**IDAPA 41
TITLE 04
CHAPTER 03**

**41.04.03 - PUBLIC HEALTH DISTRICT 4 - RULES FOR ON-SITE
SEWAGE TREATMENT SYSTEMS**

000. (RESERVED).

001. LEGAL AUTHORITY.

Title 39, Chapter 4 and Title 39, Chapter 36, Idaho Code, grants authority to Public Health District 4 (Central District) to adopt rules, regulations and standards to protect the environment and the health of Public Health District 4 (Central District). (5-6-90)

002. TITLE, SCOPE, CONFLICT AND RESPONSIBILITIES.

01. Title. These rules shall be known as Public Health District 4 (Central District) Rules, "Rules for On-site Sewage Treatment Systems". (5-6-90)

02. Scope. The provisions of these rules establish limitations on the construction and use of individual and subsurface sewage disposal systems and establish the requirements for obtaining an installation permit and an installer's registration permit. These rules apply to every individual and every subsurface blackwaste and wastewater treatment system in Public Health District 4 (Central District). (5-6-90)

03. Conflict Of Regulations, Standards, And Ordinances. In any case where a provision of these rules is found to be in conflict with a provision of any state or local zoning, building, fire, safety, or health regulation, standard or ordinance, the provision which, in the judgment of the Director, establishes the higher standard for the promotion and protection of the health and safety of the people, shall prevail. (5-6-90)

04. Responsibilities. (7-1-93)

a. Every owner of real property is jointly and individually responsible for: (5-6-90)

i. Storing, treating, and disposing of blackwaste and wastewater generated on that property. (5-6-90)

ii. Connecting all plumbing fixtures on that property that discharge wastewaters to an approved wastewater system or facility. (5-6-90)

iii. Obtaining necessary permits and approvals for installation of individual or subsurface blackwaste and wastewater disposal systems. (5-6-90)

iv. Abandonment of an individual or subsurface sewage disposal system. (5-6-90)

b. Each engineer, building contractor, individual or subsurface system installer, excavator, plumber, supplier, and every other person, who for compensation shall design, construct, abandon, or provide any system or part thereof, is jointly and individually responsible for compliance with each of these rules that are relevant to that service or product. (5-6-90)

003. DEFINITIONS.

For the purposes of these rules, the following definitions apply. (5-6-90)

01. Abandoned System. A system which has ceased to receive blackwaste or wastewater due to diversion of those wastes to another treatment system or due to termination of waste flow. (5-6-90)

02. Alternative System. Any system for which Public Health District 4 (Central District) has issued design guidelines or which the Director judges to be a simple modification of a standard system. (5-6-90)

- 03. Authorized Or Approved.** The state of being sanctioned or acceptable to the Director as stated in a written document. (5-6-90)
- 04. Blackwaste.** Human body waste, specifically excreta or urine. This includes toilet paper and other products used in the practice of personal hygiene. (5-6-90)
- 05. Blackwater.** A wastewater whose principal pollutant is blackwaste; a combination of blackwaste and water. (5-6-90)
- 06. Board.** Public Health District 4 (Central District) Board of Health. (5-6-90)
- 07. Building Sewer.** The extension of the building drain beginning five (5) feet outside the inner face of the building wall. (5-6-90)
- 08. Central District.** The Central District Health Department or Public Health District 4 as defined in Section 39-408, Idaho Code. (5-6-90)
- 09. Central System.** Any system which receives blackwaste or wastewater in volumes exceeding two thousand five hundred (2,500) gallons per day; any system which receives blackwaste or wastewater from more than two (2) dwelling units or more than two (2) buildings under separate ownership. (5-6-90)
- 10. Construct.** To make, form, excavate, or install a system. (5-6-90)
- 11. Director.** The Director of Public Health District 4 (Central District) or the Director's designees or authorized agent. (5-6-90)
- 12. Existing System.** Any system which was installed prior to the effective date of these rules. (5-6-90)
- 13. Expand.** To enlarge any nonfailing system. (5-6-90)
- 14. Failing System.** Any system which exhibits one (1) or more of the following characteristics: (5-6-90)
- a.** The system does not meet the intent of these rules as stated in Public Health District 4 (Central District) Rules Subsection 004.01. (5-6-90)
 - b.** The system fails to accept blackwaste and wastewater. (5-6-90)
 - c.** The system discharges blackwaste or wastewater into the waters of the State or onto the ground surface. (5-6-90)
- 15. High Groundwater Level - Normal Seasonal.** (5-6-90)
- a.** The normal high groundwater level is the highest elevation of a water table that is maintained or exceeded for a continuous period of six (6) weeks a year. (5-6-90)
 - b.** The seasonal high groundwater level is the highest elevation of a water table that is maintained or exceeded for a continuous period of one (1) week a year. (5-6-90)
- 16. High Water Mark.** The line which the water impresses on the soil by covering it for sufficient periods of time to prevent the growth of terrestrial vegetation. (5-6-90)
- 17. Individual System.** Any standard, alternative or subsurface system which is not a central system. (5-6-90)
- 18. Install.** To excavate or to put in place a system or a component of a system. (5-6-90)

