a visibility or increment analysis; ()

d. Seek to establish or change a permit term or condition for which there is no corresponding underlying applicable requirement and that the source has assumed to avoid an applicable requirement to which the source would otherwise be subject. Such terms and conditions include, but are not limited to, an enforceable emissions cap assumed to avoid classification as a modification under any provision of Title I of the Clean Air Act or an alternative emissions limit for an early reduction of hazardous air pollutants that was approved pursuant to regulations promulgated under 42 U.S.C. Section 7412(i)(5) of the Clean Air Act; ()

e. Constitute a modification under any provision of Title I of the Clean Air Act; or ()

f. Could be processed as an administrative amendment or as a minor modification, except the permittee has requested the change be processed as a significant modification, including incorporating the requirements of a permit to construct that was issued by the Department in accordance with Subsection 209.05.a. ()

02. Significant Permit Modification Application Procedures. A permittee may initiate a significant permit modification by submitting a complete significant permit modification application to the Department. The application shall: ()

a. Request the use of significant permit modification procedures and state at the beginning of the request that it is a "REQUEST FOR SIGNIFICANT PERMIT MODIFICATION"; ()

b. Meet the standard application requirements of Sections 314 and 315; ()

c. Provide a summary sheet; ()

i. Describing the proposed significant permit modification; ()

ii. Describing and quantifying any change in emissions resulting from the significant permit modification including, but not limited to, an identification of any new regulated air pollutant(s) that will be emitted; ()

iii. Identifying any Tier I operating permit term or condition that will no longer be applicable as a result of the significant permit modification; and ()

iv. Identifying new applicable requirement resulting from the change. ()

d. Significant permit modifications shall be issued in accordance with all procedural requirements as they apply to Tier I operating permit issuance and renewal, including those for applications (Sections 314 and 315), public participation (Section 364), review by affected States (Sections 364 and 365), and review by EPA (Section 366). ()

e. The Department will process the majority of significant permit modifications within nine (9) months of receiving a complete application. The Department shall determine which significant permit modification applications will be processed within nine (9) months. ()

03. Implementation Procedures. The permittee shall comply with Sections 200 through 223 as applicable, including Subsection 209.05 governing permit to construct procedures for Tier I sources. ()

04. Permit Shield. Upon final action by the Department, the permit shield described in Section 325 shall extend to significant permit modifications. ()

383. MINOR PERMIT MODIFICATION.

01. Criteria. ()

a. Minor permit modification procedures may be used for permit modifications involving economic incentives, marketable permits, emissions trading, and other similar approaches explicitly provided for in the SIP or applicable requirements promulgated by EPA. A permittee may not use minor modification procedures for changes described in Subsections 382.01.a. through 382.01.e. ()

b. Any other permit modification that is not required to be processed as a significant permit modification under Section 382. ()

c. Groups of a permittee's applications eligible for processing as minor permit modifications may be processed under minor permit modification procedures if collectively, the changes proposed in the minor modification applications do not exceed the lesser of: ()

i. Ten percent (10%) of the emissions allowed by the existing Tier I operating permit for the emissions unit for which the change is requested; ()

ii. Twenty percent (20%) of the major facility criteria in Section 008; or ()

iii. Five (5) tons per year. ()

02. Minor Permit Modification Application Procedures. A permittee may initiate a minor permit modification by submitting a complete standard application described in Section 314 to the Department. The application shall: ()

a. Request the use of minor permit modification procedures and state at the beginning of the request that it is a "REQUEST FOR MINOR PERMIT MODIFICATION," designate either "INDIVIDUAL" or "GROUP" processing, and provide a summary sheet; ()

i. Describing the proposed minor permit modification; ()

ii. Stating the date on which the proposed minor permit modification will occur at the facility; ()

iii. Describing and quantifying any change in emissions resulting from the minor permit modification including, but not limited to, an identification of any new regulated air pollutant(s) that will be emitted; ()

iv. Identifying any Tier I operating permit term or condition that will no longer be applicable as a result of the minor permit modification; ()

v. Identifying any new applicable requirement that is applicable to the Tier I source as a result of the minor permit modification; ()

vi. Certifying by a responsible official under Section 123 that the proposed permit modification meets the criteria for a minor permit modification and, if applicable, the use of group processing procedures; and ()

vii. Listing the permittee's other pending applications awaiting group processing and a determination of whether the requested modification, aggregated with the other applications, equals or exceeds the thresholds under Subsection 383.01.c. above. ()

b. Include completed forms for the Department to use to notify the EPA and affected States as

required under Sections 364 and 366. ()

c. Include the applicant's suggested draft Tier I permit with the minor permit modification. ()

03. EPA and Affected State Notification Procedures. ()

a. Within five (5) working days of receipt of a complete minor permit modification application, the Department shall notify EPA and the affected States of the requested permit modification and forward the forms completed by the applicant and other required information, if any, to the EPA and affected States. Affected States and EPA review shall occur simultaneously. ()

b. On a quarterly basis or within five (5) working days of receiving an application demonstrating that the aggregate of a permittee's pending applications equals or exceeds the threshold level established in Subsection 383.01.c. above, whichever is earlier, the Department shall notify EPA and the affected States of the requested permit modification and forward the forms completed by the applicant and other required information, if any, to the EPA and affected States. Affected States and EPA review shall occur simultaneously. ()

c. The Department shall promptly notify EPA and any affected States in writing including its reasons for not accepting any such recommendation if the Department refuses to accept all the timely recommendations submitted by affected States. ()

d. Timetable for Issuance. The Department may not issue a final permit modification until after EPA's forty-five (45) day review period or until EPA has notified the Department that EPA will not object to issuance of the permit modification, whichever is first; although the Department can approve the permit modification prior to that time. ()

e. Within ninety (90) days of the Department's receipt of a complete minor permit modification application or within fifteen (15) days after the end EPA's forty-five (45) day review period, whichever is later, the Department shall take one (1) of the following actions: ()

i. Issue the minor permit modification as proposed; ()

ii. Deny the minor permit modification application; ()

iii. Determine that the requested minor permit modification does not meet the minor permit modification criteria and should be reviewed under the significant modification procedures; or ()

iv. Revise the proposed minor permit modification, transmit the revised proposal to the EPA in accordance with Section 366, and notify the permittee. ()

f. Within one hundred and eighty (180) days of the Department's receipt of a complete application for modifications eligible for group processing or within fifteen (15) days after the end of EPA's forty-five (45) day review period, whichever is later, the Department shall take one (1) of the actions specified in Subsections 383.03.e.i., 383.03.e.ii., 383.03.e.iii., or 383.03.e.iv. ()

04. Implementation Procedures. ()

a. The permittee may make the change proposed in its minor permit modification immediately upon submittal of a complete application to the Department before final action by the Department. ()

b. After the source makes the allowed change and until the Department takes any of the actions specified in Subsections 383.03.e.i., 383.03.e.ii., or 383.03.e.iii., the permittee must comply with both the applicable requirements governing the change and the proposed terms and conditions. ()

c. During this time period, the permittee need not comply with the existing permit terms and conditions it seeks to modify; provided that, if the source fails to comply with the applicable requirements governing the change and the proposed revisions, the existing permit terms and conditions it seeks to modify may be enforced

against it. ()

05. Permit Shield. The permit shield described in Section 325 shall not apply to any minor permit modification. ()

384. SECTION 502(B)(10) CHANGES AND CERTAIN EMISSION TRADES.

01. Criteria. This section authorizes emission changes within a permitted facility without requiring a permit revision, if the changes are not modifications under any provision of the Title I of the Clean Air Act and the changes do not exceed the emissions allowable under the permit (whether expressed therein as a rate of emissions or total emissions). ()

a. Changes authorized are changes that: ()

i. Are Section 502(b)(10) changes; ()

ii. Are changes involving trades of increases and decreases of emissions within the permitted facility where the State Implementation Plan provides for such emissions trades without requiring a permit revision. SIP trades are allowed in compliance with this Section even if the Tier I operating permit does not already provide for such emission trading; or ()

iii. Are changes made under the terms and conditions of the Tier I permit that authorize the trading of emissions increases and decreases within the permitted facility for the purpose of complying with a federally-enforceable emissions cap that is established by the Department in the Tier I operating permit independent of otherwise applicable requirements. ()

b. Changes constituting a modification under Title I of the Clean Air Act or subject to a requirement under Title IV of the Clean Air Act are not authorized by this Section. ()

02. Notice Procedures. The permittee may make a change under this Section if the permittee provides written notification to the Department and EPA so that the notification is received at least seven (7) days in advance of the proposed change; or, in the event of an emergency, the permittee provides the notification so that it is received at least twenty-four (24) hours in advance of the proposed change. The permittee, the Department, and EPA shall attach the notification to their copy of the Tier I operating permit. ()

a. For each such change, the written notification shall: ()

i. State at the beginning of the notification “NOTIFICATION OF SECTION 502(b)(10) CHANGE” or “NOTIFICATION OF EMISSION TRADE”; ()

ii. Describe the proposed change; ()

iii. Provide the date on which the proposed change will occur; ()

iv. Describe and quantify any expected change in emissions including identification of any new regulated air pollutant(s) that will be emitted; ()

v. Identify any permit term or condition that is no longer applicable as a result of the change; ()

vi. Specifically identify and describe the emergency, if any; and ()

vii. Identify any new applicable requirement that would apply to the Tier I source as a result of the change. ()

b. For changes described in Subsection 384.01.a.ii., the written notification shall also include: ()

- i. Identification of the provisions in the SIP that provide for the emissions trade; ()
 - ii. All of the information required by the provision in the SIP authorizing the emissions trade; ()
 - iii. Specific identification of the provisions in the SIP with which the permittee will comply; and ()
 - iv. The pollutants subject to the trade. ()
- c. For changes described in Subsection 384.01.a.iii., the written notification shall also describe how the change will comply with the terms and conditions of the permit. ()

03. Permit Shield. The permit shield described in Section 325 shall only extend to changes made in accordance with Subsection 384.01.a.iii. ()

385. OFF-PERMIT CHANGES AND NOTICE.

01. Criteria. This section authorizes changes that are neither addressed nor prohibited by the Tier I operating permit to be made without a permit revision if each such change meets all applicable requirements and does not violate any existing permit terms or conditions. Changes constituting a modification under Title I of the Clean Air Act, or subject to a requirement under Title IV of the Clean Air Act are not off-permit changes. ()

02. Notice Procedure. Sources must provide written notice to the Department and EPA of each such change except changes that qualify as insignificant under Section 317, within seven (7) days of making the off-permit change. ()

- a. The written notification provided to the Department and EPA shall: ()
 - i. State at the beginning of the notification “NOTIFICATION OF OFF-PERMIT CHANGE”; ()
 - ii. Describe the off-permit change; ()
 - iii. State the date on which the off-permit change will occur or has occurred; ()
 - iv. Describe and quantify any change in emissions resulting from the off-permit change including, but not limited to, an identification of any new regulated air pollutant(s) that will be emitted; and ()
 - v. Identify any new applicable requirement that is applicable to the Tier I source as a result of the off-permit change. ()
- b. The permittee shall keep a record at the facility describing all off-permit changes made at the Tier I source that result in emissions of a regulated air pollutant subject to an applicable requirement, but not otherwise regulated under the permit, and identifying the emissions resulting from those changes. ()

03. Permit Shield Applicability. The permit shield described in Section 325 shall not apply to any off-permit change. ()

386. REOPENING FOR CAUSE.

The Department shall reopen a Tier I permit if cause exists. ()

- 01. Criteria.** Cause for reopening exists under any of the following circumstances: ()
 - a. Additional applicable requirements become applicable to a major Tier I source with a remaining permit term of three (3) or more years; provided that no such reopening is required if the original effective date of the

applicable requirement is later than the date on which the Tier I operating permit is due to expire and the original Tier I operating permit or any of its terms and conditions has not been extended pursuant to Section 368; provided further that the permittee must comply with the additional applicable requirement no later than the effective date; ()

b. Whenever additional applicable requirements become applicable to an affected source, as defined for the purposes of the acid rain program; ()

c. The Department or EPA determines that the Tier I operating permit contains a material mistake or inaccurate statements were used or considered in establishing the emissions standards or other terms or conditions of the Tier I operating permit; or ()

d. The Department or EPA determines that the Tier I operating permit does not ensure compliance with the applicable requirements. ()

02. Procedures for Reopenings. ()

a. The Department shall follow the same procedures for reopening as they apply to initial permit issuance and shall affect only those parts of the permit for which cause to reopen exists. Reopenings shall be made as expeditiously as practicable in accordance with Sections 360 through 379. ()

b. The Department shall notify the permittee in writing of reopening and provide a brief summary of the reason for the reopening at least thirty (30) days prior to the reopening. ()

c. The EPA may initiate reopenings for circumstances listed in Subsections 386.01.a. through 386.01.d. by providing written notification to the Department and the permittee. ()

i. The Department shall within ninety (90) days after receipt of notification from EPA, forward to EPA a proposed determination of termination, revocation, revision, or revocation and reissuance, as appropriate. The Administrator may extend the ninety (90) day period for an additional ninety (90) days if EPA finds that a new or revised permit application is necessary or that the Department must require the permittee to submit additional information. ()

ii. The EPA will review the proposed determination from the Department within ninety (90) days of receipt. ()

iii. The Department shall have ninety (90) days from receipt of an EPA objection to resolve any EPA objection and to terminate, modify, or revoke and reissue the permit. ()

iv. If the Department fails to submit a proposed determination or fails to resolve any EPA objection, the EPA may terminate, modify, revoke and reissue the permit after taking the following actions: ()

(1) Providing at least thirty (30) days' notice to the permittee in writing of the reason for such action, and ()

(2) Providing the permittee an opportunity for comment on the EPA's proposed action and an opportunity for a hearing. ()

387. REGISTRATION AND REGISTRATION FEES.

The purpose of Sections 387 through 397 is to set forth the requirements for the annual registration of Tier I sources, and the annual assessment and payment of fees to support the Tier I permitting program. ()

388. APPLICABILITY.

01. Applicability. Sections 387 through 397 shall apply to all major facilities, as defined in Section 008, including facilities that obtained air quality permits that limited potential emissions below major facility levels during the previous year. Facilities, sources and emissions exempt under Section 301 are not required to register or pay fees. ()

02. Deferred Sources. Certain sources may qualify for and request deferral from the Tier 1 operating permit program under Subsection 301.02.b.iv. and thereby not pay Tier I fees. On or before such time as those deferred sources are required to submit a Tier 1 operating permit application, the Department shall reconsider Sections 387 through 397 to determine whether an alternative basis upon which those sources shall register and be assessed and pay fees should be developed. ()

389. REGISTRATION INFORMATION.

Any person owning or operating a facility or source during the previous calendar year or any portion of the previous calendar year for which Sections 387 through 397 apply shall, by April 1 of each year, register with the Department and submit the following information (submittal forms are located at the DEQ website at <http://www.deq.idaho.gov>): ()

01. Facility Information. The name, address, telephone number and location of the facility; ()

02. Owner/Operator Information. The name, address and telephone numbers of the owners and operators; ()

03. Facility Emission Units. The number and type of emission units present at the facility or the Tier I permit number for the facility; and ()

04. Pollutant Registration. The actual emissions from the previous calendar year for oxides of sulfur (SO_x), oxides of nitrogen (NO_x), particulate matter (PM₁₀), and volatile organic compounds (VOC) calculated using methods to include, but not limited to, continuous emissions monitoring (CEMS), certified source tests, material balances (mass-balance), state/industry emission factors, or AP-42 emission factors applied to throughput, actual operating hours, production rates, in-place control equipment, or the types of materials processed, stored, or combusted. ()

05. Radionuclide Registration. The amount of radionuclides from facilities regulated under 40 CFR Part 61, Subpart H, for which the registrant wishes to be registered to emit from each source in curies per year except that no amount in excess of or less than an existing permit, consent order, or judicial order will be allowed. ()

390. REGISTRATION FEE.

This registration fee structure shall be reviewed at least every two (2) years to assure the funds meet the presumptive minimum as defined by EPA. The annual registration fee as determined in Section 390 shall be paid as provided in Section 393. ()

01. Tier I Annual Fee. The Tier I annual fee schedule shall be as follows: ()

a. A fixed annual fee for Tier I major sources emitting regulated air pollutants listed in Subsection 389.04 as follows: ()

i. Seven thousand (7,000) tons per year and above shall pay seventy-one thousand five hundred dollars (\$71,500); ()

ii. Four thousand five hundred (4,500) tons per year and above shall pay forty-two thousand nine hundred dollars (\$42,900); ()

iii. Three thousand (3,000) tons per year and above shall pay twenty-eight thousand six hundred dollars (\$28,600); ()

iv. One thousand (1,000) tons per year and above shall pay twenty-two thousand seven hundred fifty dollars (\$22,750); ()

v. Five hundred (500) tons per year and above shall pay eleven thousand fifty dollars (\$11,050); ()

vi. Two hundred (200) tons per year and above shall pay seven thousand one hundred fifty dollars (\$7,150); and ()

vii. Less than two hundred (200) tons per year shall pay three thousand five hundred seventy-five dollars (\$3,575); plus ()

b. A per ton annual fee of thirty-nine dollars and forty-eight cents (\$39.48) per ton for all regulated air pollutant emissions listed in Subsection 389.04 as follows: ()

i. Greater than or equal to four thousand five hundred (4,500) tons per year not to exceed one hundred forty-three thousand dollars (\$143,000); ()

ii. Greater than or equal to three thousand (3,000) but less than four thousand five hundred (4,500) tons per year not to exceed seventy-one thousand five hundred dollars (\$71,500); ()

iii. Greater than or equal to one thousand (1,000) but less than three thousand (3,000) tons per year not to exceed thirty-five thousand one hundred dollars (\$35,100); ()

iv. Greater than or equal to five hundred (500) but less than one thousand (1,000) tons per year not to exceed twenty-five thousand twenty-five dollars (\$25,025); ()

v. Greater than or equal to two hundred (200) but less than five hundred (500) tons per year not to exceed ten thousand seven hundred twenty-five dollars (\$10,725); and ()

vi. Less than two hundred (200) tons per year not to exceed three thousand five hundred seventy-five dollars (\$3,575). ()

02. Fee-for-Service. The fee-for-service shall be as follows: Sources requesting Section 300 permit modifications or renewals, or receiving program maintenance services, including but not limited to site visits, response to public inquiries, modeling, responses to site questions and opacity readings by the Department shall be assessed a fee for actual time expended and expenses incurred by the Department in the previous calendar year in an amount not to exceed twenty thousand dollars (\$20,000) per facility per year as a fee-for-service. Service shall be conducted by qualified Department staff or contractors. ()

03. Radionuclide Registration Fee. ()

a. A registration fee of five dollars per curie per year (\$5/curie/year) shall be paid by facilities regulated under 40 CFR Part 61, Subpart H. ()

b. The registration fee may be paid as provided in Section 397. ()

391. REQUEST FOR INFORMATION.

Any additional information, plans, specifications, evidence or documents that the Department may require to make the determinations required under Sections 387 through 397 shall be furnished on request. ()

392. REGISTRATION FEE ASSESSMENT.

All facilities to which Sections 387 through 397 apply shall pay to the Department an annual registration fee as required by Section 390. The Department shall determine the fee based on the information supplied by the registrant and the Department's analysis of information available. In the event of a failure of a facility to submit pertinent registration information, the Department may calculate the fee and shall assess the facility the fee and the costs of calculating the fee. No later than May 15 of each year, or within fifteen (15) days following the adjournment of the regular session of the Idaho State Legislature, whichever is later, the Department shall send to each registrant, to which Sections 387 through 397 apply, by certified mail, an assessment of the annual fee payable by the registrant. ()

393. PAYMENT OF TIER I REGISTRATION FEE.

01. Fee Payment Date. The registration fee shall be paid to and received by the Department no later than July 1 of each year, or within forty-five (45) days following the receipt of the registration fee assessment in Section 392, whichever is later. Checks should be made payable to "Department of Environmental Quality." ()

02. Fee Payments Mailing Address. All fee payments should be sent to:

Air Quality Tier I Registration Fees
Idaho Department of Environmental Quality
1410 N. Hilton, Boise, Idaho 83706-1255 ()

394. EFFECT OF DELINQUENCY ON APPLICATIONS.

No permit to construct or operate, other than those issued at the discretion of the Director, shall be accepted for processing, processed, or issued by the Department for any facility or to any person having Tier I operating permit fees delinquent in full or in part. ()

395. APPEALS.

Persons may file an appeal within thirty-five (35) days of the date the person received an assessment issued under Section 392. The appeal shall be filed in accordance with IDAPA 58.01.23, "Rules of Administrative Procedure Before the Board of Environmental Quality." ()

396. EXEMPTIONS.

01. Registration Fees. The following facilities or sources are exempt from paying registration fees under Sections 387 through 397: ()

a. Facilities and sources specified by the Department, after public notice, as exempt from the payment of registration fees; and ()

b. Country grain elevators. ()

02. Registering and Paying Fees. The following facilities or sources are exempt from registering and paying registration fees under Sections 387 through 397: ()

a. Facilities and sources specified by the Department, after public notice, as exempt from registration and the payment of registration fees; ()

b. Confined animal feeding operations; and ()

c. Insignificant activities identified in Subsection 317.01. ()

03. Paying Fees. The following emissions are exempt from registering and paying registration fees under Sections 387 through 397: ()

a. Fugitive emissions from wood products. ()

b. Fugitive dust emissions, except facilities listed in Subsections 008.10.c.i. and 008.10.c.ii. Facilities listed in that section shall not be required to pay fees for fugitive dust emission in excess of one hundred (100) tons. ()

397. LUMP SUM PAYMENTS OF REGISTRATION FEES.

01. Agreement. The Department may, in its discretion, enter an agreement with any person for the lump sum payment of all, or any addition to, the registration fees required by Section 390. ()

02. Minimum Amount. The minimum amount for any lump sum agreement shall be three hundred thousand dollars (\$300,000). ()

03. Payment Waiver. Upon the execution and full performance of the agreement by the person, the Department shall waive the payment requirements of Section 390. All other provisions of Sections 387 through 397 shall remain applicable to the person. ()

398. -- 399. (RESERVED)

400. PROCEDURES AND REQUIREMENTS FOR TIER II OPERATING PERMITS.
The purpose of Sections 400 through 410 is to establish uniform procedures for the issuance of "Tier II Operating Permits." ()

401. TIER II OPERATING PERMIT.

01. Optional Tier II Operating Permits. The owner or operator of any stationary source or facility which is not subject to (or wishes to accept limitations on the facility's potential to emit so as to not be subject to) Sections 300 through 399 may apply to the Department for an operating permit to: ()

- a.** Authorize the use of alternative emission limits (bubbles) pursuant to Section 440; ()
- b.** Authorize the use of an emission offset pursuant to Sections 204.02.b. or 206; ()
- c.** Authorize the use of a potential to emit limitation, an emission reduction or netting transaction to exempt a facility or modification from certain requirements for a permit to construct; ()
- d.** Authorize the use of a potential to emit limitation to exempt the facility from Tier I permitting requirements. ()
- e.** Bank an emission reduction credit pursuant to Section 461; ()

02. Required Tier II Operating Permits. ()

- a.** A Tier II operating permit is required for any stationary source or facility which: ()
 - i.** Is not subject to Sections 300 through 399 with a permit to construct which establishes any emission standard different from those in these rules. ()
 - ii.** Has annual actual mercury emissions in excess of sixty-two (62) pounds. Fugitive emissions shall not be included in a determination of the actual mercury emissions. The owner or operator of the stationary source or facility shall submit a Tier II permit application for review and approval by the Department, no later than twelve (12) months after becoming subject to Subsection 401.02.a.ii., that includes an MBACT analysis for all sources that emit mercury. A determination of applicability under Subsection 401.02 shall be based upon best available information. An MBACT analysis for review and approval by the Department shall be included in a Tier II renewal application for any mercury emitting source not otherwise subject to MBACT. ()
- b.** Stationary sources within a source category subject to 40 CFR Part 63 are exempt from the requirements of Subsection 401.02.a.ii. ()

03. Tier II Operating Permits Required by the Department. The Director may require or revise a Tier II operating permit for any stationary source or facility whenever the Department determines that: ()

- a.** Emission rate reductions are necessary to attain or maintain any ambient air quality standard or applicable prevention of significant deterioration (PSD) increment; or ()
- b.** Specific emission standards, or requirements on operation or maintenance are necessary to ensure compliance with any applicable emission standard or rule. ()

04. Multiple Tier II Operating Permits. Subject to approval by EPA, the Director may issue one (1)

or more Tier II operating permits to a facility which allow any specific stationary source or emissions unit within that facility a future compliance date of up to three (3) years beyond the compliance date of any provision of these rules, provided the Director has reasonable cause to believe such a future compliance date is warranted. ()

05. Tier II Operating Permits Establishing a Facility Emissions Cap. The owner or operator of any stationary source or facility may request a Tier II operating permit establishing a Facility Emissions Cap (FEC) pursuant to Sections 175 through 181. ()

402. APPLICATION PROCEDURES.

Application for a Tier II operating permit must be made using forms furnished by the Department, or by other means prescribed by the Department. The application shall be certified by the responsible official and shall be accompanied by all information necessary to perform any analysis or make any determination required under Sections 400 through 410. ()

01. Required Information. Site information, plans, description, specifications, and drawings showing the design of the stationary source, facility, or modification, the nature and amount of emissions (including secondary emissions), and the manner in which it will be operated and controlled. ()

02. Additional Specific Information. ()

a. For emission reduction credits, a description of the emission reduction credits proposed for use, including descriptions of the stationary sources or facilities providing the reductions, a description of the system of continuous emission control which provides the emission reduction credits, emission estimates, and other information necessary to determine that the emission reductions satisfy the requirements for emission reduction credits (Section 460); and ()

b. For alternative emission limits (bubbles) or emission offsets, information on the air quality impacts of the traded emissions as necessary to determine the change in ambient air quality that would occur. ()

c. For restrictions on potential to emit, a description of the proposed potential to emit limitations including the proposed monitoring and recordkeeping requirements that will be used to verify compliance with the limitations. ()

03. Estimates of Ambient Concentrations. All estimates of ambient concentrations shall be based on the applicable air quality models, data bases, and other requirements specified in 40 CFR 51 Appendix W (Guideline on Air Quality Models). ()

a. Where an air quality model specified in the "Guideline on Air Quality Models" is inappropriate, the model may be modified or another model substituted, subject to written approval of the Administrator of the U.S. Environmental Protection Agency and public comment pursuant to Subsection 404.01.c. ()

b. Methods like those outlined in the U.S. Environmental Protection Agency's "Interim Procedures for Evaluating Air Quality Models (revised)" (1984) should be used to determine the comparability of air quality models. ()

04. Additional Information. Any additional information, plans, specifications, evidence or documents that the Department may require to make the determinations required under Sections 400 through 410 shall be furnished upon request. ()

403. PERMIT REQUIREMENTS FOR TIER II SOURCES.

No Tier II operating permit shall be granted unless the applicant shows to the satisfaction of the Department that: ()

01. Emission Standards. The stationary source would comply with all applicable local, state or federal emission standards. ()

02. NAAQS. The stationary source would not cause or significantly contribute to a violation of any

ambient air quality standard. ()

404. PROCEDURE FOR ISSUING PERMITS.

01. General Procedures. General procedures for Tier II operating permits. ()

a. Within thirty (30) days after receipt of the application for a Tier II operating permit, the Department shall determine whether the application is complete or whether more information must be submitted and shall notify the applicant of its findings in writing. ()

b. Within sixty (60) days after the application is determined to be complete the Department shall: ()

i. Notify the applicant in writing of the approval, conditional approval, or denial of the application if an opportunity for public comment is not required pursuant to Subsection 404.01.c. The Department shall set forth reasons for any denial; or ()

ii. Issue a proposed approval, proposed conditional approval, or proposed denial. ()

c. An opportunity for public comment shall be provided on an application for any Tier II operating permit pursuant to Subsection 401.01, any application which uses fluid modeling or a field study to establish a good engineering practice stack height pursuant to Sections 510 through 516 and any other application which the Director determines an opportunity for public comment should be provided. ()

i. The Department's proposed action, together with the information submitted by the applicant and the Department's analysis of the information, shall be made available to the public in at least one (1) location in the region in which the stationary source or facility is to be located. ()

ii. The availability of such materials shall be made known by notice published in a newspaper of general circulation in the county(ies) in which the stationary source or facility is to be located. ()

iii. A copy of such notice shall be sent to the applicant and to appropriate federal, state and local agencies. ()

iv. There shall be a thirty (30) day period after initial publication for comment on the Department's proposed action, such comment to be made in writing to the Department. ()

v. After consideration of comments and any additional information submitted during the comment period, and within forty-five (45) days after initial publication of the notice, unless the Director deems that additional time is required to evaluate comments and information received, the Department shall notify the applicant in writing of approval, conditional approval, or denial of the permit. The Department shall set forth the reasons for any denial. ()

vi. All comments and additional information received during the comment period, together with the Department's final determination, shall be made available to the public at the same location as the preliminary determination. ()

d. A copy of each proposed and final permit will be sent to the U.S. Environmental Protection Agency. ()

02. Specific Procedures. Procedures for Tier II operating permits required by the Department under Subsection 401.03. ()

a. The Director shall send a notification to the proposed permittee by registered mail of his intention to issue a Tier II operating permit for the facility concerned. The notification shall contain a copy of the proposed permit in draft form stating the proposed emission standards and any required action, with corresponding dates, which must be taken by the proposed permittee in order to achieve or maintain compliance with the proposed Tier II

operating permit. ()

b. The Department's proposed Tier II operating permit shall be made available to the public in at least one (1) location in the region in which the facility is located. The availability of such materials shall be made known by notice published in a newspaper of general circulation in the county(ies) in which the facility is located. A copy of such notice shall be sent to the applicant. There shall be a thirty (30) day period after publication for comment on the Department's proposed Tier II operating permit. Such comment shall be made in writing to the Department. ()

c. A public hearing will be scheduled to consider the standards and limitations contained in the proposed Tier II operating permit if the proposed permittee files a request therefor with the Department within ten (10) days of receipt of the notification, or if the Director determines that there is good cause to hold a hearing. ()

d. After consideration of comments and any additional information submitted during the comment period or at any public hearing, the Director shall render a final decision upon the proposed Tier II operating permit within thirty (30) days of the close of the comment period or hearing. At this time the Director may adopt the entire Tier II operating permit as originally proposed or any part or modification thereof. ()

e. All comments and additional information received during the comment period, together with the Department's final permit, shall be made available to the public at the same location as the proposed Tier II operating permit. ()

03. Availability of Fluid Models and Field Studies. The Department will notify the public of the availability of any fluid model or field study used to establish a good engineering practice stack height and provide an opportunity for a public hearing before issuing a permit or setting an emission standard based thereon. ()

04. Permit Revision or Renewal. The Director may approve a revision of any Tier II operating permit or renewal of any Tier II operating permit provided the stationary source or facility continues to meet all applicable requirements of Sections 400 through 410. Revised permits will be issued pursuant to procedures for issuing permits (Section 404), except that the requirements of Subsection 404.01.c. shall only apply if the permit revision results in an increase in allowable emissions or if deemed appropriate by the Director. Renewed Tier II operating permits will be issued pursuant to procedures for issuing permits (Section 404), except that the requirements of Subsections 404.01.c., and 404.02.b. through 404.02.e. shall only apply if the permit revision results in an increase in allowable emissions or if deemed appropriate by the Director. The expiration of a permit will not affect the operation of a stationary source or a facility during the administrative procedure period associated with the permit renewal process. The permittee shall submit a complete application to the Department for a renewal of the terms and conditions establishing the Tier II operating permit at least six (6) months before, but no earlier than eighteen (18) months before, the expiration date of the existing permit. To ensure that the term of the permit does not expire before the terms and conditions are renewed, the permittee is encouraged to submit the application nine (9) months prior to expiration. ()

05. Transfer of Tier II Permit. ()

a. Transfers by Revision. A Tier II permit may be transferred to a new owner or operator in accordance with Subsection 404.04. ()

b. Automatic Transfers. Any Tier II permit, with or without transfer prohibition language, may be automatically transferred if: ()

i. The current permittee notifies the Department at least thirty (30) days in advance of the proposed transfer date; ()

ii. The notice provides written documentation signed by the current and proposed permittees containing a date for transfer of permit responsibility, designation of the proposed permittee's responsible official, and certification that the proposed permittee has reviewed and intends to operate in accordance with the permit terms and conditions; and ()

iii. The Department does not notify the current permittee and the proposed permittee within thirty (30) days of receipt of the notice of the Department's determination that the permit must be revised pursuant to Subsection 404.04. If the Department does not issue such notice, the transfer is effective on the date provided in the notice described in Subsection 404.05.b.ii. ()

405. CONDITIONS FOR TIER II OPERATING PERMITS.

01. Reasonable Conditions. The Department may impose any reasonable conditions upon an approval, including conditions requiring the stationary source or facility to be provided with: ()

- a. Sampling ports of a size, number, and location as the Department may require; ()
- b. Safe access to each port; ()
- c. Instrumentation to monitor and record emissions data; ()
- d. Instrumentation for ambient monitoring to determine the effect emissions from the stationary source or facility may have, or are having, on the air quality in any area affected by the stationary source or facility; and ()
- e. Any other sampling and testing facilities as may be deemed reasonably necessary. ()

02. Performance Tests. Any performance tests required by the permit shall be performed in accordance with methods and under operating conditions approved by the Department. The owner or operator shall furnish to the Department a written report of the results of such performance test. ()

- a. Such test shall be at the expense of the owner or operator. ()
- b. The Department may monitor such test and may also conduct performance tests. ()
- c. The owner or operator of a stationary source or facility shall provide the Department fifteen (15) days prior notice of the performance test to afford the Department the opportunity to have an observer present. ()

03. Permit Term. Tier II operating permits shall be issued for a period not to exceed five (5) years. This five (5) year operating permit restriction does not apply to the provisions contained in Section 461.02 (banked emission reduction credits). ()

04. Single Tier II Operating Permit. When a facility includes more than one (1) stationary source or emissions unit, a single Tier II operating permit may be issued including all stationary sources and emissions units located at that facility. Such Tier II operating permit shall separately identify each stationary source and emissions unit to which the Tier II operating permit applies. When a single stationary source or facility is subject to permit modification, suspension or revocation, such action by the Director shall only affect that individual stationary source or emissions unit without thereby affecting any other stationary source or emissions unit subject to that Tier II operating permit. ()

406. OBLIGATION TO COMPLY.

Receiving a Tier II operating permit shall not relieve any owner or operator of the responsibility to comply with all applicable local, state and federal rules and regulations. ()

407. TIER II OPERATING PERMIT PROCESSING FEE.

01. Tier II Operating Permit Processing Fee. A Tier II operating permit processing fee, calculated by the Department pursuant to the categories provided in the following table, shall be paid to the Department by the person receiving a Tier II permit or permit renewal. The fee calculation shall not include fugitive emissions.

TIER II OPERATING PERMIT CATEGORY	FEE
General permit, no facility specific requirements (Defined as a source category specific permit for which the Department has developed standard emission limitations, operating requirements, monitoring and recordkeeping requirements, and that require minimal engineering analysis.)	\$500
Stationary sources or facilities with permitted emissions of less than one (1) ton per year	\$1,250
Stationary sources or facilities with permitted emissions of one (1) to less than ten (10) tons per year	\$2,500
Stationary sources or facilities with permitted emissions of ten (10) to less than one hundred (100) tons per year	\$5,000
Stationary sources or facilities with permitted emissions of one hundred (100) tons or more per year	\$10,000
Synthetic minor stationary sources with permitted emissions below a major threshold level	\$10,000

()

02. Tier II Operating Permit Processing Fee Not Required. So long as the Department determines no other review or analysis is required, the Tier II operating permit processing fee is not required to be submitted when:

()

- a. A permit to construct issued within the last five (5) years is rolled into a Tier II permit; ()
- b. A change to correct typographical errors is requested; ()
- c. A change in the name or ownership of the holder of a Tier II operating permit is requested; or ()

d. A synthetic minor permit is issued and the Department's processing costs can be charged against fees collected from the person receiving the permit under Title V of the federal Clean Air Act amendments of 1990. ()

408. PAYMENT OF TIER II OPERATING PERMIT PROCESSING FEE.

01. Fee Submittal. The Tier II operating permit processing fee shall be payable upon receipt of an assessment sent, along with the final permit or permit renewal, to the person receiving a permit or permit renewal by the Department. The Tier II operating permit fee should be sent to:

Air Quality Tier II Fees
 Fiscal Office
 Idaho Department of Environmental Quality
 1410 N. Hilton, Boise, ID 83706-1255

()

02. Delinquency. Failure to submit a Tier II operating permit processing fee within forty-five (45) days of receipt of an assessment by the Department will result in a monthly accrual of interest in the amount of twelve percent (12%) per annum on the outstanding balance until the fee is paid in full. ()

409. RECEIPT AND USAGE OF FEES.

Tier II operating permit processing fee and delinquency interest receipts shall be deposited by the Department into a stationary source permit account. Monies from this account shall be used solely toward technical, legal and administrative support of the Department's Permit to Construct and Tier II permit programs and shall not be used for those activities supported by the fund created for implementing the operating permit program required under Title V of the federal Clean Air Act amendments of 1990. The Department will review the Tier II fee schedule at least every

two (2) years. ()

410. APPEALS.

A person may be able to file an appeal within thirty-five (35) days of the date the person receives an assessment under Section 407, in accordance with IDAPA 58.01.23, "Rules of Administrative Procedure Before the Board of Environmental Quality." ()

411. -- 439. (RESERVED)

440. REQUIREMENTS FOR ALTERNATIVE EMISSION LIMITS (BUBBLES).

The owner or operator of any facility may apply to the Department for a Tier I or Tier II operating permit (or a revision thereto) to authorize an alternative emission limit for any stationary source or emissions unit within the facility. The Department may issue or revise a Tier II operating permit or issue a significant modification to a Tier I operating permit which authorizes an alternative emission limit provided that all of the following are met: ()

01. Actual Emissions. There is no increase in actual emissions of the applicable air pollutant at the facility. ()

02. Emission Reductions. All emission reductions satisfy the requirements for emission reduction credits (Section 460). ()

03. Trade Requirements. All trades involve the same air pollutant and demonstrate ambient equivalence as specified in Subsection 441.02. ()

04. Applicable Requirement Prohibition. No applicable Section of 40 CFR Part 60, 40 CFR Part 61, or 40 CFR Part 63, best available control technology requirement, lowest achievable emission rate requirement, or visual emission standard is exceeded. ()

05. Actual HAP/TAP Emissions. The actual emissions of any hazardous air pollutant or any toxic air pollutant are not increased. ()

06. Fugitive Dust Trades. Where the trade involves fugitive dust, the owner or operator shall undertake an adequate post-approval monitoring program to evaluate the ambient results of the controls. If the monitoring data indicate that the air quality effects are not equivalent, then: ()

a. Further reductions must be proposed by the owner or operator; and/or ()

b. The applicable emission standards in the operating permit will be adjusted by the Department; ()

07. Compliance Schedule Extension. Any compliance schedule extension for a facility in a nonattainment area is consistent with reasonable further progress. ()

08. EPA Approval. Approval of the U.S. Environmental Protection Agency, and where necessary the appropriate court, has been obtained for any individual stationary source or facility which is the subject of a federal enforcement action or outstanding enforcement order. ()

441. DEMONSTRATION OF AMBIENT EQUIVALENCE.

The demonstration of ambient equivalence shall: ()

01. VOC Trades. For trades involving volatile organic compounds, show that total emissions are not increased for the air basin in which the stationary source or facility is located. ()

02. Other Trades. For trades involving any other air pollutant, show through appropriate dispersion modeling that the trade will not cause a significant contribution at any modeled receptor. ()

442. -- 459. (RESERVED)

460. REQUIREMENTS FOR EMISSION REDUCTION CREDIT.

In order to be credited in a permit to construct, Tier I operating permit or Tier II operating permit any emission reduction must satisfy the following: ()

01. Allowable Emissions. The proposed level of allowable emissions must be less than the actual emissions of the stationary source(s) or emission unit(s) providing the emission reduction credit. No emission reduction(s) can be credited for actual emissions which exceed the allowable emissions of the stationary source(s) or emission unit(s). ()

02. Timing of Emission Reduction. In an attainment or unclassifiable area any emission reduction which occurs prior to the minor source baseline date must have been banked with the Department prior to the minor source baseline date in order to be credited; in a nonattainment area the emission reduction must occur after the base year of any control strategy for the particular air pollutant. ()

03. Emission Rate Calculation. The emission rate before and after the reduction must be calculated using the same method and averaging time and the characteristics necessary to evaluate any future use of the emission reduction credit must be described. ()

04. Permit Issuance. A permit to construct, Tier I operating permit or Tier II operating permit shall be issued which establishes a new emission standard for the facility, or restricts the operating rate, hours of operation, or the type or amount of material combusted, stored or processed for the stationary source(s) or emission unit(s) providing the emission reductions. ()

05. Imposed Reductions. Emission reductions imposed by local, state or federal regulations or permits shall not be allowed for emission reduction credits. ()

06. Mobile Sources. The proposed level of allowable emissions must be less than the actual emissions of the mobile sources or stationary sources providing the emission reduction credit. Mobile source emission reduction credits shall be made state or federally enforceable by SIP revision. The form of the SIP revision may be a state or local regulation, operating permit condition, consent or enforcement order, or any mechanism available to the state that is enforceable. ()

461. REQUIREMENTS FOR BANKING EMISSION REDUCTION CREDITS (ERC'S).

01. Application to Bank an ERC. The owner or operator of any facility may apply to the Department for a Tier I or Tier II operating permit (or a revision thereto) to bank an emission reduction credit. An application to bank an emission reduction credit must be received by the Department no later than one (1) year after the reduction occurs. The Department may issue or revise such a Tier I or Tier II operating permit and a "Certificate of Ownership" for an emission reduction credit, provided that all emission reductions satisfy the requirements for emission reduction credits (Section 460). ()

02. Banking Period. Emission reduction credits may be banked with the Department. The banked emission reduction credits may be used for offsets, netting in accordance with the definition of net emissions increase at Section 007, or alternative emission limits (bubbles), or sold to other facilities. The use of banked emission reduction credits must satisfy the applicable requirements of the program in which they are proposed for use, including approval of a permit to construct or a Tier I or Tier II operating permit. ()

03. Certificate of Ownership. Upon issuing or revising a Tier I or Tier II operating permit for an emission reduction credit, the Department will issue a "Certificate of Ownership" which will identify the owner of the credits, quantify the credited emission reduction and describe the characteristics of the emissions which were reduced and emissions unit(s) which previously emitted them. ()

04. Adjustment by Department. If at any time the Department, or the owner or operator of a facility which has produced an emission reduction credit, finds that the actual reduction in emissions differs from that in the certificate of ownership, the Department will adjust the amount of banked emission reduction credits to reflect the actual emission reduction and issue a revised certificate of ownership. ()

05. Proportional Discounts. If at any time the Department finds that additional emission reductions are necessary to attain and maintain any ambient air quality standard or applicable prevention of significant deterioration (PSD) increment, banked emission reduction credits at facilities in the affected area may be proportionally discounted by an amount which will not exceed the percentage of emission reduction required for that area. ()

06. Transfer of Ownership. Whenever the holder of a certificate of ownership for banked emission reduction credits, sells or otherwise transfers ownership of all or part of the banked credits, the holder shall submit the certificate of ownership to the Department. The Department will issue a revised certificate(s) of ownership which reflects the old and new holder(s) and amount(s) of banked emission reduction credits. ()

07. Public Registry. The Department will maintain a public registry of all banked emissions reduction credits, indicating the current holder of each certificate of ownership and the amount and type of credited emissions. ()

462. -- 499. (RESERVED)

500. REGISTRATION PROCEDURES AND REQUIREMENTS FOR PORTABLE EQUIPMENT.

01. Registration Requirements. All existing portable equipment shall be registered within ninety (90) days after the original effective date of this Section 500 and at least ten (10) days prior to relocating, using forms provided by the Department, except that no registration is required for mobile internal combustion engines, marine installations and locomotives. ()

02. Compliance with Rules and Regulations. Possessing a "Certificate of Registration" does not relieve any owner or operator of the responsibility to comply with all applicable local, state and federal rules and regulations. ()

501. -- 509. (RESERVED)

510. STACK HEIGHTS AND DISPERSION TECHNIQUES.

The purpose of Sections 510 through 516 is to establish criteria for good engineering practice for stack heights and dispersion techniques. ()

511. APPLICABILITY.

The provisions of Sections 510 through 516 shall apply to existing, new, and modified stationary sources and facilities. The provisions of Sections 510 through 516 do not apply to stack heights in existence, or dispersion techniques implemented, on or before December 31, 1970, except where regulated or toxic air pollutant(s) are being emitted from such stacks or using such dispersion techniques by sources which were constructed, or reconstructed, or for which major modifications were carried out, after December 31, 1970. ()

512. DEFINITIONS.

For the purpose of Sections 500 through 516: ()

01. Dispersion Technique. Any technique which attempts to affect the concentration of a regulated or toxic air pollutant in the ambient air by: ()

a. Using that portion of a stack which exceeds good engineering practice stack height; ()

b. Varying the rate of emission of a regulated or toxic air pollutant according to atmospheric conditions or ambient concentrations of that pollutant; or ()

c. Increasing final exhaust gas plume rise by manipulating source process parameters, exhaust gas parameters, stack parameters, or combining exhaust gases from several existing stacks into one (1) stack, or other selective handling of exhaust gas streams so as to increase the exhaust gas plume rise. This does not include the reheating of a gas stream, following use of a pollution control system, for the purpose of returning the gas to the

temperature at which it was originally discharged from the facility generating the gas stream; smoke management in agricultural or silvicultural prescribed burning programs; episodic restrictions on residential woodburning and open burning; techniques which increase final exhaust gas plume rise where the resulting allowable emissions of sulfur dioxide from the facility do not exceed five thousand (5,000) tons per year; or the merging of exhaust gas streams where: ()

i. The source owner or operator demonstrates that the facility was originally designed and constructed with such merged gas streams; ()

ii. After July 8, 1985, such merging is part of a change in operation at the facility that includes the installation of pollution controls and is accompanied by a net reduction in the allowable emissions of a regulated or toxic air pollutant. This exclusion from the definition of "dispersion techniques" shall apply only to the emission limitation for the regulated or toxic air pollutant affected by such change in operation; or ()

iii. Before July 8, 1985, such merging was part of a change in operation at the facility that included the installation of emissions control equipment or was carried out for sound economic or engineering reasons. Where there was an increase in the emission limitation or, in the event that no emission limitation was in existence prior to the merging, the reviewing agency shall presume that merging was significantly motivated by an intent to gain emissions credit for greater dispersion. Absent a demonstration by the source owner or operator that merging was not significantly motivated by such intent, the reviewing agency shall deny credit for the effects of such merging in calculating the allowable emissions for the source. ()

02. Excessive Concentration. For the purpose of determining good engineering practice stack height in a fluid modeling evaluation or field study as provided for in Subsection 512.03.c. "Excessive Concentration" means: ()

a. For sources seeking credit for stack height exceeding that established under Subsection 512.03.b., a maximum ground level concentration due to emissions from a stack due in whole or in part to downwash, wakes, or eddy effects produced by nearby structures or nearby terrain features which individually is at least forty percent (40%) in excess of the maximum concentration experienced in the absence of such effects, and which contributes to a total concentration due to emissions from all sources that is greater than an ambient air quality standard. For sources subject to the prevention of significant deterioration program, an excessive concentration alternatively means a maximum ground-level concentration due to emissions from a stack due in whole or in part to downwash, wakes, or eddy effects produced by nearby structures or nearby terrain features which individually is at least forty percent (40%) in excess of the maximum concentration experienced in the absence of the maximum concentration experienced in the absence of such downwash, wakes, or eddy effects and greater than a prevention of significant deterioration increment. The allowable emission rate to be used in making demonstrations under Subsection 512.02.a., shall be prescribed by the new source performance standard that is applicable to the source category unless the owner or operator demonstrates that this emission rate is infeasible. Where such demonstrations are approved by the Department, an alternative emission rate shall be established in consultation with the source owner or operator. ()

b. For sources seeking credit after October 1, 1983, for increases in existing stack heights up to the heights established under Subsection 512.03.b., either: ()

i. A maximum ground-level concentration due in whole or in part to downwash, wakes or eddy effects as provided in Subsection 512.02.a., except that the emission rate specified by any applicable SIP or, in the absence of such a limit, the actual emission rate shall be used; or ()

ii. The actual presence of a local nuisance caused by the existing stack as determined by the authority administering the Department. ()

c. For sources seeking credit after January 12, 1979, for a stack height determined under Subsection 512.03.b., where the Department requires the use of a field study or fluid model to verify GEP stack height, for sources seeking stack height credit after November 9, 1984, based on the aerodynamic influence of cooling towers, and for sources seeking stack height credit after December 31, 1970, based on the aerodynamic influence of structures not adequately represented by the equations in Subsection 512.03.b., a maximum ground-level

concentration due in whole or in part to downwash, wakes or eddy effects that is at least forty percent (40%) in excess of the maximum concentration experienced in the absence of such downwash, wakes, or eddy effects. ()

03. Good Engineering Practice (GEP) Stack Height. The greater of: ()

a. Sixty-five (65) meters, measured from the ground-level elevation at the base of the stack; ()

b. For stacks in existence on January 12, 1979, and for which the owner or operator had obtained all applicable preconstruction permits or approvals required,

$$H = 2.5S$$

provided the owner or operator produces evidence that this equation was actually relied on in establishing an emission limitation. For all other stacks provided that the Department may require the use of a field study or fluid model to verify GEP stack height for the source,

$$H = S + 1.5L$$

where: ()

i. H = good engineering practice stack height measured from the ground-level elevation at the base of the stack. ()

ii. S = height of nearby structure(s) measured from the ground-level elevation at the base of the stack. ()

iii. L = lesser dimension, height or projected width, of nearby structure(s). ()

c. The height demonstrated by a fluid model or a field study approved by the Department which ensures that the emissions from a stack do not result in excessive concentrations of any regulated or toxic air pollutant as a result of atmospheric downwash, wakes, or eddy effects created by the source itself, structures, or terrain features. ()

04. Nearby Structures or Terrain Features. "Nearby" as applied to a specific structure or terrain feature under the definition of "good engineering practice stack height"; and ()

a. For purposes of applying the formulae provided under Subsection 512.03.b., means that distance up to five (5) times the lesser of the height or the width dimension of a structure, but not greater than one-half (1/2) mile (0.8 km); and ()

b. For conducting demonstrations under Subsection 512.03.c., means not greater than one-half (0.5) mile (0.8 km), except that the portion of a terrain feature may be considered to be nearby which falls within a distance of up to ten (10) times the maximum height of the feature, not to exceed two (2) miles if such feature achieves a height one-half (0.5) mile (0.8 km) from the stack that is at least forty percent (40%) of the GEP stack height determined by the formulae provided in Subsection 512.03.b., or twenty-six (26) meters, whichever is greater, as measured from the ground-level elevation at the base of the stack. The height of the structure or terrain feature is measured from the ground-level elevation at the base of the stack. ()

05. Stack in Existence. The owner or operator had: ()

a. Begun, or caused to begin, a continuous program of physical on-site construction of the stack; or ()

b. Entered into binding agreements or contractual obligations which could not be cancelled or modified without substantial loss to the owner or operator, to undertake a program of construction of the stack to be completed in a reasonable time. ()

513. REQUIREMENTS.

The required degree of emission control of any regulated or toxic air pollutant shall not be affected by the amount of any stack height that exceeds good engineering practice (GEP) or by any other dispersion technique. ()

514. OPPORTUNITY FOR PUBLIC HEARING.

Whenever a new or revised emission limitation is to be based on a good engineering practice stack height that exceeds the height allowed by the formulae in Subsections 512.03.a. and 512.03.b., the Department will notify the public of the availability of the demonstration study submitted under Subsection 512.03.c., and will provide an opportunity for public hearing on the demonstration study. ()

515. APPROVAL OF FIELD STUDIES AND FLUID MODELS.

Any field study or fluid model used to demonstrate GEP stack height under Subsection 512.03.b. or 512.03.c., and any determination of “excessive concentration” under Subsection 512.02 must be approved by the EPA prior to an emission limit being established. The construction of any new stack, or any increase to the height of any existing stack to the height determined by the formulae in Subsection 512.03.b., without completing a fluid model and a field study must be approved by the EPA. ()

516. NO RESTRICTION ON ACTUAL STACK HEIGHT.

The provisions of Sections 510 through 516 do not restrict, in any manner, the actual stack height of any stationary source or facility. ()

517. MOTOR VEHICLE INSPECTION AND MAINTENANCE PROGRAM.

01. Purpose. The purpose of Sections 517 through 527 is to set forth the minimum standards for a motor vehicle inspection and maintenance program, established pursuant to Section 39-116B, Idaho Code, for registered motor vehicles as defined in Section 49-123, Idaho Code. This program is designed to follow the basic inspection and maintenance program defined in 40 CFR 51.352. ()

02. Applicability. Sections 517 through 527 apply only to the counties of Ada and Canyon and the cities of Boise, Eagle, Garden City, Meridian, Kuna, Star, Caldwell, Greenleaf, Melba, Middleton, Nampa, Notus, Parma, and Wilder. ()

03. Options. ()

a. Section 39-116B, Idaho Code, provides the counties and cities listed in Subsection 517.02 with the following implementation options. The counties and cities may: ()

i. Enter into a joint exercise of powers agreement with the Director to implement a motor vehicle inspection and maintenance program; or ()

ii. Obtain Department approval to implement an alternative motor vehicle emissions control strategy that will result in emissions reductions equivalent to that of a motor vehicle inspection and maintenance program. ()

b. If neither of the options listed in Subsection 517.03.a. are selected, the Department shall implement the motor vehicle inspection and maintenance program. ()

04. Governing Authority. For the purpose of Sections 517 through 527, governing authority means the governing entity responsible for the development and implementation of the motor vehicle inspection and maintenance program. The governing entity may be the counties and cities listed in Subsection 517.02 or the Department. The governing authority shall adopt Sections 517 through 527 of these rules. ()

05. Exemptions. Sections 517 through 527 do not apply to the following: ()

a. Electric or hybrid motor vehicles; ()

b. Motor vehicles with a model year less than five (5) years old; ()

c. Motor vehicles with a model year older than 1981; ()

d. Classic automobiles as defined by Section 49-406A, Idaho Code; ()

- e. Motor vehicles with a maximum vehicle gross weight of less than fifteen hundred (1500) pounds; ()
- f. Motor vehicles registered as motor homes as defined by Section 49-114, Idaho Code; ()
- g. Motorized farm equipment; and ()
- h. Registered motor vehicles engaged solely in the business of agriculture. ()

518. REQUIREMENTS FOR LICENSING AUTHORIZED INSPECTION STATIONS OR RETEST STATIONS.

01. General. ()

a. No person or enterprise shall in any manner represent any place as an inspection station or retest station unless such station is operated under a valid license issued by the governing authority. ()

b. No license for any inspection station or retest station may be assigned, transferred or used by other than the original applicant for that specific station. ()

02. Applications for License. Applications for license as an inspection station or retest station shall be made on the forms provided by the governing authority. No license shall be issued unless the governing authority finds that the facilities, tools and equipment of the applicant comply with the requirements set forth in Subsections 518.03 or 518.04. ()

03. Requirements for Licensed Inspection Stations. In order to qualify for issuance and continuance of an inspection station license, an establishment must meet the following requirements: ()

a. Must have a permanent location; ()

b. Must ensure that at least one employee, who has been issued an emissions technician license by the governing authority, is on duty at all times of station operation; ()

c. Must demonstrate the ability to perform the emissions test and comply with reporting and recordkeeping requirements established by the governing authority; ()

d. Must obtain and maintain in force appropriate business liability insurance; and ()

e. Must have the tools, equipment and supplies, as required by the governing authority, available for performance of the emissions test. ()

04. Requirements for Licensed Retest Stations. In order to qualify for issuance and continuance of a retest station license, an establishment must meet the requirements listed in Subsection 518.03. ()

05. Approval Procedure. ()

a. Applications received by the governing authority will be reviewed for completeness and an inspection of the facility will be performed. An inspection report will be prepared for the governing authority's review. ()

b. Stations which meet the requirements of Subsections 518.01 through 518.04 will be granted an inspection station license or retest station license and issued a station sign. The station sign and license shall be posted in a conspicuous place, readily visible to the public. The station sign and license shall remain the property of the governing authority. ()

06. Revocation of Inspection Station or Retest Station License. The governing authority has the

authority to issue warnings and suspend or revoke a station license upon a showing that emission tests are not being performed in accordance with these rules and any other specifications or procedures enacted by the governing authority. ()

519. REQUIREMENTS FOR LICENSING AUTHORIZED EMISSIONS TECHNICIANS.

01. Applications for License. Application for a license as an emissions technician shall be filed with the governing authority. Applications for the emissions technician license shall be completed on forms provided by the governing authority. ()

02. Requirements for Issuance of an Emissions Technician License. An applicant must demonstrate the knowledge and skill necessary to perform an emissions test of motor vehicle engines. The governing authority shall require the minimum standards set forth in 40 CFR 51.367, incorporated by reference into these rules at Section 107. ()

03. Revocation of Emissions Technician License. The governing authority has the authority to issue warnings and suspend or revoke an emissions technician license upon a showing that emission tests are not being performed in accordance with these rules or any other specifications or procedures enacted by the governing authority. ()

520. INSPECTION FREQUENCY.

The inspections shall occur no more than once every two (2) years. If the owner of the motor vehicle obtains a waiver pursuant to Section 526, the motor vehicle must be inspected the following year. ()

521. TEST PROCEDURE REQUIREMENTS.

The governing authority shall require the minimum standards set forth in 40 CFR 51.357(a), incorporated by reference into these rules at Section 107. ()

522. TEST STANDARDS.

The governing authority shall require the minimum standards set forth in 40 CFR 51.357(b), incorporated by reference into these rules at Section 107. ()

523. TEST EQUIPMENT.

The governing authority shall require the minimum standards set forth in 40 CFR 51.358, incorporated by reference into these rules at Section 107. ()

524. INSPECTION FEE.

The fee for a motor vehicle inspection, as established in Section 39-116B(2)(g), Idaho Code, shall not exceed twenty dollars (\$20) per vehicle. This fee is necessary to carry out the provisions of Sections 517 through 527 and to fund an air quality public awareness and outreach program. ()

525. PUBLIC OUTREACH.

The governing authority shall issue a pamphlet for distribution to owners of motor vehicles. The pamphlet shall include, but not be limited to, the reasons for and the methods of the inspection. The governing authority may also establish and operate an informational hotline, website, or any other means of outreach that is deemed to be efficient and effective by the governing authority. ()

526. WAIVERS.

The governing authority shall require the minimum standards set forth in 40 CFR 51.360(a), incorporated by reference into these rules at Section 107. If the owner of the motor vehicle obtains a waiver, the motor vehicle must be inspected the following year. ()

01. Financial Hardship. If repairs required under Section 526 pose a financial hardship on the owner of the motor vehicle, the governing authority shall have the authority to issue a waiver without requiring expenditure of the amounts listed in 40 CFR 51.360(a). Such determination of hardship shall be made on a case-by-case basis by the governing authority. ()

02. Public Service Vehicles Operating Less than 1,000 Miles Per Year. For public service vehicles owned by a governmental entity and operated less than one thousand (1,000) miles per year, the governing authority shall have the authority to issue a waiver without requiring expenditure of the amounts listed in 40 CFR 51.360(a). ()

527. EXTENSIONS.

The governing authority shall have the authority to grant extensions for vehicles or vehicle owners temporarily located outside of a testing area that cannot easily be returned to an area for testing. The extension shall not exceed one (1) year. For active duty military personnel and their families stationed outside the applicable testing area specified in Subsection 517.02, a time extension not to exceed the testing period is available. Military extensions shall be renewed with current military orders. ()

528. -- 549. (RESERVED)

550. AIR POLLUTION EMERGENCY RULE.

The purpose of Sections 550 through 562 is to define criteria for an air pollution emergency, to formulate a plan for preventing or alleviating such an emergency, and to specify rules for carrying out the plan. The procedures for implementing Sections 550 through 562 are delineated in Chapter VI of the SIP. ()

551. EPISODE CRITERIA.

The purpose of Sections 551 through 556 is to establish criteria for stages of atmospheric stagnation and/or degraded air quality. ()

552. STAGES.

The Department has defined four (4) stages of atmospheric stagnation and/or degraded air quality. ()

01. Stage 1 -- Air Pollution Forecast and Caution. An internal watch by the Department shall be actuated by a National Weather Service report that an Atmospheric Stagnation Advisory has been issued, or the equivalent local forecast of stagnant atmospheric conditions. ()

02. Stage 2 -- Alert. This is the first stage at which air pollution control actions by industrial sources are to begin. ()

03. Stage 3 -- Warning. The warning stage indicates that air quality is further degraded and that control actions are necessary to maintain or improve air quality. ()

04. Stage 4 -- Emergency. The emergency stage indicates that air quality has degraded to a level that will substantially endanger the public health and that the most stringent control actions are necessary. ()

553. EFFECT OF STAGES.

Once an episode stage is reached or the Department determines that reaching a particular stage is imminent, emergency action corresponding to that stage will remain in effect until air quality measurements indicate that another stage (either lower or higher) has been attained or the Department determines that reaching another stage (either lower or higher) is imminent. At such time, actions corresponding to the next stage will go into effect. This procedure will continue until the episode is terminated. The air quality criteria used to define each of the episode stages for carbon monoxide, nitrogen dioxide, ozone, particulate matter, and sulfur dioxide are specified in Section 556. The levels will be determined by the Department through its analysis of meteorological and ambient air quality monitoring data. ()

554. -- 555. (RESERVED)

556. CRITERIA FOR DEFINING LEVELS WITHIN STAGES.

The air quality criteria defining each of these levels for carbon monoxide (CO), nitrogen dioxide (NO₂), ozone (O₃), particles with an aerodynamic diameter less than or equal to a nominal ten (10) micrometers (PM-10), particles with an aerodynamic diameter less than or equal to a nominal two point five (2.5) micrometers (PM-2.5), and sulfur dioxide (SO₂) are: ()

01. Stage 1 -- Forecast and Caution. A Stage 1 Forecast and Caution shall be declared by the Department when particulate concentrations reach, or are forecasted to reach, and persist, at or above the levels listed below. The Department may call a Stage 1 Forecast and Caution, if it determines, after evaluating the pertinent meteorology, weather conditions and air quality conditions such as visibility, and source parameters such as source type, strength, location and projected duration, that a Stage 1 Forecast and Caution is required to protect the public health.

