**DESCRIPTIVE SUMMARY AND STATEMENT OF PURPOSE:** The following is a statement in nontechnical language of the substance and purpose of the intended negotiated rulemaking and the principal issues involved:

The Idaho Electrical Board is seeking input and recommendations from the industry and interested parties regarding apprentice registration and renewal requirements. Currently, apprentice registrations last five years. An apprentice must attend four years of school and work 8,000 hours on the job to be eligible to become a journeyman electrician. An apprentice must also attend at least two years of school and perform at least 4,000 hours of work experience in order to renew an apprentice registration. In order to renew a registration, a renewal applicant who has not met those minimum requirements must demonstrate extenuating circumstances exist that prevent the applicant from achieving those requirements. Apprentices who have not passed the journeyman's test within two years of finishing school must also repeat the fourth year of school. Additionally, all apprentices are required to receive direct on the job supervision from a journeyman electrician in a ratio of no more than two apprentices for every journeyman. Journeymen licensed in other states cannot be issued an apprentice registration.

The Division and Board have determined that these requirements have been difficult for many in the trade to achieve. Accordingly, the Board is considering modification of the rules, as appropriate, to address the needs of the evolving industry.