- 19. Installer.** Any person, corporation, or firm engaged in the business of excavation for, or the construction of individual or subsurface sewage disposal systems in the State or Public Health District 4 (Central District). (5-6-90)
- 20. Limiting Layer.** A characteristic subsurface layer or material which will severely limit the capability of the soil to treat or absorb wastewater including, but not limited to, water tables, fractured bedrock, fissured bedrock, excessively permeable material and relatively impermeable material. (5-6-90)
- 21. New System.** A system which is or might be authorized or approved on or after the effective date of these rules. (5-6-90)
- 22. Nondischarging System.** Any system which is designed and constructed to prevent the discharge of blackwaste or wastewater. (5-6-90)
- 23. Permit.** An individual or subsurface system installation permit or installer's registration permit. (5-6-90)
- 24. Pollutants.** Any chemical, biological, or physical substance whether it be solid, liquid, gas, or a quality thereof, which if released into the environment can, by itself or in combination with other substances, create a public nuisance or render that environment harmful, detrimental, or injurious to public health, safety or welfare or to domestic, commercial, industrial, agricultural, recreational, aesthetic, or other beneficial uses. (5-6-90)
- 25. Public Health District 4.** As defined in Section 39-409, Idaho Code, or the Central District Health Department. (5-6-90)
- 26. Public System.** Any system owned by a county, city, special service district, or other governmental entity or Indian tribe having the authority to dispose of blackwaste or wastewater; a municipal wastewater treatment facility. (5-6-90)
- 27. Repair.** To remake, reform, replace, or enlarge a failing system or any component thereof as is necessary to restore proper operation. (5-6-90)
- 28. Scarp.** The side of a hill, canyon, ditch, river bank, roadcut or other geological feature characterized by a slope of forty-five (45) degrees or more from the horizontal. (5-6-90)
- 29. Sewage.** Sewage has the same meaning as wastewater. (5-6-90)
- 30. Soil Texture.** The relative proportion of sand, silt, and clay particles in a mass of soil. (5-6-90)
- 31. Standard System.** Any system recognized by the Board through the adoption of design and construction regulations. (5-6-90)
- 32. Subsurface System.** Any system with a point of discharge beneath the earth's surface. (5-6-90)
- 33. Surface Water - Intermittent, Permanent, Temporary.** (7-1-93)
- a.** Any waters of the State which flow or are contained in natural or man-made depressions in the earth's surface. This includes, but is not limited to, lakes, streams, canals, and ditches. (5-6-90)
- b.** An intermittent surface water exists continuously for a period of more than two (2) months but not more than six (6) months a year. (5-6-90)
- c.** A permanent surface water exists continuously for a period of more than six (6) months a year. (5-6-90)
- d.** A temporary surface water exists continuously for a period of less than two (2) months a year. (5-6-90)

34. System. Beginning at the point of entry physically connected piping, treatment devices, receptacles, structures, or areas of land designed, used or dedicated to convey, store, stabilize, neutralize, treat, or dispose of blackwaste or wastewater. (5-6-90)

35. Wastewater. Any combination of liquid or water and pollutants from activities and processes occurring in dwellings, commercial buildings, industrial plants, institutions and other establishments, together with any groundwater, surface water, and storm water that may be present; liquid or water that is chemically, biologically, physically or rationally identifiable as containing blackwater, grey water or commercial or industrial pollutants; and sewage. (5-6-90)

36. Waters Of The State. All the accumulations of water, surface and underground, natural and artificial, public and private or parts thereof which are wholly or partially within, which flow through or border upon the state of Idaho. (5-6-90)

37. Water Table. The surface of an aquifer. (5-6-90)

38. Inclusive Words. Where appropriate: (5-6-90)

a. Words used in the masculine gender include the feminine, and vice-versa; and (5-6-90)

b. Words used in the singular form include the plural, and vice-versa; and (5-6-90)

c. The words construct and its derivations include the words alter, expand, install, repair and their derivations. (5-6-90)

004. GENERAL REQUIREMENTS.

01. Intent Of Rule. The Board, in order to protect the health, safety, and environment of the people of Public Health District 4 (Central District) and the State of Idaho establishes these rules governing the design, construction, siting and abandonment of individual and subsurface sewage disposal systems. These rules are intended to insure that blackwastes and wastewater generated in Public Health District 4 (Central District) are safely contained and treated and that blackwaste and wastewater contained in or discharged from each system: (5-6-90)

a. Are not accessible to insects, rodents, or other wild or domestic animals; (5-6-90)

b. Are not accessible to individuals; (5-6-90)

c. Do not give rise to a public nuisance due to odor or unsightly appearance; (5-6-90)

d. Do not injure or interfere with existing or potential beneficial uses of the waters of the State. (5-6-90)

02. Compliance With Intent Required. The Director shall not authorize or approve any system if, in the opinion of the Director, the system will not be (is not) in compliance with the intent of these rules. (5-6-90)

03. System Limitations. Cooling water, backwash or backflush water, hot tub or spa water, air conditioning water, water softener brine, groundwater, oil, or roof drainage cannot be discharged into any system unless that discharge is approved by the Director. (5-6-90)

04. Increased Flows. Unless authorized by the Director, no person shall provide for or connect additional blackwaste or wastewater sources to any system if the resulting flow or volume would exceed the design flow of the system. (5-6-90)

05. Failing System. The owner of any failing system shall obtain a permit and cause the failing system's repair: (5-6-90)

- a. As soon as practical after the owner becomes aware of its failure; or (5-6-90)
- b. As directed in proper notice from the Director. (5-6-90)

06. Subsurface System Replacement Area. An area of land which is suitable in all respects for the complete replacement of a new subsurface system disposal field shall be reserved as a replacement area. This area will be kept vacant, free of vehicular traffic and free of any soil modification which would negatively affect its use as a replacement disposal field construction site. (5-6-90)

