**c.** The total per kilowatt fee for all claims filed for a single hydropower facility shall not exceed the per kilowatt fee for the total generating capacity of all generators in the hydropower facility. (7-1-93)

**i.** Example 3: A claimant submits three (3) claims for water used in one (1) power plant. The power plant has four (4) generators, each with a manufacturer's nameplate rating of ninety (90) kilowatt capacity. **a.** Example 5: A claimant files a claim for twenty (20) cfs of water, which is first used for power purposes in a plant with a one hundred fifty (150) kilowatt capacity, and is then used for irrigation of one thousand (1,000) acres of land. The variable fee is two thousand dollars (\$2,000) (per acre fee) plus one thousand fifty dollars (\$1,050) (per kilowatt fee), for a total variable fee of three thousand fifty dollars (\$3,050). The total fee is three thousand one hundred fifty dollars (\$3,150), consisting of the three thousand fifty dollars (\$3,050) variable fee and the one hundred dollar (\$100) flat fee. (8-24-07)T

**b.** Example 6: A claimant files a claim for twenty (20) cfs of water, half of which is claimed for commercial purposes, half of which is claimed for irrigation of five hundred (500) acres. The variable fee is two

The component purposes of a storage right are diversion to storage (not applicable to in-stream reservoirs), storage, diversion from storage (not applicable where the ultimate use is an in-reservoir public purpose). Detention of water in a holding pond that can be filled in less than twenty-four (24) hours at the claimed diversion rate is not required to be claimed as storage. The amount of water claimed shall be limited to the active storage capacity of the reservoir unless a past practice of refilling the reservoir during the water year (October 1 to September 30) is shown or the claim is for a licensed or decreed right that includes refill. If a past practice of refilling the reservoir is shown or if the claim is for a licensed or decreed right that includes refill, the total amount of water claimed for the calendar year and the entire period during which diversion to storage or impoundment occurs shall be indicated. (7-1-93)

ii. The claimant shall also state whether the stock watering use is in-stream, or whether water is diverted from the source for stock watering. Both types of stock watering cannot be filed on the same claim form; each type requires a separate claim. (8-24-07)T

iii. Domestic use for organization camps and public campgrounds shall be fully described, including but not limited to the number of camp units, water faucets, flush toilets, showers, and sewer connections. Description of domestic use for organization camps and public campgrounds shall also include the average and peak number of individuals using the facility, and the periods when peak or average rates of usage occur. 8-24-07)T

i. Place of Use. The place of use for each purpose for which water is claimed shall be listed at item nine (9) of the form, except that the place of use for in-stream flows for public purposes need not be listed if the place of use is fully described as the stream between the beginning and ending points listed as the points of diversion. (8-24-07)T

i. An aerial photograph denoting or showing the place of use where the use of water occurs shall be

included with the claim, unless the claim meets the definition of domestic use and stock watering use as defined in Rule 010. (8-24-07)T

ii. Claims for an irrigation project where the canals constructed cover an area of twenty-five thousand (25,000) acres or more, or irrigation districts organized and existing as such under the laws of the state of Idaho, or for beneficial use by more than five (5) water users in an area of less than twenty-five thousand (25,000) acres shall be accompanied by a map showing the boundaries of the project or irrigation district, and shall state the total number of acres irrigated within the boundaries of the project or irrigations district. The project or district shall submit a map of the boundary of the place of use and, when available, a digital boundary defined in Section 42-202(B)(2), Idaho Code. (8-24-07)T

All separate attachments must be specifically referenced in the remarks section of the form. The point(s) of diversion, place(s) of use, and the water delivery system shall be sketched on the space provided for a map of the project unless the claim is submitted electronically. Section, township and range numbers shall be indicated. The claimant may submit a separate map or drawing if the claimant so desires. (8-24-07)T

n. Basis of Claim. The basis of the claim shall be indicated at item fourteen (14) of the form. If a water right number has been assigned by the department to the right claimed, the water right number shall also be indicated. If a water right number has not been assigned and the water right is based upon a decree, the claimant shall list the title and date of the decree, the case number, and the court that issued the decree. If the basis of claim is a beneficial use (also known as the constitutional method of appropriation), the claimant shall provide a short description of events or history of the development of the water right.