CO	NA
NO ₂	NA
O ₃	NA
SO ₂	NA
PM-2.5	80 ug/m ³ 1 hour average
PM-2.5	50 ug/m ³ 24 hour average
PM-10	385 ug/m ³ 1 hour average
PM-10	150 mg/m ³ 24 hour average

()

02. Stage 2 -- Alert.

CO - 17 mg/m ³ (15 ppm)	8-hour average
NO ₂ - 1130 ug/m ³ (0.6 ppm)	1-hour average
- 282 ug/m ³ (0.15 ppm)	24-hour average
O ₃ - 400 ug/m ³ (0.2 ppm)	1-hour average
PM-10 - 350 ug/m ³	24-hour average
SO ₂ - 800 ug/m ³ (0.3 ppm)	24-hour average

()

03. Stage 3 -- Warning.

CO - 34 mg/m ³ (30 ppm)	8-hour average
NO ₂ - 2260 ug/m ³ (1.2 ppm),	1-hour average
- 565 ug/m ³ (0.3 ppm)	24-hour average
O ₃ - 800 ug/m ³ (0.4 ppm)	1-hour average
PM-10 - 420 ug/m ³	24-hour average
SO ₂ - 1600 ug/m ³ (0.6 ppm)	24-hour average

()

04. Stage 4 -- Emergency.

CO - 46 mg/m ³ (40 ppm)	8-hour average
NO ₂ - 3000 ug/m ³ (1.6 ppm)	1-hour average
- 750 ug/m ³ (0.4 ppm)	24-hour average

O ₃ - 1000 ug/m ³ (0.5 ppm)	1-hour average
PM-10 - 500 ug/m ³	24-hour average
SO ₂ - 2100 ug/m ³ (0.8 ppm)	24-hour average

()

557. PUBLIC NOTIFICATION.

The purpose of Sections 557 through 560 is to establish requirements for public notification regarding atmospheric stagnation and/or degraded air quality. ()

558. INFORMATION TO BE GIVEN.

01. Information to Be Given. On the basis of degrading air quality as determined by the Director, and the criteria for emergency episode stages as shown in Section 556, the Director will utilize appropriate media and techniques including, but not limited to, print, electronic and internet, to insure that the following information is announced to the public, affected government, and commercial, industrial institutional and agricultural entities as practicable: ()

- a. Definition of the extent of the problem; ()
- b. Indication of the action taken by the Director; ()
- c. Air pollution forecast for next few days; ()
- d. Notice of when the next statement from the Department will be issued; ()
- e. Listing of all general procedures which the public, commercial, institutional and industrial sectors are required to follow; ()
- f. Specific warnings and advice to those persons who because of acute or chronic health problems, may be most susceptible to the effects of the episode. ()
- g. Location and description of the affected area. ()

559. MANNER AND FREQUENCY OF NOTIFICATION.

Such announcements will be made by the news media during regularly scheduled television and radio news broadcasts and in all editions of specified newspapers. In addition, when the stage 4 emergency level is reached, television and radio stations designated by the Department will repeat these announcements at one (1) hour intervals during normal broadcasting hours. ()

560. NOTIFICATION TO SOURCES.

The Department will assure that all significant sources of the applicable air pollutant(s) are notified of the emergency stage by telephone or other appropriate means. ()

561. GENERAL RULES.

All persons in the designated stricken area shall be governed by the following rules for each emergency episode stage. The Director may waive one (1) or more of the required measures at each episode stage if, on the basis of information available to him, he judges that a measure is an inappropriate response to the specific episode conditions which then exist. ()

- 01. Stage 1 -- Air Pollution Forecast and Caution.** There shall be no new ignition of open burning of any kind. The Director may require, if practicable, or in an emergency situation, the cessation of any open burning. ()
- 02. Stage 2 -- Alert.** ()

- a. There shall be no open burning of any kind. ()
- b. The use of burners and incinerators for the disposal of any form of solid waste shall be prohibited. ()
- c. Persons operating fuel-burning equipment which requires boiler lancing or soot blowing shall perform such operations only between the hours of 12:00 pm (noon) and 4:00 p.m. ()
- d. Commercial, industrial and institutional facilities utilizing coal or residual fuel oil are required to switch to natural gas or distillate oil if available. ()
- 03. Stage 3 -- Warning.** ()
- a. There shall be no open burning of any kind. ()
- b. The use of burners and incinerators for the disposal of any form of solid waste or liquid waste shall be prohibited. ()
- c. Persons operating fuel-burning equipment which requires boiler lancing or soot blowing shall perform such operations only between the hours of 12:00 pm (noon) and 4:00 p.m. ()
- d. Commercial, industrial and institutional facilities utilizing coal or residual fuel are required to either:
 - i. Switch completely to natural gas or distillate oil; or ()
 - ii. If these low sulfur fuels are not available, curtail the use of existing fuels to the extent possible without causing injury to persons or damage to equipment. ()
- 04. Stage 4 -- Emergency.** This will be called only with specific concurrence of Governor. ()
- a. There shall be no open burning of any kind. ()
- b. The use of burners and incinerators for the disposal of any form of solid or liquid waste shall be prohibited. ()
- c. All places of employment described below shall immediately cease operations: ()
 - i. All mining and quarrying operations; ()
 - ii. All construction work except that which must proceed to avoid injury to persons; ()
 - iii. All manufacturing establishments except those required to have in force an air pollution emergency plan; ()
 - iv. All wholesale trade establishments, i.e. places of business primarily engaged in selling merchandise to retailers or industrial, commercial, institutional or professional users, or to other wholesalers, or acting as agents in buying merchandise for or selling merchandise to such persons or companies except those engaged in the distribution of drugs, surgical supplies and food; ()
 - v. All offices of local, county and State government including authorities, joint meetings, and other public bodies excepting such agencies which are determined by the chief administrative officer of local, county, or State government authorities, joint meetings and other public bodies to be vital for public safety and welfare and the enforcement of the provisions of this order; ()
 - vi. All retail trade establishments except pharmacies, surgical supply distributors, and stores primarily

engaged in the sale of food; ()

vii. Banks, credit agencies other than banks, securities and commodities brokers, dealers, exchanges and services; offices of insurance carriers, agents and brokers, real estate offices; ()

viii. Wholesale and retail laundries, laundry services and cleaning and dyeing establishments; photographic studios; beauty shops, barber shops, shoe repair shops; ()

ix. Advertising offices, consumer credit reporting, adjustment and collection agencies; duplicating, addressing, blueprinting; photocopying, mailing, mailing list and stenographic services; equipment rental services, commercial testing laboratories; ()

x. Automobile repair, automobile services, garages except those located adjacent to state or interstate highways; ()

xi. Establishments rendering amusement and recreational services including motion picture theaters; ()

xii. Elementary and secondary schools, colleges, universities, professional schools, junior colleges, vocational schools, and public and private libraries. ()

d. All commercial and manufacturing establishments not included in this order will institute such actions as will result in maximum reduction of the applicable air pollutant(s) from their operation by ceasing, curtailing, or postponing operations which emit the applicable air pollutants to the extent possible without causing injury to persons or damage to equipment. These actions include limiting boiler lancing or soot blowing operations for fuel burning equipment to between the hours of 12:00 pm (noon) and 4:00 p.m. ()

e. When the emergency episode is declared for carbon monoxide, the use of motor vehicles is prohibited except in emergencies or with the approval of local or state police or the Department. ()

562. SPECIFIC EMERGENCY EPISODE ABATEMENT PLANS FOR POINT SOURCES.

In addition to the general rules presented in Section 561, the Department shall require that specific point sources adopt and implement their own Emergency Episode Abatement Plans in accordance with the criteria set forth in Sections 551 through 556. An individual plan can be revised periodically by the Department after consultation between the Department and the owners and/or operators of the source. ()

563. TRANSPORTATION CONFORMITY.

The purpose of Sections 563 through 574 is to adopt and implement Section 176(c) of the Clean Air Act (CAA), as amended [42 U.S.C. 7401 et seq.], and the related requirements of 23 U.S.C. 109(j), with respect to the conformity of transportation plans, programs, and projects developed, funded, or approved by the United States Department of Transportation (USDOT), and by metropolitan planning organizations (MPOs) or other recipients of funds under Title 23 U.S.C. or the Federal Transit Laws (49 U.S.C. Chapter 53). These sections set forth policy, criteria, and procedures for demonstrating and assuring conformity of such activities to an applicable implementation plan developed pursuant to Section 110 and Part D of the CAA. The publications referred to in Sections 563 through 574 are available from the IDEQ. ()

566. DEFINITIONS FOR THE PURPOSE OF SECTIONS 563 THROUGH 574 AND 582.

Terms used but not defined in Sections 563 through 574 and 582 shall have the meaning given them by the CAA, Titles 23 and 49 U.S.C., other Environmental Protection Agency (EPA) regulations, or other USDOT regulations, in that order of priority. For the purpose of Sections 563 through 574 and 582: ()

01. Applicable Implementation Plan. Applicable Implementation Plan is defined in Section 302(q) of the CAA and means the portion (or portions) of the implementation plan, or most recent revision thereof, which has been approved under Section 110 of the CAA, or promulgated under Section 110(c) of the CAA, or promulgated or approved pursuant to regulations promulgated under Section 301(d) of the CAA and which implements the relevant requirements of the CAA. ()

02. Consult or Consultation. The lead agency confers with other ICC members and persons on the distribution list and considers their views prior to taking actions relating to transportation conformity. The lead agency shall distribute all appropriate information necessary to make a conformity determination and, prior to making a conformity determination, shall consider the views of such parties and shall provide a timely, written response to those views. Such views and written responses shall be included in the record of decision or action. Consultation shall not occur with respect to a transportation plan or transportation improvement program (TIP)

revision that merely adds or exempts projects listed in 40 CFR 93.126. ()

03. Distribute. Make available relevant documents and information by electronic and manual means, whichever is more appropriate, to all ICC members and persons on the distribution list. Electronic distribution may include existing and future technological applications, such as electronic mail, internet web-site posting including downloadable files, or the use of an electronic mail reply system based on the distribution list. Manual distribution may include the United States Postal Service, the state internal mail system, a facsimile machine, or any commercially available mail service provider. ()

04. Distribution List. A list containing the names and addresses of ICC members and any person(s) expressing an interest in receiving information and material pertaining to ICC meetings. To express interest, a person may contact the lead agency by postal mail, electronic mail, telephone or in person, and inform the ICC member of their interest in being on the distribution list for information and material pertaining to ICC meetings. ()

05. Exempt Projects. Projects exempt from conformity requirements based on the general criteria of safety, mass transit, and other factors, as described in 40 CFR 93.126. ()

06. Lead Agency. The transportation or air quality agency responsible for conducting the consultation process, as identified in Subsections 568.01 through 568.03. ()

07. Lead Air Quality Agency. An agency designated pursuant to Section 174 of the CAA as responsible for developing an applicable implementation plan, or alternatively the agency designated by the Governor as the lead air quality agency for a county, region, or any jurisdiction. ()

08. Local Highway Jurisdiction. A county with jurisdiction over a highway system, a city with jurisdiction over a highway system, or a highway district, as defined by Section 40-113(3), Idaho Code. ()

09. Local Highway Technical Assistance Council (LHTAC). The public agency created in Chapter 24, Title 40, Idaho Code. ()

10. Maximum Priority. ()

a. All possible actions must be taken to shorten the time periods necessary to complete essential steps in TCM implementation - for example, by increasing the funding rate - even though timing of other projects may be affected. It is not permissible to have prospective discrepancies with the applicable implementation plan's TCM implementation schedule due to: ()

i. Lack of funding in the TIP; ()

ii. Lack of commitment to the project by the sponsoring agency; ()

iii. Unreasonably long periods to complete future work due to lack of staff or other agency resources; ()

iv. Lack of approval or consent by local governmental bodies; or ()

v. Failure to have applied for a permit where necessary work preliminary to such application has been completed. ()

b. Where statewide and metropolitan funding resources, planning, and management capabilities are fully consumed within the flexibility of the Transportation Equity Act of 1998 (TEA-21), Pub. L. No. 105-178, 112 Stat 107, as amended by Pub. L. No. 105-206, 112 Stat 685, or future federal omnibus transportation funding bills, with responding to damage from natural disasters, civil unrest, or terrorist acts, TCM implementation can be determined to be timely without regard to the above, provided reasonable efforts are being made. ()

11. Metropolitan Planning Organization (MPO). The organization designated as being responsible, together with the State, for conducting the continuing cooperative and comprehensive transportation planning process

under 23 U.S.C. 134 and 49 U.S.C. 5303 and 23 CFR 450. It is the forum for cooperative transportation decision-making. ()

12. Public Notice. Distribution of the meeting times, location, duration and agenda, to all the ICC members and persons on the distribution list. ()

13. Recipient of Funds Designated Under Title 23 U.S.C. or the Federal Transit Laws. Any agency at any level of state, county, city, or regional government that routinely receives Title 23 U.S.C. or Federal Transit Laws funds to construct FHWA/FTA projects, operate FHWA/FTA projects or equipment, purchase equipment, or undertake other services or operations via contracts or agreements. This definition does not include private landowners, developers, contractors, or entities that are only paid for services or products created by their own employees. ()

14. Regionally Significant Project. A transportation project, other than an exempt project, that is on a facility which serves regional transportation needs (such as access to and from the area outside the region, major activity centers in the region, major planned developments such as new retail malls, sports complexes, etc., or transportation terminals as well as most terminals themselves) and would normally be included in the modeling of a metropolitan area's transportation network, including, at a minimum: ()

- a. All principal arterial highways; ()
- b. All fixed guideway transit facilities that offer an alternative to regional highway travel; and ()
- c. Any other facilities determined to be regionally significant through Section 570, interagency consultation. ()

15. Transportation Agency. The public agency responsible for one (1) or more of the following transportation modes: ()

- a. Air; ()
- b. Rail; ()
- c. Water; ()
- d. Highway; ()
- e. Bicycle and pedestrian paths; and ()
- f. Transit. ()

16. Transit Agency. Any agency involved in providing mass transportation services by bus, rail, or other conveyance providing general or special service to the public on a regular and continuing basis. The term "Transit Agency" does not include school buses or charter or sightseeing services. ()

567. AGENCIES AFFECTED BY CONSULTATION.

This Section identifies those agencies and other entities (federal, tribal, state and local) involved in the consultation process and those general actions requiring consultation. ()

01. Interagency Consultation Committee. A committee of representatives shall be formed in each nonattainment or maintenance area of the state, to convene on conformity determinations, as necessary, and shall be called the Interagency Consultation Committee (ICC) for that nonattainment or maintenance area. The ICC shall undertake consultation procedures, as applicable, in preparing for and before making conformity determinations in developing long-range transportation plans (LRTP), transportation improvement programs (TIP), and applicable implementation plans. ()

02. ICC Members. The ICC shall consist of the following agencies or entities, as applicable: ()

- a. A Metropolitan Planning Organization (MPO) where one exists; ()
 - b. The Idaho Transportation Department (ITD); ()
 - c. The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) divisional office; ()
 - d. The Idaho Department of Environmental Quality (IDEQ); ()
 - e. Affected Local Highway Jurisdictions involved in transportation, ()
 - f. Affected Transit agency(ies); ()
 - g. The Local Highway Technical Assistance Council (LHTAC); ()
 - h. Indian Tribal governments with transportation planning responsibilities; and ()
 - i. The United States Environmental Protection Agency (EPA). ()
- 03. Agencies Entitled to Participate.** Agencies which may be affected by the consultation process and which are entitled to participate in the consultation process include: ()
- a. Any local transit agency or provider, local highway jurisdiction, and any city or county transportation or air quality board or agency where the nonattainment or maintenance area is located; and ()
 - b. Any other state or federal or tribal organization in the state responsible under state or federal law for developing, submitting or implementing transportation related provisions of an implementation plan. ()
- 04. More Than One Pollutant.** Areas that are nonattainment for more than one (1) pollutant may conduct consultation, as specified in this section, through a single committee for all pollutants. ()
- 05. Open to the Public.** All meetings of the ICC shall be open to the public. ()
- 06. Delegation.** An ICC member may delegate its role or responsibility in the consultation process to another entity pursuant to applicable state law. An ICC member making such delegation shall notify all other ICC members in writing when the delegation occurs. The written notice shall provide the name, address, and telephone number of one (1) or more contact persons representing the entity accepting the delegated role or responsibility. ()
- 07. General Actions Requiring Consultation.** The ICC shall undertake the consultation process prior to the development of the following: ()
- a. The implementation plan(s), including the emission budget and list of TCMs in the applicable implementation plan(s), prepared by the lead air quality agency in a nonattainment or maintenance area; ()
 - b. All other conformity determinations for transportation plans, projects, and programs; and ()
 - c. Revisions to the preceding documents which may directly or indirectly affect conformity determinations. ()
- 568. ICC MEMBER ROLES IN CONSULTATION.**
The lead agency as identified in this section is the ICC member responsible for initiating the consultation process, preparing the initial and final drafts of the document or decision, and assuring the adequacy of the consultation process for all conformity processes and procedures. ()
- 01. Designated Lead Air Quality Agency.** IDEQ or the MPO, as the designated lead air quality

agency, shall be the lead agency for the development of the implementation plan, the associated emission budgets, and the list of Transportation Control Measures (TCMs) in the plan. The concurrence of IDEQ on each applicable implementation plan is required before IDEQ adopts the plan and submits it to EPA for inclusion in the applicable implementation plan. ()

02. Areas with an MPO. For areas in which an MPO has been established, the designated MPO shall be the lead agency responsible for conformity determinations, development of the LRTP, development of the TIP, and project level documentation under 23 CFR 450. ()

03. Areas Without an MPO. For areas in which an MPO has not been established, ITD shall be the lead agency for preparing the final document on conformity determinations, the development of the statewide transportation plan, the development of the STIP, and project level documentation under 23 CFR 450. ()

569. ICC MEMBER RESPONSIBILITIES IN CONSULTATION.

This Section identifies the specific responsibilities of ICC members. ()

01. Designated Lead Air Quality Agency Responsibilities. The designated lead air quality agency shall be responsible for developing or providing and distributing draft and final documentation, data and analyses for: ()

- a. Air emission inventories; ()
- b. Emission budgets; ()
- c. Attainment and maintenance demonstrations; ()
- d. Control strategy implementation plan revisions; ()
- e. Updated motor vehicle emission factors; ()
- f. Proposal and evaluation of TCMs; and ()
- g. Public outreach on draft air quality plans pursuant to 40 CFR Part 51. ()

02. Designated MPO Responsibilities. The designated MPO shall be responsible for: ()

- a. Conformity determinations corresponding to LRTPs and TIPs; ()
- b. Making conformity determinations for the entire nonattainment or maintenance area, including areas beyond the boundaries of the MPO, where no agreement is in effect as required by 23 CFR 450.310(f); ()
- c. Identify regionally significant projects through the consultation process; ()
- d. Implementing TCMs in air quality nonattainment and/or maintenance areas, as applicable; ()
- e. Providing technical and policy input on emissions budgets; ()
- f. Performing transportation modeling, regional emissions analyses, and project level analysis, as necessary; ()
- g. Documenting timely implementation of TCMs, as required, for determining conformity; and ()
- h. Distributing relevant draft and final project environmental documents to ICC members and persons on the distribution list per the schedule in Subsection 570.01.c. ()

03. Non-MPO Area Responsibilities. In areas without an established MPO, ITD shall be responsible for: ()

a. Conformity determinations corresponding to STIPs and project-level analyses; ()

b. Providing technical and policy input on proposed revisions to motor vehicle emissions factors and to emission budgets; ()

c. Distributing relevant draft and final project environmental documentation prepared by, or for ITD, to ICC members and persons on the distribution list per the schedule in Subsection 570.01.c.; ()

d. Convening air quality technical review meetings on specific projects when requested by other ICC members, or as needed; ()

e. Convening interagency consultation meetings required for purposes of making conformity determinations in nonattainment or maintenance areas, outside of MPO boundaries, as necessary; ()

f. Making conformity determinations in nonattainment or maintenance areas, outside of MPO boundaries, as necessary; and ()

g. Implementing TCMs in air quality nonattainment and/or maintenance areas, as applicable. ()

04. FHWA and FTA Responsibilities. FHWA and FTA shall be responsible for: ()

a. Assuring timely action on final findings of conformity for transportation plans, TIPs, and federally funded projects, including the basis for those findings after consultation with other agencies as provided in Section 569 and 40 CFR 93.105; and ()

b. Providing guidance on conformity and the transportation planning process to ICC members. FHWA and FTA may rely solely on the consultation process initiated by ITD or the MPO, where one exists, and shall not be required to duplicate that process. ()

05. EPA Responsibilities. EPA shall be responsible for providing policy and technical guidance on conformity criteria to ICC members. ()

06. Responsibility to Disclose Potentially Regionally Significant Projects. ITD, the local highway jurisdiction, transit agency, or transportation project sponsor shall be responsible for disclosing potentially regionally significant projects within air quality nonattainment and maintenance areas to the ICC in a timely manner. ()

a. Local Highway Jurisdictions shall disclose of potentially regionally significant projects upon written request of ITD within fourteen (14) days of such request, or when annual local and MPO project lists are due to ITD District Offices as part of the annual STIP development process; ()

b. In an MPO area, to help assure timely disclosure, the sponsor of any potentially regionally significant project shall disclose such projects to the MPO annually on or before March 1 of that calendar year; and ()

c. In MPO nonattainment and maintenance areas, the TIP and associated conformity demonstration shall be deemed to be incomplete if any regionally significant project has not been disclosed to the ICC in a timely manner. Therefore, such a TIP shall be considered to be non-conforming to applicable implementation plan(s). ()

570. GENERAL CONSULTATION PROCESS.

Section 570 provides the general procedures for interagency consultation (federal, tribal, state, and local) and public participation for transportation conformity determinations in air quality nonattainment and maintenance areas in the state of Idaho. ()

01. Lead Agency in Consultation. The following are the responsibilities of the lead agency at each stage of the consultation process: ()

a. Initiating the consultation process by notifying other ICC members of the document or decision that must undergo the consultation process and by scheduling and convening consultation meetings and agendas; ()

b. Developing and maintaining a distribution list of all ICC members and any other persons expressing an interest in receiving information and materials pertaining to ICC meetings; ()

c. Distributing an agenda and all supporting material, including minutes of ICC meetings, to ICC members and persons on the distribution list as follows: ()

i. Fourteen (14) days in advance of an ICC meeting if there are non-technical issues to be resolved by the ICC; ()

ii. Thirty (30) days in advance of an ICC meeting if there are technical issues to be resolved by the ICC; or ()

iii. If distribution of technical material pursuant to Subsection 570.01.c.ii. is not feasible thirty (30) days prior to an ICC meeting, then the lead agency shall notify the ICC members and persons on the distribution list in writing at least thirty (30) days prior to the ICC meeting. Together with the notification, the lead agency shall distribute and disclose all available material and documentation to the ICC members and persons on the distribution list, informing them of the nature, purpose, and details of possible program changes that are expected to occur from earlier analyses of the actions. All technical material and documentation shall be distributed at a minimum of fourteen (14) days prior to the ICC meeting. ()

d. Conferring with other agencies and persons not on the distribution list that have expressed an interest in the document or decision to be developed; ()

e. Providing ICC members and persons on the distribution list access to all information needed for meaningful input; ()

f. Soliciting early and continuing input from other ICC members and persons on the distribution list; ()

g. Following the public consultation procedures outlined in Section 574; ()

h. Providing an opportunity for informal question and answer on the draft document or proposed decision; ()

i. Considering the views of ICC members and persons on the distribution list and responding in writing to significant comments in a timely and substantive manner prior to finalizing or taking any final action on those documents or determinations enumerated in Section 567.07.a. through 567.07.c.; and ()

j. Assuring all comments and written responses of ICC members and persons on the distribution list are made part of the record of any action. ()

02. Public Comment Period to Satisfy Thirty Day Document Distribution Requirement. A lead agency may use all or any part of another public comment period established for public outreach procedures pursuant to 23 CFR 450 for a transportation plan, program, or project to satisfy the thirty (30) day advance distribution requirement for technical issues, and shall notify all ICC members and other persons on the distribution list when so doing fourteen (14) days prior to commencement of the public comment period. ()

03. Separate Times or in Combination. The above actions may be conducted at separate times or in combination, as required, to enhance the efficiency of the process. ()

04. Final Document Distribution. A lead agency, upon completion of a final document subject to the consultation process under Sections 563 through 574 of these rules (including any federal agency), shall distribute each final document to all other ICC members and persons on the distribution list within thirty (30) days of adopting or approving such document or making such determination. ()

05. Use of Checklist for Distribution of Material. The lead agency may supply a checklist of available supporting information to ICC members and persons on the distribution list to be used to request all or part of the supporting information, in lieu of generally distributing all supporting information. ()

06. Use of Other Meetings for Consultation. A meeting that is scheduled or required for another purpose may be used for the purposes of consultation only if the public notice for the meeting identifies consultation as an agenda item. ()

571. CONSULTATION PROCEDURES.

The consultation process among ICC members and persons on the distribution list shall be undertaken for the following specific major activities (federal, tribal, state, and local), specific routine activities and specific air quality related activities, in accordance with the procedures in Section 570. Participating agencies shall be all ICC members unless otherwise specified in Subsections 571.01 through 571.04. ()

01. Specific Major Activities. The consultation process shall be undertaken for the following specific major activities. The lead agency for each activity shall be the designated MPO or ITD in the absence of an MPO. ()

a. Evaluating and choosing each air quality model and associated methods and assumptions to be used in hot-spot analyses and regional emissions analyses including vehicle miles traveled forecasting. The hot-spot analyses shall be performed consistent with procedures described in 40 CFR 93.116 and 40 CFR 93.123 and regional emissions analysis shall be performed using procedures outlined on 40 CFR 93.122. ()

b. Determining which minor arterials and other transportation projects should be considered “regionally significant” for the purposes of regional emissions analysis, in addition to those functionally classified as principal arterial or higher or fixed guideway transit systems or extensions that offer an alternative to regional highway travel. ()

c. Evaluating whether projects otherwise exempted from meeting the requirements of Sections 563 through 574 of these rules should be treated as non-exempt in cases where potential adverse emissions impacts may exist for any reason per 40 CFR 93.126 and 127. ()

d. Making a determination as to whether past obstacles to implementation of TCMs which are behind the schedule established in the applicable implementation plan have been identified and are being overcome, and whether state and local agencies with influence over approvals or funding for TCMs are giving maximum priority to approval or funding for TCMs. This consultation procedure shall also consider whether delays in TCM implementation necessitate revisions to the applicable implementation plan to remove TCMs or substitute TCMs with other emission reduction measures. ()

e. Identifying projects located at sites in PM nonattainment or maintenance areas which have vehicle and roadway emission and dispersion characteristics which are essentially identical to those at sites which have violations verified by monitoring, and therefore require quantitative PM hot-spot analysis. In case a method for quantitative hot-spot analysis has not been formally adopted by EPA, a sound qualitative analysis developed in conjunction with FHWA may be used for the same. ()

f. Making a determination whether the project is included in the regional emissions analysis supporting the currently conforming TIP's conformity determination, and whether the project's design concept and scope have changed significantly from those which were included in the regional emissions analysis, or in a manner which would significantly impact use of the facility. ()

g. For areas in the state with no MPOs, making a determination whether a project has undergone project-level analysis and whether the project's design concept and scope have changed significantly from those

which were included in the project-level analysis, or in a manner which would significantly impact use of the facility. ()

h. Establishing appropriate public participation opportunities for project-level conformity determinations, as applicable, in the manner specified by Section 574, to be initiated by the recipient of the funds designated under 23 U.S.C. or the Federal Transit Act. ()

i. Choosing conformity tests and methodologies for isolated and rural nonattainment and maintenance areas as required by 40 CFR 93.109(g)(2)(iii). ()

02. Specific Routine Activities. The consultation process shall be undertaken for the following specific routine activities. The lead agency shall be the MPO or ITD in the absence of an MPO. ()

a. Evaluating events that will trigger new conformity determinations in addition to those triggering events established in 40 CFR 93.104. Participating agencies shall be the MPO and state, tribal, regional, and local air quality planning agencies. ()

b. Consulting on emissions analysis for transportation activities that cross the borders of MPOs or nonattainment or maintenance areas. Participating agencies shall be the MPO and state, tribal, regional, and local air quality planning agencies. ()

c. Determining whether the project sponsor or MPO has demonstrated that the requirements are satisfied without a particular mitigation, such as emissions offsets or other control measures, or determining that a conforming project approved with mitigation no longer requires mitigation. ()

d. Assuring that plans for construction of regionally significant projects that are not FHWA/FTA projects, including projects for which alternative locations, design concept and scope, or the no-build option are still being considered, are disclosed to the MPO or ITD in the absence of an MPO on a regular basis, and assuring that any changes to those plans are immediately disclosed. ()

e. Determining whether a project, which was previously found to conform, has or will have a significant change in design concept and scope since the project plan and TIP conformity determination. ()

f. Designing, scheduling, and funding of research and data collection effort pertaining to transportation or air quality planning with implications for transportation conformity. ()

g. Reviewing and recommending regional transportation model development by the MPO (e.g., household/travel transportation surveys). ()

h. Development of transportation improvement programs. ()

i. Development of regional transportation plans. ()

j. Consulting when the metropolitan planning area does not include the entire nonattainment area or maintenance area, for planning requirements which may fall under the jurisdiction of more than one (1) MPO or the MPO and ITD. ()

03. Specific Air Quality Related Activities. The consultation process shall be undertaken when preparing an applicable implementation plan that includes the revision or addition of a motor vehicle emissions inventory and budget activities in accordance with the procedures in Section 570. Consultation is not required for administrative amendments that do not affect conformity. The lead agency for each activity shall be IDEQ or the MPO. In addition to the Section 570 consultation process, the lead agency shall undertake the following: ()

a. Scheduling consultation meetings early in the process of decision on the applicable implementation plan, and prior to making a final recommendation to their management, committees, boards or commissions, for a final decision on such documents; ()

b. Arranging for technical committees or teams to assist ICC members in reviewing documents provided by the lead agency. The lead agency may convene technical meetings as necessary; and ()

c. Scheduling and conducting meetings of the ICC at regularly scheduled intervals, no less frequently than quarterly. ()

d. The ICC may appoint subcommittees to address specific issues pertaining to applicable implementation plan development. Any recommendations of a subcommittee shall be considered by the ICC. ()

04. Notification Process. The designated MPO, or ITD in the absence of an MPO, shall notify ICC members and persons on the distribution list of a transportation plan or TIP revisions that merely add or delete exempt projects listed in 40 CFR 93.126 early in the process of decision, and by supplying all relevant documents and information to the same. ()

572. FINAL CONFORMITY DETERMINATIONS BY USDOT.

Section 572 establishes the process USDOT shall follow when making final determinations on proposed or anticipated transportation actions subject to transportation conformity. ()

01. Final Conformity Determination Process. USDOT will make making final determinations on proposed or anticipated STIP or transportation plan or project conformity by: ()

a. Distributing a draft conformity determination to EPA for review and comment. USDOT shall allow a maximum of thirty (30) days for EPA to respond; and ()

b. USDOT shall respond in writing to any significant comments raised by EPA within fourteen (14) days of receipt in writing before making a final decision. ()

02. New or Revised Information. If USDOT requests any new or revised information to support a STIP, TIP or transportation plan or project conformity determination, then USDOT shall either return the conformity determination for additional consultation pursuant to Section 570, or USDOT shall distribute the new information to the ICC members and persons on the distribution list for review and comment; ()

a. When USDOT distributes such new or additional information to ICC members and persons on the distribution list, USDOT shall allow for a maximum of thirty (30) days for the lead agency to respond to any new or revised supporting information; and ()

b. USDOT shall distribute a written response within fourteen (14) days of receipt to any significant comments raised by the ICC members and persons on the distribution list on the new or revised supporting information before making a final decision. ()

573. RESOLVING CONFLICTS.

Conflicts between state agencies or between state agencies and the MPO regarding a determination of conformity, applicable implementation plan submittal, or other policy decision under Sections 563 through 574, shall be resolved in the following manner. ()

01. Conflict Resolution at the Level of IDEQ Regions and ITD Districts. Every effort shall be made to resolve any conflicts among state agencies or between state agencies and an MPO at the regional level. The regional administrator of IDEQ, the District Engineer of ITD and the other agency managers at the regional level of the affected jurisdictions, or their designated representatives shall be involved in conflict resolution at the regional level. ()

02. Conflict Resolution at the Level of IDEQ and ITD Headquarters. If conflict(s) are not resolved at the regional level, the issue shall be raised to the level of agency directors for resolution. ()

03. Conflict Resolution at the Governor's Level. If conflict(s) are not resolved through Subsection 569.02, then IDEQ shall raise the conflict to the Governor, as follows: ()

a. The IDEQ administrator shall request in writing that ITD or the MPO provide IDEQ with written notification of resolution of IDEQ's comments. ITD or the MPO shall provide IDEQ with the requested written notification within fourteen (14) days of receipt of IDEQ's written request. ()

b. Within fourteen (14) days of its receipt of the requested written notification, IDEQ may appeal the conformity determination in writing to the Governor. If IDEQ appeals to the Governor, then the final conformity determination must have the concurrence of the Governor. If IDEQ does not appeal in writing to the Governor within fourteen (14) days of its receipt of written notification of resolution of its comments, then the lead transportation agency may proceed with the final conformity determination. ()

c. The fourteen (14) days shall start on the date when the IDEQ administrator receives notification of the written resolution of his comments regarding a determination of conformity, applicable implementation plan submittal, or other decision under Sections 563 through 574. ()

04. Process for Conflict Resolution at the Governor's Level. The Governor may delegate to another independent official or agency within the state his or her role in this process. The Governor may not delegate his or her role to the head or staff of the state air quality agency or any local air quality agency, ITD, a state transportation commission or board, any agency that has responsibility for any one (1) of these functions, or an MPO. ()

574. PUBLIC CONSULTATION PROCEDURES.

Affected agencies making conformity determinations on transportation plans, programs, and projects shall establish a proactive public involvement process which provides opportunity for public review and comment by, at a minimum, providing at the beginning of the public comment period and prior to taking formal action on a conformity determination for all transportation plans and TIPs, reasonable public access to technical and policy information considered by the agency, and consistent with these requirements and those of 23 CFR 450. Any charges imposed for public inspection and copying should be consistent with the fee schedule contained in 49 CFR 7.95. In addition, these agencies must specifically address, in writing, all public comments relating to known plans for a regionally significant project, which is not receiving FHWA or FTA funding, or approval. This is especially important if the project's emissions have not been properly reflected in the emissions analysis supporting a proposed conformity finding for a transportation plan or TIP. These agencies shall also provide opportunity for public involvement in conformity determinations for projects where otherwise required by law. ()

575. AIR QUALITY STANDARDS AND AREA CLASSIFICATION.

Ambient Air Quality Standards. The purpose of Sections 575 through 587 is to establish air quality standards for the state of Idaho which define acceptable ambient concentrations consistent with established air quality criteria. ()

576. GENERAL PROVISIONS FOR AMBIENT AIR QUALITY STANDARDS.

01. Applicability. The ambient air quality standards established herein shall apply to all of the state. ()

02. Standard Conditions. Where applicable, air quality measurements shall be corrected to a reference temperature of twenty-five degrees Celsius (25C) and to a reference pressure of seven hundred and sixty (760) millimeters of mercury absolute. ()

03. Revisions. As pertinent air quality criteria information becomes available, such information shall be considered and new or revised air quality standards promulgated as appropriate. ()

04. Control of Unregulated Contaminants. The absence of an air quality standard for a specific contaminant shall not preclude action by the Department to control such contaminants to assure the health, welfare and comfort of the people of the State. ()

05. Methods. All measurement techniques for determining compliance with 40 CFR Part 50 shall be consistent with those specified in 40 CFR Parts 50 and 53. ()

577. AMBIENT AIR QUALITY STANDARDS FOR FLUORIDES.

Primary and secondary air quality standards are those concentrations in the ambient air which result in a total fluoride content in vegetation used for feed and forage of no more than: ()

- 01. Annual Standard.** Forty (40) ppm, dry basis -- annual arithmetic mean. ()
- 02. Bimonthly Standard.** Sixty (60) ppm, dry basis -- monthly concentration for two (2) consecutive months. ()
- 03. Monthly Standard.** Eighty (80) ppm, dry basis -- monthly concentration never to be exceeded. ()

578. DESIGNATION OF ATTAINMENT, UNCLASSIFIABLE, AND NONATTAINMENT AREAS.

01. Annual Review. The Department shall annually review the available ambient air quality data and when appropriate, redesignate areas as attainment, unclassifiable or nonattainment with the standards in 40 CFR Part 50. ()

02. Boundaries. Boundaries for such areas will be based, as much as possible, on actual ambient concentrations and shall take into account such things as the location of air pollutant sources, modeled air quality concentrations, terrain, geographical boundaries and political jurisdictions. ()

03. Area Designation. Designation of attainment and unclassifiable areas shall generally be made on a county basis. Redesignation of attainment or unclassifiable areas cannot intersect or be smaller than the area of impact of any major facility or major modification which establishes the baseline date or is subject to a PSD permit. ()

04. Redesignations. Redesignations shall be adopted by the Department after public notice and opportunity for a public hearing and will be submitted by the Governor (or if delegated, the Director) to the U.S. Environmental Protection Agency. ()

579. BASELINES FOR PREVENTION OF SIGNIFICANT DETERIORATION.

- 01. Baseline Date(s).** ()
 - a. Major Source Baseline Date.** ()
 - i. In the case of PM₁₀ and sulfur dioxide, January 6, 1975; ()
 - ii. In the case of nitrogen dioxide, February 8, 1988; and ()
 - iii. In the case of PM_{2.5}, October 20, 2010. ()
 - b. Minor Source Baseline Date.** The earliest date after the trigger date on which a major stationary source or a major modification subject to prevention of significant deterioration (PSD) submits a complete application. The trigger date is: ()
 - i. In the case of PM₁₀ and sulfur dioxide, August 7, 1977; and ()
 - ii. In the case of nitrogen dioxide, February 8, 1988. ()
 - iii. In the case of PM_{2.5}, October 20, 2011. ()
 - c. The baseline date is established for each pollutant for which increments or other equivalent measures have been established if:** ()
 - i. The area in which the proposed source or modification would construct is designated as attainment

or unclassifiable under Section 107(d) of the Clean Air Act for the pollutant on the date of its complete prevention of significant deterioration (PSD) application; and ()

ii. In the case of a major stationary source, the pollutant would be emitted in significant amounts, or, in the case of a major modification, there would be a significant net emissions increase of the pollutant. ()

d. Any minor source baseline date established originally for the TSP increments shall remain in effect and shall apply for purposes of determining the amount of available PM₁₀ increments, except that the Department may rescind any such minor source baseline date where it can be shown, to the satisfaction of the Department, that the emissions increase from the major stationary source, or the net emissions increase from the major modification, responsible for triggering that date did not result in a significant amount of PM₁₀ emissions. ()

02. Baseline Area. Any intrastate area designated as attainment or unclassifiable under 42 U.S.C. Section 7407(d), in which the major facility or major modification establishing the minor source baseline date would construct or would have an air quality impact for the pollutant for which the baseline date is established, as follows: Equal to or greater than 1 µg/m³ (annual average) for SO₂, NO₂, or PM₁₀; or equal or greater than 0.3 µg/m³ (annual average) for PM_{2.5}. ()

03. Baseline Concentration. The ambient concentration for a particular regulated air pollutant which exists in the applicable baseline area on the applicable minor source baseline date. ()

a. The baseline concentration shall represent: ()

i. The actual emissions from sources in existence on the applicable minor source baseline date; and ()

ii. The allowable emissions of major facilities and major modifications which commenced construction before the applicable major source baseline date, but were not in operation by the applicable minor source baseline date. ()

b. The baseline concentration shall not include the actual emissions of new major facilities and major modifications which commenced construction on or after the applicable major source baseline date. ()

580. CLASSIFICATION OF PREVENTION OF SIGNIFICANT DETERIORATION AREAS.

01. Restrictions On Area Classification. ()

a. All of the following areas which were in existence on August 7, 1977, are Class I and may not be redesignated: ()

i. International parks; ()

ii. National wilderness areas which exceed five thousand (5,000) acres; ()

iii. National memorial parks which exceed five thousand (5,000) acres; ()

iv. National parks which exceed six thousand (6,000) acres. ()

b. The following areas are Class II and may be redesignated only as Class I or II: ()

i. National monuments, national primitive areas, national preserves, national recreational areas, national wild and scenic rivers, national wildlife refuges, and national lakeshores or seashores which exceed ten thousand (10,000) acres; or ()

ii. National parks or national wilderness areas established after August 7, 1977, which exceed ten thousand (10,000) acres. ()

- c. All other areas in the State are Class II and may be redesignated Class I, II or III. ()

02. Procedures for Redesignation of Prevention of Significant Deterioration (PSD) Areas. The Governor may submit to the U.S. Environmental Protection Agency a proposal to redesignate areas as a revision to the SIP. In preparing any such proposal the Department shall: ()

a. Consult with the elected leadership of local and other substate general purpose governments in the area covered by the proposed redesignation; ()

b. Prepare a discussion of the reasons for the proposed redesignation, including a satisfactory description and analysis of the health, environmental, economic, social and energy effects of the proposal. This document will be made available for public inspection at least thirty (30) days prior to the public hearing on the proposed redesignation and the notice announcing the hearing will include notification of the availability of the document; ()

c. Provide written notice to the appropriate Federal Land Manager of any federal lands proposed for redesignation and provide at least thirty (30) days for the Federal Land Manager to confer with the Department and to submit written comments and recommendations. If written comments and recommendations are submitted, the Department shall publish a list of any inconsistency between the proposed redesignation and the comments and recommendations, including the reasons for making a redesignation against the recommendation of the Federal Land Manager; ()

d. Notify other states, Indian governing bodies, and federal land managers whose land may be affected by the proposed redesignation at least thirty (30) days prior to the public hearing; ()

e. For a redesignation to Class III: After consulting with the appropriate committees of the legislature, if it is in session, or the leadership of the legislature, if it is not in session, obtain specific approval by the Governor and by all general purpose units of local government representing a majority of the residents of the area to be redesignated; demonstrate that the redesignation would not cause, or contribute to, violations of any ambient air quality standard, or violations of PSD increments in any other area; and make available, for public inspection prior to the public hearing, any permit application and accompanying material for any major facility or major modification which could only be permitted if the area were designated as Class III; and ()

- f. Hold at least one (1) public hearing on the proposed redesignation. ()

581. PREVENTION OF SIGNIFICANT DETERIORATION (PSD) INCREMENTS.

The purpose of Section 581 is to establish the allowable degree of deterioration for the areas within the State which have air quality better than the ambient standards. ()

01. Incorporated Federal Program Requirements - Class I, II and III Areas. Class I, II, and III area PSD increment requirements contained in 40 CFR 52.21(c) are incorporated by reference into these rules at Section 107. These CFR sections have been codified in the electronic CFR at www.ecfr.gov. ()

02. Exceedances. For any period other than an annual period, the applicable maximum allowable increase may be exceeded during one (1) such period per year at any one (1) location. ()

03. Exclusions. The following concentrations shall be excluded in determining compliance with the maximum allowable increases: ()

a. Concentrations attributable to the increase in emissions from facilities which have converted from the use of petroleum products, natural gas, or both by reason of an order in effect under the Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation) or by reason of a natural gas curtailment plan in effect pursuant to the Federal Power Act, over the emissions from such facilities before the effective date of such order or plan; this shall not apply more than five (5) years after the effective date of such order or plan; ()

- b. Concentrations of PM-10 attributable to the increase in emissions from construction or other

temporary emission-related activities of new or modified facilities; ()

c. The increase in concentrations attributable to new facilities outside the United States over the concentrations attributable to existing facilities which are included in the baseline concentration; and ()

d. Concentrations attributable to the temporary increase in emissions of sulfur dioxide, nitrogen dioxide, or particulate matter from facilities which are affected by a revision to the SIP approved by the U.S. Environmental Protection Agency; this exclusion shall not exceed two (2) years unless a longer time is approved by the U.S. Environmental Protection Agency, is not renewable, and applies only to revisions which: ()

i. Would not affect the applicable pollutant concentrations in a Class I area or an area where an applicable increment is known to be violated and would not cause or contribute to a violation of an ambient air quality standard; and ()

ii. Require limitations to be in effect at the end of the approved time period which would ensure that the emissions from facilities affected by the revision would not exceed those concentrations occurring before the revision was approved. ()

582. -- 584. (RESERVED)

585. TOXIC AIR POLLUTANTS NON-CARCINOGENIC INCREMENTS.

The screening emissions levels (EL) and acceptable ambient concentrations (AAC) for non-carcinogens are as provided in the following table. The AAC in this section are twenty-four (24) hour averages. ()

CAS NUMBER	SUBSTANCE	OEL (mg/m3)	EL (lb/hr)	AAC (mg/m3)

587. LISTING OR DELISTING TOXIC AIR POLLUTANT INCREMENTS.

Persons may request the listing of any toxic substance or delisting of any toxic air pollutant in Sections 585 or 586 by filing a petition for adoption of rules in accordance with IDAPA 58.01.23, "Rules of Administrative Procedure Before the Board of Environmental Quality."

()

588. -- 591. (RESERVED)

592. STAGE 1 VAPOR COLLECTION.

The purpose of Sections 592 through 598 is to set forth requirements for Stage 1 vapor collection systems. Section 599 sets forth the requirements for gasoline cargo tanks that deliver gasoline to those required to install and operate Stage 1 vapor collection systems. These sections apply to gasoline dispensing facilities (GDF) and gasoline cargo tanks in Ada and Canyon Counties only. Nothing in these rules is intended to supersede or render inapplicable any federal, state, or local laws, including, but not limited to, the National Emission Standards for Hazardous Air

Pollutants for Source Category: Gasoline Dispensing Facilities, 40 CFR Part 63, Subpart CCCCCC, of the federal Clean Air Act. ()

593. AFFECTED EQUIPMENT OR PROCESSES.

01. Applicability. Sections 592 through 598 apply to transfers of gasoline to underground storage tanks with a tank capacity of ten thousand (10,000) gallons and not otherwise subject to 40 CFR 63.11118. The emission sources include the underground gasoline storage tanks and associated equipment components in vapor or liquid gasoline service at new, reconstructed, or existing GDFs. Pressure/vacuum vents on underground gasoline storage tanks and the equipment necessary to unload product from cargo tanks into the storage tanks at GDFs are covered emission sources. ()

02. New Sources. A source is a new source if construction commenced on the source after April 1, 2009. ()

03. Reconstructed Sources. A source is reconstructed if meeting the criteria for reconstruction as defined in 40 CFR 63.2, incorporated by reference into these rules at Section 107. ()

04. Existing Sources. A source is an existing source if it is not new or reconstructed. ()

594. COMPLIANCE DATES.

01. New or Reconstructed Sources. For a new or reconstructed source, the owner or operator must comply with the standards in Sections 595 and 596 no later than April 1, 2009 or upon startup, whichever is later. Owners or operators of new sources shall install dual point systems. ()

02. Existing Sources. For an existing source, the owner or operator must comply with the standards in Sections 595 and 596 upon installation of the Stage 1 vapor collection system, or by May 1, 2010, whichever is earlier. ()

595. SUBMERGED FILL REQUIREMENTS.

The owner or operator must only load gasoline into underground storage tanks at the facility by utilizing submerged filling. ()

01. Installed On or Before November 9, 2006. Submerged fill pipes installed on or before November 9, 2006 must be no more than twelve (12) inches from the bottom of the storage tank. ()

02. Installed After November 9, 2006. Submerged fill pipes installed after November 9, 2006 must be no more than six (6) inches from the bottom of the storage tank. ()

596. VAPOR BALANCE REQUIREMENTS.

The owner or operator of a GDF must comply with the following requirements on and after the applicable compliance date in Section 594: ()

01. Loading. When loading an underground gasoline storage tank equipped with a vapor balance system, connect and ensure the proper operation of the vapor balance system whenever gasoline is being loaded. ()

02. Maintenance. Maintain all equipment associated with the vapor balance system to be vapor tight and in good working order. ()

03. Inspection. In order to ensure that the vapor balance equipment is maintained to be vapor tight and in good working order, inspect the vapor balance equipment on an annual basis to discover potential or actual equipment failures. A log form is available on the Department's website at <http://www.deq.idaho.gov>. ()

04. Repair. Replace, repair or modify any worn or ineffective component or design element within twenty-four (24) hours to ensure the vapor-tight integrity and efficiency of the vapor balance system. If repair parts

must be ordered, either a written or verbal order for those parts must be initiated within two (2) working days of detecting such a leak. Such repair parts must be installed within five (5) working days after receipt. ()

597. TESTING AND MONITORING REQUIREMENTS.

The owner or operator of a GDF must comply with the following requirements within ninety (90) days of registration under Section 598 and every three (3) years thereafter. ()

01. Testing. ()

a. The owner or operator must demonstrate compliance with the leak rate and cracking pressure requirements, specified in item 1(g) of Table 1 to 40 CFR Part 63, Subpart CCCCCC, incorporated by reference into these rules at Section 107, for pressure-vacuum vent valves installed on underground gasoline storage tanks using the test methods identified in Subsection 597.01.a.i. or 597.01.a.ii. ()

i. California Air Resources Board Vapor Recovery Test Procedure TP-201.1E,--Leak Rate and Cracking Pressure of Pressure/Vacuum Vent Valves, adopted October 8, 2003 (see 40 CFR 63.14, incorporated by reference into these rules at Section 107). ()

ii. Use alternative test methods and procedures in accordance with the alternative test method requirements in 40 CFR 63.7(f), incorporated by reference into these rules at Section 107. ()

b. The owner or operator must demonstrate compliance with the static pressure performance requirement, specified in item 1(h) of Table 1 to 40 CFR Part 63, Subpart CCCCCC, for the vapor balance system by conducting a static pressure test on the underground gasoline storage tanks using the test methods identified in paragraph 597.01.b.i. or 597.01.b.ii. ()

i. California Air Resources Board Vapor Recovery Test Procedure TP-201.3,--Determination of 2-Inch WC Static Pressure Performance of Vapor Recovery Systems of Dispensing Facilities, adopted April 12, 1996, and amended March 17, 1999 (see 40 CFR 63.14, incorporated by reference into these rules at Section 107). ()

ii. Use alternative test methods and procedures in accordance with the alternative test method requirements in 40 CFR 63.7(f), incorporated by reference into these rules at Section 107. ()

02. Alternative Testing. The owner or operator of a GDF, choosing, under the provisions of 40 CFR 63.6(g), to use a vapor balance system other than that described in Table 1 to 40 CFR Part 63, Subpart CCCCCC, must demonstrate to the Department the equivalency of their vapor balance system to that described in Table 1 to 40 CFR Part 63, Subpart CCCCCC, using the procedures specified in Subsections 597.02.a. and 597.02.b. ()

a. The owner or operator must demonstrate compliance by conducting a performance test on the vapor balance system to demonstrate that the vapor balance system achieves 95 percent reduction using the California Air Resources Board Vapor Recovery Test Procedure TP-201.1,--Volumetric Efficiency for Phase I Vapor Recovery Systems, adopted April 12, 1996, and amended February 1, 2001, and October 8, 2003, (see 40 CFR 63.14, incorporated by reference into these rules at Section 107). ()

b. The owner or operator must, during the performance test required under Subsection 597.02.a., determine and document alternative acceptable values for the leak rate and cracking pressure requirements specified in item 1(g) of Table 1 to 40 CFR Part 63, Subpart CCCCCC, and for the static pressure performance requirement in item 1(h) of Table 1 to 40 CFR Part 63, Subpart CCCCCC. ()

598. REGISTRATION, RECORDKEEPING, AND REPORTING REQUIREMENTS.

01. Registration. ()

a. Any GDF subject to these rules shall: ()

i. Within thirty (30) days of installation of the Stage 1 vapor collection system, the owner or operator

of the GDF shall submit to the Department a registration which provides, at a minimum, the operation name and address, signature of the owner or operator in accordance with Section 123 of these rules, the location of records and reports required by Subsections 598.02 and 598.03 (including contact person's name, address and telephone number), the number of underground gasoline storage tanks, the number of gasoline tank pipe vents, and the date of completion of installation of the Stage 1 vapor collection system and pressure/vacuum relief valve; and ()

ii. The registration certification shall be displayed at the GDF. ()

b. Upon modification of an existing Stage 1 vapor collection system or pressure/vacuum relief valve, the owner or operator of the GDF shall submit to the Department a registration that details the changes to the information provided in the previous registration and which includes the signature of the owner or operator. The registration must be submitted to the Department within thirty (30) days after completion of such modification. ()

c. A new registration must be submitted to the Department within thirty (30) days after any change in ownership of the GDF. ()

02. Recordkeeping Requirements. ()

a. Each owner or operator must keep the following records: ()

i. Records of all tests performed under Section 597; ()

ii. Records related to the operation and maintenance of vapor balance equipment required under Section 596. Any vapor balance component defect must be logged and tracked by station personnel on a monthly basis using forms provided by the Department or a reasonable facsimile; and ()

iii. Records of permanent changes made at the GDF and vapor balance equipment which may affect emissions. ()

b. Records required under 598.02.a. must be kept for a period of five (5) years and must be made available for inspection by the Department upon request. ()

03. Reporting Requirements. Each owner or operator subject to the management practices in Section 596 must report to the Department the results of all volumetric efficiency tests required under Section 597. Reports submitted under these rules must be submitted within thirty (30) days of the completion of the performance testing. ()

599. GASOLINE CARGO TANKS.

01. Prohibitions. After May 1, 2010, or if a Stage 1 vapor collection system is installed and operating, whichever is earlier, owners or operators of gasoline cargo tanks that unload gasoline into an underground gasoline storage tank with a capacity of ten thousand (10,000) gallons or more, in Ada or Canyon Counties, shall comply with Table 2 to 40 CFR Part 63, Subpart CCCCCC, incorporated by reference into these rules at Section 107. Table 2 requires that the following conditions are met prior to unloading the gasoline: ()

a. All hoses in the vapor balance system are properly connected; ()

b. The adapters or couplers that attach to the vapor line on the storage tank have closures that seal upon disconnect; ()

c. All vapor return hoses, couplers, and adapters used in the gasoline delivery are vapor-tight; ()

d. All tank truck vapor return equipment is compatible in size and forms a vapor-tight connection with the vapor balance equipment on the GDF storage tank; and ()

e. All hatches on the tank truck are closed and securely fastened. ()

f. The filling of storage tanks at GDF shall be limited to unloading by vapor-tight gasoline cargo tanks. Documentation that the cargo tank has met the specifications of EPA Method 27 (40 CFR Part 60, Appendix A-8, incorporated by reference into these rules at Section 107), shall be carried on the cargo tank. ()

02. Compliance. The owner or operator of a gasoline cargo tank subject to Section 599 shall ensure compliance with Table 2 to 40 CFR Part 63, Subpart CCCCCC, by visually inspecting the requirements set out in Subsections 599.01.a., 599.01.b., 599.01.d., and 599.01.e. and by successfully completing the testing requirements set out in Subsections 599.01.c. and 599.01.f. ()

03. Recordkeeping and Reporting. ()

a. The owner or operator of the gasoline cargo tank subject to Section 599 shall maintain records of all certification testing and repairs. The records must identify the gasoline cargo tank; the date of the test or repair; and if applicable, the type of repair and the date of retest. The records must be maintained in a legible, readily available condition for at least two (2) years after the date of testing or repair was completed and must be available for inspection by the Department upon request. ()

b. Copies of all tests required under Subsection 599.01 shall be submitted to the Department within thirty (30) days of certification testing. ()

600. RULES FOR CONTROL OF OPEN BURNING.

The purpose of Sections 600 through 624 is to reduce the amount of emissions and minimize the impact of open burning to protect human health and the environment from air pollutants resulting from open burning as well as to reduce the visibility impairment in mandatory Class I Federal Areas in accordance with the regional haze long-term strategy referenced at Section 667. ()

601. FIRE PERMITS, HAZARDOUS MATERIALS, AND LIABILITY.

Compliance with the provisions of Sections 600 through 623 does not exempt or excuse any person from complying with applicable laws and ordinances of other jurisdictions responsible for fire control or hazardous material disposal or from liability for damages or injuries which may result from open burning. ()

602. NONPREEMPTION OF OTHER JURISDICTIONS.

The provisions of Sections 600 through 623 are not intended to interfere with the rights of any city, county or other governmental entities or agencies to provide equal or more stringent control of open burning within their respective jurisdictions. ()

603. GENERAL RESTRICTIONS.

01. Categories and Materials. No person shall allow, suffer, cause or permit any open burning operation unless it is a category of open burning set forth in Sections 600 through 623 and the materials burned do not include any of the following: ()

a. Garbage, as defined in Section 006. ()

b. Dead animals, animal parts, or animal wastes (feces, feathers, litter, etc.) except as provided in Section 616. ()

c. Motor vehicles, parts, or any materials resulting from a salvage operation. ()

d. Tires or other rubber materials or products. ()

e. Plastics. ()

f. Asphalt or composition roofing or any other asphaltic material or product. ()

- g. Tar, tar paper, waste or heavy petroleum products, or paints. ()
- h. Lumber or timbers treated with preservatives. ()
- 623. i. Trade waste, as defined in Section 006, except as specifically allowed under Sections 600 through ()
- j. Insulated wire. ()
- k. Pathogenic wastes. ()
- l. Hazardous wastes. ()

02. Air Pollution Episodes. No person shall allow, suffer, cause or permit any open burning to be initiated during any stage of an air pollution episode declared by the Department in accordance with Sections 550, through 562. ()

03. Emergency Authority. In accordance with Title 39, Chapter 1, Idaho Code, the Department has the authority to require immediate abatement of any open burning in cases of emergency requiring immediate action to protect human health or safety. ()

604. -- 605. (RESERVED)

606. CATEGORIES OF ALLOWABLE BURNING.

The purpose of Sections 606 through 623 is to establish categories of open burning that are allowed when done according to prescribed conditions. Unless specifically exempted each category in Sections 606 through 623 is subject to all of the provisions of Sections 600 through 605. ()

607. RECREATIONAL AND WARMING FIRES.

Fires used for the preparation of food or for recreational purposes (e.g. campfires, ceremonial fires, and barbecues), or small fires set for handwarming purposes, are allowable forms of open burning. ()

608. WEED CONTROL FIRES.

Open outdoor fires used for the purpose of weed abatement such as along fence lines, canal banks, and ditch banks is an allowable forms of open burning. ()

609. TRAINING FIRES.

Fires used by qualified personnel to train firefighters in the methods of fire suppression and fire fighting techniques, or to display certain fire ecology or fire behavior effects are allowable forms of open burning. Training facilities shall notify the Department prior to igniting any training fires. Training fires shall not be allowed to smolder after the training session has terminated. Training fires are exempt from Subsections 603.01.c. and 603.01.e. through 603.01.j. ()

610. INDUSTRIAL FLARES.

Industrial flares, used for the combustion of flammable gases are allowable forms of open burning. Industrial flares are subject to permitting requirements in Sections 200 through 223. ()

611. RESIDENTIAL SOLID WASTE DISPOSAL FIRES.

01. Fires Allowed. Open outdoor fires used to dispose of solid waste (e.g. rubbish, tree leaves, yard trimmings, gardening waste, etc.) excluding garbage produced by the operation of a domestic household is an allowable form of open burning when the following provisions are met: ()

- a. No scheduled house to house solid waste collection service is available; and ()
- b. The burning is conducted on the property where the solid waste was generated. ()

02. Fires Exempt. Open outdoor fires used to dispose of tree leaves, gardening waste or yard trimmings are exempt from Subsection 611.01.a. when conducted in accordance with local governmental ordinances or rules which allow for the open burning of tree leaves, gardening waste or yard trimming during certain periods of the year. ()

612. LANDFILL DISPOSAL SITE FIRES.

The use of fires for the disposal of solid waste at any solid waste landfill disposal site or facility is an allowable form of open burning only if conducted in accordance with IDAPA 58.01.06, "Solid Waste Management Rules and Standards" or the Solid Waste Facilities Act, Chapter 74, Title 39, Idaho Code. ()

613. ORCHARD FIRES.

The use of heating devices to protect orchard crops from frost damage and the use of fires to dispose of orchard clippings are allowable forms of open burning when the following provisions are met: ()

01. Open-Pot Heaters. The use of stackless open-pot heaters is prohibited. ()

02. Heating Device Opacity. Orchard heating device with visible emissions exceeding forty percent (40%) opacity at normal operating conditions shall not be used. Opacity shall be determined by the procedures contained in Section 625. ()

03. Heating Device Emissions. All heaters purchased after September 21, 1970, shall emit no more than one (1.0) gram per minute of solid carbonaceous matter at normal operating conditions as certified by the manufacturer. At the time of purchase, the seller shall certify in writing to the purchaser that all new equipment is in compliance with Section 613. ()

04. Orchard Clippings. The open burning of orchard clippings shall be conducted on the property where the clippings were generated. ()

614. PRESCRIBED BURNING.

The use of open outdoor fires to obtain the objectives of prescribed fire management burning is an allowable form of open burning when the provisions of Section 614 are met. ()

01. Burning Permits or Prescribed Fire Plans. ()

a. Whenever a burning permit or prescribed fire plan is required by the Department of Lands, U.S.D.A. Forest Service, or any other state or federal agency responsible for land management, any person who conducts or allows prescribed burning shall meet all permit and/or plan conditions and terms which control smoke. ()

b. The Department will seek interagency agreements to assure permits or plans issued by agencies referred to in Subsection 614.01.a. provide adequate consideration for controlling smoke from prescribed burning. ()

02. Smoke Management Plans for Prescribed Burning. ()

a. Whenever a permit or plan is not required by the Department of Lands, U.S.D.A. Forest Service, or any other state or federal agency responsible for land management, any person who conducts or allows prescribed burning shall meet all conditions set forth in a Smoke Management Plan for Prescribed Burning. ()

b. The Department will develop and put into effect a Smoke Management Plan for Prescribed Burning consistent with the purpose of Sections 600 through 616. ()

03. Rights-of-Way Fires. The open burning of woody debris generated during the clearing of rights of way shall be open burned according to Sections 38-101 and 38-401, Idaho Code, IDAPA 20 Title 16 and Sections 606 through 616 of these rules. ()

615. DANGEROUS MATERIAL FIRES.

Fires used or permitted by a public or military fire chief to dispose of materials (including military ordnance) which present a danger to life, valuable property or the public welfare, or for the purpose of prevention of a fire hazard when no practical alternative method of disposal or removal is available are allowable forms of open burning. ()

616. INFECTIOUS WASTE BURNING.

Upon the order of a public health officer, fires used to dispose of diseased animals or infested material are an allowable form of open burning and exempt from Subsection 603.01.k. ()

617. CROP RESIDUE DISPOSAL.

The open burning of crop residue on fields where the crops were grown is an allowable form of open burning if conducted in accordance with Section 39-114, Idaho Code, and Sections 618 through 624 of these rules. ()

618. PERMIT BY RULE.

01. General Requirements. All persons shall be deemed to have a permit by rule if they comply with all the provisions of Sections 618 through 624. No person shall conduct an open burn of crop residue without obtaining the applicable permit by rule. Those persons applying for a spot burn, baled agricultural residue burn, or propane flaming permit shall comply with the provisions in Section 624. The permit by rule does not relieve the applicant from obtaining all other required permits and approvals required by other state and local fire agencies or permitting authorities. ()

02. Forms. The Department shall provide the appropriate forms to complete the permit by rule. Forms may be available at the Department offices or on the Department website <http://www.deq.idaho.gov>. ()

619. REGISTRATION FOR PERMIT BY RULE.

Any person applying to burn crop residue shall annually provide the following registration information to the Department at least thirty (30) days prior to the date the applicant proposes to burn: ()

01. Location of Property. Street address of the property upon which the proposed burning of crop residue will occur or, if there is no street address of the property, the legal description of the property using longitude and latitude coordinates or township, range and section for the Idaho meridian; ()

02. Applicant Information. Name, mailing address, and telephone number of the applicant, and the person who will be responsible for conducting the proposed burning of crop residue and the portable form of communication referenced in Subsection 622.01.c. of this rule; ()

03. Plot Plan. A plot plan showing the location of each proposed crop residue burning area in relation to the property lines and indicating the distances and directions of the nearest residential, public, and commercial properties, and roads; ()

04. Type, Acreage and Fuel Characteristics of Crop Residue Proposed to be Burned. The crop type, area over which burning will be conducted (acres), and other fuel characteristics; ()

05. Preventive Measures. A description of the measures that will be taken to prevent escaped burns or withhold additional material such that the fire burns down, including but not limited to, the availability of water and plowed firebreaks; and ()

06. Date of Burning. The requested date(s) when the proposed crop residue burning would be conducted or the proposed date the field will be available to be burned. ()

620. BURN FEE.

01. Burn Fee. The burn fee in Section 39-114, Idaho Code, shall be paid in its entirety within thirty (30) days following the receipt of the annual burn fee invoice. See also Subsection 624.02.a. for registration and fee requirements for burning under a spot and baled agricultural residue burn permit. The burn fee should be sent to:

Crop Residue Burn Fee
Fiscal Office
Idaho Department of Environmental Quality
1410 N. Hilton, Boise, ID 83706-1255 ()

02. Effect of Delinquent Fee Payment. The Department shall not accept or process a registration for a permit by rule to burn for any person having burn fees delinquent, in full or in part. ()

621. BURN DETERMINATION.

01. Burn Approval Criteria. The Department shall develop a Crop Residue Operating Guide to use in assisting in the determination of burn approvals. The permittee shall obtain initial approval from the Department for the proposed burn at least twelve (12) hours in advance of the burn. The permittee shall confirm, with the Department, the approval the morning of the proposed burn. The Department may shorten this time frame if meteorological or other applicable conditions change that will impact the air quality during the proposed burn period. To approve a permittee's request to burn, the Department must determine that ambient air quality levels do not exceed ninety percent (90%) of the ozone national ambient air quality standard (NAAQS) and seventy-five percent (75%) of the level of any other NAAQS on any day and are not projected to exceed such level over the next twenty-four (24) hours, and ambient air quality levels have not reached, and are not forecasted to reach and persist at, eighty percent (80%) of the one (1) hour action criteria for particulate matter under Section 556 of these rules. In making this determination, the Department shall consider the following: ()

- a. Expected Emissions.** Expected emissions from all burns proposed for the same dates; ()
- b. Proximity of Other Burns.** The proximity of other burns and other potential emission sources within the area to be affected by the proposed burn; ()
- c. Moisture Content.** Moisture content of the material to be burned; ()
- d. Acreage, Crop Type, and Fuel Characteristics.** Acreage, crop type, and fuel characteristics to be burned; ()
- e. Meteorological Conditions.** Meteorological conditions; ()
- f. Proximity to Institutions with Sensitive Populations.** The proximity of the burn to institutions with sensitive populations, including public schools while in session; hospitals; residential health care facilities for children, the elderly or infirm; and other institutions with sensitive populations as approved by the Department. The Department shall not authorize a burn if conditions are such that institutions with sensitive populations will be adversely impacted or when the plume is predicted to impact such institutions; ()
- g. Proximity to Public Roadways.** Proximity to public roadways; ()
- h. Proximity to Airports.** Proximity to airports; and ()
- i. Other Relevant Factors.** Any other factors relevant to preventing exceedances of the air quality concentrations of Section 621. ()

02. Notification of Approval. If the Department approves the burn, then it will post on its website written notification of the approval and any specific conditions under which the burn is approved. Special conditions may include, but are not limited to: ()

- a. Conditions for burns near institutions with sensitive populations;** ()
- b. The requirement to withhold additional material such that the fire burns down if the Department determines pollutant concentrations reach the levels in Subsection 621.01 of this rule;** ()
- c. Conditions to ensure the burn does not create a hazard for travel on a public roadway; and** ()

d. The requirement to consult with the Department to determine actions to be taken if conditions at the burn site fail to satisfy the conditions specified in the notice of approval to burn. ()

622. GENERAL PROVISIONS.

01. Burn Provisions. All persons in Idaho intending to dispose of crop residue through burning shall abide by the following provisions: ()

a. Burning Prohibitions. Burning of crop residue shall not be conducted on weekends, federal or state holidays, or after sunset or before sunrise; ()

b. Designated Burn Day. Burning of crop residue shall not be conducted unless the Department has designated that day a burn day and the permittee has received individual approval specifying the conditions under which the burn may be conducted; ()

c. Portable Form of Communication. The person conducting the burning must have on their possession a portable form of communication such as a cellular phone or radio of compatible frequency with the Department in order to receive burn approval information or information that might require measures to withhold additional material such that the fire burns down; ()

d. Location of Field Burning. Open burning of crop residue shall be conducted in the field where it was generated; ()

e. Limitations on Burning. When required by the conditions of the notice of approval to burn, the permittee burning in proximity to institutions with sensitive populations shall immediately extinguish the fire or withhold additional material such that the fire burns down, unless the Department determines that the burn will not have an adverse impact on such institutions; ()

f. Training Session. All persons intending to burn crop residue shall attend a crop residue burning training session provided by the Idaho Department of Environmental Quality or the Idaho State Department of Agriculture and shall attend a crop residue disposal refresher training session every five (5) years; ()

g. Air Stagnation or Degraded Air Quality. All field burning shall be prohibited when the Department issues an air quality forecast and caution, alert, warning or emergency as identified in Section 552 of these rules; ()

h. Allowable Forms of Open Burning. The use of reburn machines, propane flammers, or other portable devices to ignite or reignite a field for the purposes of crop residue burning shall be considered an allowable form of open burning. Tires and other restricted material described in Subsection 603.01, of this rule, are not allowed for ignition of fields; ()

i. Additional Burn Permits. All persons intending to burn crop residue shall obtain any additional applicable permits from federal, state or local fire control authorities prior to receiving approval from the Department to burn crop residue; and ()

j. Reporting to the Department. All persons burning crop residue shall report to the Department the date burning was conducted, the actual number and location of acres burned, and other information as required by the Department. The Department may restrict further burning by a permittee until completed burns are reported. ()

k. Specific Conditions. The open burning of crop residue shall be conducted in accordance with the specific conditions in the permittee's permit by rule. ()

02. Annual Report. The Department shall develop an annual report that shall include, at a minimum, an analysis of the causes of each exceedance of a limitation in Section 621 of this rule, if any, and an assessment of the circumstances associated with any reported endangerment to human health associated with a burn. The report shall include any proposed revisions to these rules or the Crop Residue Operating Guide deemed necessary to prevent

future exceedances. ()

03. Advisory Committee. The Department will assemble an advisory committee consisting of representatives from environmental organizations, farming organizations, health organizations, tribal organizations, the Idaho State Department of Agriculture, the Idaho Department of Environmental Quality, and others to discuss open burning of crop residue issues. ()

623. PUBLIC NOTIFICATION.

01. Designation of Burn Days. The Director or his designee shall designate for a given county or airshed within a county burn or no-burn days. ()

02. Posting on Website. The Department shall post daily on its website (www.deq.idaho.gov): ()

a. Whether a given day is a burn or no-burn day; ()

b. The location and number of acres permitted to be burned; ()

c. Meteorological conditions and any real time ambient air quality monitoring data; and ()

d. A toll-free number to receive requests for information (1-800-345-1007). ()

03. E-Mail Update Service. The Department shall provide an opportunity for interested persons to sign up to receive automatic e-mail updates for information regarding the open burning of crop residue. ()

624. SPOT BURN, BALED AGRICULTURAL RESIDUE BURN, AND PROPANE FLAMING PERMITS.

01. Applicability. ()

a. Spot Burn. A spot burn includes no more than one (1) acre of evenly distributed crop residue or two (2) tons of piled crop residue. The open burning of weed patches, spots of heavy residue, equipment plugs and dumps, pivot corners of fields, and pastures may constitute a spot burn. Spot burn does not include the open burning of wind rows. ()

b. Baled Agricultural Residue Burn. An open burn used to dispose of broken, mildewed, diseased, or otherwise pest-ridden bales still in the field where they were generated. ()

c. Propane Flaming. The use of flame-generating equipment to briefly apply flame and/or heat to the topsoil of a cultivated field of pre-emerged or plowed-under crop residue with less than five hundred fifty (550) pounds of burnable, non-green residue per acre in order to control diseases, insects, pests, and weed emergence. ()

02. Spot and Baled Agricultural Residue Burn Permit. ()

a. Registration and Fee Requirements. Any person applying for a spot and baled agricultural residue burn permit under Section 624 shall provide the registration information listed in Subsections 619.01 and 619.02 and pay a nonrefundable fee of twenty dollars (\$20) to the Department (see Section 620) at least fourteen (14) days prior to the date the applicant proposes to conduct the first burn of the calendar year. ()

b. Term and Acreage. A spot and baled agricultural residue burn permit is valid for the calendar year in which it is issued and is good for a cumulative total of no more than ten (10) acres of spots and/or equivalent piled or baled agricultural residue during the year and no more than one (1) acre of spots and/or equivalent piled or baled agricultural residue per day. Two (2) tons of piled or baled agricultural residue is assumed to be equivalent to one (1) acre. ()

03. Propane Flaming Permit. Persons conducting propane flaming as defined under Subsection 624.01.c. shall be deemed to have a permit by rule if they comply with the applicable provisions in Subsections 624.04 and 624.05. ()

04. General Provisions. All persons intending to burn under Section 624 shall comply with the provisions of Subsections 622.01.c., 622.01.d., 622.01.f., through 622.01.i., and 622.01.k. in addition to the following: ()

a. The permittee is responsible to ensure that adequate measures are taken so the burn does not create a hazard for travel on a public roadway. ()

b. Burning is not allowed if the proposed burn location is within three (3) miles of an institution with a sensitive population and the surface wind speed is greater than twelve (12) miles per hour or if the smoke is adversely impacting or is expected to adversely impact an institution with a sensitive population. ()

c. Designated Burn Day. Burning shall not be conducted unless the Department has designated that day a burn day, which for purposes of Section 624 may include weekends and holidays, and the permittee burns within the burn window provided on the Department's website at www.deq.idaho.gov. Spot and baled agriculture residue burns shall not smolder and create smoke outside of the designated time period burning is allowed. ()

05. Recordkeeping. Permittees shall record the date, time frame, type of burn, type of crop, and amount burned on the date of the burn. Records of such burns shall be retained for two (2) years and made available to the Department upon request. ()

625. VISIBLE EMISSIONS.

A person shall not discharge any air pollutant into the atmosphere from any point of emission for a period or periods aggregating more than three (3) minutes in any sixty (60) minute period which is greater than twenty percent (20%) opacity as determined by this section. ()

01. Exemptions. The provisions of this section shall not apply to: ()

a. Kraft Process Lime Kilns, if operating prior to January 24, 1969; or ()

b. Carbon Monoxide Flare Pits on Elemental Phosphorous Furnaces, if operating prior to January 24, 1969; or ()

c. Liquid Phosphorous Loading Operations, if operating prior to January 24, 1969; or ()

d. Wigwam Burners; or ()

e. Kraft Process Recovery Furnaces. ()

f. Calcining Operations Utilizing an Electrostatic Precipitator to Control Emissions, if operating prior to January 24, 1969. ()

02. Standards for Exempted Sources. Except as provided in Section 626, for sources exempted from the provisions of this section, a person shall not discharge into the atmosphere from any point of emission, for any air pollutant for a period or periods aggregating more than three (3) minutes in any sixty (60) minute period which is greater than forty percent (40%) opacity as determined by this section. ()

03. Exception. The provisions of this section shall not apply when the presence of uncombined water, nitrogen oxides and/or chlorine gas are the only reason(s) for the failure of the emission to comply with the requirements of this rule. ()

04. Test Methods and Procedures. The appropriate test method under this section shall be EPA Method 9 (contained in 40 CFR Part 60) with the method of calculating opacity exceedances altered as follows: ()

a. Opacity evaluations shall be conducted using forms available from the Department or similar forms approved by the Department. ()

b. Opacity shall be determined by counting the number of readings in excess of the percent opacity limitation, dividing this number by four (4) (each reading is deemed to represent fifteen (15) seconds) to find the number of minutes in excess of the percent opacity limitation. This method is described in the Procedures Manual for Air Pollution Control, Section II (Evaluation of Visible Emissions Manual), September 1986. ()

c. Sources subject to New Source Performance Standards must calculate opacity as detailed above and as specified in 40 CFR Part 60. ()

05. Applicability. Section 625 shall not apply to the open burning of crop residue. ()

626. GENERAL RESTRICTIONS ON VISIBLE EMISSIONS FROM WIGWAM BURNERS.

Except for a period of one (1) hour following start up a person shall not discharge into the atmosphere from any wigwam burner any air pollutant for a period or periods aggregating more than three (3) minutes in any sixty (60) minute period which is greater than twenty percent (20%) opacity as determined by the procedures contained in Section 625. ()

627. -- 649. (RESERVED)

650. RULES FOR CONTROL OF FUGITIVE DUST.

The purpose of Sections 650 through 652 is to require that all reasonable precautions be taken to prevent the generation of fugitive dust. ()

651. GENERAL RULES.

All reasonable precautions shall be taken to prevent particulate matter from becoming airborne. In determining what is reasonable, consideration will be given to factors such as the proximity of dust emitting operations to human habitations and/or activities, the proximity to mandatory Class I Federal Areas and atmospheric conditions which might affect the movement of particulate matter. Some of the reasonable precautions may include, but are not limited to, the following: ()

01. Use of Water or Chemicals. Use, where practical, of water or chemicals for control of dust in the demolition of existing buildings or structures, construction operations, the grading of roads, or the clearing of land. ()

02. Application of Dust Suppressants. Application, where practical, of asphalt, oil, water or suitable chemicals to, or covering of dirt roads, material stockpiles, and other surfaces which can create dust. ()

03. Use of Control Equipment. Installation and use, where practical, of hoods, fans and fabric filters or equivalent systems to enclose and vent the handling of dusty materials. Adequate containment methods should be employed during sandblasting or other operations. ()

04. Covering of Trucks. Covering, when practical, open bodied trucks transporting materials likely to give rise to airborne dusts. ()

05. Paving. Paving of roadways and their maintenance in a clean condition, where practical. ()

06. Removal of Materials. Prompt removal of earth or other stored material from streets, where practical. ()

652. AGRICULTURAL ACTIVITIES.

For agricultural activity purposes, operating in conformance with generally recognized agricultural practices constitutes reasonable control of fugitive dust. For the purpose of Section 652: ()

01. Agricultural Activity. An "agricultural activity" means any activity that is exempt from the

requirement to obtain a permit to construct under Subsection 222.02.f., wherein “agricultural activities and services” is defined in Section 007, that occurs in connection with the production of agricultural products for food, fiber, fuel, feed and other lawful purposes, and including, but not limited to: ()