07. Technical Guidance Committee. The Director shall appoint a Technical Guidance Committee composed of three (3) representatives from the seven (7) Health Districts, one (1) representative from the Division of Environment, one (1) professional engineer licensed in the state of Idaho, and one (1) licensed installer. Appointments to vacancies shall be to three (3) year terms. (5-6-90)

08. Duties Of The Technical Guidance Committee. The Committee shall maintain a technical guidance manual which shall be used in the design, construction, alteration, operation, and maintenance of conventional systems, their components and alternatives. The Committee shall review variances at the request of the Director and provide recommendations on such variances. (5-6-90)

09. Technical Guidance Manual For Individual And Subsurface Alternative Sewage Disposal. The manual maintained by the Technical Guidance Committee shall provide state-of-the-art technical guidance on alternative sewage disposal components and systems, soil type determination methodology and other information pertinent to the best management practices of individual and subsurface sewage disposal. For the purpose of these rules the Technical Guidance Manual for Individual and Subsurface Alternative Sewage Disposal shall consist of the Idaho Department of Health and Welfare Technical Guidance Manual for Individual and Subsurface Alternative Sewage Disposal that existed March 31, 1989, and any subsequent valid additions, corrections or deletions. (5-6-90)

10. Alternative System. If a standard system as described in these rules cannot be installed on a parcel of land, an alternative system may be permitted if that system is in accordance with the recommendations of the Technical Guidance Committee and is approved by the Director. (5-6-90)

005. PERMIT AND PERMIT APPLICATION.

01 Permit Required. Except as specified in Public Health District 4 (Central District) Rules Subsection 005.02 it shall be unlawful for any person to cause or to perform the modification, repair or construction of any individual or subsurface sewage disposal system within Public Health District 4 (Central District) unless there is a valid installation permit authorizing that activity. (5-6-90)

02. Exceptions To Permit Requirement. The activities listed in this subsection may be lawfully performed in the absence of a valid installation permit. They are, however, subject to all other relevant regulations. (5-6-90)

a. Portable nondischarging systems may be installed where needed as temporary blackwaste or wastewater systems if they are properly maintained and if they are of a design which has been approved by the Director. (5-6-90)

b. Individual and subsurface systems may be repaired when needed as a result of clogged or broken solid piping or of malfunctions in an electrical or mechanical system. Such repair may not expand the system unless authorized by the Director. (5-6-90)

03. Permit Application. The owner of the system or the owner's authorized representative shall make application to the Director in writing and in a manner or form prescribed by the Director. (5-6-90)

04. Contents Of Application. A permit application will be used to help determine if the proposed construction will be in conformance with applicable regulations. Information required in the application may include, but is not limited to: (5-6-90)

- a.** The name and address of the owner of the system and of the applicant, if different; (5-6-90)
- b.** The legal description of the parcel of land; (5-6-90)
- c.** The type of establishment served; (5-6-90)
- d.** The maximum number of persons served, number of bedrooms, or other appropriate measure of wastewater flow; (5-6-90)
- e.** The type of system; (5-6-90)
- f.** The construction activity (new construction, enlargement, repair); (5-6-90)
- g.** A scaled or dimensioned plot plan including, if needed, adjacent properties illustrating: (5-6-90)

 - i. The location and size of all existing and proposed wastewater systems including disposal field replacement areas; (5-6-90)
 - ii. The location of all existing water supply system features; (5-6-90)
 - iii. The location of all surface waters; (5-6-90)
 - iv. The location of scarps, cuts, and rock outcrops; (5-6-90)
 - v. Land elevations, surface contours, and ground slopes between features of interest; (5-6-90)
 - vi. Property lines, easements, and rights-of-way; and (5-6-90)
 - vii. Location and size of buildings and structures. (5-6-90)
- h.** The plans and specifications of the proposed system which include: (5-6-90)

 - i. Diagrams of all system facilities which are to be made or fabricated at the site; (5-6-90)
 - ii. The manufacturer's name and identification of any component approved pursuant to Public Health District 4 (Central District) Rules, Sections 007 and 009; and (5-6-90)
 - iii. List of materials. (5-6-90)
- i.** Soil description and profile, groundwater data, percolation or permeability test results and/or a site evaluation report; (5-6-90)
- j.** The nature and quantity of blackwaste and wastewater which the system is to receive including the basis for that estimate; (5-6-90)
- k.** Proposed operation, maintenance, and monitoring procedures to insure the system's performance and failure detection; (5-6-90)
- l.** Copies of legal documents relating to access and to responsibilities for operation, maintenance, and monitoring; (5-6-90)
- m.** A statement from the local zoning or building authority indicating that the proposed system would not be contrary to local ordinances; (5-6-90)
- n.** The signature of the owner of the proposed system and, if different, of the applicant; and (5-6-90)
- o.** Any other information, document, or condition that may be required by the Director to substantiate

that the proposed system will comply with applicable regulations. (5-6-90)

05. Basis For Permit Application Denial. The Director may deny a permit application if in the Director's judgment: (5-6-90)

- a. The application is incomplete, inaccurate, or misleading; (5-6-90)
- b. The system as proposed is not in compliance with applicable regulations; (5-6-90)
- c. The system as proposed would, when put into use, be a failing system; (5-6-90)
- d. The design and description of a public system was not made by a professional engineer; (5-6-90)
- e. Public or central wastewater treatment facilities are reasonably accessible. (5-6-90)

06. Notice Of Denial. Upon denial of an application the Director shall notify the applicant of the reason for denial. (5-6-90)

