(3-20-20)

02. **Excluded Wastes.** Chemically Stabilized Electric Arc Furnace Dust (CSEAFD) generated by EnviroSafe Services of Idaho, Inc. (ESII) at ESII’s facility in Grand View, Idaho using the Super Detox(R) treatment process as modified by ESII and that is disposed of in aSubtitle D or Subtitle C landfill is excluded from the lists of hazardous waste provided ESII implements a program that meets the following conditions:

a. Verification Testing Requirements. Sample Collection and analyses, including quality control procedures, conducted pursuant to Subsections 005.02.b. and 005.02.c., must be performed according to SW-846 methodologies and the RCRA Part B permit, including future revisions. (3-20-20)

b. Initial Verification Testing. (3-20-20)
i. For purposes of Subsections 005.02.b., “new source” means any generator of Electric Arc Furnace Dust (EAFD), EPA and Idaho Department of Environmental Quality Hazardous Waste No. KO61, whose waste has not previously been processed by ESII using the Super Detox(R) treatment process resulting in processed EAFD which has been subjected to initial verification testing and has demonstrated compliance with the delisting levels specified in Subsection 005.02.d.

ii. Prior to the initial treatment of any new source of EAFD, ESII must notify the Department in writing. The written notification includes:

1. The waste profile information; and
2. The name and address of the generator.

iii. The first four (4) consecutive batches treated must be sampled in accordance with Subsection 005.02.a. Each of the four (4) samples shall be analyzed to determine if the CSEAFD generated meets the delisting levels specified in Subsection 005.02.d.

iv. If the initial verification testing demonstrates that the CSEAFD samples meet the delisting levels specified in Subsection 005.02.d., ESII shall submit the operational and analytical test data, including quality control information, to the Department, in accordance with Subsection 005.02.f. Subsequent to such data submittal, the CSEAFD generated from EAFD originating from the new source shall be considered delisted.

v. CSEAFD generated by ESII from EAFD originating from a new source shall be managed as hazardous waste in accordance with Subtitle C of RCRA until:

1. Initial verification testing demonstrates that the CSEAFD meets the delisting levels specified in Subsection 005.02.d.; and
2. The operational and analytical test data is submitted to the Department pursuant to Subsection 005.02.b.iv.

vi. For purposes of Subsections 005.02.b. and 005.02.c., “batch” means the CSEAFD that results from a single treatment episode in a full scale mixing vessel.

C. Subsequent Verification Testing.

i. Subsequent to initial verification testing, ESII shall collect a representative sample, in accordance with Subsection 005.02.a., from each batch of CSEAFD generated by ESII. ESII may, at its discretion, conduct subsequent verification testing on composite samples. In no event shall a composite sample consist of representative samples from more than twenty (20) batches of CSEAFD.

ii. The samples shall be analyzed prior to disposal of each batch of CSEAFD to determine if the CSEAFD meets the delisting levels specified in Subsection 005.02.d.

iii. Each batch of CSEAFD generated by ESII shall be subjected to subsequent verification testing no later than thirty (30) days after it is generated by ESII.

iv. If the levels of constituents measured in a sample, or composite sample, of CSEAFD do not exceed the levels set forth in Subsection 005.02.d., then any batch of CSEAFD which contributed to the sample that does not exceed the levels set forth in Subsection 005.02.d. is non-hazardous and may be managed and/or disposed of in a Subtitle D or Subtitle C landfill.

v. If the constituent levels in a sample, or composite sample, exceed any of the delisting levels set forth in Subsection 005.02.d., then ESII must submit written notification of the results of the analysis to the Department within fifteen (15) days from receiving the final analytical results, and any CSEAFD which contributed to the sample must be:
(1) Retested, and retreated if necessary, until it meets the levels set forth in Subsection 005.02.d.; or (3-20-20)

(2) Managed and disposed of in accordance with Subtitle C of RCRA. (3-20-20)

vi. Each batch of CSEAFC shall be managed as hazardous waste in accordance with Subtitle C of \text{RCRA} until subsequent verification testing demonstrates that the CSEAFC meets the delisting levels specified in Subsection 005.02.d. (3-20-20)

d. Delisting Levels. (3-20-20)

i. All leachable concentrations for these metals must not exceed the following levels (mg/l):

Metal concentrations must be measured in the waste leachate by the method specified in 40 CFR Part 261.24. (3-20-20)

e. Modification of Treatment Process. (3-20-20)

i. If ESII makes a decision to modify the Super Detox(R) treatment process from the description of the process as set forth in ESII’s Petition for Delisting Treated K061 Dust by the Super Detox(R) Process submitted to the Department on July 14, 1995, ESII shall notify the Department in writing prior to implementing the modification. (3-20-20)

ii. After ESII’s receipt of written approval from the Department, and subject to any conditions included with the approval, ESII may implement the proposed modification. (3-20-20)

iii. If ESII modifies its treatment process without first receiving written approval from the Department, this exclusion of waste will be void from the time the process was modified. (3-20-20)

iv. ESII’s Petition for Delisting Treated K061 Dust by the Super Detox(R) Process submitted to the Department on July 14, 1995 is available at the Department of Environmental Quality, Waste Management and Remediation Division, 1410 N. Hilton, Boise, Idaho 83706. (3-20-20)

f. Records and Data Retention and Submittal. (3-20-20)

i. Records of disposal site, operating conditions and analytical data from verification testing must be compiled, summarized, and maintained at ESII’s Grand View facility for a minimum of five (5) years from the date the records or data are generated. (3-20-20)

ii. The records and data maintained by ESII must be furnished upon request to the Department or EPA. (3-20-20)
iii. Failure to submit requested records or data within ten (10) business days of receipt of a written request or failure to maintain the required records and data on site for the specified time, will be considered by the Department, at its discretion, sufficient basis to revoke the exclusion to the extent directed by the Department.

(3-20-20)

iv. All records or data submitted to the Department must be accompanied by a signed copy of the following certification statement to attest to the truth and accuracy of the records or data submitted: “Under civil and/or criminal penalty of law for the making or submission of false or fraudulent statements or representations, I certify that the information contained in or accompanying this document is true, accurate, and complete. As to any identified sections of this document for which I cannot personally verify the truth and accuracy, I certify as the ESII official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate, and complete. In the event that any of this information is determined by the Department in its sole discretion to be false, inaccurate, or incomplete, and upon conveyance of this fact to ESII, I recognize and agree that this exclusion of waste will be void as if it never had effect or to the extent directed by the Department and that ESII will be liable for any actions taken in contravention of ESII’s RCRA and CERCLA obligations premised upon ESII’s reliance on the void exclusion.”

(3-20-20)

g. Facility Merger and Name Change. On May 4, 2001, the Department was notified of a stock transfer that resulted in ESII’s facility merging with American Ecology. This created a name change from Envirosafe Services of Idaho, Inc. (ESII) to US Ecology Idaho, Inc. effective May 1, 2001.