- a. Preparing land for agricultural production; ()
- b. Applying or handling pesticides herbicides, or other chemicals, compounds or substances labeled for insects, pests, crops, weeds, water or soil; ()
- c. Planting, irrigating, growing, fertilizing, harvesting or producing agricultural, horticultural, floricultural and viticulture crops, fruits and vegetable products, field grains, seeds, hay, sod and nursery stock, and other plant products, plant by-products, plant waste and animal compost; ()
- d. Breeding, hatching, raising, producing, feeding and keeping livestock, dairy animals, swine, fur-bearing animals, poultry, eggs, fish and other aquatic species, and other animals, animal products and animal by-products, animal waste, animal compost, and bees, bee products and bee by-products; ()
- e. Transporting agricultural products to or from an agricultural facility; ()
- f. Grinding, chopping, cubing, or any other means of preparing or converting a commodity for animal feed; and ()
- g. Piling, stacking or other means of storing commodities outdoors. ()

02. Generally Recognized Agricultural Practices. “Generally recognized agricultural practices” means economically feasible practices that are customary among or appropriate to farms and ranches of a similar nature in the local area. In determining whether an agricultural activity is consistent with generally recognized agricultural practices, the Idaho Department of Environmental Quality shall consult with the Idaho Department of Agriculture. ()

653. -- 664. (RESERVED)

665. REGIONAL HAZE RULES.

The purpose of Sections 665 through 668 is to address regional haze visibility impairment in mandatory Class I Federal Areas. The intent of Sections 665 through 668 is to set forth the requirements to implement the federal programs for visibility protection and regional haze. ()

666. REASONABLE PROGRESS GOALS.

The Department will establish reasonable progress goals, expressed in deciviews for each mandatory Class I Federal Area located within Idaho. These goals will provide for reasonable progress toward achieving natural visibility conditions. The reasonable progress goals must provide for an improvement in visibility for the most impaired days over the period of the implementation plan and ensure no degradation in visibility for the least impaired days over the same period. The reasonable progress goals are not directly enforceable, but will be implemented through enforceable strategies in the long-term strategy. ()

01. Process for Setting Reasonable Progress Goals. In establishing a reasonable progress goal for any mandatory Class I Federal Area within Idaho, the Department shall: ()

- a. Consider the costs of compliance, the time necessary for compliance, the energy and non-air quality environmental impacts of compliance, and the remaining useful life of any potentially affected sources, and include a demonstration showing how these factors were taken into consideration in selecting the goal. ()
- b. Analyze and determine the rate of progress needed to attain natural visibility conditions by the year 2064. To calculate this rate of progress, the Department will compare baseline visibility conditions to natural visibility conditions in the mandatory Class 1 Federal Area and determine the uniform rate of visibility improvement (measured in deciviews) that would need to be maintained during each implementation period in order to attain natural visibility conditions by 2064. In establishing the reasonable progress, the Department will consider the

uniform rate of improvement in visibility and the emission reduction measures needed to achieve it for the period covered by the implementation plan. ()

c. Consult with those states which may reasonably be anticipated to cause or contribute to visibility impairment in the mandatory Class I Federal Area. ()

02. Justification for Reasonable Progress Goals. If the Department establishes a reasonable progress goal that provides for a slower rate of improvement in visibility than the rate that would be needed to attain natural conditions by 2064, the Department will demonstrate, based on the factors in Subsection 666.01.a., that the rate of progress for the implementation plan to attain natural conditions by 2064 is not reasonable; and that the progress goal adopted by the Department is reasonable. The Department will provide to the public for review, as part of its implementation plan, an assessment of the number of years it would take to attain natural conditions if visibility improvement continues at the rate of progress selected by the Department as reasonable. ()

667. LONG-TERM STRATEGY FOR REGIONAL HAZE.

The purpose of Section 667 is to develop a long-term strategy for making reasonable progress toward the national goal of preventing any future and remedying any existing impairment of visibility in mandatory Class I Federal Areas in which impairment results from man-made air pollution. ()

01. Submittal of Long-Term Strategy. The Department will submit to EPA a long-term strategy that addresses regional haze visibility impairment for each mandatory Class I Federal Area within the state and for each mandatory Class I Federal Area located outside the state which may be affected by emissions from the state. ()

02. Enforceable Emission Limitations. The long-term strategy must include enforceable emissions limitations, compliance schedules, and other measures as necessary to achieve the reasonable progress goals established by the Department. ()

03. Requirements for Long-Term Strategy. In establishing long-term strategy for regional haze, the Department will meet the following requirements: ()

a. The Department will document the technical basis, including modeling, monitoring and emissions information, on which the state is relying to determine its apportionment of emission reduction obligations necessary for achieving reasonable progress in each mandatory Class I Federal Area it affects. The Department may meet this requirement by relying on technical analyses developed by the regional planning organization and approved by all state participants. The Department will identify the baseline emission inventory on which its strategies are based. The baseline emissions inventory year is presumed to be the most recent year of the consolidated periodic emissions inventory. ()

b. The Department will identify all anthropogenic sources of visibility impairment considered by the Department in developing its long-term strategy. The Department should consider major and minor stationary sources, mobile sources, and area sources. ()

c. The Department will consider, at a minimum, the following factors in developing its long-term strategy: ()

i. Emission reductions due to ongoing air pollution control programs, including measures to address reasonably attributable visibility impairment; ()

ii. Measures to mitigate the impacts of construction activities; ()

iii. Emissions limitations and schedules for compliance to achieve the reasonable progress goal; ()

iv. Source retirement replacement schedules; ()

v. Smoke management techniques for agricultural and forestry management purposes including plans as currently exist with the state for these purposes; ()

- vi. Enforceability of emissions limitations and control measures; and ()
- vii. The anticipated net effect on visibility due to projected changes in point, area, and mobile source emissions over the period addressed by the long-term strategy. ()

04. Interstate Consultation. The Department will undertake the following process in developing the long-term strategy where interstate consultation is required. ()

a. Where Idaho has emissions that are reasonably anticipated to contribute to visibility impairment in any mandatory Class I Federal Area located in another state or states, the Department will consult with the other state(s) in order to develop coordinated emission management strategies. ()

b. The Department will consult with any other state having emissions that are reasonably anticipated to contribute to visibility impairment in any mandatory Class I Federal Area within Idaho. ()

c. Where other states cause or contribute to impairment in a mandatory Class I Federal Area, the Department must demonstrate that the state has included in its implementation plan all measures necessary to obtain its share of the emission reductions needed to meet the progress goal for the area. If the state of Idaho has participated in a regional planning process, the Department must ensure the state has included all measures needed to achieve its apportionment of emission reduction obligations agreed upon through that process. ()

668. BART REQUIREMENT FOR REGIONAL HAZE.

The purpose of Section 668 is to implement the BART requirements in 40 CFR 51.308(e). The following analysis and documentation is required for each BART-eligible source: ()

01. BART-Eligible Sources. The Department shall identify a list of all BART-eligible sources within the state. ()

02. BART Determination. The Department shall complete a determination of BART for each BART-eligible source in the state that emits any air pollutant which may reasonably be anticipated to cause or contribute to any impairment of visibility in any mandatory Class 1 Federal Area. All such sources are subject to BART. ()

a. A single source that is responsible for a one (1.0) deciview change or more in any mandatory Class I Federal Area is considered to “cause” visibility impairment. ()

b. A single source that is responsible for a one-half (0.5) deciview change or more in any mandatory Class I Federal Area is considered to “contribute” to visibility impairment. ()

c. The determination of BART must be based on an analysis of the best system of continuous emission control technology available and associated emission reductions achievable for each BART-eligible source that is subject to BART within the state. In this analysis, the following must be taken into consideration: ()

- i. Costs of compliance; ()
- ii. Energy and non-air quality environmental impacts of compliance; ()
- iii. Any pollution control equipment in use at the source; ()
- iv. The remaining useful life of the source; and ()
- v. The degree of improvement in visibility which may reasonably be anticipated to result from the use of such technology. ()
- d.** The Department may determine that a BART determination is not required: ()
 - i. For sulfur dioxide (SO₂) or for nitrogen oxides (NO_x) if a BART-eligible source has the potential to

emit less than forty (40) tons per year of such pollutant(s); or ()

- ii. For PM10 if a BART-eligible source emits less than fifteen (15) tons per year of such pollutant. ()

03. Alternative to Infeasible Emission Standards. If the Department determines in establishing BART that technological or economic limitations on the applicability of measurement methodology to a particular source would make the imposition of an emission standard infeasible, it may instead prescribe a design, equipment, work practice, or other operational standard, or combination thereof, to require the application of BART. Such standard, to the degree possible, is to set forth the emission reduction to be achieved by implementation of such design, equipment, work practice, or operation and must provide for compliance by means which achieve equivalent results. ()

04. BART Installation and Operation Due Date. Each source subject to BART is required to install and operate BART as expeditiously as practicable, but in no event later than five (5) years after approval of the implementation plan. ()

05. Maintenance of BART Equipment. Each source subject to BART is required to maintain the control equipment required by the Department and establish procedures to ensure such equipment is properly operated and maintained. ()

06. BART Alternative. As an alternative to the installation of BART for a source or sources, the Department may approve a BART alternative. If the Department approves source grouping as a BART alternative, only sources (including BART-eligible and non-BART eligible sources) causing or contributing to visibility impairment to the same mandatory Class I Federal Area may be grouped together. ()

a. If a source(s) proposes a BART alternative, the resultant emissions reduction and visibility impacts must be compared with those that would result from the BART options evaluated for the source(s). ()

b. Source(s) proposing a BART alternative must demonstrate that this BART alternative will achieve greater reasonable progress than would be achieved through the installation and operation of BART. ()

c. Source(s) proposing a BART alternative shall include in the BART analysis an analysis and justification of the averaging period and method of evaluating compliance with the proposed emission limitation. ()

07. Reasonable Progress Goal Requirements for BART-Eligible Sources. Once the Department has met the requirements for BART or BART alternative, as identified in Subsection 668.06, BART-eligible sources will be subject to the requirements of reasonable progress goals, as defined in 40 CFR 51.308(d), in the same manner as other sources. ()

669. -- 674. (RESERVED)

675. FUEL BURNING EQUIPMENT -- PARTICULATE MATTER.

The purpose of Sections 675 through 681 is to establish particulate matter emission standards for fuel burning equipment. ()

676. STANDARDS FOR NEW SOURCES.

A person shall not discharge into the atmosphere from any fuel burning equipment with a maximum rated input of ten (10) million BTU's per hour or more, and commencing operation on or after October 1, 1979, particulate matter in excess of the concentrations shown in the following table:

FUEL TYPE	ALLOWABLE PARTICULATE gr/dscf	EMISSIONS Oxygen
Gas	.015	3%
Liquid	.050	3%

FUEL TYPE	ALLOWABLE PARTICULATE gr/dscf	EMISSIONS Oxygen
Coal	.050	8%
Wood Product	.080	8%

The effluent gas volume shall be corrected to the oxygen concentration shown. ()

677. STANDARDS FOR MINOR AND EXISTING SOURCES.

A person shall not discharge into the atmosphere from any fuel burning equipment in operation prior to October 1, 1979, or with a maximum rated input of less than ten (10) million BTU per hour, particulate matter in excess of the concentrations shown in the following table:

FUEL TYPE	ALLOWABLE PARTICULATE gr/dscf	EMISSIONS Oxygen
Gas	.015	3%
Liquid	.050	3%
Coal	.100	8%
Wood Product	.200	8%

The effluent gas volume shall be corrected to the oxygen concentration shown. ()

678. COMBINATIONS OF FUELS.

When two (2) or more types of fuel are burned concurrently, the allowable emission shall be determined by proportioning the gross heat input and emission standards for each fuel. ()

679. AVERAGING PERIOD.

For purposes of Sections 675 through 680, emissions shall be averaged according to the following, whichever is the lesser period of time: ()

01. One Cycle. One (1) complete cycle of operation; or ()

02. One Hour. One (1) hour of operation representing worst-case conditions for the emission of particulate matter. ()

680. ALTITUDE CORRECTION.

For purposes of Sections 675 through 680, standard conditions shall be adjusted for the altitude of the source by subtracting one-tenth (0.10) of an inch of mercury for each one hundred (100) feet above sea level from the standard atmospheric pressure at sea level of twenty-nine and ninety-two one hundredths (29.92) inches of mercury. ()

681. TEST METHODS AND PROCEDURES.

The appropriate test method under Sections 675 through 680 shall be EPA Method 5 contained in 40 CFR Part 60 or such comparable and equivalent method approved in accordance with Subsection 157.02.d. Test methods and procedures shall also comply with Section 157. ()

682. -- 699. (RESERVED)

700. PARTICULATE MATTER -- PROCESS WEIGHT LIMITATIONS.

01. Particulate Matter Emission Limitations. The purpose of Sections 700 through 703 is to establish particulate matter emission limitations for process equipment. ()

02. Minimum Allowable Emission. Notwithstanding the provisions of Sections 701 and 702, no source shall be required to meet an emission limit of less than one (1) pound per hour. ()

03. Averaging Period. For the purposes of Sections 701 through 703, emissions shall be averaged according to the following, whichever is the lesser period of time: ()

- a. One (1) complete cycle of operation; or ()
- b. One (1) hour of operation representing worst-case conditions for the emissions of particulate matter. ()

04. Test Methods and Procedures. The appropriate test method under Sections 700 through 703 shall be EPA Method 5 contained in 40 CFR Part 60 or such comparable and equivalent methods approved in accordance with Subsection 157.02.d. Test methods and procedures shall comply with Section 157. ()

701. PARTICULATE MATTER -- NEW EQUIPMENT PROCESS WEIGHT LIMITATIONS.

01. General Restrictions. No person shall emit into the atmosphere from any process or process equipment commencing operation on or after October 1, 1979, particulate matter in excess of the amount shown by the following equations, where E is the allowable emission from the entire source in pounds per hour, and PW is the process weight in pounds per hour. ()

- a. If PW is less than 9,250 pounds per hour,
 $E = 0.045(PW)^{0.60}$ ()
- b. If PW is equal to or greater than 9,250 pounds per hour,
 $E = 1.10(PW)^{0.25}$ ()

02. Exemption. The provisions of Section 701 shall not apply to fuel burning equipment. ()

03. Emission Standards -- Table. The following table illustrates the emission standards set forth in Section 701.

PROCESS WEIGHT	ALLOWABLE EMISSIONS FROM ENTIRE SOURCE	PROCESS WEIGHT	EMISSIONS FROM ENTIRE SOURCE
lb/hr	lb/hr	lb/hr	lb/hr
175 or less	1	20,000	13.08
200	1.08	40,000	15.56
400	1.64	60,000	17.22
600	2.09	80,000	18.50
800	2.40	100,000	19.56
1,000	2.84	200,000	23.26
2,000	4.30	400,000	27.66
4,000	6.52	600,000	30.61
6,000	8.32	800,000	32.90
8,000	9.89	1,000,000	34.79
10,000	11.00	2,000,000	41.37

()

702. PARTICULATE MATTER -- EXISTING EQUIPMENT PROCESS WEIGHT LIMITATIONS.

The provisions of Section 702 shall become effective on January 1, 1981. ()

01. General Restrictions. No person shall emit into the atmosphere from any process or process equipment operating prior to October 1, 1979, particulate matter in excess of the amount shown by the following equations, where E is the allowable emission from the entire source in pounds per hour, and PW is the process weight in pounds per hour: ()

a. If PW is less than 17,000 pounds per hour,
 $E = 0.045 (PW)^{0.60}$ ()

b. If PW is equal to or greater than 17,000 pounds per hour,
 $E = 1.12 (PW)^{0.27}$. ()

02. Exemptions. The provisions of Section 702 shall not apply to: ()

a. Fuel burning equipment; or ()

b. Equipment used exclusively to dehydrate sugar beet pulp or alfalfa. ()

03. Emission Standards -- Table. The following table illustrates the emission standards set forth in Section 702.

PROCESS WEIGHT	EMISSIONS FROM ENTIRE SOURCE	PROCESS WEIGHT	EMISSIONS FROM ENTIRE SOURCE
lb/hr	lb/hr	lb/hr	lb/hr
175 or less	1	20,000	16.24
200	1.08	40,000	19.58
400	1.64	60,000	21.84
600	2.09	80,000	23.61
800	2.48	100,000	25.07
1,000	2.84	200,000	30.23
2,000	4.30	400,000	36.46
4,000	6.52	600,000	40.67
6,000	8.32	800,000	43.96
8,000	9.89	1,000,000	46.69
10,000	11.30	2,000,000	56.30

()

703. PARTICULATE MATTER -- OTHER PROCESSES.

01. Other Processes. No person with processes exempt under Subsection 702.02.b. shall emit particulate matter to the atmosphere from any process or process equipment in excess of the amount shown in the following equations, where E is the total rate of emission from all emission points from the source in pounds per hour and P is the process weight rate in pounds per hour. ()

a. If P is less than sixty thousand (60,000) pounds per hour,
 $E = 0.02518(P)^{0.67}$ ()

b. If P is greater than or equal to sixty thousand (60,000) pounds per hour,
 $E = 23.84(P)^{0.11} - 40$ ()

02. Emission Standards -- Table. The following table illustrates the emission standards set forth in Section 703.

ALLOWABLE RATE OF EMISSION BASED ON PROCESS WEIGHT RATE			
Process Weight Rate	Rate of Emission	Process Weight Rate	Rate of Emission
Lb/Hr	Lb/Hr	Lb/Hr	Lb/Hr
100	0.551	16,000	16.5
200	0.877	18,000	17.9
400	1.40	20,000	19.2
600	1.83	30,000	25.2
800	2.22	40,000	30.5
1,000	2.58	50,000	35.4
1,500	3.38	60,000	40.0
2,000	4.10	70,000	41.3
2,500	4.76	80,000	42.5
3,000	5.38	90,000	43.6
3,500	5.96	100,000	44.6
4,000	6.52	120,000	46.3
5,000	7.58	140,000	47.8
6,000	8.56	160,000	49.0
7,000	9.49	200,000	51.2
8,000	10.4	1,000,000	69.0
9,000	11.2	2,000,000	77.6
10,000	12.0	6,000,000	92.7
12,000	13.6		

()

704. -- 724. (RESERVED)

725. RULES FOR SULFUR CONTENT OF FUELS.

This section applies to fuel burning sources in Idaho. Its purpose is to prevent excessive ground level concentrations of sulfur dioxide. The reference test method for measuring fuel sulfur content shall be ASTM method, D129-95 Standard Test for Sulfur in Petroleum Products (General Bomb Method) or such comparable and equivalent method approved in accordance with Subsection 157.02.d. Test methods and procedures shall comply with Section 157.

()

01. Definitions. ()

- a. **ASTM.** American Society for Testing and Materials. ()
- b. **Distillate Fuel Oil.** Any oil meeting the specifications of ASTM Grade 1 or Grade 2 fuel oils. ()
- c. **Residual Fuel Oil.** Any oil meeting the specifications of ASTM Grade 4, Grade 5 and Grade 6 fuel oils. ()
- 02. Residual Fuel Oils.** No person shall sell, distribute, use or make available for use, any residual fuel oil containing more than one and three-fourths percent (1.75%) sulfur by weight. ()
- 03. Distillate Fuel Oil.** No person shall sell, distribute, use or make available for use, any distillate fuel oil containing more than the following percentages of sulfur: ()
 - a. **ASTM Grade 1.** ASTM Grade 1 fuel oil - zero point three percent (0.3%) by weight. ()
 - b. **ASTM Grade 2.** ASTM Grade 2 fuel oil - zero point five percent (0.5%) by weight. ()
- 04. Coal.** No person shall sell, distribute, use or make available for use, any coal containing greater than one percent (1.0%) sulfur by weight. ()
- 05. Alternative.** The Department may approve in a permit issued in accordance with these rules an alternative fuel sulfur content if the applicant demonstrates that, through control measures or other means, sulfur dioxide emissions (based on a one (1) hour averaging period) are equal to or less than those resulting from the combustion of fuels complying with the limitations of Subsections 725.01 through 725.04. ()

726. -- 749. (RESERVED)

750. RULES FOR CONTROL OF FLUORIDE EMISSIONS.

The purpose of Sections 750 through 751 is to prevent the emission of fluorides such that the accumulation of fluorine in feed and forage for livestock does not exceed the safe limits specified below. ()

751. GENERAL RULES.

Any owner or operator of a facility subject to Sections 750 and 751 shall demonstrate compliance with Section 751 by January 1, 1982, in accordance with a compliance schedule, listing increments of progress, which shall be submitted to the Department on or before August 1, 1980. ()

01. Emission Limitations -- Phosphate Fertilizer Plants. No person shall allow, suffer, cause or permit the discharge into the atmosphere of total fluoride emissions in gaseous and in particulate form, expressed as fluoride (F-), from the phosphate fertilizer plant sources listed in Subsection 751.03 in excess of thirty hundredths (0.30) pounds of fluoride per ton of P2O5 input to the calciner operation, calculated at maximum rated capacity. ()

02. Monitoring, Testing, and Reporting Requirements. Compliance with Subsection 751.01 will be adjudged upon the results of the continuing program of fluoride sampling of potential grazing areas and alfalfa growing areas conducted by the Department. Sampling conducted by any person subject to Section 751 may be accepted for determining compliance with Subsection 751.01 if such sampling is conducted at sites approved by the Department in advance of sampling, using analytical procedures appearing in the Procedures Manual for Air Pollution Control, Section I (Source Test Methods) or equivalent methods approved by the Department in advance of sampling. Compliance with Subsection 751.01 shall be demonstrated by testing methods approved in advance by the Department. When approved by the Director in advance of sampling, engineering calculations may be submitted in lieu of emission data. Monitoring and reporting requirements shall be included in operating permits granted to each facility. ()

03. Source Specific Permits. To assure compliance with Subsection 751.01, the Director shall specify methods for calculating total allowable emissions and shall issue source specific permits containing emission limitations for the following sources within phosphate fertilizer plants: ()

- a. Calciner operation; and ()
- b. Wet phosphoric acid plants; and ()
- c. Super phosphoric acid production; and ()
- d. Diammonium phosphate plants; and ()
- e. Monoammonium phosphate production; and ()
- f. Triple super phosphate (mono calcium phosphate) production. ()

04. Exemptions. The provisions of Subsections 751.01, 751.02, and 751.03 shall not apply to any phosphate fertilizer facility which produces mono ammonium phosphate exclusively if no animal feed is grown or if no animal grazing occurs or if the animal feed and forage meets the ambient air quality standards for fluorides specified in Section 577 within a three (3) mile radius of such facility. This exemption shall only apply if the owner or operator of the facility, on an annual basis: ()

- a. Conducts a fluoride sampling program of potential grazing areas at locations approved in advance of sampling by the Department, using analytical techniques appearing in the Procedures Manual for Air Pollution Control, Section I (Source Test Methods); and ()
- b. Submits the results of such sampling program to the Department as soon as they become available. ()

752. -- 759. (RESERVED)

760. RULES FOR THE CONTROL OF AMMONIA FROM DAIRY FARMS.

The purpose of Sections 760 through 764 is to set forth the requirements for the control of ammonia through best management practices (BMPs) for certain size dairy farms licensed by the Idaho State Department of Agriculture to sell raw milk for human consumption. Compliance with these sections does not relieve the owner or operator of a dairy farm from the responsibility of complying with all other federal, state and local applicable laws, regulations, and requirements, including, but not limited to, Sections 161, 650 and 651 of these rules. Registration forms and guidance documents relating to these rules are located at www.deq.idaho.gov. ()

761. GENERAL APPLICABILITY.

The requirements of Sections 760 through 764 apply to the following size dairy farms:

SUMMARY: Animal Unit (AU) or mature cow threshold to produce 100 ton NH₃/year

Animal Unit (AU) Basis	Drylot	Free Stall/Scrape	Free Stall/Flush
AU (100 t NH ₃) Threshold			
No land app	7089	3893	2293
27% volatilization 1	6842	3827	
80% volatilization 2	6397	3700	
Total Cows (100 t NH ₃) Threshold			
Cow Basis (1400 lbs)	Drylot	Free Stall/Scrape	Free Stall/Flush

No land app	5063	2781	1638
27% volatilization 1	4887	2733	
80% volatilization 2	4569	2643	
1 Assumes: Expected level of N->NH3 volatilization for: drop-hose or ground level liquid manure application 2 Assumes: Expected level of N->NH3 volatilization for: center pivot or other conventional sprinkler irrigation liquid manure application			

()

762. PERMIT BY RULE.

01. General Requirement. Owners and operators of dairy farms shall be deemed to have a permit by rule if they comply with all of the applicable provisions of Sections 760 through 764. Owners and operators of dairy farms subject to Sections 760 through 764 shall not operate without obtaining the applicable permit by rule within the time frame specified. ()

02. Optional Permit by Rule. Nothing in Sections 760 through 764 shall preclude any owner or operator of a dairy farm from requesting and obtaining an air quality permit pursuant to Section 200, nor shall Sections 760 through 764 preclude an owner or operator of a dairy farm below the threshold size in Section 761 from complying with Sections 760 through 764 and thereby obtaining a permit by rule. ()

03. Exemption. If a dairy farm not subject to Sections 760 through 764 otherwise would become subject to those sections as a result of an emergency, the dairy farm shall notify the Director in writing within fourteen (14) days of the emergency. The notification shall include an explanation of the emergency circumstances. The dairy farm shall be exempt from the requirements of Sections 760 through 764 as long as the consequences of the emergency continue (but in no case for more than one (1) year) unless for good cause the Director determines it is appropriate to limit, condition or revoke the exemption. For the purpose of this rule “emergency” shall be defined as a serious situation or occurrence that happens unexpectedly and demands immediate action. ()

763. REGISTRATION FOR PERMIT BY RULE.

01. Registration Process. Any owner or operator of a new dairy farm subject to sections 760 through 764, or an existing dairy farm that becomes subject to these sections due to change in size or type of operation, shall register prior to fifteen (15) days of triggering the threshold for which a permit is required. ()

02. Registration Due Date. Any owner or operator of an existing dairy farm subject to Sections 760 through 764 shall register within fifteen (15) days of the effective date of Sections 760 through 764. ()

03. Registration Information. The following information shall be provided by the registrant to the Department of Environmental Quality and the Department of Agriculture: ()

a. Name, address, location of dairy farm, and telephone number. ()

b. Information sufficient to establish that the dairy farm is of the size and type described in Section 761. ()

c. Information describing what BMPs, as described in Section 764, are employed to total twenty-seven (27) points. ()

04. Exemption from Registration Fee. Dairy farms subject to Sections 760 through 764 are exempt from paying the permit by rule registration fee set forth in Section 800. ()

05. Inspection. Within thirty (30) days of receipt of the registration information, the state of Idaho

shall conduct a qualifying inspection to ensure the requisite point total of BMPs are employed. ()

764. DAIRY FARM BEST MANAGEMENT PRACTICES.

01. BMPs. Each dairy farm subject to Sections 760 through 764, or that otherwise obtains a permit by rule under these sections, shall employ BMPs for the control of ammonia to total twenty-seven (27) points. Points may be obtained through third party export with sufficient documentation. The table located at Subsection 764.02. lists available BMPs and the associated point value. As new information becomes available or upon request, the Director may determine a practice not listed in the table constitutes a BMP and assign a point value. ()

02. Table - Ammonia Control Practices for Idaho Dairies.

		Ammonia Control Effectiveness ¹			Compliance Method ³
System	Component	Open Lot	Freestall Scrape	Freestall Flush	
Waste Storage and Treatment Systems	Synthetic Lagoon Cover	15	20	20	1
	GeoteXtile Covers	10	13	13	1
	Solids Separation	3	3	3	3, 4
	Composting	4	4	4	1
	Separate Slurry and Liquid Manure Basins	6	10	-	1
	In-House Separation	0	12	0	1
	Direct Utilization of Collected Slurry	6	10	-	1, 3, 4
	Direct Utilization of Parlor Wastewater	10	10	10	1
	Direct Utilization of Flush Water	8	0	13	3, 4
	Anaerobic Digester	-	-	-	-
	Anaerobic Lagoon	-	-	-	-
	Aerated Lagoon	10	12	15	2
	Sequencing-Batch Reactor	15	20	20	2
	Lagoon Nitrification/Denitrification Systems	15	20	20	2
	Fixed-Media Aeration Systems	15	20	20	2
Zeolite Treatment of Liquid Manure 1lb/cow/day	4	5	5	2	
Zeolite Treatment of Liquid Manure 2lb/cow/day	8	10	10	2	
General Practices	Vegetative or Wooded Buffers (established)	7	7	7	1

		Ammonia Control Effectiveness ¹			
System	Component	Open Lot	Freestall Scrape	Freestall Flush	Compliance Method ³
	Vegetative or Wooded Buffers (establishing)	2	2	2	1
	Alternatives to Copper Sulfate	-	-	-	-
Freestall Barns	Scrape Built Up Manure	-	3	3	1
	Frequent Manure Removal	UD	UD	UD	-
	Tunnel Ventilation	-	-	-	-
	Tunnel Ventilation w/Biofilters	-	10	10	1
	Tunnel Ventilation w/Washing Wall	-	10	10	3, 4
Open Lots and Corrals	Rapid Manure Removal	4	2	2	1, 2
	Corral Harrowing	4	2	2	1
	Surface Amendments	10	5	5	2
	In-Corral Composting / Stockpiling	4	2	2	1
	Summertime Deep Bedding	10	5	5	1
Animal Nutrition	Manage Dietary Protein	2	2	2	2
Composting Practices	Alum Incorporation	12	8	6	2
	Carbon:Nitrogen Ratio (C:N) Ratio Manipulation	10	7.5	5	2
	Composting with Windrows	-	-	-	-
	Composting Static Pile	6	4.5	3	1
	Forced Aeration Composting	10	7.5	5	1
	Forced Aeration Composting with Biofilter	12	8	6	1
	Zeolite Incorporation	12	8	6	2
Land Application ²	Soil Injection - Slurry	10	15	7.5	2
	Incorporation of Manure within 24 hrs	10	10	10	2

System	Component	Ammonia Control Effectiveness ¹			Compliance Method ³
		Open Lot	Freestall Scrape	Freestall Flush	
	Incorporation of Manure within 48 hrs	5	5	5	2
	Nitrification of Lagoon Effluent	10	10	15	3, 4
	Low Energy/Pressure Application Systems	7	7	10	1
	Freshwater Dilution	5	8	8	1, 2
	Pivot Drag Hoses	8	8	10	1
	Subsurface Drip Irrigation	10	10	12	1

Notes:

1. The ammonia emission reduction effectiveness of each practice is rated numerically based on practical year-round implementation. Variations due to seasonal practices and expected weather conditions have been factored into these ratings. Not implementing a BMP when it is not practicable to do so, does not reduce the point value assigned to the BMP, nor does it constitute failure to perform the BMP. UD indicates that the practice is still under development.

2. Land application practices assume practice is conducted on all manure; points will be pro-rated to reflect actual waste treatment; points can be obtained on exported material with sufficient documentation.

3. Method used by inspector to determine compliance

1=Observation by Inspector

2=On-Site Recordkeeping Required

3, 4=Deviation Reporting Required. Equipment upsets and/or breakdowns shall be recorded in a deviation log and if repaired in a reasonable timeframe does not constitute non-compliance with this rule.

()

765. -- 774. (RESERVED)

775. RULES FOR CONTROL OF ODORS.

The purpose of Sections 775 through 776 is to control odorous emissions from all sources for which no gaseous emission control rules apply. ()

776. GENERAL RULES.

01. General Restrictions. No person shall allow, suffer, cause or permit the emission of odorous gases, liquids or solids into the atmosphere in such quantities as to cause air pollution. ()

02. Restrictions on Rendering Plants. No person shall allow, suffer, cause or permit any plant engaged in the processing of animal, mineral, or vegetable matter or chemical processes utilizing animal, mineral or vegetable matter to be operated without employing reasonable measures for the control of odorous emissions including wet scrubbers, incinerators, chemicals or such other measures as may be approved by the Department. ()

777. -- 784. (RESERVED)

785. RULES FOR CONTROL OF INCINERATORS.

The purpose of Sections 785 through 788 is to prevent excessive emissions of particulate matter from incinerators. ()

786. EMISSION LIMITS.

01. General Restrictions. No person shall allow, suffer, cause or permit any incinerator to discharge more than two-tenths (0.2) pounds of particulates per one hundred (100) pounds of refuse burned. ()

02. Averaging Period. For the purposes of Section 786, emissions shall be averaged according to the following, whichever is the lesser period of time: ()

a. One (1) complete cycle of operation; or ()

b. One (1) hour of operation representing worst-case conditions for the emissions of particulate matter. ()

03. Test Methods and Procedures. The appropriate test method under Sections 785 through 788 shall be EPA Method 5 contained in 40 CFR Part 60 or such comparable and equivalent methods approved in accordance with Subsection 157.02.d. Test methods and procedures shall comply with Section 157. ()

787. EXCEPTIONS.

Sections 785 and 786 do not apply to wigwam burners. ()

788. -- 789. (RESERVED)

790. RULES FOR THE CONTROL OF NONMETALLIC MINERAL PROCESSING PLANTS.

The purpose of Sections 790 through 799 is to set forth the requirements for nonmetallic mineral processing plants, frequently referred to as rock crushers. Definitions specific to nonmetallic mineral processing permits are located in Section 011 while other general terms may be defined in Sections 006 through 008. Compliance with Section 790 does not relieve the owner or operator of a nonmetallic mineral processing plant from the responsibility of complying with other federal, state, and local applicable laws, regulations, and requirements. ()

791. GENERAL CONTROL REQUIREMENTS.

01. Prohibition. No owner or operator of a nonmetallic mineral processing plant shall allow, suffer, or cause the emissions of any air pollutant to the atmosphere in such quantity of such nature and duration and under such conditions as would be injurious to human health or welfare, to animal or plant life, or to property, or to interfere unreasonably with the enjoyment of life or property. ()

02. Control of Fugitive Dust. In accordance with Sections 650 and 651, owners and operators of nonmetallic mineral processing plants shall take all reasonable precautions to prevent the generation of fugitive dust. In determining what is reasonable, consideration will be given to factors such as the proximity to human habitations and/or activities and atmospheric conditions which might affect the movement of particulate matter. ()

792. EMISSIONS STANDARDS FOR NONMETALLIC MINERAL PROCESSING PLANTS SUBJECT TO 40 CFR 60, SUBPART 000.

01. Applicability and Designation of Affected Facilities. The provisions of 40 CFR 60.670(a)(1) are applicable to the following affected facilities in fixed or portable nonmetallic mineral processing plants that commence construction, modification, or reconstruction after August 31, 1983: each crusher, grinding mill, screening operation, bucket elevator, belt conveyor, bagging operation, storage bin, and enclosed truck or railcar loading station. Also, crushers and grinding mills at hot mix asphalt facilities that reduce the size of nonmetallic minerals embedded in recycled asphalt pavement and subsequent affected facilities up to, but not including the first storage silo or bin, are subject to the provisions of 40 CFR 60.670(a)(1). ()

02. Facilities Not Applicable to 40 CFR 60.670(a)(2), (b), and (c). The provisions of 40 CFR

60.670(a)(2), (b), and (c) do not apply to the following operations: all facilities located in underground mines, plants without crushers or grinding mills above ground, and wet processing operations (as defined in 40 CFR 60.671). ()

a. An affected facility that is subject to the provisions of 40 CFR 60, Subpart F (Standards of Performance for Portland Cement Plants) or Subpart I (Standards of Performance for Hot Mix Asphalt Plants) or that follows the in plant process any facility subject to the provisions of 40 CFR 60, Subparts F or I, is not subject to the provisions of 40 CFR 60, Subpart OOO. ()

b. Facilities at the following plants are not subject to the provisions of 40 CFR 60, Subpart OOO: ()

i. Fixed sand and gravel plants and crushed stone plants with capacities, as defined in 40 CFR 60.671, of twenty-three (23) megagrams per hour (twenty-five (25) tons per hour) or less; ()

ii. Portable sand and gravel plants and crushed stone plants with capacities, as defined in 40 CFR 60.671, of one hundred thirty-six (136) megagrams per hour (one hundred fifty (150) tons per hour) or less; and ()

iii. Common clay plants and pumice plants with capacities, as defined in 40 CFR 60.671, of nine (9) megagrams per hour (ten (10) tons per hour) or less. ()

03. Standards of Performance for Nonmetallic Mineral Processing Plants. Affected facilities subject to 40 CFR 60, Subpart OOO, shall comply with all applicable emissions standards, monitoring requirements, test methods and procedures, and reporting and recordkeeping requirements. ()

793. EMISSIONS STANDARDS FOR NONMETALLIC MINERAL PROCESSING PLANTS NOT SUBJECT TO 40 CFR 60, SUBPART OOO.

Owners and operators of nonmetallic mineral processing plants that are not subject to a NSPS requirement shall comply with the emissions standards set forth in Section 793. ()

01. Processing Plants Not Regulated by NSPS. Fixed or portable plants that commenced construction, reconstruction, or modification before August 31, 1983 are not subject to 40 CFR 60, Subpart OOO. ()

02. Emissions Standards for Fugitive Emissions. No owner or operator shall cause to be discharged into the atmosphere emissions which exhibit greater than twenty percent (20%) opacity from any crusher, grinding mill, screening operation, bucket elevator, belt conveyor, conveying system, transfer point, vent, capture system, storage bin, stockpile, truck dumping operation, vehicle traffic on an affected paved public roadway, vehicle traffic on or wind erosion of an unpaved haul road, or other source of fugitive emissions. Opacity shall be determined using the test methods and procedures in Section 625. The plant is not required to have a certified opacity reader. ()

794. PERMIT REQUIREMENTS.

No owner or operator may commence construction, reconstruction, modification or operation of any nonmetallic mineral processing plant regardless of whether or not the source is an affected facility pursuant to 40 CFR 60.670(e) without first obtaining a permit or complying with Sections 795 through 799. The owner or operator shall comply with the permitting requirements of Subsection 794.02 or Subsection 794.03 and the applicable portions of Subsection 794.04 and/or Subsection 794.05. ()

01. Permit by Rule Eligibility. New major facilities or major modifications subject to Sections 204 and 205 are not eligible for a Permit by Rule. ()

02. Permit by Rule. Owners and operators of nonmetallic mineral processing plants that meet all of the applicable requirements set forth in Sections 795 through 799 shall be deemed to have a permit by rule (PBR) and shall not be required to obtain a permit to construct under Sections 200 through 228. ()

03. Permit to Construct. Owners and operators of nonmetallic mineral processing plants that do not

meet all of the requirements set forth in Sections 795 through 799, or that operate or intend to operate a nonmetallic mineral processing plant at a single site of operations for more than twelve (12) consecutive months, or that choose to construct and operate under specific permit requirements rather than the provisions of the permit by rule shall obtain a permit to construct pursuant to Sections 200 through 228. An existing permit to construct shall be considered valid until the permit is modified, incorporated into a Tier II operating permit, or terminated by the Department. Existing permits to construct may be terminated by the Department by registering the source under the permit by rule provisions in accordance with Section 797 after June 15, 2001. ()

04. Tier I Operating Permits. Owners and operators of nonmetallic mineral processing plants that are affected facilities subject to a requirement of the New Source Performance Standards (NSPS) in 40 CFR 60 are Tier I sources as defined in Section 006. Tier I sources must comply with the applicable permitting requirements of Sections 300 through 399. ()

05. Tier II Operating Permits. Owners and operators of nonmetallic mineral processing plants that are required by the Department or choose to obtain a Tier II operating permit pursuant to Sections 400 through 410 shall operate in accordance with the specific provisions of the Tier II operating permit until such time as the operating permit is terminated in writing by the Department. The Department may require owners and operators of nonmetallic mineral processing plants to obtain a Tier II operating permit whenever the Department determines that: ()

a. Emission rate reductions are necessary to attain or maintain any ambient air quality standard or applicable prevention of significant deterioration (PSD) increment; or ()

b. Specific emissions standards, or requirements on operation or maintenance are necessary to ensure compliance with any applicable emission standard or rule. ()

795. PERMIT BY RULE REQUIREMENTS.

The purpose of Sections 795 through 799 is to establish the requirements for a permit by rule for nonmetallic mineral processing plants. ()

796. APPLICABILITY.

01. Permit by Rule. Owners and operators of nonmetallic mineral processing plants shall be deemed to have a permit by rule if they comply with all of the applicable provisions of Sections 795 through 799. Nothing in Sections 795 through 799 shall preclude any owner or operator from obtaining a permit. Portable sources that operate or may be operated at a single location or site of operations for more than twelve (12) consecutive months must obtain a permit to construct or a Tier II operating permit. ()

02. Permit Option. Owners and operators of nonmetallic mineral processing plants that hold a valid permit to construct or a Tier II operating permit must comply with the terms and conditions of the permit and are not subject to the requirements of the permit by rule in Sections 795 through 799. ()

797. REGISTRATION FOR PERMIT BY RULE.

01. Registration Process. Any owner or operator of a nonmetallic mineral processing plant that opts to operate under the permit by rule shall register in the following manner: ()

a. Any new or modified processing plant shall register fifteen (15) days prior to commencing operation or modification. The Department shall acknowledge registration in writing within fifteen (15) days. ()

b. Any permitted processing plant shall register with the Department and request termination of the current permit to construct or Tier II operating permit. The Department shall normally act on the request within fifteen (15) days and notify the registrant in writing. ()

Registration for permit by rule does not relieve the owner or operator of portable equipment from the registration and relocation requirements of Section 500. ()

02. Registration Information. The following information shall be provided by the registrant to the Department: ()

a. For all crushers and grinding mills, the registrant shall supply information on the manufacturer, crusher type (such as jaw, cone), serial number, date of manufacture, and maximum throughput capacity; ()

b. For all screen decks, the registrant shall supply manufacturer name, physical size of screen, number of decks, serial number, and date of manufacture; and ()

c. For all electrical generators, the registrant shall supply manufacturer name, rated output, and fuel. ()

798. ELECTRICAL GENERATORS.

The following requirements apply to all electrical generators used to provide electrical power to any nonmetallic mineral processing plant. The requirements apply to each site of operations. ()

01. Fuel Type. Only ASTM (American Society of Testing and Materials) Grade 1 or 2 fuel oil shall be used. The sulfur content of the fuel used shall not exceed the percentages of sulfur given in Section 725. ()

02. Generator Operating Requirements. For the purposes of Sections 790 through 799, the following apply to all electrical generators.

Rated Output Capacities (kW)	Allowable Operating Hours (hr/day)		Allowable Operating Hours (hr/yr)	
	Attainment Unclassifiable Areas	PM-10 Nonattainment Areas	Attainment Unclassifiable Areas	PM-10 Nonattainment Areas
0 - 454	24	8	8760	2880
455 - 1000	24	24	8760	8760
1001 - 2000	24	24	5200	5200

kW = kilowatts
 hr/day = hours per day
 hr/yr = hours per year ()

03. Generator Opacity Limit. Visible emissions from any generator stack, vent, or other functionally equivalent opening shall not exceed twenty percent (20%) opacity for a period or periods aggregating more than three (3) minutes in any sixty (60) minute period. Opacity shall be determined using the test methods and procedures contained in Section 625. ()

04. Monitoring and Recordkeeping Requirements. ()

a. The owner or operator shall monitor and record the following information. ()

i. The rated output capacity, in kilowatts (kW), of the electrical generator(s) used; ()

ii. Operating hours on a monthly and annual basis so compliance can be continuously determined for the previous twelve (12) month period; and ()

iii. Vendor receipts of the fuel oil purchased clearly identifying the ASTM Grade. ()

b. Records of monitoring and recordkeeping requirements for current operations shall be maintained at the site of operations for the duration of operations at that location and shall be available to Department

representatives upon request. Records for previous sites of operation shall be kept for the most recent two (2) year period at a location where they can be reasonably accessed and shall be made available to the Department upon request. ()

799. NONMETALLIC MINERAL PROCESSING PLANT FUGITIVE DUST BEST MANAGEMENT PRACTICE.

The owner or operator of a nonmetallic mineral processing plant shall use the Best Management Practices (BMP) contained in Section 799 to control the emissions of fugitive dust. Fugitive dust emissions shall be reasonably controlled as required by Sections 650 and 651. It shall be the responsibility of the owner or operator to reasonably control fugitive emissions at each site of operations but only for the duration of operations at each site under the control of the owner or operator. ()

01. Generally Applicable Requirements. All reasonable precautions shall be taken to prevent particulate matter from becoming airborne. The following requirements apply generally to this Fugitive Dust BMP. ()

a. Control strategy triggers. The owner or operator of a nonmetallic mineral processing plant shall at all times be observant of all sources of fugitive dust emissions and monitor control strategies at least once per day when operating. When fugitive dust emissions are observed at any time to be exceeding any control strategy trigger specified in Subsections 799.02 through 799.06, that event shall trigger initiation of the prescribed control strategy or control strategies to control the fugitive dust emissions. ()

b. Control strategies. A progressive control strategy shall be used to reasonably control the emissions of fugitive dust. Progressive control strategy means that if the initial control strategy or strategies chosen do not adequately control fugitive dust emissions, the owner or operator shall employ successive control strategies as listed until fugitive dust control is achieved. Fugitive dust control shall be applied on a frequency such that visible emissions do not exceed any emission standard specified in Sections 790 through 799. ()

c. Monitoring and recordkeeping. The owner or operator shall maintain a record of each event where a control strategy is triggered. The trigger shall be recorded with a summary of the control strategy employed. If the trigger is a citizen complaint, the owner or operator shall record the complaint, an evaluation of whether the complaint has merit, and a summary of the corrective action taken. The record shall be maintained on forms provided by the Department or other forms that contain similar information. Records for current operations shall be maintained at the site of operations for the duration of operations at that location and shall be available to Department representatives upon request. Records for previous sites of operation shall be kept for the most recent two (2) year period at a location where they can be reasonably accessed and shall be made available to the Department upon request. ()

02. Requirements for Paved Public Roadways. ()

a. Definitions. ()

i. Paved public roadway. A paved public roadway means a roadway accessible to the general public having a surface of asphalt or concrete. ()

ii. Track-out. Track-out means the deposition of mud, dirt, or similar debris onto the surface of a paved public roadway from the tires and/or undercarriage of any vehicle associated with the operation of a nonmetallic mineral processing plant. ()

b. Control strategy triggers. Triggers that require initiation of a strategy or strategies to control fugitive dust emissions from track-out include, but are not limited to: ()

i. Visible deposition of mud, dirt, or similar debris on the surface of a paved public roadway. ()

ii. Visible fugitive emissions from vehicle traffic on an affected paved public roadway that approach twenty percent (20%) opacity for a period or periods aggregating more than one (1) minute in any sixty (60) minute period. ()

iii. Citizen complaints of failure to reasonably control fugitive dust shall be expeditiously evaluated by the owner or operator for merit. If the owner or operator determines the complaint has merit, the progressive strategy shall be expeditiously employed to reasonably control fugitive dust. The Department may review the complaint records and investigate citizen complaints as appropriate. If the Department finds that a complaint has merit, it may determine additional control measures are required. ()

c. Control strategies. The following are control strategies for track-out. ()

i. Prompt removal of mud, dirt, or similar debris from the affected surface of a paved public roadway. ()

ii. Water flush, and/or water flush and vacuum sweep, the affected surface of the paved public roadway. Runoff shall be controlled so it does not saturate the surface of the adjacent unpaved haul road such that track-out is enhanced. If runoff is not, or cannot be controlled, gravel shall be applied to the surface of the adjacent unpaved haul road over an area sufficient to control track-out. ()

iii. Apply gravel to the surface of the adjacent unpaved haul road. The area of application shall be sufficient to control track-out. ()

iv. Apply an environmentally safe chemical soil stabilizer or chemical dust suppressant to the surface of the adjacent unpaved haul road. The area of application shall be sufficient to control track-out. ()

v. Other control strategy or strategies as approved by the Department. ()

03. Requirements for Unpaved Haul Roads. ()

a. Definition of “unpaved haul roads.” Any unsurfaced roadway within the physical boundary of a nonmetallic mineral processing facility that is used as a haul road, access road, or similar. ()

b. Control strategy triggers. Triggers that require initiation of a strategy or strategies to control fugitive dust emissions from unpaved haul roads include, but are not limited to: ()

i. Visible fugitive emissions from vehicle traffic on an affected paved public roadway that approach twenty percent (20%) opacity for a period or periods aggregating more than one (1) minute in any sixty (60) minute period. ()

ii. Citizen complaints of failure to reasonably control fugitive dust shall be expeditiously evaluated by the owner or operator for merit. If the owner or operator determines the complaint has merit, the progressive strategy shall be expeditiously employed to reasonably control fugitive dust. The Department may review the complaint records and investigate citizen complaints as appropriate. If the Department finds that a complaint has merit, it may determine additional control measures are required. ()

c. Control strategies. The following are control strategies for fugitive dust emissions from unpaved haul roads. ()

i. Limit vehicle traffic on unpaved haul roads. ()

ii. Limit vehicle speeds on unpaved haul roads. If a speed limit is imposed, signs shall be posted along the haul road route and clearly indicate the speed limit. Signs shall be placed so they are visible to vehicles entering and leaving the site of operations. ()

iii. Apply water to the surface of the unpaved haul road. Runoff shall be controlled so it does not saturate the surface of the unpaved haul road such that it causes track-out. If runoff is not, or cannot be controlled, gravel shall be applied to the surface of the unpaved haul road over an area sufficient to control track-out. ()

iv. Apply gravel to the surface of the unpaved haul road. ()

- v. Apply an environmentally safe chemical soil stabilizer or chemical dust suppressant to the surface of the unpaved haul road. ()
- vi. Other control strategy or strategies as approved by the Department. ()
- 04. Requirements for Transfer Points, Screening Operations, and Stacks and Vents. ()**
 - a. Definitions. ()**
 - i. Transfer point. Transfer point means a point in a conveying operation where the nonmetallic mineral is transferred to or from a belt conveyor except where the nonmetallic mineral is being transferred to a stockpile. ()
 - ii. Belt conveyor. Belt conveyor means a conveying device that transports material from one (1) location to another by means of an endless belt that is carried on a series of idlers and routed around a pulley at each end. ()
 - iii. Conveying system. Conveying system means a device for transporting materials from one (1) piece of equipment or location to another location within a plant. Conveying systems include but are not limited to the following: feeders, belt conveyors, bucket elevators and pneumatic systems. ()
 - iv. Bucket elevator. Bucket elevator means a conveying device of nonmetallic minerals consisting of a head and foot assembly which supports and drives an endless single or double strand chain or belt to which buckets are attached. ()
 - v. Screening operation. Screening operation means a device for separating material according to size by passing undersize material through one (1) or more mesh surfaces (screens) in series, and retaining oversize material on the mesh surfaces (screens). ()
 - vi. Capture system. Capture system means the equipment (including enclosures, hoods, ducts, fans, dampers, etc.) used to capture and transport particulate matter generated by one (1) or more process operations to a control device. ()
 - vii. Control device. Control device means the air pollution control equipment used to reduce particulate matter emissions released to the atmosphere from one (1) or more process operations at a nonmetallic mineral processing plant. ()
 - viii. Vent. Vent means an opening through which there is mechanically induced air flow for the purpose of exhausting from a building air carrying particulate matter emissions from one (1) or more affected facilities. ()
 - b. Control strategy triggers. Triggers that require initiation of a strategy or strategies to control fugitive dust emissions from transfer points, belt conveyors, bucket elevators, screening operations, conveying systems, capture systems, and building vents include, but are not limited to, the following: ()**
 - i. NSPS regulated processing plants. ()
 - (1) Opacity greater than ten percent (10%) from any transfer point on a belt conveyor, conveying system, bucket elevator, or screening operation. ()
 - (2) For any transfer point on a belt conveyor, conveying system, bucket elevator, or screening operation located within a building, opacity greater than seven percent (7%) from any building vent. ()
 - (3) Opacity greater than seven percent (7%) from any capture system stack. ()
 - (4) Citizen complaints of failure to reasonably control fugitive dust shall be expeditiously evaluated by the owner or operator for merit. If the owner or operator determines the complaint has merit, the progressive strategy

shall be expeditiously employed to reasonably control fugitive dust. The Department may review the complaint records and investigate citizen complaints as appropriate. If the Department finds that a complaint has merit, it may determine additional control measures are required. ()

ii. Processing plants not regulated by NSPS. ()

(1) Opacity greater than twenty percent (20%) from any transfer point on a belt conveyor, conveying system, bucket elevator, or screening operation. ()

(2) For any transfer point on a belt conveyor, conveying system, bucket elevator, or screening operation located within a building, opacity greater than twenty percent (20%) from any building vent. ()

(3) Opacity greater than twenty percent (20%) from any capture system stack. ()

(4) Citizen complaints of failure to reasonably control fugitive dust shall be expeditiously evaluated by the owner or operator for merit. If the owner or operator determines the complaint has merit, the progressive strategy shall be expeditiously employed to reasonably control fugitive dust. The Department may review the complaint records and investigate citizen complaints as appropriate. If the Department finds that a complaint has merit, it may determine additional control measures are required. ()

c. Control Strategies. The following are control strategies for transfer points, belt conveyors, bucket elevators, screening operations, conveying systems, capture systems, and building vents. Controls shall be applied on a frequency such that visible fugitive emissions do not exceed any applicable opacity limit. ()

i. Limit drop heights of materials such that there is a homogeneous flow of material. ()

ii. Install, operate, and maintain water spray bars to control fugitive dust emissions at transfer points on belt conveyors, conveying systems, bucket elevators, and screening operations as necessary. ()

iii. Other control strategy or strategies as approved by the Department. ()

05. Requirements for Crushers and Grinding Mills. ()

a. Definitions. ()

i. Crusher. Crusher means a machine used to crush any nonmetallic mineral, and includes, but is not limited to, the following types: jaw, gyratory, cone, roll, rod mill, hammermill, and impactor. ()

ii. Grinding mill. Grinding mill means a machine used for the wet or dry fine crushing of any nonmetallic mineral. Grinding mills include, but are not limited to, the following types: hammer, roller, rod, pebble and ball, and fluid energy. The grinding mill includes the air conveying system, air separator, or air classifier, where such systems are used. ()

iii. Initial crusher. Initial crusher means any crusher into which nonmetallic minerals can be fed without prior crushing in the plant. ()

b. Control strategy triggers. Triggers that require initiation of a strategy or strategies to control fugitive dust emissions from any crusher, grinding mill, building vent, or capture system stack include, but are not limited to, the following. ()

i. NSPS regulated processing plants. ()

(1) Opacity greater than fifteen percent (15%) from any crusher or grinding mill at which capture system is not used. ()

(2) For any crusher or grinding mill located within a building, opacity greater than seven percent (7%) from any building vent. ()

- (3) Opacity greater than seven percent (7%) from any capture system stack. ()
- (4) Citizen complaints of failure to reasonably control fugitive dust shall be expeditiously evaluated by the owner or operator for merit. If the owner or operator determines the complaint has merit, the progressive strategy shall be expeditiously employed to reasonably control fugitive dust. The Department may review the complaint records and investigate citizen complaints as appropriate. If the Department finds that a complaint has merit, it may determine additional control measures are required. ()
 - ii. Processing plants not regulated by NSPS. ()
- (1) Opacity greater than twenty percent (20%) from any crusher or grinding mill at which capture system is not used. ()
- (2) For any crusher or grinding mill located within a building, opacity greater than twenty percent (20%) from any building vent. ()
- (3) Opacity greater than twenty percent (20%) from any capture system stack. ()
- (4) Citizen complaints of failure to reasonably control fugitive dust shall be expeditiously evaluated by the owner or operator for merit. If the owner or operator determines the complaint has merit, the progressive strategy shall be expeditiously employed to reasonably control fugitive dust. The Department may review the complaint records and investigate citizen complaints as appropriate. If the Department finds that a complaint has merit, it may determine additional control measures are required. ()
 - c. Control strategies. The following are control strategies for any crusher, grinding mill, building vent, or capture system stack. Controls shall be applied on a frequency such that visible fugitive emissions do not exceed any applicable opacity limit. ()
 - i. Limit drop heights of materials such that there is a homogeneous flow of material. ()
 - ii. Install, operate, and maintain water spray bars to control fugitive dust emissions at crusher drop points as necessary. ()
 - iii. Other control strategy or strategies as approved by the Department. ()
- 06. Requirements for Stockpiles.** ()
 - a. Definitions. ()
 - i. Stockpile. Stockpile means any nonmetallic mineral storage pile, reserve supply, or similar. Nonmetallic minerals shall have the meaning given in 40 CFR Part 60, Subpart OOO. Nonmetallic minerals may be stockpiled by belt conveyor, truck dumping, or similar. ()
 - ii. Truck dumping. Truck dumping means the unloading of nonmetallic minerals from movable vehicles designed to transport nonmetallic minerals from one (1) location to another. Movable vehicles include but are not limited to: trucks, front-end loaders, skip hoists, and railcars. ()
 - b. Control strategy triggers. Triggers that require immediate initiation of a strategy or strategies to control fugitive dust emissions from stockpiles include, but are not limited to: ()
 - i. Visible fugitive emissions from wind erosion of any stockpile that approaches twenty percent (20%) opacity for a period or periods aggregating more than one (1) minute in any sixty (60) minute period. ()
 - ii. Citizen complaints of failure to reasonably control fugitive dust shall be expeditiously evaluated by the owner or operator for merit. If the owner or operator determines the complaint has merit, the progressive strategy shall be expeditiously employed to reasonably control fugitive dust. The Department may review the complaint

records and investigate citizen complaints as appropriate. If the Department finds that a complaint has merit, it may determine additional control measures are required. ()

- c. Control strategies. The following are control strategies for stockpiles. ()
 - i. Limit the height of the stockpiles. ()
 - ii. Limit the disturbance of the stockpiles. ()
 - iii. Apply water onto the surface of the stockpile. ()
 - iv. Other control strategy or strategies as approved by the Department. ()

800. REGISTRATION FEE FOR PERMIT BY RULE.

A registration fee of two hundred fifty dollars (\$250) shall be submitted to the Department with each permit by rule registration. ()

801. PAYMENT OF FEES FOR PERMITS BY RULE REGISTRATION.

The permit by rule registration fee shall be paid in its entirety at the time the required registration form is submitted to the Department. The permit by rule registration form and fee should be sent to:

Permit by Rule Registration Fees
Fiscal Office
Idaho Department of Environmental Quality
1410 N. Hilton, Boise, ID 83706-1255 ()

802. RECEIPT AND USAGE OF FEES.

Permit by rule registration fee receipts shall be deposited by the Department into a stationary source permit account. Monies from this account shall be used solely toward technical, legal and administrative support of the Department's Permit to Construct and Tier II permit programs and shall not be used for those activities supported by the fund created for implementing the operating permit program required under Title V of the federal Clean Air Act amendments of 1990. Fees payable under Section 800 shall be retained by the Department regardless of whether a permit by rule registration is accepted by the Department in response to a registration request. ()

803. -- 804. (RESERVED)

805. RULES FOR CONTROL OF HOT-MIX ASPHALT PLANTS.

The purpose of Sections 805 through 808 is to establish for hot-mix asphalt plants restrictions on the emission of particulate matter. ()

806. EMISSION LIMITS.

No person shall cause, allow or permit a hot-mix asphalt plant to have particulate emissions which exceed the limits specified in Sections 700 through 703. ()

807. MULTIPLE STACKS.

In the case of more than one (1) stack to a hot-mix asphalt plant, the emission limitation will be based on the total emission from all stacks. ()

808. FUGITIVE DUST CONTROL.

01. Fugitive Emission Controls. No person shall cause, allow or permit a plant to operate that is not equipped with an efficient fugitive dust control system. The system shall be operated and maintained in such a manner as to satisfactorily control the emission of particulate material from any point other than the stack outlet. ()

02. Plant Property Dust Controls. The owner or operator of the plant shall maintain fugitive dust control of the plant premises and plant owned, leased or controlled access roads by paving, oil treatment or other

suitable measures. Good operating practices, including water spraying or other suitable measures, shall be employed to prevent dust generation and atmospheric entrainment during operations such as stockpiling, screen changing and general maintenance. ()

809. -- 814. (RESERVED)

815. RULES FOR CONTROL OF KRAFT PULP MILLS.

The purpose of Sections 815 through 818 is to establish emission standards for recovery furnaces and notification and reporting requirements for low volume high concentration (LVHC) and high volume low concentration (HVLC) gas venting at kraft pulp mills. ()

816. RECOVERY FURNACE TRS STANDARD.

The average daily emissions of total reduced sulfur (TRS) from each recovery furnace shall not exceed fifteen (15) ppm expressed as hydrogen sulfide on a dry basis. Recovery furnaces at kraft pulp mills subject to 40 CFR Part 60 TRS standards are exempt from the requirements of Section 816. ()

817. RECOVERY FURNACE TRS MONITORING AND RECORDKEEPING.

Owners and operators of each recovery furnace subject to the TRS emission standard in Section 816 shall maintain and operate equipment to continuously monitor and record the daily average TRS concentrations. ()

818. KRAFT PULP MILL LVHC AND HVLC GAS VENTING NOTIFICATION AND REPORTING.

Section 818 is applicable to kraft pulp mill LVHC and HVLC gas venting from sources required to be controlled pursuant to 40 CFR 63, Subpart S. For purposes of Sections 130 through 136, an excess emission is defined as a continuous uncontrolled gas venting in excess of five (5) minutes. Excess emissions notification and reporting shall be conducted pursuant to the requirements contained in Sections 130 through 136 and the permit issued to the kraft pulp mill. ()

819. -- 834. (RESERVED)

835. RULES FOR CONTROL OF RENDERING PLANTS.

The purpose of Sections 835 through 839 is to establish for rendering plants limitations on the emission of odors. ()

836. CONTROL OF COOKERS.

No person shall allow, suffer, cause, or permit the operation or use of any device, machine, equipment, or other contrivance to cook inedible animal or marine matter unless all gases, vapors, and gas entrained effluents from these processes are passed through condensers to remove all steam and other condensable materials. All noncondensibles passing through the condensers must then be incinerated at one thousand two hundred degrees Fahrenheit (1,200) for a minimum of three-tenths (0.3) seconds, or treated in an equally effective manner. ()

837. CONTROL OF EXPELLERS.

No person shall allow, suffer, cause, or permit the installation or operation of an expeller unless it is properly hooded and all exhaust gases are ducted to odor control equipment. ()

838. CONTROL OF PLANT AIR.

No person shall allow, suffer, cause, or permit the installation or operation of a rendering plant unless plant ventilation air is collected and ducted to odor control equipment. ()

839. EXCEPTIONS.

Section 838 shall not apply when it can be demonstrated that without ducting plant ventilation air to the odor control equipment no noticeable odors from the plant can be detected at the property line. ()

840. -- 859. (RESERVED)

860. EMISSION GUIDELINES FOR MUNICIPAL SOLID WASTE LANDFILLS THAT COMMENCED CONSTRUCTION, RECONSTRUCTION OR MODIFICATION BEFORE MAY 30, 1991.