07. Issuance Of Permit. When, in the opinion of the Director the system as proposed will be in conformance with applicable regulations, the Director shall issue an "Individual and Subsurface System Installation Permit". (5-6-90)

08. Application And Permit Valid For One Year. Unless otherwise stated on the application or permit, it shall become invalid if the authorized construction or activity is not completed and approved within one (1) year of the date of issuance. (5-6-90)

09. Permit Renewal. At the discretion of the Director, a permit may be renewed one (1) or more times upon request by the applicant or owner provided that the request is received by the Director prior to the permit's date of expiration. (5-6-90)

10. Immediate Effect Of The Permit. A valid permit authorizes the construction of an individual or subsurface system and requires that the construction be conducted in compliance with plans, specifications, and conditions contained in the approved permit application. Any deviation from the plans, specifications, and conditions is prohibited unless it is approved in advance by the Director. (5-6-90)

11. Cottage Site Facility Certification. A valid permit shall constitute certification and approval for the purposes of Section 39-3611, Idaho Code. (5-6-90)

12. Existing Installation Permits. Individual and subsurface sewage disposal installation permits or other lot-specific approvals for systems issued prior to February 7, 1978, pursuant to Chapters 1 and 36, Title 39, Idaho Code will become invalid one (1) year after written notice is given by the Director notifying the owner or holder of such a permit or approval that the permit or approval will no longer be valid unless construction or installation of the system provided for in the permit or approval is commenced within one (1) year after giving the notice. This provision does not apply to certificates filed to satisfy a sanitary restriction pursuant to Section 50-1326, Idaho Code. (5-6-90)

13. Abandonment May Be Required. The Director may require as a condition for issuing a permit that the system be abandoned by a specified date or under specific predetermined circumstances. The date or circumstances will be established before the issuance of the permit and be contained in the permit application. These conditions may relate to a specific date, dwelling density, completion of a municipal system or other circumstances relative to the availability of central sewerage system services. (5-6-90)

14. Operation, Maintenance And Monitoring. The Director may require as a condition of issuing a permit, that specific operation, maintenance, and monitoring procedures be observed. Those procedures will be contained in the permit application. (5-6-90)

15. As-Built Plans And Specifications. The Director may require as a condition of issuing a permit,

that complete and accurate record drawings and specifications depicting the actual construction be submitted to the Director within thirty (30) days after the completion of the construction. Alternately, if the construction proceeded in compliance with the approved plans and specifications, a statement to that effect may be submitted. (5-6-90)

16. Permit Fee. All applications shall be accompanied by payment of the fee specified in Idaho Department of Health and Welfare Rules, IDAPA 16.05.05, Section 16.05.05.110 through Subsection 16.05.05.110.02, "Rules Governing Fees for Health and Environmental Operation Permits, Licenses, and Inspections Services". (5-6-90)

006. INSTALLER'S REGISTRATION PERMIT.

01. Permit Required. Every installer shall secure from the Director of Public Health District 4 (Central District) an installer's registration permit. Installers holding a valid installer's registration permit issued by the Director of the Idaho Department of Health and Welfare will be issued an installer's registration permit by Public Health District 4 (Central District) at no charge to the installer. Installers issued a Public Health District 4 (Central District) installer's registration permit will also be issued an Idaho Department of Health and Welfare installer's registration permit. (5-6-90)

02. Examination. The initial issuance of the installer's permit shall be based on the completion of an examination, with a passing score of seventy (70) or more, of the applicant's knowledge of the principles set forth in Public Health District 4 (Central District) Rules, "On-site Sewage Treatment Systems". The examination will be prepared, administered and graded by the Director and will be equivalent to the examination administered by the Idaho Department of Health and Welfare. (5-6-90)

03. Permits Required Annually. Registration permits expire annually on the first day of January and all permits issued thereafter will be issued for the balance of the calendar year. (5-6-90)

04. Contents Of Application. Applications for permits shall be in writing, shall be signed by the applicant or by an officer or authorized agent of a corporation, shall contain the name and address of the applicant, and shall contain the expiration date of the bond required by the following Subsection 006.05 of this rule. (5-6-90)

05. Bond Required. All applicants shall deliver to the Director at the time the application is filed a bond in a form approved by the Director in the sum of two thousand dollars (\$2,000). The bond will be executed by a surety company duly authorized to do business in the state of Idaho. Any person who suffers damage as the result of the negligent or wrongful acts of the registrant or by his/her failure to competently perform any of the work agreed to be done under the terms of the registration permit shall, in addition to other legal remedies, have a right of action in his/her own name on the bond for all damages not exceeding two thousand dollars (\$2,000). The maximum liability of the surety and/or sureties on the bond, regardless of the number of claims filed against the bond shall not exceed the sum of two thousand dollars (\$2,000). (5-6-90)

06. Exemption. An installer's permit shall not be required for: (5-6-90)

a. Any person, corporation, or firm constructing a central or municipal subsurface sewage disposal system if that person, corporation, or firm is a licensed public works contractor as provided in Chapter 19, Title 54, Idaho Code, is experienced in the type of system to be installed and under the direction of a professional engineer licensed in the state of Idaho; or (5-6-90)

b. Any owner of a system. (5-6-90)

07. Application Fee. All applications shall be accompanied by payment of the fee specified in Idaho Department of Health and Welfare Rules, IDAPA 16.05.05, Section 120 "Rules Governing Fees for Health and Environmental Operating Permits, Licenses, and Inspection Services". (5-6-90)

