c. Accurate DNMP records shall be maintained. These records shall include at a minimum: (3-29-17)

i. Regulatory soil samples shall be taken by a Certified Soil Sampler and tested by a laboratory that meets the requirements and performance standards of the North American Proficiency Testing Program under the auspices of the Soil Science Society of America outlined in the NMS, as incorporated by reference in Subsection 004.02, as part of NMS 590 or other methods as approved by the Department; (3-29-10)

ii. Annual soil analysis; (3-29-10)

iii. Date and amount of dairy byproduct and commercial fertilizer applied to individual dairy owned or operated fields; (3-29-17)

iv. Date(s) of exported dairy byproduct, number of acres applied, amount of dairy byproduct exported, and to whom dairy byproduct was exported; and (3-29-17)

v. Actual crop yields on dairy owned or operated fields. (3-29-10)

vi. A nitrogen management plan worksheet (pages 35-36 of the 2017 Idaho Phosphorus Site Index Standards) shall be completed for all fields and pastures receiving land application of nutrients. ()

d. Pasturing. Pastures utilized for grazing of dairy animals, and other animals owned, leased or otherwise under the control of a producer within the same pasture, shall be incorporated in and subject to the DNMP. These pastures are also subject to the following requirements: (3-29-17)

i. Soil testing. Soil tests shall be conducted pursuant to the NMS and Section 031 on all lands utilized as pasture. ~~If pasture soil tests exceed the phosphorus threshold, the producer must take action to demonstrate a downward trend in the phosphorus index in subsequent soil tests. If two (2) out of three (3) subsequent soil tests reveal the phosphorus index continues to trend upward, the producer will be penalized as provided in these rules. (3-29-17)()~~

ii. Surface water access. If pastured animals have access to surface water within a pasture, the producer may be required to implement one (1) or more NRCS conservation practice standards to minimize adverse impact on surface water quality. (3-29-17)

iii. Land application. If land application occurs within a pasture, soil tests shall be conducted annually on that pasture. (3-29-17)

iv. Confinement areas. Confinement areas shall not be considered part of a pasture. (3-29-17)

031. PHOSPHORUS MANAGEMENT.

Dairy farms shall utilize either Phosphorus Indexing (Section 031.01) or the Phosphorus Threshold (Section 031.02) to manage nutrient application. After June 30, 2023, dairy farms will no longer be allowed to use the Phosphorus Threshold (Section 031.02) provision and all facilities will be required to use Phosphorus Indexing (Section 031.01). ()

01. Phosphorus Indexing. The dairy farm shall utilize phosphorus site indexing (PSI) for each field

where dairy byproducts and/or commercial fertilizers are land applied and for each pasture utilized for grazing, in accordance with the 2017 Idaho Phosphorus Site Index Standards. The PSI shall be calculated by a Nutrient Management Planner, certified by the Department, and be included as a component of the DNMP in the dairy farm's Environmental Management Plan. It shall be the dairy farm's responsibility to provide updated information, including annual soil test results, to the Nutrient Management Planner for calculation of the PSI on all fields and pastures on an annual basis. Failure to abide by the nutrient application and management provisions of a field or pasture's PSI risk classification in the DNMP shall constitute a non-compliance and the producer may be penalized as provided in these rules. ()

a. Notwithstanding anything to the contrary in the 2017 Idaho Phosphorus Site Index Standards, no land application of phosphorus shall be permitted on any fields or pastures that possess a soil phosphorus level exceeding three hundred (300) parts per million, as determined by the required annual soil test (via Olsen method). Further, the dairy farm shall not receive BMP Coefficient credit for implementing any best management practice designed to reduce phosphorus loss on fields exceeding three hundred (300) parts per million, via Olsen method. ()

b. The Department may award zero (0) or partial BMP Coefficient credit when a dairy farm implements a best management practice designed to reduce phosphorus loss from fields that does not fully conform to NRCS standards or the standards set forth in the 2017 Idaho Phosphorus Site Index Standards BMP definition section. ()