01. Applicability. All owners or operators of any small or large municipal solid waste landfills in the following categories are subject to Section 860: ()

- a. Landfills that have accepted waste since November 8, 1987; ()
- b. Landfills with no modifications after May 30, 1991; or ()
- c. Landfills that closed after November 8, 1987 with no modifications after May 30, 1991. ()

02. Definitions. Unless specifically provided otherwise immediately below, the definitions for all terms set forth in Section 860 shall be the definitions set forth in 40 CFR Part 60. The following definitions apply to Section 860: ()

a. "Closed municipal solid waste landfill" (closed landfill) means a landfill in which solid waste is no longer being placed, and in which no additional solid wastes will be placed without first filing a notification of modification as prescribed under 40 CFR 60.7(a)(4). Once a notification of modification has been filed, and additional solid waste is placed in the landfill, the landfill is no longer closed. A landfill is considered closed after meeting the criteria of 40 CFR 258.60. ()

b. "Effective date" means July 2, 1999. ()

c. "Existing municipal solid waste landfill" (existing landfill) means a municipal solid waste landfill that began construction, reconstruction or modification before May 30, 1991 and has accepted waste at any time since November 8, 1987 or has additional design capacity available for future waste deposition. ()

d. "Large municipal solid waste landfill" (large landfill) means a municipal solid waste landfill with a design capacity greater than or equal to two point five (2.5) million megagrams or two point five (2.5) million cubic meters. ()

e. "Modification" means an action that results in an increase in the permitted volume design capacity of the landfill by either horizontal or vertical expansion based on its permitted design capacity as of May 30, 1991. Modification does not occur until the owner or operator commences construction on the horizontal or vertical expansion. ()

f. "Municipal solid waste landfill" (landfill) means an entire disposal facility in a contiguous geographical space where household waste is placed in or on land. A municipal solid waste landfill may also receive other types of RCRA Subtitle D wastes such as commercial solid waste, nonhazardous sludge, conditionally exempt small quantity generator waste, and industrial solid waste. Portions of a municipal solid waste landfill may be separated by access roads and may be publicly or privately owned. A municipal solid waste landfill may be a new municipal solid waste landfill, an existing municipal solid waste landfill, or a lateral expansion (modification). ()

g. "New municipal solid waste landfill" (new landfill) means a municipal solid waste landfill that began construction, reconstruction or modification or began accepting waste on or after May 30, 1991. ()

h. "Small municipal solid waste landfill" (small landfill) means a municipal solid waste landfill with a design capacity less than two point five (2.5) million megagrams or two point five (2.5) million cubic meters. ()

03. General Requirements. All owners or operators of landfills subject to Section 860 must comply with, 40 CFR Section 60.30c through 60.36c and 40 CFR Section 60.751 through 60.759 as amended by 63 Fed. Reg. 32,743-53 (June 16, 1998) and 64 Fed. Reg. 9,257-62 (February 24, 1999) and incorporated by reference into these rules at Section 107. Where "Administrator" or "EPA" appears in 40 CFR Part 60, "Department" shall be substituted, except in any section of 40 CFR Part 60 for which a federal rule or delegation specifically indicates that authority will not be delegated to the state. ()

04. Permitting Requirements. All owners or operators of landfills subject to Section 860 must

comply with Federal Operating Permit Requirements (Title V) as specified in Sections 300 through 399 of these rules: ()

a. All owners or operators of existing large landfills must submit a complete Federal Operating Permit application one (1) year after EPA approves the Clean Air Act Section 111(d) State Plan associated with Section 860. ()

b. All owners or operators of existing small landfills that are major sources must submit a complete Federal Operating Permit application within one (1) year of becoming a major source. ()

05. Reporting Requirements. All owners or operators of landfills subject to Section 860 shall comply with the following: ()

a. All owners or operators of large landfills must: ()

i. Submit an Initial Design Capacity Report and an Initial Nonmethane Organic Compound Report within ninety (90) days of the effective date of Section 860 and; ()

ii. Submit an annual Nonmethane Organic Compound Report until nonmethane emissions are less than fifty (50) Mg/yr. ()

b. All owners or operators of small landfills must submit an Initial Design Capacity Report and an Initial Nonmethane Organic Compound Report within ninety (90) days of the effective date of Section 860. ()

06. Compliance Schedules and Increments of Progress. All owners or operators of landfills subject to Section 860 that have a nonmethane organic compound emission rate fifty (50) Mg/yr or greater as specified in 40 CFR Section 60.752(b)(2) shall comply with the following schedule: ()

a. The owner or operator of an existing large landfill must submit their first Annual Emission Rate Report with the design capacity report no later than July 31, 2000. ()

b. The owner or operator of an existing landfill shall submit a collection and control system design plan within one (1) year of the date of the first Annual Emission Rate Report showing that the nonmethane organic compound emission rate is fifty (50) Mg/yr or greater as specified in 40 CFR Section 60.752(b)(2). ()

c. The owner or operator of an existing landfill shall award contracts for construction of collection and control systems or orders for purchase of components no later than January 31, 2002. ()

d. The owner or operator of an existing landfill shall initiate on-site construction or installation of the collection and control systems no later than April 30, 2002. ()

e. The owner or operator of an existing landfill shall complete, no later than September 30, 2002, on-site construction or installation of collection and control systems capable of meeting the requirements of Section 860. ()

f. The owner or operator of an existing landfill shall comply with Section 860 no later than September 30, 2002. ()

07. Compliance Schedules and Increments of Progress for Municipal Solid Waste Landfills That Have Nonmethane Organic Compound Emission Rates Less Than 50 Mg/yr. All owners or operators of landfills subject to Section 860 that have nonmethane organic compound emission rates less than fifty (50) Mg/yr on or after November 19, 1999 shall install collection and control systems within thirty (30) months after the date the first annual nonmethane organic compound emission rate equals or exceeds fifty (50) Mg/yr as specified in 40 CFR Section 60.36c(b). ()

861. -- 999. (RESERVED)

58.01.05 – RULES AND STANDARDS FOR HAZARDOUS WASTE

000. LEGAL AUTHORITY.

These rules are adopted pursuant to the authority vested in the Board of Environmental Quality by the Hazardous Waste Management Act of 1983, as amended (HWMA), Sections 39-4401 et seq., Idaho Code, and the authority vested in the Director of the Department of Environmental Quality by the Hazardous Waste Facility Siting Act of 1985, as amended, Sections 39-5801 et seq., Idaho Code. ()

001. TITLE.

These rules are titled IDAPA 58.01.05, “Rules and Standards for Hazardous Waste.” ()

002. INCORPORATION BY REFERENCE OF FEDERAL REGULATIONS.

Any reference in these rules to requirements, procedures, or specific forms contained in the Code of Federal Regulations (CFR), Title 40, Parts 124, 260 - 268, 270, 273, 278, and 279 shall constitute the full adoption by reference of that part and Subparts as they appear in 40 CFR, revised as of July 1, 2020, including any notes and appendices therein, unless expressly provided otherwise in these rules. ()

01. Exceptions. Nothing in 40 CFR Parts 260 - 268, 270, 273, 278, 279 or Part 124 as pertains to permits for Underground Injection Control (U.I.C.) under the Safe Drinking Water Act, the Dredge or Fill Program under Section 404 of the Clean Water Act, the National Pollution Discharge Elimination System (NPDES) under the Clean Water Act or Prevention of Significant Deterioration Program (PSD) under the Clean Air Act is adopted or included by reference herein. ()

02. Availability of Referenced Material. The federal regulations adopted by reference throughout these rules are maintained at the following locations: ()

- a. U.S. Government Printing Office, <http://www.ecfr.gov/cgi-bin/ECFR>; and ()
- b. State Law Library, 451 W. State Street, P.O. Box 83720, Boise, ID 83720-0051, (208) 334-3316; and ()
- c. Department of Environmental Quality, 1410 N. Hilton, Boise, ID 83706-1255, (208) 373-0502. ()

003. DEFINITIONS.

For the purpose of these rules and any materials incorporated herein by reference, the following definitions apply unless their application would be inconsistent with the Hazardous Waste Management Act, or unless these rules expressly provide for different definitions. ()

01. Board. The Idaho Board of Environmental Quality. ()

02. CFR. The United States Code of Federal Regulations. ()

03. Department. The Idaho Department of Environmental Quality. ()

04. Director. When used in the context of 40 CFR, the definition shall be the Director of the Idaho Department of Environmental Quality, or his designee, as the context requires. When used in the context of these rules, the definition shall be the U. S. Environmental Protection Agency Region 10 Regional Administrator. ()

05. Environmental Appeals Board. When used in the context of 40 CFR, the definition shall be the Idaho Board of Environmental Quality except as set forth in Section 39-4413(2), Idaho Code, or except where noted in these rules. When used in the context of these rules, the definition shall be the U.S. Environmental Appeals Board. ()

06. U.S. Environmental Protection Agency or EPA, EPA Headquarters, or EPA. When used in the context of 40 CFR, the definition shall be the Idaho Department of Environmental Quality, except when used to refer to an EPA Identification number, EPA hazardous waste number, EPA forms, publications or guidance, and EPA Acknowledgment of Consent, and where noted in these rules. Under the latter circumstances, the definition shall be the U.S. Environmental Protection Agency and the Headquarters of the U.S. Environmental Protection Agency as appropriate. When used in the context of these rules, the definition shall be the U.S. Environmental Protection Agency. ()

07. HWFSA. The Hazardous Waste Facility Siting Act of 1985, Sections 39-5801 et seq., Idaho Code.

- ()
- 08. HWMA.** The Hazardous Waste Management Act of 1983, Sections 39-4401 et seq., Idaho Code. ()
- 09. IDAPA.** The Idaho Administrative Procedures Act, Title 67, Chapter 52, Idaho Code. ()
- 10. RCRA.** When used in the context of 40 CFR, the definition shall be the comparable sections of the Hazardous Waste Management Act of 1983, Sections 39-4401 et seq., Idaho Code. When used in the context of these rules, the definition shall be The Resource Conservation and Recovery Act, 42 U.S. Code, Sections 6901 et seq. ()
- 11. Regional Administrator or Administrator.** When used in the context of 40 CFR, the definition shall be the Director of the Idaho Department of Environmental Quality, or his designee, except where noted in these rules. When used in the context of these rules, the definition shall be the U.S. Environmental Protection Agency Administrator or Region 10 Regional Administrator as appropriate. ()
- 12. TSD.** Treatment, storage or disposal. ()
- 13. United States or U.S.** When used in the context of 40 CFR, the definition shall be the state of Idaho, except where noted in these rules. When used in the context of these rules, the definition shall be the United States. ()

004. HAZARDOUS WASTE MANAGEMENT SYSTEM.

40 CFR Part 260 and all Subparts, except 40 CFR 260.2, are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020. For the purposes of 40 CFR 260.4(a)(4) and 260.5(b)(2), “EPA” is defined as the U.S. Environmental Protection Agency. For the purposes of 40 CFR 260.10 in the definition of electronic manifest and electronic manifest system, “EPA” is defined as the U.S. Environmental Protection Agency. For purposes of 40 CFR 260.10, in the definition of hazardous waste constituent, “Administrator” is defined as the U.S. Environmental Protection Agency Administrator. For purposes of 40 CFR 260.20, “Federal Register” is defined as the Idaho Administrative Bulletin. ()

005. IDENTIFICATION AND LISTING OF HAZARDOUS WASTE.

40 CFR Part 261 and all Subparts (excluding 261.4(b)(17)), except the language “in the Region where the sample is collected” in 40 CFR 261.4(e)(3)(iii), are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020. For purposes of 40 CFR 261.10 and 40 CFR 261.11, “Administrator” is defined as the U.S. Environmental Protection Agency Administrator. For purposes of 40 CFR 261.4(b)(11)(ii), 40 CFR 261.39(a)(5), 40 CFR 261.41, and 40 CFR 261 Appendix IX, “EPA” is defined as the U.S. Environmental Protection Agency. Copies of annual reports and advance notifications under these sections shall also be sent to the Director. ()

01. Hazardous Secondary Materials Managers Emergency Notification. In addition to the emergency notification required by 40 CFR 261.411(d)(3) and 261.420(f)(4)(ii), the emergency coordinator must also immediately notify the Idaho Office of Emergency Management by telephone, 1-800-632-8000, to file an identical report. ()

02. Excluded Wastes. Chemically Stabilized Electric Arc Furnace Dust (CSEAFD) generated by EnviroSAFE Services of Idaho, Inc. (ESII) at ESII’s facility in Grand View, Idaho using the Super Detox(R) treatment process as modified by ESII and that is disposed of in a Subtitle D or Subtitle C landfill is excluded from the lists of hazardous waste provided ESII implements a program that meets the following conditions: ()

a. Verification Testing Requirements. Sample Collection and analyses, including quality control procedures, conducted pursuant to Subsections 005.02.b. and 005.02.c., must be performed according to SW-846 methodologies and the RCRA Part B permit, including future revisions. ()

b. Initial Verification Testing. ()

i. For purposes of Subsections 005.02.b., “new source” means any generator of Electric Arc Furnace Dust (EAFD), EPA and Idaho Department of Environmental Quality Hazardous Waste No. KO61, whose waste has not previously been processed by ESII using the Super Detox(R) treatment process resulting in processed EAFD which has been subjected to initial verification testing and has demonstrated compliance with the delisting levels specified in Subsection 005.02.d. ()

ii. Prior to the initial treatment of any new source of EAFD, ESII must notify the Department in writing. The written notification includes: ()

(1) The waste profile information; and ()

(2) The name and address of the generator. ()

iii. The first four (4) consecutive batches treated must be sampled in accordance with Subsection 005.02.a. Each of the four (4) samples shall be analyzed to determine if the CSEAFD generated meets the delisting levels specified in Subsection 005.02.d. ()

iv. If the initial verification testing demonstrates that the CSEAFD samples meet the delisting levels specified in Subsection 005.02.d., ESII shall submit the operational and analytical test data, including quality control information, to the Department, in accordance with Subsection 005.02.f. Subsequent to such data submittal, the CSEAFD generated from EAFD originating from the new source shall be considered delisted. ()

v. CSEAFD generated by ESII from EAFD originating from a new source shall be managed as hazardous waste in accordance with Subtitle C of RCRA until: ()

(1) Initial verification testing demonstrates that the CSEAFD meets the delisting levels specified in Subsection 005.02.d.; and ()

(2) The operational and analytical test data is submitted to the Department pursuant to Subsection 005.02.b.iv. ()

vi. For purposes of Subsections 005.02.b. and 005.02.c., “batch” means the CSEAFD that results from a single treatment episode in a full scale mixing vessel. ()

c. Subsequent Verification Testing. ()

i. Subsequent to initial verification testing, ESII shall collect a representative sample, in accordance with Subsection 005.02.a., from each batch of CSEAFD generated by ESII. ESII may, at its discretion, conduct subsequent verification testing on composite samples. In no event shall a composite sample consist of representative samples from more than twenty (20) batches of CSEAFD. ()

ii. The samples shall be analyzed prior to disposal of each batch of CSEAFD to determine if the CSEAFD meets the delisting levels specified in Subsection 005.02.d. ()

iii. Each batch of CSEAFD generated by ESII shall be subjected to subsequent verification testing no later than thirty (30) days after it is generated by ESII. ()

iv. If the levels of constituents measured in a sample, or composite sample, of CSEAFD do not exceed the levels set forth in Subsection 005.02.d., then any batch of CSEAFD which contributed to the sample that does not exceed the levels set forth in Subsection 005.02.d. is non-hazardous and may be managed and/or disposed of in a Subtitle D or Subtitle C landfill. ()

v. If the constituent levels in a sample, or composite sample, exceed any of the delisting levels set forth in Subsection 005.02.d., then ESII must submit written notification of the results of the analysis to the Department within fifteen (15) days from receiving the final analytical results, and any CSEAFD which contributed to the sample must be: ()

- (1) Retested, and retreated if necessary, until it meets the levels set forth in Subsection 005.02.d.; or ()
- (2) Managed and disposed of in accordance with Subtitle C of RCRA. ()
- vi. Each batch of CSEAFD shall be managed as hazardous waste in accordance with Subtitle C of RCRA until subsequent verification testing demonstrates that the CSEAFD meets the delisting levels specified in Subsection 005.02.d. ()

d. Delisting Levels. ()

- i. All leachable concentrations for these metals must not exceed the following levels (mg/l):

antimony	0.06	mercury	0.009
arsenic	0.50	nickel	1
barium	7.60	selenium	0.16
beryllium	0.010	silver	0.30
cadmium	0.050	thallium	0.020
chromium	0.33	vanadium	2
lead	0.15	zinc	70

- ii. Metal concentrations must be measured in the waste leachate by the method specified in 40 CFR Part 261.24. ()

e. Modification of Treatment Process. ()

- i. If ESII makes a decision to modify the Super Detox(R) treatment process from the description of the process as set forth in ESII's Petition for Delisting Treated K061 Dust by the Super Detox(R) Process submitted to the Department on July 14, 1995, ESII shall notify the Department in writing prior to implementing the modification. ()

- ii. After ESII's receipt of written approval from the Department, and subject to any conditions included with the approval, ESII may implement the proposed modification. ()

- iii. If ESII modifies its treatment process without first receiving written approval from the Department, this exclusion of waste will be void from the time the process was modified. ()

- iv. ESII's Petition for Delisting Treated K061 Dust by the Super Detox(R) Process submitted to the Department on July 14, 1995 is available at the Department of Environmental Quality, Waste Management and Remediation Division, 1410 N. Hilton, Boise, Idaho 83706. ()

f. Records and Data Retention and Submittal. ()

- i. Records of disposal site, operating conditions and analytical data from verification testing must be compiled, summarized, and maintained at ESII's Grand View facility for a minimum of five (5) years from the date the records or data are generated. ()

- ii. The records and data maintained by ESII must be furnished upon request to the Department or EPA. ()

- iii. Failure to submit requested records or data within ten (10) business days of receipt of a written

request or failure to maintain the required records and data on site for the specified time, will be considered by the Department, at its discretion, sufficient basis to revoke the exclusion to the extent directed by the Department. ()

iv. All records or data submitted to the Department must be accompanied by a signed copy of the following certification statement to attest to the truth and accuracy of the records or data submitted: “Under civil and/or criminal penalty of law for the making or submission of false or fraudulent statements or representations, I certify that the information contained in or accompanying this document is true, accurate, and complete. As to any identified sections of this document for which I cannot personally verify the truth and accuracy, I certify as the ESII official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate, and complete. In the event that any of this information is determined by the Department in its sole discretion to be false, inaccurate, or incomplete, and upon conveyance of this fact to ESII, I recognize and agree that this exclusion of waste will be void as if it never had effect or to the extent directed by the Department and that ESII will be liable for any actions taken in contravention of ESII’s RCRA and CERCLA obligations premised upon ESII’s reliance on the void exclusion.” ()

g. Facility Merger and Name Change. On May 4, 2001, the Department was notified of a stock transfer that resulted in ESII’s facility merging with American Ecology. This created a name change from EnviroSAFE Services of Idaho, Inc. (ESII) to US Ecology Idaho, Inc. effective May 1, 2001. All references to EnviroSAFE Services of Idaho, Inc. or ESII now refer to US Ecology Idaho, Inc. ()

006. STANDARDS APPLICABLE TO GENERATORS OF HAZARDOUS WASTE.

01. Incorporation by Reference. 40 CFR Part 262 and all Subparts, except for the language “for the Region in which the generator is located” in 40 CFR 262.42(a)(2) and 40 CFR 262.42(b), are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020. For purposes of 40 CFR 262.82, 262.83, and 262.84, “EPA” is defined as the U.S. Environmental Protection Agency. Copies of advance notification, annual reports, and exception reports, required under those sections, shall also be provided to the Director. For purposes of 40 CFR 262.20, 262.21, 262.24, 262.25, and 262.32, EPA or Environmental Protection Agency is defined as the U.S. Environmental Protection Agency. For purposes of 40 CFR Part 262, Subpart H, “United States or U.S.” is defined as the United States. ()

02. Generator Emergency Notification. In addition to the emergency notification required by 40 CFR 262.16(b)(9)(iv)(C) and 262.265(d)(2), (see 40 CFR 262.17(a)(6), 263.30(c)(1), 264.56(d)(2), and 265.56(d)(2)) the emergency coordinator must also immediately notify the Idaho Office of Emergency Management by telephone, 1-800-632-8000, to file an identical report. ()

007. STANDARDS APPLICABLE TO TRANSPORTERS OF HAZARDOUS WASTE.

40 CFR Part 263 and all Subparts are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020. For purposes of 40 CFR 263.20(g), 263.20(g)(1), 263.20(g)(4), 263.21(a)(4), and 263.22(d), “United States” is defined as the United States. For the purposes of 40 CFR 263.20(a), “EPA” is defined as U.S. Environmental Protection Agency. ()

008. STANDARDS FOR OWNERS AND OPERATORS OF HAZARDOUS WASTE TREATMENT, STORAGE AND DISPOSAL FACILITIES.

40 CFR Part 264 and all Subparts (excluding 40 CFR 264.1(f), 264.1(g)(12), 264.149, 264.150, 264.301(l), 264.1030(d), 264.1050(g), 264.1080(e), 264.1080(f) and 264.1080(g)) are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020. For purposes of 40 CFR Subsection 264.12(a), “Regional Administrator” is defined as the U.S. Environmental Protection Agency Region 10 Regional Administrator. For purposes of 40 CFR 264.71 and 264.1082(c)(4)(ii), “EPA” is defined as the U.S. Environmental Protection Agency. ()

009. INTERIM STATUS STANDARDS FOR OWNERS AND OPERATORS OF HAZARDOUS WASTE TREATMENT, STORAGE AND DISPOSAL FACILITIES.

40 CFR Part 265, and all Subparts (excluding Subpart R, 40 CFR 265.1(c)(4), 265.1(c)(15), 265.149, 265.150, 265.1030(c), 265.1050(f), 265.1080(e), 265.1080(f), and 265.1080(g)), except the language contained in 40 CFR 265.340(b)(2) as replaced with: “The following requirements continue to apply even when the owner or operator has

demonstrated compliance with the MACT requirements of part 63, subpart EEE of this chapter: 40 CFR 265.351 (closure) and the applicable requirements of Subparts A through H, BB and CC of this part,” are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020. For purposes of 40 CFR Subsection 265.12(a), “Regional Administrator” is defined as the U.S. Environmental Protection Agency Region 10 Regional Administrator. For purposes of 40 CFR 265.71 and 265.1083(c)(4)(ii), “EPA” is defined as the U.S. Environmental Protection Agency. ()

010. STANDARDS FOR THE MANAGEMENT OF SPECIFIC HAZARDOUS WASTES AND SPECIFIC TYPES OF HAZARDOUS WASTE FACILITIES.

40 CFR Part 266 and all Subparts are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020. ()

011. LAND DISPOSAL RESTRICTIONS.

40 CFR Part 268 and all Subparts are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020, except for 40 CFR 268.1(e)(3), 268.5, 268.6, 268.13, 268.42(b), and 268.44(a) through (g). The authority for implementing the provisions of these excluded sections remains with the EPA. However, the requirements of Sections 39-4403(17) and 39-4423, Idaho Code, shall be applied in all cases where these requirements are more stringent than the federal standards. If the Administrator of the EPA grants a case-by-case variance pursuant to 40 CFR 268.5, that variance will simultaneously create the same case-by-case variance to the equivalent requirement of these rules. For purposes of 40 CFR 268.2(j) “EPA” is defined as the U.S. Environmental Protection Agency. For purposes of 40 CFR 268.40(b), “Administrator” is defined as U.S. Environmental Protection Agency Administrator. In 40 CFR 268.7(a)(9)(iii), “D009” is excluded, (from lab packs as noted in 40 CFR Part 268 Appendix IV.) ()

012. HAZARDOUS WASTE PERMIT PROGRAM.

40 CFR Part 270 and all Subparts, except 40 CFR 270.1(c)(2)(ix), 270.12(a) and 40 CFR 270.14(b)(18), are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020. For purposes of 40 CFR 270.2, 270.5, 270.10(e)(2), 270.10(e)(3), 270.10(f)(2), 270.10(f)(3), 270.10(g), 270.11(a)(3), 270.32(a), 270.32(b)(2), 270.32(c), 270.51, 270.72(a)(5), and 270.72(b)(5), “EPA” and “Administrator” or “Regional Administrator” is defined as the U.S. Environmental Protection Agency and the U.S. Environmental Protection Agency Region 10 Regional Administrator respectively. ()

013. PROCEDURES FOR DECISION-MAKING (STATE PROCEDURES FOR RCRA OR HWMA PERMIT APPLICATIONS).

40 CFR Part 124, Subparts A, B and G are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020, except that the last sentence of 40 CFR 124.10(b)(1), 40 CFR 124.15(b)(2), 40 CFR 124.19, the fourth sentence of 40 CFR 124.31(a), the third sentence of 40 CFR 124.32(a), and the second sentence of 40 CFR 124.33(a) are expressly omitted from the incorporation by reference of each of those subsections. For purposes of 40 CFR 124.6(e), 124.10(b), and 124.10(c)(1)(ii) “EPA” and “Administrator” or “Regional Administrator” is defined as the U.S. Environmental Protection Agency and the U.S. Environmental Protection Agency Region 10 Regional Administrator, respectively. ()

014. (RESERVED)

015. STANDARDS FOR THE MANAGEMENT OF USED OIL.

01. Incorporation by Reference. 40 CFR Part 279 and all Subparts are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020. For purposes of 40 CFR 279.43(c)(3)(ii) “Director” is defined as the Director, U.S.DOT Office of Hazardous Materials Regulation. ()

02. Used Oil as a Dust Suppressant. 40 CFR Part 279 contains a prohibition on the use of used oil as a dust suppressant at 279.82(a), however, States may petition EPA to allow the use of used oil as a dust suppressant. Members of the public may petition the State to make this application to EPA. This petition to the State must: ()

a. Be submitted to the Idaho Department of Environmental Quality, 1410 North Hilton, Boise, Idaho 83706-1255; and ()

b. Demonstrate how the requirements of 40 CFR 279.82(b) will be met. ()

016. STANDARDS FOR UNIVERSAL WASTE MANAGEMENT.

40 CFR Part 273 and all Subparts are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020. For purposes of 40 CFR 273.32(a)(3), "EPA" is defined as the U.S. Environmental Protection Agency. ()

017. CRITERIA FOR THE MANAGEMENT OF GRANULAR MINE TAILINGS (CHAT) IN ASPHALT CONCRETE AND PORTLAND CEMENT CONCRETE IN TRANSPORTATION CONSTRUCTION PROJECTS FUNDED IN WHOLE OR IN PART BY FEDERAL FUNDS.

40 CFR Part 278 and all Subparts are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020. ()

018. STANDARDS FOR OWNERS AND OPERATORS OF HAZARDOUS WASTE FACILITIES OPERATING UNDER A STANDARDIZED PERMIT.

40 CFR Part 267 and all Subparts, except 40 CFR 267.150, are herein incorporated by reference as provided in 40 CFR, revised as of July 1, 2020. ()

019. -- 354. (RESERVED)

355. HAZARDOUS WASTE FACILITY SITING LICENSE FEE.

An application for a siting license required by HWFSA shall be accompanied by a siting license fee in an amount established by these rules. The license fee shall not exceed seven thousand five hundred dollars (\$7,500) and shall be submitted with the siting license application. ()

01. License Fee Criteria. The siting license fee required by HWFSA and these rules shall be based on the costs to the Department of reviewing the siting license application and the characteristics of the proposed hazardous waste facility, including the projected site size, projected waste volume, and the hydrogeological characteristics surrounding the site. ()

a. "Projected Waste Volume" means the total actual or potential hazardous waste volume, in gallons or an equivalent measurement, proposed for the hazardous waste facility. ()

b. "Site Size" means the sum in acres of all proposed "Hazardous Waste Management Unit(s)" as defined in Section 004 (40 CFR 260.10). ()

02. License Fee Scale. Except as provided in Subsection 355.03, the siting license fee required by HWFSA and these rules shall be determined using the table below.

LICENSE FEE SCALE - PROJECTED HAZARDOUS WASTE VOLUME (gallons)			
Site Size	Up to 10,000	10,000 - 20,000	More Than 20,000
1 acre or greater	\$3,000	\$4,000	\$7,500
Equal to or greater than 1/2 acre, but less than 1 acre	\$4,000	\$5,000	\$7,500
Less than 1/2 acre	\$5,000	\$6,000	\$7,500

03. License Fee for Facilities Required to Submit Engineering or Hydrogeological Information. For any proposed commercial hazardous waste disposal, treatment or storage facility or any on-site land disposal facility for wastes listed pursuant to Section 201(d)(2) and (e), as modified by Section 209 of the Federal Hazardous and Solid Waste Amendments of 1984, which must submit engineering or hydrogeological information to indicate compliance with technical criteria as adopted in the Hazardous Waste Management Plan, the siting license fee shall be seven thousand five hundred dollars (\$7,500). ()

04. Expansion, Enlargement or Alteration of a Commercial Hazardous Waste Disposal, Treatment or Storage Facility or Any On-Site Land Disposal Facility for Wastes Listed Pursuant to Section 201(D)(2) and (E), as Modified by Section 209 of the Hazardous and Solid Waste Amendments of 1984. The significant expansion, enlargement or alteration of a hazardous waste treatment, storage or disposal facility in existence on July 1, 1985, constitutes a new proposal for which a siting license is required and for which a siting license fee must be paid. ()

05. Siting License Fee Nonrefundable. The siting license fee required by these rules shall be nonrefundable and may not be applied toward any subsequent application should the siting license application be cancelled or withdrawn, or denied. ()

356. VARIANCE APPLICATIONS FOR TSD FACILITIES OR SITES.

01. Application Contents and Standard of Review. Applications for variances shall be submitted in triplicate and shall contain such detailed plans, specifications, and information regarding objectives, procedures, controls, and other pertinent data as the Director may require. A variance shall not exceed one (1) year in duration. The Director may grant a variance only if the applicant demonstrates to the Director's satisfaction that construction and operation of the TSD facility or site in the manner allowed by the variance and any term or condition imposed as part of the variance: ()

- a. Is required to avert unnecessary and significant hardship; ()
- b. Is not inconsistent with EPA requirements; and ()
- c. Will not create a nuisance or a hazard to the public health, safety or the environment. ()

02. Public Hearings. The Director may hold a public hearing on an initial application for a variance and shall hold a public hearing on any application to renew or extend a variance. The public hearing shall be held at a location in the county where the operations that are the subject of the application for the variance are conducted unless the Director determines that a different location would be more appropriate and convenient for interested members of the public. The Director shall give at least twenty (20) days' notice of the hearing to the applicant by certified mail and shall cause at least one (1) publication of notice in a newspaper with general circulation in either the county where the operation is conducted or the county where the hearing is to be held. The Director shall cause to be made a complete record of the testimony and the evidence submitted at the hearing. ()

03. Public Information. All information submitted as part of a variance application shall be treated as public information and shall not be subject to any claim of confidentiality. The Director shall make the application available for public inspection at the Department's state office and appropriate regional office. The Director shall make available for public inspection at the Department's state office and all regional offices a current list of pending applications for variances and a current schedule of pending variance hearings. ()

04. Director's Decision. No variance shall be issued or denied until the Director has considered the relative interests of the applicant, other persons and property affected by the variance and the public. Any variance granted pursuant to this section shall be for a period specified by the Director but not more than one (1) year. No variance shall be issued or denied without a written order stating the findings upon which the decision is based. ()

05. Applicant to Bear Costs. The cost of public notice, recording and transcribing of testimony and hearing facilities shall be borne by the applicant, regardless of whether or not a variance is issued. ()

357. -- 499. (RESERVED)

500. ROUTING OF HAZARDOUS WASTE SHIPMENTS.

01. Transporting. Any person transporting a quantity of hazardous waste which requires a manifest shall, to the extent possible: ()

- a. Use state, United States and interstate highways; and ()
- b. Avoid municipalities and population centers, even when doing so may add miles to the distance traveled. ()

02. Director's Conditions. The Director may, upon a finding that a shipment or shipments of hazardous waste constitutes a greater than normal risk to the public health, safety or environment, prescribe by order particular conditions for that shipment or shipments including but not limited to special placarding, pilot vehicles, routing restrictions, parking restrictions and timing restrictions. ()

501. -- 799. (RESERVED)

800. INSPECTION PLAN -- FREQUENCY LEVELS.

The Department may, as time and resources permit, conduct regular inspections of persons or entities subject to these rules, their records, and property at approximately the following frequency levels based upon potential risk to the public health or environment. ()

01. Commercial TSD Facilities. Commercial TSD facilities or sites or offsite generator TSD facilities or sites, up to every day. ()

02. Generator On-Site TSD Facilities. Generator on-site TSD facilities or sites -- up to twenty (20) times per year. ()

03. Transport Vehicles. Transport vehicles as necessary. ()

04. Transport Facilities. Transport facilities or sites -- up to twelve (12) times per year. ()

05. Generators. Generators -- up to twelve (12) times per year. ()

06. Conduct Inspections. Nothing in the preceding schedule of frequency levels may be construed as limiting the Department's authority to conduct inspections when there is reasonable cause to suspect a violation of HWMA or these rules. The Director may by policy guidance memorandum modify the inspection frequency levels as necessary for the effective or efficient enforcement of HWMA and these rules. ()

801. -- 849. (RESERVED)

850. ILLEGAL ACTIONS.

01. False Statements or Representations. Any person who makes a false statement or representation in any application, label, manifest, record, report, permit or other document filed, maintained or used for the purpose of complying with these rules or HWMA thereby commits a violation. Each false statement or representation constitutes a separate and distinct violation for which civil penalties may be imposed. Any person who knowingly makes a false statement or representation of the type described above is, in addition to civil penalties, subject to criminal prosecution for the commission of a misdemeanor for each statement or representation. ()

02. Failure to Comply with These Rules, the HWMA, or Other Requirements. Any person who violates these rules, HWMA, or any permit, standard, condition, requirement, compliance agreement or order issued pursuant to these rules or HWMA thereby commits a violation. Civil penalties may be imposed for each separate violation and for each day of continuing violation. Any person who knowingly commits a violation of the type described above is, in addition to civil penalties, subject to criminal prosecution for the commission of a misdemeanor for each separate violation and for each day of a continuing violation. ()

851. -- 899. (RESERVED)

900. EXPENDITURES FROM HAZARDOUS WASTE EMERGENCY ACCOUNT.

The Director may declare a hazardous waste emergency if the public health, safety or the environment are threatened by a release or threat of release of a hazardous waste or a substance which has become a hazardous waste. Following

a hazardous waste emergency declaration, the Department may spend or obligate to be spent up to two hundred thousand dollars (\$200,000) from the Hazardous Waste Emergency Account to obtain equipment and materials, conduct investigations, test samples, and employ personnel as necessary or eliminate or mitigate the immediate threat and stabilize the situation. The Director may authorize the expenditure or obligation of more than two hundred thousand dollars (\$200,000) from this account in any given situation upon a finding by the Board that a greater expenditure or obligation is prudent and necessary to protect the public health, safety or environment. ()

901. -- 995. (RESERVED)

996. ADMINISTRATIVE PROVISIONS.

Administrative appeals of agency actions shall be governed by IDAPA 58.01.23, "Rules of Administrative Procedure Before the Board of Environmental Quality." ()

997. CONFIDENTIALITY OF RECORDS.

Information obtained by the Department under these rules shall be disclosed to the public in accordance with Chapter 1, Title 74, Idaho Code. Information submitted under a trade secret claim may be entitled to confidential treatment by the Department as provided in Section 74-114, Idaho Code, and IDAPA 58.01.21, "Rules Governing the Protection and Disclosure of Records in the Possession of the Idaho Department of Environmental Quality." ()

998. -- 999. (RESERVED)

58.01.06 – SOLID WASTE MANAGEMENT RULES

000. LEGAL AUTHORITY.

Sections 39-105 and 39-107, Idaho Code, authorize the Board of Environmental Quality to adopt rules and administer programs to protect surface water quality, ground water quality and air quality, and to regulate solid waste treatment or disposal and the licensure and certification requirements pertinent thereto. Section 39-7408C, Idaho Code, authorizes the Board of Environmental Quality to establish by rule municipal solid waste commercial siting license fees. ()

001. TITLE AND SCOPE.

- 01. Title.** These rules are titled IDAPA 58.01.06, “Solid Waste Management Rules.” ()
- 02. Scope.** These rules establish requirements applicable to all solid waste and solid waste management facilities in Idaho, except as specifically provided in Subsections 001.03 and 001.04. ()
- 03. Wastes Not Regulated Under These Rules.** ()
- a.** These rules do not apply to the following solid wastes: ()
- i. Liquid wastes when the discharge or potential discharge of the liquid waste is regulated under a federal, state or local water pollution discharge or wastewater land application permit, including management of any solids if management of the solids are addressed in a permit term or condition; ()
- ii. Hazardous wastes regulated by the Hazardous Waste Management Act, Chapter 44, Title 39, Idaho Code, and the rules adopted thereunder; ()
- iii. Polychlorinated biphenyl (PCB) waste regulated under the Toxic Substance Control Act, 15 U.S.C. 2601, et seq., and these rules apply to PCB waste authorized by federal law to be disposed of at a nonhazardous waste landfill that is permitted, licensed or registered under Idaho Law; ()
- iv. Slash or slashing areas resulting from the harvesting of timber and the disposal of which is managed pursuant to Chapter 1, Title 38, Idaho Code or log landings or sorting sites; ()
- v. Wastes used, managed, stored and disposed in accordance with The Wood and Mill Yard Debris Technical Guidance Manual, as amended, published by the Department and developed pursuant to Sections 39-171 through 39-174, Idaho Code; ()
- vi. Clean soils and clean dredge spoils as regulated under Section 404 of the federal Clean Water Act provided that they are not hazardous wastes regulated by the Hazardous Waste Management Act, Chapter 44, Title 39, Idaho Code and the rules adopted thereunder; ()
- vii. Septage taken to a sewage treatment plant permitted by either the U.S. Environmental Protection Agency or the Department pursuant to IDAPA 58.01.15, “Rules Governing the Cleaning of Septic Tanks”; ()
- viii. All radioactive waste and radioactive materials regulated pursuant to Section 39-4405(9), Idaho Code and rules adopted thereunder and radioactive waste and materials regulated under the authority of the Atomic Energy Act of 1954, as amended; ()
- ix. Petroleum Contaminated Soils (PCS) from a leaking petroleum storage tank system managed as a one (1) time remediation pursuant to IDAPA 58.01.02, “Water Quality Standards”; ()
- x. Asbestos as regulated by the Toxic Substances Control Act, as amended, 15 U.S.C. Sections 2601, et seq., or asbestos as regulated by the Clean Air Act, as amended, 42 U.S.C. Section 7412; ()
- xi. Nonhazardous wastes disposed in a permitted hazardous waste treatment, storage and disposal unit regulated by the Hazardous Waste Management Act, Chapter 44, Title 39, Idaho Code, and rules adopted thereunder; or ()
- xii. Waste otherwise regulated under Department authorities. ()
- b.** These rules do not apply to the following solid waste unless these wastes are mixed with more than incidental quantities of regulated waste; ()

- i. Inert wastes; ()
- ii. Manures and crop (plant) residues ultimately returned to the soils at agronomic rates; ()
- iii. Any agricultural solid waste which is managed and regulated pursuant to rules adopted by the Idaho Department of Agriculture. The Department reserves the right to use existing authorities to regulate agricultural waste that impacts human health or the environment; ()
- iv. Overburden, waste dumps, low-grade stockpiles, tailings and other materials uniquely associated with mineral extraction, beneficiation or processing operations; ()
- v. Slag from the production of elemental phosphorus; ()
- vi. Phospho-gypsum from the production of phosphate fertilizers, which includes the production of phosphoric acid; and ()
- vii. Wood waste used for ornamental, animal bedding, mulch and plant bedding, or road building purposes. ()

04. Solid Waste Management Facilities Not Regulated Under These Rules. These Rules do not apply to the following solid waste management facilities: ()

- a. Solid waste management facilities accepting only solid waste excluded by Subsection 001.03; ()
- b. Recycling centers; or ()
- c. Backyard composting sites. ()

002. (RESERVED)

003. ADMINISTRATIVE APPEALS.

Persons may be entitled to appeal agency actions authorized under this chapter pursuant to IDAPA 58.01.23, "Rules of Administrative Procedure Before the Board of Environmental Quality." ()

004. APPLICABILITY.

These rules apply to all solid waste unless excluded by Subsection 001.03 and to all solid waste management sites in Idaho unless excluded by Subsection 001.04. Compliance with these rules does not relieve owners and operators from the obligation to comply with other applicable state or federal laws, including but not limited to the IDAPA 58.01.02, "Water Quality Standards," IDAPA 58.01.11, "Ground Water Quality Rule," and IDAPA 58.01.01, "Rules for the Control of Air Pollution in Idaho." ()

01. Solid Waste Facility Other Than Municipal Solid Waste Landfills (MSWLF) Applicability. Sections 000 through 060 and Section 999 apply to all solid waste facilities other than MSWLF, as specified therein. ()

02. Municipal Solid Waste Landfill Applicability. Sections 000 through 007, and Sections 994 through 999 apply to all MSWLFs, as specified therein. ()

005. DEFINITIONS.

01. Active Portion. That part of a unit where waste had been, or may be, disposed of, treated, or otherwise managed, and that has not been closed in accordance with applicable rules. ()

02. Backyard Composting. Composting operations used only by the owner or person in control of a residential dwelling unit to process garbage and yard waste generated at that dwelling unit. ()

- 03. Beneficial Use.** Various uses of ground water in Idaho including, but not limited to, domestic water supplies, industrial water supplies and agricultural water supplies. A beneficial use is defined as actual current and projected future uses of ground water. ()
- 04. Commercial Solid Waste Facility.** A MSWLF owned and operated as an enterprise conducted with the intent of making a profit by any individual, association, firm, or partnership for the disposal of solid waste, but excluding a MSWLF owned or operated by a political subdivision, state or federal agency or, municipality or a MSWLF owned or operated by any individual, association, firm, or partnership exclusively for the disposal of solid waste generated by such individual, association, firm, or partnership. ()
- 05. Composting Facility.** See definition of Processing Facility. ()
- 06. Very Small Quantity Generator (VSQG) Hazardous Waste.** As defined in 40 CFR Part 260.10. ()
- 07. Very Small Quantity Generator (VSQG) Management Facility.** A facility or portion thereof where household hazardous waste or VSQG wastes are transferred from a vehicle or container and subsequently transported to another facility. A VSQG management facility does not include temporary drop off locations or other facilities where individuals or businesses are authorized to store waste for ultimate collection and disposal. ()
- 08. Contamination.** The introduction of a substance into the surface or ground water causing: ()
- a.** At or beyond the point of compliance, the concentration of that substance in ground water to result in significant degradation, as determined pursuant to Subsection 400.02.b of IDAPA 58.01.11, "Ground Water Quality Rule," or in an exceedance of the maximum contamination level (MCL) specified in the Ground Water Quality Rule; ()
 - b.** The concentration of that substance in surface water exceeds a numerical criteria or fails to protect designated beneficial uses specified in the "Water Quality Standards," IDAPA 58.01.02; ()
 - c.** A statistically significant increase in the concentration of that substance in the ground water at or beyond the point of compliance, or in surface water, where the existing concentration of that substance exceeds the contamination level specified in Subsections 005.08.a. or 005.08.b. of this rule; or ()
 - d.** A statistically significant increase in the concentration of that substance in ground water at the point of compliance, or in surface water, above background of a substance which:
 - i.** Is not specified in Subsections 005.08.a. or 005.08.b. of this rule; and ()
 - ii.** Is a result of the disposal of solid waste; and ()
 - iii.** Has been determined by the department to present a substantial risk to human health or the environment in the concentrations found in the ground water at the point of compliance, or in surface water. ()
- 09. Degradation.** The lowering of ground water quality as measured in a statistically significant and reproducible manner. ()
- 10. Department.** The Idaho Department of Environmental Quality. ()
- 11. Director.** The Director of the Idaho Department of Environmental Quality. ()
- 12. Disposal.** Discharge, deposit, injection, dumping, spilling, leaking, leaching, migration or placing of any solid waste into or on any land or water so that such solid waste or any constituent thereof may enter the environment or be emitted into the air or discharged into any waters, including ground water. ()
- 13. Facility.** Any area used for any solid waste management activity, including, but not limited to,

storage, transfer, processing, separation, incineration, treatment, salvaging, or disposal of solid waste. ()

14. Garbage. Any waste consisting of putrescible animal and vegetable materials resulting from the handling, preparation, cooking and consumption of food, including wastes materials from households, markets, storage facilities, handling and sale of produce and other food products. ()

15. Ground Water. Any water of the state that occurs beneath the surface of the earth in a saturated geological formation of rock or soil. ()

16. Household Waste. Any solid waste, including kitchen wastes, trash and sanitary waste in septic tanks, derived from households, including single and multiple residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds and day use recreation areas. ()

17. Incinerator. Any source consisting of a furnace and all appurtenances thereto designed for the destruction of solid waste by burning. "Open Burning" is not considered incineration. ()

18. Inert Waste. Noncombustible, nonhazardous, and non-putrescible solid wastes that are likely to retain their physical and chemical structure and have a de minimis potential to generate leachate under expected conditions of disposal, which includes resistance to biological attack. "Inert waste" includes, but is not limited to, rock, concrete, cured asphaltic concrete, masonry block, brick, gravel, dirt, inert coal combustion by-products, inert precipitated calcium carbonate and inert component mixture of wood or mill yard debris. ()

19. Landfill. An area of land or an excavation in which wastes are placed for permanent disposal, and that is not a land application unit, surface impoundment, injection well or waste pile, as those terms are defined under 40 CFR 257.2. ()

20. Leachate. A liquid that has passed through or emerged from waste and contains soluble, suspended, or miscible materials removed from such waste. ()

21. Lift. A vertical rise of compacted solid waste that is complete when it is no longer practical to add additional height without the addition of a cover layer to provide structural stability. ()

22. Modification. Any change in the physical characteristics, waste types managed, method of operation, or lateral expansion beyond the boundaries of a site. The following is not considered a modification: ()

a. Repair and replacement of existing equipment; ()

b. Increase in production rate that does not exceed the Tier level criteria or approved facility capacity; ()

c. An increase in hours of operation if more restrictive hours of operation are not specified in an approved operating plan; and ()

d. Acquisition of property that is not to be used for the processing or disposal of solid waste. ()

23. Municipal Solid Waste Landfill Unit (MSWLF). As regulated under Chapter 74, Title 39, Idaho Code, a discrete area of land or an excavation that receives household waste, and that is not a land application unit, surface impoundment, injection well, or waste pile, as those terms are defined under 40 CFR 257.2. A MSWLF unit also may receive other types of RCRA subtitle D wastes, such as commercial solid waste, nonhazardous sludge, VSQG waste and industrial solid waste. Such a landfill may be publicly or privately owned. A MSWLF unit may be a new MSWLF unit, an existing MSWLF unit or a lateral expansion. ()

24. Non-Municipal Solid Waste (NMSW). A solid waste that is: ()

a. Not mixed with household waste; or ()

- b. Not excluded from these rules by Subsection 001.03. ()
25. **Non-Municipal Solid Waste Landfill (NMSWLF).** A landfill that accepts only non-municipal solid waste. ()
26. **Open Burning.** The combustion of solid waste without: ()
- a. Control of combustion air to maintain adequate temperature for efficient combustion; ()
- b. Containment of the combustion reaction in an enclosed device so as to provide sufficient residence time and mixing for complete combustion; and ()
- c. Control of the emission of the combustion products. ()
27. **Operator.** The person(s) responsible for the overall operation of all or part of a site or facility. ()
28. **Owner.** The person(s) who owns land or a portion of the land on which a site or facility is located. ()
29. **Person.** Any individual, association, partnership, firm, joint stock company, trust, political subdivision, public or private corporation, state or federal government department, agency, or instrumentality, municipality, industry, or any other legal entity which is recognized by law as the subject of rights and duties. ()
30. **Point of Compliance.** A vertical surface located no more than one hundred fifty (150) yards hydraulically down gradient from the active portion of a facility or site, located at the facility boundary down gradient of the land area, or located at the point of diversion of an identified beneficial use within the site, whichever is the smallest distance from the active portion. ()
31. **Processing Facility.** A facility that uses biological or chemical decomposition to prepare solid waste for reuse, excluding waste handling at transfer stations or recycling centers. ()
32. **Projected Waste Volume.** The total actual or potential solid waste volume measured in tons per day, cubic yards per day, or an equivalent measurement, proposed to be received or processed at a solid waste facility. ()
33. **Pumpable Waste.** Wastes, including non-domestic septage, sludge, wastewater and non-municipal solid wastes, which are pumped from a holding area or container into a watertight tank truck or equivalent and transported for processing or disposal. ()
34. **Qualified Professional.** Qualified professional means a licensed professional geologist or licensed professional engineer, as appropriate, holding current professional registration in good standing and in compliance with applicable provisions of Chapter 12, Title 54, Idaho Code. ()
35. **Recyclables.** Used, end, or waste products with useful properties that can be reused. ()
36. **Recycling.** The reclamation of solid waste and its subsequent introduction into an industrial process by which the materials are transformed into a new product in such a manner that the original identity as a product is lost. ()
37. **Recycling Center.** A materials recovery facility that receives recyclables, then sorts, bales, loads, or physically alters the material and transports the commodities to markets. ()
38. **Salvage.** The reclamation of solid waste at a disposal site. ()
39. **Scavenge.** The unauthorized removal of materials from a facility. ()

- 40. Septage.** A semisolid consisting of settled sewage solids combined with varying amounts of water and dissolved materials generated from a septic tank system. ()
- 41. Site.** Any contiguous geographic area with one (1) or more facilities owned or operated by the same person used for any solid waste management activity, including, but not limited to, storage, transfer, processing, separation, incineration, treatment, salvaging, or disposal of solid waste. ()
- 42. Site Size.** The sum in acres of all proposed or existing facilities. ()
- 43. Solid Waste.** Any garbage or refuse, sludge from a waste water treatment plant, water supply treatment plant, or air pollution control facility and other discarded material including solid, liquid, semi-solid, or contained gaseous material resulting from industrial, commercial, mining, and agricultural operations and from community activities, but does not include solid or dissolved materials in domestic sewage, or solid or dissolved material in irrigation return flows or industrial discharges which are point sources subject to permits under Section 402 of the Federal Water Pollution Control Act, as amended (86 Stat. 880), or source, special nuclear, or by-product material as defined by the Atomic Energy Act of 1954, as amended (68 Stat. 923). ()
- 44. Speculative Accumulation.** Stock piles of materials or recyclables to be processed for reuse or disposal when fifty percent (50%) of the material is not reused or disposed by the end of the following calendar year after the date of first receipt by the facility, and which may create a nuisance or public health impact. ()
- 45. Storm Water.** Accumulation of water from natural precipitation, including snow melt. ()
- 46. Surface Water.** All surface accumulations of water, natural or artificial, public or private, or parts thereof which are wholly or partially within, which flow through or border upon the state, unless such waters are an integral part of the facility's operation for storm water control and or leachate management. ()
- 47. Tipping Floor.** An area at a transfer station, processing facility, VSQG management facility or incinerator that receives and contains all waste materials. ()
- 48. Toxic Leachate or Gas.** Concentrations of leachate or gas that will cause contamination, as defined by these rules, or that will exceed standards in the IDAPA 58.01.01, "Rules for the Control of Air Pollution in Idaho." ()
- 49. Transfer Station.** A facility or portion thereof where solid wastes are transferred from a vehicle or container and subsequently transported off-site to another facility. A transfer station does not include an authorized rural drop-box or other facilities where persons are authorized to store individual waste for ultimate collection and disposal, or any other facility that stores solid waste generated at the facility for collection and disposal off-site. ()
- 50. Wood or Mill Yard Debris Facility.** A facility that manages exclusively, solid wood, bark, or wood fiber generated from the process of manufacturing wood products that may include ash from the burning of wood waste in amounts and in conformity with the requirements of the Wood & Mill Yard Technical Guidance Manual, components of soil, rock, or moisture. ()
- 51. Yard Waste.** Weeds, straw, leaves, grass clippings, brush, wood, and other natural, organic, materials typically derived from general landscape maintenance activities. ()

006. ABBREVIATIONS.

- 01. BRC.** Below Regulatory Concern. ()
- 02. CFR.** Code of Federal Regulations. ()
- 03. EPA.** Environmental Protection Agency. ()
- 04. ISWFA.** Idaho Solid Waste Facilities Act, Chapter 74, Title 39, Idaho Code. ()

- 05. MSWLF. Municipal Solid Waste Land Fill. ()
- 06. NMSW. Non-Municipal Solid Waste. ()
- 07. NMSWLF. Non-Municipal Solid Waste Land Fill. ()
- 08. PCS. Petroleum Contaminated Soils. ()
- 09. RCRA. Resource Conservation and Recovery Act. ()
- 10. U.S.C. United States Code. ()

007. INCORPORATION BY REFERENCE.

01. General. Unless expressly provided otherwise, any reference in these rules to any document identified in Subsection 007.02 shall constitute the full adoption by reference, including any notes and appendices therein. The term “documents” includes codes, standards or rules which have been adopted by an agency of the state or of the United States or by any nationally recognized organization or association. ()

02. Documents Incorporated by Reference. The following documents are incorporated by reference into these rules: ()

- a. [40 CFR 257.24\(a\)](#), revised as of July 1, 2001. ()
- b. [40 CFR 257.9](#), revised as of July 1, 2001. ()

03. Availability of Referenced Material. Copies of the documents incorporated by reference into these rules are available at the following locations: ()

- a. Department of Environmental Quality, 1410 N. Hilton, Boise ID 83706-1255. ()
- b. Idaho State Law Library, 451 W. State Street, P.O. Box 83720, Boise ID 83720-0051. ()
- c. U.S. Government Printing Office, Superintendent of Documents, Washington, D.C. 20402, or U.S. Government Bookstore, Room 194 Federal Bldg., 915 Second Ave., Seattle, WA 98174, www.ecfr.gov. ()

008. (RESERVED)

009. SOLID WASTE MANAGEMENT FACILITY CLASSIFICATION.

01. BRC Facilities. A facility is below regulatory concern (BRC) provided it is a processing facility that does not manage PCS or pumpable waste, and the cumulative volume of solid waste at the facility at any one (1) time is less than or equal to three hundred (300) cubic yards. ()

02. Tier I Facilities. Tier I facilities shall comply with the requirements identified in Section 011. A facility shall be classified as a Tier I facility if the Department determines the facility is: ()

- a. A landfill that only accepts for disposal materials that are not likely to produce leachate including, but not limited to, glass, plastic, cardboard, wood, composition roofing material, roofing paper, or ceramics, and which has a total disposal capacity of less than or equal to two thousand (2000) cubic yards. ()
- b. A processing facility that only processes wastes including, but not limited to, untreated or unpainted wood, yard waste, sheet rock, clean paper products, animal manures, plant or crop residues, or garbage without meats or animal fats, and the cumulative volume of wastes at the facility at any one time is less than or equal to six hundred (600) cubic yards. ()

c. A processing facility that only manages PCS not excluded under Subsection 001.03.a.ix. or pumpable wastes and the cumulative volume of material at the facility at any one (1) time is less than or equal to two hundred (200) cubic yards; or ()

d. An emergency solid waste management facility that only accepts debris resulting from a natural disaster. ()

03. Tier II Facility. Tier II facilities shall comply with the Tier II general siting, operational and closure requirements and any applicable Tier II facility specific requirements. Tier II facilities are not required to install ground water monitoring wells, leachate collection systems or liners. Facilities shall be classified as a Tier II facility if the Department determines the facility is not: (1) landfilling or disposing of VSQG hazardous waste; (2) landfilling or disposing of materials with a high human pathogenic potential; (3) managing solid waste in a manner or volume that will form toxic leachate or gas; or (4) managing solid waste in a manner or volume that is likely to pose a substantial risk to human health or the environment. A Tier II facility is one that meets the four (4) above criteria and is identified below: ()

a. A NMSW landfill which has a total disposal capacity greater than two thousand (2000) cubic yards; or ()

b. A processing facility or incinerator that has a cumulative volume of wastes at the facility at any one time that is greater than six hundred (600) cubic yards; or ()

c. A processing facility that only manages PCS not excluded under Subsection 001.03.a.ix or pumpable wastes and the cumulative volume of material at the facility at any one (1) time is greater than two hundred (200) cubic yards; or ()

d. A transfer station or VSQG waste management facility. ()

04. Tier III Facility. Tier III facilities shall comply with the Tier III general siting, operating and closure requirements, ground water monitoring requirements, install leachate collection systems, liners, air contaminant control systems and any applicable Tier III facility specific requirements. Facilities shall be classified as a Tier III facility if the Department determines the facility is: (1) a facility landfilling or disposing of VSQG hazardous waste; (2) a facility landfilling or disposing of materials with a high human pathogenic potential; (3) a facility managing solid waste in a manner or volume that will form toxic leachate or gas; or (4) a facility managing solid waste in a manner or volume that is likely to pose a substantial risk to human health or the environment. ()

05. Wood or Mill Yard Debris Facilities. All Wood and Mill Yard Debris Facilities that are not exempt from these Rules as provided in Section 001.03 shall be regulated as Tier I Facilities unless, based on site-specific criteria including but not limited to site geology, site soils, groundwater characteristics, distance to surface waters, and site climatic data, the Department determines the facility is more appropriately regulated under a different tier classification. Facilities not regulated as a Tier I Facility shall be regulated as a Tier II Facility unless the Department determines the facility manages waste in a manner that will form toxic leachate or gas. ()

06. Site Specific Classification. An owner or operator of a facility classified as a Tier I, Tier II or Tier III facility may request to be regulated pursuant to the requirements of a lower classification. An owner or operator requesting site specific classification must submit information demonstrating to the Department that, when in compliance with the requirements of a lower classification, the facility would not cause contamination, toxic leachate or gas, or concentrations of a substance that exceed standards in the IDAPA 58.01.01 "Rules for the Control of Air Pollution in Idaho." The information included in any request under this subsection shall include: ()

a. Characterization of waste and expected quantities of waste; ()

b. Site characterization including; ()

i. Site geology report; ()

ii. Site soils report; ()

- iii. Ground water report; ()
- iv. Site climatic data; ()
- c. Facility Design Plan; ()
- d. Operating Plan; and ()
- e. Closure Plan. ()

07. General and Site Specific Classification Process. The Department's review of a request for a site specific classification shall be conducted pursuant to the process set forth in Section 032. ()

010. BELOW REGULATORY CONCERN FACILITIES.

01. Applicable Requirements. The owner and operator of a BRC facility shall comply with the following requirements prior to accepting waste. ()

a. Prohibited Activities. The following activities are prohibited: ()

i. Disposal in a landfill of regulated waste from any business that provides health care, support to health care businesses, or medical diagnostic services that has not been decontaminated. "Regulated waste" and "decontaminated" for the purpose of Section 010 will have the same meaning as defined at 29 CFR 1910.1030; ()

ii. Speculative accumulation, unless otherwise approved by the Department in writing; and ()

iii. Disposal of radioactive waste except in a facility regulated pursuant to Section 39-4405(9), Idaho Code, and rules adopted thereunder or a facility regulated under the authority of The Atomic Energy Act of 1954, as amended. ()

b. Nuisance Control. The owner and operator shall control nuisances, including but not limited to: ()

i. Disease or discomfort. Operations at any facility shall not provide sustenance to rodents or insects that cause human disease or discomfort; ()

ii. Vector. Vector control procedures shall prevent or control vectors that may cause health hazards or nuisances; ()

iii. Odor. The facility shall be operated to control malodorous gases; and ()

iv. Litter. Effective measures shall be taken to minimize the loss of debris from the facility. Debris blown from or within the facility shall be collected and properly disposed to prevent objectionable accumulations. ()

c. Bird Hazards to Aircraft. No facility may handle putrescible wastes in such a manner that may attract birds and increase the likelihood of bird/aircraft collisions. Facilities that are located within ten thousand (10,000) feet of any airport runway used by turbojet aircraft, or within five thousand (5,000) feet of any airport used by only piston-type aircraft shall operate the facility in such a manner that birds are not a hazard to aircraft; and ()

d. Open Burning and Fires. Open burning is prohibited at facilities except as authorized by Section 061. ()

02. Application Content, Review and Approval Requirements. The owner and operator of a BRC

facility are not required to submit an application. ()

03. Documentation Requirements. The owner and operator shall maintain on site documentation, such as a daily log of the quantity and type of waste received or managed, that verifies the facility's BRC status. ()

011. APPLICABLE REQUIREMENTS FOR TIER I FACILITIES.

01. Applicable Requirements. The owner and operator of a Tier I facility shall comply with the following requirements prior to accepting waste. ()

a. Prohibited Activities. The following activities are prohibited: ()

i. Disposal in a landfill of regulated waste from any business that provides health care, support to health care businesses, or medical diagnostic services that has not been decontaminated. "Regulated waste" and "decontaminated" for the purpose of Section 011 will have the same meaning as defined at 29 CFR 1910.1030; ()

ii. Speculative accumulation, unless otherwise approved by the Department in writing; and ()

iii. Disposal of radioactive waste except in a facility regulated pursuant to Section 39-4405(9), Idaho Code, and rules adopted thereunder or a facility regulated under the authority of The Atomic Energy Act of 1954, as amended. ()

b. Signs. Facilities open to the general public shall clearly post visible and legible signs at each entrance to the facility. The signs shall specify at a minimum the name of the facility, the hours of operation, the waste accepted at the facility and an emergency phone number. ()

c. Nuisance Control. The owner and operator shall control nuisances, including but not limited to: ()

i. Disease or Discomfort. Operations at any facility shall not provide sustenance to rodents or insects that cause human disease or discomfort; ()

ii. Vector. Vector control procedures shall prevent or control vectors that may cause health hazards or nuisances; ()

iii. Odor. The facility shall be operated to control malodorous gases; and ()

iv. Litter. Effective measures shall be taken to minimize the loss of debris from the facility. Debris blown from or within the facility shall be collected and properly disposed to prevent objectionable accumulations. ()

d. Facility Access. Unauthorized vehicles and persons shall be prohibited access to the facility. A facility open to the public shall accept waste only when an attendant is on duty. The facility shall be fenced or otherwise blocked to access when an attendant is not on duty. The owner and operator shall maintain the fencing or other access controls for a period of ten (10) years after closure, or another timeframe approved in writing by the Department. ()

e. Bird Hazards to Aircraft. No facility may handle putrescible wastes in such a manner that may attract birds and increase the likelihood of bird/aircraft collisions. Facilities that are located within ten thousand (10,000) feet of any airport runway used by turbojet aircraft, or within five thousand (5,000) feet of any airport used by only piston-type aircraft shall operate the facility in such a manner that birds are not a hazard to aircraft. ()

f. Open Burning and Fires. Open burning is prohibited at facilities except as authorized by Section 061. ()

g. Storm Water Run-On/Run-Off Controls. Implement sufficient storm water management provisions, which may incorporate a NPDES storm water pollution prevention plan, to prevent contamination of surface or ground water and prevent the spread and impact of contamination beyond the boundary of the facility. ()

h. Variance Request. An owner and operator may submit a written variance request for a variance from the requirements listed in Section 011. The owner and operator must demonstrate to the Department that the variance is at least as protective of human health and the environment as the requirements listed in Section 011. ()

02. Application Content, Review and Approval Requirements. The owner and operator of a Tier I facility shall submit notification to the Department prior to operating. The notice shall include; the owners name, operators name, physical location of site, mailing address, facility phone number and type of solid waste management facility. ()

03. Documentation Requirements. The owner and operator shall maintain on site documentation, such as a daily log of the quantity and type of waste received, that verifies the facility's Tier I status. ()

012. APPLICABLE REQUIREMENTS FOR TIER II FACILITIES.

The owner and operator of a Tier II facility shall establish compliance with the requirements of Section 012 by obtaining Department approval of the applications required in Subsection 012.02 before beginning construction and Subsection 012.04 prior to accepting waste. The owner and operator of a Tier II facility shall meet the requirements of Subsection 012.05 prior to facility closure. ()

01. General Siting Requirements. The owner and operator of a Tier II facility shall comply with the following siting requirements: ()

a. Flood Plain Restriction. A facility shall not be located within a one hundred (100) year flood plain if the facility will restrict the flow of the one hundred (100) year flood, reduce the temporary water storage capacity of the flood plain, or result in a washout of solid waste so as to pose a hazard to human health and the environment. ()

b. Endangered or Threatened Species Restriction. The facility shall not cause or contribute to the taking of any endangered or threatened species of plants, fish, or wildlife or result in the destruction or adverse modification of the critical habitat of endangered or threatened species as identified in 50 CFR Part 17. ()

c. Surface Water Restriction. The active portion of a facility shall be located such that the facility shall not cause contamination of surface waters, unless such surface waters are an integral part of the non-municipal solid waste management facility's operation for storm water and/or leachate management. ()

d. Park, Scenic or Natural Use Restriction. The active portion of a facility shall not be located closer than one thousand (1,000) feet from the boundary of any state or national park, or land reserved or withdrawn for scenic or natural use including, but not limited to, wild and scenic areas, national monuments, wilderness areas, historic sites, recreation areas, preserves and scenic trails. ()

e. Variance from Siting Requirement. An owner or operator of a facility that cannot meet the siting requirements of Section 012 may apply for a variance from the Department. The Department shall approve a written request for a variance provided the owner and operator demonstrate to the Department that the variance is at least as protective of public health and the environment as the siting requirements in Section 012. ()

02. Siting Application. Documentation shall be submitted to the Department demonstrating compliance with the siting requirements and restrictions specified in Subsection 012.01 within the time frames specified in Section 012. If the documentation has been certified by a qualified professional, the Director shall approve the siting application unless the Director finds the evidence supports a contrary opinion. A map indicating the following shall also be submitted to the Department as part of a Siting Application: ()

a. Highways, roads, and adjacent communities; ()

- b. Property boundaries; ()
 - c. Total acreage of the site; ()
 - d. Off-site and on-site access roads and service roads; ()
 - e. Type(s) of land use adjacent to the facility and a description of all facilities on the site; ()
 - f. All water courses, ponds, lakes, reservoirs, canals, irrigation systems, and existing water supplies, within one-quarter (1/4) mile of the proposed facility property lines; ()
 - g. High tension power line rights-of-way, fuel transmission pipeline rights-of-way, and proposed and existing utilities; ()
 - h. Proposed or existing fencing; ()
 - i. Proposed and existing structures at the facility and within five hundred (500) feet of the facility boundary. This shall include location of employee buildings, and scales (if provided); and ()
 - j. Direction of prevailing winds. ()
- 03. General Operating Requirements.** The owner and operator of a Tier II facility shall comply with the following operating requirements: ()
- a. Prohibited Activities. The following activities are prohibited: ()
 - i. Disposal in a landfill of regulated waste from any business that provides health care, support to health care businesses, or medical diagnostic services that has not been decontaminated. “Regulated waste” and “decontaminated” for the purpose of Section 012 have the same meaning as defined at 29 CFR 1910.1030; ()
 - ii. Speculative accumulation, unless otherwise approved in an operating plan; and ()
 - iii. Disposal of radioactive waste except in a facility regulated pursuant to Section 39-4405(9), Idaho Code, and rules adopted thereunder or a facility regulated under the authority of The Atomic Energy Act of 1954, as amended. ()
 - b. Signs. Facilities open to the general public shall clearly post visible and legible signs at each entrance to the facility specifying, at a minimum, the name of the facility, the hours of operation, the waste accepted at the facility and an emergency phone number. ()
 - c. Waste Types. Only the solid waste types listed in the approved operating plan may be accepted for disposal or processing. ()
 - d. Waste Monitoring and Measurement. Provisions shall be made for monitoring or measuring all solid waste delivered to a facility. The waste monitoring program shall include: ()
 - i. A daily written log listing the types and quantities of wastes received; ()
 - ii. A plan for monitoring and handling receipt of unauthorized wastes; ()
 - iii. Routine characterization of the wastes received; and ()
 - iv. Other measures included in an approved Operating Plan. ()
 - e. Communication. Communication devices shall be available or reasonably accessible at the site. ()

f. Fire Prevention and Control. Adequate provisions shall be made for controlling or managing fires at the site. ()

g. Facility Access. Unauthorized vehicles and persons shall be prohibited access to the facility. A facility open to the public shall accept waste only when an attendant is on duty. The facility shall be fenced or otherwise blocked to access when an attendant is not on duty. ()

h. Scavenging and Salvaging. Scavenging by the public at a facility is prohibited; however, salvaging may be conducted in accordance with a written operations plan and only by the owner, operator or an authorized agent. ()

i. Nuisance Control. The owner and operator shall control nuisances, including but not limited to: ()

i. Disease or Discomfort. Operations at any facility shall not provide sustenance to rodents or insects that cause human disease or discomfort; ()

ii. Vector. Vector control procedures shall prevent or control vectors that may cause health hazards or nuisances; ()

iii. Odor. The facility shall be operated to control malodorous gases; and ()

iv. Litter. Effective measures shall be taken to minimize the loss of debris from the facility. Debris blown from or within the facility shall be collected and properly disposed to prevent objectionable accumulations. ()

j. Bird Hazards to Aircraft. No facility may handle putrescible wastes in such a manner that may attract birds and increase the likelihood of bird/aircraft collisions. Facilities that are located within ten thousand (10,000) feet of any airport runway used by turbojet aircraft, or within five thousand (5,000) feet of any airport used by only piston-type aircraft shall operate the facility in such a manner that birds are not a hazard to aircraft. ()

k. Open Burning and Fires. Open burning is prohibited at facilities except as authorized by Section 061. ()

l. Storm Water Run-On/Run-Off Controls. The operating plan shall include sufficient storm water management provisions, which may incorporate a NPDES storm water pollution prevention plan, to prevent contamination of surface and ground water and prevent the spread and impact of contamination beyond the boundary of the facility. ()

m. Variance Request. An owner and operator of a facility may submit to the Department a written variance request for a variance from the operating requirements listed in Section 012. The Department shall approve a written request for a variance provided the owner and operator demonstrate to the Department that the variance is at least as protective of human health and the environment as the requirements listed in Section 012. ()

04. Operating Plan. The owner and operator of a Tier II facility shall submit to the Department an Operating Plan containing that information required by Subsection 012.03, within the time frames stated in Section 012. An Operating Plan shall include a description of the wastes to be accepted, the methods for maintaining compliance with each of the applicable general operating requirements of Subsection 012.03, and complies with any applicable facility specific requirements found in Subsections 012.09 through 012.11. ()

05. Closure Requirement. The owner and operator of a Tier II facility shall comply with the following closure and post-closure care requirements: ()

a. Public Notice. For a facility open to the public the owner and operator shall provide public notice of the facility's closure by publishing a notice in the local newspaper and posting signs at the facility's entrance. This notice shall be published and the signs posted; ()

i. At least thirty (30) days and no more than ninety (90) days prior to the date of last receipt of waste for a facility that has reached disposal capacity; or ()

ii. If the facility has remaining capacity and there is a reasonable likelihood that the facility will receive additional waste, a notice shall be published and signs posted at least thirty (30) days and no more than ninety (90) days prior to closure. ()

b. Facility Closure. Unless the Department establishes an alternate closure time period, the owner and operator shall close the facility within six (6) months of the Department's approval of the Closure Plan. The facility shall be closed in accordance with the approved Closure Plan. ()

c. Clean Site/Access Control. The owner and operator shall close the facility by managing or removing all solid waste to prevent impact to human health or the environment and installing a gate or other device to prevent public access after the last receipt of waste; and ()

d. Drainage and Erosion Control. The owner and operator shall install appropriate measures to control erosion and install appropriate measures to control the run-on and runoff from a twenty-five (25) year, twenty-four (24) hour storm event and to provide for the diversion of other surface waters from the closed facility. ()

e. Closure Plan Certification. Within thirty (30) days of closure, the owner and operator shall notify the Department in writing that the facility was closed in accordance with the approved Closure Plan. If closure of the facility is different from the approved Closure Plan, the owner and operator shall submit for Department review and approval documents, such as "as-built" plans, showing the final conditions of the facility. ()

06. Closure Plan Application. Except as specified in Subsection 012.10, the owner and operator of a Tier II facility shall submit to the Department a Closure Plan Application containing the following information no later than ninety (90) days before the date on which the facility receives the known final receipt of wastes or, if the facility has remaining capacity and there is a reasonable likelihood that the facility will receive additional wastes, no later than one (1) year after the most recent receipt of wastes: ()

a. A complete and accurate legal description of the facility; ()

b. A map of the facility, showing pertinent facility features, including: ()

i. Facility boundaries, drainage patterns, location of fill areas, and location of access control measures; ()

ii. All water courses, ponds, lakes, reservoirs, canals, irrigation systems, and existing water supplies, within one-quarter (1/4) mile of the facility boundary; ()

iii. Location of disposal trenches and description of waste disposed; and ()

iv. Proposed final contours of the closed facility, drawn to a reasonable scale with five (5) foot intervals for the operational area, and ten (10) foot intervals for the remainder of the facility; ()

c. Estimated date of last receipt of waste; ()

d. A description of how public access to the closed facility will be controlled; ()

e. Estimated total cubic yards, or tons, of waste in place; ()

f. Total acreage of the facility and acres containing waste; ()

g. Closure equipment and procedures to be used; ()

h. Texture, depth and permeability of final cover material; ()

- i. Design and construction plan for any necessary final cover; ()
- j. Placement, design, and management of run-on and run-off storm water controls; ()
- k. Types of vegetation and planting procedures to be used for establishing vegetative cover; ()
- l. Other closure information the Department determines is necessary to protect human health and the environment. ()

07. Documentation Requirements. The owner and operator of a Tier II facility shall maintain on site a copy of each Department-approved Application and Plan required by Section 012. ()

08. Modification Application. The owner and operator shall submit to the Department for review and approval a Modification Application describing any proposed modification. The owner and operator of a Tier II facility shall not implement the modification prior to Department approval. If a proposed modification alters the classification of a facility, the owner and operator shall comply with the application content, review and approval requirements for the new classification. ()

09. Tier II Processing Facilities. In addition to the requirements in Subsections 012.01 through 012.08, the owner and operator of a Tier II processing facility shall also comply with the following requirements: ()

- a. Siting Requirements: ()
 - i. Ground Water. The active portion of a facility shall be located, designed and constructed such that the facility shall not cause contamination to a drinking water source or cause contamination of the ground water. ()
 - ii. Geologic Restrictions. No facility may be located on land that would threaten the integrity of the design. ()
 - iii. Property Line Restriction. The active portion of a facility shall not be located closer than one hundred (100) feet to the property line. ()
- b. Siting Application. The owner and operator shall provide in the Siting Application documentation that demonstrates compliance with the siting requirements specified in Subsection 012.01 and 012.09.a. ()
- c. Operating Requirements: ()
 - i. Odor Management Plan. The owner and operator of a Tier II processing facility shall implement a Department approved Odor Management Plan designed to minimize malodorous gases. An Odor Management Plan shall include specific operating criteria for oxygen, moisture and temperature levels appropriate for the wastes to be processed and processing technologies to be employed, methods used to maintain the specific operating criteria and a monitoring strategy that includes the frequency and parameters for monitoring the specific operating criteria. ()
 - ii. Documentation requirement. The owner and operator of a processing facility shall maintain documentation of compliance with Section 012, including an operational log of the methods used to maintain the operating criteria and sampling results. ()
- d. Operating Plan. The operating plan required in Subsection 012.04 shall identify methods used for maintaining compliance with each applicable operating requirement of Subsection 012.03 and Subsection 012.09.c. ()

10. Tier II Incinerators, VSQG Management Facility and Transfer Stations. In addition to the requirements in Subsections 012.01 through 012.04 and Subsections 012.07 and 012.08, the owner and operator of a Tier II incinerator, VSQG management facility or transfer station shall comply with the following requirements: ()

- a.** Design Requirements. The owner and operator shall comply with the following design requirements: ()
- i. A tipping floor design constructed of impermeable and durable material and designed to contain, collect, and convey any liquids to a storage or leachate management system; and ()
 - ii. A leachate storage or management system. ()
- b.** Design Application. The following information shall be submitted to the Department in a Design Application: ()
- i. A description of the tipping floor design; ()
 - ii. A description of the storage or leachate management system design; ()
 - iii. Building and construction design blueprints; ()
 - iv. A map illustrating a storm water run-on/run-off system designed to prevent contamination of surface and ground water, and prevent the spread and impact of contamination beyond the boundary of the facility; and ()
 - v. Operational design and capacity information including a description of the waste types and projected daily and annual waste volumes. ()
- c.** Operating Requirements. The owner and operator of a Tier II facility shall comply with the following operating requirements: ()
- i. Implement cleaning procedures and waste residency times to maintain sanitary conditions on the surface of the tipping floor; and ()
 - ii. Implement and operate a leachate storage or management system. ()
- d.** Closure Requirement. The owner and operator of a Tier II facility shall comply with the following closure and post-closure care requirements: ()
- i. Public Notice. For a facility open to the public the owner and operator shall provide public notice of the facility's closure by publishing a notice in the local newspaper and posting signs at the facility's entrance. This notice shall be published and the signs posted at least thirty (30) days prior to closure; ()
 - ii. Facility Closure. The owner and operator shall close the facility by removing all solid waste to prevent impact to human health or the environment and installing a gate or other device to prevent public access after the last receipt of waste; ()
 - iii. Closure Time Period. Unless the Department establishes an alternate closure time period, the owner and operator shall close the facility within two (2) months of the Department's approval of the Closure Plan. The facility shall be closed in accordance with the approved Closure Plan; and ()
 - iv. Closure Plan Certification. Within thirty (30) days of closure, the owner and operator shall notify the Department in writing that the facility was closed in accordance with the approved Closure Plan. If closure of the facility is different from the approved Closure Plan, the owner and operator shall submit for Department review and approval documents, such as "as-built" plans, showing the final conditions of the facility. ()
- e.** Closure Plan Application. The owner and operator shall submit to the Department a Closure Plan Application containing the following information no later than ninety (90) days before the date on which the facility receives the known final receipt of wastes: ()
- i. A complete and accurate legal description of the facility; ()