08. Grounds For Revocation. Failure to comply with these rules shall be grounds for revocation of the permit. (5-6-90)

007. SEPTIC TANKS DESIGN AND CONSTRUCTION STANDARDS.

01. Materials. New septic tanks will be constructed of concrete, or other materials approved by the Director. (5-6-90)

02. Construction Requirements. All septic tanks will be water tight, constructed of sound, durable materials and not subject to excessive corrosion, decay, frost damage or cracking. (5-6-90)

03. Concrete Septic Tanks. New concrete septic tanks will at a minimum meet the following requirements: (5-6-90)

a. The walls and floor must be at least two and one-half (2 1/2) inches thick if adequately reinforced and at least six (6) inches thick if not reinforced. (5-6-90)

b. Concrete lids or covers must be at least three (3) inches thick and adequately reinforced. (5-6-90)

c. The floor and at least a six (6) inch vertical portion of the walls of a poured tank must be poured at the same time (monolithic pour). (5-6-90)

d. Wall sections poured separately must have interlocking joints on joining edge. (5-6-90)

e. All concrete outlet baffles must be finished with an asphalt or other protective coating. (5-6-90)

04. Steel Tanks. Steel tanks will be unacceptable for new or replacement use. (5-6-90)

05. Horizontal Tank Dimension Limit. No interior horizontal dimension of a septic tank or compartment may be less than two (2) feet. (5-6-90)

06. Tank Liquid Depth. The liquid depth shall be at least two and one-half (2 1/2) feet but not greater than five (5) feet. (5-6-90)

07. Manufactured Tank Markings. Septic tanks manufactured in accordance with a specified design approved by the Director, will be legibly and indelibly marked with the manufacturer's name or trademark, total liquid capacity and shall indicate the tank's inlet and outlet. (5-6-90)

08. Minimum Tank Capacities. (7-1-93)

a. Tanks serving one (1) or two (2) single dwelling units:

MINIMUM CAPACITY PER DWELLING UNIT	
Number of Bedrooms	Minimum Liquid Capacity (Gallons)
1 or 2	900
3 or 4	1,000

(5-6-90)

b. Tanks serving all other flows. Septic tank capacity shall be equal to two (2) times the average daily flow as determined from Public Health District 4 (Central District) Rules, Subsection 007.09. The minimum tank capacity shall be seven hundred and fifty (750) gallons. (5-6-90)

09. Wastewater Flows From Various Establishments In Gallons Per Day.

DWELLINGS: Single Family Dwelling - two hundred fifty (250)/Unit and Mobile Homes, three (3) bedroom. Add/ subtract fifty (50) gallons/bedroom

MULTIPLE RESIDENTIAL	
Hotel with Private Baths	60/Bedspace
Without Private Baths	40/Bedspace
Motel	40/Bedspace
With Kitchenette	60/Bedspace
Boarding House	150/Bedspace
Add for Each Nonresident	25
Rooming House/Bunk House	40/Resident
Staff Resident	40/Staff
Nonresident	15/Staff
Apartments	250/Unit

INSTITUTIONAL	
Assembly Hall/Meeting House	2/Seat
Church	3/Seat
With Kitchen	7/Seat
Hospital	250/Bedspace
Kitchen only	25/Bedspace
Laundry only	40/Bedspace
Nursing Home/Rest Home	125/Bedspace
Day School without Showers	20/Student
With Showers	25/Student
With Cafeteria, add	3/Student
Staff-Resident	40/Staff
Nonresident	20/Staff

FOOD SERVICE	
Conventional Service	
Toilet & Kitchen Wastes	13/Meal
Kitchen Wastes	3.3/Meal

FOOD SERVICE	
Take Out or Single Service	2/Meal
Dining Hall	
Toilet & Kitchen Wastes	8/Meal
Kitchen Wastes	3.3/Meal
Drinking Establishment	2/Person
Food Service Employee	15/Employee

COMMERCIAL AND INDUSTRIAL	
Bowling Alley	125/Lane
Laundry - Self Service	50/Wash
Public Transportation Terminal	5/Fare
Service Station	10/Vehicle
Car Wash	50/Vehicle
1st Bay	1000
Additional Bays	500 each
Shopping Center (No food/laundry)	1/Pkg.Sp.
Theaters (including Concession Stand)	
Auditorium	5/Seat
Drive-in	10/Space
Offices	20/Employee
Factories No Showers	25/Employee
With Showers	35/Employee
Add for Cafeteria	5/Employee
Stores	2/Employee
Public Restrooms	5/Person

SEASONAL AND RECREATIONAL	
Fairground (Peak Daily Attendance)	1/Person
Stadium	2/Seat
Swimming Pool	

SEASONAL AND RECREATIONAL	
Toilet & Shower Wastes	10/Person
Parks & Camps (Day Use)	
Toilet & Shower Wastes	15/Person
Roadside Rest Area	
Toilet & Shower Wastes	10/Person
Toilet Waste	5/Person
Overnight Accommodation	
Central Toilet	25/Person
Central Toilet & Shower	35/Person
Designated Camp Area:	
Toilet & Shower Wastes	90/Space
Toilet Wastes	65/Space
Seasonal Camp	50/Space
Luxury Cabin	75/Person

(5-6-90)

10. Total Volume. The total volume of a septic tank will at a minimum be one hundred fifteen percent (115%) of its liquid capacity. (5-6-90)