02. Phosphorus Threshold. If the regulatory or producer soil tests reveal that phosphorus thresholds on fields and pastures have exceeded the levels established in the NMS, the producer shall only apply phosphorus at the appropriate phosphorus crop uptake rate. Subsequent regulatory soil test(s) on fields and pastures that were identified as exceeding the phosphorus threshold will be conducted. If two (2) out of three (3) tests reveal the phosphorus index continues to trend upward, the producer will be penalized as provided in these rules. These tests shall be taken in the top one (1) foot of soil. ()

THE IDAHO DEPARTMENT OF AGRICULTURE LABORATORIES
DOCKET NO. 02-0621-1701 (CHAPTER REPEAL)
NOTICE OF RULEMAKING – ADOPTION OF PENDING RULE

EFFECTIVE DATE: This rule has been adopted by the agency and is now pending review by the 2018 Idaho State Legislature for final approval. The pending rule becomes final and effective at the conclusion of the legislative session, unless the rule is approved or rejected in part by concurrent resolution in accordance with Sections 67-5224 and 67-5291, Idaho Code. If the pending rule is approved or rejected in part by concurrent resolution, the rule becomes final and effective upon adoption of the concurrent resolution or upon the date specified in the concurrent resolution.

AUTHORITY: In compliance with Section 67-5224, Idaho Code, notice is hereby given that this agency has adopted a pending rule. The action is authorized pursuant to Sections 22-604, 22-2006, 22-2204, and 25-2710, Idaho Code.

DESCRIPTIVE SUMMARY: The following is a concise explanatory statement of the reasons for adopting the pending rule and a statement of any change between the text of the proposed rule and the text of the pending rule with an explanation of the reasons for the change:

Historically the Feed and Fertilizer (F&F) Laboratory's primary function (>90%) has been regulatory/enforcement testing. However, it occasionally accepts public service samples on a fee basis. Since January 2014, the lab had 28 customers totaling \$18,114.18 of business. Of that amount, 84% or \$15,223.35 came from two other State Agencies from Oregon and Michigan that use the ISDA F&F Lab because of its extremely low prices. The primary mission of the F&F Lab is to provide enforcement testing services in an accurate and timely manner. These public service samples, for the most part, do not even benefit Idaho residents and tie up valuable lab space and time. Therefore, the ISDA has halted voluntary service sample testing as of January 1st, 2017.

The ISDA is repealing the rule for voluntary public services.

There are no changes to the pending rule and it is being adopted as originally proposed. The original text of the proposed rule was published in the September 6, 2017 Idaho Administrative Bulletin, [Vol. 17-9 page 34](#).

IDAHO CODE SECTION 22-101A STATEMENT: This rule does not regulate an activity not already regulated by the federal government, nor is it broader in scope or more stringent than federal regulations.

FISCAL IMPACT: The following is a specific description, if applicable, of any negative fiscal impact on the state general fund greater than ten thousand dollars (\$10,000) during the fiscal year:

ISDA does not anticipate any fiscal impact as a result of this rulemaking.

LSO Rules Analysis Memo

THE FOLLOWING IS THE TEXT OF DOCKET NO. 42-0101-1701

301. INVOICES AND RECORDS.

01. Invoices. Section 22-3316, Idaho Code, provides for invoices to be delivered to the grower for each purchase. The Wheat Commission is not providing a special form for this purpose and suggests that buyers use the final settlement vouchers of accounts of sale commonly used in Idaho. The amount of the Idaho state wheat tax deducted must be shown on each settlement voucher. (7-1-93)

02. Vouchers. Buyers are not required to send the Commission copies of their settlement vouchers issued to individual growers but should keep copies available for examination by representatives of the Commission at a later date. Where it is not the practice to issue settlement vouchers of accounts of sale, buyers should be sure that they have accurate records of all wheat bought from growers and the amount of wheat bought from each grower. (7-1-93)

03. Delivery of Documents to Commission. The first purchaser of wheat shall complete and return the Report of Tax, or equivalent, to the Commission office at the end of each production year (July 1 through June 30). The report shall be due on the same date as the final quarter wheat tax as specified in Section 22-3315(1), Idaho Code, and shall include the following: ()

a. Name or names of the grower and seller; and ()

b. Address or addresses of the grower and seller. ()