- ii. A map of the facility, showing pertinent facility features, including facility boundaries, drainage patterns, and location of access control measures; ()
 - iii. Estimated date of last receipt of waste; ()
 - iv. A description of how public access to the closed facility will be controlled; ()
 - v. Closure equipment and procedures to be used; ()
 - vi. Anticipated future uses for the facility; and ()
 - vii. Other closure information the Department determines is necessary to protect human health and the environment. ()
- 11. Tier II NMSWLF.** In addition to the requirements in Subsections 012.01 through 012.08, the owner and operator of a Tier II NMSWLF shall also comply with the following requirements: ()
- a. Siting Requirements:** ()
 - i. Wetlands. A facility shall not be located in wetlands, except as provided in 40 CFR 257.9. ()
 - ii. Ground Water. The active portion of a facility shall be located, designed and constructed such that the facility shall not cause contamination to a drinking water source or cause contamination of the ground water. ()
 - iii. Geologic Restrictions. No facility may be located on land that would threaten the integrity of the design. ()
 - iv. Property Line Restriction. The active portion of a facility shall not be located closer than one hundred (100) feet to the property line. ()
 - b. Siting Application.** The owner and operator shall provide in the Siting Application documentation that demonstrates compliance with the siting requirements specified in Subsections 012.01 and 012.11.a.; ()
 - c. Design Application.** The owner and operator shall provide the following information for design approval: ()
 - i. A facility map illustrating:
 - (1) Surface water and erosion control systems; ()
 - (2) Proposed fill area, including the location of waste disposal trenches or cells, noting the locations of trenches used for separated wastes such as animal carcasses, tree trunks, stumps, bulky wastes, car bodies, asbestos, and petroleum contaminated soils; ()
 - (3) Location of borrow areas; ()
 - (4) Design elevation grade of final cover; ()
 - (5) Soil and water table test boring holes, wells, or excavations; ()
 - (6) Proposed receiving, storage, and processing areas; ()
 - (7) Proposed trench layout and development; and ()
 - (8) Contour lines at five (5) foot intervals within the operating area and ten (10) foot intervals to the

facility boundary. ()

d. Operating Requirements: The owner and operator of a NMSWLF shall comply with the following operating requirements: ()

i. Compaction and placement of waste in locations consistent with the approved operating plan; ()

ii. Provision for storage of waste during periods when the NMSWLF is inaccessible; ()

iii. Application of a six (6) inch compacted soil cover layer on exposed waste as necessary to prevent nuisance and vector conditions at periods consistent with the approved operating plan. An owner and operator may request that the Department approve an alternate cover that addresses vectors, litter, fire, odor, and scavenging concerns; ()

iv. Placement of an interim cover layer of twelve (12) inches of compacted soil between lifts to provide erosion control and structural stability. An owner and operator may request that the Department approve an alternate interim cover that addresses erosion, and stability for subsequent lifts; ()

v. Preservation of existing vegetation where attainable. ()

e. Operating Plan. The operating plan required in Subsection 012.04 shall identify the methods used for maintaining compliance with each applicable operating requirement of Subsection 012.03 and Subsection 012.11.d.; ()

f. Closure Requirements. The owner and operator of a Tier II NMSWLF shall comply with the following closure requirements: ()

i. Final Cover. Within seven (7) days of the date of last receipt of waste, a cover layer shall be applied to prevent nuisances and vector conditions. Within one hundred and twenty (120) days of the date of last receipt of waste, a final cover layer of eighteen (18) inches of compacted soil with an approved in-place permeability designed to minimize infiltration, or its functional equivalent, and, a six (6) inch soil layer that minimizes erosion and sustains plant growth shall be constructed; ()

ii. Facility Stabilization. All disturbed portions of the facility shall be stabilized. Stabilization practices may include but are not limited to: establishment of vegetation, mulching, geotextiles, and sod stabilization; ()

iii. Slope Stability. Finished grade shall be at a minimum of two percent (2%) and a maximum of thirty- three percent (33%) slope on the final surface of the completed fill area, after settlement; and ()

iv. Drainage Control. The completed landfill shall be graded to prevent surface water ponding and erosion, and to conform to the local topography. ()

g. Closure Plan. The owner and operator shall provide in the Closure Plan documentation that demonstrates compliance with closure requirements specified in Subsections 012.05 and 012.11.f. ()

h. Environmental Covenants: ()

i. After completion and certification of closure of a NMSWLF, the owner and operator shall record an environmental covenant, pursuant to the Uniformed Environmental Covenants Act (UECA) Chapter 30, Title 55, Idaho Code, on the property where the landfill facility is located and its future use may be restricted in accordance with a post-closure care plan. A copy of the environmental covenant shall be sent to the Department after recording with the county clerk; ()

ii. The owner may request permission from the Department to remove the environmental covenant if all wastes are removed from the facility; ()

iii. Federal agencies with responsibility for management of landfills on federal property shall make an environmental covenant or notation in the federal property records for the affected property. If the subject property is ever sold or transferred by the federal government, a notation on the deed or patent shall be made. ()

i. Post-Closure Care Plan. Owners and operators of a NMSWLF shall submit, in accordance with the time frames specified in Subsection 012.06, to the Department for review and approval a Post-Closure Care Plan, shall obtain Department approval of the Plan, and shall conduct post-closure care in accordance with the Plan. The Post-Closure Care Plan shall typically contain: ()

i. The name and address of an agent authorized to accept communications or service during the post-closure period. The name may be changed during the post-closure period by providing the Department with twenty (20) days advance written notice of the change; ()

ii. Provisions to maintain the integrity and effectiveness of the final cover; ()

iii. Provisions to continue to maintain and operate the systems required in the operating plan including run-on/run-off control systems; ()

iv. Provisions to maintain appropriate security of the closed facility; ()

v. Provisions for routine facility inspections by the owner and operator to insure compliance with the Post-Closure Care Plan; and ()

vi. A description of the planned use(s) of the property during the post-closure care period: ()

j. Post-closure care for the NMSWLF shall be conducted for a period of five (5) years, unless the Department establishes in writing an alternate facility-specific post-closure care period. ()

k. Post-Closure Standards and Inspection. Post-closure use or operation of the site shall not disturb any final cover or storm water control systems in a manner that will increase the potential to threaten human health or the environment. ()

l. The approved Post-Closure Care Plan shall be maintained and available for review on request by the Department. ()

013. APPLICABLE REQUIREMENTS FOR TIER III FACILITIES.

The owner and operator of a Tier III facility shall establish compliance with the requirements of Section 013 by obtaining Department approval of the applications required in Subsection 013.02 before beginning construction and Subsection 013.04 prior to accepting waste. The owner and operator of a Tier III facility shall meet the requirements of Subsection 012.07 prior to facility closure. ()

01. General Siting Requirements. The owner and operator of a Tier III facility shall comply with the following siting requirements: ()

a. Flood Plain Restriction. A facility shall not be located within a one hundred (100) year flood plain if the facility will restrict the flow of the one hundred (100) year flood, reduce the temporary water storage capacity of the flood plain, or result in a washout of solid waste so as to pose a hazard to human health and the environment. ()

b. Endangered or Threatened Species Restriction. The facility shall not cause or contribute to the taking of any endangered or threatened species of plants, fish, or wildlife or result in the destruction or adverse modification of the critical habitat of endangered or threatened species as identified in 50 CFR Part 17. ()

c. Surface Water Restriction. The active portion of a facility shall be located such that the facility shall not cause contamination of surface waters, unless such surface waters are an integral part of the non-municipal solid waste management facility's operation for storm water and/or leachate management. ()

d. Ground Water. The active portion of the facility shall be located, designed and constructed such that the facility shall not cause contamination to a drinking water source or cause contamination of ground water. ()

e. Geologic Restrictions. No facility may be located on land that would threaten the integrity of the design. ()

f. Property Line Restriction. The active portion of a facility shall not be located closer than one hundred (100) feet to the property line. ()

g. Park, Scenic or Natural Use Restriction. The active portion of a facility shall not be located closer than one thousand (1,000) feet from the boundary of any state or national park, or land reserved or withdrawn for scenic or natural use including, but not limited to, wild and scenic areas, national monuments, wilderness areas, historic sites, recreation areas, preserves and scenic trails. ()

h. Variance from Siting Requirement. Any facility that does not meet the siting requirements of Section 013 may apply for a variance from the Department. The Department may approve a written request for a variance provided the owner and operator demonstrate to the Department that the variance is at least as protective of public health and the environment as the siting requirements in Section 013. ()

02. Siting Application. Documentation shall be submitted to the Department demonstrating compliance with the siting requirements and restrictions specified in Subsection 013.01 within the time frames specified in Section 013. If the documentation has been certified by a qualified professional, the Director shall approve the siting application unless the Director finds the evidence supports a contrary opinion. A map indicating the following shall also be submitted to the Department as part of a Siting Application: ()

a. Highways, roads, and adjacent communities; ()

b. Property boundaries; ()

c. Total acreage of the site; ()

d. Off-site and on-site access roads and service roads; ()

e. Type(s) of land use adjacent to the facility and a description of all facilities on the site; ()

f. All water courses, ponds, lakes, reservoirs, canals, irrigation systems, and existing water supplies, within one-quarter (1/4) mile of the proposed facility property lines; ()

g. High tension power line rights-of-way, fuel transmission pipeline rights-of-way, and proposed and existing utilities; ()

h. Proposed or existing fencing; ()

i. Proposed and existing structures at the facility and within five hundred (500) feet of the facility boundary. This shall include location of employee buildings, and scales (if provided); and ()

j. Direction of prevailing winds. ()

03. General Operating Requirements. The owner and operator of a Tier III facility shall comply with the following operating requirements: ()

a. Prohibited Activities. The following activities are prohibited: ()

i. Disposal in a landfill of regulated waste from any business that provides health care, support to health care businesses, or medical diagnostic services that has not been decontaminated. "Regulated waste" and "decontaminated" for the purpose of Section 013 have the same meaning as defined at 29 CFR 1910.1030; ()

- ii. Speculative accumulation, unless otherwise approved in an operating plan; and ()
- iii. Disposal of radioactive waste except in a facility regulated pursuant to Section 39-4405(9), Idaho Code and rules adopted thereunder or a facility regulated under the authority of The Atomic Energy Act of 1954, as amended. ()
- b.** Signs. Facilities open to the general public shall clearly post visible and legible signs at each entrance to the facility specifying, at a minimum, the name of the facility, the hours of operation, the waste accepted at the facility and an emergency phone number. ()
- c.** Waste Types. Only the solid waste types listed in the approved operating plan may be accepted for disposal or processing. ()
- d.** Waste Monitoring and Measurement. Provisions shall be made for monitoring or measuring all solid waste delivered to a facility. The waste monitoring program shall include: ()
 - i. A daily written log listing the types and quantities of wastes received; ()
 - ii. A plan for monitoring and handling receipt of unauthorized wastes; ()
 - iii. Routine characterization of the wastes received; and ()
 - iv. Other measures included in an approved Operating Plan. ()
- e.** Communication. Communication devices shall be available or reasonably accessible at the site. ()
- f.** Fire Prevention and Control. Adequate provisions shall be made for controlling or managing fires at the site. ()
- g.** Facility Access. Unauthorized vehicles and persons shall be prohibited access to the facility. A facility open to the public shall accept waste only when an attendant is on duty. The facility shall be fenced or otherwise blocked to access when an attendant is not on duty. ()
- h.** Scavenging and Salvaging. Scavenging by the public at a facility is prohibited; however, salvaging may be conducted in accordance with a written operating plan and only by the owner, operator or an authorized agent. ()
- i.** Nuisance Control. The owner and operator shall control nuisances, including but not limited to: ()
 - i. Disease or Discomfort. Operations at any facility shall not provide sustenance to rodents or insects that cause human disease or discomfort; ()
 - ii. Vector. Vector control procedures shall prevent or control vectors that may cause health hazards or nuisances; ()
 - iii. Odor. The facility shall be operated to control malodorous gases; and ()
 - iv. Litter. Effective measures shall be taken to minimize the loss of debris from the facility. Debris blown from or within the facility shall be collected and properly disposed to prevent objectionable accumulations. ()
- j.** Bird Hazards to Aircraft. No facility may handle putrescible wastes in such a manner that may attract birds and increase the likelihood of bird/aircraft collisions. Facilities that are located within ten thousand (10,000) feet of any airport runway used by turbojet aircraft, or within five thousand (5,000) feet of any airport used

by only piston-type aircraft shall operate the facility in such a manner that birds are not a hazard to aircraft. ()

k. Open Burning and Fires. Open burning is prohibited at facilities except as authorized by Section 061. ()

l. Storm Water Run-On/Run-Off Controls. The operating plan shall include sufficient storm water management provisions, which may incorporate a NPDES storm water pollution prevention plan, to prevent contamination of ground or surface water and prevent the spread and impact of contamination beyond the boundary of the facility. ()

m. Variance Request. An owner and operator may submit to the Department a written variance request for a variance from the operating requirements listed in Section 013. The Department shall approve a written request for a variance provided the owner and operator demonstrate to the Department that the variance is at least as protective of human health and the environment as the requirements listed in Section 013. ()

04. Operating Plan. The owner and operator of a Tier III facility shall submit to the Department an Operating Plan containing that information required by Subsection 013.03, within the time frames stated in Section 013. An Operating Plan shall include a description of the wastes to be accepted, the methods for maintaining compliance with each of the applicable general operating requirements of Subsection 013.03, and complies with any applicable facility specific requirements found in Subsections 013.11 through 013.13. ()

05. Ground Water Monitoring Requirements. The owner and operator of a Tier III facility shall comply with the following ground water monitoring requirements: ()

a. Install and maintain ground water monitoring wells at the point of compliance as approved by the Department; ()

b. Within thirty (30) days of completion of each well, submit a copy of the geologic log and record of well construction to the Department; ()

c. Monitor the ground water quarterly, unless otherwise directed by the Department. Constituents to be monitored shall be those listed in 40 CFR Part 257.24 unless otherwise authorized by the Department; and ()

d. The owner and operator of any facility required to monitor ground water pursuant to Section 013 shall continue the approved monitoring schedule for five (5) years following facility closure, unless otherwise approved by the Department upon request of the owner and operator for a modified monitoring schedule. ()

06. Ground Water Monitoring Application. The following information shall be submitted to the Department in a Ground Water Monitoring Application: ()

a. A map showing soil types, depth to ground water, ground water flow direction and locations of proposed ground water monitoring wells; and ()

b. A monitoring schedule indicating sample frequency and constituents to be analyzed. ()

07. Closure Requirement. The owner and operator of a Tier III facility shall comply with the following closure requirements: ()

a. Public Notice. For a facility open to the public the owner and operator shall provide public notice of the facility's closure by publishing a notice in the local newspaper and posting signs at the facility's entrance. This notice shall be published and the signs posted; ()

i. At least thirty (30) days and no more than ninety (90) days prior to the date of last receipt of waste for a facility that has reached disposal capacity; or ()

ii. If the facility has remaining capacity and there is a reasonable likelihood that the facility will

receive additional waste, a notice shall be published and signs posted at least thirty (30) days and no more than ninety (90) days prior to closure. ()

b. Facility Closure. Unless the Department establishes an alternate closure time period, the owner and operator shall close the facility within six (6) months of the Department's approval of the Closure Plan. The facility shall be closed in accordance with the approved Closure Plan. ()

c. Clean Site/Access Control. The owner and operator shall close the facility by managing or removing all solid waste to prevent impact to human health or the environment and shall install a gate or other device to prevent public access after the last receipt of waste; ()

d. Drainage and Erosion Control. The owner and operator shall install appropriate measures to control erosion and install appropriate measures to control the run-on and runoff from a twenty-five (25) year, twenty-four (24) hour storm event and to provide for the diversion of other surface waters from the closed facility; and ()

e. Closure Plan Certification. Within thirty (30) days of closure, the owner and operator shall notify the department in writing that the facility was closed in accordance with the approved Closure Plan. If closure of the facility is different from the approved Closure Plan, the owner and operator shall submit for Department review and approval documents, such as "as-built" plans, showing the final conditions of the facility. ()

08. Closure Plan Application. The owner and operator of a Tier III facility shall submit to the Department a Closure Plan Application containing the information no later than ninety (90) days before the date on which the facility receives the known final receipt of wastes or, if the facility has remaining capacity and there is a reasonable likelihood that the facility will receive additional wastes, no later than one (1) year after the most recent receipt of wastes. The following information shall be submitted to the Department in a Closure Application: ()

- a.** A complete and accurate legal description of the facility; ()
- b.** A map of the facility, showing pertinent facility features, including:
 - i.** Facility boundaries, drainage patterns, location of fill areas, and location of access control measures; ()
 - ii.** All water courses, ponds, lakes, reservoirs, canals, irrigation systems, and existing water supplies, within one-quarter (1/4) mile of the facility boundary; ()
 - iii.** Location of disposal trenches and description of waste disposed; and ()
 - iv.** Proposed final contours of the closed facility, drawn to a reasonable scale with five (5) foot intervals for the operational area, and ten (10) foot intervals for the remainder of the facility; ()
- c.** Estimated date of last receipt of waste; ()
- d.** A description of how public access to the closed facility will be controlled; ()
- e.** Estimated total cubic yards, or tons, of waste in place; ()
- f.** Total acreage of the facility and acres containing waste; ()
- g.** Closure equipment and procedures to be used; ()
- h.** Texture, depth and permeability of final cover material; ()
- i.** Design and construction plan for any necessary final cover; ()
- j.** Placement, design, and management of run-on and run-off storm water controls; ()

- k.** Types of vegetation and planting procedures to be used for establishing vegetative cover; ()
- l.** Details of any proposed changes to any existing groundwater monitoring system; ()
- m.** Details of any proposed changes to any existing landfill gas control system; ()
- n.** Details of any proposed changes to any existing leachate collection system; and ()
- o.** Other closure information the Department determines is necessary to protect human health and the environment. ()

09. Documentation Requirements. The owner and operator of a Tier III facility shall maintain on site each Department-approved application required by Section 013. ()

10. Modification Application. The owner and operator shall submit to the Department a Modification Application describing the proposed modification no less than sixty (60) days prior to the proposed modification of the facility. The owner and operator of a Tier III facility shall not implement the modification prior to Department approval. If a proposed modification alters the classification of a facility, the owner and operator shall comply with the application content, review and approval requirements for the new classification. ()

11. Tier III Processing Facilities. In addition to the requirements in Subsections 013.01 through 013.10, the owner and operator of a Tier III processing facility shall comply with the following requirements: ()

a. Odor Management Plan. The owner and operator of a Tier III processing facility shall implement a Department approved Odor Management Plan designed to minimize malodorous gases. An Odor Management Plan shall include specific operating criteria for oxygen, moisture and temperature levels appropriate for the wastes to be processed and processing technologies to be employed; methods used to maintain the specific operating criteria and a monitoring strategy that includes the frequency and parameters for monitoring the specific operating criteria; ()

b. Additional Requirements for PCS. Owners and operators of Tier III PCS processing facilities shall comply with the following applicable requirements: ()

- i.** Leachate collection and control system to prevent contamination of ground and surface waters; ()
- ii.** Liner designed to prevent ground and surface water contamination. The liner design shall account for the types of wastes handled and the potential for migration of liquids and gaseous contaminants to ground water; and ()
- iii.** Air emission control system to prevent discharges of air pollutants. ()
- iv.** An owner and operator of a PCS processing facility may submit a written request for a variance from the leachate control and liner requirements. The owner and operator must demonstrate that the variance is at least as protective of surface and ground water as the leachate collection system and liner. ()

c. Design Application. The following information shall be submitted to the Department in a Design Application: ()

- i.** Building and construction design blueprints; ()
- ii.** A map illustrating a storm water run-on/run-off system designed to prevent contamination of ground or surface water or and prevent contamination beyond the boundary of the facility; ()
- iii.** Operational design and capacity information including a description of the waste types and projected daily and annual waste volumes; and ()
- iv.** Design and Construction Requirements. The owner and operator of a Tier III PCS processing

facility shall submit for Department review and approval the following information as part of the Design Application: ()

- (1) A hydrogeologic evaluation, including the potential for migration of contamination to ground or surface water; ()
- (2) A detailed description of treatment methods to be used; ()
- (3) Design plans for a leachate collection and control system to prevent ground and surface water contamination from the leachate control system; ()
- (4) Design plans for an air emissions control system to prevent discharges of air pollutants; and ()
- (5) Design plans for a liner designed to prevent ground or surface water contamination. The liner design shall account for the types of wastes handled and the potential for migration of liquid and gaseous contaminants to ground water. ()

d. Operating Plan. The owner and operator of a PCS processing facility shall submit for Department review and approval the following information as part of the Subsection 013.04, Operating Plan: ()

- i. A sampling plan that describes the methods and frequency that the owner and operator will use to sample and analyze the wastes when received, during processing, and on final testing of processed material; and ()
- ii. A description of how the owner and operator will maintain and operate the liner, leachate collection and control system, and air emission control system consistent with the approved design application. ()

e. Documentation Requirement. The owner and operator of a processing facility shall maintain documentation of compliance with Section 013, including an operational log of the methods used to maintain the operating criteria and sampling results. ()

12. Tier III Incinerators. In addition to the requirements in Subsections 013.01 through 013.04 and Subsections 013.09 and 013.10, the owner and operator of a Tier III incinerator shall comply with the following requirements: ()

a. Design Requirements. The owner and operator of an incinerator comply with the following design requirements: ()

- i. A tipping floor constructed of impermeable and durable material and designed to contain, collect, and convey any liquids to a storage or leachate management system. ()
- ii. A storage or leachate management system. ()

b. Design Application. The following information shall be submitted to the Department in a Design Application: ()

- i. A description of the tipping floor design; ()
- ii. A description of the storage or leachate management system design; ()
- iii. Building and construction design blueprints; ()
- iv. A map illustrating a storm water run-on/run-off system designed to prevent ground or surface water contamination, or contamination from the facility beyond the boundary of the facility; ()
- v. Operational design and capacity information including a description of the waste types and ()

- projected daily and annual waste volumes; and ()
- vi. Any facility specific design elements required by these rules. ()
- c.** Operating Requirements. The owner and operator of an incinerator shall comply with the following operating requirements: ()
- i. Maintain and operate the tipping floor to control odors, insects, and rodents; ()
 - ii. Implement cleaning procedures and waste residency times used to maintain sanitary conditions on the surface of the tipping floor; and ()
 - iii. Implement a storage or leachate management system operation. ()
- d.** If it is determined that the tipping floor or leachate management system integrity has been breached, or waste has been handled or stored outside of the containment of the tipping floor, unless allowed in the facility Operating Plan, the owner and operator of the Tier III incinerator shall comply with Subsections 013.05 through 013.08. ()
- 13. Tier III NMSWLFs.** In addition to the requirements in Subsection 013.01 through 013.10, the owner and operator of a Tier III NMSWLF shall comply with the following requirements: ()
- a.** Siting Requirements: A facility shall not be located in wetlands, except as provided in 40 CFR 257.9; ()
 - b.** Siting Application. The owner and operator shall include in the Siting Application documentation demonstrating compliance with the requirement specified in Subsection 013.13.a.; ()
 - c.** Design and Construction Requirements: The owner and operator of a NMSWLF shall comply with the following design and construction requirements: ()
 - i. Leachate Collection and Control System. A leachate collection and control system shall be constructed to prevent ground and surface water contamination; ()
 - ii. Liner. A liner designed to prevent ground or surface water contamination shall be installed. The liner design shall account for the types of wastes handled and the potential for migration of liquid and gaseous contamination to ground or surface water; ()
 - iii. Landfill Emission Control System. Appropriate toxic and flammable gas monitoring devices shall be installed where the location, geophysical condition, and waste characteristics indicate that there is a reasonable probability that the facility will generate toxic and flammable gas: exceeding twenty-five (25) percent of the lower explosive limit for gases in facility structures (excluding gas control or gas recovery system components); exceeding the lower explosive limit at the property boundary; or otherwise presenting a potential threat to public health or the environment; and ()
 - iv. An owner or operator may submit a written request for a variance from the leachate collection and control system, liner, or emission control system requirements. The Department may approve the variance upon demonstration by the owner or operator that the variance is at least as protective of human health and the environment as the leachate collection and control system, liner, or emission control system. ()
 - d.** Design Application. The following information shall be submitted to the Department in a Design Application: ()
 - i. Design plans shall address the need for and include as required a leachate collection and control system, liner, and emission control systems in Subsection 013.13.c.; ()
 - ii. A facility map illustrating: ()

- (1) Surface water and erosion control systems; ()
 - (2) Proposed fill area, including the location of waste disposal trenches or cells, noting the locations of trenches used for separated wastes such as animal carcasses, tree trunks, stumps, bulky wastes, car bodies, asbestos, and petroleum contaminated soils; ()
 - (3) Location of borrow areas; ()
 - (4) Design elevation grade of final cover; ()
 - (5) Soil and water table test boring holes, wells, or excavations; ()
 - (6) Proposed receiving, storage, and processing areas; ()
 - (7) Proposed trench layout and development; and ()
 - (8) Contour lines at five (5) foot intervals within the operating area and ten (10) foot intervals to the facility boundary. ()
 - (9) Building and construction design blueprints; ()
 - (10) Operational design and capacity information including a description of the waste types and projected daily and annual waste volumes; and ()
- e. Operating Requirements:** The owner and operator of a NMSWLF shall comply with the following operating requirements: ()
- i. Compaction and placement of waste in locations consistent with the approved operations plan; ()
 - ii. Provision for storage of waste during periods when the NMSWLF is inaccessible; ()
 - iii. Application of a six (6) inch compacted soil cover layer on exposed waste as necessary to prevent nuisance and vector conditions at periods consistent with the approved operations plan. An owner and operator may request that the Department approve an alternate cover that addresses vectors, litter, fire, odor, and scavenging concerns; ()
 - iv. Placement of an interim cover layer of twelve (12) inches of compacted soil between lifts to provide erosion control and structural stability. An owner and operator may request that the Department approve an alternate interim cover that addresses erosion, and stability for subsequent lifts; ()
 - v. Maintenance and operation of a leachate collection and control system and air emission control system consistent with the approved design application; and ()
 - vi. Preservation of existing vegetation where attainable. ()
- f. Operating Plan.** The operating plan required in Section 013 shall identify the methods used for maintaining compliance with each applicable operating requirement of Subsection 013.03. and Subsection 013.13.e. including but not limited to the type, the method of compaction and the frequency of application of respective cover materials; ()
- g. Closure Requirements.** The owner and operator of a NMSWLF shall comply with the following closure requirements: ()
- i. Final Cover. Within seven (7) days of the date of last receipt of waste, a cover layer shall be applied to prevent nuisances and vector conditions. Within one hundred and twenty (120) days of the date of last receipt of

waste, a final cover layer of eighteen (18) inches of compacted soil with an approved in-place permeability designed to minimize infiltration, or its functional equivalent, and, a six (6) inch soil layer that minimizes erosion and sustains plant growth shall be constructed; ()

ii. Facility Stabilization. All disturbed portions of the facility shall be stabilized. Stabilization practices may include but are not limited to: establishment of vegetation, mulching, geotextiles, and sod stabilization; ()

iii. Slope Stability. Finished grade shall be at a minimum of two percent (2%) and a maximum of thirty- three percent (33%) slope on the final surface of the completed fill area, after settlement; and ()

iv. Drainage Control. The completed landfill shall be graded to prevent surface water ponding and erosion, and to conform to the local topography. ()

h. Environmental Covenants: ()

i. After completion and certification of closure of a NMSWLF, the owner and operator shall record an environmental covenant, pursuant to the Uniformed Environmental Covenants Act (UECA) Chapter 30, Title 55, Idaho Code, on the property where the landfill facility is located and its future use may be restricted in accordance with a post-closure care plan. A copy of the environmental covenant will be sent to the Department after recording with the county clerk. ()

ii. The owner may request permission from the Department to remove the environmental covenant if all wastes are removed from the facility. ()

iii. Federal agencies with responsibility for management of landfills on federal property shall make an environmental covenant or notation in the federal property records for the affected property. If the subject property is ever sold or transferred by the federal government, a notation on the deed or patent shall be made. ()

i. Closure Plan. The owner and operator shall provide in the Closure Plan documentation that demonstrates compliance with closure requirements specified in Subsections 013.07 and 013.13.g. ()

j. Post-Closure Care Plan. Owners and operators of a NMSWLF shall submit, in accordance with the time frames specified in Subsection 013.08, to the Department for review and approval a Post-Closure Care Plan, shall obtain Department approval of the Plan, and shall conduct post-closure care in accordance with the Plan: ()

i. Unless the Department determines otherwise, the Post-Closure Care Plan shall contain: ()

(1) The name and address of an agent authorized to accept communications or service during the post-closure period. The name may be changed during the post-closure period by providing the Department with twenty (20) days advance written notice of the change; ()

(2) Provisions to maintain the integrity and effectiveness of the final cover; ()

(3) Provisions to continue to maintain and operate the systems required in the operating plan, including: run-on/run-off control systems, leachate collection and control systems, groundwater monitoring systems, and gas monitoring systems; ()

(4) Provisions to maintain appropriate security of the closed facility; ()

(5) Provisions for routine facility inspections by the owner and operator to insure compliance with the Post-Closure Care Plan; and ()

(6) A description of the planned use(s) of the property during the post-closure care period. ()

ii. Post-closure care for the NMSWLF shall be conducted for a minimum of five (5) years, but not

more than thirty (30) years, as necessary to protect human health and the environment. ()

iii. Post-Closure Standards and Inspection. Post-closure use or operation of the site shall not disturb any final cover, liner or other component of the containment system in a manner that will increase the potential to threaten human health or the environment. ()

iv. The approved Post-Closure Care Plan shall be maintained and available for review on request by the Department. ()

v. The requirements in Subsection 013.07 shall apply to owners and operators and their successors and assigns. ()

014. -- 031. (RESERVED)

032. TIER II AND TIER III APPLICATION AND PLAN REVIEW AND APPROVAL.

01. Application Submittal. The owner and operator shall submit three (3) copies of each required application to the Department. The owner and operator may submit applications for siting, design, operation, or ground water monitoring approval sequentially or concurrently. ()

02. Preapplication Conference. The owner or operator may request that the Department convene a preapplication conference with any interested federal, state and local entities to discuss the approval procedures, application content, time tables for application processing, siting and design requirements. ()

03. Application Review. ()

a. On receipt of an application the Department shall, within thirty (30) days, notify the owner and operator in writing whether the submission is complete and whether the application identifies an appropriate Tier level. The notice shall identify any deficiencies in the application, and the information relied upon in making the determination, and shall state that an applicant may submit additional information in the form of an amended application, withdraw the application or request a conference to discuss the Department's determination. ()

b. Upon receipt of the Department's determination that a siting application is complete, the owner and operator shall publish a notice in a newspaper of general circulation as determined in Section 31-819, Idaho Code, in the county and the immediate vicinity of the proposed facility and shall also provide notice to local government. The notice shall include the name and location of the proposed facility, a general description of the proposed operations, the location where the application may be reviewed, and instructions directing the public to submit comments to the Department within thirty (30) days of the date of publication. The owner and operator shall provide a copy of the published notice and notice to local government to the Department within five (5) business days of publication. ()

c. The Department shall approve, deny, or approve with conditions each application. Failure to issue a decision within the stated time shall be deemed approval. Approval conditions shall relate to protection of human health and the environment as required in these rules. ()

i. For a siting application, the Department shall notify the owner and operator in writing of the Department's decision within thirty (30) days of the date of the close of the public comment period. The Department and the owner and operator may agree, in writing to a longer period of time for the Department's determination. Design, Operating and Ground Water Monitoring Applications shall not be reviewed until the Siting Application is approved. ()

ii. For the Design, Operating and Ground Water Monitoring applications, the Department shall notify the owner and operator in writing of the Department's decision within sixty (60) days from the date the application is determined to be complete. ()

d. If the Department denies an application, the written decision shall state the basis for the denial, and the information relied upon in making the determination. ()

04. Application Valid for Two Years. Unless otherwise stated in the Department's approval of the facility's application, the Department's approval shall become invalid if the owner and operator fail to begin construction within two (2) years from the date of approval, or if after construction has begun, work is suspended for more than two (2) years. Owners and operators may apply for an extension provided that the written request is received by the Department no less than one (1) month prior to expiration of the approval. Within fifteen (15) days from Department receipt of extension request, the Department shall approve the extension request or deny the extension request and state the basis for denial. ()

033. -- 059. (RESERVED)

060. VIOLATIONS.

01. Failure to Comply. Failure by any person to comply with the provisions of these rules shall be deemed a violation of these rules. ()

02. Falsification of Statements and Records. It shall be a violation of these rules for any person to knowingly make a false statement, representation, or certification in any application, document, or record developed, maintained, or submitted pursuant to these rules or the conditions of an approval. ()

03. Penalties. Any person violating any provision of these rules or any approved conditions or order issued thereunder shall be liable for civil penalty in accordance with Title 39, Chapter 1, Idaho Code. ()

061. OPEN BURNING AND FIRES.

Open burning is prohibited at facilities except as authorized by IDAPA 58.01.01, "Rules for the Control of Air Pollution in Idaho," and the following: ()

01. No Open Burning During an Air Pollution Episode. No open burning may be conducted during an air pollution episode, declared in accordance with IDAPA 58.01.01, "Rules for the Control of Air Pollution in Idaho"; ()

02. Conditions Under Which Open Burning Authorized. Open burning is authorized only if it is infrequent and the materials are agricultural wastes, silviculture wastes, land clearing debris, diseased trees, or debris from emergency cleanup operations. Materials burned may not include garbage, dead animals, asphalt, petroleum products, paints, tires or other rubber products, plastics, paper (other than that necessary to start the fire), cardboard, treated wood, construction debris, metal, pathogenic wastes, hazardous wastes, or any other substance (other than natural vegetation) that when burned releases toxic emissions, dense smoke or strong odors; and ()

03. Contact Department and Local Fire Authority Prior to Conducting Open Burning. Open burning may be conducted pursuant to conditions set forth by the Department or local fire authority. The owner and operator of the facility must contact the Department and the local fire authority prior to conducting open burning to report its nature and location. ()

062. -- 993. (RESERVED)

994. COMMERCIAL SOLID WASTE SITING LICENSE FEE.

An application for a commercial solid waste siting license required by the Idaho Solid Waste Facilities Act shall be accompanied by a siting license fee in an amount established by these rules. The license fee shall not exceed seven thousand five hundred dollars (\$7,500) and shall be submitted with the siting license application. ()

01. Commercial Solid Waste Siting License Fee Criteria. The commercial solid waste siting license fee required by the Idaho Solid Waste Facilities Act and these rules shall apply to commercial MSWLFs only and shall be based on the cost of the Department's review and the characteristics of the proposed commercial solid waste facility, including the projected site size, projected waste volume, and the hydrogeological and atmospheric characteristics surrounding the site. ()

02. Commercial Solid Waste Siting License Fee Scale. The commercial solid waste siting license fee

required by the Idaho Solid Waste Facilities Act and these rules shall be determined using the table below. The fee determined using the table below may then be adjusted by the Department if necessary to reflect the cost of the Department's review, taking into account the hydrogeological and atmospheric characteristics surrounding the site.

COMMERCIAL SOLID WASTE SITING LICENSE FEE SCALE			
PROJECTED SOLID WASTE VOLUME			
Tons per day (TPD)			
Site Size	Up to 20 TPD	20 to 100 TPD	More than 100 TPD
5 acres or less	\$3,500	\$4,500	\$5,500
5 to 50 acres	\$4,500	\$5,500	\$6,500
more than 50 acres	\$5,500	\$6,500	\$7,500

()

03. Notification of Adjustment of Fee. Within thirty (30) days of receipt of the application and fee, the Department shall notify the applicant if the fee has been adjusted and the date by which any additional fee must be paid by the applicant. ()

04. Expansion or Enlargement of a Commercial Solid Waste Facility. The expansion or enlargement of a commercial solid waste facility constitutes a new proposal for which a commercial solid waste siting license is required and for which a siting license fee must be paid. All commercial solid waste facilities not in operation on March 20, 1996 must submit a commercial solid waste license application and fee. ()

05. Commercial Solid Waste Siting License Fee Not Refundable. The commercial solid waste siting license fee required by the Idaho Solid Waste Facilities Act and by these rules shall not be refundable and may not be applied toward any subsequent application should the commercial solid waste siting license application be canceled, withdrawn or denied. ()

995. COMMERCIAL SOLID WASTE SITING LICENSE APPLICATION.
In addition to the contents of a Siting License Application as required in the Idaho Solid Waste Facilities Act, these rules require the applicant to include in the application the following items: ()

01. Location. A map indicating the location of the proposed commercial solid waste facility; ()

02. Copies of Application. Ten (10) copies of the completed application; and ()

03. Application Format. A copy of the application in a format prepared for photocopying. ()

996. -- 998. (RESERVED)

999. CONFIDENTIALITY OF RECORDS.
Information obtained by the Department under these rules is subject to public disclosure pursuant to the provisions of Chapter 1, Title 74, Idaho Code. Information submitted under a trade secret claim may be entitled to confidential treatment by the Department as provided in Section 74-114, Idaho Code, and IDAPA 58.01.21, "Rules Governing the Protection and Disclosure of Records in the Possession of the Department of Environmental Quality." ()

58.01.07 – RULES REGULATING UNDERGROUND STORAGE TANK SYSTEMS

000. LEGAL AUTHORITY.

Chapters 1 and 88, Title 39, Idaho Code, grant authority to the Board of Environmental Quality to promulgate rules for the regulation of underground storage tank systems within the state of Idaho. ()

001. TITLE AND SCOPE.

01. Title. These rules are titled IDAPA 58.01.07, “Rules Regulating Underground Storage Tank Systems.” ()

02. Scope. These rules establish standards and procedures necessary for the regulation of underground storage tank systems. Compliance with these rules shall not relieve persons from the obligation to comply with other applicable state or federal laws. ()

002. WRITTEN INTERPRETATIONS.

As described in Section 67-5201(19)(b)(iv), Idaho Code, the Department of Environmental Quality may have written statements which pertain to the interpretation of these rules. If available, such written statements can be inspected and copied at cost at the Department of Environmental Quality, 1410 N. Hilton, Boise, Idaho 83706-1255. ()

003. ADMINISTRATIVE PROVISIONS.

Persons may be entitled to appeal agency actions authorized under these rules pursuant to IDAPA 58.01.23, “Rules of Administrative Procedure Before the Board of Environmental Quality.” ()

004. INCORPORATION BY REFERENCE.

Any reference to any document identified in Subsection 004.01 shall constitute the full adoption by reference into IDAPA 58.01.07. ()

01. Documents Incorporated by Reference. Technical Standards and Corrective Action Requirements for Owners and Operators of Underground Storage Tanks, [40 CFR Part 280](#), revised as of July 1, 2017 with the following exceptions: ()

- a. 40 CFR 280.12, the definition of “Replaced” is excluded; ()
- b. 40 CFR 280.12, the definition of “Under-dispenser containment or UDC” is excluded; ()
- c. 40 CFR 280.20, the introductory paragraph sentence, “In addition, except for suction piping that meets the requirements of Section 280.41(b)(1)(ii)(A) through (E), tanks and piping installed or replaced after April 11, 2016 must be secondarily contained and use interstitial monitoring in accordance with Section 280.43(g),” is excluded; ()
- d. 40 CFR 280.20(f), is excluded; ()
- e. 40 CFR 280.34(b)(9), the citation to Section 280.245 is excluded; ()
- f. 40 CFR 280.41(a)(1), “installed on or before April 11, 2016...” is excluded; ()
- g. 40 CFR 280.41(a)(2), is excluded; ()
- h. 40 CFR 280.41(b)(1), “installed on or before April 11, 2016...” is excluded; ()
- i. 40 CFR 280.41(b)(2), is excluded; ()
- j. 40 CFR 280.42, Note to paragraph (a), “for tank installed on or before October 13, 2015.” is excluded; ()
- k. 40 CFR 280.42(e), “installed on or before October 13, 2015...” is excluded; and ()
- l. 40 CFR Part 280 Subpart J is excluded. ()

02. Hazardous Substance Underground Storage Tank Systems. ()

- a. The following items only apply to hazardous substance underground storage tank systems and do

not apply to petroleum underground storage tank systems: ()

i. The definition of “Hazardous substance UST system” in 40 CFR 280.12 and use of this term or regulations regarding hazardous substance in [40 CFR Part 280](#); and ()

ii. 40 CFR 280.42 and any reference to 40 CFR 280.42 in [40 CFR Part 280](#). ()

b. All other provisions of 40 CFR Part 280 and all provisions of IDAPA 58.01.07 shall apply to hazardous substance underground storage tank systems. ()

03. Consistency. In the event of conflict or inconsistency between the language in IDAPA 58.01.07 and that found in [40 CFR Part 280](#), IDAPA 58.01.07 shall prevail. ()

04. Stringency. IDAPA 58.01.07 shall be no more stringent than federal law or regulations governing underground storage tank systems. ()

05. Availability of Referenced Material. The federal regulations adopted by reference can be obtained at the following locations: ()

a. U.S. Government Printing Office, www.ecfr.gov; and ()

b. Department of Environmental Quality, Hearing Coordinator, 1410 N. Hilton, Boise, ID 83706-1255, (208)373-0502. ()

005. OFFICE HOURS – MAILING ADDRESS AND STREET ADDRESS.

The state office of the Department of Environmental Quality and the office of the Board of Environmental Quality are located at 1410 N. Hilton, Boise, Idaho 83706-1255, (208) 373-0502, www.deq.idaho.gov. The office hours are 8 a.m. to 5 p.m. Monday through Friday. ()

006. CONFIDENTIALITY OF RECORDS.

Information obtained by the Department under these rules is subject to public disclosure pursuant to the provisions of Title 74, Chapter 1, Idaho Code, and IDAPA 58.01.21, “Rules Governing the Protection and Disclosure of Records in the Possession of the Idaho Department of Environmental Quality.” ()

007. -- 009. (RESERVED)

010. DEFINITIONS.

For the purpose of the rules contained in IDAPA 58.01.07, “Rules Regulating Underground Storage Tank Systems,” the following definitions apply: ()

01. Board. The Idaho Board of Environmental Quality. ()

02. Community Water System. A public water system that serves at least fifteen (15) service connections used by year-round residents of the area served by the system or regularly serves at least twenty-five (25) year-round residents. ()

03. Department. The Idaho Department of Environmental Quality. ()

04. Director. The Director of the Idaho Department of Environmental Quality or his authorized agent. ()

05. Existing. Solely for purposes of determining when secondary containment is required, existing is when a petroleum underground storage tank, piping, motor fuel dispensing system, facility, public water system or potable drinking water well is in place when a new installation or replacement of a tank, piping, or motor fuel dispensing system begins. ()

06. EPA. The United States Environmental Protection Agency. ()

07. Installation of a New Motor Fuel Dispenser System. The installation of a new motor fuel dispenser and the equipment necessary to connect the dispenser to the petroleum underground storage tank system. This equipment may include flexible connectors, risers, or other transitional components that are beneath the dispenser, below the shear valve, and connect the dispenser to the piping. It does not mean the installation of a motor fuel dispenser installed separately from the equipment needed to connect the dispenser to the petroleum underground storage tank system. ()

08. Installer. Any person who installs a new or replacement petroleum underground storage tank system. ()

09. New Underground Storage Tank. Has the same meaning as “underground storage tank or UST” in 40 CFR 280.12, except that such term includes tanks that have been previously used and meet the requirements of 40 CFR 280.20(a). ()

10. Non-Community Water System. A public water system that is not a community water system. A non-community water system is either a transient non-community water system or a non-transient non-community water system. ()

11. Piping. A hollow cylinder or a tubular conduit constructed of non-earthen materials that routinely contains and conveys regulated petroleum substances from the petroleum underground storage tank(s) to the dispenser(s) or other end-use equipment. It does not mean vent, vapor recovery, or fill lines that do not routinely contain regulated petroleum substances. ()

12. Potable Drinking Water Well. Any hole (dug, driven, drilled, or bored) that extends into the earth until it meets ground water which supplies water for a non-community public water system or otherwise supplies water for household use (consisting of drinking, bathing, and cooking, or other similar uses). Such wells may provide water to entities such as a single-family residence, group of residences, businesses, schools, parks, campgrounds, and other permanent or seasonal communities. ()

13. Product Deliverer. Any person who delivers or deposits product into a petroleum underground storage tank. This term may include major oil companies, jobbers, petroleum transportation companies, or other product delivery entities. ()

14. Public Water System. A system for the provision to the public of water for human consumption through pipes or, after August 5, 1998, other constructed conveyances, if such system has at least fifteen (15) service connections or regularly serves an average of at least twenty-five (25) individuals daily at least sixty (60) days out of the year. Such term includes: any collection, treatment, storage, and distribution facilities under control of the operator of such system and used primarily in connection with such system; and, any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system. Such term does not include any “special irrigation district.” A public water system is either a “community water system” or a “non-community water system.” ()

15. Red Tag. A tamper-resistant tag, device, or mechanism attached to the tank’s fill pipes that clearly identifies a petroleum underground storage tank as ineligible for product delivery. The tag or device shall be visible to the product deliverer and clearly state that it is unlawful to deliver to, deposit into, or accept product into the ineligible petroleum underground storage tank. ()

16. Replace. As it applies to petroleum underground storage tanks and piping, replace is defined as follows: ()

a. Petroleum Underground Storage Tank. Replace means to remove an existing tank and install a new tank. ()

b. Piping. Replace means to remove and put back in one hundred (100) percent of the piping, excluding connectors, connected to a single petroleum underground storage tank system. This definition does not alter the requirement in 40 CFR 280.33(c) to replace metal pipe sections and fittings that have released product as a

result of corrosion or other damage. A replacement of metal pipe section and fittings pursuant to 40 CFR 280.33(c) shall be considered a replacement under this definition only if one hundred (100) percent of the metal piping, excluding connectors, is replaced. ()

17. Under-Dispenser Spill Containment. Containment underneath a dispenser that will prevent leaks from the dispenser from reaching soil or ground water. Such containment must: ()

- a. At installation or modification, be liquid-tight on its sides, bottom, and at any penetrations; and ()
- b. Be compatible with the substance conveyed by the piping; and either ()
- c. Allow for visual inspection and access to the components in the containment system; or ()
- d. Be monitored for releases using a release detection method that meets the requirements of 40 CFR 280.43(g). ()

011. – 099. (RESERVED)

100. ADDITIONAL MEASURES TO PROTECT GROUND WATER FROM CONTAMINATION.

01. Notification. An owner, operator or designee must: ()

- a. Provide written notice to the Department thirty (30) days prior to the installation of a new piping system or a new or replacement petroleum underground storage tank. ()
- b. Provide notice to the Department twenty-four (24) hours prior to the installation of a replacement piping system. ()

02. Notification Forms. The written notice required in Subsection 100.01.a. shall be made upon forms provided by the Department. ()

03. Requirements for Petroleum UST Systems. Owners, operators, and installers of a new or replacement petroleum underground storage tank or piping system shall comply with the following requirements. ()

a. Each new petroleum underground storage tank, or piping connected to any such new tank, installed after February 23, 2007, or any existing petroleum underground storage tank, or existing piping connected to such existing tank, that is replaced after February 23, 2007, shall have secondary containment and be monitored for leaks if the new or replaced petroleum underground storage tank or piping is within one thousand (1,000) feet of any existing public water system or any existing potable drinking water well. At a minimum, secondary containment systems must be designed, constructed, and installed to contain regulated substances released from the tank system until they are detected and removed, prevent the release of regulated substances to the environment at any time during the operational life of the petroleum underground storage tank system, and be checked for evidence of a release at least every thirty (30) days. The following conditions are excluded: ()

- i. Suction piping that meets the requirements of 40 CFR 280.41(b)(1)(ii)(A) through (E); ()
- ii. Piping that manifolds two (2) or more petroleum underground storage tanks together; ()
- iii. Existing piping to which new piping is connected to install a dispenser; and ()
- iv. Tanks identified in 40 CFR 280.10(b). ()

b. If the owner installs, within one (1) year, a potable drinking water well at the new facility that is within one thousand (1,000) feet of the petroleum underground tanks, piping, or motor fuel dispenser system as part of the new underground storage tank facility installation, secondary containment and under-dispenser containment

are required, regardless of whether the well is installed before or after the petroleum underground tanks, piping, and motor fuel dispenser system are installed. ()

c. The notice required in Subsection 100.01 shall indicate whether the new or replacement installation is within one thousand (1,000) feet of an existing public water system or any existing potable drinking water well. If the owner and installer certify that the installation is not within one thousand (1,000) feet of an existing public water system or any existing potable drinking water well, the owner, operator or designee shall provide and maintain documentation showing that a reasonable investigation of water systems and drinking water wells was undertaken. A reasonable investigation includes, but is not limited to, a search of the records of: ()

- i.** The public or private water service provider in the area which the new or replacement installation is located (if any); ()
- ii.** The city or county in which the new or replacement installation is located; ()
- iii.** The Idaho Department of Water Resources; and ()
- iv.** The Idaho Department of Environmental Quality. ()

d. In the case of a replacement of an existing petroleum underground storage tank or existing piping connected to the petroleum underground storage tank, Section 100 shall apply only to the specific petroleum underground storage tank or piping being replaced, not to other petroleum underground storage tanks and connected pipes comprising such system. ()

e. Each installation of a new motor fuel dispenser system shall include under-dispenser spill containment if the new dispenser is within one thousand (1,000) feet of any existing public water system or any existing potable drinking water well. ()

04. Requirements for Hazardous Substance UST Systems. Owners, operators, and installers of a new or replacement hazardous substance underground storage tank or piping system shall have secondary containment as required in 40 CFR 280.42. ()

05. Certification. Owners and operators shall also comply with the certification requirements of 40 CFR 280.22(f) as incorporated by reference into these rules. ()

101. ALTERNATIVE PERIODIC TESTING OF CONTAINMENT SUMPS USED FOR INTERSTITIAL MONITORING OF PIPING.

01. Applicability. ()

a. The alternative test method in Subsection 101.02 shall only be used for containment sumps that are performing continuous interstitial monitoring as a piping release detection method where an electronic sump sensor is installed and connected to an electronic monitoring device, such as an automatic tank gauge, or where the piping within a containment sump is continuous to a containment sump which has an electronic sump sensor installed and connected to an electronic monitoring device, such as an automatic tank gauge. ()

i. The sump sensor in Subsection 101.01.a. must be positioned in the containment sump according to manufacturer instructions and at the lowest possible point in the containment sump. ()

ii. The sump sensor in Subsection 101.01.a. must be wired and programmed appropriately to shut down power to the submersible turbine pump (positive shutdown) when the sensor is in contact with liquid in any containment sump. ()

iii. If new dispensers are added and Subsection 101.01.a.ii. cannot be achieved (no electrical conduit, not enough sensor ports, etc.), an electronic stand-alone dispenser containment sump sensor may be used if it is wired appropriately to shut down power to the dispenser when the sensor is in contact with liquid in the dispenser containment sump. ()

b. The Department may not allow the alternative test method in Subsection 101.02 if it determines the containment sump, penetration fittings, or containment sump sensors are not constructed or positioned in a manner that will accommodate the alternative testing or prevent releases to the environment (i.e., penetration fittings are too close to the containment sump bottom). ()

02. Alternative Test Method Allowed. ()

a. As an alternative to the allowable test method in 40 CFR 280.35(a)(1)(ii)(A)-(C), containment sumps used for interstitial monitoring of piping may be tested as follows: ()

i. Temporarily remove any interstitial monitoring containment sump sensors before conducting the test; ()

ii. Add water to the containment sump up to a point directly beneath the first containment sump penetration fitting from the bottom of the containment sump. The water must be allowed to settle for at least fifteen (15) minutes; ()

iii. Place a measuring stick that has one sixteenth (1/16th) inch increments into the lowest point in the containment sump and extending above the water level in the sump; and ()

iv. Document the initial water level measurement as measured from the bottom of the containment sump. After one (1) hour, document the ending water level measurement. If the water level changes less than one eighth (1/8th) inch, the containment sump passes the integrity test. If the water level changes one eighth (1/8th) inch or greater, the containment sump fails the integrity test. ()

b. Upon completion of the test, remove all water and properly dispose of it. Reinstall any interstitial monitoring sensors. Reinstall all containment sump lids, gaskets, and covers. ()

102. -- 199. (RESERVED)

200. RELEASE REPORTING REQUIREMENTS.

01. Information to be Reported. ()

a. In addition to the requirements in IDAPA 58.01.02, "Water Quality Standards," Subsection 851.01, owners or operators shall report the following information regarding confirmed petroleum underground storage tank releases to the Department on forms provided by the Department: ()

i. The release source; and ()

ii. The release cause. ()

b. Releases less than twenty-five (25) gallons that are cleaned up within twenty-four (24) hours, and which do not cause a sheen on nearby surface water, do not need to be reported. ()

02. Release Sources. Release sources may include, but are not limited to the following: ()

a. Petroleum Underground Storage Tanks; ()

b. Piping; ()

c. Dispensers, which include the dispenser and equipment used to connect the dispenser to the piping. A release from a suction pump or components located above the shear valve would be an example of a release from the dispenser; ()

d. Submersible turbine pump area, which includes the submersible turbine pump head (typically

located in the tank sump), the line leak detector, and the piping that connects the submersible turbine pump to the petroleum underground storage tank; and ()

e. Delivery problem, which identifies releases that occurred during product delivery to the petroleum underground storage tank. Typical causes associated with this source are spills and overfills. ()

03. Release Causes. Release causes may include, but are not limited to the following: ()

a. Spills which may occur when the delivery hose is disconnected from the fill pipe of the petroleum underground storage tank or when the nozzle is removed from the vehicle at the dispenser; ()

b. Overfills which may occur from the fill pipe at the petroleum underground storage tank or when the nozzle fails to shut off at the dispenser; ()

c. Physical or mechanical damage of all types except corrosion. Examples include a puncture of the petroleum underground storage tank or piping, loose fittings, broken components, and components that have changed dimension like elongation or swelling; ()

d. Corrosion of a metal tank, piping, flex connector, or other component; and ()

e. Installation problem that occurs specifically because the underground storage tank system was not installed properly. ()

04. Requirements. The reporting required in Section 200 shall be reported to the Department within ninety (90) days of a confirmed release. The reporting requirement in Section 200 shall not relieve owners or operators from the obligation to comply with 40 CFR Part 280 Subpart E “Release Reporting, Investigation, and Confirmation,” IDAPA 58.01.02, “Water Quality Standards,” Section 851, “Petroleum Release Reporting, Investigation, and Confirmation,” and IDAPA 58.01.02, “Water Quality Standards,” Section 852, “Petroleum Release Response and Corrective Action.” ()

201. -- 299. (RESERVED)

300. TRAINING REQUIREMENTS.

01. Requirements. The Department shall adopt a training program to help owners and operators comply with the requirements of these rules. The training program requirements shall: ()

a. Be consistent with 42 U.S.C. 6991i(a), as amended by the Underground Storage Tank Compliance Act, (Pub.L. 109-58, title XV, sec. 1524(a), Aug. 8, 2005); ()

b. Be developed in cooperation with petroleum underground storage tank owners and tank operators; ()

c. Take into consideration training programs implemented by petroleum underground storage tank owners and operators as of August 8, 2005; ()

d. Provide for training to be conducted on site or at another mutually convenient location; and ()

e. Be appropriately communicated to petroleum underground storage tank owners and operators. ()

02. Operator Designation. For each petroleum underground storage tank system regulated under these rules, the owner or operator shall: ()

a. Designate: ()

i. The class A operator, who is the individual(s) having primary responsibility for on-site operation and maintenance of the petroleum underground storage tank system. This does not require that the class A operator be on site; ()

ii. The class B operator, who is the individual(s) having daily on-site responsibility for the operation and maintenance of the petroleum underground storage tank system. This does not require that the class B operator be on site at all times; and ()

iii. The class C operator, who is the daily, on-site individual(s) having primary responsibility for addressing emergencies presented by a spill or release from the petroleum underground storage tank system. The class C operator can be designated by the class A or B operator. ()

b. Maintain a record at the facility where the petroleum underground storage tank is located listing each person designated in Subsections 300.02.a.i., 300.02.a.ii., and 300.02.a.iii. ()

c. Notify the Department in writing of the individual(s) designated in Subsections 300.02.a.i. and 300.02.a.ii. within thirty (30) days of the designation. ()

03. Training. The owner or operator of each petroleum underground storage tank system regulated under these rules shall ensure that the individual(s) identified in Subsections 300.02.a.i. and 300.02.a.ii. participate in the training conducted by the Department or a state of Idaho approved third party. ()

a. The individual(s) identified in Subsections 300.02.a.i. or 300.02.a.ii. shall provide training to the persons identified in Subsection 300.02.a.iii. ()

b. The individual(s) identified in Subsection 300.02.a.iii. must be trained before assuming responsibility for responding to emergencies. ()

c. The individual(s) identified in Subsections 300.02.a.i. and 300.02.a.ii. shall repeat the training within thirty (30) days if the petroleum underground storage tank system for which they have responsibility is determined to be out of compliance with these rules. ()

d. The individual(s) identified in Subsections 300.02.a.i. and 300.02.a.ii. shall be trained within thirty (30) days of assuming operation and maintenance duties. ()

04. Unattended Sites. In the case of unattended sites, a sign must be posted in a location visible from the dispensers indicating emergency shut-off procedures and emergency contact phone numbers. ()

301. -- 399. (RESERVED)

400. INSPECTIONS.

01. Department Authority. In order to fulfill the statutory requirements of Chapter 88, Title 39, Idaho Code, officers, employees or representatives of the Department, or third-party inspectors as described in Subsection 400.02, are authorized to inspect petroleum underground storage tanks, contents of the tanks, and associated equipment and records relating to such tanks, contents, and associated equipment. ()

02. Third-Party Inspections. ()

a. Third-party inspectors must be certified, licensed, or registered by an approved state program to perform on-site inspections. At a minimum, third-party inspectors must meet the requirements listed in Subsections 400.02.a.i. through 400.02.a.v.: ()

i. Be trained in the state-specific inspection protocols and procedures, and perform inspections pursuant to such protocols and procedures; ()

ii. Successfully complete the state's required training program. The training program for third-party

inspectors must be comparable to the training program for Department inspectors; ()

iii. Not be the owner or operator of the petroleum underground storage tank, an employee of the owner or operator of the petroleum underground storage tank, or a person having daily on-site responsibility for the operation and maintenance of the petroleum underground storage tank; ()

iv. Use an inspection report form developed by the Department. Review of applicable records and other activities that can be accomplished off-site may be combined with activities conducted at the site to fulfill the on-site inspection requirement; and ()

v. Complete and submit the inspection report to the Department in the manner and time frame established by the Department. All third-party inspection reports must be submitted electronically to the Department for review and for the Department to make a compliance determination for each site. If requested by the Department, third-party inspectors shall provide all supporting documentation for its inspection reports. ()

b. Third-party inspection procedures must contain an audit program, developed by the Department, to monitor third-party inspectors on a routine basis. The audit program must include a sufficient number of on-site inspections to effectively assess inspector performance. ()

c. If a third-party inspector fails to demonstrate to the approved state program adequate competence and proficiency to perform petroleum underground storage tank inspections, or the approved state program otherwise determines it is not appropriate for the third-party inspector to conduct on-site inspections as part of a third-party inspection program, the approved state program must take appropriate action against the third-party inspector as provided by law. ()

03. Inspections. All inspections shall be done in accordance with the provisions of Section 39-108, Idaho Code. At a minimum, an on-site inspection must assess compliance with the provisions of these rules and 40 CFR Part 280. ()

401. -- 499. (RESERVED)

500. DELIVERY PROHIBITION.

01. Prohibition. Effective August 8, 2007, it shall be unlawful for any person to deliver to, deposit into, or accept a regulated petroleum substance into a petroleum underground storage tank at a facility which has been identified by the Department to be ineligible for such delivery, deposit, or acceptance. ()

02. Classification as Ineligible. The Department shall classify a petroleum underground storage tank as ineligible for delivery, deposit, or acceptance of a regulated petroleum substance as soon as practicable after the Department determines one or more of the following conditions exists: ()

a. Required spill prevention equipment is not installed; ()

b. Required overfill protection equipment is not installed; ()

c. Required leak detection equipment is not installed; or ()

d. Required corrosion protection equipment is not installed. ()

03. Warning of Violations. The Department may classify a petroleum underground storage tank as ineligible for delivery, deposit, or acceptance of a regulated petroleum substance if the owner or operator of the tank has been issued a written warning for any of the following violations, and the owner or operator fails to initiate corrective action within thirty (30) days of the issuance of the written warning, unless the deadline is extended by the Department: ()

a. Failure to properly operate or maintain leak detection equipment; ()

- b. Failure to properly operate or maintain spill, overfill, or corrosion protection equipment; or ()
- c. Failure to maintain financial responsibility. ()

04. Service of Notice. If the Department classifies a petroleum underground storage tank as ineligible for delivery, deposit, or acceptance of a regulated petroleum substance pursuant to Subsections 500.02 or 500.03, the Department shall provide a written notice of the determination to the owner or operator prior to prohibiting the delivery, deposit, or acceptance of a regulated petroleum substance. Notice is considered properly served by the Department in any of the following ways: ()

- a. The notice is personally delivered to the owner or operator; or ()
- b. The notice is clearly posted at a public entrance to the facility where the petroleum underground storage tank is located and a copy of the notice is also sent by certified mail to the last known address of the owner or operator. ()

05. Red-Tagging. Once service of the written notice of the ineligible determination is complete, the Department shall then attach a red tag to each fill pipe of the ineligible petroleum underground storage tank clearly identifying the tank as ineligible. The Department shall also maintain a list of all petroleum underground storage tanks that are classified as ineligible for delivery, deposit, or acceptance of a regulated petroleum substance. The Department shall make the list available to the public by posting the list on the Department's website at www.deq.idaho.gov. ()

06. Written Notice. The written notice required by Subsection 500.04 must include: ()

- a. The specific reasons or violations that led to the ineligible classification; ()
- b. A statement notifying the owner and operator that the petroleum underground storage tank is ineligible for delivery and it is unlawful for any person to deliver to, deposit into, or accept a regulated petroleum substance into the petroleum underground storage tank; ()
- c. The effective date the petroleum underground storage tank is deemed ineligible for delivery; ()
- d. The name and address of the department representative to whom a written request for re-inspection can be made, if a re-inspection is necessary; ()
- e. A statement regarding the right to appeal the Department's action regarding ineligible classification pursuant to IDAPA 58.01.23, "Rules of Administrative Procedure Before the Board of Environmental Quality"; and ()
- f. The option to request a compliance conference pursuant to Subsection 500.07. ()

07. Compliance Conference. The owner or operator may request a compliance conference with the Department within fifteen (15) days of receipt of the notice. A compliance conference shall be scheduled within twenty (20) days and conducted in an informal manner by the Department. At the compliance conference, the owner or operator may explain why he believes the petroleum underground storage tank should not be classified as ineligible. During the compliance conference, the owner or operator and the Department will identify and establish appropriate acts and a time schedule for compliance as necessary. ()

08. Duration of Ineligible Classification. The classification of a petroleum underground storage tank as ineligible shall remain in effect until the conditions cited in the notice no longer exist. If the Department determines that an ineligible storage tank has returned to compliance and is now eligible for delivery, deposit, or acceptance of a regulated petroleum substance, the Department or an authorized designee shall, as soon as practicable, remove the red tag from the petroleum underground storage tank and also remove the petroleum underground storage tank from the ineligible list posted on its website. The Department will also send a written notice to the owner and operator that an ineligible storage tank has returned to compliance and is now eligible for delivery,

deposit, or acceptance of a regulated petroleum substance. ()

09. Declining Classification. The Director may decline to classify a petroleum underground storage tank as ineligible if the Director decides that classifying the petroleum underground storage tank as ineligible for delivery, deposit, or acceptance is not in the best interest of the public. ()

a. The Director may only defer application of delivery prohibition for up to one hundred eighty (180) days after determining a petroleum underground storage tank is ineligible for delivery, deposit, or acceptance of a regulated petroleum substance. ()

b. The Director may authorize the delivery, deposit, or acceptance of product into an ineligible petroleum underground storage tank if such activity is necessary to test or calibrate the underground storage tank or dispenser system. ()

10. Department Authority. Nothing in Section 500 shall affect or preempt the authority of the Department to prohibit the delivery, deposit, or acceptance of a regulated petroleum substance to a petroleum underground storage tank under other existing authorities. ()

11. Proper Notice. A person shall not be in violation of Subsection 500.01 if the Department fails to provide the notice required by Subsections 500.04 and 500.05. ()

12. Unlawful to Tamper with Red Tag. It shall be unlawful for any person to tamper with and/or remove the red tag without the Department's approval. ()

501. -- 599. (RESERVED)

600. PETROLEUM UNDERGROUND STORAGE TANK DATABASE.

01. Maintenance. The Department shall maintain a database which provides details on the status of all petroleum underground storage tanks in the state of Idaho which are subject to regulation. The database shall be updated no less than the end of each calendar quarter. ()

02. Identification. The database shall identify any tanks subject to delivery prohibition. ()

03. Petition. Petroleum underground storage tank owners or operators may petition the Department to correct any inaccurate information for their tanks and the Department shall correct any such inaccurate information within thirty (30) days after verification. ()

04. Availability. The database shall be available to the public on the Department's website at www.deq.idaho.gov. ()

601. FEE SCHEDULE FOR UNDERGROUND STORAGE TANKS.

All regulated underground storage tanks shall pay an annual underground storage tank fee provided in Section 39-119, Idaho Code. The fee shall be assessed to regulated underground storage tanks as provided in Section 601. ()

01. Fee Criteria. ()

a. Compartment and siphon-manifolded underground storage tanks shall be treated as separate underground storage tanks. ()

b. Temporarily out of use tanks are included in Section 601. ()

02. Fee Amount and Schedule. ()

a. Annual fees shall be paid for each fee year beginning January 2, 2018, and continuing for each succeeding year. ()

b. The annual fee per underground storage tank is one hundred dollars (\$100). The annual fee shall not exceed one hundred dollars (\$100) and will be re-calculated each year if the fee balance exceeds thirty-five thousand dollars (\$35,000). Any fee balance above thirty-five thousand dollars (\$35,000) will be used to reduce the following year's fee. ()

c. New underground storage tanks installed after January 2 will not pay a fee until the following January. ()

03. Billing. ()

a. An annual fee invoice will be generated and mailed in November for each owner listed in the Department's Underground Storage Tank Database. ()

b. Owners will have one (1) month to notify the Department in writing if the number of underground storage tanks is incorrect. ()

04. Payment. Payment of the annual fee shall be due on January 2, unless it is a Saturday, a Sunday, or a legal holiday, in which event the payment shall be due on the successive business day. Fees paid by check or money order shall be made payable to the Idaho Department of Environmental Quality and sent to 1410 North Hilton Street, Boise, ID 83706-1255. ()

05. Delinquent Unpaid Fees. An owner will be delinquent in payment if the annual fee has not been received by the Department by March 1. ()

06. Enforcement. Failure to comply with Section 601 shall be subject to enforcement and penalties pursuant to the enforcement provisions of Section 39-108, Idaho Code, (Idaho Environmental Protection and Health Act), and Section 39-8811(2), Idaho Code, (Idaho Underground Storage Tank Act). ()

07. Nonrefundable. The annual fee required by these rules shall be nonrefundable. ()

08. Fee Report. Prior to February 1 of each year, the Director shall report to the Governor and the Idaho Legislature on the use of fees collected the previous year. At a minimum, the report shall include: ()

a. A list of all tanks subject to inspection; ()

b. The type of inspection and regulatory authority or guidance used; and ()

c. A detailed accounting of how fee funds were spent. ()

602. -- 999. (RESERVED)

58.01.08 – IDAHO RULES FOR PUBLIC DRINKING WATER SYSTEMS

000. LEGAL AUTHORITY.

The Idaho Legislature has given the Idaho Board of Environmental Quality the authority to promulgate rules governing quality and safety of drinking water, pursuant to Title 37, Chapter 21 and Title 39, Chapter 1, Idaho Code.

()

001. TITLE AND SCOPE.

01. Title. These rules are titled IDAPA 58.01.08, “Idaho Rules for Public Drinking Water Systems.”

()

02. Scope. The purpose of these rules is to control and regulate the design, construction, operation, maintenance, and quality control of public drinking water systems to provide a degree of assurance that such systems are protected from contamination and maintained free from contaminants which may injure the health of the consumer.

()

002. INCORPORATION BY REFERENCE AND AVAILABILITY OF REFERENCED MATERIALS.

01. Incorporation by Reference. The following documents are incorporated by reference into these rules.

()

a. [40 CFR Part 141](#), revised as of July 1, 2015 (excluding annual monitoring provisions in 40 CFR 141.854(a)(4),(d),(e),(f) and (h), and the Aircraft Drinking Water Rule in Subsection X), and [40 CFR Part 143](#), revised as of July 1, 2011. Any reference in these rules to requirements, procedures, or specific forms contained in any section or subsection of 40 CFR Parts 141 and 143 shall constitute the full adoption by reference of that section or subsection, including any notes and appendices therein, unless expressly provided otherwise in these rules.

()

b. American Water Works Association (AWWA) Standards, effective December 2009, available for a fee from the AWWA, 6666 West Quincy Avenue, Denver, Colorado 80235, Telephone (800) 926-7337, <http://apps.awwa.org/ebusmain/OnlineStore.aspx>.

()

02. Availability of Specific Referenced Material. Copies of specific documents referenced within these rules are available at the following locations:

()

a. All federal regulations: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, Telephone (202)783-3238; U.S. Government Bookstore, Room 194, Federal Bldg., 915 Second Ave., Seattle, WA 98174, (206) 553-4270; or [Online at http://www.gpoaccess.gov/ecfr/index.html](http://www.gpoaccess.gov/ecfr/index.html).

()

b. All documents incorporated by reference are available for review at the Department of Environmental Quality, 1410 N. Hilton, Boise, ID 83706-1255, (208) 373-0502.