11. Inlets. (7-1-93)

a. The inlet into the tank will be at least four (4) inches in diameter and enter the tank three (3) inches above the liquid level. (5-6-90)

b. The inlet of the septic tank and each compartment will be submerged by means of a vented tee or baffle. (5-6-90)

c. Vented tees or baffles will extend above the liquid level seven (7) inches or more but not closer than one (1) inch to the top of the tank. (5-6-90)

- d.** Tees should not extend horizontally into the tank beyond two (2) times the diameter of the inlet. (5-6-90)
- 12. Outlets.** (7-1-93)
 - a.** The outlet of the tank will be at least four (4) inches in diameter. (5-6-90)
 - b.** The outlet of the septic tank and each compartment will be submerged by means of a vented tee or baffle. (5-6-90)
 - c.** Vented tees and baffles will extend above the liquid level seven (7) inches or more above the liquid level but no closer than one (1) inch to the inside top of the tank. (5-6-90)
 - d.** Tees and baffles will extend below the liquid level to a depth where forty percent (40%) of the tank's liquid volume is above the bottom of the tee or baffle. For vertical walled rectangular tanks, this point is at forty percent (40%) of the liquid depth. In horizontal cylindrical tanks this point is about thirty-five percent (35%) of the liquid depth. (5-6-90)
 - e.** Tees and baffles should not extend horizontally into the tank beyond two (2) times the diameter of the outlet. (5-6-90)
- 13. Scum Storage.** A septic tank will provide an air space above the liquid level which will be equal to or greater than fifteen percent (15%) of the tank's liquid capacity. For horizontal cylindrical tanks, this condition is met when the bottom of the outlet port is located at nineteen percent (19%) of the tank's diameter when measured from the inside top of the tank. (5-6-90)
- 14. Manholes.** Access to each septic tank or compartment shall be provided by a manhole twenty (20) inches in minimum dimension or a removable cover of equivalent size. Each manhole cover will be provided with a corrosion resistant strap or handle to facilitate removal. (5-6-90)
- 15. Inspection Ports.** An inspection port measuring at least eight (8) inches in its minimum dimension will be placed above each inlet and outlet. Manholes may be substituted for inspection ports. (5-6-90)
- 16. Split Flows.** The wastewater from a single building sewer or sewer line may not be divided and discharged into more than one (1) septic tank or compartment. (5-6-90)
- 17. Multiple Tank Or Compartment Capacity.** Multiple septic tanks or compartmented septic tanks connected in series may be used so long as the sum of their liquid capacities is at least equal to the minimum tank capacity computed in Department of Health and Welfare Rules, IDAPA 16.01.03, Subsection 007.09 and the initial tank or compartment has a liquid capacity of more than one-half (1/2) but no more than two-thirds (2/3) of the total liquid capacity of the septic tank facility. (5-6-90)

18. Minimum Separation Distances Between Septic Tanks And Features Of Concern:

Features of Concern	Minimum Distance To Septic Tank in Feet	
Well or Spring or Suction Line	Public Water	100
	Other	50
Water Distribution Line	Public Water	25
	Other	10
Permanent or Intermittent Surface Water		50
Temporary Surface Water		25

Features of Concern	Minimum Distance To Septic Tank in Feet
Downslope Cut or Scarp	25
Dwelling Foundation or Building	5
Property Line	5
Seasonal High Water Level (Vertically from Top of Tank)	2

(5-6-90)

19. Installation Of Manufactured Tanks. If written installation instructions are provided by the manufacturer of a septic tank, those instructions relative to the stability and integrity of the tank are to be followed unless otherwise specified in the installation permit of these rules. (5-6-90)

20. Manhole Extension. If the top of the septic tank is to be located more than twenty-four (24) inches below the finished grade, manholes will be extended to within eighteen (18) inches of the finished grade. (5-6-90)

21. Sectional Tanks. Sectional tanks will be joined in a manner that will insure that the tank is watertight. (5-6-90)

22. Inlet And Outlet Piping. Unless otherwise specified in the installation permit, piping to and from a septic tank, from the supporting wall to points three (3) feet beyond the tank excavation shall be of a material approved by the Director. (5-6-90)

008. STANDARD SUBSURFACE DISPOSAL FACILITY DESIGN AND CONSTRUCTION.

01. Standard Drainfield. A drainfield consisting of an effluent sewer, one (1) or more aggregate filled trenches and a gravity flow wastewater distribution system. These standards will be the basis of acceptable design and configuration. Overall dimensions of a specific facility will depend upon site characteristics and the volume of wastewater. (5-6-90)

02. Site Suitability. The area in which a standard drainfield is to be constructed must meet the conditions stated in this subsection: (5-6-90)

a. Slope. The natural slope of the site will not exceed twenty percent (20%). (5-6-90)

b. Soil types. Suitable soil types must be present at depths corresponding with the sidewalls of the proposed drainfield and at depths which will be between the bottom of the proposed drainfield and any limiting soil layer (effective soil depth).

Design Soil Group	Soil Textural Classification	USDA Field Test Classification	Textural
Unsuitable	Gravel	10 Mesh	
	Coarse Sand	10-35 Mesh	Sand
A	Medium Sand	35-60 Mesh	Sand
	Fine Sand	65-140 Mesh	Sand

Design Soil Group	Soil Textural Classification	USDA Field Test Classification	Textural
	Loamy Sand	Sand	
B	Very Fine Sand	140-270 Mesh	Sand
	Sandy Loam		Sandy Loam
	Very Fine Loamy		
	Sand	Sandy Loam	
	Loam		
	Silt Loam	Silt Loam	
C	Silt		Silt Loam
	Clay Loam		Clay Loam
	Sandy Clay Loam		Clay Loam
	Silty Clay Loam		Clay Loam
Unsuitable	Sandy Clay		Clay
	Silty Clay		Clay
	Clay		Clay
	Clay soils with high shrink/swell potential		Clay
	Organic mucks		
	Claypan, Duripan, Hardpan		

(5-6-90)

c. **Effective Soil Depths.** Effective soil depths, in feet, below the bottom of the drainfield must be equal to or greater than those values listed.