()

c. Recommended Standards for Water Works: a report of the Water Supply Committee of the Great Lakes -- Upper Mississippi River Board of State and Provincial Public Health and Environmental Managers, published by Health Education Services, P.O. 03. Precedence. In the event of conflict or inconsistency between the language in these rules and that found in any document incorporated by reference, these rules shall prevail. ()

003. DEFINITIONS.

The definitions set forth in 40 CFR 141.2 are herein incorporated by reference except for the definition of the terms “action level,” “disinfection,” “noncommunity water system,” and “person.” ()

01. Action Level. The concentration of lead or copper in water that determines, in some cases, whether a water system must install corrosion control treatment, monitor source water, replace lead service lines, or undertake

- a public education program. ()
- 02. Administrator.** The Administrator of the United States Environmental Protection Agency. ()
- 03. Annual Samples.** Samples that are required once per calendar year. ()
- 04. Annular Opening.** As used in well construction, this term refers to the nominal inside diameter of the borehole minus the outside diameter of the casing divided by two (2). ()
- 05. Aquifer.** A geological formation of permeable saturated material, such as rock, sand, gravel, etc., capable of yielding an economic quantity of water to wells and springs. ()
- 06. Average Day Demand.** The volume of water used by a system on an average day based on a one (1) year period. See also the definition of Water Demand in these rules. ()
- 07. Backflow.** The reverse from normal flow direction in a plumbing system or water system caused by back pressure or back siphonage. ()
- 08. Bag Filters.** Pressure-driven separation devices that remove particulate matter larger than one (1) micrometer using an engineered porous filtration media. They are typically constructed of a non-rigid, fabric filtration media housed in a pressure vessel in which the direction of flow is from the inside of the bag to the outside. ()
- 09. Bank Filtration.** A water treatment process that uses a well to recover surface water that has naturally infiltrated into ground water through a river bed or bank(s). Infiltration is typically enhanced by the hydraulic gradient imposed by a nearby pumping water supply or other well(s). ()
- 10. Board.** The Idaho Board of Environmental Quality. ()
- 11. Capacity.** The capabilities required of a public drinking water system in order to achieve and maintain compliance with these rules and the requirements of the federal Safe Drinking Water Act. It is divided into three (3) main elements: ()
- a.** Technical capacity means the system has the physical infrastructure to consistently meet drinking water quality standards and treatment requirements and is able to meet the requirements of routine and emergency operations. It further means the ability of system personnel to adequately operate and maintain the system and to otherwise implement technical knowledge. Training of operator(s) is required, as appropriate, for the system size and complexity. ()
- b.** Financial capacity means the financial resources of the water system, including an appropriate budget; rate structure; cash reserves sufficient for current operation and maintenance, future needs and emergency situations; and adequate fiscal controls. ()
- c.** Managerial capacity means that the management structure of the water system embodies the aspects of water system operations, including, but not limited to; ()
- i.** Short and long range planning; ()
- ii.** Personnel management; ()
- iii.** Fiduciary responsibility; ()
- iv.** Emergency response; ()
- v.** Customer responsiveness; ()

- vi. Source water protection; ()
- vii. Administrative functions such as billing and consumer awareness; and ()
- viii. Ability to meet the intent of the federal Safe Drinking Water Act. ()

12. Cartridge Filters. Pressure-driven separation devices that remove particulate matter larger than one (1) micrometer using an engineered porous filtration media. They are typically constructed as rigid or semi-rigid, self-supporting filter elements housed in pressure vessels in which flow is from the outside of the cartridge to the inside. ()

13. Clean Compliance History. For the purposes of the Revised Total Coliform Rule in Subsection 100.01, clean compliance history means a record of no maximum contaminant level violations under Subsection 050.05, no monitoring violations under Subsection 100.01, and no coliform treatment technique trigger exceedances or treatment technique violations under Subsection 100.01. ()

14. Combined Distribution System. The interconnected distribution system consisting of the distribution systems of wholesale systems and of the consecutive systems that receive finished water. ()

15. Community Water System. A public water system which serves at least fifteen (15) service connections used by year-round residents or regularly serves at least twenty-five (25) year-round residents. See also the definition of a Public Drinking Water System in these rules. ()

16. Components of Finished Water Storage. Storage is available to serve the system if the storage structure or facility is elevated sufficiently or is equipped with sufficient booster pumping capability to pressurize the system. Components of finished water storage are further defined as: ()

a. Dead Storage. Storage that is either not available for use in the system or can provide only substandard flows and pressures. ()

b. Effective Storage. Effective storage is all storage other than dead storage and is made up of the additive components described in Paragraphs c. through f. of this Subsection. ()

c. Operational Storage. Operational storage supplies water when, under normal conditions, the sources are off. This component is the larger of; ()

i. The volume required to prevent excess pump cycling and ensure that the following volume components are full and ready for use when needed; or ()

ii. The volume needed to compensate for the sensitivity of the water level sensors. ()

d. Equalization Storage. Storage of finished water in sufficient quantity to compensate for the difference between a water system's maximum pumping capacity and peak hour demand. ()

e. Fire Suppression Storage. The water needed to support fire flow in those systems that provide it. ()

f. Standby Storage. Standby storage provides a measure of reliability or safety factor should sources fail or when unusual conditions impose higher than anticipated demands. Normally used for emergency operation, if standby power is not provided, to provide water for eight (8) hours of operation at average day demand. ()

17. Composite Correction Program (CCP). A systematic approach to identifying opportunities for improving the performance of water treatment and implementing changes that will capitalize on these opportunities. The CCP consists of two (2) elements: ()

a. Comprehensive Performance Evaluation (CPE). A thorough review and analysis of a treatment plant's performance-based capabilities and associated administrative, operation, and maintenance practices. It is

conducted to identify factors that may be adversely impacting a plant's capability to achieve compliance and emphasizes approaches that can be implemented without significant capital improvements. The CPE must consist of at least the following components: assessment of plant performance; evaluation of major unit processes; identification and prioritization of performance limiting factors; assessment of the applicability of comprehensive technical assistance; and preparation of a CPE report. ()

b. Comprehensive Technical Assistance (CTA). The implementation phase that is carried out if the CPE results indicate improved performance potential. During the CTA phase, the system must identify and systematically address plant-specific factors. The CTA consists of follow-up to the CPE results, implementation of process control priority setting techniques, and maintaining long term involvement to systematically train staff and administrators. ()

18. Compositing of Samples. The mixing of up to five (5) samples by the laboratory. ()

19. Confining Layer. A nearly impermeable subsurface stratum which is located adjacent to one (1) or more aquifers and does not yield a significant quantity of water to a well. ()

20. Confirmation Sample. A sample of water taken from the same point in the system as the original sample and at a time as soon as possible after the original sample was taken. ()

21. Connection. Each structure, facility, or premises which is connected to a water system, and which is or could be used for domestic purposes, is considered a single connection. A single family residence is considered to be a premises. Multi-family dwellings and apartment, condominium, and office complexes are considered single connections unless individual units are billed separately for water by the water system, in which case each such unit shall be considered a single connection. ()

22. Consecutive System. A public water system that receives some or all of its finished water from one (1) or more wholesale systems. Delivery may be through a direct connection or through the distribution system of one (1) or more consecutive systems. ()

23. Consumer. Any person served by a public water system. ()

24. Consumer Confidence Report (CCR). An annual report that community water systems must deliver to their customers. The reports must contain information on the quality of the water delivered by the systems and characterize the risks (if any) from exposure to contaminants detected in the drinking water in an accurate and understandable manner. ()

25. Contaminant. Any physical, chemical, biological, or radiological substance or matter in water. ()

26. Cross Connection. Any actual or potential connection or piping arrangement between a public or a consumer's potable water system and any other source or system through which it is possible to introduce into any part of the potable water system used water, water from any source other than an approved public water system, industrial fluid, gas or substance other than the intended potable water with which the system is supplied. Cross connections include bypass arrangements, jumper connections, removable sections, swivel or change-over devices and other temporary or permanent devices which, or because of which "backflow" can or may occur. ()

27. Dead End Main. A distribution main of any diameter and length that does not loop back into the distribution system. ()

28. Dead Storage. Storage that is either not available for use in the system or can provide only substandard flows and pressures. See also the definition of Components of Finished Water Storage in these rules. ()

29. Department. The Idaho Department of Environmental Quality. ()

30. Director. The Director of the Department of Environmental Quality or his designee. ()

- 31. Direct Integrity Test (DIT).** A physical test applied to a microfiltration or ultrafiltration membrane unit in order to identify integrity breaches. ()
- 32. Disinfection.** Introduction of chlorine, other agents, or processes that are approved by the Department (such as ultraviolet light) in sufficient concentration, dosage, or application, and for the time required to kill or inactivate pathogenic and indicator organisms. ()
- 33. Disinfection Profile.** A summary of daily *Giardia lamblia* inactivation through the drinking water treatment plant. The procedure for developing a disinfection profile is contained in 40 CFR 141.172 and 40 CFR 141.530-141.536. ()
- 34. Distribution System.** Any combination of pipes, tanks, pumps, and other equipment which delivers water from the source(s), treatment facility(ies), or a combination of source(s) and treatment facility(ies) to the consumer. Chlorination may be considered as a function of a distribution system. ()
- 35. Drinking Water.** Means “water for human consumption.” ()
- 36. Drinking Water System.** All mains, pipes, and structures through which water is obtained and distributed, including wells and well structures, intakes and cribs, pumping stations, treatment plants, reservoirs, storage tanks and appurtenances, collectively or severally, actually used or intended for use for the purpose of furnishing water for drinking or general domestic use. ()
- 37. Dual Sample Set.** A set of two (2) samples collected at the same time and same location, with one (1) sample analyzed for TTHM and the other sample analyzed for HAA5. Dual sample sets are collected for the purposes of conducting an Initial Distribution System Evaluation (40 CFR Part 141, Subpart U) and for determining compliance with the TTHM and HAA5 MCLs under the Stage 2 Disinfection Byproducts Requirements (40 CFR Part 141, Subpart V). ()
- 38. Effective Contact Time.** For the purpose of these rules, effective contact time means the time in minutes that it takes for water to move from the point of completely mixed chemical application to the point where residual concentration is measured. It is the “T” in contact time (CT) calculations and is either “demonstrated” or “calculated.” It is the contact time sufficient to achieve the inactivation of target pathogens under the expected range of raw water pH and temperature variation and must be demonstrated through tracer studies or other evaluations or calculations acceptable to the Department. “Improving Clearwell Design for CT Compliance,” referenced in Subsection 002.02, contains information that may be used as guidance for these calculations. ()
- 39. Effective Storage.** Effective storage is all storage other than dead storage and is made up of the additive components described in Paragraphs c. through f. of the definition of Components of Finished Water Storage in these rules. ()
- 40. Enhanced Coagulation.** The addition of sufficient coagulant for improved removal of disinfection byproduct precursors by conventional filtration treatment. Conventional filtration treatment is defined in 40 CFR 141.2. ()
- 41. Enhanced Softening.** The improved removal of disinfection byproduct precursors by precipitative softening. ()
- 42. Equalization Storage.** Storage of finished water in sufficient quantity to compensate for the difference between a water system’s maximum pumping capacity and peak hour demand. See also the definition of Components of Finished Water Storage in these rules. ()
- 43. Equivalent Dwelling Unit (EDU).** A unit of measure that standardizes all land use types (housing, retail, office, etc.) to the level of demand created by a single-family detached housing unit within a water system. The demand for one (1) equivalent dwelling unit is equivalent to the amount of water provided to the average single-family detached housing unit within a water system. For example, a business designed to use three (3) times as much water as an average single-family detached housing unit would have a demand of three (3) equivalent dwelling units. ()

()

44. Exemption. A temporary deferment of compliance with a maximum contaminant level or treatment technique requirement which may be granted only if the system demonstrates to the satisfaction of the Department that the system cannot comply due to compelling factors and the deferment does not cause an unreasonable risk to public health. ()

45. Facility Plan. The facility plan for a public drinking water system describes the overall system, including sources of water, treatment processes and facilities, pumping stations and distribution piping, finished water storage, and waste disposal. It is a comprehensive planning document for infrastructure and includes a plan for the future of the system/facility, including upgrades and additions. It is usually updated on a regular basis due to anticipated or unanticipated growth patterns, regulatory requirements, or other infrastructure needs. A facility plan is sometimes referred to as a master plan or facilities planning study. In general, a facility plan is an overall system-wide plan as opposed to a project specific plan. ()

46. Facility Standards and Design Standards. Facility standards and design standards are described in Sections 500 through 552 of these rules. Facility and design standards found in Sections 500 through 552 of these rules must be followed in the planning, design, construction, and review of public drinking water facilities. ()

47. Fee Assessment. A charge assessed on public drinking water systems based on a rate structure calculated by system size. ()

48. Filter Profile. A graphical representation of individual filter performance, based on continuous turbidity measurements or total particle counts versus time for an entire filter run, from startup to backwash inclusively, that includes an assessment of filter performance while another filter is being backwashed. ()

49. Filtrate. As the term relates to microfiltration and ultrafiltration, the product water or the portion of the feed stream that has passed through the membrane. ()

50. Finished Water. Water that is introduced into the distribution system of a public water system and is intended for distribution and consumption without further treatment, except as necessary to maintain water quality in the distribution system (e.g., booster disinfection, addition of corrosion control chemicals). ()

51. Finished Water Storage Structures or Facilities. Finished water storage structures or facilities are defined as: ()

a. Above-ground storage structure or facility. A finished water storage structure or facility with a bottom elevation above normal ground surface. ()

b. Ground-level storage structure or facility. A finished water storage structure or facility with a bottom elevation at normal ground surface. ()

c. Partially buried storage structure or facility. A finished water storage structure or facility with a bottom elevation below normal ground surface and any portion of the structure or facility above normal ground surface. ()

d. Below-ground storage structure or facility. A finished water storage structure or facility with a bottom elevation and top elevation below normal ground surface. ()

52. Fire Flow Capacity. The water system capacity, in addition to maximum day demand, that is available for fire fighting purposes within the water system or distribution system pressure zone. Adequacy of the water system fire flow capacity is determined by the local fire authority or through a hydraulic analysis performed by a licensed professional engineer to establish required fire flows in accordance with the International Fire Code as adopted by the State Fire Marshal. ()

53. Fire Suppression Storage. The water needed to support fire flow in those systems that provide it. See also the definition of Components of Finished Water Storage in these rules. ()

54. Fixture Protection. The practice of installing backflow prevention assemblies or devices to isolate one (1) or more cross connections within a customer's facility. ()

55. Flowing Stream. As used in the Long Term 2 Enhanced Surface Water Treatment Rule (40 CFR Part 141, Subpart W), this term means a course of running water flowing in a definite channel. ()

56. Flux. The throughput of a pressure-driven membrane filtration process expressed as flow per unit of membrane area, usually in gallons per square foot per day or liters per hour per square meter. ()

57. Ground Water System. A public water system which is supplied exclusively by a ground water source or sources. ()

58. Ground Water Under the Direct Influence of Surface Water (GWUDI). Any water beneath the surface of the ground with significant occurrence of insects or other macroorganisms, algae, or large diameter pathogens such as *Giardia lamblia* or *Cryptosporidium*, or significant and relatively rapid shifts in water characteristics such as turbidity, temperature, conductivity, or pH which closely correlate to climatological or surface water conditions. Direct influence shall be determined by the Department for individual sources. The determination of direct influence may be based on site-specific measurements of water quality, documentation of well construction characteristics and geology with field evaluation, a combination of water quality and documentation, or other information required by the Department. ()

59. Haloacetic Acids (Five) (HAA5). The sum of the concentrations in milligrams per liter of the haloacetic acid compounds (monochloroacetic acid, dichloroacetic acid, trichloroacetic acid, monobromoacetic acid, and dibromoacetic acid) rounded to two (2) significant figures after addition. ()

60. Health Hazards. Any condition which creates, or may create, a danger to the consumer's health. Health hazards may consist of, but are not limited to, design, construction, operational, structural, collection, storage, distribution, monitoring, treatment or water quality elements of a public water system. See also the definition of Significant Deficiency, which refers to a health hazard identified during a sanitary survey. ()

61. Indirect Integrity Monitoring. Monitoring some aspect of filtrate water quality that is indicative of the removal of particulate matter. ()

62. Inorganic. Generally refers to compounds that do not contain carbon and hydrogen. ()

63. Internal or In-Plant Isolation. The practice of installing backflow prevention assemblies to protect an area within a water customer's structure, facility, or premises from contaminating another part of the structure, facility, or premises. ()

64. Lake/Reservoir. As used in the Long Term 2 Enhanced Surface Water Treatment Rule (40 CFR Part 141, Subpart W), this term means a natural or man-made basin or hollow on the Earth's surface in which water collects or is stored that may or may not have a current or single direction of flow. ()

65. Level 1 Assessment. A Level 1 Assessment is an evaluation to identify the possible presence of sanitary defects, defects in distribution system coliform monitoring practices, and (when possible) the likely reason that the system triggered the assessment. It is conducted by the system operator or owner. Minimum elements include review and identification of atypical events that could affect distributed water quality or indicate that distributed water quality was impaired; changes in distribution system maintenance and operation that could affect distributed water quality (including water storage); source and treatment considerations that bear on distributed water quality, where appropriate (e.g., whether a ground water system is disinfected); existing water quality monitoring data; and inadequacies in sample sites, sampling protocol, and sample processing. The system must conduct the assessment consistent with any Department directives that tailor specific assessment elements with respect to the size and type of the system and the size, type, and characteristics of the distribution system. ()

66. Level 2 Assessment. A Level 2 Assessment is an evaluation to identify the possible presence of sanitary defects, defects in distribution system coliform monitoring practices, and (when possible) the likely reason

that the system triggered the assessment. A Level 2 assessment provides a more detailed examination of the system (including the system's monitoring and operational practices) than does a Level 1 assessment through the use of more comprehensive investigation and review of available information, additional internal and external resources, and other relevant practices. It is conducted by an individual approved by the Department in accordance with Subsection 305.03, which may include the system operator. Minimum elements include review and identification of atypical events that could affect distributed water quality or indicate that distributed water quality was impaired; changes in distribution system maintenance and operation that could affect distributed water quality (including water storage); source and treatment considerations that bear on distributed water quality, where appropriate (e.g., whether a ground water system is disinfected); existing water quality monitoring data; and inadequacies in sample sites, sampling protocol, and sample processing. ()

67. License. A physical document issued by the Idaho Division of Occupational and Professional Licenses certifying that an individual has met the appropriate qualifications and has been granted the authority to practice in Idaho under the provisions of Chapter 24, Title 54, Idaho Code. ()

68. Locational Running Annual Average (LRAA). The average of sample analytical results for samples taken at a particular monitoring location during the previous four (4) calendar quarters, as set forth in the Stage 2 Disinfection Byproducts Requirements (40 CFR Part 141, Subpart V). ()

69. Log. Logarithm to the base ten (10). In the context of these rules, it is used in the determination of removal or inactivation efficiencies. It is expressed as the logarithm to the base ten (10) or "log" of the concentration of the feed or raw water minus the log of the concentration in the filtrate or product water. For example, if the incoming feed or raw water concentration is one hundred (100), and the outgoing filtrate or product water concentration is ten (10), a 10-fold reduction was attained; or 1-log removal. 1-log removal also equates to ninety percent (90%) removal, as ninety (90) of the original feed concentration counts had been removed, leaving ten (10) in the filtrate. Similarly, 2-log equates to ninety-nine percent (99%) removal. ()

70. Log Removal Value (LRV). LRV is a measure of filtration removal efficiency for a target organism, particulate, or surrogate expressed as Logarithm to the base ten (10). ()

71. Material Deviation. A change from the design plans that significantly alters the type or location of facilities, requires engineering judgment to design, or impacts the public safety or welfare. ()

72. Material Modification. Those modifications of an existing public water system that are intended to increase system capacity or alter the methods or processes employed. Any project that adds source water to a system, increases the pumping capacity of a system, increases the potential population served by the system or the number of service connections within the system, adds new or alters existing drinking water system components, or affects the water demand of the system is considered to be increasing system capacity or altering the methods or processes employed. Maintenance and repair performed on the system and the replacement of valves, pumps, or other similar items with new items of the same size and type are not considered a material modification. ()

73. Maximum Contaminant Level (MCL). The maximum permissible level of a contaminant in water which is delivered to any user of a public water system. ()

74. Maximum Day Demand. The average rate of consumption for the twenty-four (24) hour period in which total consumption is the largest for the design year. See also the definition of Water Demand in these rules. ()

75. Maximum Pumping Capacity. The pumping capacity with the largest source or pump out of service. ()

76. Maximum Residual Disinfectant Level (MRDL). A level of a disinfectant added for water treatment that may not be exceeded at the consumer's tap without an unacceptable possibility of adverse health effects. For chlorine and chloramines, a public water system is in compliance with the MRDL, when the running annual average of monthly averages of samples taken in the distribution system, computed quarterly, is less than or equal to the MRDL. For chlorine dioxide, a public water system is in compliance with the MRDL when daily samples are taken at the entrance to the distribution system and no two (2) consecutive daily samples exceed the MRDL.

MRDLs are enforceable in the same manner as maximum contaminant levels under Section 1412 of the Safe Drinking Water Act. There is convincing evidence that addition of a disinfectant is necessary for control of waterborne microbial contaminants. Notwithstanding the MRDLs listed in 40 CFR 141.65, operators may increase residual disinfectant levels of chlorine or chloramines (but not chlorine dioxide) in the distribution system to a level and for a time necessary to protect public health to address specific microbiological contamination problems caused by circumstances such as distribution line breaks, storm runoff events, source water contamination, or cross-connections. ()

77. Maximum Residual Disinfectant Level Goal (MRDLG). The maximum level of a disinfectant added for water treatment at which no known or anticipated adverse effect on the health of persons would occur, and which allows an adequate margin of safety. MRDLGs are nonenforceable health goals and do not reflect the benefit of the addition of the chemical for control of waterborne microbial contaminants. ()

78. Membrane Filtration. A pressure or vacuum driven separation process in which particulate matter larger than one (1) micrometer (μm) is rejected by an engineered barrier, primarily through a size-exclusion mechanism. This definition includes the common membrane technologies of microfiltration, ultrafiltration, nanofiltration, and reverse osmosis. ()

79. Membrane Unit. A group of treatment systems or membrane modules that usually share common control and valving so that the group can be isolated for testing or cleaning. ()

80. Method Detection Limit (MDL). The lowest concentration which can be determined to be greater than zero with ninety-nine percent (99%) confidence, for a particular analytical method. ()

81. Microfiltration (MF). A low pressure membrane filtration process with pore diameter normally in the range of 0.1 to 0.5 μm . ()

82. Module. As the term relates to membrane filtration, it is the smallest component of a membrane unit in which a specific membrane surface area is housed. The component is typically equipped with a feedwater inlet, a filtrate outlet, and concentrate or backwash outlet structure. ()

83. Nanofiltration (NF). A membrane filtration process that removes dissolved constituents from water. Nanofiltration is similar to reverse osmosis but allows a higher percentage of certain ions to pass through the membrane. These systems typically operate under higher pressure than microfiltration and ultrafiltration. ()

84. New System. Any water system that meets, for the first time, the definition of a public water system provided in Section 1401 of the federal Safe Drinking Water Act (42 U.S.C. Section 300f). This includes systems that are entirely new construction and previously unregulated systems that are expanding. ()

85. Noncommunity Water System. A public water system that is not a community water system. A non-community water system is either a transient noncommunity water system or a non-transient noncommunity water system. See also the definition of a Public Drinking Water System in these rules. ()

86. Non-Potable Fluids. Any fluids that do not meet the definition of potable water. This definition also includes any gases that are heavier than air such as propane. ()

87. Non-Potable Mains. Pipelines that collect, deliver, or otherwise convey non-potable fluids. ()

88. Non-Potable Services or Lines. Pipelines that collect, deliver, or otherwise convey non-potable fluids to or from a non-potable main. These pipelines connect individual facilities to the non-potable main. This term also refers to pipelines that convey non-potable fluids from a pressurized irrigation system, reclaimed wastewater system, and other non-potable systems to individual consumers. ()

89. Nontransient Noncommunity Water System. A public water system that is not a community water system and that regularly serves at least twenty-five (25) of the same persons over six (6) months per year. See also the definition of a Public Drinking Water System in these rules. ()

90. Operating Shift. That period of time during which water system operator decisions that affect public health are necessary for proper operation of the system. ()

91. Operational Storage. Operational storage supplies water when, under normal conditions, the sources are off. This component is the larger of the volume required to prevent excess pump cycling and ensure that the following volume components are full and ready for use when needed or the volume needed to compensate for the sensitivity of the water level sensors. See also the definition of Components of Finished Water Storage in these rules. ()

92. Operation and Maintenance Manual. An operation and maintenance manual typically covers three main subjects: a water system specific operations plan (see definition of Operations Plan); maintenance information and checklists; and manufacturer's product information (including trouble shooting information, a parts list and parts order form, special tools, spare parts list, etc.). An operation and maintenance manual may cover every aspect of the water system or any part of the water system, including but not limited to the following: treatment, pump stations, storage reservoirs, distribution system, pressure reducing valve stations, etc. ()

93. Operations Plan. The operations plan is part of an operation and maintenance manual. Depending on which facilities of the water system are being addressed, the operations plan may cover many types of information including but not limited to the following: daily, weekly, monthly, and yearly operating instructions; information specific to a particular type of treatment; location of valves and other key distribution system features; pertinent telephone and address contact information including the responsible charge water system operator and water system owner; operator safety procedures; alarm system; emergency procedures; trouble-shooting advice; water quality testing; depressurization events; customer service; and response to customer complaints. ()

94. Owner/Purveyor of Water/Supplier of Water. The person, company, corporation, association, or other organizational entity which holds legal title to the public water system, who provides, or intends to provide, drinking water to the customers, and who is ultimately responsible for the public water system operation. ()

95. Peak Hour Demand. The highest hourly flow, excluding fire flow, that a water system or distribution system pressure zone is likely to experience in the design year. See also the definition of Water Demand in these rules. ()

96. Person. A human being, municipality, or other governmental or political subdivision or other public agency, or public or private corporation, any partnership, firm, association, or other organization, any receiver, trustee, assignee, agent or other legal representative of the foregoing or other legal entity. ()

97. Pesticides. Substances which meet the criteria for regulation pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, and any regulations adopted pursuant to FIFRA. For example, pesticides include, but are not limited to insecticides, fungicides, rodenticides, herbicides, and algaecides. ()

98. Plant Design Capacity. The maximum design flow through treatment units. The minimum plant design capacity could be equal to peak hour demand but could also be equal to the maximum day demand if equalization storage is provided. ()

99. Plant. A physical facility where drinking water or wastewater is treated or processed. ()

100. Point of Use (POU) Treatment Device. A treatment device applied to a single tap used for the purpose of reducing contaminants in drinking water at that one tap. ()

101. Point of Use (POU) Treatment System. A collection of POU treatment devices. ()

102. Potable Mains. Pipelines that deliver potable water to multiple service connections. ()

103. Potable Services. Pipelines that convey potable water from a connection to the potable water main to individual consumers. ()

104. Potable Water. Water for human consumption. See the definition of Water for Human Consumption in Section 003. ()

105. Preliminary Engineering Report. The preliminary engineering report for a public drinking water system facility is a report that addresses specific portions of the system or facility for which modifications are being designed. Modifications may include, but are not limited to, significant changes to existing processes or facilities, system expansion, addition of treatment, or installation of other processes and facilities. This report addresses specific purpose and scope, design requirements, alternative solutions, costs, operation and maintenance requirements, and other requirements as described in Section 503. Preliminary engineering reports are generally project specific as opposed to an overall system-wide plan, such as a facility plan. ()

106. Premises Isolation or Containment. The practice of separating the customer's structure, facility, or premises from the purveyor's system by means of a backflow prevention assembly installed on the service line before any distribution takes place. ()

107. Presedimentation. A preliminary treatment process used to remove gravel, sand, and other particulate material from the source water through settling before the water enters the primary clarification and filtration processes in a treatment plant. ()

108. Protected Water Source. For the purposes of the Revised Total Coliform Rule (40 CFR Part 141, Subpart Y), a protected water source is a ground water well that is not susceptible to contamination on the basis of well construction, hydrologic data, or contamination history. ()

109. Public Notice. The notification of public water system consumers of information pertaining to that water system including information regarding water quality or compliance status of the water system. ()

110. Public Drinking Water System. A system for the provision to the public of water for human consumption through pipes or, after August 5, 1998, other constructed conveyances, if such system has at least fifteen (15) service connections, regardless of the number of water sources or configuration of the distribution system, or regularly serves an average of at least twenty-five (25) individuals daily at least sixty (60) days out of the year. Such term includes: any collection, treatment, storage, and distribution facilities under the control of the operator of such system and used primarily in connection with such system; and any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system. Such term does not include any "special irrigation district." A public water system is either a "community water system" or a "noncommunity water system" as further defined as: ()

a. Community water system. A public water system which serves at least fifteen (15) service connections used by year-round residents or regularly serves at least twenty-five (25) year-round residents. ()

b. Noncommunity water system. A public water system that is not a community water system. A noncommunity water system is either a transient noncommunity water system or a non-transient noncommunity water system. ()

c. Nontransient noncommunity water system. A public water system that is not a community water system and that regularly serves at least twenty-five (25) of the same persons over six (6) months per year. ()

d. Transient noncommunity public water system. A noncommunity water system which does not regularly serve at least twenty-five (25) of the same persons over six (6) months per year. ()

111. Public Water System/Water System/System. Means "public drinking water system." ()

112. Pump House. A structure containing important water system components, such as a well, hydropneumatic tank, booster pump, pump controls, flow meter, well discharge line, or a treatment unit. Pump houses are often called well houses in common usage, even though in modern construction these structures may not contain either a well or a pump. These terms are used interchangeably in national standards and trade publications. ()

113. Qualified Licensed Professional Engineer (QLPE). A professional engineer licensed by the state

of Idaho; qualified by education or experience in the specific technical fields involved in these rules; and retained or employed by a city, county, quasi-municipal corporation, or regulated public utility for the purposes of plan and specification review. ()

114. Quasi-Municipal Corporation. A public entity, other than community government, created or authorized by the legislature to aid the state in, or to take charge of, some public or state work for the general welfare. For the purpose of these rules, this term refers to drinking water districts. ()

115. Raw Water. Raw water is any ground water, spring water, or surface water utilized as source water prior to treatment for the purpose of producing potable water. ()

116. Redundancy. The installation of duplicate components or backup systems that are designed to maintain minimum pressure and capacity of the system should any component fail or otherwise be out of service for maintenance or repair. ()

117. Regulated Public Utility. For the purpose of these rules, any public water system that falls under the jurisdiction of the Idaho Public Utilities Commission and is subject to the rules thereof. ()

118. Reverse Osmosis (RO). A membrane filtration process that removes dissolved constituents from water. Reverse osmosis is similar to nanofiltration but allows a lower percentage of certain ions to pass through the membrane. These systems typically operate under higher pressure than microfiltration and ultrafiltration. ()

119. Repeat Compliance Period. Any subsequent compliance period after the initial compliance period. ()

120. Resolution. As the term relates to membrane treatment, it is the size of the smallest integrity breach that contributes to a response from a direct integrity test when testing low pressure membranes. ()

121. Responsible Charge (RC). Responsible Charge means active, daily on-site or on-call responsibility for the performance of operations or active, on-going, on-site, or on-call direction of employees and assistants. ()

122. Responsible Charge Operator. An operator of a public drinking water system, designated by the system owner, who holds a valid license at a class equal to or greater than the drinking water system classification, who is in responsible charge of the public drinking water system. ()

123. Reviewing Authority. For those projects requiring preconstruction approval by the Department, the Department is the reviewing authority. For those projects allowing for preconstruction approval by others, pursuant to Subsection 504.03.b. of these rules, the qualified Idaho licensed professional engineer (QLPE) is also the reviewing authority. ()

124. Sampling Point. The location in a public water system from which a sample is drawn. ()

125. Sanitary Defect. A defect that could provide a pathway of entry for microbial contamination into the distribution system or that is indicative of a failure or imminent failure in a barrier that is already in place. Examples of sanitary defects include but are not limited to: cross connections, inadequate distribution system pressures, inadequate or missing sanitary seal, improperly screened storage tank vents, inadequate protection from contamination during flooding, history of treatment failures, deterioration of system components, and water main leaks or breaks. ()

126. Sanitary Survey. An onsite review of the water source, facilities, equipment, operation and maintenance of a public water system for the purpose of evaluating the adequacy of such source, facilities, equipment, operation and maintenance for producing and distributing safe drinking water. The sanitary survey will include, but is not limited to the following elements: ()

a. Source; ()

- b. Treatment; ()
- c. Distribution system; ()
- d. Finished water storage; ()
- e. Pumps, pump facilities, and controls; ()
- f. Monitoring and reporting and data verification; ()
- g. System management and operation; and ()
- h. Operator compliance with state requirements. ()

127. SDWIS-State. An acronym that stands for “Safe Drinking Water Information System-State Version.” It is a software package developed under contract to the U.S. Environmental Protection Agency and used by a majority of U.S. states to collect, maintain, and report data about regulated public water systems. ()

128. Seasonal System. A noncommunity water system that is not operated as a public water system on a year-round basis and starts up and shuts down at the beginning and end of each operating season. ()

129. Sensitivity. As the term relates to membrane treatment, it is the maximum log removal value (LRV) for a specific resolution that can be reliably verified by the direct integrity test associated with a given low pressure membrane filtration system. ()

130. Sewage. The water-carried human or animal waste from residences, buildings, industrial establishments or other places, together with such ground water infiltration and surface water as may be present. ()

131. Significant Deficiency. As identified during a sanitary survey, any defect in a system’s design, operation, maintenance, or administration, as well as any failure or malfunction of any system component, that the Department or its agent determines to cause, or have potential to cause, risk to health or safety, or that could affect the reliable delivery of safe drinking water. See also the definition of Health Hazards. ()

132. Simple Water Main Extension. New or replacement water main(s) that require plan and specification review by a qualified licensed professional engineer (QLPE) or by the Department per these rules and that is connected to existing water main facilities and does not require the addition of system components designed to control quantity or pressure, including, but not limited to, booster stations, new sources, pressure reducing valve stations, or reservoirs; and continues to provide the pressure and quantity requirements of Subsection 552.01. ()

133. Special Irrigation District. An irrigation district in existence prior to May 18, 1994 that provides primarily agricultural service through a piped water system with only incidental residential or similar use where the system or the residential or similar users of the system comply with the exclusion provisions in Section 1401(4)(B)(i)(II) or (III) of the Safe Drinking Water Act. ()

134. Spring. A source of water which flows from a laterally percolating water table's intersection with the surface or from a geological fault that allows the flow of water from an artesian aquifer. ()

135. Standby Storage. Standby storage provides a measure of reliability or safety factor should sources fail or when unusual conditions impose higher than anticipated demands. See also the definition of Components of Finished Water Storage in these rules. ()

136. Substantially Modified. The Department shall consider a public water system to be substantially modified when, as the result of one (1) or more projects, there is a combined increase of twenty-five percent (25%) or more above the system’s existing configuration in the population served or number of service connections, the total length of transmission and distribution water mains, and the peak or average water demand. ()

137. Substitute Responsible Charge Operator. An operator of a public drinking water system who holds a valid license at a class equal to or greater than the drinking water system classification, designated by the system owner to replace and to perform the duties of the responsible charge operator when the responsible charge operator is not available or accessible. ()

138. Surface Water System. A public water system which is supplied by one (1) or more surface water sources or ground water sources under the direct influence of surface water. Also called subpart H systems in applicable sections of 40 CFR Part 141. ()

139. Total Organic Carbon (TOC). Total organic carbon in mg/l measured using heat, oxygen, ultraviolet irradiation, chemical oxidants, or combinations of these oxidants that convert organic carbon to carbon dioxide, rounded to two (2) significant figures. ()

140. Total Trihalomethanes (TTHM). The sum of the concentration in milligrams per liter of the trihalomethane compounds (trichloromethane [chloroform], dibromochloromethane, bromodichloromethane and tribromomethane [bromoform]), rounded to two (2) significant figures. ()

141. Transient Noncommunity Public Water System. A noncommunity water system which does not regularly serve at least twenty-five (25) of the same persons over six (6) months per year. See also the definition of a Public Drinking Water System in these rules. ()

142. Treatment Facility. Any place(s) where a public drinking water system or nontransient noncommunity water system alters the physical or chemical characteristics of the drinking water. Chlorination may be considered as a function of a distribution system. ()

143. Turbidity. A measure of the interference of light passage through water, or visual depth restriction due to the presence of suspended matter such as clay, silt, nonliving organic particulates, plankton and other microscopic organisms. Operationally, turbidity measurements are expressions of certain light scattering and absorbing properties of a water sample. Turbidity is measured by the Nephelometric method. ()

144. Ultrafiltration (UF). A low pressure membrane filtration process with pore diameter normally in the range of five thousandths to one tenth micrometer (0.005 to 0.1 μ m). ()

145. Ultraviolet (UV) Light Technology. A physical disinfection process that has proven effective against common pathogens in drinking water. ()

146. UV Transmittance (UVT). A measure of the fraction of incident light transmitted through a material (e.g., water sample or quartz). The UVT is usually reported for a wavelength of two hundred fifty-four (254) nm and a pathlength of one (1) cm. It is often represented as a percentage. ()

147. Unregulated Contaminant. Any substance that may affect the quality of water but for which a maximum contaminant level or treatment technique has not been established. ()

148. Use Assessment. For the purpose of obtaining a waiver from certain monitoring requirements, a use assessment is an evaluation as to whether synthetic organic contaminants are being or have been used, manufactured, transported, stored, or disposed of in the watershed for surface water or the zone of influence for ground water. ()

149. Variance. A temporary deferment of compliance with a maximum contaminant level or treatment technique requirement which may be granted only when the system demonstrates to the satisfaction of the Department that the raw water characteristics prevent compliance with the MCL or requirement after installation of the best available technology or treatment technique and the deferment does not cause an unreasonable risk to public health. ()

150. Very Small Public Drinking Water System. A Community or Nontransient Noncommunity Public Water System that serves five hundred (500) persons or less and has no treatment other than disinfection or has only treatment which does not require any chemical treatment, process adjustment, backwashing or media ()

regeneration by an operator (e.g. calcium carbonate filters, granular activated carbon filters, cartridge filters, ion exchangers). ()

151. Volatile Organic Chemicals (VOCs). VOCs are lightweight organic compounds that vaporize or evaporate easily. ()

152. Vulnerability Assessment. A determination of the risk of future contamination of a public drinking water supply. ()

153. Waiver. ()

a. For the purposes of these rules, except Sections 500 through 552, “waiver” means the Department approval of a temporary reduction in sampling requirements for a particular contaminant. ()

b. For purposes of Sections 500 through 552, “waiver” means a dismissal of any requirement of compliance. ()

c. For the purposes of Section 010, “waiver” means the deferral of a fee assessment for a public drinking water system. ()

154. Wastewater. Any combination of liquid or water and pollutants from activities and processes occurring in dwellings, commercial buildings, industrial plants, institutions and other establishments, together with any ground water, surface water, and storm water that may be present; liquid or water that is chemically, biologically, physically or rationally identifiable as containing blackwater, gray water or commercial or industrial pollutants; and sewage. See IDAPA 58.01.16, “Wastewater Rules,” for additional information. ()

155. Water for Human Consumption. Water that is used by humans for drinking, bathing for purposes of personal hygiene (including hand-washing), showering, cooking, dishwashing, and maintaining oral hygiene. In common usage, the terms “culinary water,” “drinking water,” and “potable water” are frequently used as synonyms. ()

156. Water Demand. The volume of water requested by system users to satisfy their needs. Water demand can be further categorized as: ()

a. Average day demand. The volume of water used by a system on an average day based on a one (1) year period. ()

b. Maximum day demand. The average rate of consumption for the twenty-four (24) hour period in which total consumption is the largest for the design year. ()

c. Peak hour demand. The highest hourly flow, excluding fire flow, that a water system or distribution system pressure zone is likely to experience in the design year. ()

157. Water Main. A pipe within a public water system which is under the control of the system operator and conveys water to two (2) or more service connections or conveys water to a fire hydrant. The collection of water mains within a given water supply is called the distribution system. ()

158. Watershed. The land area from which water flows into a stream or other body of water which drains the area. ()

159. Wholesale System. A public water system that treats source water as necessary to produce finished water and then delivers some or all of that finished water to another public water system. Delivery may be through a direct connection or through the distribution system of one (1) or more consecutive systems. ()

004. COVERAGE.
40 CFR 141.3 is herein incorporated by reference. ()

005. GENERAL PROVISIONS FOR WAIVERS, VARIANCES, AND EXEMPTIONS.

40 CFR 141.4 is herein incorporated by reference. ()

01. Waivers. ()

a. The Department may waive any requirement of Sections 500 through 552 that is not explicitly imposed by Idaho Statute, if it can be shown to the satisfaction of the Department that the requirement is not necessary for the protection of public health, protection from contamination, and satisfactory operation and maintenance of a public water system. ()

b. The Department may at its discretion waive the requirements outlined in Section 010. ()

c. Waiver of monitoring requirements is addressed in Subsection 100.07. ()

02. Variances. ()

a. General Variances. A variance may be granted by the Department if a public water system submits an application and demonstrates to the satisfaction of the Department that the following minimum requirements as required by 42 USC Section 1415(a) (The Safe Drinking Water Act) are met. These include but are not limited to: ()

i. The system has installed the best available technology, treatment techniques, or other means to comply with the maximum contaminant level; and ()

ii. Alternative sources of water are not reasonably available to the system. ()

iii. For provisions of a national primary drinking water regulation which requires the use of a specific treatment technique with respect to a contaminant, the system must demonstrate that the technique is not necessary to protect the health of the system's customers. ()

b. Small System Variances. A small system variance for a maximum contaminant level or treatment technique may be granted by the Department if a public water system submits an application and demonstrates to the satisfaction of the Department that the following minimum requirements as required by 42 USC Section 1415(e) are met. These include, but are not limited to: ()

i. The system serves three thousand three hundred (3,300) or fewer persons; ()

ii. If the system serves more than three thousand three hundred (3,300) persons but fewer than ten thousand (10,000) persons, the application shall be approved by the U.S. Environmental Protection Agency; ()

iii. The U.S. Environmental Protection Agency has identified a variance technology that is applicable to the size and source water quality conditions of the public water system; ()

iv. The system installs, operates and maintains such treatment technology, treatment technique, or other means; and ()

v. The system cannot afford to comply with a national primary drinking water regulation in accordance with affordability criteria established by the Department, including compliance through treatment, alternative source of water supply, restructuring or consolidation. ()

03. Exemptions. An exemption may be granted by the Department if a public water system submits an application and demonstrates to the satisfaction of the Department that the following minimum requirements as required by 42 USC Section 1416(a) are met. These include but are not limited to: ()

a. The system is unable to comply with a maximum contaminant level or treatment technique due to compelling factors, which may include economic factors; ()

b. The system was in operation by the effective date of such contaminant level or treatment technique and no reasonable source of water is available to the system; or ()

c. If the system was not in operation by the effective date of such contaminant level or treatment technique, then no reasonable alternative source of water is available to the system; and ()

d. The granting of an exemption will not result in an unreasonable risk to health; ()

e. Management or restructuring changes cannot reasonably be made to comply with the contaminant level or treatment technique to improve the quality of the drinking water; ()

f. The system cannot meet the standard without capital improvements which cannot be completed prior to the date established pursuant to 42 USC Section 1412b(10); ()

g. If the system needs financial assistance, the system has entered into an agreement to obtain such financial assistance; or ()

h. The system has entered into an enforceable agreement to become a part of a regional public water system and is taking all practical steps to meet the standard. ()

04. Conditions. A waiver, exemption or variance may be granted upon any conditions that the Department, in its discretion, determines are appropriate. Failure by the public water system to comply with any condition voids the waiver, variance or exemption. ()

05. Public Hearing. The Department shall provide public notice and an opportunity for public hearing in the area served by the public water system before any exemption or variance under Section 005 is granted by the Department. At the conclusion of the hearing, the Department shall record the findings and issue a decision approving, denying, modifying, or conditioning the application. ()

06. Exceptions. Any person aggrieved by the Department's decision on a request for a waiver, variance or exemption may file a petition for a contested case with the Board. Such petitions shall be filed with the Board, as prescribed in, IDAPA 58.01.23, "Rules of Administrative Procedure Before the Board of Environmental Quality." ()

07. Surface Water Variances. Variances from the requirements of Sections 300 through 303 are not allowed. ()

08. Surface Water Exemptions. Exemptions from 40 CFR 141.72(a)(3) and 40 CFR 141.72(b)(2) are not allowed. ()

006. SITING REQUIREMENTS. 40 CFR 141.5 is herein incorporated by reference. ()

007. DISAPPROVAL DESIGNATION. The Department or its agent may assign a disapproved designation to a public water system when: ()

01. Defects. There are design or construction defects, or some combination of design and construction defects; or ()

02. Operating Procedures. Operating procedures constitute a health hazard; or ()

03. Quality. Physical, chemical, microbiological or radiological quality does not meet the requirements of these rules; or ()

04. Monitoring. The required monitoring as specified in these rules has not been conducted; or ()

05. Unapproved Source. An unapproved source of drinking water is used or the system is interconnected with a disapproved water system. ()

06. Non-Payment of Annual Fee Assessment. The annual drinking water system fee assessment is not paid as set forth in Section 010. ()

07. Public Notification. The Department may require the owner of a water system that has been given a disapproval designation to notify the public. The manner, content, and timing of this notification will be determined by the Department. This requirement is in addition to any public notification requirements set forth in Section 150 that may also apply to the disapproved system. ()

008. HEALTH HAZARDS.

01. Prohibited. ()

a. No public water system, or portion of a public water system, shall constitute a health hazard, as determined by the Department and defined in Section 003 of these rules. ()

b. No public water system, or portion of a public water system, shall create a condition which prevents, or may prevent, the detection of a health hazard, as determined by the Department. ()

02. Schedule. Health hazards and conditions which prevent, or may prevent, the detection of a health hazard must be mitigated as required by the Department and terminated within a time schedule established by the Department. ()

03. Standards. Design and construction revisions necessary to correct a health hazard or conditions which prevent, or may prevent, the detection of a health hazard, must be reviewed and approved by the Department, and comply with Sections 501 through 552, unless otherwise specified by the Department. ()

009. MONITORING.

The Department may, in its discretion, alter the monitoring or sampling requirements for any contaminant otherwise specified in these rules if the Department determines that such alteration is necessary to adequately assess the level of such contamination. ()

010. FEE SCHEDULE FOR PUBLIC DRINKING WATER SYSTEMS.

All regulated public drinking water systems shall pay an annual drinking water system fee. The fee shall be assessed to regulated public drinking water systems as provided in this section. ()

01. Effective Date. Annual fees shall be paid for each fee year beginning October 1, 1993, and continuing for each succeeding year. ()

02. Fee Schedule. ()

a. Community and Nontransient noncommunity public drinking water systems shall pay an annual fee according to the following fee schedule:

Number of Connections	Fee
1 to 20	\$100
21 to 184	\$5 per connection, not to exceed a total of \$735 per system
185 to 3,663	\$4 per connection, not to exceed a total of \$10,988 per system
3,664 or more	\$3 per connection

()

- b.** The annual fee for transient public drinking water systems is twenty-five dollars (\$25). ()
- c.** New public drinking water systems formed after October 1 will not pay a fee until the following October. ()
- 03. Fee Assessment.** ()
- a.** An annual fee assessment will be generated for each community and nontransient noncommunity public drinking water system listed in the Department's Safe Drinking Water Information System (SDWIS). ()
- b.** Community and nontransient noncommunity public drinking water systems will be notified each year of the official number of connections listed in SDWIS. Systems will have at least one (1) month to notify the Department if the number of connections listed in SDWIS is not in agreement with the system's records. ()
- c.** The official number of connections listed in SDWIS following each yearly update, as required in Subsection 010.03.b., will be used to calculate the annual fee for community and nontransient noncommunity public drinking water systems for the next fee year of October 1 through September 30. ()
- 04. Billing.** An annual fee shall be assessed and a statement will be mailed to all community, nontransient noncommunity, and transient public drinking water systems listed in SDWIS by the Department on or before September 1 of each year. ()
- 05. Payment.** ()
- a.** Payment of the annual fee shall be due on October 1, unless it is a Saturday, a Sunday, or a legal holiday, in which event the payment shall be due on the successive business day. Fees paid by check or money order shall be made payable to the Idaho Department of Environmental Quality and sent to 1410 North Hilton Street, Boise, ID 83706-1255. ()
- b.** If a public water system consists of two hundred fifty (250) connections or more, the system may request to divide its annual fee payment into equal monthly or quarterly installments by submitting a request to the Department on the proper request form provided with the initial billing statement. ()
- c.** The Department will notify applicable systems, in writing, of approval or denial of a requested monthly or quarterly installment plan within ten (10) business days of the Department receiving such a request. ()
- d.** If a public water system has been approved to pay monthly installments then each installment shall be due by the first day of each month, unless it is a Saturday, a Sunday, or a legal holiday, in which event the installment shall be due on the successive business day. ()
- e.** If a public water system has been approved to pay quarterly installments then each installment shall be due by the first day of the month of each quarter (October 1, January 1, April 1, and July 1), unless it is a Saturday, a Sunday, or a legal holiday, in which event the installment shall be due on the first successive business day. ()
- 06. Delinquent Unpaid Fees.** A public water system will be delinquent in payment if its annual fee assessment has not been received by the Department by November 1; or if having first opted to pay monthly or quarterly installments, its monthly or quarterly installment has not been received by the Department by the last day of the month in which the monthly or quarterly payment is due. ()
- 07. Suspension of Services and Disapproval Designation.** ()
- a.** For any system delinquent in payment of fee assessed under Subsections 010.02 and 010.06, in excess of ninety (90) days, technical services provided by the Department may be suspended except for the following: ()

- i. Issuance of monitoring waivers; ()
- ii. Review and processing of engineering reports; and ()
- iii. Review of plans and specifications for design and construction as set forth in Sections 501 through 552. ()

b. For any system delinquent in payment of fee assessed under Subsections 010.02 and 010.06, in excess of one hundred and eighty (180) days, the Department may suspend all technical services provided by the Department including any of the following: ()

- i. Review and processing of engineering reports; ()
- ii. Review of plans and specifications for design and construction as set forth in Sections 501 through 552; ()
- iii. Renewal of monitoring waivers; or ()
- iv. Granting of new monitoring waivers. ()

c. For any system delinquent in payment of fee assessed under Subsections 010.02 and 010.06, in excess of one hundred and eighty (180) days, the Department may disapprove the public water system pursuant to Subsection 007.06. ()

08. Reinstatement of Suspended Services and Approval Status. For any public water system for which delinquency of fee payment, pursuant to Subsection 010.07, has resulted in the suspension of technical services, the disapproval of a public water system, or both, continuation of technical services, reinstatement of public water system approval, or both, will occur upon payment of delinquent annual fee assessments. ()

09. Enforcement Action. Nothing in Section 010 waives the Department's right to undertake an enforcement action at any time, including seeking penalties, as provided in Section 39-108, Idaho Code. ()

10. Responsibility to Comply. Subsection 010.07 shall in no way relieve any system from its obligation to comply with all applicable state and federal drinking water statutes, rules, regulations, or orders. ()

011. CONTINUITY OF SERVICE.

01. Transfer of Ownership. No owner shall transfer system ownership without providing written notice to the Department and all customers. Notification shall include a schedule for transferring responsibilities and identification of the new owner. ()

02. Maintenance of Standards. The system transferring ownership shall ensure that all health related standards are met during transfer and shall ensure that water rights, operation and maintenance manuals, and all other pertinent documentation is transferred to the new owner. ()

012. WRITTEN INTERPRETATIONS.
The Department of Environmental Quality may have written statements in the form of guidance and policy documents that pertain to the interpretation of the rules of this chapter. Such written statements may be inspected and copies obtained at the Department of Environmental Quality, 1410 North Hilton, Boise, Idaho 83706-1255. ()

013. USE OF GUIDANCE.
Guidance documents referenced in these rules are to be used to assist both designers and reviewers in determining a reasonable way to achieve compliance with the rules. Nothing in these rules makes the use of a particular guidance or guidance document mandatory. If the plans and specifications comply with applicable facility and design standards as set out in these rules, Section 39-118, Idaho Code, requires that the Department not substitute its judgment for that of the design engineer concerning the manner of compliance. If the design engineer needs assistance as to how to

comply with a particular rule, the design engineer may use the referenced guidance documents for that assistance. However, the design engineer may also use other guidance or provide documentation to substantiate his or her own professional judgment. ()

014. ADMINISTRATIVE PROVISIONS.

Persons may be entitled to appeal agency actions authorized under these rules pursuant to IDAPA 58.01.23, "Rules of Administrative Procedure Before the Board of Environmental Quality." ()

015. CONFIDENTIALITY OF RECORDS.

Information obtained by the Department under these rules is subject to public disclosure pursuant to the provisions of Chapter 1, Title 74, Idaho Code. Information submitted under a trade secret claim may be entitled to confidential treatment by the Department as provided in Section 74-114, Idaho Code, and IDAPA 58.01.21, "Rules Governing the Protection and Disclosure of Records in the Possession of the Department of Environmental Quality." ()

016. OFFICE HOURS -- MAILING ADDRESS AND STREET ADDRESS.

The state office of the Department of Environmental Quality and the office of the Board of Environmental Quality are located at 1410 N. Hilton, Boise, Idaho 83706-1255, telephone number (208) 373-0502. The office hours are 8 a.m. to 5 p.m. Monday through Friday. ()

017. -- 049. (RESERVED)

050. MAXIMUM CONTAMINANT LEVELS AND MAXIMUM RESIDUAL DISINFECTANT LEVELS.

01. Maximum Contaminant Levels for Inorganic Contaminants. ()

a. 40 CFR 141.11 is herein incorporated by reference. ()

b. 40 CFR 141.62 is herein incorporated by reference. ()

c. The maximum contaminant level for cyanide is two-tenths milligram per liter (0.2 mg/l). ()

02. Maximum Contaminant Levels for Organic Contaminants. 40 CFR 141.61 is herein incorporated by reference, except that the best available technology (BAT) treatment listed in 40 CFR 141.61(b) shall be changed to reflect that packed tower aeration will not be listed for toxaphene but will be listed for toluene. ()

03. Maximum Contaminant Levels for Turbidity. 40 CFR 141.13 is herein incorporated by reference. ()

04. Maximum Contaminant Levels for Radionuclides. 40 CFR 141.66 is herein incorporated by reference. ()

05. Maximum Contaminant Levels for Microbiological Contaminants. 40 CFR 141.63 is herein incorporated by reference. ()

06. Maximum Contaminant Levels for Disinfection Byproducts. 40 CFR 141.64 is herein incorporated by reference. ()

07. Maximum Residual Disinfectant Levels. 40 CFR 141.65 is herein incorporated by reference. ()

08. Effective Dates. Effective date information provided in 40 CFR 141.6 and 40 CFR 141.60 is applicable. ()

051. -- 099. (RESERVED)

100. MONITORING AND ANALYTICAL REQUIREMENTS.

01. Total Coliform Sampling and Analytical Requirements. The Total Coliform Rule, 40 CFR 141.21, is herein incorporated by reference. The Revised Total Coliform Rule, 40 CFR Part 141, Subpart Y, is herein incorporated by reference, excluding the annual monitoring provisions in 40 CFR 141.854 (a)(4), (d), (e), (f) and (h). ()

a. Routine monitoring requirements for public water systems serving more than one thousand (1,000) people. 40 CFR 141.857 is herein incorporated by reference. ()

b. Routine monitoring requirements for community water systems serving one thousand (1,000) or fewer people using only ground water. 40 CFR 141.855 is herein incorporated by reference. ()

c. Routine monitoring requirements for subpart H public water system serving one thousand (1,000) or fewer people. 40 CFR 141.856 is herein incorporated by reference. ()

d. Routine monitoring requirements for non-community water system serving one thousand (1,000) or fewer people using only ground water. 40 CFR 141.854 is herein incorporated by reference, excluding the annual monitoring provisions in 40 CFR 141.854 (a)(4), (d), (e), (f), and (h). ()

02. Turbidity Sampling and Analytical Requirements. 40 CFR 141.22 is herein incorporated by reference. ()

03. Inorganic Chemical Sampling and Analytical Requirements. 40 CFR 141.23 is herein incorporated by reference. ()

04. Organic Chemicals, Sampling and Analytical Requirements. 40 CFR 141.24 is herein incorporated by reference. ()

05. Analytical Methods for Radioactivity. 40 CFR 141.25 is herein incorporated by reference. ()

06. Monitoring Frequency and Compliance Requirements for Radioactivity in Community Water Systems. 40CFR 141.26 is herein incorporated by reference. ()

07. Monitoring Waivers. 40 CFR 141.23(b) 141.23(c), 141.24(f), 141.24(h) are herein incorporated by reference. ()

a. Waivers from sampling requirements in Subsections 100.03, 100.04, 200.01, and 503.03.e.v. may be available to all systems for all contaminants except nitrate, nitrite, and disinfection byproducts and are based upon a vulnerability assessment, use assessment, the analytical results of previous sampling, or some combination of vulnerability assessment, use assessment, and analytical results. ()

b. There are two (2) general types of monitoring waivers: ()

i. Waivers based exclusively upon previous analytical data ()

ii. Waivers based on a use or vulnerability assessment. ()

c. Waivers are to be made by the Department on a contaminant specific basis and must be in writing. ()

d. Vulnerability assessments may be conducted by the Department, the water system, or a third party organization. The Department shall approve or disapprove all vulnerability assessments in writing. ()

e. Water systems which do not receive waivers shall sample at the required initial and repeat monitoring frequencies. ()

f. If a system elects to request a waiver from monitoring, it shall do so in writing at least sixty (60) days prior to the required monitoring deadline date. ()

08. Initial Monitoring Schedule. In addition to the requirements specified in 40 CFR 141.23, 40 CFR 141.24, and 40 CFR 141.40, initial monitoring must be completed according to the following schedule unless otherwise specified by the Department: ()

a. Public water systems serving more than one hundred (100) people must conduct initial monitoring before January 1, 1995 except that: ()

i. Initial monitoring for nitrate and nitrite must be completed before January 1, 1994 for all surface water sources serving transient noncommunity public water systems and for all ground water sources serving any public water system. ()

ii. Initial monitoring for nitrate and nitrite must be completed before April 1, 1993 for all surface water sources serving community or nontransient noncommunity public water systems. ()

iii. Initial monitoring required under 40 CFR 141.23(c) must be completed before January 1, 1994 for all surface water sources serving community or nontransient noncommunity public water systems. ()

b. Public water systems serving one hundred (100) or less people must conduct initial monitoring before January 1, 1996 except that: ()

i. Initial monitoring for nitrate and nitrite must be completed before January 1, 1994 for all surface water sources serving transient noncommunity public water systems and for all ground water sources serving a public water system. ()

ii. Initial monitoring for nitrate and nitrite must be completed before April 1, 1993 for all surface water sources serving community or nontransient noncommunity public water systems. ()

iii. Initial monitoring required under 40 CFR 141.23(c) must be completed before January 1, 1994 for all surface water sources serving community or nontransient noncommunity public water systems. ()

09. Alternate Analytical Techniques. 40 CFR 141.27 is herein incorporated by reference. ()

10. Approved Laboratories. 40 CFR 141.28 and 40 CFR 141.852(b) are herein incorporated by reference. All analyses conducted pursuant to these rules, except those listed below, shall be performed in laboratories certified or granted reciprocity by the Idaho Department of Health and Welfare, Bureau of Laboratories, as provided in IDAPA 16.02.13, "Rules Governing Certification of Idaho Water Quality Laboratories." The following analyses may be performed by any person acceptable to the Department of Environmental Quality: ()

a. pH; ()

b. Turbidity (Nephelometric method only); ()

c. Daily analysis for fluoride; ()

d. Temperature; ()

e. Disinfectant residuals, except ozone, which shall be analyzed using the Indigo Method or an acceptable automated method pursuant to Subsection 300.05.d.; ()

f. Alkalinity; ()

g. Calcium; ()

h. Conductivity; ()

- i. Silica; and ()
- j. Orthophosphate. ()
- 11. **Monitoring of Consecutive Water Systems.** 40 CFR 141.29 is herein incorporated by reference. ()
- 12. **Disinfection Residuals, Disinfection Byproducts, and Disinfection Byproduct Precursors.** 40 CFR Part 141, Subpart L is herein incorporated by reference. ()
- 101. -- 149. (RESERVED)
- 150. **REPORTING, PUBLIC NOTIFICATION, RECORDKEEPING.**
 - 01. **Reporting Requirements.** 40 CFR 141.31 is herein incorporated by reference. ()
 - 02. **Public Notification of Drinking Water Violations.** 40 CFR Part 141, Subpart Q is herein incorporated by reference. ()
 - 03. **Record Maintenance.** 40 CFR 141.33 is herein incorporated by reference. ()
 - 04. **Reporting for Unregulated Contaminant Monitoring Results.** 40 CFR 141.35 is herein incorporated by reference. ()
 - 05. **Reporting and Record Keeping Requirements for the Interim Enhanced Surface Water Treatment Rule.** 40 CFR 141.175 is herein incorporated by reference. ()
 - 06. **Reporting and Record Keeping Requirements for the Disinfectants and Disinfectant Byproducts Rule.** 40 CFR 141.134 is herein incorporated by reference. ()
 - 07. **Reporting and Record Keeping Requirements for the Revised Total Coliform Rule.** 40 CFR 141.861 is herein incorporated by reference. ()
- 151. **CONSUMER CONFIDENCE REPORTS.** 40 CFR Part 141, Subpart O is herein incorporated by reference. ()
- 152. -- 199. (RESERVED)
- 200. **SPECIAL REGULATIONS.**
 - 01. **Monitoring Requirements for Unregulated Contaminants.** 40 CFR 141.40 is herein incorporated by reference. ()
 - 02. **Special Monitoring for Sodium.** 40 CFR 141.41 is herein incorporated by reference. ()
 - 03. **Special Monitoring for Corrosively Characteristics.** 40 CFR 141.42 is herein incorporated by reference. ()
 - 04. **Prohibition on Use of Lead Pipes, Solder, and Flux.** 40 CFR 141.43 is herein incorporated by reference. ()
- 201. -- 249. (RESERVED)
- 250. **MAXIMUM CONTAMINANT LEVEL GOALS AND MAXIMUM RESIDUAL DISINFECTION LEVEL GOALS.**

01. Maximum Contaminant Level Goals for Organic Contaminants. 40 CFR 141.50 is herein incorporated by reference. ()

02. Maximum Contaminant Level Goals for Inorganic Contaminants. 40 CFR 141.51 is herein incorporated by reference. ()

03. Maximum Contaminant Level Goals for Microbiological Contaminants. 40 CFR 141.52 is herein incorporated by reference. ()

04. Maximum Contaminant Level Goals for Disinfection Byproducts. 40 CFR 141.53 is herein incorporated by reference. ()

05. Maximum Residual Disinfectant Level Goals for Disinfectants. 40 CFR 141.54 is herein incorporated by reference. ()

06. Maximum Contaminant Level Goals for Radionuclides. 40 CFR 141.55 is herein incorporated by reference. ()

251. -- 299. (RESERVED)

300. FILTRATION AND DISINFECTION.

01. General Requirements. 40 CFR 141.70 is herein incorporated by reference. Each public water system using a surface water source or ground water source directly influenced by surface water shall be operated by personnel, as specified in Sections 553 and 554, who have met state requirements for licensing of water system operators. ()

02. Filtration. 40 CFR 141.73 is herein incorporated by reference. ()

a. Each system which provides filtration treatment shall submit engineering evaluations, other documentation, or some combination of engineering evaluations and other documentation as required by the Department to demonstrate ongoing compliance with these rules. ()

b. The Department will establish filtration removal credit on a system-by-system basis. Unless otherwise demonstrated to the satisfaction of the Department, the maximum log removal credit allowed for filtration is as follows:

Maximum Log Removal			
Filtration Type	Giardia lamblia	Viruses	Cryptosporidium
Conventional	2.5	2.0	2.5
Direct	2.0	1.0	2.0
Slow sand	2.0	2.0	2.0
Diatomaceous earth	2.0	1.0	2.0
Microfiltration	3.0	0.5	3.0
Ultrafiltration	3.5	2.0	3.5
Nanofiltration	4.0	3.0	4.0
Reverse Osmosis	4.0	3.0	4.0
Alternate technology	2.0	0	2.0

()

- c. Filtration removal credit shall be granted for filtration treatment provided the system is: ()
 - i. Operated in accordance with the Operations Plan specified in Subsection 552.03.a.; and ()
 - ii. The system is in compliance with the turbidity performance criteria specified under 40 CFR 141.73; and ()
 - iii. Coagulant chemicals must be added and coagulation and flocculation unit process must be used at all times during which conventional and direct filtration treatment plants are in operation; and ()
 - iv. Slow sand filters are operated at rates not to exceed one-tenth (0.1) gallons per minute per square foot or as approved by the Department; and ()
 - v. Diatomaceous earth filters are operated at a rate not to exceed one point five (1.5) gallons per minute per square foot. ()
- 03. Criteria for Avoiding Filtration.** 40 CFR 141.71 is herein incorporated by reference. ()
- 04. Disinfection.** 40 CFR 141.72 is herein incorporated by reference. ()
 - a. In addition to the disinfection requirements in 40 CFR 141.72, each system with a surface water source or ground water source directly influenced by surface water shall maintain a minimum of at least two-tenths (0.2) parts per million of chlorine in the treated water after an effective contact time of at least thirty (30) minutes at peak hour demand before delivery to the first customer. Effective contact time is either demonstrated or calculated. ()
 - i. Demonstrated effective contact time is generally determined by tracer studies on a completed contact basin. Prior to conducting a tracer study, a testing plan shall be submitted to the Department for review and approval. The tracer chemical shall not be reactive with anything in the water or be consumed in the process. ()
 - ii. Calculated effective contact time for tank type contact basins is based on tank baffling and inlet/outlet configurations for the maximum hourly flow rate through that contact basin. Calculated effective contact time in a "pipeline type contact basin" (often called a pipeline contactor) is calculated by dividing the internal volume of the pipe by the maximum hourly flow rate through that pipeline contactor. ()
 - b. The Department may allow a system to utilize automatic shut-off of water to the distribution system whenever total disinfectant residual is less than two-tenths (0.2) mg/l rather than provide redundant disinfection components and auxiliary power as required in 40 CFR 141.72(a)(2). An automatic water shut-off may be used if the system demonstrates to the satisfaction of the Department that, at all times, a minimum of twenty (20) psi pressure and adequate fire flow can be maintained in the distribution system when water delivery is shut-off to the distribution system and, at all times, minimum *Giardia lamblia* and virus inactivation removal rates can be achieved prior to the first customer. ()
 - c. Each system which is required to provide filtration must provide disinfection treatment such that filtration plus disinfection provide at least 3-Log or ninety-nine and nine tenths percent (99.9%) inactivation/removal of *Giardia lamblia* cysts and at least 4-Log or ninety-nine and ninety-nine hundredths percent (99.99%) inactivation/removal of viruses as specified in 40 CFR 141.72 and Section 300, and at least 2-Log or ninety-nine percent (99%) removal of *Cryptosporidium* as required by 40 CFR Part 141, Subpart P or Subpart T. However, in all cases the disinfection portion of the treatment train shall be designed to provide not less than five tenths (0.5) log *Giardia lamblia* inactivation, irrespective of the *Giardia lamblia* removal credit awarded to the filtration portion of the treatment train. ()
- 05. Analytical and Monitoring Requirements.** 40 CFR 141.74 is herein incorporated by reference. ()
 - a. Each public water system which is required to provide disinfection shall monitor as follows:

()

i. Each day the system is in operation, the purveyor shall determine the total level of inactivation of *Giardia lamblia* cysts and viruses achieved through disinfection based on CT99.9 values provided in 40 CFR 141.74(b)(3) (Tables 1.1 through 1.6, 2.1 and 3.1). ()

ii. At least once per day, the system shall monitor the following parameters to determine the total inactivation ratio achieved through disinfection: ()

(1) Temperature of the disinfected water at each residual disinfectant concentration sampling point; and ()

(2) If using chlorine, the pH of the disinfected water at each chlorine residual sampling point. ()

(3) The effective contact time, "T," must be determined each day during peak hour demand. Disinfectant contact time, "T," in pipelines used for *Giardia lamblia* and virus inactivation shall be calculated by dividing the internal volume of the pipe by the peak hour flow rate through that pipe. Effective contact time, "T," for all other system components used for *Giardia lamblia* and virus inactivation shall be determined by tracer studies or other evaluations or calculations acceptable to the Department. ()

(4) The residual disinfectant concentrations at each residual disinfectant sampling point at or before the first customer, must be determined each day during peak hour demand, or at other times approved by the Department. ()

iii. The purveyor may demonstrate to the Department, based on a Department approved on-site disinfection challenge study protocol, that the system is achieving disinfection requirements specified in Subsection 300.04 utilizing CT99.9 values other than those specified in 40 CFR 141.74(b)(3) (Tables 2.1 and 3.1) for ozone, chlorine dioxide, and chloramine. ()

iv. The total inactivation ratio shall be calculated as follows: ()

(1) If the system applies disinfectant at only one (1) point, the system shall determine the total inactivation ratio by either of the two (2) following methods: ()

(a) One inactivation ratio (CT_{calc}/CT_{99.9}) is determined at/or before the first customer during peak hour demand; or ()

(b) Sequential inactivation ratios are calculated between the point of disinfectant application and a point at or before the first customer during peak hour demand. The following method must be used to calculate the total inactivation ratio: ()

(i) Step 1: Determine (CT_{calc}/CT_{99.9}) for each sequence. ()

(ii) Step 2: Add the (CT_{calc}/CT_{99.9}) values for all sequences. The result is the total inactivation ratio. ()

(2) If the system uses more than one point of disinfectant application at or before the first customer, the system must determine the CT value of each disinfection sequence immediately prior to the next point of disinfectant application during peak hour demand. The sum of the (CT_{calc}/CT_{99.9}) values from all sequences is the total inactivation ratio. (CT_{calc}/CT_{99.9}) must be determined by the methods described in 40 CFR 141.74(b)(4)(i)(B). ()

v. Log removal credit for disinfection shall be determined by multiplying the total inactivation ratio by three (3). ()

vi. The Department may reduce the CT monitoring requirements specified under Section 300, for any system which demonstrates that the required inactivation levels are consistently exceeded. Reduced CT monitoring

shall be allowed only where the reduction in monitoring will not endanger the health of consumers served by the water system. ()

b. Residual disinfectant concentrations for ozone must be measured using the Indigo Method, or automated methods may be used if approved by the Department as provided for in 40 CFR 141.74(a)(2). ()

c. Unfiltered Subpart H systems. 40 CFR 141.857(c) is herein incorporated by reference. ()

d. As provided for in 40 CFR 141.74(b), the Department may specify interim monitoring requirements for unfiltered systems notified by the Department or U.S. Environmental Protection Agency that filtration treatment must be installed. Until filtration is installed, systems shall conduct monitoring for turbidity and disinfectant residuals as follows unless otherwise specified by the Department. ()

i. Disinfectant residual concentrations entering the distribution system shall be measured at the following minimum frequencies, and samples must be taken at evenly spaced intervals throughout the workday.

Minimum Frequencies	
Population	Samples/day
Less than 500	1
501 - 1000	2
1,001 - 2,500	3
Greater than 2501	4

()

ii. Turbidity shall be measured at least once per day at the entry point to the distribution system. ()

iii. The Department may, at its discretion, reduce the turbidity monitoring frequency for any noncommunity system which demonstrates to the satisfaction of the Department: ()

(1) A free chlorine residual of two-tenths (0.2) part per million is maintained throughout the distribution system; ()

(2) The water source is well protected; ()

(3) The total coliform MCL is not exceeded or a Level 1 or Level 2 Assessment has not been triggered in accordance with 40 CFR 141.859; and ()

(4) No significant health risk is present. ()

e. The Department may allow systems with surface water sources or ground water sources under the direct influence of surface water, to substitute continuous turbidity monitoring for grab sample monitoring as specified in 40 CFR 141.74(b)(2) and 40 CFR 141.74(c)(1) and Subsection 300.05. The Department may allow continuous turbidity monitoring provided the continuous turbidimeter is operated, maintained, standardized and calibrated per the manufacturer's recommendations. For purposes of determining compliance with turbidity performance criteria, discrete values must be recorded every four (4) hours water is supplied to the distribution system. ()

f. The Department may allow systems using both a surface water source(s), or ground water source(s) under the direct influence of surface water, and one (1) or more ground water sources, to measure disinfectant residual at points other than the total coliform sampling points, as specified in 40 CFR 141.74(b)(6)(i) and 40 CFR 141.74(c)(3)(i) and Subsection 300.05. The Department may allow alternate sampling points provided the system

submits an alternate monitoring plan to the Department for approval in advance of the monitoring requirement that demonstrates the alternative points are more representative of treated (disinfected) water quality within the distribution system. Heterotrophic bacteria, measured as heterotrophic plate count (HPC) as specified in 40 CFR 141.74(a)(1), may be measured in lieu of residual disinfectant concentration as outlined in 40 CFR 141.74(b)(6)(i). ()

g. The Department may allow a reduced turbidity monitoring frequency for systems using slow sand filtration or technology other than conventional, direct, or diatomaceous earth filtration, as specified in 40 CFR 141.74(c)(1) and Subsection 300.05. To be considered for a reduced turbidity monitoring frequency, a system must submit a written request to the Department in advance of the monitoring requirement. ()

06. Reporting and Recordkeeping Requirements. 40 CFR 141.75 is herein incorporated by reference. ()

a. As provided in 40 CFR 141.75(a) and Section 300, the Department may establish interim reporting requirements for systems notified by the Department or U.S. Environmental Protection Agency that filtration treatment must be installed as specified in 40 CFR 141.75(a) and as referred to in Subsection 300.06. Until filtration treatment is installed, systems required to install filtration treatment shall report as follows: ()

i. The purveyor shall immediately report to the Department via telephone or other equally rapid means, but no later than the end of the next business day, the following information: ()

(1) The occurrence of a waterborne disease outbreak potentially attributable to that water system; ()

(2) Any turbidity measurement which exceeds five (5) NTU; and ()

(3) Any result indicating that the disinfectant residual concentration entering the distribution system is below two-tenths (0.2) mg/l free chlorine. ()

ii. The purveyor shall report to the Department within ten (10) days after the end of each month the system serves water to the public the following monitoring information using a Department-approved form: ()

(1) Turbidity monitoring information; and ()

(2) Disinfectant residual concentrations entering the distribution system. ()

iii. Personnel qualified under Subsection 300.01 shall complete and sign the monthly report forms submitted to the Department as required in Subsection 300.06. ()

b. In addition to the reporting requirements in 40 CFR 141.75(b) pertaining to systems with filtration treatment, each public water system which provides filtration treatment must report the level of *Giardia lamblia* and virus inactivation/removal achieved each day by filtration and disinfection. ()

07. Recycle Provisions. 40 CFR 141.76 is herein incorporated by reference. ()

a. The Department shall evaluate recycling records kept by water systems pursuant to 40 CFR 141.76 during sanitary surveys, comprehensive performance evaluations, or other inspections. ()

b. The Department may require a system to modify recycling practices if it can be shown that these practices adversely affect the ability of the system to meet surface water treatment requirements. ()

301. ENHANCED FILTRATION AND DISINFECTION - SYSTEMS SERVING TEN THOUSAND OR MORE PEOPLE.

This Section incorporates, 40 CFR Part 141, Subpart P, of the National Primary Drinking Water Regulations, known as the Interim Enhanced Surface Water Treatment Rule. ()

- 01. **General Requirements.** 40 CFR 141.170 is herein incorporated by reference. ()
- 02. **Criteria for Avoiding Filtration.** 40 CFR 141.171 is herein incorporated by reference. ()
- 03. **Disinfection Profiling and Benchmarking.** 40 CFR 141.172 is herein incorporated by reference. ()
- 04. **Filtration.** 40 CFR 141.173 is herein incorporated by reference. ()
- 05. **Filtration Sampling Requirements.** 40 CFR 141.174 is herein incorporated by reference. ()

302. SANITARY SURVEYS FOR SYSTEMS USING SURFACE WATER OR GROUND WATER UNDER THE DIRECT INFLUENCE OF SURFACE WATER.

The Department shall conduct a sanitary survey of all public water systems which use surface water or ground water under the direct influence of surface water. ()

01. **Frequency.** For noncommunity water systems, a sanitary survey shall be conducted every five (5) years. For community water systems, a sanitary survey shall be conducted every three (3) years, except that a community water system that has been determined to have outstanding performance, according to criteria established by the Department, may have a sanitary survey conducted every five (5) years. ()

02. **Report.** A report describing the results of the sanitary survey will be provided to the water system. ()

a. As part of the sanitary survey report or as an independent action, the Department shall provide written notice to the water system describing any significant deficiency within thirty (30) days after the Department identifies the significant deficiency. The notice may specify corrective actions and deadlines for completion of corrective actions. ()

b. The Department may, at its discretion, provide this written notice at the time of the sanitary survey. ()

03. **Response Required.** The owner of a public water system must respond in writing, describing how and on what schedule the system will address all significant deficiencies, not later than forty-five (45) days after receiving notification from the Department. ()

04. **Consultation with the Department.** Public water systems shall consult with the Department prior to taking specific corrective actions in response to significant deficiencies identified during a sanitary survey, unless such corrective actions are specified in detail by the Department in its written notification under Subsection 302.02. ()

05. **Violation.** Failure to address significant deficiencies identified in a sanitary survey that are within the control of the public water system and its governing body shall constitute a violation of these rules. ()

303. SANITARY SURVEYS FOR PUBLIC WATER SYSTEMS USING GROUND WATER.
The Department shall conduct a sanitary survey of all public water systems that use ground water. 40 CFR Part 141, Subpart S, is herein incorporated by reference. ()

01. **Frequency.** For non-community water systems, a sanitary survey shall be conducted every five (5) years. For community water systems, a sanitary survey shall be conducted every three (3) years, except as provided below. ()

a. A community water system may have a sanitary survey conducted every five (5) years if the system provides at least a four (4)-log treatment of viruses (using inactivation, removal, or a Department approved combination of 4-log inactivation and removal) before or at the first customer for all of its ground water sources. ()

b. A community water system may have a sanitary survey conducted every five (5) years if it has an outstanding performance record, as determined by the Department and documented in previous sanitary surveys, and has no history of Total Coliform Rule or Revised Total Coliform Rule MCL or monitoring violations under Subsection 100.01 since the last sanitary survey. ()

02. Report. A report describing the results of the sanitary survey shall be provided to the water system. ()

a. As part of the sanitary survey report or as an independent action, the Department shall provide written notice to the water system describing any significant deficiency within thirty (30) days after the Department identifies the significant deficiency. The notice may specify corrective actions and deadlines for completion of corrective actions. ()

b. The Department may, at its discretion, provide this written notice at the time of the sanitary survey. ()

03. Significant Deficiencies. For each of the eight (8) elements of a sanitary survey of a ground water system, the following deficiencies shall in all cases be considered significant for the purposes of the notice required in Subsection 303.02. Decisions about the significance of other deficiencies identified during the sanitary survey shall be at the Department's discretion, as indicated in the Department's sanitary survey protocol. ()

a. Source: Lack of a sanitary well cap as specified in Subsection 511.06.b. ()

b. Treatment: ()

i. Chemical addition lacks emergency shut-off as specified in Subsection 531.02.b.ii. ()

ii. Chemical addition is not flow proportioned where the rate of flow or chemical demand is not reasonably constant, as specified in Subsection 531.02.b.ii. ()

c. Distribution system: No means for flushing dead end water mains, as specified in Subsection 542.09. ()

d. Finished water storage: Roof leaking, as specified in Subsections 544.09 and 544.09.c. ()

e. Pumps, pump facilities, and controls: No accessible check valve between pump and shut-off valve, as specified in Subsection 511.04. ()

f. Monitoring, reporting, and data verification: Repeated failure to collect the required number and type of Total Coliform Rule or the Revised Total Coliform Rule samples during the most recent two (2) year period, as specified in Subsection 100.01. ()

g. System management and operation: History of frequent depressurization in the distribution system in violation of Subsection 552.01. ()

h. Operator compliance with state licensing requirements: Responsible charge operator is not licensed as required in Subsection 554.02. ()

04. Response Required. The owner of a public water system must respond in writing, describing how and on what schedule the system will address all significant deficiencies, not later than thirty (30) days after receiving notification from the Department. ()

05. Consultation with the Department. Public water systems shall consult with the Department prior to taking specific corrective actions in response to significant deficiencies identified during a sanitary survey unless such corrective actions are specified in detail by the Department in its written notification under Subsection 303.02. ()

06. Violation. Failure to address significant deficiencies identified in a sanitary survey that are within the control of the public water system and its governing body shall constitute a violation of these rules. ()

304. COMPOSITE CORRECTION PROGRAM (CCP).

In accordance with 40 CFR 142.16(g)(1), the Department may require a public water system to conduct a composite correction program, as defined in Section 003 of these rules, for the purpose of identifying and correcting deficiencies in water treatment and distribution. Composite Correction Programs consist of a Comprehensive Performance Evaluation (CPE) and Comprehensive Technical Assistance (CTA). Failure to implement any Department-required performance improvement factors identified through the CCP constitutes a violation of these rules. ()

01. Comprehensive Performance Evaluation (CPE). If required, the CPE must be conducted to identify factors that may be adversely impacting a plant's capability to achieve compliance. It must emphasize approaches that can be implemented without significant capital improvements and must consist of at least the following components: assessment of plant performance; evaluation of major unit processes; identification and prioritization of performance limiting factors; assessment of the applicability of comprehensive technical assistance; and preparation of a CPE report. ()

02. Comprehensive Technical Assistance (CTA). During the CTA phase, the system must identify and systematically address plant-specific factors. The CTA consists of follow-up to the CPE results, implementation of process control priority setting techniques, and maintaining long term involvement to systematically train staff and administrators. ()

305. COLIFORM TREATMENT TECHNIQUE TRIGGERS AND ASSESSMENT REQUIREMENTS FOR PROTECTION AGAINST POTENTIAL FECAL CONTAMINATION.

40 CFR 141.859, excluding 40 CFR 141.859(a)(2)(iii), is herein incorporated by reference. ()

01. Treatment Technique Triggers. Systems owners and operators must ensure that assessments are conducted in accordance with Subsection 305.02 after exceeding treatment technique triggers in this subsection. ()

a. Level 1 treatment technique triggers: ()

i. For systems taking forty (40) or more samples per month, the system exceeds five percent (5.0%) total coliform-positive samples for the month. ()

ii. For systems taking fewer than forty (40) samples per month, the system has two (2) or more total coliform positive samples in the same month. ()

iii. The system owner or operator fails to take every required repeat sample after any single total coliform-positive sample. ()

b. Level 2 treatment technique triggers: ()

i. An E.coli MCL violation, as specified in Subsection 050.05 and Subsection 100.01 of these rules; or ()

ii. A second or any additional Level 1 triggers as defined in Subsection 305.01.a. within a rolling 12-month period, unless the Department has determined a likely reason that the samples that caused the first Level 1 treatment technique trigger were total coliform-positive and has established that the system has corrected the problem. ()

02. Requirements For Assessments. ()

a. System owners and operators must ensure that Level 1 and 2 assessments are conducted in order to identify the possible presence of sanitary defects and defects in distribution system coliform monitoring practices. The assessment must be conducted consistent with any Department directives that tailor specific assessment elements with respect to the size and type of the system and the size, type, and characteristics of the distribution system.

()

b. When conducting assessments, owners and operators must ensure that the assessor evaluates minimum elements that include review and identification of inadequacies in sample sites; sampling protocol; sample processing; atypical events that could affect distributed water quality or indicate that distributed water quality was impaired; changes in distribution system maintenance and operation that could affect distributed water quality (including water storage); source and treatment considerations that bear on distributed water quality, where appropriate (e.g., small ground water systems); and existing water quality monitoring data. The system owner or operator must ensure the assessments are consistent with the elements in the Department provided forms for Level 1 and Level 2 assessments. ()

c. Level 1 Assessments. A system owner or operator must conduct a Level 1 assessment if the system exceeds one of the treatment technique triggers in Subsection 305.01.a. as soon as practical after any trigger level is identified and submit a completed Level 1 assessment report or form to the Department within thirty (30) days after the system learns that it has exceeded a trigger. ()

i. The completed assessment report or form must describe sanitary defects detected, corrective actions completed, and a proposed timetable for any corrective actions not already completed. The assessment report or form may also note that no sanitary defects were identified. ()

ii. If the Department reviews the completed Level 1 report or form and determines that the assessment is not sufficient (including any proposed timetable for any corrective actions not already completed), the Department will consult with the owner or operator of the system. If the Department requires revisions after consultation, the system owner or operator must submit a revised assessment report or form to the Department on an agreed-upon schedule not to exceed thirty (30) days from the date of consultation. ()

iii. Upon completion and submission of the assessment report or form by the system owner or operator, the Department will determine if the system has identified a likely cause for the Level 1 trigger and, if so, establish that the system has corrected the problem, or has included a schedule acceptable to the Department for correcting the problem. ()

d. Level 2 Assessments. A system owner or operator must ensure that a Level 2 assessment is conducted if the system exceeds one of the treatment technique triggers in Subsection 305.01.b. The owner or operator must comply with any expedited actions or additional action required by the Department in the case of an E.coli MCL violation. ()

i. The system owner or operator must ensure that a Level 2 assessment is conducted by the Department or a party approved by the Department as described in Subsection 305.03 as soon as practical after any trigger in Subsection 305.01.b. and must submit a completed Level 2 assessment report or form to the Department within 30 (thirty) days after the system learns that it has exceeded a trigger if the assessment was conducted by a party other than the Department. ()

ii. The Department will schedule and conduct Level 2 assessments for an E.coli treatment technique trigger in Subsection 305.01.b.i. unless the Department approves another party to conduct the assessment as outlined in Subsection 305.03. ()

iii. A second or any additional triggered Level 2 Assessment within a rolling twelve-month period must be conducted by a Department approved third party even if the public water system has staff or management approved under Subsection 305.03. ()

iv. The completed assessment report or form must describe sanitary defects detected, corrective actions completed, and a proposed timetable for any corrective actions not already completed. The assessment report or form may also note that no sanitary defects were identified. ()

v. If the Department reviews the completed Level 2 report or form and determines that the assessment is not sufficient (including any proposed timetable for any corrective actions not already completed), the Department will consult with the owner or operator of the system. If the Department requires revisions after consultation, the

system owner or operator must submit a revised assessment report or form to the Department on an agreed-upon schedule not to exceed 30 (thirty) days from the date of consultation. ()

vi. Upon completion and submission of the assessment report or form by the system owner or operator, the Department will determine if the system has identified a likely cause for the Level 2 trigger and, if so, establish that the system has corrected the problem, or has included a schedule acceptable to Department for correcting the problem. ()

e. Corrective action. Systems must correct sanitary defects found through either Level 1 or Level 2 assessments conducted under this section. For corrections not completed by the time of submission of the assessment report or form, the system must complete the corrective action(s) in compliance with a timetable approved by the Department in consultation with the system. The system must notify the Department when each scheduled corrective action is completed. ()

f. Consultation. At any time during the assessment or corrective action phase, either the water system or the Department may request a consultation with the other party to determine the appropriate actions to be taken. The system may consult with the Department on all relevant information that may impact its ability to comply with a requirement of this Section, including the method of accomplishment, an appropriate timeframe, and other relevant information. ()

03. Approved Parties for Level 2 Assessments. The system may conduct a Level 2 assessment if the system has staff or management with the certification or qualifications outlined in this Subsection or if the system hires parties that meet the qualifications in this Subsection. The following parties are approved by the Department to conduct Level 2 assessments: ()

a. The Department or persons contracted with the Department who are trained to conduct sanitary surveys; ()

b. Currently licensed operators in good standing that are licensed through the Idaho Division of Occupational and Professional Licenses with a drinking water classification of Distribution I through IV or Treatment I through IV and that are licensed at least to the classification level of the public water system requiring the Level 2 assessment; or ()

c. Licensed professional engineers licensed by the state of Idaho and qualified by education and experience in the specific technical fields involved in these rules. ()

306. -- 309. (RESERVED)

310. ENHANCED FILTRATION AND DISINFECTION - SYSTEMS SERVING FEWER THAN TEN THOUSAND PEOPLE.
40 CFR 141, Subpart T is herein incorporated by reference. ()

311. ENHANCED TREATMENT FOR CRYPTOSPORIDIUM -- LONG TERM 2 ENHANCED SURFACE WATER TREATMENT RULE.
40 CFR Part 141, subpart W is herein incorporated by reference. ()

01. Cryptosporidium Treatment Credit for Approved Watershed Control Program. The Department shall award 0.5 (zero point five) logs cryptosporidium removal credit to systems that have a Department approved Watershed Control Program. Requirements for a watershed control program are set forth in 40 CFR 141, Subpart W. Guidance on how to develop a watershed control program and obtain Department approval is provided in "Implementation Guidance for the Long Term 2 Enhanced Surface Water Treatment Rule," as referenced in Section 002. ()

02. Assessment of Significant Changes in the Watershed. As part of the sanitary survey process set forth in Section 302, the Department, or an agent approved by the Department, shall assess significant changes in the watershed of a surface water system that have occurred since the system conducted source water monitoring. If changes in the watershed have the potential to significantly increase contamination of the source water with

cryptosporidium, the Department shall consult with the water system owner on follow-up actions that may be required under 40 CFR 141, Subpart W, including, but not limited to, source water monitoring and/or additional treatment requirements. "Implementation Guidance for the Long Term 2 Enhanced Surface Water Treatment Rule," as referenced in Section 002, provides a description of factors that will be considered by the Department when making an assessment of changes in the watershed. These factors include, but are not limited to the following:

- a. New NPDES permits or changes in existing NPDES permits that involve increased loading of contaminants. ()
- b. Changes in land use patterns. ()
- c. Changes in agricultural cropping, chemical application, or irrigation practices. ()
- d. Changes in other non-point discharge source activities (such as grazing, manure application, commercial or residential development). ()
- e. Stream or riverbed modifications. ()
- f. NPDES permit violations at wastewater treatment plants and confined animal feedlot operations. ()
- g. Dramatic natural events such as floods, forest fires, earthquakes, and landslides that may transport or expose contaminants. ()
- h. Prolonged drought conditions that may warrant special preparatory measures to minimize impacts from waste accumulations that are washed into source waters when precipitation returns. ()
- i. Status of the water system's emergency response plan. ()
- j. Accidental or illegal waste discharges and spills. ()

312. -- 319. (RESERVED)

320. DISINFECTANT RESIDUALS, DISINFECTION BYPRODUCTS, AND DISINFECTION BYPRODUCT PRECURSORS.

This Section incorporates 40 CFR Part 141, Subpart L, of the National Primary Drinking Water Regulations, known as the Disinfectants and Disinfection Byproducts Rule. ()

- 01. General Requirements.** 40 CFR 141.130 is herein incorporated by reference. ()
- 02. Analytical Requirements.** 40 CFR 141.131 is herein incorporated by reference. DPD colorimetric test kits may be used to measure residual disinfectant concentrations for chlorine, chloramines, and chlorine dioxide. ()
- 03. Monitoring Requirements.** 40 CFR 141.132 is herein incorporated by reference. ()
- 04. Compliance Requirements.** 40 CFR 141.133 is herein incorporated by reference. ()
- 05. Treatment Techniques for Control of Disinfection Byproduct (DBP) Precursors.** 40 CFR 141.135 is herein incorporated by reference. ()

321. INITIAL DISTRIBUTION SYSTEM EVALUATIONS.

40 CFR Part 141, Subpart U is herein incorporated by reference. "Implementation Guidance for the Stage 2 Disinfectants and Disinfection Byproducts Rule," as referenced in Section 002, provides assistance to public water system owners and operators in understanding and achieving compliance with the requirements of 40 CFR 141, Subpart U. ()

322. STAGE 2 DISINFECTION BYPRODUCTS REQUIREMENTS.

40 CFR Part 141, Subpart V is herein incorporated by reference. "Implementation Guidance for the Stage 2 Disinfectants and Disinfection Byproducts Rule," as referenced in Section 002, provides assistance to public water system owners and operators in understanding and achieving compliance with the requirements of 40 CFR Part 141, Subpart V. ()

323. GROUND WATER RULE.

40 CFR 141, Subpart S is herein incorporated by reference. "Implementation Guidance for the Ground Water Rule," as referenced in Section 002, provides assistance to public water system owners and operators in understanding and achieving compliance with the requirements of 40 CFR 141, Subpart S. ()

01. Discontinuation of Treatment. Systems that wish to discontinue four (4)-log virus treatment at a ground water source must meet the following criteria. Ground water sources on which treatment has been discontinued shall be subject to the triggered source water monitoring requirements of 40 CFR 141, Subpart S. ()

- a. Demonstration that any known source of contamination has been removed. ()
- b. Demonstration that structural deficiencies of the well have been rehabilitated and no longer exist. ()
- c. Provide evidence that the well is drawing from a protected or confined aquifer. ()
- d. Submit results of one (1) year of monthly monitoring for a fecal indicator organism during which no positive results occurred. ()

02. Chlorine Purging Prior to Triggered Source Sampling. 40 CFR 141.402(e) requires that ground water source samples be collected at a location prior to any treatment. Pursuant to this requirement, systems that add chlorine to a source, either in the well bore or near enough to the wellhead that chlorinated water could backflow into the well, shall ensure that all chlorine residual has been purged prior to taking a triggered source water sample. This shall be accomplished by measuring chlorine residual in the source water until a reading of zero is obtained and be recorded in the space provided for chlorine residual on the sample submittal form. ()

324. -- 349. (RESERVED)

350. CONTROL OF LEAD AND COPPER.

01. General Requirements. 40 CFR 141.80, revised as of July 1, 2008, is herein incorporated by reference. ()

02. Applicability of Corrosion Control Treatment Steps to Small, Medium-Size, and Large Water Systems. 40 CFR 141.81, revised as of July 1, 2008, is herein incorporated by reference. ()

03. Description of Corrosion Control Treatment Requirements. ()

- a. 40 CFR 141.82, revised as of July 1, 2008, is herein incorporated by reference. ()
- b. The Department may modify its determination of the optimal corrosion control treatment or optimal water quality control parameters where it concludes that such changes are necessary to optimize corrosion control treatment as specified in 40 CFR 141.82(h) and as referred to in Subsection 350.03. The Department may also modify its determination of the optimal corrosion control treatment or water quality control parameters where it finds such changes will provide equivalent or improved treatment in a manner which is simpler or less costly to operate. ()

04. Source Water Treatment Requirements. 40 CFR 141.83, revised as of July 1, 2008, is herein incorporated by reference. The Department may modify its determination of optimal source treatment or maximum permissible lead and copper concentrations where it concludes that such changes are necessary as specified in 40

CFR 141.83(b)(6). ()

05. Lead Service Line Replacement Requirements. 40 CFR 141.84, revised as of July 1, 2008, is herein incorporated by reference. ()

06. Public Education and Supplemental Monitoring Requirements. 40 CFR 141.85, revised as of July 1, 2008, is herein incorporated by reference. ()

07. Monitoring Requirements for Lead and Copper in Tap Water. 40 CFR 141.86, revised as of July 1, 2008, is herein incorporated by reference. ()

08. Monitoring Requirements for Water Quality Parameters. 40 CFR 141.87, revised as of July 1, 2008, is herein incorporated by reference. ()

09. Monitoring Requirements for Lead and Copper in Source Water. 40 CFR 141.88, revised as of July 1, 2008, is herein incorporated by reference. ()

10. Analytical Methods. 40 CFR 141.89, revised as of July 1, 2008, is herein incorporated by reference. ()

11. Reporting Requirements. 40 CFR 141.90, revised as of July 1, 2008, is herein incorporated by reference. ()

12. Recordkeeping Requirements. 40 CFR 141.91, revised as of July 1, 2008, is herein incorporated by reference. ()

351. -- 399. (RESERVED)

400. SECONDARY MCLS.

01. Purpose. 40 CFR 143.1, revised as of July 1, 2003, is herein incorporated by reference. ()

02. Definitions. 40 CFR 143.2, revised as of July 1, 2003, is herein incorporated by reference. ()

03. Secondary Maximum Contaminant Levels. 40 CFR 143.3, revised as of July 1, 2003, is herein incorporated by reference. ()

04. Monitoring. 40 CFR 143.4, revised as of July 1, 2010, is herein incorporated by reference. ()

401. -- 449. (RESERVED)

450. USE OF NON-CENTRALIZED TREATMENT DEVICES.

01. Criteria and Procedures for Public Water Systems Using Point of Entry Devices. 40 CFR 141.100 is herein incorporated by reference. ()

02. Point of Use (POU) Treatment Devices. ()

a. A public water system may use point of use (POU) treatment in order to achieve compliance with certain maximum contaminant levels (MCL) or treatment techniques, in accordance with Subsection 450.02.b., when the following conditions are met: ()

i. A program for long-term operation, maintenance, and monitoring of the POU treatment system is approved by the Department, pursuant to Section 450.02.d. ()

ii. The public water system or a vendor of POU treatment devices under contract with the public water system shall own, control, and maintain the POU treatment system to ensure proper operation and maintenance and compliance with the MCL or treatment technique. ()

iii. Each POU treatment device is equipped with a mechanical warning mechanism to ensure that customers are automatically notified of operational problems. ()

iv. The POU treatment device must be certified by an accredited American National Standards Institute (ANSI) certification body to meet applicable ANSI/National Sanitation Foundation (NSF) Standards. ()

b. POU treatment devices shall not be used to achieve compliance with a MCL or treatment technique requirement for a microbial contaminant or an indicator of a microbial contaminant. Community water systems may not use POU treatment devices to achieve compliance with a nitrate MCL. ()

c. The Department will waive the plan and specification requirements of Section 504 relating to material modifications for the following systems only to the extent that the material modification proposed is limited to the installation or use of a POU treatment device(s): ()

i. Community water systems serving two hundred (200) or fewer service connections. ()

ii. Non-transient non-community water systems. ()

iii. Transient non-community water systems. ()

iv. Community water systems serving more than two hundred (200) service connections if approved by the Department through the waiver process outlined in Subsection 005.01.a. ()

d. A public water system must obtain written approval by the Department before installation of a POU treatment device for the purpose of achieving compliance with a MCL or treatment technique. The public water system shall submit the following documentation for approval to the Department: ()

i. Information identifying the public water system name and number, total number of service connections, contaminant(s) to be treated, type of POU treatment device to be installed, manufacturer and model number of the POU treatment device, type and function of the mechanical warning mechanism (performance indicator) on the POU treatment device, certification verification for ANSI/NSF, installer qualifications, and a proposed date for installation of the POU treatment device(s). ()

ii. The manufacturer's specifications for the POU treatment device including demonstration that the POU treatment device is suited for the water chemistry of the public water system and contaminant(s) of concern and is of sufficient design and capacity for the particular application. ()

iii. Information relating to how other drinking water dispensing units, such as instant hot water dispensers and refrigerator water and ice dispensers, whose primary function is to provide drinking water, will be provided with treated water. If water is transported from a POU treatment device to another drinking water dispensing unit, the conducting tube shall be of non-reactive material. ()

iv. For non-transient non-community water systems and transient non-community water systems, demonstration that the drinking water dispensing units are located in areas adequate to protect public health. ()

v. Demonstration that all POU treatment devices are owned, controlled, and maintained by the public water system or by a vendor of POU treatment devices under contract with the public water system. ()

vi. A sampling plan identifying the location of all service connections and demonstrating how the system will ensure that all POU treatment devices are sampled for compliance with the contaminant(s) being treated during every compliance period or at a frequency designated by the Department. ()

vii. Documentation that a customer at each service connection has agreed to installation and use of a POU treatment device and has granted access for installation, maintenance, and sampling. ()

viii. A plan that describes how the public water system will address any non-compliance with Subsection 450.02.d.vii. ()

ix. A maintenance plan that demonstrates how on-going maintenance activities will be performed and on what frequency, including: frequency of treatment media replacements, frequency of POU treatment device replacements, periodic verification that the mechanical warning device is functional, schedule of planned maintenance activities, plan of how the system will address unscheduled maintenance problems, and a plan and method of waste disposal. ()

x. Documentation that the system meets the current requirements for a certified operator pursuant to Section 554. ()

xi. A plan for on-going education and outreach to the customers of the public water system, including rental customers, on POU treatment and health effects of the contaminant(s) of concern. ()

xii. A plan for how the system will ensure real estate disclosures for the POU treatment system. ()

xiii. A statement of recognition that failure to maintain compliance with the MCL, or the failure to operate and maintain compliance with a POU treatment system as approved by the Department, may necessitate installation of centralized treatment. ()

e. Within thirty (30) days of installing the approved POU treatment system, the public water system shall notify the Department in writing that the POU treatment system was installed as approved by the Department. ()

f. Within thirty (30) days of installing the approved POU treatment system, the public water system shall submit samples from each POU treatment device to a certified laboratory for the contaminant(s) being treated by the POU treatment device. The samples shall be used to demonstrate initial compliance with the MCL. ()

g. The water system owner or operator must maintain records for a POU treatment system. Records shall be submitted to the Department at a frequency and in a format specified by the Department. Records to maintain shall include: ()

i. Requirements of Subsection 450.02.d.; ()

ii. All sampling performed on the POU treatment devices; ()

iii. Maintenance logs and schedules; ()

iv. Log of installed units; and ()

v. Contracts, lease agreements, or other legal documents with vendors and consumers. ()

03. Use of Bottled Water. 40 CFR 141.101 is herein incorporated by reference. ()

451. TREATMENT TECHNIQUES.

01. General Requirements. 40 CFR 141.110 is herein incorporated by reference. ()

02. Treatment Techniques for Acrylamide and Epichlorohydrin. 40 CFR 141.111 is herein incorporated by reference. ()

452. -- 499. (RESERVED)

500. FACILITY AND DESIGN STANDARDS: DEMONSTRATION OF TECHNICAL, FINANCIAL, AND MANAGERIAL CAPACITY OF PUBLIC DRINKING WATER SYSTEMS.

No person shall proceed, or cause to proceed, with construction of a new or substantially modified community or nontransient, noncommunity drinking water system until it has been demonstrated to the Department that the water system will have adequate technical, financial, and managerial capacity, as defined in Section 003 of these rules. With the exception of water sources, demonstration of capacity shall be submitted to the Department prior to or concurrent with the submittal of plans and specifications, as required in Section 39-118, Idaho Code, and Subsection 504.03 of these rules. Plans and specifications for water sources may be submitted to the Department prior to demonstration of capacity for the water system. The Department shall issue its approval of the new system capacity demonstration in writing. ()

01. Technical Capacity. In order to meet this requirement, the public water system shall submit documentation to demonstrate the following: ()

- a. The system meets the relevant design, construction, and operating requirements of these rules; ()
- b. The system has an adequate and consistent source of water; ()
- c. A plan is in place to protect the water source and deal with emergencies; ()
- d. A plan exists for replacement or improvement of infrastructure as necessary; and ()
- e. The system has trained personnel with an understanding of the technical and operational characteristics of the system. ()

02. Financial Capacity. A demonstration of financial capacity must include but is not limited to the following information: ()

- a. Documentation that organizational and financial arrangements are adequate to construct and operate the public water system in accordance with these rules. This information can be provided by submitting estimated construction, operation, and maintenance costs, letters of credit, or other access to financial capital through public or private sources and, if available, a certified financial statement; ()
- b. Demonstration of revenue sufficiency, that includes but is not limited to billing and collection procedures; a proposed rate structure which demonstrates the availability of operating funds, revenues for depreciation and reserves, and the ability to accrue a capital replacement fund. A preliminary operating budget shall be provided; and ()
- c. Adequate fiscal controls must be demonstrated. ()

03. Managerial Capacity. In order to demonstrate adequate managerial capacity, the owner or operator of a new drinking water system shall submit at least the following information to the Department: ()

- a. Clear documentation of legal ownership and any plans that may exist for transfer of that ownership upon completion of construction or after a period of operation; ()
- b. The name, address, and telephone number of the person who will be accountable for ensuring that the water system is in compliance with these rules; ()
- c. The name, address, and telephone number of the responsible charge operator; ()
- d. A description of the manner in which the water system will be managed. Information such as by-laws, restrictive covenants, articles of incorporation, or procedures and policy manuals which describe the management organizational structure shall be provided; ()

e. A recommendation of staff qualifications, including training, experience, certification or licensing, and continuing education; ()

f. An explanation of how the water system will establish and maintain effective communications and relationships between the water system management, its customers, professional service providers, and any applicable regulatory agencies; and ()

g. Evidence of planning for future growth, equipment repair and maintenance, and long term replacement of system components. ()

04. Submittal Form. The Department shall provide a standard form to be used in preparing a new system capacity demonstration. The submittal form and general guidance on how to prepare a new system capacity document is provided in, "How to Demonstrate Financial, Technical, and Managerial Capacity in New Public Water Systems." This document may be requested from the Department and is available on the DEQ website at <http://www.deq.idaho.gov>. ()

05. Expanding Systems. A public water system which comes into existence as a result of growth in population or number of service connections within a previously unregulated system will be considered a new system under these rules and is subject to all design, construction and operating requirements herein. ()

06. Consolidation. In demonstrating new system capacity, the owner of the proposed new system must investigate the feasibility of obtaining water service from an established public water system. If such service is available, but the owner elects to proceed with an independent system, the owner must explain why this choice is in the public interest in terms of environmental protection, affordability to water users, and protection of public health. ()

07. Exclusion. New public water systems which are public utilities as defined in Sections 61-104 (Corporation), 61-124 (Water System), 61-125 (Water Corporation), and 61-129 (Public Utility), Idaho Code, must meet the regulatory requirements of the Idaho Public Utilities Commission (IPUC) in Chapter 1, Title 61, Idaho Code, Public Utilities Law, and IDAPA 31.01.01, "Rules of Procedure of the Idaho Public Utilities Commission." Such water systems will not be required to meet any requirements of this Section which are in conflict with the provisions and requirements of the IPUC. ()

501. FACILITY AND DESIGN STANDARDS: GENERAL DESIGN REQUIREMENTS FOR PUBLIC DRINKING WATER SYSTEMS.

Unless otherwise specified by the Department, the design of new drinking water systems, or modifications to existing, public drinking water systems, shall be in conformance with the facility and design standards set forth in Sections 006 and 500 through 552 of these rules. The following general design requirements shall apply as applicable for the type of water system and the treatment or other processes employed. ()

01. Materials Used in Construction. Products that are used to construct public drinking water systems and have water contact surfaces shall conform to applicable AWWA standards and be certified by an accredited ANSI certification body to meet applicable ANSI/NSF standards, where products meeting such AWWA and ANSI/NSF standards exist. In the absence of such products, products meeting applicable product standards and acceptable to the reviewing authority may be selected. Corrosion control shall be taken into account during all aspects of public water system design. ()

02. Additives Used in Operation. No chemical or other substance shall be added to drinking water, nor shall any process be utilized to treat drinking water, unless specifically approved by the Department. All chemicals shall conform to applicable AWWA standards and be certified by an accredited ANSI certification body to meet ANSI/NSF Standard 60, referenced in Subsection 002.02. ()

03. Design Basis. The system, including the water source and treatment facilities, shall be designed to provide either peak hour demand of the system or maximum day demand plus equalization storage at the design year. ()

04. Design of Treatment Facilities. Design of treatment facilities shall address: ()

- a. Functional aspects of facility layout and provisions for future facility expansion; ()
 - b. Provision for expansion of waste treatment and disposal facilities (see Section 540); ()
 - c. Roads constructed to provide year-round access by vehicles and equipment needed for repair and maintenance; ()
 - d. Site grading and drainage; and ()
 - e. Chemical Feed or Injection. Unless otherwise approved by the Department based on documentation provided by the design engineer, all chemical feed or injection systems must be designed to ensure complete mixing through rapid mix devices or other measures. ()
 - f. Redundancy. Unless otherwise approved by the Department or as specified in other sections of these rules, to ensure that minimum quality, quantity, and pressure requirements of these rules are continuously met during maintenance, breakdowns, structural failures, emergencies, or other periods when components must be out of service, water system treatment, filtration, and disinfection components for all new or substantially modified community or nontransient, noncommunity drinking water systems shall be designed such that plant design capacity can be maintained with any component out of service. Raw water intake structures are excluded from the general redundancy requirement but shall be designed to ensure that plant design capacity will be maintained. ()
- 05. Design of Buildings.** The design of buildings that are a part of public drinking water systems shall provide for: ()
- a. Adequate ventilation, lighting, heating, and air conditioning; ()
 - b. Adequate drainage; ()
 - c. Dehumidification equipment, if necessary; ()
 - d. Accessibility of equipment for operation, servicing, and removal; ()
 - e. Flexibility and convenience of operation and safety of operators; and ()
 - f. Separate room(s) for chemical storage and feed equipment that may be required based on type of chemicals and associated hazards. ()
- 06. Electrical.** Main switch gear electrical controls shall be located above grade, in areas not subject to flooding. All electrical work shall conform to the requirements of the National Electrical Code or to relevant state/local codes. The National Electrical Code is available from the National Fire Protection Association, 1 Batterymarch Park, Quincy, Massachusetts 02169-7471, (617)770-3000, <http://www.nfpa.org>. ()
- 07. Reliability and Emergency Operation.** New community water systems constructed after April 15, 2007 are required to have sufficient dedicated on-site standby power, with automatic switch-over capability, or standby storage so that water may be treated and supplied to pressurize the entire distribution system during power outages. During a power outage, the water system shall be able to meet the operating pressure requirements of Subsection 552.01.b. for a minimum of eight (8) hours at average day demand plus fire flow where provided. A minimum of eight (8) hours of fuel storage shall be located on site unless an equivalent plan is authorized by the Department. Standby power provided in a public drinking water system shall be coordinated with the standby power that is provided in the wastewater collection and treatment system. ()
- a. The Department may require the installation of standby power or storage facilities in existing systems if the frequency and duration of power outages a system experiences constitute a health hazard. ()
 - b. Existing community public water systems that are substantially modified after April 15, 2007 shall meet the requirements of Subsection 501.07. in those portions of the system affected by the modifications. ()

c. New sources and booster pumps intended to increase system capacity shall be provided with standby power or equivalent unless, during a power outage, the public water system or distribution system pressure zone can already meet the minimum operating capacity and pressure requirements in Subsection 501.07 for a minimum of eight (8) hours at average day demand plus fire flow where provided for each pressure zone. ()

d. For both new and existing public water systems, the Department may reduce the requirements of Subsection 501.07 if the system can demonstrate the capacity to adequately protect public health during a power outage. Any decision by the Department will be based on, but not limited to, the following considerations: ()

i. An adequate emergency response and operation plan and the capacity to implement that plan. ()

ii. The adequacy of the system's cross connection control program and the capacity to protect public health in the event of a system wide depressurization. ()

iii. Demonstration of historical and projected reliability of the electrical power supplied to the water system. ()

iv. A strategy for providing information to the public during power outages, including instructions to stop irrigation, boil water, etc., until notified otherwise. ()

v. The level of reliability acceptable to consumers. This can be accomplished with either a vote of the majority of consumers for privately owned and operated systems or a decision by the governing body for publicly governed systems. ()

vi. Other considerations that may be pertinent, including connections to other public water systems, agreements to provide water in emergency situations, and the availability of dedicated portable auxiliary power. ()

08. On-Site Analysis and Testing Capabilities. Each public water system shall have equipment and facilities for routine testing necessary to ensure proper operation. Equipment selection shall be based on the characteristics of the raw water source and the complexity of the treatment process involved. ()

09. Sample Taps. Sample taps shall be provided so that water samples can be obtained from each water source and from appropriate locations in each unit operation of treatment, and from the finished water. Taps shall be consistent with sampling needs and shall not be of the petcock type. Taps owned by the water system and used for obtaining samples for bacteriological analysis shall be of the smooth-nosed type without interior or exterior threads, shall not be of the mixing type, and shall not have a screen, aerator, or other such appurtenance. ()

10. Facility Potable Water Supply. The facility water supply service line and the plant finished water sample tap shall be supplied from a source of finished water at a point where all chemicals have been thoroughly mixed, and the required disinfectant contact time, if applicable, has been achieved. There shall be no cross connections between the facility water supply service line and any piping, troughs, tanks, or other treatment units containing wastewater, treatment chemicals, raw or partially treated water. ()

11. Meters. All water supplies shall have an acceptable means of measuring the flow from each source, the wash water, the recycled water, any blended water of different quality, and the finished water. ()

12. Operation and Maintenance Manual. A new or updated operation and maintenance manual that addresses all water system facilities shall be submitted to the Department for review and approval prior to start-up of the new or materially modified public water system unless the same system components are already covered in an existing operation and maintenance manual. For existing systems with continual operational problems as determined by the Department, the Department may require that an operation and maintenance manual be submitted to the Department for review and approval. The operator shall ensure that the system is operated in accordance with the approved operation and maintenance manual. ()

13. Start-Up Training. Provisions shall be made for operator instruction at the start-up of a new plant or pumping station. ()

14. Safety. Consideration shall be given to the protection of maintenance personnel and visitors from typical and foreseeable hazards in accordance with the engineering standards of care. The design shall comply with all applicable safety codes and regulations that may include the Uniform Building Code, International Fire Code, National Fire Protection Association Standards, and state and federal OSHA standards. Items to be considered include, but are not limited to, noise arresters, noise protection, confined space entry, protective equipment and clothing, gas masks, safety showers and eye washes, handrails and guards, warning signs, smoke detectors, toxic gas detectors and fire extinguishers. ()

15. Security. Appropriate design measures to help ensure the security of water system facilities shall be incorporated. Such measures, at a minimum, shall include means to lock all exterior doorways, windows, gates and other entrances to source, treatment, pumping stations, and water storage facilities. ()

16. Other Regulations. Consideration must be given to the design requirements of other federal, state, and local regulatory agencies for items such as safety requirements, special designs for the handicapped, plumbing and electrical codes, and construction in the flood plain. ()

17. Ground Water Source Redundancy. New community water systems served by ground water shall have a minimum of two (2) sources if they are intended to serve more than twenty-five (25) connections or equivalent dwelling units (EDUs). Under normal operating conditions, with any source out of service, the remaining source(s) shall be capable of providing either the peak hour demand of the system or a minimum of the maximum day demand plus equalization storage. See Subsection 501.18 for general design and redundancy requirements concerning fire flow capacity. ()

18. Redundant Fire Flow Capacity. ()

a. Public water systems that provide fire flow shall be designed to provide maximum day demand plus fire flow. Fire flow requirements and system adequacy shall be determined by the local fire authority or by a hydraulic analysis by a licensed professional engineer to establish required fire flows in accordance with the International Fire Code as adopted by the State Fire Marshal. Pumping systems supporting fire flow capacity must be designed so that fire flow may be provided with any pump out of service. ()

b. The requirement for redundant pumping capacity specified in Subsection 501.18.a. may be reduced to the extent that fire suppression storage is provided in sufficient quantity to meet some or all of fire flow demands. Where fire suppression storage is not provided, the requirement for fire flow pumping redundancy may be reduced or eliminated if the following conditions are met: ()

i. The local fire authority justifies that the fire flow capacity of the system is acceptable and is compatible with the water demand of existing and planned fire-fighting equipment and fire-fighting practices in the area served by the system. ()

ii. In a manner appropriate to the system type and situation, notification is provided to customers that describes the design of the system's fire-fighting capability and explains how it differs from the requirements of Subsection 501.18.a. ()

19. Pilot Studies. Unless otherwise approved by the Department based on documentation provided by the design engineer, pilot studies are required for treatment processes other than chlorine disinfection or point of use installations. Pilot studies may be performed in the field using the proposed source water or in conjunction with bench scale testing in the lab using the proposed source water. The system shall obtain the Department's approval of a pilot study plan before the pilot study is implemented. A pilot study shall be conducted for a period that shall be determined by the design engineer and approved by the Department. A final pilot study report with results shall be submitted to the Department for review and approval. Upon completion of the pilot study, final approval of equipment and treatment processes is subject to the applicable requirements of Sections 500 through 552. ()

a. Pilot Study Plan. A pilot study plan shall include the following and any other items required by the

Department: ()

i. Introduction and Background. The plan shall discuss general information about the project including the existing system, the reason for conducting the pilot study, and anticipated results of a successful pilot study. ()

ii. Alternative Processes. Provide a brief description of alternative processes that could be used if the proposed process is shown to be ineffective from the study. ()

iii. Procedures and Methods. The procedures and methods section shall discuss how the pilot study will be conducted, the time frame of the study, source water quality, how source water may be altered to mimic various source water quality conditions, and the water quality parameters that are monitored and evaluated to determine if the treatment process was effective. ()

b. Pilot Study Report. The pilot study report shall include the following and any other items required by the Department: ()

i. Introduction and Background. ()

ii. Results. A discussion of the overall pilot study progress, including any issues or problems and a general discussion of results of the study and what the results indicate. This discussion should determine parameters necessary for full scale implementation. ()

iii. Conclusions. Conclusions and recommendation to proceed with the treatment process if the results of the study proved successful. ()

c. Additional specific pilot study requirements in Sections 500 through 552 shall be included in pilot study plans and reports. ()

d. Engineer's Seal Required. Pilot study plans and pilot study reports submitted to the Department shall bear the imprint of an Idaho licensed professional engineer's seal that is both signed and dated by the engineer. ()

502. FACILITY AND DESIGN STANDARDS: FACILITY PLANS.
See the definition of Facility Plan in Section 003. ()

01. Facility Plans Required. All new public drinking water systems, and existing public drinking water systems undergoing material modification or expansion, are required to have a current facility plan that shall address all applicable issues specifically required in Sections 500 through 552 of these rules including, but not limited to, hydraulic capacity, treatment capacity, standby power, redundancy, fire flows, project financing, and operation and maintenance considerations sufficiently to determine the effects of the project on the overall infrastructure. Facility plans must address the entire potential service area of the project. Facility plans may not be required for simple water main extension projects as detailed in Subsections 502.01.a. and 502.01.b. ()

a. Department-reviewed simple water main extension projects. A facility plan is not required if the Department is provided documentation supporting the ability of the purveyor to provide service for the simple water main extension without adding system components designed to control quantity or pressure to the system and while continuing to provide the pressure and quantity requirements of Subsection 552.01. Documentation may be in the form of: ()

i. Hydraulic modeling; ()

ii. Usage data and flow calculations; ()

iii. Declining balance reports that demonstrate the system has the capacity to supply the service area of the system served by the extension; or ()

- iv. Other documentation acceptable to the Department. ()

b. Qualified Licensed Professional Engineer (QLPE)-reviewed Simple Water Main Extension Projects. A Department-approved facility plan is not required to be in place prior to the QLPE approving a simple water main extension pursuant to Subsection 504.03.b., provided that the service area of the system served by the extension is in compliance with the facility and design standards in Sections 500 through 552 of these rules. If the Department has not approved a facility plan for the system which includes the proposed simple water main extension, then the system purveyor or the QLPE shall provide with the transmittal letter documentation supporting the ability of the purveyor to provide service for the simple water main extension without adding system components designed to control quantity or pressure to the system and while continuing to provide the pressure and quantity requirements of Subsection 552.01. The purveyor shall provide this documentation to the QLPE as necessary. Documentation may be in the form of: ()

- i. Hydraulic modeling; ()
- ii. Usage data and flow calculations; ()
- iii. Declining balance reports that demonstrate the system has the capacity to supply the service area of the system served by the extension; or ()
- iv. Other documentation acceptable to the Department. ()

02. Submittal to the Department. When required, facility plans shall be submitted to the Department for review and approval prior to the submission of plans and specifications for a project related to the facility plan. ()

03. Engineer's Seal Required. Facility plans submitted to the Department shall bear the imprint of an Idaho licensed professional engineer's seal that is both signed and dated by the engineer. ()

04. Facility Plan Contents. The facility plan shall include basic information, criteria and assumptions, and alternative solutions with preliminary layouts and cost estimates as applicable. The facility plan is intended to address system wide growth, to identify system deficiencies, and to lay out a plan for system upgrades and expansion. ()

a. New public water system facility plan. The minimum requirements for a facility plan for a new public water system are listed in Subsections 502.04.a.i. through 502.04.a.viii. If specific items listed in Subsections 502.04.a.i. through 502.04.a.viii. are not applicable to a particular system, then the submitting engineer shall state this in the facility plan and state the reason why the requirement is not applicable. The facility plan must also include sufficient detail to support applicable requirements of Sections 501 through 552. ()

- i. Location. A general description and location of the system. ()
- ii. Population. The estimated design population of the system including the number of connections and the number of EDUs proposed. ()
- iii. Sources of Water. Adequacy, quality, and availability of sources of water for potable use and a description of the non-potable irrigation system. ()
- iv. Treatment. Identify and describe any anticipated treatment. ()
- v. Water Quantity. Design data for domestic, irrigation, fire fighting, commercial, or industrial water uses, including peak hour, maximum day, and average day demands. ()
- vi. Storage. Include the size and location of any anticipated storage structures. ()
- vii. Operating Pressure. Pressure ranges for all flow conditions prescribed by these rules. ()

viii. Sewage. Describe the sewage collection system and sewage treatment works, with reference to their relationship to existing or proposed water works structures which may affect the operation of the water supply system, or which may affect the quality of the supply. ()

b. Existing public water system facility plan. The minimum requirements for a facility plan for an existing public water system must include Subsections 502.04.b.i. through 502.04.b.vii. as well as Subsections 502.04.a.i. through 502.04.a.viii. If specific items listed in Subsections 502.04.b.i. through 502.04.b.vii. or Subsections 502.04.a.i. through 502.04.a.viii. are not applicable to a particular facility plan, then the submitting engineer shall state this in the facility plan and state the reason why the requirement is not applicable. The facility plan must also include sufficient detail to support applicable requirements of Sections 501 through 552. ()

i. Hydraulic analysis. A computer analysis of the hydraulics of the distribution system if requested by the Department; any analysis of an existing distribution system shall be properly calibrated. The type or sophistication of analysis shall be dependent on the type of system. ()

ii. Identify and evaluate problems related to the drinking water system. ()

iii. Describe financing methods. ()

iv. Set forth anticipated charges for users. ()

v. Review organizational and staffing requirements. ()

vi. Offer a project(s) recommendation for client consideration. ()

vii. Outline official actions and procedures to implement the project. ()

c. **Public Water System Facility Plan funded by the State Revolving Fund.** If the project is funded by the state revolving fund or a state grant, the facility plan must meet the requirements of Subsections 502.04.a. and 502.04.b., and other requirements that may also apply. See IDAPA 58.01.20, "Rules for Administration of Drinking Water Loan Program," and IDAPA 58.01.22, "Rules for Administration of Planning Grants for Public Drinking Water Facilities." ()

d. Facility Plan Guidance. A checklist, which can be used as guidance, can be found on the DEQ website at <http://www.deq.idaho.gov>. The guidance document is for Department grant and loan projects, but may be used in part or in whole as a guide to assist in the development of any facility plan. ()

503. FACILITY AND DESIGN STANDARDS: PRELIMINARY ENGINEERING REPORTS.

See the definition of Preliminary Engineering Report in Section 003. Preliminary engineering reports are required for all new water systems or material modifications to existing water systems that require plan and specification review and approval pursuant to Subsection 504.03. The preliminary engineering report shall be in conformance with the approved facility plan or shall describe any modifications to the facility plan. Preliminary engineering reports must be completed for all major water system projects including, but not limited to, source, pump station, pressure control, storage, and treatment projects. Preliminary engineering reports are not required for simple water main extensions that are approved in accordance with Subsections 502.01.a. or 502.01.b. ()

01. Submittal to Reviewing Authority. Preliminary engineering reports shall be submitted to the Department for review and must be approved by the Department prior to the submission of plans and specifications. The Department may allow well construction plans and specifications to be submitted concurrently with a preliminary engineering report for these projects. ()

02. Seal Required. Preliminary engineering reports submitted to the Department shall bear the imprint of an Idaho licensed professional engineer's seal that is both signed and dated by the engineer. The Department will accept the seal and signature of an Idaho licensed professional geologist on preliminary reports for well source, spring source, or infiltration gallery site reports, and for well construction. ()

03. Preliminary Engineering Report Contents. The preliminary engineering report must include

sufficient detail to demonstrate that the proposed project meets applicable criteria. The items included in Subsections 503.03.a. through 503.03.e., and all applicable issues and items specifically required in Sections 500 through 552, shall be addressed in detail. As required, a preliminary engineering report shall also identify and evaluate drinking water related problems, assemble basic information, present criteria and assumptions, examine alternative solutions with preliminary layouts and cost estimates, offer a conclusion with a proposed project, and outline official actions and procedures to implement the project. If specific items in Subsections 503.03.a. through 503.03.e. are not applicable to a particular design, then the designer shall state this in the preliminary engineering report and state the reason why it is not applicable. Items adequately addressed in the facility plan under which the project is being designed may be addressed by reference for purposes of the preliminary engineering report. ()

a. All preliminary engineering reports shall include items in Subsection 503.03.a. and the applicable items from Subsections 503.03.b. through 503.03.e. ()

i. General information. The preliminary engineering report general information shall include, but is not limited to: ()

(1) Project description. A detailed description of the proposed project; ()

(2) Site selection. A general description of the location of the project and justification of the site selection; ()

(3) Access and utilities. A general discussion of adequacy of local roadways and availability of power or other utilities; ()

(4) Surrounding land use. A general discussion of surrounding land use, including any potential sources of contamination; and ()

(5) Security. A general discussion of planned security features such as fencing, lighting, alarm systems, etc. ()

ii. Coordination with facility plan. The preliminary engineering report shall discuss or reference items provided in the Department-approved facility plan. These items include, but are not limited to: ()

(1) Existing System. A general description of the existing system and how the project fits into the overall system and facility plan; ()

(2) Size. The estimated system size based on number of persons, number of connections, or number of EDUs served or impacted by the project; ()

(3) Water Quantity. Design data for domestic, irrigation, fire fighting, commercial and industrial water uses, including peak hour, maximum day, and average day demands; ()

(4) Storage. How the project will affect various storage requirements. See definition of Components of Finished Water Storage in Section 003; ()

(5) Operating Pressure. Pressure ranges for all flow conditions prescribed by these rules; ()

(6) Hydraulic Analysis. A computer analysis of the hydraulics of the distribution system if requested by the Department; any analysis of an existing distribution system shall be properly calibrated. The type and sophistication of analysis shall be dependent on the type of system; ()

(7) Sources of Water. A general discussion of the adequacy, quality and availability of source of water. A water system that is to be served by a separate non-potable irrigation system must provide documentation to demonstrate the actual availability of water in sufficient quantity to ensure that the irrigation system will not compete with or in any way diminish the source of water for the potable water system; ()

(8) Sewage. Describe the sewage collection system and sewage treatment works, with special

reference to their relationship to existing or proposed water works structures which may affect the operation of the water supply system, or which may affect the quality of the supply; ()

(9) Treatment wastes. Assesses and characterize all anticipated waste discharges generated by the project and any activities that could impact the water supply. The location of each waste handling area or discharge point shall be shown on a scale map; ()

(10) Financing methods. Provide brief discussion of financing options investigated or planned; and ()

(11) Flooding. Discuss mechanisms for protection of the system from flooding. ()

iii. Code provisions. The preliminary engineering report shall include a summary of applicable codes and standards that apply to the proposed project. ()

iv. Cost estimate. The preliminary engineering report shall provide, as applicable, estimated construction costs for public works projects or projects funded through public monies. ()

v. Construction schedule. The preliminary engineering report shall include the proposed construction schedule. ()

vi. Potential sources of contamination. Identify sources of contamination and describe how the drinking water sources will be protected. ()

vii. Soils and ground water levels. Generally discuss soil, ground water conditions, and potential building foundation problems, including a description of: ()

(1) The character of the soil through which water mains are to be laid; ()

(2) Characteristics of the soil, water table, and geological substrate that may affect the design and construction of the foundations of proposed structures; and ()

(3) The approximate elevation of ground water in relation to subsurface structures. ()

b. Drinking water wells and spring construction projects. In addition to items listed in Subsection 503.03.a., a preliminary engineering report for source water construction projects shall include all items listed in Subsection 503.03.b., applicable items in Sections 510 through 514, and Sections 500 to 552 should be evaluated for their relevance to the project. ()

i. Anticipated geology and hydrogeology. Include geological data and existing well logs. ()

ii. Drilling methodology. Describe the anticipated drilling method and well construction. ()

iii. Water quality. Anticipated potability and water quality including monitoring results required for new sources by these rules. ()

iv. Water rights. Provide the appropriate documentation for the water rights for the drinking water source. ()

v. Dimensions of the well lot and location of source. Include geographical coordinates of the source location. ()

vi. Evaluation of surface water influence. For all new ground water sources, including but not limited to wells, springs, and infiltration galleries, systems shall supply information as required by the Department to determine if these sources are under the direct influence of surface water. ()

vii. Provide a site evaluation report as required by Section 510 for wells and 514 for springs. ()

c. Well and pump house construction projects. In addition to items listed in Subsection 503.03.a., preliminary engineering reports for well and pump house construction projects shall include all items listed in Subsection 503.03.c., applicable items in Sections 511, 541, 547, and Sections 500 to 552 should be evaluated for their relevance to the project. ()

i. Well house. Include information on the anticipated construction and well house equipment such as heating, ventilation, interior lighting, and drain(s). ()

ii. Water Level. Provide a brief description of the means for measuring the water level in the well. ()

iii. Well pump. Include information on the proposed or planned pump, including the pump curve. ()

iv. Controls. Describe the equipment and controls for the well and pump house. This includes but is not limited to system control and data acquisition, variable frequency drive, and other manual or automated controls within the well house. ()

v. Piping and appurtenances including but not limited to sample taps, discharge piping, flow meters, check valves, and pressure gauges. Describe the receiving system for the pump to waste volume of water including an evaluation of the capacity of the receiving system and, if applicable, provide documentation that the system owner will accept the estimated volume of water and any limitations the owner places upon that acceptance. ()

vi. Well vent. Describe the well vent if applicable. ()

vii. Casings and well caps. Describe the anticipated casing and well cap type and materials. ()

viii. Pitless adapters and units. Describe the anticipated pitless adapter for the well. ()

ix. Soil and water conditions. Describe the soil and ground water conditions that may affect the design and construction of proposed structure(s). ()

d. Reservoir and storage construction projects. In addition to items listed in Subsection 503.03.a., preliminary engineering reports for reservoir and storage construction projects shall include all items listed in Subsection 503.03.d., applicable items in Sections 544, and Sections 500 to 552 should be evaluated for their relevance to the project. ()

i. Sizing. Describe the required storage capacity and the related components of finished water storage. ()

ii. Overflow. Describe the anticipated overflow system for the water storage project and where the overflow will discharge. ()

iii. Vents. Describe the venting system used for the water storage project if applicable. ()

iv. Construction materials. Describe the construction materials used for the storage project. ()

v. Protection from freezing. Describe the protection of storage facility features from freezing especially riser pipes, overflows, and vents. ()

vi. Grading. Describe any site work or grading that may be necessary. ()

vii. Corrosion prevention. Provide a discussion on methods to prevent corrosion such as coatings, cathodic protection, corrosion resistant materials, and encasement. ()

viii. Disinfection. Describe the methods to be used to disinfect the storage facility and the testing to

check for proper disinfection. ()

e. Surface water and ground water under the direct influence of surface water (GWUDI) treatment construction projects. In addition to items listed in Subsection 503.03.a., preliminary engineering reports for surface water treatment and GWUDI construction projects shall include all items listed in Sections 503.03.e., applicable items in Sections 515 through 540, and Sections 500 to 552 should be evaluated for their relevance to the project. ()

i. Intake structures. Describe the intake structures that will be used. ()

ii. Off-stream raw water storage. If applicable, describe the proposed off-stream raw water storage. ()

iii. Treatment methods. Describe the treatment methods and potential alternatives including the removal of pathogens, disinfection, enhanced disinfection, water quality monitoring, and redundancy provisions. ()

iv. Treatment Wastes. Characterize the various wastes from the water treatment processes and, if applicable, their volumes, constituents, and proposed treatment and disposal. If discharging to a sanitary sewage system, verify that the system is capable of handling the flow to the treatment works and that the treatment works is capable and willing to accept the additional loading. ()

v. Monitoring Results. Provide applicable raw water monitoring results as required by these rules including anticipated turbidity ranges, microbiological, physical, chemical, radiological, and other parameters as determined by the Department. ()

vi. Potential contamination. An assessment of the degree of hazard to the supply by agricultural, industrial, recreational, and residential activities in the watershed, and by accidental spillage of materials that may be toxic, harmful or detrimental to treatment processes. ()

vii. Waste discharge. Assess all waste discharges and activities that could impact the water supply. The location of each waste discharge shall be shown on a scale map. ()

viii. Hydrological and historical stream flow data. Provide any available records and data. ()

ix. Water rights and water quantity. A copy of the appropriate permit(s) or application(s) from the Idaho Department of Water Resources regarding authorization to appropriate public waters of the state of Idaho in sufficient quantity to meet the design requirements of the system. ()

x. Turbidity. Anticipated turbidity range. ()

xi. Watershed. Assessment of the degree of control the water system will be able to exercise over the watershed. ()

xii. Projected future uses of impoundments or reservoirs within the watershed. ()

xiii. Water quality. Submit source water sample data over a sufficient period of time to assess the microbiological, physical, chemical and radiological characteristics of the water. ()

xiv. Stream characteristics. Provide consideration of currents, wind and ice conditions, and the effect of confluent streams. ()

504. FACILITY AND DESIGN STANDARDS: REVIEW OF PLANS AND SPECIFICATIONS.

The facility and design standards set forth in these rules shall be applied in the review of plans and specifications for public water system facilities. If design issues are not addressed by the facility and design standards set out in these rules, then guidance documents, some of which are listed in Subsection 002.02, shall be used as guidance in the design and review of plans and specifications for public drinking water facilities. See also Section 013. ()

01. Ownership. Documentation of the ownership and responsibility for operating the proposed system shall be made available to the Department prior to or concurrent with the submittal of plans and specifications as required in Subsection 504.03. The documentation must show organization and financial arrangements adequate to assure construction, operation and maintenance of the system according to these rules. Documentation shall also include the name of the water system, the name, address, and phone number of the supplier of water, the system size, and the name, address, and phone number of the system operator. ()

02. Connection to an Existing System. If the proposed project is to be connected to an existing public water system, a letter from the purveyor must be submitted to the Department stating that the purveyor will be able to provide services to the proposed project. The Department may require documentation supporting the ability of the purveyor to provide service to the new system without diminishing quality of service to existing customers. This letter must be submitted prior to or concurrent with the submittal of plans and specifications as required in Subsection 504.03. ()

03. Plans and Specifications Required. ()

a. Prior to construction of new public drinking water systems, new drinking water systems designed to serve fifteen (15) or more service connections, or material modifications of existing public water systems, plans and specifications must be submitted to the Department for review and approval. Construction should commence as soon as practical after approval, and if construction is not completed within twelve (12) months of the Department's final approval, an extension or re-approval must be obtained from the Department. The Department may require re-submittal of all or part of the plans and specifications prior to issuing an extension or re-approving the plans and specifications. ()

b. Plans and specifications for simple water main extensions shall not require pre-construction approval by the Department when such extensions will be owned and operated by a city, county, quasi-municipal corporation or regulated public utility, provided that such plans and specifications are reviewed and approved by a QLPE who was not involved in the preparation of the plans and specifications being reviewed to verify compliance with the requirements of these rules prior to initiation of construction. Any plans and specifications approved pursuant to Subsection 504.03.b. shall be transmitted to the Department at the time construction is authorized and shall be marked or stamped as "Approved for Construction." Along with the plans and specifications, the transmittal must include the items listed in Subsections 504.03.b.i. through 504.03.b.vii. The plans and specifications must bear the imprint of an Idaho licensed professional engineer's seal that is both signed and dated by the engineer, and the approval or transmittal letter must be sealed, signed, and dated by the QLPE that is approving the plans and specifications. ()

i. A statement that the author of the transmittal letter is the QLPE representing the city, county, quasi-municipal corporation or regulated public entity. ()

ii. A statement that the extension project complies with the current facility plan or preliminary engineering report, or a statement that the water system has adequate capacity. Please see Subsection 502.01.b. for further information. ()

iii. A statement from the city, county, quasi-municipal corporation or regulated public entity or its authorized agent that the water system purveyor will serve the project. ()

iv. A statement from the city, county, quasi-municipal corporation or regulated public entity or its authorized agent that the water system purveyor will own and operate the project after construction is complete. ()

v. A statement by the QLPE that the plans and specifications are approved for construction. ()

vi. A statement by the QLPE that the plans and specifications comply with the facility standards within these rules. ()

vii. A statement recommending whether sanitary restrictions can be released or should remain in force. ()

()

c. Subsections 504.03.c.i. through 504.03.c.vi. outline the projects which QLPEs may approve and which QLPEs may not approve. ()

i. A QLPE may approve plans and specifications for simple water main extensions that are able to connect to an existing water system owned by a city, county, quasi-municipal corporation, or regulated public utility at the time the extension is approved for construction by the QLPE. ()

ii. A QLPE may approve plans for simple water main extensions which will connect to an existing water system, but are unable to connect to the system at the time the extension is approved for construction by the QLPE, provided sanitary restrictions remain in force for the proposed extension. ()

iii. A QLPE may not approve plans and specifications which include mechanical systems such as booster stations. ()

iv. A QLPE may not approve plans and specifications for projects which the QLPE was the design engineer or otherwise involved in the design. ()

v. A QLPE employed by a city, county, quasi-municipal corporation, or regulated public utility may approve a design that was prepared by a subordinate engineer or an engineer from a separate design group within the city, county, quasi-municipal corporation, or regulated public utility. ()

vi. A QLPE who is not employed by a city, county, quasi-municipal corporation, or regulated public utility, but is retained by a city, county, quasi-municipal corporation, or regulated public utility for the purpose of plan and specification review may not approve projects designed by the company with which the QLPE is employed. ()

d. At the discretion of the city, county, quasi-municipal corporation or regulated public utility, the plans addressed by Subsection 504.03.b. may be referred to the Department for review and approval prior to initiation of construction. ()

04. Criteria for Review. The Department shall review plans and specifications to determine compliance with these rules and engineering standards of care. If the plans and specifications comply with these rules and engineering standards of care, the Department shall not substitute its judgment for that of the owner's design engineer concerning the manner of compliance with the rule. ()

05. Schedule for Review. The Department shall review plans and specifications and endeavor to resolve design issues within forty-two (42) calendar days of submittal such that approval can be granted. If the Department and applicant have not resolved design issues within forty-two (42) calendar days or at any time thereafter, the applicant may file a written demand to the Department for a decision. Upon receipt of such written demand, the Department shall deliver a written decision to the applicant within no more than seven (7) calendar days explaining any reasons for disapproval. The Department shall maintain records of all written demands for decision made pursuant to Subsection 504.05 with such records including the final decision rendered and the timeliness thereof. ()

06. Engineer's Seal Required. Plans and specifications submitted to the Department shall bear the imprint of an Idaho licensed professional engineer's seal; except that the Department will accept the seal of an Idaho licensed professional geologist on the following: ()

a. Well source, spring source, or infiltration gallery site evaluation reports, as specified in Subsections 510 and 514. ()

b. Plans and specifications for well construction and results of field inspection and testing, as specified in Section 510. ()

07. Contents of Plans and Specifications. Plans and specifications shall, where pertinent, provide the

- following: ()
- a. General layout, including: ()
 - i. Suitable title. ()
 - ii. Name of municipality or other entity or person responsible for the water supply. ()
 - iii. Area or institution to be served. ()
 - iv. Scale of drawings. ()
 - v. North arrow. ()
 - vi. Datum used. ()
 - vii. General boundaries of municipality or area to be served. ()
 - viii. Date, name, and address of the designing engineer. ()
 - ix. Legible prints suitable for reproduction. ()
 - x. Location and size of existing water mains, if applicable. ()
 - xi. For systems undergoing material modification, location and nature of existing water works structures and appurtenances affecting the proposed improvements. ()
 - b. Detailed plans, including: ()
 - i. Stream crossings, providing profiles with elevations of the stream bed and the estimated normal and extreme high and, where appropriate, low water levels. ()
 - ii. Location and size of the property to be used for the development with respect to known references such as roads, streams, section lines, or streets. ()
 - iii. Topography and arrangement of present or planned wells or structures. ()
 - iv. Elevations of the one hundred (100) year flood level in relation to the floor of structures, upper termination of protective casings, and grade surrounding facilities. ()
 - v. Details of well construction, including diameter and depth of drill holes, casing and liner diameters and depths, grouting depths, elevations, and designation of geological formations, water levels and other data as specified in Section 510. ()
 - vi. Location of all known existing and potential sources of pollution within five hundred (500) feet of water sources or underground treated storage facilities. ()
 - vii. Size, length, and materials of proposed water mains. ()
 - viii. Location of existing or proposed streets; water sources, ponds, lakes, and drains; storm sanitary, combined and house sewers; septic tanks, disposal fields and cesspools. ()
 - ix. Schematic flow diagrams and hydraulic profiles showing the flow through various plant units. ()
 - x. Piping in sufficient detail to show flow through the plant including waste lines. ()