Limiting Layer	Design Soil Group		
	A	B	C
Impermeable Layer	4	4	4
Fractured Bedrock, Fissured Bedrock or Extremely Permeable Material	6	4	3
Normal High Groundwater Level	6	4	3

(5-6-90)

d. Separation Distances. The drainfield must be located so that the separation distances given be maintained or exceeded.

Feature of Interest	Soil Types			
	All	A	B	C
Public Water Supply	100			
All Other Domestic Water Supplies including Springs and Suction Lines	100			
Water Distribution Lines				
Pressure	25			
Suction	100			
Permanent or Intermittent Surface Water other than Irrigation Canals and Ditches		300	200	100
Temporary Surface Water and Irrigation Canals and Ditches	50			
Downslope Cut or Scarp				
Impermeable Layer Above Base		75	50	50
Impermeable Layer Below Base		50	25	25
Building Foundations				
Crawl Space	10			
Basement	20			
Property Line	5			

(5-6-90)

03. Subsurface Disposal Facility Sizing. The size of a subsurface disposal system will be determined by the following procedures: (5-6-90)

a. Daily flow estimates should be determined in the same manner as are flow estimates for septic tank sizing in Public Health District 4 (Central District) Rules, Subsection 007.09. (5-6-90)

b. The total required absorption area is obtained by dividing the estimated daily flow by a value

below.

Design Soil Group			
	A	B	C
Absorption Area - Gallons/Square Foot/Day	1.0	.5	.2

(5-6-90)

c. Required Area. The size of an acceptable site must be large enough to construct two (2) complete drainfields in which each are sized to receive one hundred percent (100%) of the design wastewater flow. (5-6-90)

04. **Standard Subsurface Disposal Facility Specifications.** The following table presents additional design specifications for new subsurface sewage disposal facilities.

Item	All Soil Groups
Length of Individual Distribution Laterals	Total 500 Feet Maximum Individual 100 Feet Maximum
Grade of Distribution Laterals and Trench Bottoms	Level
Width of Trenches	3 Feet Maximum
Depth of Trenches	2 Feet Minimum 4 Feet Maximum
Undisturbed Earth Between Trenches	6 Feet Minimum
Undisturbed Earth Between Septic Tank and Trenches	6 Feet Minimum
Depth of Aggregate	Total Over Distribution Laterals 2 In. Minimum Under Distribution Laterals 6 In. Minimum
Depth of Soil Over Top of Aggregate	12 In. Minimum

(5-6-90)

05. **Wastewater Distribution.** Systems shall be installed to maintain equal or serial effluent distribution. (5-6-90)

06. **Excavation.** Trenches will not be excavated during the period of high soil moisture content when

that moisture promotes smearing and compaction of the soil. (5-6-90)

07. Soil Barrier. The aggregate will be covered throughout with untreated building paper, a synthetic filter fabric (geotextile), a three (3) inch layer of straw or other acceptable permeable material. (5-6-90)

08. Aggregate. The trench aggregate shall be crushed rock, gravel, or other acceptable, durable and inert material which is, free of fines, and has an effective diameter from one-half (1/2) to two and one-half (2 1/2) inches. (5-6-90)

09. Impermeable Surface Barrier. No trench shall be covered by an impermeable surface barrier, such as tar paper, asphalt or tarmack. (5-6-90)

10. Standard Absorption Bed. Absorption bed disposal facilities may be considered when a site is suitable for a standard subsurface disposal facility except that it is not large enough. (5-6-90)

a. General Requirements. Except as specified in this Section, regulations applicable to a standard subsurface disposal system are applicable to an absorption bed facility. (5-6-90)

b. Slope Limitation. Sites with slopes in excess of eight percent (8%) are not suitable for absorption bed facilities. (5-6-90)

c. Vehicular Traffic. Rubber tired vehicles must not be driven on the bottom surface of any bed excavation. (5-6-90)

d. Distribution Lateral Spacing. Distribution laterals within a bed must be spaced on not greater than six (6) feet centers nor may any sidewall be more than three (3) feet from a distribution lateral. (5-6-90)

009. OTHER COMPONENTS.

01. Design Approval Required. Commercially manufactured blackwaste and wastewater treatment and storage components may not be used in the construction of a system unless their design is approved by the Director. (5-6-90)

02. Plan And Specification Submittal. Plans and specifications for all commercially manufactured individual and subsurface treatment and storage components will be submitted to the Director for approval. Plans and specifications will show or include as requested by the Director, detailed construction drawings, capacities, structural calculations, list of materials, evidence of stability and durability, manufacturers installation, operation and maintenance instructions, and other relevant information. (5-6-90)

03. Effect Of Design Approval. The Director may condition a design approval by specifying circumstances under which the component must be installed, used, operated or maintained. (5-6-90)

04. Notice Of Design Disapproval. If the Director is satisfied that the component described in the submittal may not be in compliance with or may not consistently function in compliance with these rules the Director will disapprove the design as submitted. The manufacturer or distributor submitting the design for approval will be notified in writing of the disapproval and the reason for that action. (5-6-90)