- xi. Locations of all chemical storage areas, chemical feeding equipment, and points of chemical application. ()
 - xii. All appurtenances, specific structures, equipment, water treatment plant waste disposal units and points of discharge having any relationship to the plans for water mains or water works structures. ()
 - xiii. Locations of sanitary or other facilities, such as lavatories, showers, toilets, and lockers, when applicable or required by the Department. ()
 - xiv. Locations, dimensions, and elevations of all proposed plant facilities. ()
 - xv. Locations of all sampling taps owned by the water system. ()
 - xvi. Adequate description of any significant features not otherwise covered by the specifications that may impact public safety or welfare. ()
 - c. Complete, detailed technical specifications shall be supplied for the proposed project, including: ()
 - i. A program for keeping existing water works facilities in operation during construction of additional facilities so as to minimize interruption of service. ()
 - ii. Laboratory facilities and equipment. ()
 - iii. Description of chemical feeding equipment. ()
 - iv. Procedures for flushing, disinfection and testing, as needed, prior to placing the project in service. All wells, pipes, tanks, and equipment which can convey or store potable water shall be disinfected in accordance with AWWA Standards, incorporated into these rules at Subsection 002.01. Plans or specifications shall outline the procedure and include the disinfectant dosage, contact time, and method of testing the results of this procedure. ()
 - v. Materials or proprietary equipment for sanitary or other facilities, including any necessary backflow or back-siphonage protection. ()
 - d. Complete design criteria, as set forth in these rules. ()
 - e. The Department may require additional information which is not part of the construction drawings, including, but not limited to, head loss calculations, proprietary technical data, and copies of contracts. ()
- 08. Notification of Material Deviations.** As set forth in Subsection 504.03, during construction or modification, the reviewing authority must be notified of any material deviation from the approved plans. The reviewing authority's prior written approval is required before any material deviation is allowed. ()
- 09. Record Plans and Specifications Required.** ()
- a. Within thirty (30) calendar days of the completion of construction of facilities for which plans are required to be reviewed pursuant to Subsection 504.03, record plans and specifications based on information provided by the construction contractor and field observations made by the engineer or the engineer's designee depicting the actual construction of facilities performed, must be submitted to the Department by the engineer representing the city, county, quasi-municipal corporation or regulated public utility that owns the project, or by the design engineer or owner-designated substitute engineer if the facilities will not be owned and operated by a city, county, quasi-municipal corporation or regulated public utility. Such submittal by the professional engineer must confirm material compliance with the approved plans and specifications or disclose any material deviations therefrom. If the construction does not materially deviate from the approved plans and specifications, the owner may have a statement to that effect prepared by an Idaho licensed professional engineer and filed with the Department in lieu of submitting a complete and accurate set of record drawings. ()

b. Record plans and specifications, or a statement submitted in lieu of record plans and specifications, must bear the imprint of an Idaho licensed professional engineer's seal that is both signed and dated by the engineer. ()

c. The Department will accept the seal and signature of an Idaho licensed professional geologist on record plans and specifications, or a statement bearing the seal and signature of an Idaho licensed professional geologist in lieu of record plans and specifications, for record plans and specifications for well construction and results of field inspection and testing, as specified in Section 510. ()

10. **Exception.** The Department may waive the plan and specification approval required of any particular facility or category of facilities when doing so will have no significant impact on public health or the environment. ()

11. **Requirement to Have Approved Plans and Specifications and Approval Letter On-Site During Construction.** It is the responsibility of the owner to maintain one (1) copy of the approved plans and specifications and the approval letter from the reviewing authority on-site during construction at all times. ()

12. **Construction.** Except as provided in Subsection 504.03.b., no construction shall commence until all of the necessary approvals have been received from the Department. The owner shall provide for the inspection of the construction of a public drinking water system facility by an Idaho licensed professional engineer to the extent required to confirm material compliance with the approved plans and to produce accurate record documents as required by Subsection 504.09. ()

505. -- 509. (RESERVED)

510. FACILITY AND DESIGN STANDARDS: SITING AND CONSTRUCTION OF WELLS.

Written approval by the Department is required before water from any new or reconstructed well may be served to the public. Any supplier of water for a public water system served by one (1) or more wells shall ensure that the following requirements are met: ()

01. **Site Approval.** Prior to drilling, the site of a public water system well must be approved in writing by the Department. The Department shall require the supplier of water to submit a well site evaluation report that takes into account the proposed size, depth, and location of the well. The evaluation may include, but is not limited to the following types of information: ()

a. An evaluation of the quality of anticipated ground water. ()

b. Identification of the known aquifers and the extent of each aquifer, based on the stratigraphy, sedimentation, and geologic structure beneath the proposed well site. ()

c. An estimate of hydrologic and geologic properties of each aquifer and confining layers. ()

d. Prediction of the sources of water to be extracted by the well and the drawdown of existing wells, springs, and surface water bodies that may be caused by pumping the proposed well. This prediction may be based on analytical or numerical models as determined by the Idaho Department of Water Resources permitting process. ()

e. Demonstration of the extent of the capture zone of the well, based on the well's design discharge and on aquifer geology, using estimates of hydraulic conductivity and storativity. ()

f. Description of potential sources of contamination within five hundred (500) feet of the well site. ()

02. **Location.** Each well shall be staked by the design engineer or licensed professional geologist prior to drilling, be located a minimum of fifty (50) feet from the nearest property line, be located a minimum of fifty (50) feet from any potential source of contamination, and be no closer to specified sources of contamination than set forth

in Subsection 900.01. In vulnerable settings, the Department may require engineering or hydrologic analysis to determine if the required setback distance is adequate to prevent contamination. ()

03. Construction Standards. In addition to meeting the requirements of these rules, all wells shall be constructed in accordance with IDAPA 37.03.09, "Well Construction Standards Rules," and related rules and laws administered by the Idaho Department of Water Resources. All wells shall comply with the drilling permit requirements of Section 42-235, Idaho Code. ()

a. Casing that meets the requirements set forth in Subsection 900.02 (Table 2). The use of plastic well casing for public water system wells may be considered on a case-by-case basis. Plastic casing shall meet or exceed ASTM Standard F480-02 and ANSI/NSF Standard 61. ()

b. Public water system wells shall have no less than fifty-eight (58) feet of annular seal of not less than one and one-half (1 ½) inches thickness as measured from land surface to the bottom of the seal unless: ()

i. It can be demonstrated to the Department's satisfaction that there is a confining layer at lesser depth that is capable of preventing unwanted water from reaching the intake zone of the well; or ()

ii. The best and most practical aquifer at a particular site is less than fifty-eight (58) feet deep; or; ()

iii. The Department specifies a different annular seal depth based on local hydrologic conditions. ()

iv. More stringent standards are required by applicable Rules of the Idaho Water Resources Board, referenced in Subsection 002.02. ()

c. Specifications shall include allowable tolerances for plumbness and alignment in accordance with AWWA Standards, incorporated by reference into these rules at Subsection 002.01, or as otherwise approved by the Department. If the well fails to meet these requirements, it may be accepted by the Department if it does not interfere with the installation or operation of the pump or uniform placement of grout. ()

d. Geological data shall be collected at each pronounced change in formation and shall be recorded in the driller's log. Supplemental data includes, but is not limited to, accurate geographical location such as latitude and longitude or GIS coordinates, and other information on accurate records of drillhole diameters and depths, assembled order of size and length of casing, screens and liners, grouting depths, formations penetrated, and water levels. ()

e. The owner of each well shall retain all records pertaining to each well until the well has been properly abandoned. ()

f. Wells with intake screens shall: ()

i. Be constructed of materials resistant to damage by chemical action of ground water or cleaning operations. ()

ii. Have openings based on sieve analysis of formation or gravel pack materials. ()

iii. Have sufficient length and diameter to provide adequate specific capacity and aperture entrance velocity not to exceed point three (0.3) feet per second, or as otherwise approved by the Department. ()

iv. Be installed so that the pumping water level remains above the screen under all operating conditions, or otherwise approved by the Department. Where a bottom plate or sump is utilized, it shall be of the same material as the screen, or as otherwise approved by the Department. Where a washdown assembly, tailpipe or sump is used below the screen, it may be made of a different material than the screen. ()

g. Permanent well casing shall be surrounded by a minimum of one and one-half (1 ½) inches of grout

to the depth required by Subsection 510.03.b. of these rules, or by the Rules of the Idaho Water Resources Board referenced in Subsection 002.02, whichever is greater. All casing identified in plans and specifications as temporary casing shall be removed prior to well completion. ()

i. Neat cement grout consisting of cement that conforms to AWWA Standard A-100, and water, with not more than six (6) gallons of water per ninety-four (94) pounds of cement, shall be used for one and one-half (1 ½) inch openings. Additives may be used to enhance effectiveness and are subject to approval by the reviewing authority and the Idaho Department of Water Resources on a case-by-case basis. ()

ii. Bentonite grout shall have a solids content not less than twenty-five (25) percent by weight when mixed with water and be specifically manufactured for use in sealing of well casing. Bentonite grout shall not contain weighting agents to increase solids content. Bentonite grout shall not be used above the water table. All bentonite grout shall be installed by positive displacement from the bottom up through a tremmie or float shoe. ()

iii. Where a dry annular space is to be sealed, a minimum of two (2) inches on all sides of the casing shall be required to place bentonite to depths not greater than one hundred (100) feet, using #8 mesh granular bentonite. All dry pour granular bentonite shall be tagged at appropriate intervals to verify placement. If a bridge occurs, a tremmie pipe shall be washed or jetted through the bridge to allow for pumping of grout. Bentonite chips shall be of sufficient size to accommodate proper placement for the existing subsurface conditions. ()

iv. Dry granular bentonite used in wells where a dry annular space is to be sealed with depths greater than one hundred (100) feet shall require an annulus of at least three (3) inches on all sides of the casing, or as approved by the reviewing authority and the Idaho Department of Water Resources. If a bridge occurs, a tremmie pipe shall be washed or jetted through the bridge to allow for pumping of grout. Bentonite chips shall be of sufficient size to accommodate proper placement for the existing subsurface conditions. ()

v. All chip bentonite seals installed through water shall only be used in annular spaces of at least four (4) inches on all sides of the casing. If a bridge occurs, a tremmie pipe shall be washed or jetted through the bridge to allow for pumping of grout. Bentonite chips shall be of sufficient size to accommodate proper placement for the existing subsurface conditions. Chip bentonite seals installed through water shall be: ()

(1) Installed in accordance with manufacturer's specifications; or ()

(2) Installed by pouring chips over a one-quarter (1/4) inch mesh screen for three-eighths (3/8) inch chips to remove fines to prevent bridging at the water table; or ()

(3) Installed using coated pellets to retard hydration if approved by the reviewing authority and the Idaho Department of Water Resources. ()

vi. Concrete may be approved on a case-by-case basis by the reviewing authority and the Idaho Department of Water Resources. Upon such approval, the approved method shall use a six (6) sack minus one-half (1/2) inch Portland cement concrete and shall be installed by positive displacement from the bottom up through a tremmie pipe. ()

04. Disinfection. All tools, bits, pipe, and other materials to be inserted in the borehole shall be cleaned and disinfected in accordance with the Well Construction Standards and permitting requirements of the Idaho Water Resources Board, referenced in Subsection 002.02 This applies to new well construction and repair of existing wells. ()

05. Well Completion Report Required. Upon completion of a well, and prior to its use as a drinking water source, the following information and data must be submitted by the water system to the Department. The well completion report must be submitted to the Department prior to or concurrent with the submittal of the preliminary engineering report for well house construction/modification. The well completion report shall bear the imprint of an Idaho licensed professional engineer's or an Idaho licensed professional geologist's seal that is both signed and dated by the engineer or geologist: ()

a. A copy of all well logs; ()

- b. Results of test pumping, as specified in Subsection 510.06; ()
 - c. As constructed plans showing at least the following: ()
 - i. Annular seal, including depth and sealant material used and method of application; ()
 - ii. Casing perforations, results of sieve analysis used in designing screens installed in sand or gravel aquifers, gravel packs; and ()
 - iii. Recommended pump location. ()
 - d. Other information as may be specified by the Department. ()
 - e. Sampling results for iron, manganese, corrosivity, and other secondary contaminants specified by the Department. Other monitoring requirements are specified in Subsections 510.05.e.i. through 510.05.e.iii. ()
 - i. Community Systems. Results of analysis for total coliform, inorganic chemical contaminants, organic chemicals, and radionuclide contaminants set forth in Subsections 050.01, 050.02, 050.05, 100.01, 100.03, 100.04, 100.05, and 100.06, unless analysis is waived pursuant to Subsection 100.07. ()
 - ii. Nontransient Noncommunity Systems. Results of analysis for total coliform and inorganic and organic chemical contaminants listed in Subsections 050.01, 050.02, 100.01, 100.03, 100.04, unless analysis is waived pursuant to Subsection 100.07. ()
 - iii. Transient Noncommunity Systems. Results of a total coliform, nitrite, and nitrate analysis listed in Subsections 050.01, 100.01 and 100.03. ()
- 06. Test Pumping.** Upon completion of a ground water source, test pumping shall be conducted in accordance with the following procedures to meet the specified requirements: ()
- a. The well shall be test pumped at the desired yield (design capacity) of the well for at least twenty-four (24) consecutive hours after the drawdown trend has stabilized, as determined by the supervising engineer or geologist. Alternatively, the well may be pumped at a rate of one hundred fifty percent (150%) of the desired yield for at least six (6) continuous hours after the drawdown trend has stabilized, as determined by the supervising engineer or geologist. The field pumping equipment must be capable of maintaining a constant rate of discharge during the test. Discharge water must be piped an adequate distance to prevent recharge of the well during the test. If the well fails the test protocol, design of the water system shall be re-evaluated and submitted to the Department for approval. ()
 - b. Upon completion of well development, the well shall be tested for sand production. Fifteen (15) minutes after the start of the test pumping (at or above the design production rate), the sand content of a new well shall not be more than five (5) parts per million. Sand production shall be measured by a centrifugal sand sampler or other means acceptable to the Department. If sand production exceeds five (5) ppm, the well shall be screened gravel packed, or re-developed. ()
 - c. The following data shall be provided: ()
 - i. Static water level in the well prior to test pumping; ()
 - ii. Well yield in gpm and duration of the pump test, including a discussion of any discrepancy between the desired yield and the yield observed during the test; ()
 - iii. Water level in the well recorded at regular intervals during pumping; ()
 - iv. Profile of water level recovery from the pumping level projected to the original static water level. ()

- v. Depth at which the test pump was positioned in the well; ()
- vi. Test pump capacity and head characteristics; ()
- vii. Sand production data. ()
- viii. Results of analysis based on the drawdown and recovery test pertaining to aquifer properties, long term sustained yield, and boundary conditions affecting drawdown. ()

d. The Department may allow the use of other pump test protocols that are generally accepted by engineering firms with specialized experience in well construction, by the well drilling industry, or as described in national standards (such as ANSI/AWWA A100-97), as long as the minimum data specified in Subsection 510.06.c. are provided. The Department welcomes more extensive data about the well, such as step-drawdown evaluations used in determining well capacity for test pumping purposes, zone of influence calculations, and any other information that may be of use in source protection activities or in routine water system operations. ()

e. Where aquifer yield, sustainability, or water quality are questionable, the Department, at its discretion, may require additional site specific investigations that could include test well construction, long-term pumping tests, or other means to demonstrate that the aquifer yield is sufficient to meet the long-term water requirements of the project. ()

07. Conversion of Non-Public Water System Wells for Public Water System Use. Any existing well constructed for use other than as a public water system source may be considered for use as a public water system source on a case-by-case basis. The owner of such a well must demonstrate to the Department's satisfaction that the well site conforms to the requirements of Subsections 510.01, 510.02, and Section 512, the well is constructed in a manner that is protective of public health and that both the quantity and quality of water produced by the well meet public water system standards set forth in these rules. ()

08. Observation Wells. If observation wells are used and are intended to remain in service after completion of the water supply well, the observation wells shall be constructed in accordance with the requirements for permanent wells and be protected at the upper terminal to preclude entrance of foreign materials. See Rules of the Idaho Water Resources Board referenced in Subsection 002.02. ()

09. Well Abandonment. Any water supply well that will no longer be used must be abandoned by sealing the borehole carefully to prevent pollution of the ground water, eliminate any physical hazard, conserve aquifer yield, maintain confined head conditions in artesian wells, and prevent mixing of waters from different aquifers. The objective of proper well abandonment procedures is to restore, as far as possible, the original hydrogeologic conditions. The services of a licensed well driller are required. Instructions for abandoning various types of wells may be obtained from the Idaho Department of Water Resources. See Rules of the Idaho Water Resources Board referenced in Subsection 002.02. ()

511. FACILITY AND DESIGN STANDARDS: WELL PUMPS, DISCHARGE PIPING, AND APPURTENANCES.

01. Sample Tap Required. A sample tap suitable for collecting bacteriological samples shall be provided on the discharge piping from every well at a point where pressure is maintained but prior to any treatment. This sample tap shall be of the smooth-nosed type without interior or exterior threads, shall not be of the mixing or petcock type, and shall not have a screen, aerator, or other such appurtenance. The sample tap for collecting bacteriological samples may be used for other sampling purposes. In addition, threaded hose bib taps may also be used for collecting samples, other than bacteriological samples, if equipped with an appropriate backflow prevention device as may be necessary to protect the public water system from contamination. ()

02. Discharge Piping. The discharge line shall be equipped with the necessary valves and appurtenances to allow a well to be pumped to waste at the design capacity of the well via an approved air gap through an approved non-corrodible screen at a location prior to the first service connection, and shall meet the following requirements: ()

- a. Be designed to minimize friction loss. ()
 - b. Have control valves and appurtenances located above the pump house floor when an above-ground discharge is provided. ()
 - c. Be protected against contamination. ()
 - d. Vertical turbine pumps shall be equipped with an air release-vacuum relief valve, or equivalent, located upstream from the check valve, with exhaust/relief piping terminating in a down-turned position at least eighteen (18) inches above the floor and covered with a twenty-four (24) mesh corrosion resistant screen. ()
 - e. Have all exposed piping, valves and appurtenances protected against physical damage and freezing. ()
 - f. Be properly anchored to prevent movement, and protected against surge or water hammer. ()
 - g. The pump to waste discharge piping shall be valved to ensure that other system components that could be negatively affected by the quality of the discharged water are not pressurized by the water that is being pumped to waste. ()
 - h. Where two (2) or more wells are connected to a common well house, the discharge piping shall be designed to ensure that each well can be pumped to waste independently without affecting the ability of the other well or wells to pressurize the system. ()
- 03. Pressure Gauge Required.** A pressure gauge shall be provided on all discharge piping. ()
- 04. Flow Meter and Check Valve.** Unless otherwise approved by the Department based on documentation provided by the design engineer, an instantaneous and totalizing flow meter equipped with nonvolatile memory shall be installed on the discharge line of each well in accordance with the manufacturer's specifications. Meters installed on systems with variable frequency drives shall be capable of accurately reading the full range of flow rates. An accessible check valve, which is not located in the pump column, shall be installed in the discharge line of each well between the pump and the shut-off valve. Additional check valves shall be located in the pump column as necessary. ()
- 05. Well Vent.** All wells shall be vented, unless it can be demonstrated that the drawdown under maximum pumping conditions will not exceed ten (10) feet. ()
- a. For wells not in a pump house, the open end of the vent shall be screened with a twenty-four (24) mesh or similar non-corrodible screen and terminated downward at least eighteen (18) inches above the final ground surface. ()
 - b. If the well is in a pump house, the open end of the vent shall be screened with a twenty-four (24) mesh or similar non-corrodible screen and must terminate at least twelve (12) inches above the pump house floor. ()
 - c. Artesian wells equipped with pumps may need venting or an air valve as determined by the Department. ()
- 06. Casings and Sanitary Well Caps.** The following requirements apply to well casings and sanitary caps: ()
- a. Casings shall extend at least eighteen (18) inches above the final ground surface. If the well is located within a pump house, casings shall extend least twelve (12) inches above the pump house floor. For a well located in an area subject to flooding, the Department may require an extension of the casing above the one hundred (100) year or highest known flood level, whichever is higher. ()

b. Wells shall be cased and provided with an approved cap in such a manner that surface water cannot enter the well. ()

c. For community water systems, a permanent means for measuring water level within the casing must be provided. For other water systems, a temporary means to measure water levels should be made available. All equipment required for conducting water level measurements shall be purchased and made available to the water system operator at the time the well is put into service. Where pneumatic or electronic water level measuring equipment is used, it shall be made using corrosion resistant materials attached firmly to the drop pipe or pump column and in such a manner as to prevent entrance of foreign materials. ()

07. Well Houses. For regulatory purposes, a well house is considered a pump house as defined in Section 003. Well houses must meet the requirements for pump houses as set forth in Section 541. All above ground discharge piping shall be contained in a well house or otherwise protected from freezing. ()

08. Pitless Adapters and Units. Pitless adapters or pitless units: ()

a. Shall be of the type marked approved by the National Sanitation Foundation or Pitless Adapter Division of the Water Systems Council. ()

b. Shall be designed, constructed and installed to be watertight including the cap, cover, casing extension and other attachments. ()

c. Shall be field tested for leaks before being put into service. The procedure outlined in "Manual of Individual and Non-Public Water Supply Systems," referenced in Subsection 002.02, or other procedure approved by the Department shall be followed. ()

d. Pitless adapters with a two (2) inch or smaller discharge line shall be provided with a swing joint outside the pitless adapter unit to reduce strain, deformation, and possible leakage of the pitless seal caused by settling soils in the trench. The orientation of swing joints shall be such that any settling that occurs will tighten the threads. The hole in the casing shall be cut with a saw rather than a torch with an opening large enough to allow seating of gaskets. ()

e. Shall be provided with a contamination-proof entrance connection for electrical cable. ()

f. In the case of pitless adapters: ()

i. Threaded adapters shall be installed by drilling a hole not more than one quarter (1/4) inch larger than the outer diameter of the pitless shank. No torch-cut holes shall be accepted. The orientation of swing joints shall be such that any settling that occurs will tighten the threads. ()

ii. The only field welding permitted will be that needed to connect a pitless adapter to the casing. ()

g. In the case of pitless units: ()

i. Shall be shop-fabricated from the point of connection with the well casing to the unit cap or cover. ()

ii. Shall be constructed of materials and weight at least equivalent to and compatible with the well casing. ()

iii. Shall be threaded or welded to the well casing. Threaded units shall be installed by drilling a hole not more than one quarter (1/4) inch larger than the outer diameter of the pitless shank. No torch-cut holes shall be accepted. If the connection to the casing is by field weld, the shop-assembled unit must be designed specifically for field welding to the casing. ()

iv. Shall terminate at least eighteen (18) inches above final ground elevation or three (3) feet above the

100-year flood level or the highest known flood elevation, whichever is higher, or as otherwise approved by the Department. ()

v. Shall be provided with access to disinfect the well. ()

vi. Shall have field connection to the lateral discharge from the pitless unit of threaded, flanged, or mechanical joint connection. ()

h. After installation of a pitless adapter or unit, the disturbed well seal shall be repaired or replaced to meet original seal specifications unless otherwise proposed by the design engineer and approved by the Department. The engineering proposal shall ensure that the material surrounding the final seal is moisture controlled and compacted such that it equals or exceeds the characteristics of the native soil prior to being disturbed. ()

09. Wells Not Allowed in Pits. Wells shall not be located in pits. Exceptions to this requirement will be granted by the Department if the well was constructed prior to November 5, 1964, and the installation is constructed or reconstructed in accordance with the requirements of the Department to provide watertight construction of pit walls and floors, floor drains and acceptable pit covers. ()

10. Discharge Pumps. Discharge pumps shall be subject to the following requirements: ()

a. Line shaft pumps shall. ()

i. Have the casing firmly connected to the pump structure or have the casing inserted into a recess extending at least one-half (1/2) inch into the pump base. ()

ii. Have the pump foundation and base designed to prevent water from coming into contact with the joint. ()

iii. Use lubricants that meet ANSI/NSF Standard 61. ()

b. When a submersible pump is used: ()

i. The top of the casing shall be effectively sealed against the entrance of water under all conditions of vibration or movement of conductors or cables. ()

ii. The electrical cable shall be firmly attached to the drop pipe at twenty-one (21) foot intervals or less, or at each coupling or joint. ()

512. FACILITY AND DESIGN STANDARDS: WELL LOT.

A well lot shall be provided for wells constructed after November 1, 1977. The well lot shall be owned in fee simple by the supplier of water or controlled by lease or easement with a term of not less than the useful life of the well and be large enough to provide a minimum distance of fifty (50) feet between the well and the nearest property line. ()

01. Use of Chemicals on the Well Lot. No pesticides, herbicides, or fertilizers shall be applied to a well lot without prior approval from the Department. ()

02. Storage of Hazardous Materials on the Well Lot. No pesticides, herbicides, fertilizers, portable containers of petroleum products, or other materials known to be toxic or hazardous shall be stored on a well lot, except that: ()

a. An internal combustion engine to drive either a generator for emergency standby power or a pump to provide fire flows, and an associated fuel tank, may be placed on the well lot. ()

b. A propane or natural gas powered generator is preferable to reduce risk of fuel spillage. ()

c. If a diesel or gasoline-fueled engine is used, the fuel tank and connecting piping must be approved

by the Underwriter's Laboratory, Inc., double-walled, meet the requirements of the local fire jurisdiction, and include both spill prevention and overflow protection features. The tank must be above ground and may be contained within the structural base of the generator unit. A licensed water system operator shall be present during filling of the tank following a period of usage, or during periodic extraction and replacement of outdated fuel. ()

d. Should the internal combustion engine be located within the pump house, the floor of the pump house shall be constructed so as to contain all petroleum drips and spills so that they will not be able to reach the floor drain(s). Engine exhaust shall be directly discharged outside the pump house. ()

e. A spill containment structure shall surround all fuel tanks and be sized to contain at least one hundred ten percent (110%) of the fuel tank volume. The Department may require additional containment capacity in settings where accumulation of snow, ice, or rain water could be expected to diminish the usable capacity of the structure. ()

03. Location of Hydrants. Hydrants of the frost free type shall be placed in the buried piping system at a minimum of five (5) feet away from the well casing to prevent drain water from accumulating and compromising the grout seal surrounding the well casing. ()

04. Parking Lots and Vehicle Storage. No public parking or vehicle storage shall be allowed on the well lot, except that operation/maintenance vehicles may be temporary parked on the well lot during the normal course of business. ()

513. FACILITY AND DESIGN STANDARDS: NUMBER OF GROUND WATER SOURCES REQUIRED – EXISTING SYSTEMS.

Existing community water systems served by ground water and intending to serve more than twenty-five (25) connections or equivalent dwelling units are subject to the following requirements for the number of ground water sources required. ()

01. Existing System with All Sources Constructed Prior to July 1, 1985. A community water system served by ground water and with all existing sources constructed prior to July 1, 1985 will be required to comply with Subsection 501.17 upon substantially modifying the system after July 2002. ()

02. Existing System with Any Sources Constructed After July 1, 1985. A community water system served by ground water with any sources constructed after July 1, 1985 is required to comply with Subsection 501.17 when a modification is made to the system which increases the population served or number of service connections, increases the length of transmission and distribution water mains, or increases the peak or average water demand. ()

514. FACILITY AND DESIGN STANDARDS: SPRING SOURCES.

Written approval by the Department is required before water from any new or reconstructed spring source may be served to the public. For new spring sources, the Department shall require a site evaluation report containing applicable required information listed in Subsection 510.01. This information includes, but is not limited to, the following: an evaluation of the potability and quality of anticipated spring water; an estimate of hydrologic and geologic properties of the aquifer; and a description of potential sources of contamination within five hundred (500) feet of the spring. Any supplier of water for a public water system served by one (1) or more springs shall ensure that the following requirements are met: ()

01. Protection of the Spring. Springs shall be housed in a permanent structure and protected from contamination including the entry of surface water, animals, and dust. ()

02. Spring Box or Combined Spring Box/Finished Water Storage Design. To facilitate efficient design and review of spring box or combined spring box/finished water storage designs, these site-specific designs should be coordinated in advance with the Department. Specific issues to be addressed are: ()

a. The inlet shall be screened as determined by the Department and located above the floor of the collection chamber. ()

b. Unless otherwise approved by the Department based on documentation provided by the design engineer, the spring box or combined spring box/finished water storage tank shall meet the applicable design requirements of Section 544 - Facility and Design Standards: General Design of Finished Water Storage. ()

03. Sample Tap Required. A sample tap suitable for collecting bacteriological samples shall be provided. This sample tap shall be of the smooth-nosed type without interior or exterior threads, shall not be of the mixing or petcock type, and shall not have a screen, aerator, or other such appurtenance. The sample tap for collecting bacteriological samples may be used for other sampling purposes. In addition, threaded hose bib taps may also be used for collecting samples, other than bacteriological samples, if equipped with an appropriate backflow prevention device as may be necessary to protect the public water system from contamination. ()

04. Flow Measurement. A flow meter or other flow measuring device shall be provided. ()

05. Protected Area. The entire area within a one hundred (100) foot radius of the spring box shall be owned by the supplier of water or controlled by a long term lease, fenced to prevent trespass of livestock and void of buildings, dwellings and sources of contamination. Surface water shall be diverted from this area. ()

515. FACILITY AND DESIGN STANDARDS: SURFACE SOURCES AND GROUND WATER SOURCES UNDER THE DIRECT INFLUENCE OF SURFACE WATER.

Written approval by the Department is required before water from any new surface source or ground water source that is under the direct influence of surface water may be served to the public. Infiltration collection lines or galleries are considered ground water under the direct influence of surface water unless demonstrated otherwise. Infiltration galleries that are not directly influenced by surface water shall meet the requirements of Section 514. The area around infiltration lines shall be under the control of the water purveyor for a distance acceptable to the Department. ()

01. Intake Structures. Design of intake structures shall provide for: ()

a. Withdrawal of water from more than one (1) level if quality varies with depth. ()

b. Separate facilities for release of less desirable water held in storage. ()

c. Where frazil ice may be a problem, holding the velocity of flow into the intake structure to a minimum, generally not to exceed point five (0.5) feet per second. Frazil ice is made up of randomly distributed ice crystals that are formed in flowing water that has cooled below thirty-two (32) degrees Fahrenheit and is prevented from forming into ice sheets by the movement of the water. ()

d. Inspection manholes every one thousand (1000) feet for pipe sizes large enough to permit visual inspection. ()

e. Cleaning the intake line as needed. ()

f. Adequate protection against rupture by dragging anchors, ice, or other hazards. ()

g. Ports located above the bottom of the stream, lake or impoundment, but at sufficient depth to be kept submerged at low water levels. ()

h. Where shore wells are not provided, a diversion device capable of keeping large quantities of fish or debris from entering an intake structure. ()

i. If necessary, provisions shall be made in the intake structure to control the influx of nuisance aquatic organisms. Specific control methods must be approved by the reviewing authority. ()

j. When buried surface water collectors are used, sufficient intake opening area must be provided to minimize inlet headloss. Particular attention shall be given to the selection of backfill material in relation to the collector pipe slot size and gradation of the native material over the collector system. ()

- 02. Raw Water Pumps.** Raw water pumping wells shall: ()
- a. Have motors and electrical controls located above grade (except for submersible pumps), and protected from flooding as required by the reviewing authority. ()
 - b. Be accessible and designed to prevent flotation. ()
 - c. Be equipped with removable or traveling screens before the pump suction well. ()
 - d. Provide for introduction of chlorine or other chemicals in the raw water transmission main if necessary for quality control. ()
 - e. Where practical, have intake valves and provisions for back flushing or cleaning by a mechanical device and testing for leaks. ()
 - f. Have provisions for withstanding surges where necessary. ()
- 03. Offstream Raw Water Storage.** An off-stream raw water storage reservoir is a facility into which water is pumped during periods of good quality and high stream flow for future release to treatment facilities. These off-stream raw water storage reservoirs shall be constructed to assure that: ()
- a. Water quality is protected by controlling runoff into the reservoir. ()
 - b. Dikes are structurally sound and protected against wave action and erosion. ()
 - c. Intake structures and devices meet requirements of Subsection 515.01. ()
 - d. Point of influent flow is separated from the point of withdrawal. ()
 - e. Separate pipes are provided for influent to and effluent from the reservoir. ()
- 04. Reservoirs.** Impoundments and reservoirs shall provide, where applicable: ()
- a. Removal of brush and trees to high water elevation. ()
 - b. Protection from floods during construction. ()
 - c. Abandonment of all wells which will be inundated, in accordance with requirements of the Idaho Department of Water Resources. See Rules of the Idaho Water Resources Board referenced in Subsection 002.02. ()

516. -- 517. (RESERVED)

518. FACILITY AND DESIGN STANDARDS: ADDITIONAL DESIGN CRITERIA FOR SURFACE WATER TREATMENT.

Performance criteria for surface water treatment facilities are specified in National Primary Drinking Water Regulations, as set forth in Sections 300, 301, and 310 of these rules. Surface water treatment systems must comply with applicable general design requirements in Section 503. In addition, the following design requirements apply specifically to surface water treatment facilities: ()

01. Engineering Design Requirements. The system shall ensure that filtration and disinfection facilities for surface water or ground water directly influenced by surface water sources are designed, constructed and operated in accordance with all applicable engineering practices designated by the Department. The design of the water treatment plant must consider the worst raw water quality conditions that are likely to occur during the life of the facility. ()

02. Removal of Pathogens. Filtration facilities (excluding disinfection) shall be designed, constructed

and operated to achieve at least two (2) log removal of *Giardia lamblia* cysts, two (2) log removal of *Cryptosporidium* oocysts, and one (1) log removal of viruses, except as allowed under Subsection 518.09.b. ()

03. Disinfection. Disinfection facilities shall be designed, constructed and operated so as to achieve at least point five zero (0.50) log inactivation of *Giardia lamblia* cysts; and ()

a. Two (2) log inactivation of viruses if using conventional and slow sand filtration technology; or ()

b. Three (3) log inactivation of viruses if using direct and diatomaceous earth filtration technology; or ()

c. Four (4) log inactivation of viruses if using alternate filtration technology. ()

d. Four (4) log inactivation of viruses if filtration treatment is not used. ()

04. Enhanced Disinfection. Higher levels of disinfection than specified under Subsection 518.03 may be required by the Department in order to provide adequate protection against *Giardia lamblia* and viruses. ()

05. Filter to Waste. For plants constructed after December 31, 1992, each filter unit must be capable of filter to waste. For plants constructed prior to December 31, 1992, each filter unit must be capable of filter to waste unless the system demonstrates through continuous turbidity monitoring or other means acceptable to the Department that water quality is not adversely affected following filter backwashing, cleaning or media replacement. ()

06. Continuous Turbidity Monitoring. For conventional, direct, membrane, and diatomaceous earth filtration technology, equipment must be provided to continuously measure the turbidity of each filter unit. ()

07. Continuous Monitoring of Disinfectant. Equipment must be provided and operated for continuous measurement of disinfectant residual prior to entry to the distribution system, unless the system serves fewer than three thousand three hundred (3,300) people. ()

08. Continuous Operation Required. Diatomaceous earth filtration facilities shall include an alternate power source with automatic startup and alarm, or be designed in a manner to ensure continuous operation. ()

09. Acceptable Technology. The purveyor shall select a filtration technology acceptable to the Department. ()

a. Conventional, direct, membrane, slow sand, diatomaceous earth, and membrane filtration technologies are generally acceptable to the Department on a case-by-case basis. ()

b. Alternate filtration technologies may be acceptable if the purveyor demonstrates all of the following to the satisfaction of the Department: ()

i. That the filtration technology: ()

(1) Is certified and listed by the National Sanitation Foundation (NSF) under Standard 53, Drinking Water Treatment Units - Health Effects, as achieving the NSF criteria for cyst reduction; or ()

(2) Removes at least ninety-nine percent (99%) (two (2) logs) of *Cryptosporidium* oocysts or surrogate particles and removes or inactivates at least ninety-nine percent (99%) (two (2) logs) of *Giardia lamblia* cysts or *Giardia lamblia* cyst surrogate particles in a challenge study acceptable to the Department. ()

ii. Based on field studies or other means acceptable to the Department, it must be demonstrated that the filtration technology has the following capabilities: ()

(1) In combination with disinfection treatment, consistently achieves at least ninety-nine percent (99%) (two (2) logs) removal of *Cryptosporidium* oocysts or surrogate particles and at least ninety-nine and nine tenths

percent (99.9%) (three (3) logs) removal or inactivation of Giardia lamblia cysts and ninety-nine and ninety-nine hundredths percent (99.99%) (four (4) logs) removal or inactivation of viruses; and ()

(2) Meets the turbidity performance requirements of 40 CFR 141.73 (b). ()

10. Pilot Studies. The system shall conduct pilot studies in accordance with the following requirements and in accordance with Subsection 501.19 for all proposed filtration facilities and structural modifications to existing filtration facilities, unless the Department modifies the requirements in writing: ()

a. The system shall obtain the Department's approval of the pilot study plan before the pilot filter is constructed and before the pilot study is undertaken. ()

b. The design and operation of the pilot study shall be overseen by an Idaho licensed professional engineer. ()

c. The system's pilot study plan shall identify at a minimum: ()

i. The objectives of the pilot study; ()

ii. Pilot filter design; ()

iii. Water quality and operational parameters to monitor; ()

iv. Amount of data to collect; and ()

v. Qualifications of the pilot plant operator. ()

d. The system shall ensure that the pilot study is: ()

i. Conducted to simulate conditions of the proposed full-scale design; ()

ii. Conducted for at least twelve (12) consecutive months or for a shorter period upon approval by the Department; ()

iii. Conducted to evaluate the reliability of the treatment system to achieve applicable water quality treatment criteria specified for filtration systems in 40 CFR 141.72 and 40 CFR 141.73; and ()

iv. Designed and operated in accordance with good engineering practices documented in references acceptable to the Department. ()

11. Redundant Disinfection. Surface water systems constructed after July 1, 1985, are required to install redundant disinfection components or maintain a backup unit on site as required to maintain constant application of disinfectant whenever water is being delivered to the distribution system. ()

519. FACILITY AND DESIGN STANDARDS: SURFACE WATER TREATMENT; DESIGN STANDARDS FOR MICROSCREENING.

A microscreen may be used to reduce nuisance organisms and organic loadings. It shall not be used in place of filtration or coagulation in the preparation of water for filtration. ()

01. Design Considerations. The following shall be taken into account during design: ()

a. The nature of the suspended matter to be removed. ()

b. The corrosiveness of the water. ()

c. The effect of chlorination, when required as pre-treatment. ()

- d. The duplication of units for continuous operation during equipment maintenance. ()
- e. Automated backflushing operation when used in conjunction with microfiltration treatment. ()
- 02. Design Requirements.** Design shall provide the following: ()
 - a. A durable, corrosion-resistant screen. ()
 - b. A by-pass arrangement. ()
 - c. Protection against back-siphonage when potable water is used for washing. ()
 - d. Proper disposal of water used to wash the microscreen. ()

520. FACILITY AND DESIGN STANDARDS: SURFACE WATER TREATMENT: CLARIFICATION PROCESSES.

Treatment facilities designed to include clarification for processing surface water shall meet the following requirements: ()

01. Two Units Required. A minimum of two (2) units for redundancy shall be provided for flocculation and sedimentation such that plant design capacity can be maintained with any component out of service for maintenance or repairs. ()

02. Parallel or Serial Operation. The units shall be capable of being operated either in series or parallel where softening is performed. ()

03. Independent Units. The units shall be constructed in such a way that each can be taken out of service without disrupting operation, and with drains or pumps sized to allow dewatering in a reasonable period of time. ()

04. Manual Start-Up. The units shall be started manually following shutdown. ()

05. Pre-Treatment. Waters exhibiting high turbidity may require pretreatment, usually sedimentation with or without the addition of coagulation chemicals. When presedimentation is provided, the following requirements must be met: ()

a. Incoming water shall be dispersed across the full width of the line of travel as quickly as possible. Short circuiting must be prevented. ()

b. Provisions for bypassing pre-sedimentation basins shall be included. ()

c. The need for redundant pretreatment components shall be evaluated according to the type and necessity of the pretreatment. ()

06. Rapid Mix. Unless otherwise approved by the Department based on documentation provided by the design engineer, a rapid mix device or chamber is required prior to flocculation, clarification, sedimentation, and settler units. The need for redundant rapid mix components shall be evaluated. Rapid mix shall mean the rapid dispersion of chemicals throughout the water to be treated, usually by violent agitation. The engineer shall submit the design basis for the velocity gradient (G value) selected, considering the chemicals to be added and water temperature, color and other related water quality parameters. Basins or mixing chambers shall be equipped with devices capable of providing adequate mixing for all treatment flow rates. ()

07. Flocculation. Flocculation shall mean the gathering together of fine particles in water by gentle mixing after the addition of coagulant chemicals to form larger particles. ()

a. Basin inlet and outlet design shall minimize short-circuiting and destruction of floc. A drain,

pumps, or a combination of both drain and pumps shall be provided to accomplish dewatering and sludge removal. ()

b. The flow-through velocity shall not be less than one-half (0.5) nor greater than one and one-half (1.5) feet per minute with a detention time for floc formation of at least thirty (30) minutes unless otherwise approved by the Department. ()

c. Agitators shall be driven by variable speed drives. ()

d. Flocculation and sedimentation basins shall be as close together as possible. The velocity of flocculated water through pipes or conduits to settling basins shall be not less than one-half (0.5) nor greater than one and one-half (1.5) feet per second. Allowances must be made to minimize turbulence at bends and changes in direction. ()

08. Small Systems May Use Baffling. Baffling may be used to provide for flocculation in small plants upon approval by the Department. ()

09. Sedimentation Units. The following criteria apply to conventional sedimentation units: ()

a. A minimum of two (2) hours of settling time shall be provided following flocculation unless adequate settling in less time can be demonstrated. ()

b. Inlets shall be designed to distribute the water equally and at uniform velocities. ()

c. Outlet weirs or submerged orifices shall maintain velocities suitable for settling in the basin and minimize short-circuiting. Outlet weirs shall be designed so that the rate of flow over the outlet weirs or through the submerged orifices shall not exceed twenty-thousand (20,000) gallons per day per foot of the outlet launder. The entrance velocity through the submerged orifices shall not exceed one-half (0.5) feet per second. ()

d. The velocity through settling basins shall not exceed one-half (0.5) feet per minute. The basins must be designed to minimize short-circuiting. Fixed or adjustable baffles must be provided as necessary to achieve the maximum potential for clarification. ()

e. When an overflow weir or pipe is provided the overflow shall discharge by gravity with a free fall at a location where the discharge will be noted. ()

f. Adequate sludge collection equipment that ensures proper basin coverage shall be provided and basins must be provided with a means for dewatering. ()

g. Flushing lines or hydrants shall be provided and must be equipped with backflow prevention devices acceptable to the Department. ()

h. Sludge removal design shall provide that sludge pipes are not less than three (3) inches in diameter and arranged so as to facilitate cleaning. Entrance to sludge withdrawal piping shall be designed to prevent clogging. Provision shall be made for the operator to observe and sample sludge being withdrawn from the unit. ()

i. Sludge shall be disposed of in accordance with applicable regulations, as set forth in Section 540. ()

10. Solids Contact Clarifiers. Solids contact clarifiers are generally acceptable for combined softening and clarification where water characteristics, especially temperature, do not fluctuate rapidly, flow rates are uniform and operation is continuous. A minimum of two (2) units are required for surface water treatment as required in Subsection 520.01. ()

a. Chemicals shall be applied at such points and by such means as to ensure satisfactory mixing of the chemicals with the water. ()

b. Unless otherwise approved by the Department based on documentation provided by the design engineer, a rapid mix device or chamber ahead of the solids contact clarifier is required to assure proper mixing of the chemicals applied. Mixing devices employed shall be constructed so as to provide good mixing of the raw water with previously formed sludge particles and prevent deposition of solids in the mixing zone. ()

c. Flocculation equipment shall be adjustable as to speed, pitch, or a combination of speed and pitch and must provide for coagulation in a separate chamber or baffled zone within the unit. ()

d. Sludge removal design shall provide that sludge pipes are not less than three (3) inches in diameter and arranged so as to facilitate cleaning. Entrance to sludge withdrawal piping shall be designed to prevent clogging. Provision shall be made for the operator to observe and sample sludge being withdrawn from the unit. ()

e. Blow-off outlets and drains must terminate and discharge at places acceptable to the Department in regard to control of potential cross connections. Cross connection control must be included for the potable water lines used to backflush sludge lines. ()

f. The detention time shall be established on the basis of the raw water characteristics and other local conditions that affect the operation of the unit. The Department may request data to support decisions made with respect to detention times. The Department may alter detention time requirements. ()

g. Controls for sludge withdrawal which minimize water losses shall be provided. ()

h. Unless otherwise approved by the Department based on documentation provided by the design engineer, weirs shall be adjustable and at least equivalent in length to the perimeter of the tank. Weir loading shall not exceed ten (10) gallons per minute per foot of weir length for units used as clarifiers or twenty (20) gallons per minute per foot of weir length for units used for softening. Where orifices are used, the loading rates per foot of launder rates shall be equivalent to weir loadings. Either shall produce uniform rising rates over the entire area of the tank. ()

i. Upflow rates shall not exceed one (1) gallon per minute per square foot of area at the sludge separation line for units used as clarifiers or one and three-quarters (1.75) gallons per minute per foot of area at the slurry separation line for units used as softeners. The Department may consider higher rates if supporting data is provided. ()

11. Settler Units. Settler units consisting of variously shaped tubes or plates installed in multiple layers and at an angle to the flow may be used for sedimentation following flocculation. ()

a. Inlets and outlets shall be designed to maintain velocities suitable for settling in the basin and to minimize short-circuiting. Plate units shall be designed to minimize unequal distribution across the units. ()

b. Drain piping from the settler units must be sized to facilitate a quick flush of the settler units and to prevent flooding other portions of the plant. ()

c. Although most units will be located within a plant, outdoor installations must provide sufficient freeboard above the top of settlers to prevent freezing in the units. ()

d. Water shall be applied to tube settlers at a maximum rate of two (2) gallons per minute per square foot of cross-sectional area for tube settlers, unless higher rates are justified through pilot plant or in-plant demonstration studies. See Subsection 501.19 for general information on conducting pilot studies. ()

e. Water shall be applied to plate settlers at a maximum plate loading rate of one-half (0.5) gallons per minute per square foot, based on eighty (80) percent of the projected horizontal plate area. ()

f. Flushing lines shall be provided to facilitate maintenance and must be properly protected against backflow or back siphonage. ()

12. High Rate Clarification. High rate clarification processes may be approved upon demonstrating

satisfactory performance under on-site pilot plant conditions or documentation of full scale plant operation with similar raw water quality conditions. Reductions in detention times and/or increases in weir loading rates shall be justified. See Subsection 501.19 for general information on conducting pilot studies. Examples of such processes include dissolved air flotation, ballasted flocculation, contact flocculation/clarification, and helical upflow. ()

521. FACILITY AND DESIGN STANDARDS: SURFACE WATER TREATMENT: FILTRATION USING RAPID RATE GRAVITY FILTERS.

01. Pretreatment. The use of rapid rate gravity filters shall require pretreatment in the form of coagulation, flocculation, and sedimentation. ()

02. Rate of Filtration. The filter rate must be proposed and justified by the design engineer to the satisfaction of the Department prior to the preparation of final plans and specifications. ()

03. Number of Units. A minimum of two (2) units for redundancy shall be provided for filtration such that plant design capacity can be maintained with any component out of service for maintenance or repairs. Where declining rate filtration is provided, the variable aspect of filtration rates, and the number of filters must be considered when determining the design capacity for the filters. ()

04. Structure and Hydraulics. The filter structure shall be designed to provide for: ()

- a. Vertical walls within the filter. There shall be no protrusion of the filter walls into the filter media. ()
- b. Cover by superstructure with sufficient headroom to permit normal inspection and operation. ()
- c. Minimum depth of filter box of eight and one-half (8.5) feet. ()
- d. Minimum water depth over the surface of the filter media of three (3) feet. ()
- e. Trapped effluent to prevent backflow of air to the bottom of the filters. ()
- f. Prevention of floor drainage to the filter with a minimum four (4) inch curb around the filters. ()
- g. Prevention of flooding by providing overflow. ()
- h. Maximum velocity of treated water entering the filters of two (2) feet per second. ()
- i. Cleanouts and straight alignment for influent pipes or conduits where solids loading is heavy, or following lime-soda softening. ()
- j. Washwater drain capacity to carry maximum flow. ()
- k. Walkways around filters to be not less than twenty-four (24) inches wide and equipped with safety handrails or walls. ()
- l. Construction so as to prevent cross connections and common walls between potable water and non-potable fluids. ()

05. Washwater Troughs. Washwater troughs shall be constructed to have: ()

- a. The bottom elevation above the maximum level of expanded media during washing. ()
- b. A two (2) inch freeboard at the maximum rate of wash. ()
- c. The top edge level and all at the same elevation. ()

- d. Spacing so that each trough serves the same number of square feet of filter area. ()
 - e. Maximum horizontal travel of suspended particles to reach the trough not to exceed three (3) feet. ()
- 06. Filter Material.** The media shall be clean silica sand or other natural or synthetic media free from detrimental chemical or bacterial contaminants, approved by the Department, and having the following characteristics: ()
- a. A total depth of not less than twenty-four (24) inches and generally not more than thirty (30) inches. ()
 - b. An effective size range of the smallest material no greater than forty-five hundredths (0.45) of a millimeter to fifty-five hundredths (0.55) of a millimeter. ()
 - c. A uniformity coefficient of the smallest material not greater than one and sixty-five hundredths (1.65). ()
 - d. A minimum of twelve (12) inches of media with an effective size range no greater than forty-five hundredths (0.45) of a millimeter to fifty-five hundredths (0.55) of a millimeter and a specific gravity greater than other filtering materials within the filter. ()
 - e. Types of filter media are as follows: ()
 - i. Clean, crushed anthracite or a combination of anthracite and other media may be considered on the basis of experimental data specific to the project. The anthracite shall have the following characteristics: ()
 - (1) Effective size of forty-five hundredths (0.45) of a millimeter to fifty-five hundredths (0.55) of a millimeter with uniformity coefficient not greater than sixty-five hundredths (1.65) when used alone. ()
 - (2) Effective size of eight tenths (0.8) of a millimeter to one and two-tenths (1.2) millimeters with a uniformity coefficient not greater than one and eighty-five hundredths (1.85) when used as a cap. ()
 - (3) Effective size for anthracite used as a single media on potable ground water for iron and manganese removal only shall be a maximum of eight tenths (0.8) of a millimeter (effective sizes greater than this may be approved based upon onsite pilot plant studies or other demonstration acceptable to the Department). See Subsection 501.19 for general information on conducting pilot studies. ()
 - ii. Sand media shall have the following characteristics: ()
 - (1) Effective size of forty-five hundredths (0.45) of a millimeter to fifty-five hundredths (0.55) of a millimeter. ()
 - (2) Uniformity coefficient of not greater than one and sixty-five hundredths (1.65). ()
 - (3) Larger size sand media may be allowed by the Department where full-scale tests have demonstrated that treatment goals can be met under all conditions. ()
 - iii. Granular activated carbon (GAC) as a single media may be considered for filtration only after pilot or full-scale testing and with prior approval of the Department. See Subsection 501.19 for general information on conducting pilot studies. The design shall include the following: ()
 - (1) The media must meet the basic specifications for filter media as given in Subsections 521.06.a. through d., except that larger size media may be allowed where full scale tests have demonstrated that treatment goals can be met under all conditions. ()

- (2) There must be a means for periodic treatment of filter material for control of bacterial and other growth. ()
- (3) Provisions must be made for frequent replacement or regeneration. ()
- iv. Other media will be considered based on experimental data and operating experience. ()
- v. A three (3) inch layer of torpedo sand shall be used as a supporting media for filter sand where supporting gravel is used, and shall have an effective size of eight-tenths (0.8) millimeters to two (2.0) millimeters, and a uniformity coefficient not greater than one and seven-tenths (1.7). ()

vi. Gravel, when used as the supporting media, shall consist of cleaned and washed, hard, durable, rounded silica particles and shall not include flat or elongated particles. The coarsest gravel shall be two and one-half (2.5) inches in size when the gravel rests directly on a lateral system and must extend above the top of the perforated laterals. Not less than four (4) layers of gravel shall be provided in accordance with the size and depth distribution specified in the table below. Reduction of gravel depths and other size gradations may be considered upon justification to the reviewing authority for slow sand filtration or when proprietary filter bottoms are specified.

Size of Gravel	Depth
2 ½ to 1 ½ inches	5 to 8 inches
1 ½ to ¾ inches	3 to 5 inches
¾ to ½ inches	3 to 5 inches
½ to 3/16 inches	2 to 3 inches
3/16 to 3/32 inches	2 to 3 inches

()

07. Filter Bottoms and Strainer Systems. Departure from the standards set out in Subsection 521.07 may be acceptable for high rate filters and for proprietary bottoms. Porous plate bottoms shall not be used where iron or manganese may clog them or with waters softened by lime. The design of manifold-type collection systems shall:

()

- a. Minimize loss of head in the manifold and laterals. ()
- b. Ensure even distribution of wash water and even rate of filtration over the entire area of the filter. ()
- c. Provide the ratio of the area of the final openings of the strainer systems to the area of the filter at about three-thousandths (0.003), ()
- d. Provide the total cross-sectional area of the laterals at about twice the total area of the final openings. ()
- e. Provide the cross-sectional area of the manifold at one and one-half (1.5) to two (2) times the total area of the laterals. ()
- f. Lateral perforations without strainers shall be directed downward. ()

08. Surface or Subsurface Wash. Surface or subsurface wash facilities are required except for filters used exclusively for iron or manganese removal, and may be accomplished by a system of fixed nozzles or a revolving-type apparatus. All devices shall be designed with:

()

- a. Provision for water pressures of at least forty-five (45) pounds per square inch. ()

b. A properly installed vacuum breaker or other approved device to prevent back siphonage if connected to the treated water system. ()

c. Rate of flow of two (2.0) gallons per minute per square foot of filter area with fixed nozzles or one-half (0.5) gallon per minute per square foot with revolving arms. ()

d. Air wash can be considered based on experimental data and operating experiences. ()

09. Air Scouring. Air scouring can be considered in place of surface wash provided the following conditions are met: ()

a. Air flow for air scouring the filter must be three (3) to five (5) standard cubic feet per minute square foot of filter area when the air is introduced in the underdrain; a lower air rate must be used when the air scour distribution system is placed above the underdrains. ()

b. A method for avoiding excessive loss of the filter media during backwashing must be provided. ()

c. Air scouring must be followed by a fluidization wash sufficient to re-stratify the media. ()

d. Air must be free from contamination. ()

e. Air scour distribution systems shall be placed below the media and supporting bed interface with the following exception: if placed at the interface the air scour nozzles shall be designed to prevent media from clogging the nozzles or entering the air distribution system. ()

f. Piping for the air distribution system shall not be flexible hose which will collapse when not under air pressure and shall not be a relatively soft material which may erode at the orifice opening with the passage of air at high velocity. ()

g. Air delivery piping shall not pass down through the filter media nor shall there be any arrangement in the filter design which would allow short circuiting between the applied unfiltered water and the filtered water. ()

h. The backwash water delivery system must be capable of fifteen (15) gallons per minute per square foot of filter surface area (37 m/hr); however, when air scour is provided the backwash water rate must be variable and should not exceed eight (8) gallons per minute per square foot (20 m/hr) unless operating experience shows that a higher rate is necessary to remove scoured particles from filter media surfaces. ()

i. The filter underdrains shall be designed to accommodate air scour piping when the piping is installed in the underdrain. ()

10. Filter Appurtenances. The following shall be provided for every filter: ()

a. Influent and effluent sampling taps. ()

b. A gauge capable of indicating loss of head. ()

c. A meter indicating rate-of flow. A modified rate controller which limits the rate of filtration to a maximum rate may be used. However, equipment that simply maintains a constant water level on the filters is not acceptable, unless the rate of flow onto the filter is properly controlled. A pump or a flow meter in each filter effluent line may be used as the limiting device for the rate of filtration only if approved by the Department on a site-specific basis. ()

11. Backwash. Provisions shall be made for washing filters as follows: ()

- a. A minimum backwash rate such that a fifty (50) percent expansion of the filter bed is achieved. ()
 - b. Filtered water provided at the required rate by wash water tanks, a wash water pump, from the high service main, or a combination of these. ()
 - c. Wash water pumps in duplicate unless an alternate means of obtaining wash water is available. ()
 - d. Not less than fifteen (15) minutes wash of one filter at the design rate of wash. ()
 - e. A wash water regulator or valve on the main wash water line to obtain the desired rate of filter wash with the wash water valves on the individual filters open wide. ()
 - f. A rate-of-flow indicator, preferably with a totalizer, on the main wash water line, located so that it can be easily read by the operator during the washing process. ()
 - g. Design to prevent rapid changes in backwash water flow. Backwash shall be operator initiated. Automated systems shall be operator adjustable. ()
- 12. Roof Drainage.** Roof drains shall not discharge into the filters or basins and conduits preceding the filters. ()

522. FACILITY AND DESIGN STANDARDS: SURFACE WATER TREATMENT: FILTRATION USING DIATOMACEOUS EARTH.

The use of these filters may be considered for application to surface waters with low turbidity and low bacterial contamination, and may be used for iron removal for ground waters providing the removal is effective and the water is of satisfactory sanitary quality before treatment. ()

01. Conditions of Use. Diatomaceous earth filters are expressly excluded from consideration for the following conditions: ()

- a. Bacteria removal; ()
- b. Color removal; ()
- c. Turbidity removal where either the gross quantity of turbidity is high or the turbidity exhibits poor filterability characteristics; or ()
- d. Filtration of waters with high algae counts. ()

02. Treated Water Storage. Treated water storage capacity in excess of normal requirements shall be provided to allow operation of the filters at a uniform rate during all conditions of system demand at or below the approved filtration rate, and guarantee continuity of service during adverse raw water conditions without by-passing the system. ()

03. Number of Units. A minimum of two (2) units for redundancy shall be provided for filtration such that plant design capacity can be maintained with any component out of service for maintenance or repairs. ()

04. Precoat. A uniform precoat shall be applied hydraulically to each septum by introducing a slurry to the tank influent line and employing a filter-to-waste recirculation system. ()

05. Body Feed. A body feed system to apply additional amounts of diatomaceous earth slurry during the filter run is required to avoid short filter runs or excessive head losses. ()

- a. The rate of body feed is dependent on raw water quality and characteristics and must be determined in the pilot plant study. See Subsection 501.19 for general information on conducting pilot studies. ()

- b. Continuous mixing of the body feed slurry is required. ()
- 06. Filtration Requirements.** ()
 - a. Rate of filtration shall be controlled by a positive means. ()
 - b. Head loss shall not exceed thirty (30) psi for pressure diatomaceous earth filters, or a vacuum of fifteen (15) inches of mercury for a vacuum system. ()
 - c. A recirculation or holding pump shall be employed to maintain differential pressure across the filter when the unit is not in operation in order to prevent the filter cake from dropping off the filter elements. A minimum recirculation rate of one-tenth (0.1) gallon per minute per square foot of filter area shall be provided. ()
 - d. The septum or filter elements shall be structurally capable of withstanding maximum pressure and velocity variations during filtration and backwash cycles, and shall be spaced such that no less than one (1) inch is provided between elements or between any element and a wall. ()
 - e. The filter influent shall be designed to prevent scour of the diatomaceous earth from the filter element. ()
- 07. Backwash.** A satisfactory method to thoroughly remove and dispose of spent filter cake shall be provided. ()
- 08. Appurtenances.** The following shall be provided for every filter: ()
 - a. Sampling taps for raw and filtered water. ()
 - b. Loss of head or differential pressure gauge. ()
 - c. Rate-of-flow indicator. ()
 - d. A throttling valve used to reduce rates below normal during adverse raw water conditions. ()
 - e. Evaluation of the need for body feed, recirculation, and any other pumps. ()
 - f. Provisions for filtering to waste with appropriate measures for backflow prevention. ()
- 09. Monitoring.** A continuous monitoring turbidimeter with recorder is required on each filter effluent for plants treating surface water. ()

523. FACILITY AND DESIGN STANDARDS: SURFACE WATER TREATMENT: SLOW SAND FILTRATION.

The use of these filters shall require prior engineering studies to demonstrate the adequacy and suitability of this method of filtration for the specific water supply. Slow Sand Filtration and Diatomaceous Earth Filtration for Small Water Systems, Manual on Slow Sand Filtration, and Slow Sand Filtration referenced in Subsection 002.02, may be used as guidance in design of slow sand filtration facilities. ()

01. Quality of Raw Water. Slow rate gravity filtration shall be limited to waters having maximum turbidities of ten (10) nephelometric units and maximum color of fifteen (15) units; such turbidity must not be attributable to colloidal clay. Raw water quality data must include examinations for algae. For source water having variable turbidity, the potential use of a roughing filter or other pretreatment technology should be evaluated. The Department may allow the use of a pretreatment technology on raw waters that exceed the normal limits for turbidity and color, if it can be demonstrated to the Department's satisfaction that pretreatment will enable slow sand filtration to properly operate and comply with these Rules. ()

02. Number of Units. A minimum of two (2) units for redundancy shall be provided for filtration such that plant design capacity can be maintained with any component out of service for maintenance or repairs. The

Department may allow a single bed filter if it can be demonstrated to the Department's satisfaction that an alternative water source is available such that the water system can provide plant design capacity with the filter taken out of service for maintenance and repairs. ()

03. Structural Details and Hydraulics. Slow rate gravity filters shall be so designed as to provide a cover, unless otherwise approved by the Department based on documentation provided by the design engineer, headroom to permit normal movement by operating personnel for scraping and sand removal operations, adequate access hatches and access ports for handling of sand and for ventilation, filtration to waste, an overflow at the maximum filter water level, and protection from freezing. A permanent means of determining sand depth shall be provided. ()

04. Underdrains. Each filter unit shall be equipped with a main drain and an adequate number of lateral underdrains to collect the filtered water. The underdrains shall be so spaced that the maximum velocity of the water flow in the underdrain will not exceed three-fourths (0.75) feet per second. The maximum spacing of laterals shall not exceed three (3) feet if pipe laterals are used. ()

05. Filter Material. The following requirements apply: ()

a. A minimum depth of thirty (30) inches of filter sand shall be placed on graded gravel layers. ()

b. The effective size shall be between fifteen hundredths (0.15) of a millimeter and thirty-five hundredths (0.35) of a millimeter. Larger sizes may be considered by the Department based on the results of a pilot study. See Subsection 501.19 for general information on conducting pilot studies. ()

c. The uniformity coefficient shall not exceed three point zero (3.0). ()

d. The sand shall be cleaned and washed free from foreign matter. ()

e. The sand shall be rebedded to the original minimum depth of thirty (30) inches when scraping has reduced the bed depth to no less than twenty-four (24) inches. Where sand is to be reused in order to provide biological seeding and shortening of the ripening process, rebedding shall utilize a "throw over" technique whereby new sand is placed on the support gravel and existing sand is replaced on top of the new sand. The maximum filtration rate shall not exceed zero point one (0.1) gallon per minute per square foot for each individual bed. ()

06. Filter Sand Support. ()

a. A three (3)-inch layer of sand shall be used as a supporting media for filter sand. The supporting sand shall have an effective size of zero point eight (0.8) millimeters to two point zero (2.0) millimeters and a uniformity coefficient not greater than one point seven (1.7). ()

b. Gravel shall consist of cleaned and washed, hard, durable, rounded rock particles and shall not include flat or elongated particles. The coarsest gravel shall be two and one-half (2.5) inches in size when the gravel rests directly on a lateral system and must extend above the top of the perforated laterals. Not less than four (4) layers of gravel shall be provided in accordance with the size and depth distribution specified in the table below. Reduction of gravel depths and other size gradations may be considered upon justification to the Department.

Size of Gravel	Depth
2 1/2 to 1 1/2 inches	5 to 8 inches
1 1/2 to 3/4 inches	3 to 5 inches
3/4 to 1/2 inches	3 to 5 inches
1/2 to 3/16 inches	2 to 3 inches
3/16 to 3/32 inches	2 to 3 inches

()

07. Depth of Water Over Filter Beds. The design shall provide a depth of at least three (3) to six (6) feet of water over the sand. Influent water shall not scour the sand surface. ()

08. Control Appurtenances. Each filter shall be equipped with a loss of head gauge, an orifice, Venturi meter, or other suitable means of discharge measurement installed on each filter to control the rate of filtration, and an effluent pipe designed to maintain the water level above the top of the filter sand. The effluent piping must not be directly interconnected with the other filter beds. A sample tap shall be provided for each filter bed. ()

09. Ripening. Slow sand filters must be filtered-to-waste until they are biologically mature before being put into service following construction, scraping, re-sanding, or reopening after extended shutdown. The period of filter-to-waste shall be as follows: ()

a. Filters shall be filtered-to-waste after scraping or cleaning until the effluent turbidity falls consistently below the pre-cleaning level, unless otherwise approved by the Department based on documentation provided by the design engineer. ()

b. Filters shall be filtered-to-waste following construction, re-sanding, or extended shutdown based on project specific protocols that have been approved by the Department and then incorporated into a Department approved operation and maintenance manual. These protocols may be based on factors from standard literature such as those listed in Subsection 002.02 but typically include factors such as minimum filter-to-waste time periods, bacteriological testing, and effluent turbidity. Sampling results from the filter-to-waste period shall be provided to the Department for review and the Department must provide authorization prior to restarting service to the public. ()

10. Supernatant Drain Required. Filter beds shall be equipped with a supernatant drain to allow for quick removal of water standing over sand that has become impermeable because it requires scraping or rebedding. ()

11. Filter Bed Control and Minimum Rate of Flow. Each filter bed shall be controlled separately and filters must be operated at a constant filtration rate with any changes made gradually. The minimum rate of filtration shall be at least two hundredths (0.02) gallons per minute per square foot. ()

524. FACILITY AND DESIGN STANDARDS: SURFACE WATER TREATMENT: DIRECT FILTRATION.

Direct filtration, as used herein, refers to the filtration of a surface water following chemical coagulation and possibly flocculation but without prior settling. The nature of the treatment process will depend upon the raw water quality. A full scale direct filtration plant shall not be constructed without prior pilot studies which are acceptable to the reviewing authority. In-plant demonstration studies are required where conventional treatment plants are converted to direct filtration. Where direct filtration is proposed, an engineering report shall be submitted prior to conducting pilot plant or in-plant demonstration studies. See Subsection 501.19 for general information on conducting pilot studies. ()

01. Filtration Requirements. ()

a. Filters shall be rapid rate gravity filters with dual or mixed media. The final filter design shall be based on the pilot plant or in-plant demonstration studies, and all portions of Section 518 apply. Pressure filters or single media sand filters shall not be used. ()

b. A continuous recording turbidimeter shall be installed on each filter effluent line and on the composite filter effluent line. ()

c. Additional continuous monitoring equipment such as particle counting or streaming current metering to assist in control of coagulant dose may be required by the reviewing authority. ()

02. Siting Requirements. The plant design and land ownership surrounding the plant shall allow for modifications of the plant. ()

03. Redundancy. A minimum of two (2) units shall be provided for filtration such that plant capacity can be maintained with any component out of service for maintenance or repairs. ()

525. FACILITY AND DESIGN STANDARDS: LOW PRESSURE MEMBRANE FILTRATION.

Low pressure filtration, as used herein, refers to microfiltration or ultrafiltration processes. Low pressure membrane systems can provide greater than 3-log removal of *Giardia lamblia* and *Cryptosporidium*, and ultrafiltration systems can also provide up to 2-log virus removal. The Department will determine maximum available removal credits for the specific membrane under consideration. The actual log removal credit that a low pressure membrane filtration system will receive is the lower of the values determined by the following: the removal efficiency demonstrated during challenge testing, or the maximum log removal that can be verified by direct integrity testing required during the course of normal operation. Membrane systems shall contain sufficient design to allow for offline direct integrity testing of all units or modules at the required interval while retaining the capability to supply maximum day demand to the water system. Membrane systems shall have at least two (2) units unless it can be demonstrated to the satisfaction of the Department that a secondary source or treatment component can supply the required minimum plant design capacity. ()

01. Membrane Selection and Design Considerations. ()

a. Challenge Testing. Challenge testing involves seeding feed water with an organism or particulate and measuring the log reduction of the organism or particulate between the feed and filtrate. It is a one-time product-specific test event performed by an approved third party designed to demonstrate the removal ability of the membrane. Challenge testing shall be conducted by the third party entity in general conformance with the USEPA Membrane Filtration Guidance Manual referenced in Subsection 002.02 (Membrane Filtration Guidance Manual). The challenge test report shall be submitted to the Department along with the preliminary engineering report for the project. The Department may accept another state's challenge test report approval. ()

b. Water Quality Considerations for Design. A review of historical source water data shall be conducted to determine the degree of pretreatment needed if any, the feasibility of membrane filtration, and an estimated cost of the system. At a minimum, the following parameters shall be investigated: Seasonal temperature and turbidity profiles, total organic loading, occurrence of algae, microbial activity, iron, manganese, and hardness levels, and any other inorganic or physical parameters determined to be necessary by the Department. The data shall be used to determine anticipated fouling and scaling, backwash and cleaning cycles and regimens, acceptable trans-membrane pressure differentials, and design flux, especially during lowest anticipated water temperature. ()

c. Pilot Study. A pilot study shall be conducted for a period that shall be determined by the design engineer and approved by the Department. The duration should include the season of lowest water temperatures and the season including the highest anticipated turbidity, algal bloom, TOC, and iron/manganese event or otherwise cover four seasons of source water quality conditions. The Department may approve a shorter duration proof pilot to verify design criteria that affect the reliable production capacity of the membrane system. The Department may approve the use of a full scale pilot study where the full scale facility will act as the pilot study. The Department may also waive the pilot study requirement. Proof pilot studies, full scale pilot studies, and the waiving of the pilot study requirement will only be approved in circumstances where source water conditions and fouling characteristics are already well understood. Such source waters include but are not limited to ground water under the influence of surface water, waters with existing membrane plants, waters where sufficient pilot test data has already been generated, and extensively used or tested membrane products where production or test data on similar waters is available (i.e., same lake, reservoir, or same reach for stream sources). In addition to the requirements in Subsection 501.19, the pilot study shall include: ()

- i. A means to identify the best membrane to use for the anticipated water quality; ()
- ii. Analysis of any need for pretreatment; ()
- iii. Range of anticipated flux rates; ()

- iv. Operating and transmembrane pressure; ()
 - v. Fouling and scaling potential; ()
 - vi. Backwash and recovery cleaning, cleaning processes, and intervals; ()
 - vii. Efficiency and process mass balance; ()
 - viii. Waste stream volume, characterization, and disposal method; ()
 - ix. Turbidity; and ()
 - x. Integrity testing results and procedures. ()
- 02. Monitoring and Compliance Requirements for Membranes.** Public drinking water systems that use low pressure membrane filtration must comply with the following requirements. ()
- a. Initial Start-Up.** ()
 - i. The Department shall be notified at least one (1) week in advance of the planned start-up date. ()