010. VARIANCES.

01. Technical Allowance. The Director may make a minor technical allowance to the dimensional or construction requirements of these rules for a standard system if: (5-6-90)

a. The allowance will not affect adjacent property owners or the public at large; (5-6-90)

b. The allowance will not violate the conditions of Public Health District 4 (Central District) Rules; (5-6-90)

- c.** The allowance will not be in conflict with any other regulation, standard or ordinance; and (5-6-90)
- d.** The allowance to a dimensional requirement is not more than ten percent (10%) of the requirements of these rules unless otherwise provided for in the Technical Guidance Manual. (5-6-90)
- 02. Petition For Variance.** If a petition of variance to these rules is desired, a request for a variance may be filed with the Director. The petition shall contain the following: (5-6-90)

 - a.** A concise statement of the facts upon which the variance is requested including a description of the intended use of the property, the estimates of the quantity of blackwaste or wastewater to be discharged, and a description of the existing site conditions. (5-6-90)
 - b.** A concise statement of why the petitioner believes that compliance with the provision from which variance is sought would impose an arbitrary or unreasonable hardship, and of the injury that the grant of the variance would impose on the public; and (5-6-90)
 - c.** A clear statement of the precise extent of the relief sought. (5-6-90)
- 03. Public Notice.** At the time of filing a petition evidence shall also be submitted that: (5-6-90)

 - a.** A notice has appeared in the local newspaper advising the public of the request for variance; (5-6-90)
 - b.** All property owners within three hundred (300) feet of the affected site have been notified; and (5-6-90)
 - c.** Such notices to the public have been made fifteen (15) days prior to the filing of the petition. (5-6-90)
- 04. Objections To Petition.** Any person may file with the Department, within twenty-one (21) days after the filing of the petition, a written objection to the grant of the variance. A copy of such objection shall be provided by the Department to the petitioner. (5-6-90)
- 05. Investigation And Decision.** After investigating the variance petition and considering the views of persons who might be adversely affected by the grant of the variance, the Director shall, within sixty (60) days after the filing of the petition, make a decision as to the disposition of the petition. The decision, a copy of which shall be served on the petitioner, shall include: (5-6-90)

 - a.** A description of the efforts made by the Director to investigate the facts as alleged and to ascertain the views of persons who might be affected, and a summary of the views so ascertained; (5-6-90)
 - b.** A statement of the degree to which, if at all, the Director disagrees with the facts as alleged in the petition; (5-6-90)
 - c.** Allegations of any other facts believed relevant to the disposition of the petition; and (5-6-90)
 - d.** The Director's decision. (5-6-90)
- 06. Limitations On Decision.** No technical allowance or variance shall be granted unless: (5-6-90)

 - a.** Adequate proof is shown by the petitioner that compliance would impose an arbitrary or unreasonable hardship; (5-6-90)
 - b.** The technical allowance or variance rendered is consistent with the recommendations of the Technical Guidance Committee or the Technical Guidance Manual in use at the time of the petition; and (5-6-90)

c. The Director has determined that the approval of the technical allowance or variance will not have an adverse impact on the public health or the environment. (5-6-90)

07. Appeals. Appeals from a grant or denial of a technical allowance or variance shall be made to the Board and shall be governed by the contested case provisions of the Idaho Administrative Procedures Act, Sections 67-5201 et seq., Idaho Code. (5-6-90)

011. INSPECTIONS

01. One Or More Inspections Required. Such inspection as are necessary to determine compliance with any requirement or provision of these rules shall be required by the Director. (5-6-90)

02. Duty To Uncover. The permittee shall, at the request of the Director, uncover or make available for inspection any portion or component of an individual or subsurface sewage disposal system which was covered or concealed in violation of these rules. (5-6-90)

03. Advance Notice By Permittee. If an inspection requires some type of preparation, such as test hole excavation or partial construction of the system, the applicant or permittee will notify the Director at least forty-eight (48) hours in advance, excluding weekends and holidays, before the time preparation will be completed. (5-6-90)

04. Substantiating Receipts And Delivery Slips. The permittee shall upon request by the Director provide copies of receipts, delivery slips or other similar documents to substantiate the origin, quality, or quantity of materials used in the construction of any individual or subsurface system. (5-6-90)

012. VIOLATIONS AND PENALTIES.

01. Failure To Comply. All individual and subsurface sewage disposal systems shall be constructed and installed according to these rules. Failure by any person to comply with the permitting, licensing, approval, installation, or variance provisions of these rules shall be deemed a violation of these rules. (5-6-90)

02. System Operation. No person shall discharge pollutants into the underground water of the state of Idaho through an individual or subsurface sewage disposal system unless in accordance with the provisions of these rules. (5-6-90)

03. Violation A Misdemeanor. Pursuant to Sections 39-108(5) and 39-419(3), Idaho Code, any person who willfully or negligently violates any of the provisions of these rules shall be guilty of a misdemeanor and upon conviction thereof shall be punished by a fine of not more than one thousand dollars (\$1,000) for each separate violation. Each day upon which such violation occurs shall constitute a separate violation. (5-6-90)

013. -- 998. (RESERVED).

999. SEVERABILITY.

The rules of this manual are severable. If any rule, or part thereof, or the application of such rule to any person or circumstance, is declared invalid, that invalidity does not affect the validity of any remaining portion of the manual. (5-6-90)
